Proposed Rules

DEPARTMENT OF ENVIRONMENTAL PROTECTION

RULE NO.: RULE TITLE:
62-304.505 Middle St. Johns River Basin TMDLS
PURPOSE AND EFFECT: The purpose of the rule is to adopt nutrient Total Maximum Daily Loads (TMDLs), and their allocations, for the Volusia Blue Spring and Volusia Blue Spring Run in the Middle St. Johns River Basin. Furthermore, upon paragraph 62-302.531(2)(a), F.A.C., becoming effective, the nitrate TMDL for these segments will constitute a site specific numeric interpretation of the narrative nutrient criterion set forth in paragraph 62-302.530(47)(b), F.A.C., that will supersede the otherwise applicable numeric nutrient criteria in subsection 62-302.531(2), F.A.C., for these particular surface water segments.
SUMMARY: This TMDL addresses certain nutrient impairments in the Middle St. Johns River Basin. Specifically, the nutrient TMDL rule being proposed for adoption is a nitrate TMDL for Volusia Blue Spring and Volusia Blue Spring Run.

The waterbodies were verified as impaired for nutrients using the methodology established in Chapter 62-303, F.A.C., Identification of Impaired Surface Waters. Development of the TMDL was based on statistical analysis of water quality data with corresponding biological response data. This rulemaking has been given an OGC case number 13-1490.

SUMMARY OF STATEMENT OF ESTIMATED REGULATORY COSTS AND LEGISLATIVE RATIFICATION:

The Agency has determined that this will have an adverse impact on small business or likely increase directly or indirectly regulatory costs in excess of \$200,000 in the aggregate within one year after the implementation of the rule. A SERC has been prepared by the Agency.

There are no NPDES wastewater facilities in the contributing area of these impaired waterbodies that are permitted by the Department. Implementation costs associated with municipal separate storm sewer system (MS4) permits are estimated to be \$20,931,500 per year.

Pursuant to paragraph 403.067(6)(c), Florida Statutes, the proposed rule does not require legislative ratification.

Any person who wishes to provide information regarding a statement of estimated regulatory costs, or provide a proposal for a lower cost regulatory alternative must do so in writing within 21 days of this notice.

RULEMAKING AUTHORITY: 403.061, 403.067 FS.

LAW IMPLEMENTED: 403.061, 403.062, 403.067 FS.

IF REQUESTED WITHIN 21 DAYS OF THE DATE OF THIS NOTICE, A HEARING WILL BE SCHEDULED AND ANNOUNCED IN THE FAR.

THE PERSON TO BE CONTACTED REGARDING THE PROPOSED RULE IS: Richard Hicks, Division of Environmental Assessment and Restoration, Ground Water Management Section, Mail Station 3575, Florida Department of Environmental Protection, 2600 Blair Stone Road, Tallahassee, Florida 32399-2400, telephone: (850)245-8229

THE FULL TEXT OF THE PROPOSED RULE IS:

62-304.505 Middle St. Johns River Basin TMDLs.

(1) through (14) No change.

(15) Volusia Blue Spring and Volusia Blue Spring Run.

The nutrient TMDL is a monthly arithmetic mean nitrate concentration of 0.35 mg/L at the spring vent of Volusia Blue Spring and in-stream for Volusia Blue Spring Run, and is allocated as follows:

(a) The WLA for wastewater sources is not applicable.

(b) The WLA for discharges subject to the Department's NPDES municipal separate storm sewer system (MS4) permitting program is to address anthropogenic sources in the basin such that in-stream nitrate concentrations meet the TMDL

target, which will require a 45 percent reduction of nitrate based on the mean concentrations from the 2001-2013 period.

(c) The Load Allocation (LA) for nonpoint sources is to address anthropogenic sources in the basin such that in-stream nitrate concentrations meet the TMDL target, which will require a 45 percent reduction of nitrate based on the mean concentrations from the 2001-2013 period.

(d) The Margin of Safety is Implicit.

Furthermore, upon paragraph 62-302.531(2)(a), F.A.C., becoming effective, the nutrient TMDLs for these segments will constitute site specific numeric interpretations of the narrative nutrient criterion set forth in paragraph 62-302.530(47)(b), F.A.C. that will supersede the otherwise applicable numeric nutrient criteria in subsection 62-302.531(2), F.A.C. for these particular surface water segments.

SUMMARY: These TMDLs address certain nutrient impairments in the Springs Coast Basin. Specifically, the nutrient TMDL rules being proposed for adoption are nitrate TMDLs for Weeki Wachee Spring and the freshwater segment of the Weeki Wachee River, total nitrogen and total phosphorus TMDLs for Kings Bay, and nitrate and orthophosphate TMDLs for Hunter Spring, House Spring, Idiot's Delight Spring, Tarpon Spring, and Black Spring. The waterbodies were verified as impaired for nutrients using the methodology established in Chapter 62-303, F.A.C., Identification of Impaired Surface Waters. Petitions and Dispositions Regarding Rule Variance or Waiver

DEPARTMENT OF BUSINESS AND PROFESSIONAL REGULATION

Division of Hotels and Restaurants

RULE NO.: RULE TITLE:

61C-1.004 General Sanitation and Safety Requirements

The Florida Department of Business and Professional Regulation, Division of Hotels and Restaurants hereby gives notice:

On February 20, 2014 the Division of Hotels and Restaurants received a Petition for an Emergency Variance for paragraph 61C-1.004(1)(a), Florida Administrative Code, Paragraph 5-202.11(A), 2009 FDA Food Code, Paragraph 4-301.12(A), 2009 FDA Food Code and subsection 61C-4.010(5), Florida Administrative Code, from Juiceblendz Section 416 located in Miami. The above referenced F.A.C. addresses the requirement that each establishment have an approved plumbing system installed to transport potable water and wastewater, facilities for manually washing, rinsing and sanitizing equipment and utensils, and areas for food preparation and storage. They are requesting to install holding tanks at a portable handwash sink, and share warewashing, food preparation and food storage areas with another licensed food service establishment under the same ownership and on the same premise.

The Petition for this variance was published in Vol. 40, No. 39 of the Florida Administrative Register on February 26, 2014. The Order for this Petition was signed and approved on March 4, 2014. After a complete review of the variance request, the Division finds that the application of this Rule will create a financial hardship to the food service establishment. Furthermore, the Division finds that the Petitioner meets the burden of demonstrating that the underlying statute has been achieved by the Petitioner ensuring the wastewater holding tank for the handwash sink is emptied at a frequency as to not create a sanitary nuisance; potable water provided must come from an approved source and be protected from contamination during handling.

The Petitioner shall also ensure that the handwash sink is provided with hot and cold running water under pressure, soap, an approved hand drying device and a handwashing sign. The Petitioner shall also ensure that the three-compartment sink, food preparation and storage areas within Main Kitchen (NOS2327931) are maintained in a clean and sanitary manner and all sinks are provided with hot and cold running water under pressure and are available during all hours of operation. If the ownership of Main Kitchen (NOS2327931, Levy Premium Food Service Limited Partnership) changes, a signed agreement for use of the shared facilities is required immediately.

A copy of the Order or additional information may be obtained by contacting: Lydia.Gonzalez@myfloridalicense.com, Division of Hotels and Restaurants, 1940 North Monroe Street, Tallahassee, Florida 32399-1011.

The Petition for this variance was published in Vol. 40, No. 39 of the Florida Administrative Register on February 26, 2014. The Order for this Petition was signed and approved on March 4, 2014. After a complete review of the variance request, the Division finds that the application of this Rule will create a financial hardship to the food service establishment. Furthermore, the Division finds that the Petitioner meets the burden of demonstrating that the underlying statute has been achieved by the Petitioner ensuring the wastewater holding tank for the handwash sink is emptied at a frequency as to not create a sanitary nuisance; potable water provided must come from an approved source and be protected from contamination during handling. The Petitioner shall also ensure that the handwash sink is provided with hot and cold running water under pressure, soap, an approved hand drying device and a handwashing sign. The Petitioner shall also ensure that the three-compartment sink and food preparation and storage areas within Main Kitchen (NOS2327931) are maintained in a clean and sanitary manner and all sinks are provided with hot and cold running water under pressure and are available during all hours of operation. If the ownership of Main Kitchen (NOS2327931, Levy Premium Food Service Limited Partnership) changes, a signed agreement for use of the shared facilities is required immediately.
