**NOTICE TO DESIGN/BUILDER:**

The University of Florida Board of Trustees and University Athletic Association announce that Design/Build services will be required for the project listed below:

Project: UAA-25: Stadium Concourse Renovation, Gainesville, Florida

The project focuses on the Stadium concourse. Included in the scope are the West, East and South Concourses on both the main and upper levels plus adjacent Restrooms and Concessions. But, the project will be in phases depending on funding availability. The design scope for this phase will include west stadium concourse, and it is aimed at improving the Stadium functionality and image for both game day and non-game day use. The primary goals are as follows:

1. Update finishes for a consistent and clean appearance.
2. Reduce visual clutter especially overhead mechanical and electrical utilities.
3. Improve crowd flow.
4. Improve the functionality of Concessions for users and vendors.
5. Create exciting spaces for game day as non-game day visitors.

The total project budget is projected at \$18M. The first phase, West Concourse renovation is budgeted at \$7M including site improvement, fees, survey existing conditions, testing, and contingencies. Should additional funding become available, the project scope would be increased for additional phases. Construction for this phase shall be "fast-tracked" to begin by January 2, 2011 and completed by August 1, 2011. Based on the project scope, the appropriate LEED (Leadership in Energy and Environmental Design) certification by the U.S. Green Building Council will be utilized.

The contract for design/build services will consist of two parts. Part one services include design, construction administration, value engineering, constructability analyses, development of a cost model, estimating, and the development of a Guaranteed Maximum Price (GMP) proposal may be based on 60% Construction Documents pending the strength and experience of the D/B team, for which the design/builder will be paid a fixed fee.

If the GMP is accepted, part two, the construction phase, will be implemented. In part two of the contract, the design/builder becomes the single point of responsibility for completion of the construction documents, performance of the construction of the project and shall publicly bid trade contracts. Failure to negotiate an acceptable fixed fee for part one of the contract, or
