THE PRELIMINARY TEXT OF THE PROPOSED RULE DEVELOPMENT IS:

1S-5.002 Voting System Equipment Regulations Supplement: Minimum Standards for Voter Verifiable Paper Audit Records.

(1) PURPOSE. To establish minimum standards for assessing the suitability and effectiveness of printer and paper items that produce voter verifiable paper audit records from direct recording electronic voting devices.

(2) DEFINITIONS. The following words and phrases shall be construed as follows when used in this rule:

(a) A "Ballot" when used in reference to:

1. "Paper audit record" means that printed strip of paper created by a voting device that serves as an independent verification tool to assist the voter in determining that the voter's electronic vote selections are correctly indicated. This paper record serves as an unalterable storage media that may be used as the official ballot for the purposes of a recount or audit.

2. "Electronic or electromechanical device" means a ballot that is voted by the process of electronically designating, including by touchscreen, or marking with a marking device for tabulation by automatic tabulating equipment or data processing equipment.

(b) A "Voted Ballot" means a ballot as defined above, which an elector casts by positive action.

(c) "Voting System" means a method of casting and processing votes that functions wholly or partly by use of electromechanical or electronic apparatus or by use of paper ballots and includes, but is not limited to, the procedures for casting and processing votes and the programs, operating manuals, tabulating cards, printouts, and other software necessary for the system's operation.

(d) "Voting Device" means any apparatus by which votes are registered electronically.

(e) "Election Materials" means those materials provided to poll workers to properly conduct the election and shall include, but not be limited to: legally required affidavits and forms, provisional ballots, voter authority slips, precinct registers, and any electronic devices necessary to activate ballot styles in the voting system.

(f) "Verifiable" means the capability for the voter to independently take positive action to confirm that either the electronic record and/or the paper record correctly reflects the voter's selections.

(g) "Thermal printer" means an electromechanical device that produces a printed image by selectively heating coated thermal paper when the paper passes over the thermal print head.

(h) "Contact storage container" refers to a container that prevents exposure of thermal paper to vinyl, plastics, shrink wraps, adhesives, wet-toner, or carbon papers. The container may also prevent or minimize the content's exposure to ultraviolet (UV) light and humid conditions.

(i) "Shelf life" means the maximum length of storage from the date of manufacture of thermal paper with unopened factory wrap within the specified environment that does not impact the paper's satisfactory performance or the specified image life.

(j) "Image life" refers to the expected life of a fully developed image produced by a thermal printer on thermal paper that has not exceeded its shelf life and is stored in a compatible contact storage container within the specified environment.

(k) "Useful life" refers to the retention of voting records as defined by Florida Statutes.

(3) PAPER REQUIREMENTS. Paper audit records must meet the following requirements:

(a) Must be produced by a thermal printer or other suitable print technology that minimizes the number of mechanical elements, consumables, and print failures.

(b) The minimum thermal paper grade, if applicable, should equal or exceed the grade requirements of Alpha® 200.

(c) Paper and ink, other than thermal paper, must be compatible and meet the same equivalent requirements as specified for the thermal paper grade relative to shelf life, durability, stability, fade resistance, and storage.

(d) Paper quality must retain a fully developed image for a minimum of 7 years when stored under archival dark environmental conditions in a compatible contact storage container.

(e) Paper must be of sufficient quality and reliability to permit the paper record to be audited at least twice: at the start of the initial archival storage period and once again at the end of its useful life. To demonstrate compliance with this requirement, the record produced by the mass ballot count test [see paragraph (6)(a)] must be readable before and after an accelerated life exposure test.

(4) PAPER STORAGE REQUIREMENTS PRIOR TO USE. Storage of voter verifiable paper must be compatible with the following requirements:

(a) Shelf life must meet or exceed a minimum of 3 years of storage from the date of manufacture within its unopened factory wrap under the following environmental conditions:

1. Relative humidity between 45% to 65%; maximum absolute humidity not to exceed 0.010 lbm dry air / lbm H₂O.

2. Maximum temperature not to exceed 77°F (25°C).

(b) Paper that has exceeded its maximum storage life shall not be used in an election.

(c) Paper that has experienced an environment exceeding the maximum temperature and/or humidity requirements shall not be used in an election.

(5) ARCHIVAL STORAGE REQUIREMENTS FOR PAPER AUDIT RECORD. Storage of voter verifiable paper audit records must be compatible with the following requirements.

(a) Image life must meet or exceed a minimum of 7 years after producing a fully developed image when stored in a compatible contact storage container under the following dark environmental conditions:

1. Relative humidity between 45% to 65%; maximum absolute humidity not to exceed 0.014 lbm H₂O / lbm dry air.

2. Maximum temperature not to exceed 77°F (25°C).

(b) Paper that has exceeded its maximum storage prior to nine months from the end of its useful life must be duplicated by any suitable means.

(c) Paper that has experienced an environment exceeding the maximum temperature and/or humidity requirements prior to nine months from the end of its useful life must be duplicated by any suitable means.

(6) PRINTER REQUIREMENTS. A printer that produces voter verifiable paper audit records must meet the following requirements:

(a) Satisfies the mass ballot count test of 9,900 ballots cast on a single precinct voting device with total number of votes exceeding 100,000.

(b) Minimizes the number of mechanical elements and consumables. To satisfy this requirement, the use of thermal paper printers is strongly recommended.

(c) Maintains the audit record as a continuous spool of paper or provides the audit record as cut sheets. However, each cut sheet must be a complete record of a cast ballot. In the event that the last ballot record on the spool does not represent a complete record, the voting device must void that record and allow the voter to continue voting once the paper has been refilled. This voided record must not count against the voter's allowed number of spoiled records. The audit record must not be touched by the voter or otherwise be capable of being in the possession of the voter.

(d) Does not permit the voting device or system to alter the paper record once the ballot is cast.

(e) Prints the audit record in a variable font size not to fall below 12 pt on the E-scale as measured using a type gauge. The maximum font size that may be selected by either the voter or the poll worker should not exceed 36 pt on the E-scale. The choice of a font size must not impede the readability of the audit record. Increasing the font size may force a line-wrap but must not wrap more than once.

(f) Permits the paper record to be temporarily stored in a sealable canister that is to serve as a pseudo ballot box.

1. Permit a full canister to be replaced by an empty canister without exposing the paper audit record. This requirement may be met by complete removal and replacement of the printer and paper canister assembly.

2. Election officials must secure and control the pseudo ballot box canister and its contents in a fashion similar to that of an optical scan ballot box containing cast ballots. The description of this control must be included in the county's security procedures in accordance with Rule 1S-2.015, Florida Administrative Code.

(g) Prevents a voter from spoiling more than two audit records.

(h) Prints the audit record in the same language as the electronic record.

1. Clearly indicates a spoiled audit record.

2. Clearly indicates a provisional audit record.

3. Clearly indicates an undervoted contest.

4. Clearly indicates an accepted audit record.

(i) Uses a standard, publicly documented printer port using a standard communication protocol.

(j) Provides a capability to use tamper-evident seals or other physical security to protect the connection between the printer and voting machine except by authorized election officials.

1. Provides a means to detect and make known when the connection between the voting device and the printer has been broken and log this event in the voting device’s audit record.

2. Prevents the communication of the printer with any system or machine other than the voting device to which it is connected.

(k) Limits the printer’s functionality to printing only the paper audit record. The printer should not be used to print the zero or results tapes. The printer must not be networked or used for any other purpose.

(l) Provides a capability to detect errors, malfunctions, and/or low consumables and suspend further usage of the voting device until the error condition is corrected. Either the voting device and/or the printer must indicate the error condition to the voter. This error condition must be in the voter’s selected language and must inform the voter to seek immediate resolution from a poll worker. Actions taken by election officials to correct an error condition must be in accordance with Florida Statutes that protect the ballot from disclosure. Failure to resolve an error condition must permit that active ballot from being cast either electronically or as an audit record. The voter must be permitted to cast their ballot on another voting device regardless of the number of spoiled ballots already consumed.

(m) Provides a means to protect the paper audit record when displayed to the voter. The display or protective covering must be maintainable and/or replaceable. The display must not obscure the paper audit record. There must be a method for periodically cleaning the surface.

(n) Provides the voter with the means to compare the electronic record and the paper record side-by-side and inform the voter if scrolling the record is necessary to complete this comparison.

(o) Informs the voter that scrolling in reverse is either possible or not possible.

(n) Optionally:

1. May use a unique identifier that provides a capability to link a voter verifiable paper audit record to the electronic record. However, this link may not circumvent voter secrecy.

2. Allows the voter to privately and independently verify the content of the permanent paper ballot through the conversion of printed content into an accessible media. Accessible voting equipment should provide an automated reader that converts the paper record contents into audio output.

3. Permits an alternate and independent method to tabulate the votes cast from the paper audit record.

4. Identifies multiple review pages, such as page x of y.

(7) USE OF THE VOTER VERIFIABLE PAPER RECORD. The voter verifiable paper record must:

(a) Provide the voter the option to verify that the paper audit record matches the electronic summary record prior to allowing the voter to cast the ballot.

(b) Serve as an official ballot for the purposes of an audit and/or recount.

(c) Store a duplicate of the audit record in another format in addition to the human readable form.

(d) Not reveal the identity of the voter.

RULE NOS.:	RULE TITLES:
68B-14.001	Purpose and Intent, Designation as Restricted Species
68B-14.0035	Size Limits: Amberjacks, Black Sea Bass, Gray Triggerfish, Grouper, Hogfish, Red Porgy, Snapper
68B-14.00355	Size Limits for Importation and Sale
68B-14.0036	Recreational Bag Limits: Snapper, Grouper, Hogfish, Black Sea Bass, Red Porgy, Amberjacks, Exception, Wholesale/Retail Purchase Exemption
68B-14.0045	Commercial Harvest Requirements; Licenses, Season Closures, Bag and Trip Limits
68B-14.005	Regulation and Prohibition of Certain Harvesting Gear: Allowable Gear, Incidental Bycatch, Violation

PURPOSE AND EFFECT: The purpose of these rule amendments is to modify the Commission’s Reef Fish Rule to become consistent with federal reef fish regulations in the South Atlantic and Gulf of Mexico. The South Atlantic Fishery Management Council developed regulatory actions in Amendment 13C to their Snapper Grouper Fishery Management Plan, which became effective October 13, 2006. Amendment 13C addresses recreational and commercial harvest of snowy grouper, golden tilefish, vermilion snapper, black sea bass, and red porgy, and establishes bag limits, size limits, quotas, and trip limits. The Gulf of Mexico Fishery Management Council developed regulatory actions for black, gag, and red grouper that became effective on November 17, 2006, which includes the prohibition of the possession of the recreational bag limit of grouper by the captain and crew of for hire vessels. The Council developed a Red Snapper Individual Fishing Quota Program that took effect on January 1, 2007, which eliminates the need for Class I and Class II permits. The Council is also moving forward as quickly as possible with a framework amendment to address vermilion snapper management regulations in Amendment 23. This amendment reduces the minimum size limit for 11 inches to 10 inches TL and removes the commercial closed harvesting season.

Another rule amendment not related to federal consistency is clarification of state regulatory intent by affirmatively prohibiting persons harvesting reef fish species for commercial purposes from possessing the recreational bag limit of the reef fish species on the same trip. The state allows commercial grouper fishers in the Gulf of Mexico to possess commercially harvested grouper (black and gag) with a 24-inch minimum size limit and recreationally caught grouper (black and gag)

with a 22-inch minimum size on the same trip. This presents a problem to law enforcement and allows the potential sale of undersized fish

The effect of these rule amendments will be that federal and state regulations are consistently applied. Where practicable, this minimizes confusion with the public and aids enforceability. A further effect will be to remove inconsistency in state regulations regarding reef fish size limits as applied to commercial and recreational harvest.

(The following represents proposed changes to the “Basis of Review for Water Use Permit Applications within the South Florida Water Management District – August 31, 2003”)

Section 1.8 Definitions

Allocation Coefficient through Area of Influence – No change.
Certification or Certify – means the formal determination by the District, through a validation process consistent with state and federal law, of the total amount of water made available for consumptive use by a water resource development project or project phase.

Cone of Depression through Listed Species – No change.

Lower East Coast Everglades Waterbodies – as used in Section 3.2.1.E., is defined as the surface and ground water from Water Conservation Area 1, 2A, 2B, 3A and 3B, the Holeyland/Rotenberger wildlife management areas, and the freshwater portions of Everglades National Park, as depicted in Figure 3-1.

Maximum Monthly Allocation through National Geodetic Vertical Datum (NGVD) – No change.

North Palm Beach County /Loxahatchee River Watershed Waterbodies – as used in Section 3.2.1.E., is defined as the surface and ground water from the Grassy Waters Preserve, Water Catchment Area, Pal-Mar and J.W. Corbett Wildlife Management Area, Loxahatchee Slough, Loxahatchee River, Riverbend Park, Dupuis Reserve, Jonathan Dickenson State Park, Kitching Creek, Moonshine Creek, Cypress Creek, and Hobe Grove Ditch, as depicted in Figure 3-2.

Other Surface Waters through Xeriscape – No change.

3.2.1 Restricted Allocation Areas.

A. through D. No change.

E. In addition to all other applicable consumptive use statutory and rule provisions, the following restrictions shall apply when allocating water by permit for water use withdrawals within the Northern Palm Beach County Service Area and Lower East Coast Service Areas 1, 2 or 3.

This section is a component of recovery strategies for minimum flows and levels for the Everglades and the Northwest Fork of the Loxahatchee River, as set forth in Chapter 40E-8, F.A.C., and assists in implementing the objective of the District to ensure that water necessary for Everglades restoration and restoration of the Loxahatchee River Watershed is not allocated for consumptive use upon permit renewal or modification under this rule.

(1) The additional restrictions in this section shall only apply to applications for new or modified permits or for permit renewals.

(2) Except as provided in this section, an applicant must demonstrate, pursuant to the impact evaluation provisions in Section 1.7.5.2., the requested allocation will not cause a net increase in the volume or cause a change in timing on a monthly basis of surface and ground water withdrawn from the Lower East Coast Everglades Waterbodies or the North Palm Beach County/Loxahatchee River Watershed Waterbodies (which are hereinafter referred to as the “Waterbodies”) over that resulting from the base condition water use.

The evaluation of water withdrawn from Waterbodies under this section shall address the impacts of the proposed use on surface and ground water from: (a) integrated conveyance systems that are hydraulically connected to the subject Waterbodies and are tributary to or receive water from such Waterbodies; and (b) the Waterbodies. Integrated conveyance systems that are hydraulically connected to the subject Waterbodies include primary canals used for water supply including, but not limited to, the Central and Southern Florida Project Canals, and secondary and tertiary canals that derive water from primary canals.

(3) The “base condition water use” shall be as provided below, but in no case shall exceed the withdrawal permitted to the applicant as of April 1, 2006:

(a) for the public water supply use class, the maximum quantity of water withdrawn by the applicant from the permitted source during any consecutive twelve month period during the five years preceding April 1, 2006. If a permit allocation existing as of April 1, 2006 contains an allocation based on a conversion of a water treatment system, the base condition water use shall be increased to account for the additional volume used as if the modified treatment system was operational as of April 1, 2006;

(b) for the irrigation use class, the quantity of water calculated using Section 2.3.2 to meet demands for the following: 1) the number of acres actively irrigated by the applicant over the duration of the irrigation permit

existing as of April 1, 2006; or 2) if the irrigation project, or a portion thereof, has not yet been constructed pursuant to a required surface water management construction permit or environmental resource permit as of April 1, 2006, the number of acres authorized to be irrigated by such project when constructed, consistent with a water use permit existing as of April 1, 2006;

(c) for the diversion and impoundment use class, the demands of the applicant calculated pursuant to Section 2.7.2 for the physical conditions of the diversion and impoundment system as of April 1, 2006; or

(d) for other use classes, the quantity of water withdrawn by the applicant during the twelve months preceding April 1, 2006.

In determining the base condition water use, pursuant to subsections (a) through (d) above, the District shall consider and allow adjustments if the applicant demonstrates that such use is not representative of normal operations due to unanticipated conditions affecting the actual quantity of water withdrawn, such as extreme climatic conditions or equipment failure. Only uses conducted consistent with the existing consumptive use permit limiting conditions shall be considered in identifying the base condition water use. The base condition water use shall not exceed that permitted as of April 1, 2006.

The base condition water use shall include water made available through implementation of offsets, alternative water supplies, or terminated or reduced base condition water uses, specifically required by permit limiting condition to prevent increased water from being withdrawn from the subject Waterbodies. Under these circumstances, the applicant shall demonstrate that such actions were implemented and function as required by the permit.

(4) Applicants shall conduct a preliminary evaluation to determine whether the proposed use has the potential for increasing the withdrawal of water from the Waterbodies over the applicant's base condition water use. Such preliminary evaluations may include a basic analytic impact assessment described in Section 1.7.5.2.A. or other acceptable evaluation pursuant to Section 1.7.5.

If based on a preliminary evaluation the proposed use has the potential for increasing the withdrawal of water from the Waterbodies, the following two evaluations will be compared to identify any changes in location, timing and volume of the withdrawals from the Waterbodies:

(a) A quantification of the withdrawal of surface and ground water from the Waterbodies under the base condition water use; and

(b) A quantification of the withdrawal of surface and ground water from the Waterbodies under the requested allocation.

In conducting this evaluation, the applicant shall consider the timing of the withdrawals as they affect the Waterbodies, i.e., the public water supply use class requires water throughout the year based on seasonal demand trends of the service area, versus the agriculture use class which uses water based on growing cycles of the particular crop.

When evaluating the affects of the proposed use on the Waterbodies, the applicant shall evaluate the resource efficiency of the use, i.e., the public water supply class demands are based on the demands of the service area and the type of treatment, and generally do not provide return flow to the source at the location of the withdrawal; whereas, the agricultural use class demands are based on the crop type, irrigation method and soil conditions, and typically provide some component of recharge at or near the point of withdrawal. The location component is evaluated based on the distance of the withdrawal from and the specific individual area of the subject Waterbodies as depicted in as depicted in Figures 3-1 and 3-2, e.g., Water Conservation Area 1, 2A, or 2B, or the Northwest Fork of the Loxahatchee River or Loxahatchee Slough.

(5) If the comparison of the evaluations identified in subsection (4) identifies an increase in the volume or change in timing of water requested to be withdrawn from the Waterbodies, the applicant shall do one or more of the following:

(a) Certified project water. Identify that additional water from the Waterbodies has been made available through implementation of a project for water resource development, as defined in Section 373.019(22), Florida Statutes, and such water has been certified as available by the Governing Board, as defined in Section 1.8.

(b) Offsets. Propose, identify a schedule for implementation, and construct and operate adequate offsets to eliminate the projected increase in volume or change in timing of withdrawals from the Waterbodies over the base condition water use. An offset will be approved if it prevents an increase in volume or change in timing of surface and groundwater withdrawn from the Waterbodies over the base condition water use. Offsets include the use of recharge systems and seepage barriers that meet the above requirement;

(c) Alternative water supply. Propose, identify a schedule for implementation, and construct and operate alternative water supplies, as defined in Section 373.019(1), Florida Statutes. An alternative water supply will be approved under this rule if it is adequate to meet the reasonable increased demands without causing an increased volume or change in timing of the withdrawal from the Waterbodies over the base condition water use;

(d) Terminated or reduced base condition water use. Identify terminated or reduced base condition water uses as stated below. The request will be approved if the

applicant demonstrates that the requested allocation does not cause an increase in volume or change in timing of withdrawals from the Waterbodies over the applicant's base condition water use due to the reduction or elimination of other base condition water uses that existed on April 1, 2006. The applicant must demonstrate that water is available through providing documentation of the modification or termination of the historic consumptive use permit prior to issuance of the proposed permit under this rule; or,

(e) Available wet season water. Identify water is available during the wet season as set forth below. The wet season water will be approved if the applicant demonstrates that water is available under the conditions described below during the wet season, provided the applicant demonstrates that such water is not required to achieve the restoration benefits to the Waterbodies pursuant to the Comprehensive Everglades Restoration Plan, North Palm Beach County Comprehensive Water Management Plan, and the Acceler8 program. Water available under these conditions shall be limited to the wet season discharges that are projected to persist following implementation of the entire Comprehensive Everglades Restoration Plan, North Palm Beach County Comprehensive Water Management Plan, and the Acceler8 program.

1. Available surface water discharges during the wet season shall be identified based on best available information at the time of permit application evaluation used to quantify surface water flows from or to the restored Waterbodies, as reflected in the Comprehensive Everglades Restoration Plan, North Palm Beach County Comprehensive Water Management Plan, and the Acceler8 program, in their entirety;

2. Available wet season surface water discharges will be identified based on 1 in 10 drought conditions during May 1st through November 1st, as determined by annual rainfall statistics measured from gauges that are proximal to the applicant's point of withdrawal defined in Part B Water Use Management System Design and Evaluation Aids, Part IV Supplemental Crop Requirement and Withdrawal Calculation; and,

3. Wet season surface water requested by the applicant must be derived within the same hydrologic area where the available surface water is identified.

The District will assist the permit applicant in identifying the best available information necessary to make the determination of wet season water availability. Offsets, alternative water sources and terminated or reduced base condition water uses implemented after April 1, 2006 shall be considered in

addressing requested increases in withdrawals from Waterbodies under this section. Notwithstanding, as stated in subsection (3), water made available from the permitted source through offsets, alternative water supplies and terminated or reduced base condition water uses implemented consistent with permit limiting conditions to prevent increased water from being withdrawn from the subject Waterbodies, shall be considered in the base condition water use.

(6) Consistent with subsection (5), the permit applicant may obtain an allocation for additional water from the Waterbodies over the applicant's base condition water use, as identified below:

(a) Certified project water. Water certified by the Governing Board as available for consumptive use through operation of a water resource development project, as provided in paragraph (5)(a);

(b) Temporary allocation. Water temporarily required to meet the applicant's reasonable demands while implementing an alternative water supply pursuant to paragraph (5)(c) or while implementing an offset identified pursuant to paragraph (5)(b). The permit will be conditioned with dates and milestones for development of the alternative water supply or offset. A temporary allocation shall be reduced to be consistent with this section when the alternative source is projected to be available, consistent with permit limiting conditions. The temporary allocation shall be adjusted, as necessary, to reflect the offset on the Waterbodies when the offset is projected to be available, consistent with the permit limiting conditions.

The limiting conditions governing the quantity and time period for the temporary allocation shall be based on expected due diligence of the permit applicant, as determined by applying the factors in subparagraphs 1. through 3., below, to implement the alternative water supply or offset in an expeditious manner, not to exceed five years unless specifically approved by the Governing Board. The time period shall be determined considering the following factors:

1. The projected time period for design, receipt of necessary authorizations, and construction of the alternative supply or offset;

2. The timing of demands to be met from the alternative supply or offset;

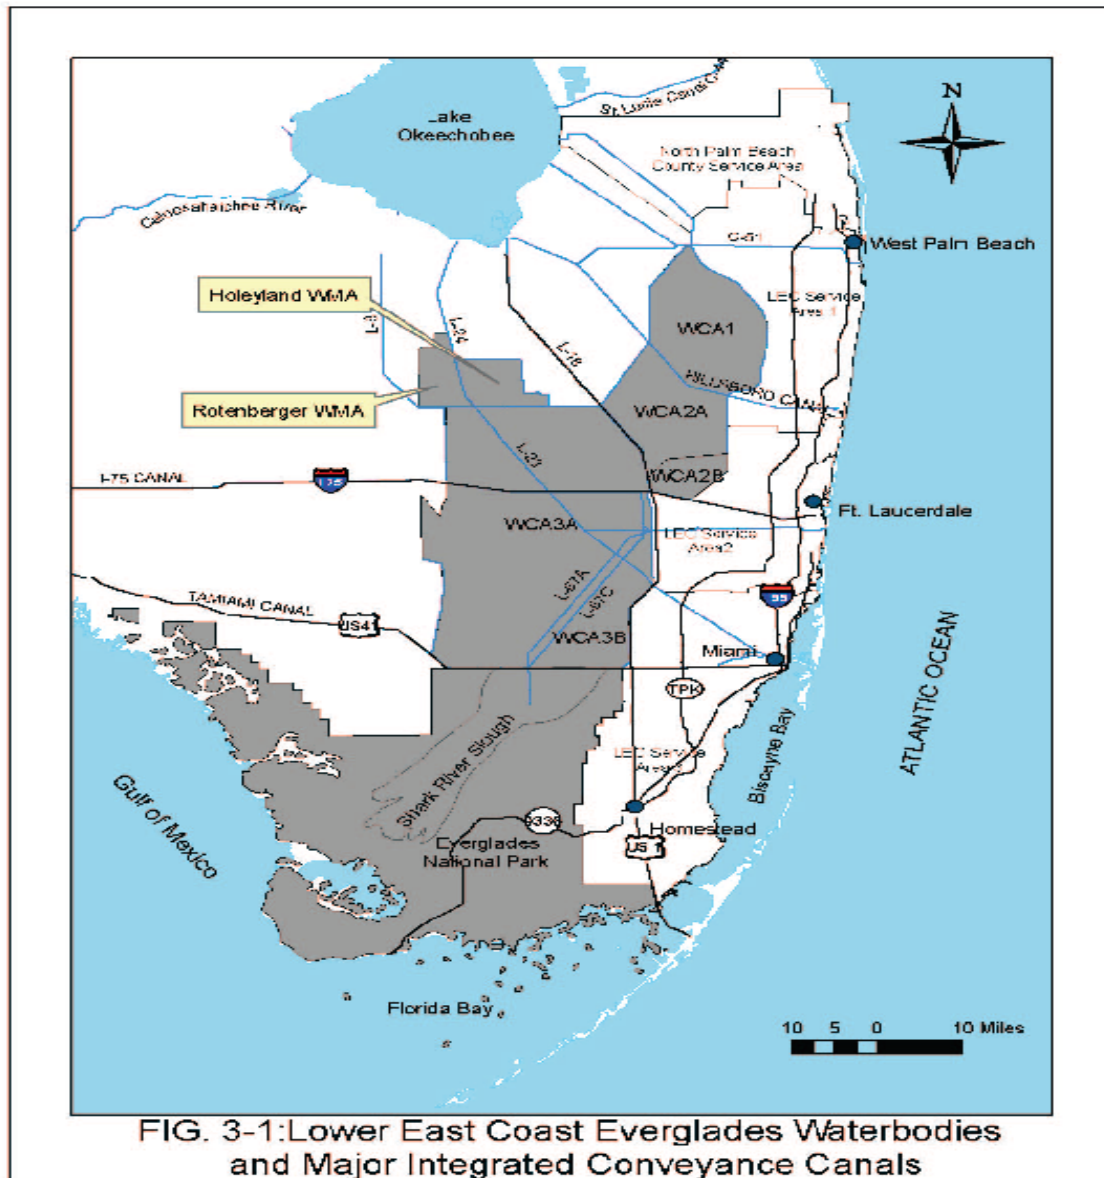

3. Other factors that indicate the reasonable period required to develop the alternative supply or offset.

(c) Water made available through implementation of offsets or the termination or reduction of base condition water use withdrawals. Water made available through implementation of offsets pursuant to paragraph (5)(b) or water made available through the termination or reduction of other users' base condition water use withdrawals pursuant to paragraph (5)(d), consistent with permit limiting conditions; or,

(d) Available wet season water. Water available during the wet season, provided the applicant demonstrates that such water is not required to achieve the restoration benefits to the Waterbodies pursuant to the Comprehensive Everglades Restoration Plan, North Palm Beach County Comprehensive Water Management Plan, and the Acceler8 program, pursuant to paragraph (5)(e). Pursuant to permit limiting conditions, additional surface water withdrawals will be permitted only

when flood control regulatory releases are being made, and not when water supply deliveries are being made, from the Waterbodies.

(7) Permit applicants must meet the requirements of any established minimum flow and level and water reservation, if applicable.

40E-8.421 Prevention and Recovery Strategies.

(1)(a) through (b) No change.

(c) The rules implementing water resource protection tools, including Chapters 40E-2, 40E-8, 40E-20, 40E-21, and 40E-22, F.A.C., and the “Basis of Review for Consumptive Use Permits Within the South Florida Water Management District _____, 2007”, identify the specific factors and conditions that will be applied and considered in implementing the conceptual model. Due to the extreme variations in water resource conditions, climatic conditions, hydrologic conditions, and economic considerations that will be faced when implementing these rules, it is critical to apply such criteria flexibly and to reserve for the governing board the ability to implement water resource protection and allocation programs considering all of the District’s missions under Chapter 373, F.S., and to balance water supply, flood protection, resource protection and water quality protection needs. Implementation of the recovery and prevention strategies will be achieved in compliance with the assurances to consumptive users and to natural systems contained in the LEC Plan and the LWC Plan.

(d) through (f) No change.

(2) through (6) No change.

(7) Northwest Fork of the Loxahatchee River Recovery Strategy: Purpose and Intent.

(a) The Northwest Fork of the Loxahatchee River is currently not meeting the MFL and requires implementation of a recovery strategy to achieve the MFL as soon as practicable,

consistent with Section 373.0421, F.S. The recovery strategy consists of projects contained within the following approved plans: the Lower East Coast Regional Water Supply Plan (LEC Plan), the Comprehensive Everglades Restoration Plan (CERP), and the Northern Palm Beach County Comprehensive Water Management Plan (NPBCCWMP). Four phases of recovery are identified in the Technical Documentation to Support Development of Minimum Flows and Levels for the Northwest Fork of the Loxahatchee River, November 2002, which are projected to increase flows to meet the MFL for the Northwest Fork of the Loxahatchee River. As part of the recovery strategy, as provided in this rule, the consumptive use permitting and water shortage requirements in this Chapter and Chapters 40E-2, ~~40E-20, and 40E-21~~, F.A.C., and the “Basis of Review for Water Use Permit Applications within the South Florida Water Management District – _____, 2007”, including Section 3.2.1.E. regarding Restricted Allocation Areas for Lower East Coast Everglades Waterbodies and North Palm Beach County/Loxahatchee River Watershed Waterbodies, shall apply to consumptive use direct and indirect withdrawals from surface and groundwater sources from the Northwest Fork of the Loxahatchee River and those areas directly tributary to the Northwest Fork.

(b) through (g) No change.

RULE CHAPTER NO.: RULE CHAPTER TITLE:
64E-15 Mobile Home, Recreational Vehicle, and Lodging Parks and Recreational Camps
RULE NO.: RULE TITLE:
64E-15.005 Sanitary Facilities

PURPOSE AND EFFECT: Currently recreational vehicle (RV) parks must have a certain number of sanitary facilities, dump stations and potable water supply stations, based on the number of RV spaces in the park. However, if an RV park only allows self contained recreational vehicles and has a water and sewer hook-up at each RV site, the sanitary facilities

requirement is redundant. The proposed change will remove the need for redundant sanitary facilities (showers, toilets, urinals, handwashing fixtures), dump stations and potable water supply stations in RV parks. The effect of this change will eliminate a financial burden on persons regulated by the department.

SUMMARY: The proposed amendment to Rule 64E-15.005, F.A.C., establishes an exemption from department required sanitary facilities, dump station and potable water rules for RV parks that only allow self contained recreational vehicles on site.

SUMMARY OF STATEMENT OF ESTIMATED REGULATORY COST: No statement of estimated regulatory cost has been prepared.

Any person who wishes to provide information regarding a statement of estimated regulatory costs, or provide a proposal for a lower cost regulatory alternative must do so in writing within 21 days of this notice.

RULE TITLE: Manufactured and Prototype Buildings

PURPOSE AND EFFECT: To adopt procedures for inplant review and inspection of plans and manufactured and prototype buildings which will make them uniform with the Florida Building Code.

SUMMARY: The proposed amendment allows the option of having plans review and inspection of manufactured and prototype buildings done at the manufacturing plant, as long as the review and inspection is done by a person currently certified as a firesafety inspector under Section 633.081(2), F.S. If the option is exercised, the Manufacturer's Modular Data Plate will reflect compliance with Chapter 633, F.S., and the rules of the Department. The local fire official must recognize and approve the manufactured building, subject only to acceptable performance testing of lifesafety systems, and site conditions. If the Manufacturer's Modular Data Plate reflects that an inplant review and inspection has not been conducted, the local firesafety inspector must conduct a firesafety inspection and require all modifications necessary to bring the building into compliance with Chapter 633, F.S., and the rules of the Department.

Notice of receipt of the petition requesting the waiver was published in the issue Vol. 32, No. 47, F.A.W., on November 22, 2006. No public comment was received. This Order provides a waiver of the District's criteria to allow an existing wood rail fence (located on top of the existing bulkhead) and a portion of an existing residence building to remain within the south right of way of C-6 adjacent to 8211 N. W. South River Drive; S11/T53S/R40E, Miami-Dade County. Specifically, the Order grants a waiver from subsections 40E-6.011(4) and (6), F.A.C., and the Basis of Review for Use or Occupancy of the Works or Lands of the District Permit Applications within the

South Florida Water Management District, incorporated by reference in subsection 40E-6.091(1), F.A.C., which governs the placement of permanent and/or semi-permanent above-ground facilities within forty feet of top of the canal bank within Works or Lands of the District. Generally, the Order sets forth the basis of the Governing Board decision to grant the waiver, as follows: 1) the facilities will not significantly interfere with the SFWMD's ability to perform necessary construction, alteration, operation and maintenance activities; and 2) the Order granting a waiver from the subject rule would prevent James W. Brownell and Bessie L. Landis from suffering a substantial hardship and a violation of the principles of fairness.

A copy of the Order can be obtained from: Kathie Ruff, South Florida Water Management District, 3301 Gun Club Road, MSC 1410, West Palm Beach, FL 33406-4680, (561)682-6320 or by e-mail kruff@sfwmd.gov

Notice of receipt of the revised petition requesting a waiver was published in the issue Vol. 32, No. 49, F.A.W., on December 8, 2006. No public comment was received. This Order provides a waiver of the District's criteria for the proposed construction of a pavilion with decking, light fixtures with buried electrical service, landscaping, signage, fencing, asphalt parking area, curb and stormwater treatment facilities to be placed within the east right of way of C-13, immediately north of the Powerline Road Bridge; S28/T49S/R42E, Broward County. Specifically, the Order grants a waiver from subsections 40E-6.011(4) and (6), and paragraph 40E-6.221(2)(j), F.A.C., and the Basis of Review for Use or Occupancy of the Works or Lands of the District Permit Applications within the South Florida Water Management District, incorporated by reference in subsection 40E-6.091(1), F.A.C., which governs the placement of permanent and semi-permanent above-ground facilities within 40 feet of the top of the canal bank, placement of drainage treatment facilities and parking/vehicular use and signage within Works or Lands of the District. Generally, the Order sets forth the basis of the Governing Board decision to grant the waiver, as follows: 1) the facilities will not significantly interfere with the SFWMD's ability to perform necessary construction, alteration, operation and maintenance activities; and 2) the Order granting a waiver from the subject rule would prevent the City of Wilton Manors from suffering a substantial

hardship. A copy of the Order can be obtained from: Kathie Ruff, South Florida Water Management District, 3301 Gun Club Road, MSC 1410, West Palm Beach, FL 33406-4680, (561)682-6320 or by e-mail kruff@sfwmd.gov

DEPARTMENT OF FINANCIAL SERVICES

NOTICE IS HEREBY GIVEN that the Department of Financial Services, Division of State Fire Marshal, has received a Petition for Declaratory Statement filed January 19, 2007, from Sonia Machen of Miami Beach Fire Department, Petitioner. This request for Declaratory Statement is for clarification of sprinkler protection for a terrace instead of a balcony open on three sides. Many buildings are designed with a terrace with walls on three sides. The terrace is a space recessed inside the footprint of the building with living space on the other side of the three walls.

The terrace with living space on three sides forms a compartment that would provide enough heat collection for activation of a sprinkler head as opposed to an open balcony where a sprinkler head would not activate due to the open three sides. The terrace would likely contain combustible furniture, grill, etc. found in typical apartment units. The wall surrounding the terrace may be noncombustible but not fire rated as one wall is normally the glass sliding doors.

QUESTION:

1. Does the design of a terrace as described above require sprinkler protection in order to provide full coverage as required in NFPA 13, Section 4.1.?

2. Does the answer change if there is a living space above the Terrace?

A copy of the Petition may be obtained by writing to, calling, or sending a fax to: Lesley Mendelson, Assistant General Counsel, 200 East Gaines Street, Tallahassee, Florida 32399-0340, (850)413-3604, or (850)413-4238; Fax (850)922-1235 or (850)488-0697 (please advise if you would like it mailed or faxed to you and please include your phone number on your request in case any question arises), or by e-mailing your request to Lesley.Mendelson@fldfs.com.

NOTICE IS HEREBY GIVEN that the Department of Financial Services, Division of State Fire Marshal, has received a Petition for Declaratory Statement filed January 30, 2007, from Edward Riley, Fire Code Official, Fire Districts of Collier County, Petitioner. The Petition requests clarification regarding Section 553.79(2), Florida Statutes, Section 633.121, Florida Statutes, and Section 105.13 of the Florida Building Code, and specifically asks the Division of State Fire Marshal:

1. Does the building official have the authority to issue phased permits without the approval of the "appropriate" firesafety inspector?
2. Florida Statute 553.79(2) refers to the "appropriate" firesafety inspector. Would the "appropriate" firesafety inspector be a person certified pursuant to 633.081 Florida Statute, who must also be authorized pursuant to Florida Statute 633.121?
3. If the answer to number 2 is no, who would qualify as the "appropriate" firesafety inspector?

A copy of the Petition may be obtained by writing to, calling, or sending a fax to: Lesley Mendelson, Assistant General Counsel, 200 East Gaines Street, Tallahassee, Florida 32399-0340, (850)413-3604, or (850)413-4238; Fax (850)922-1235 or (850)488-0697 (please advise if you would like it mailed or faxed to you and please include your phone number on your request in case any question arises), or by e-mailing your request to Lesley.Mendelson@fldfs.com.
