(b) Well Construction Requirements: Rule 62-524.550, F.A.C., Well Construction Requirements for New Potable Water Well Permitting in Delineated Areas is incorporated by reference, effective 12-9-96, <https://www.flrules.org/Agency/addRefResult.asp?No=Ref-09097>.

1. New potable water wells shall comply with the minimum construction standards contained in Chapter 40A-3, F.A.C., and additional requirements assigned by the permitting authority relative to depth restrictions, location of screened or open hole interval, and length of casing where warranted by local specific information.

2. Methods of constructing new potable water wells shall be limited to rotary drilling, boring, or other method specifically approved by the permitting authority which meets the water well construction criteria in this chapter and as required below:

a. Well casing and liner pipe shall be new, free of breaks, corrosion and dents, straight and true, and not out of round.

Welded or seamless black or galvanized steel pipe or casing, or stainless steel pipe or casing, or approved types of nonmetallic pipe shall be used for well casing or liner pipe.

b. Solvent-bonded couplings shall be prohibited in areas with known ground water contamination which includes solvent components.

c. To prevent the interchange of water and loss of artesian pressure, contaminated, unconfined ground water intervals shall be sealed off prior to drilling through the underlying confining interval. Uncontaminated, unconfined ground water intervals shall be sealed off or otherwise protected prior to drilling into deeper, contaminated ground waters.

d. For any well casing installed in a bore hole with an annular space around the casing, the annular space shall be filled from bottom to top with not less than a nominal two inch thickness of neat cement grout.

e. A concrete pad measuring three feet by three feet by four inches shall be constructed around the elevated portion of the casing so that the casing is centered in the pad to prevent soil erosion and seepage of surface contamination into the annular space.

f. A minimum elevation of one foot of casing above land surface shall be required.

g. A raw water tap shall be provided to allow sampling of the well before exposure to storage or treatment.

h. The well casing shall be visibly and permanently marked above the land surface with the latitude and longitude and the permit number issued by the permitting authority for that well.

i. To the extent practical, potable water wells shall be located outside any delineated area identified in Section 40A-3.041(1)(a), F.A.C.

j. Where the source of contamination and the direction of ground water flow are known, in a delineated area identified in Section 40A-3.041(1)(a), F.A.C., to the extent practical, potable water wells shall be located upgradient of the source.

k. New potable water wells shall be located on ground least subject to inundation.

l. Any new potable water well constructed within a delineated area that does not meet the construction standards of this section shall be abandoned and plugged in accordance with Section 40A-3.531, F.A.C., and applicable water management district rules.

3. New potable water wells shall be tested by the Department or other delegated authority using methods as specified by the Department in accordance with Section 373.309, F.S., for the presence in the untreated water of the ground water contamination which resulted in the delineation. The Department shall accept only test results obtained from water samples collected and analyzed by the Department of Health. The well construction permit applicant shall be

responsible for the cost of sample collection, shipping, and analysis.

a. If no ground water contamination is found upon testing of a new potable well in a delineated area, the Department of Health shall be responsible for the issuance of a letter of clearance to the well construction permit applicant.

b. If ground water contamination is found upon testing or other ground water contamination is found, a well shall not be cleared for use without a demonstration, through water quality testing, that a filter or other permanent remedy prevents the users of the well from being exposed through ingestion, inhalation, or dermal absorption, as appropriate for a contaminant, to ground water contamination.

4. Exemption from the requirements for construction of wells in delineated areas shall be granted to an applicant by the District or the permitting authority upon demonstration using hydrogeological, water quality, and other pertinent information that the exemption will not result in the impairment of the intent and purpose of this chapter. Detailed requirements for each exemption shall be negotiated between the permit applicant and the permitting authority on a case by case basis.

(c) Permit Requirements: Rule 62-524.700, F.A.C., Permit Requirements for New Potable Water Wells in Delineated Areas is incorporated by reference, effective 12-9-96, <https://www.flrules.org/Agency/addRefResult.asp?No=Ref-09096>.

1. A construction or modification permit shall be obtained pursuant to Rule 40A-3.041, F.A.C., for all new potable wells prior to installation or conversion. Applicants shall submit a proposed well design with the completed application, and the permit fee, to the District. In addition to the general requirements of this chapter, the permit shall address the following requirements through special conditions:

a. Well construction including method of construction, depth, location of cased and screened intervals, casing material and grouting.

b. Any special cleaning requirements for casing or drilling equipment.

c. Water quality testing.

d. Unique well identifiers where needed.

2. Permitting and construction of new potable water wells, except for a well to be used for a public water system, are prohibited in delineated areas where a distribution line of an available potable water system is within 500 feet of the boundary of the property for which a well construction permit is being sought. Such prohibition applies unless the property owner or applicant obtains documentation from the public water system or the Department's Water Supply Restoration and Replacement Program, and submits such documentation to the permitting entity, which demonstrates either of the following:

a. That economic factors caused by physical or legal impediments to construction to a distribution line prevent the property owner or permit applicant from obtaining potable water through connection to the distribution line; or

b. That necessary water distribution line extension (excluding plumbing and meters) cannot be completed within 30 days of application to the Department for water supply restoration or replacement.

(d) ~~Prohibited Acts: Rule 62-524.740, F.A.C., Violations and Penalties for New Potable Water Wells in Delineated Areas is incorporated by reference, effective 3-25-90, <https://www.flrules.org/Agency/addRefResult.asp?No=Ref-09095>.~~

1. It shall be a violation of Section 373.309, F.S., and this chapter to construct, repair, convert from non-potable use, or abandon any potable water well, or use for human consumption any well subject to permit under this chapter without having obtained a permit pursuant to this section. This prohibition shall apply to both the water well contractor and the well owner.

2. It shall be a violation of Section 373.309, F.S., and this chapter to use for human consumption, after delineation, any water well subject to permit under this section without having performed water quality testing pursuant to Section 40A-3.041(1)(b)3., F.A.C.

3. It shall be a violation of Section 373.309, F.S., and this chapter to use for human consumption, after delineation, any water well subject to permit under this section in which contaminants have been found without a demonstration through water quality testing that a filter or other means of preventing the users of such well from being exposed to ground water contamination is effective.

(e) Penalties.

1. Any person who violates any provision of this chapter pertaining to delineated areas, orders regarding delineated areas, or permits issued in delineated areas under the authority of this chapter shall, upon conviction, be guilty of a misdemeanor of the second degree, punishable as provided in Section 775.082 and 775.083, F.S. Continuing violation after an order or conviction shall constitute a separate violation for each day the violation occurs.

2. Any water well contractor who is in violation of Section 40A-3.041(1)(d)1., F.A.C., shall, in addition to Section 40A-3.041(1)(e)1., F.A.C., also be subject to the penalty provisions in Chapter 62-531, F.A.C., which is incorporated by reference in Section 40A-3.037(1), F.A.C., including the license suspension and revocation provisions contained therein.

53ER18-26 EZmatch™ Retailer Bonus Sales Commission Promotion.

(1) Beginning June 4, 2018, and continuing through July 29, 2018, (Promotional Period) the Florida Lottery will conduct the EZmatch™ Retailer Bonus Sales Commission Promotion. The Florida Lottery will pay Florida Lottery retailers a ten percent bonus sales commission in addition to the standard five percent sales commission set forth in Rule 53ER13-46 F.A.C., Retailer Compensation, on portions of the following specific plays sold during the Promotional Period:

- (a) FLORIDA LOTTO® with EZmatch;
- (b) FLORIDA LOTTO with XTRA and EZmatch;
- (c) FANTASY 5® with EZmatch; and

The ten percent bonus sales commission will apply only to the EZmatch or the XTRA with EZmatch play and not to the base game play. For example, a retailer will earn a \$.35 total sales commission for selling a \$3.00 FLORIDA LOTTO with XTRA and EZmatch ticket (\$.05 on the FLORIDA LOTTO base game play, \$.15 on the XTRA play and \$.15 on the EZmatch play). A FLORIDA LOTTO with XTRA play is not eligible for a bonus sales commission.

(2) The standard sales commissions will be reflected on the retailer's weekly Settlement Report.

(3) The bonus sales commissions will be reflected on the retailer's weekly Settlement Report as an adjustment credit as follows: (1) following the end of the 2017-2018 fiscal year for bonus sales commissions earned June 4 through June 30, 2018, and (2) following the conclusion of the Promotional Period for bonus sales commissions earned July 1 through July 29, 2018.

(4) Retailers whose Florida Lottery contracts are terminated or inactivated prior to payment of the EZmatch bonus sales commissions shall be paid the bonus sales commissions earned provided said termination or inactivation was not due to noncompliance with Chapter 24, Florida Statutes, Chapter 53, Florida Administrative Code, or terms of the retailer contract.

(5) EZmatch bonus sales commissions will be considered compensation to a retailer and will be reported to the Internal Revenue Service by the Florida Lottery. The Florida Lottery reserves the right to apply bonus sales commissions earned against a retailer's outstanding debt to the Florida Lottery, and to award the remaining balance of the bonus sales commissions, if any.

The estimated construction cost is approximately \$33,000,000, with a Total Project Cost of \$40,000,000.

The Contract for Construction Management services will consist of two phases. Phase one is pre-construction services, for which the Construction Manager will be paid a fixed fee and will be responsible to the University to assist in working with the A&E firm to manage the process to meet the Project Budget, Scope and Schedule. Phase one services include development of a cost model, constructability analyses, value analysis and potential value engineering, estimating, and the development of a Guaranteed Maximum Price (GMP) to include all construction and labor necessary to deliver a fully-functional and complete building based upon the 50% Construction Documents. If the GMP is accepted, phase two, the construction phase, will be implemented. In phase two of the Contract, the Construction Manager becomes the single point of responsibility for performance of the construction of the project to meet the project goals and shall publicly bid trade contracts, ensuring the inclusion of Certified Business Enterprise (CBE) including certified Minority (MBE), Women (WBE), and Veteran (VBE) Business Enterprises. Early bid packages for fast track and multi-phase development may be required to meet

project goals. Failure to negotiate an acceptable fixed fee for phase one of the contract, or to arrive at an acceptable GMP within the time provided in the agreement may result in the termination of the construction manager's contract. The respondent must be capable of bonding at 100% of the value of the contract with a surety licensed to do business in the State of Florida with a Best Rating A, Class IX. Project development including construction management services is contingent upon availability of funds. If additional funding is realized, the USF has the option to incorporate additional scope/funding under this Contract. Any new construction projects shall be USGBC LEED certified, to a minimum certification level of Silver, as required by the Owner, and shall be included as part of basic services and will not be considered as an additional service.
