RULE NOS.: RULE TITLES:
 64E-3.003 Qualifications for Examination
 64E-3.0034 Speciality Technologists

PURPOSE AND EFFECT: To implement Chapter 2012-168, L.O.F., to include a new specialty technologist category. To create rule language necessary to ensure conformity to statutory requirements and the current practices and procedures for radiological personnel.

SUMMARY: Provides for a new specialty technologist license type, Positron Emission Tomography. Revises application forms, and specifies application procedures, national organizations, required documents, titles, initials, and duties for this new license type.

SUMMARY OF STATEMENT OF ESTIMATED REGULATORY COSTS AND LEGISLATIVE RATIFICATION:

The Agency has determined that this will not have an adverse impact on small business or likely increase directly or indirectly regulatory costs in excess of \$200,000 in the aggregate within one year after the implementation of the rule. A SERC has not been prepared by the Agency.

The Agency has determined that the proposed rule is not expected to require legislative ratification based on the statement of estimated regulatory costs or if no SERC is required, the information expressly relied upon and described herein: This rulemaking implements Chapter 2012-168, L.O.F., to create new a specialty technologist licensure. The department's analysis of the potential adverse impact and potential regulatory costs of the proposed rule did not exceed the criteria for a SERC established in section 120.541(2)(a), F.S. As part of this analysis, the department relied upon its own experiences with other rulemaking and licensure of this type; the legislative bill analysis of CS/HB309 which became Chapter 2012-168, L.O.F. and which indicated a maximum of \$28,000 revenue collected in each of the first and second years, as well as minimal regulatory costs; the fact that the new license types are issued to individuals not small businesses; the fact that existing technologists currently working in the areas of the new licensure are not required to obtain the new licensure; and the expertise and experience of the members of the state Advisory Council on Radiation

Protection, made up of members representing the radiologic technology profession and various other radiation-related professions, which supported the new law and this rulemaking. Therefore, this rulemaking will not have an adverse impact or regulatory costs in excess of \$1 million within five years as established in s.120.541(2)(a), F.S.

Any person who wishes to provide information regarding a statement of estimated regulatory costs, or provide a proposal for a lower cost regulatory alternative must do so in writing within 21 days of this notice.
