Environmental Protection Agency

§ 141.203

TABLE 1 TO § 141.202—VIOLATION CATEGORIES AND OTHER SITUATIONS REQUIRING A TIER PUBLIC NOTICE—Continued

- (4) Violation of the MRDL for chlorine di xit e, as defined in § 141.65(a), when one or
 more samples taken in the distribution systen the day following an exceedance of
 the MRDL at the entrance of the distribution system exceed the MRDL, or when
 the vater system does not take he required samples in the distribution system,
 as specified in § 141.133(c)(2)(i);
- (5) Violation of the turbidity McL under § 141.13 b), where the primacy agency determines after consultation that a Tier 1 notice is required or where consultation does not take place within 24 hours after the system leans of the violation
- (6) Violation of the Surface Water Treatment Rule (SWTF), Interim Enlanced Surface Water Treatment Rule (IESWTR) or Long Term 1 Enhanced Surface Water Treatment Rule (L'11ESWTR) treatment technique requirement resuring from a single exceedance of the maximum allowable turbidity limit (as identified in appendix A), where the primacy agency determines after consultation that a Ter 1 notice is required or where consultation does not take place within 24 hours after the system learns of the violation:
- (7) Occurrence of a waterborne disease outbreak, as defined in § 41.2, or other waterborne emergency (such as a failure or significant interruption in key water treatment processes, a natural disaster that disrupts the water supply or distribution system, or a chemical spill or unexpected loading of possible pathodens into the source water that significantly increases the potential for drinking water contamination):
- (8) Detection of E. coli, enterococci, or coliphage in source water samples as specified in § 141.402(a) and § 141.402(b);
- (9) Other violations or situations with significant potential to have serious adverse effects on human health as a result of short-tern exposure, as determined by the primary agency either in its regulations or on a sase-by-case basis.
- b) When is the Tier 1 public notice to be provided? What additional steps are required? Public water systems must
- (1) Provide a public notice as soon as practical but no later than 24 hour

after the system learns of the viola-

- (2) Initiate consultation with the primicy agency as soon as practical but no later than 24 hours after the public water system learns of the violation or situation, to determine additional public notice requirements; and
- (3) Comply with any additional public notification requirements including any repeat notices or direction on the duration of the posted notices) that are established as a result of the consultation with the primacy agency. Such requirements may include the timing. form, manner, frequence , and content of repeat notices (if any and other actions designe to reach all persons served.
- (c) What is the form and manner of the public notice? Rubl c water systems must provide notice within 24 hours in a form ar manner reasonably calculated to real all persons served. The form and mann'r used by the pubto fit the specific lic water system are situation, but must be designed to reach residential, transient, and nontransient use's of the water system. In order to read h all persons served, water systems are to use, at a minimum, one or more of the following firms of delivery:
- (1) Appropriate broadcast media (such as radio and television)
- (2) Fosting of the notice in conspicuous locations throughout the area served by the water system;
- (3) Hand delivery of the notice to persons served by the water system; or
- () Another delivery method approved in writing by the primacy agency.

 R 1836, Jan. 14, 2002; 71 FR 65652, Nov. 8
 2006; 78 FR 10350, Feb. 13, 2013

§ 141.203 Tier 2 Public Notice—Form, manner, and frequency of notice.

(a) Which violations or situations require a Tier 2 public notice? Table 1 of this section lists the violation categories and other situations requiring a Tier 2 public notice. Appendix A to this subpart identifies the tier assignment for each specific violation or situation.

- ABLE 1 TO § 141.203—VIOLATION CATEGORIS
 AND OTHER SITUATIONS REQUIRING A HER 2
 PUBLIC NOTICE
- (1) All violations of the MCL, MRDL, and treatment technique requirements, except where a Tier 1 notice is required under § 141 202(a) or where the primacy agency determines that a Tier 1 notice is required.
- (2) Violations of the monitoring and testing procedure requirements, where the primacy agency determines that a Tier 2 rather than a Tier 3 public notice is required, taking into account potential health impacts and persistence of the violation; and
- (c) Failure to comply with the terms and conditions of any variance or exemption in place.
- (4) Failure to take corrective action or failure to maintain at least 4-log treatment of viruses (using inactivation, removal or a State approved combination of 4-log virus inactivation and removal) before or at the first customer under § 141.403(a)
- (b) When is the Tier 2 public notice to be provided? (1) Public water systems must provide the public notice as soon as practical but no later than 30 days after the system learns of the violation. If the public notice is posted, the notice must remain in place for as long as the violation or situation persists, but in no case for less than seven days, even if the violation or situation is resolved. The primacy agency may, in appropriate circumstances, allow additional time for the nitial notice of up to three months from the date the system learns of the violation. It is not appropriate for the primacy agency to grant an extension to the 30-day deadline for any unresolved violation or to allow across-the-board extensions by rule or policy for other violations or situations requiring a Tier 2 public notice. Extensions granted by the primacy agency must be in writing.
- (2) The public water system must repeat the notice every three months as long a the violation or situation persists. unless the primacy agency determines that appropriate circums ances warrant a different repeat notice frequency. In no circumstance may the eat notice be given less frequently an once per year. It is not app riate for the primacy agency to all less frequent repeat notice for an MC

- or treatment technique violation und he Total Coliform Rule or subpart Y this part or a treatment technique plation under the Surface Wa ter Thatment Rule or Interim Enhanced Surface Water Treatment Rule. t is alsd not appropriate for the pri agency to allow through its rules or policies across-the-board reductions in the repeat notice frequency fo other ongoing violations requiring Tier 2 repeat notice. Primacy agend determinations allowing repeat not ces to be given less frequently than once every three months must be in writing.
- (3) For the turbidity violations specified in this paragraph, public water systems must consult with the primacy agency as soon as practical but no later than 4 hours after the public water system learns of the violation, to determine whether a Tier 1 public notice under §141 202(a) is required to protect public health. When consultation does not take place within the 24-hour period, the water vstem must distribute a Tier 1 notice of the violation within the next 2 ours (i.e., no later than 48 hours after the system learns of the violation), following the requirements under §141.2 2(b) and (c). Consultation with th e rimacy agency is required for:
- (i) Violation of the turbidity MCL under §141.13(b) or
- (ii) Violation of the WTR, IESWTR or LT1ESWTF treatment technique requirement resulting from a single exceedance of the maximum allowable turbidity limit.
- the form and manner of the (c) What Tier 2 public notice? Public water syst provide the initial public any repeat notices in a form tems mus notice an and marner that is reasonably calculated to reach persons served in the time period. The form and require manne of the public notice may vary based on the specific situation and type of water system, but it must at a minimui meet the following re men ts:
- (1) Unless directed otherwise by the primacy agency in writing, community water systems must provide notice by:
- (i) Mail or other direct delivery to ach customer receiving a bill and to other service connections to which

vater is delivered by the public water system; and

(ii) Any other method reasonably cu ated to reach other persons r y served by the system, if hey would not normally be reached by the notice required in paragraph (c)((i) of ection. Such persons may this s nclude who do not pay water bil those s or do not have service connection ddresses (e.g., house renters, apartment dwellers, university students, nur ing home patients, prison inmates, c.). Other methods may include: Publication in a local news aper; delivery of multiple distribution copies for v customers that provide their drinking water to others (e.g., a artment uilding owners or large private emplo ers); posting in public places served the system or on the Internet; or de livery to community organization

(2) Unless directed otherwise by the primacy agency it writing, non-community water systems must provide notice by:

(i) Posting the notice in conspicuous locations throughout the distribution system frequented by persons served by the system, or by mail or direct delivery to each sustomer and service connection (where known); and

(ii) Any other method reasonably calreach other persons served culated to by the sy tem if they would not normally reached by the otice required i paragraph (c)(2)(i) of this section. S ch persons may include those who may not see a poste notice served becan e the posted notice is not in a lothey routinely pass by. Other ods may include: Publication met in a l newspaper or newsletter dis ribd to customers; use of E-mail to noly employees or students; or, deliv multiple copies in central location e.g., community centers).

[65 FR 26035, May 4, 2000, as amended at 67 FR 1836, Jan. 14, 2002; 71 FR 65652, Nov. 8, 2006; 78 FR 10350, Feb. 13, 2013]

\$141.204 Tier 3 Public Notice—Form, manner, and frequency of notice.

(a) Which violations or situations require a Tier 3 public notice? Table 1 of this section lists the violation categories and other situations requiring a Tier 3 public notice. Appendix A to this subpart identifies the tier assum-

ment for each specific violation or sination.

TABLE 1 TO § 141.204—VIOLATION CATEGORIES AND OTHER SITUATIONS REQUIRING A TUR 3 FUBLIC NOTICE

- Monitoring violations under 40 CFF part 141 except where a Tier 1 notice is required under § 141.202(a) or where the primacy agency determines that a Tier 2 notice is required;
 Failure to comply with a testing procedure
- (2) Failure to comply with a testing procedure established in 40 CFR part 1-1, except where a Tier 1 notice is required under §141.202(a)) or where the primacy agency determines that a Tier 2 notice is required;
- (3) Operation under a variance granted under Section 1415 or an exemption granted under Section 1416 of the Safe Drinking Water Act;
- (4) Availability of unregulated contaminant monitoring results, as required under § 141.207;
- (5) Exceedance of the luoride secondary maximum contaminant level (SMCL), as required under § 41.2.8; and
- (6) Reporting and Recordkeeping violations under subpart Y of 4 CFR part 141.
- er 3 public notice to (b) When is the be provided? (1) ullic water systems must provide t ublic notice not later than one year after the public water system larns of the violation or situation or b gins operating under a variance or e emption Following the initial notice the public water system must repeat he notice annually for as long as the iolation, variance, exemption, or other situation persists. If the public noti e is posted, the notice must remain in place for as long as the violation, variance, exemption, or other situation persists, but in no case less than seven days (even if the violation or situation resolved).
- (2) Instead of individual Tier 3 public notices, a public water system may use an annual report detailing all violations and situations that occurred during the previous twelve months, as long as the timing requirements of paragraph (b)(1) of this section are met.
- c) What is the form and manner of the Ter 3 public notice? Public water systems must provide the initial notice and any repeat notices in a form and nanner that is reasonably calculated
