**NOTICE TO CONSTRUCTION MANAGERS:**

The University of Florida Board of Trustees announces that CM-At-Risk services will be required for the project listed below:

Project: UF-366, Auxiliary and High-Density Library Storage Facility (Gainesville, FL)

The project consists of the renovation of an existing offsite library storage facility, the addition of a high-density storage facility, the creation of a new main facility entry, and associated sitework and utilities infrastructure.

The estimated construction budget is approximately \$12.4M, but construction funds have not been appropriated at this time. The scope includes new construction, phased renovations, mechanical and electrical upgrades, repairs and upgrades to the existing building envelope, site hardscape and landscape work, and other scopes of work as outlined in the Facilities Program. Gold LEED (Leadership in Energy and Environmental Design) certification by the U.S. Green Building Council is mandatory, at least for the new high-density storage addition. Design and construction documents will be created using Building Information Modeling (BIM) software, and the CM will be expected to use these models and participate in the creation of record (“as built”) models for the Owner’s use.
