**Southwest Florida Water Management District**

RULE NO.: RULE TITLE:

40D-1.607 Permit Processing Fee

PURPOSE AND EFFECT: The purpose of this rulemaking is to amend the District's permit processing fee rule to adopt standardized permitting fee categories for Environmental Resource Permits (ERPs). This is being done as part of a statewide ERP rulemaking effort being undertaken by the Department of Environmental Protection in conjunction with the state's five water management districts, pursuant to Section 373.4131, F.S. Each water management district as well as the DEP will be adopting the same standardized fee categories, for statewide consistency. The effect of this rulemaking will be to have standardized fee categories applicable statewide for various types of activities that require an ERP or for which a request for confirmation of qualification of exemption, an informal or a formal determination of wetland or other surface water is requested or a variance or waiver of permitting rules is sought. Each water management district and DEP will establish its own fees within each fee category, to be based upon existing fees. It is anticipated that the new fee categories will not take effect until the statewide ERP rules take effect, which are proposed to become effective in July 2013.

SUMMARY: Pursuant to Section 373.4131(1), F.S., the Department of Environmental Protection (DEP) in coordination with the state's water management districts, shall undertake rulemaking to establish statewide Environmental Resource Permitting (ERP) rules to promote more consistent statewide regulation of activities associated with the construction, alteration, maintenance, repair, abandonment or removal of any stormwater management system, dam, impoundment, reservoir, appurtenant work, works or any combination thereof. The statewide ERP rules are required to

address certain provisions which include standardized fee categories for activities regulated under Part IV of Chapter 373, F.S. Accordingly, the District is amending its fee Rule 40D-1.607, F.A.C., to include the standardized fee categories developed by DEP and to delete provisions relating to ERP fees that, upon adoption, will no longer be applicable to ERP-related activities. The amendments will conform the District's fee provisions relating to ERPs, formal and informal determinations of the landward extent of wetlands and other surface waters, verifications of qualification for exemptions, and requests for variances and waivers to the fee categories proposed by DEP. For ERPs, fees are tiered based upon whether the application is for new activity or modification of an existing project, the size of the project in terms of project area and the extent of work proposed in wetlands or other surface waters. Reduced fees are provided for electronically submitted applications and applications from the U.S. Department of Defense. Existing District fee reductions for short form modifications are retained. A fee is provided for informal determinations of wetlands and other surface waters which, according to statutory amendments made in 2008, were required to have a minimum fee of \$100.

**SUMMARY OF STATEMENT OF ESTIMATED REGULATORY COSTS AND LEGISLATIVE RATIFICATION:**

The Agency has determined that this will have an adverse impact on small business or likely increase directly or indirectly regulatory costs in excess of \$200,000 in the aggregate within one year after the implementation of the rule. A SERC has been prepared by the agency.

The District assigned fees to the standardized fee categories established by DEP, based upon existing District fees for similar activities. The District prepared a Statement of Estimated Regulatory Costs which shows that for most applicants, fees for the same activities will be the same or lower than what is currently charged. In general, an average fee reduction of \$310 will occur. However, in a few instances, fees for an average of 287 applications annually may be higher. The study further indicated that the District will experience a fee revenue reduction of approximately \$187,000 annually.

Any person who wishes to provide information regarding a statement of estimated regulatory costs, or provide a proposal for a lower cost regulatory alternative must do so in writing within 21 days of this notice.

**NOTICE OF CORRECTION**

Notice is hereby given that the following correction has been made to the proposed rule published in the Vol. 39, No. 38, February 25, 2013 issue of the Florida Administrative Register. As indicated in its initial Notice of Proposed Rule, the Department has determined that the proposed rule is not anticipated to have an adverse impact on small business, and is not anticipated to directly or indirectly increase regulatory costs in excess of \$200,000 in the aggregate within 1 year of the rule’s implementation. As such, pursuant to Sections 120.54(3)(b) and 120.541(1)(b), Florida Statutes, the Department has not prepared a statement of estimated regulatory costs in connection with this rule promulgation. Moreover, the Department has determined that the proposed rule does not meet any of the criteria specified in Section

120.541(2)(a), Florida Statutes, which would otherwise trigger the requirement for legislative ratification specified in Section 120.541(3), Florida Statutes. In reaching these determinations, the Department expressly relied on various internal assessments and analysis of both the time and difficulty of completing the various screening instruments, relative to the forms which are presently utilized by the Department, to understand whether the forms might potentially lengthen or complicate the assessment process. As part of this internal analysis, the Department conducted a partial piloting of portions of the screening instruments which led it to conclude that the forms generated numerous efficiencies in terms of streamlining and simplifying the assessment process, while the reformatted forms themselves were crafted to ensure more accurate and rapid data collection.

The Suwannee River Water Management District (SRWMD) hereby gives notice that on May 8, 2013, granted a Final Order. This Order (13-0001) granted variance/waiver under Section 120.542, F.S., to Robert Ficocelli, 11131 117th Lane, Seminole, FL 33778. The petition for variance was received by SRWMD on March 29, 2013. Notice of receipt of petition requesting variance was published in F.A.R., Vol. 39, Number 73, on April 15, 2013. No public comment was received. This Order provides variance/waiver from SRWMD from paragraph 40B-4.3030(12)(b), F.A.C., as to the 75-foot setback requirement. Petitioner requests this waiver/variance because there are no alternative locations available due to the location of the other various structures on the property, county building set-back requirements and protection of wetland resources, located in Dixie County, Township 9 South, Range 13 East, Section 36. The petition was assigned ERP Number 06-0392M, R. Ficocelli District Floodway Project. SRWMD granted the petition because the petitioner has demonstrated that the purpose of the statute underlying the rule will be met and that a substantial hardship would be created if the petitioners were required to comply with this rule.
