# Access Points for English/Language Arts: Access to the Florida Standards for Students with a Significant Cognitive Disability

Access for All

## **History of the Access Points**

Beginning in 2006, access points became the means through which students with a significant cognitive disability have accessed the general education content found in the Next Generation Sunshine State Standards (NGSSS). Access points were developed for all standards with three complexity levels that represented a continuum of understanding (participatory, supported and independent). Courses containing these standards, also known as *access courses*, were developed to support access for all students to the general education standards. These courses are setting neutral, which means a student working on access points can attend classes with non-disabled peers in general education courses. Students with a significant cognitive disability work on a “parallel curriculum” that is aligned to the general education content but delivered at the individual level of complexity needed for the student to be successful.

When the State Board of Education adopted the new Florida Standards in March 2014, it became necessary to develop new access points that are appropriate for Florida’s students. As is the case with the NGSSS, these new access points for students with a significant cognitive disability fully align with the Florida Standards. Moving forward, access courses for students with significant cognitive disabilities will be revised to contain these new access points. This way, all students can continue to access the general education standards in a way that promotes high expectations and encourages inclusive learning environments for students with a significant cognitive disability.

## **New Access Points Aligned to the Florida Standards**

Making the content of the Florida Standards personally relevant and accessible to students with a significant cognitive disability begins by articulating the general education content through access points. The new access points in English/Language Arts identify the most salient grade-level, core academic content for students with a significant cognitive disability. It is important to note that the access points are NOT “extensions” to the standards, but rather they illustrate the necessary core content, knowledge and skills students with a significant cognitive disability need at each grade to promote success in the next grade. Essential Understandings, or EUs, are supports and scaffolds that unpack the access points to assist in the teaching and learning of the standards.

## Structure of the Access Points and Related Supports

### Essential Understandings in English/Language Arts

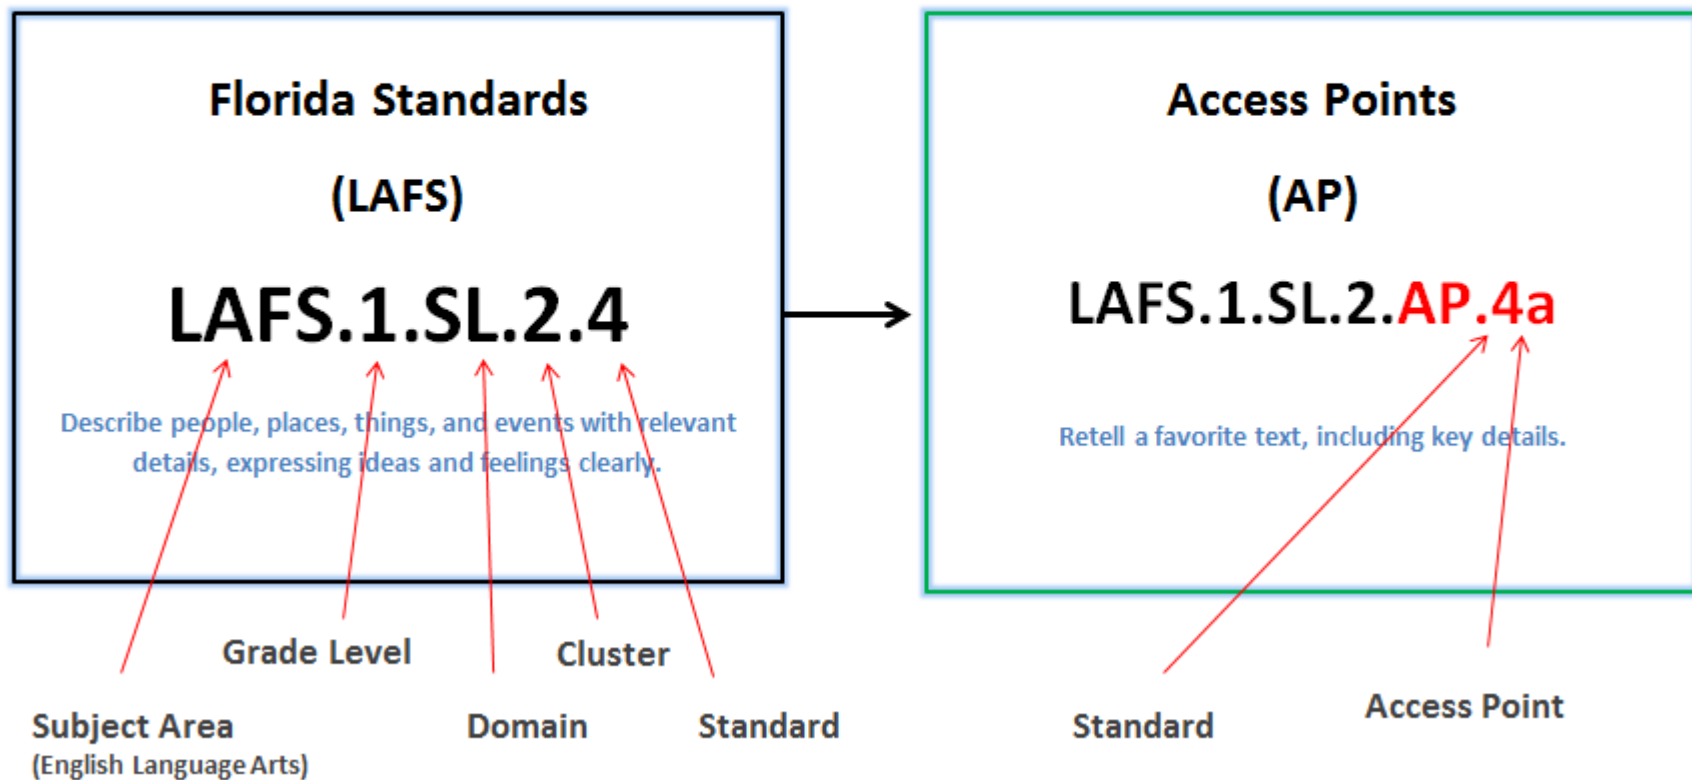

*Essential Understandings are supports and scaffolds that help teachers provide explicit instruction at a level where a student may begin to interact with the grade-level content and benchmarks along the continuum to ensure progress toward the access point.*

## Essential Understandings in English/Language Arts

Supporting the effective teaching and learning of the access points will be done by providing teachers with professional development including instruction in the use of classroom formative and summative assessments, instructional resources and supports, and lesson planning tools. One such support is the Essential Understandings, or EUs. For every access point (AP), teachers will be provided EUs. The EUs are supports and scaffolds that support a student’s learning along the continuum as they progress toward mastery of the access points.

<b>LAFS.7.RI.1.1</b>  Cite several pieces of textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.	<b>LAFS.7.RI.1.AP.1a</b>  Use two or more pieces of evidence to support inferences, conclusions or summaries of text.	Make an inference from an informational text.  Identify a conclusion from an informational text.  Identify a summary of an informational text.  Identify a detail to support the inference, conclusion or summary.
