RULE NO.: RULE TITLE:

62-41.300 Central Florida Water Initiative Area, Scope of Rule

62-41.301 Central Florida Water Initiative Area, Uniform Conditions for Issuance of Permits

62-41.302 Central Florida Water Initiative Area, Supplemental Applicant’s Handbook

62-41.303 Central Florida Water Initiative Area, Variances to the Uniform Rules

62-41.304 Central Florida Water Initiative Area, Uniform Process for Setting Minimum Flows and Minimum Water Levels and Water Reservations

62-41.305 Central Florida Water Initiative Area, Applicability of the Dover/Plant City and Southern Water Use Caution Area Recovery Strategies

PURPOSE AND EFFECT: The purpose and effect of this rulemaking is to comply with the requirements set forth in s. 373.0465(2)(d), F.S., enacted during the 2016 legislative session. The rulemaking will provide for uniform rules for consumptive use permitting within the Central Florida Water Initiative Area. This will impact consumptive use applicants and permittees within the Central Florida Water Initiative Area, which includes all of Orange, Osceola, Polk, and Seminole Counties, and southern Lake County, as designated by the Central Florida Water Initiative Guiding Document of January 30, 2015, available online at http://cfwiwater.com/pdfs/CFWI_Guiding_Document_2015-01-30.pdf.

SUBJECT AREA TO BE ADDRESSED: The rulemaking will provide for uniform rules for application within the Central Florida Water Initiative Area on the following topics: 1. A single, uniform definition of the term “harmful to the water resources” consistent with the term’s usage in s. 373.219; F.S. 2. A single method for calculating residential per capita water use; 3. A single process for permit reviews; 4. A single, consistent process, as appropriate, to set minimum flows and minimum water levels and water reservations; 5. A goal for residential per capita water use for each consumptive use permit; and 6. An annual conservation goal for each consumptive use permit consistent with the regional water supply plan. In addition, the rule will include a process by which the agency may grant variances to the uniform rules based on unique circumstances or hydrogeological factors that make application of the uniform rules unrealistic or impractical. Finally, the rule will include existing recovery strategies within the Central Florida Water Initiative Area adopted before July 1, 2016. The only recovery strategies meeting that description are the Dover/Plant City and Southern Water Use Caution Area Recovery Strategies.

NOTICE OF CORRECTION

Notice is hereby given that the following correction has been made to the proposed rule in Vol. 42 No. 212, October 31, 2016 issue of the Florida Administrative Register.

The SUMMARY OF STATEMENT OF ESTIMATED REGULATORY COSTS AND LEGISLATIVE RATIFICATION statement is changed to read as follows: The Agency has determined that this will not have an adverse impact on small business or likely increase directly or indirectly regulatory costs in excess of \$200,000 in the aggregate within one year after the implementation of the rule. A SERC has not been prepared by the agency.

The Agency has determined that the proposed rule is not expected to require legislative ratification based on the statement of estimated regulatory costs or if no SERC is required, the information expressly relied upon and described herein: The Department has revised its consideration of the economic impact of the rule based on updated comparative data and rates of application under existing law and accordingly revised the “Proposed Rule: Is a SERC Required” checklist. Based on these revisions, the estimated adverse impact or regulatory costs of the rule do not exceed any of the criteria established in section 120.541, F.S., and is therefore not expected to require legislative ratification.
