

Specifically, the Petitioner asks whether “vein harvesting” to include making the incision, controlling bleeding with hemostats, use of electrosurgical pencils, and removing the vein in Coronary Artery Bypass Graft (CABG) surgical patients constitutes the practice of medicine that cannot be delegated to persons other than licensed physicians. The Petitioner’s request is precipitated by a ruling in Case No. 99-19728-CA-M/C in the Circuit Court of the Eighteenth Judicial Circuit In and For Brevard County, Florida.

The Board will consider this petition at its meeting scheduled for August 2-3, 2002, in Orlando, Florida. Copies of the petition may be obtained by writing: Larry G. McPherson, Jr., Executive Director, Board of Medicine, 4052 Bald Cypress Way, BIN #C03, Tallahassee, Florida 32399-3253.

DEPARTMENT OF EDUCATION

NOTICE TO CONSTRUCTION MANAGERS

Florida State University announces that construction management services will be required for the project listed below:

Project No.: BR-217

Project and Location: Alumni Center
Florida State University
Tallahassee, Florida

The project consists of renovation of the historic Macintosh House (the President’s House) to provide a welcome center for the Alumni Association. It also includes the demolition of the existing swimming pool and tennis courts, and the construction of an Alumni Hall of approximately 22,800 gs of administrative space for the operations of the Alumni Association. Also included are a series of site improvements, including parking, landscaping, storm water improvements, and site utilities. The construction of a new residence for the University President will be considered in the site planning and design of the Alumni Center, and may be included in this project based on phasing and funding. The construction budget is approximately \$4,200,000.

The contract for construction management services will consist of two phases. Phase one is pre-construction services, for which the construction manager will be paid a fixed fee. Phase one services include value engineering, constructability analyses, development of a cost model, estimating, and the development of a Guaranteed Maximum Price (GMP) at 50% Construction Document phase. If the GMP is accepted, phase two, the construction phase, will be implemented. In phase two of the contract, the construction manager becomes the single point of responsibility for performance of the construction of the project and shall publicly bid trade contracts, ensuring the inclusion of Minority Business Enterprises (MBEs). Failure to negotiate an acceptable fixed fee for phase one of the contract, or to arrive at an acceptable GMP within the time provided in the agreement may result in the termination of the construction manager’s contract.

Selection of finalists for interviews will be made on the basis of construction manager qualifications, including experience and ability; past experience; bonding capacity; record-keeping/administrative ability, critical path scheduling expertise; cost estimating; cost control ability; quality control capability; qualification of the firm’s personnel, staff and consultants; and ability to meet the minority business enterprise participation requirements. Finalists will be provided with a copy of the building program and the latest documentation prepared by the project architect/engineer, a description of the final interview
