(2) Authorization to Use Force

(a) The following authorization to use force is subject to every other provision of this rule. Department staff, and staff of a contractor who are responsible for supervising inmates, are authorized to apply force on an inmate only when they reasonably believe it to be necessary to:

1. Defend himself, herself, or others against imminent or already occurring unlawful force;

2. Prevent a person from escaping from a state correctional institution or any facility when the staff member reasonably believes that person is lawfully detained in such institution or facility;

3. Gain custody of an escaped inmate;

4. Prevent damage to property;

5. Quell a disturbance;

6. Overcome an inmate’s physical resistance to a lawful command;

7. Prevent an inmate from inflicting any self-injury or from attempting to commit suicide; or

8. Restrain an inmate to permit the administration of medical treatment under the supervision of a physician or his or her designee when treatment is necessary to protect the inmate from self-injury or death, or to protect the health of others.

(b) Force is necessary only when it would be unreasonable to pursue other means of attempting to achieve one of the objectives listed in (2)(a). Force is an option of last resort, to be used only when non-force options were attempted and were ineffective or when the circumstances reasonably preclude attempting or continuing non-force alternatives to achieve one of the objectives listed in paragraph (2)(a).

(c) Any force used must be reasonable, lawful, and of the minimum amount necessary to achieve the objective(s) from the above list that justified force.

(d) The custodial grasp is not force.

(e) Mere verbal abuse is not a sufficient basis to authorize the use of force.

(3) Determination of Method of Force

(a) If a department staff member determines that force should be used, he or she must determine which of a variety of methods of force to use or to seek to use.

(b) For many of the use of force situations faced by Department staff members and contractor staff, Department rule or policy provides specific guidance as to which method(s) would be authorized or prohibited. However, if Department rule or policy does not provide specific guidance for the use of force situation faced by a Department staff member or contract employee, the person pursuing the use of force should pursue a method, or methods, of force that they reasonably believe, based on their training and experience, is lawful, consistent with Department rules and policies, and is most appropriate under the circumstances.

(4) Use of Force – General and Miscellaneous Provisions.

(a) Many of the guidelines and restrictions for the use of force set forth in this rule pertain only to a specific method of force, and sometimes to only the reactionary or organized use of such a method. However, where applicable, the provisions of this subsection apply to the use of force generally.

(b) Miscellaneous Use of Force Protocol.

1. Any use of force shall cease whenever an inmate complies with orders or ceases the behavior which justified the use of force.

2. Use of force shall not be applied for punishment. Physical restraints such as handcuffs, leg irons, flex cuffs, and other such devices shall only be used for restraint purposes and not for punishment.

3. Inmates shall not be carried, dragged, or lifted by restraint devices. This shall not be construed to prohibit the use of an escort chair pursuant to Rule 33-602.212, F.A.C.

4. Hands-on force shall not be used if injury is less likely to occur by using chemical agents, specialty impact munitions, or EIDs.

5. If an inmate who is secured in a cell fails to comply with a lawful command to cease his or her prevention of staff from closing a food flap/cuff port cover, staff shall pursue an organized use of force.

6. Reactionary use of force to prevent an inmate from self-harm shall only be used in the most extreme cases when the action of the inmate has caused observable injuries, the inmate is attempting to hang him/herself, or the inmate possesses an instrument for self-injury and the risk is imminent and life threatening.

(c) Video Recording Protocol.

1. General.

a. Video recordings of all use of force incidents shall continue uninterrupted from commencement of recording until the situation is stable and under control and the inmate is placed in a secure cell or transport vehicle for transfer.

b. The camera operator shall, to the best of his or her ability, ensure that all staff actively involved in any use of force and captured within the view finder of the camera is identified by rank/title and name.

2. Reactionary Use of Force.

a. A video camera operator shall commence recording all reactionary use of force incidents upon arrival at the scene as soon as possible. At a minimum, the camera operator shall verbally identify themselves as well as stating the date, time, and location of the incident when commencing recording.

b. In the event of a reactionary use of force, once the camera operator and shift supervisor arrive on the scene, the shift supervisor upon assessing the situation and being properly briefed shall make a brief statement noting the reason(s) for the use of force. This shall be prior to the conclusion of recording and include:

(I) The rank/title and name of staff involved in the use of force;

(II) The rank/title and name of any staff who were present, but not involved in the use of force;

(III) The name and DC number of the inmate(s) involved;

(IV) The type and amount of force used;

(V) Any other pertinent information that he or she deems relevant.

3. Organized Use of Force.

a. All organized use of force incidents shall be video recorded unless exigent or emergency circumstances prevent such action.

b. The shift supervisor during any organized use of force shall include in each video recorded markers of the following:

(I) Date and time of the recording;

(II) Location of the recording;

(III) Name and rank of supervisor(s) present;

(IV) Name and rank of person authorizing use of chemical agent (if applicable);

(V) Name and DC number of the inmate involved in the use of force;

(VI) Name of the camera operator;

(VII) Brief description of efforts taken to stabilize or control the inmate prior to the application of force;

(VIII) Final warning order administered by a supervisor or incident commander;

(IX) Clear, concise, and audible verbal warning to the inmate of pending application of force or entry into cell for extraction;

(X) Application of chemical agents;

(XI) Verbal order for a decontamination shower;

(XII) Decontamination of the inmate;

(XIII) Any medical examination performed after the use of force;

(XIV) Physical escort and placement in a decontaminated cell after incident;

(XV) Verbal refusals by inmates to participate in decontamination or medical examination (if applicable);

(XVI) The name and rank of each Department staff member present.

c. Anytime there is a change in the on-scene supervisor or other staff during an application of an organized use of force, a new video recording will be initiated and the requirements in subparagraph (4)(c)1., and sub-subparagraphs 3.a. and b., shall be repeated.

d. In the event that the inmate ceases his or her disruptive behavior after being issued a final order while the shift supervisor and camera operator are present with a camera, but resumes such conduct after the shift supervisor and camera operator have departed the area prior to an application of chemical agents, the shift supervisor shall recommence video recording.

e. In all cases where the administration of chemical agents is subsequently required, video recording will resume prior to the application of chemical agents, to include a statement referring to the originating incident, and continue until completion as directed in sub-subparagraph (4)(c)1.a.

4. Post-Use of Force. Video recordings of post-use of force medical exams shall be conducted through a window or at a distance in such a manner so as to provide the maximum amount of privacy needed for the exams and so as to limit the disclosure of inmate protected health information to the minimum amount necessary. The fact that the footage is taken through a window or at a sufficient distance is to keep communication between the inmate and medical staff confidential and to ensure that only the minimum amount of protected health information—e.g., visible injuries or the lack thereof—is disclosed. Inmates involved in an organized use of force shall be video recorded continually until they have been placed in a vehicle for transportation or in a secure cell.

(5) Use of Chemical Agents.

(a) General.

1. All chemical agents shall be used with caution and in accordance with the manufacturer's instructions.

2. Authorization for an organized use of force application of chemical agents within an institution may only be given by the warden or designee.

3. Authorization to Use CS instead of OC.

a. CS may be used during cell extractions and other in-cell incidents if OC applications previously administered were ineffective in obtaining compliance or ceasing disruptive actions or physically threatening behavior.

b. The warden or designee may authorize the use of CS as an initial primary chemical agent whenever past applications of

OC to an inmate were documented on a use of force narrative report as having been applied and ineffective.

c. The warden or designee may authorize the use of CS as an initial or primary chemical agent during in-cell applications whenever an inmate attempts to deploy a shield, barrier, or obstruction in an obvious attempt to avoid contact with an application of chemical agents. Justification for the use of CS whenever an inmate barricades or presents physical obstructions to counter chemical agent applications shall be noted on the use of force narrative report.

4. Only staff members who have received training in the use of chemical agents may discharge, carry, possess, or use chemical agents within an institution, except during emergencies such as riots or disasters or at the direction of the warden or designee.

(b) Reactionary use of chemical agents on inmates outside of controlled conditions.

1. Officers may utilize chemical agents to compel the cessation of an inmate's violence or resistance to orders. During emergency situations with multiple inmates in an outside area, chemical agents may be applied to quell the disturbance. In reactionary use of force situations, chemical agents are authorized for disbursal in a continuous manner until the moment the inmate(s) become(s) compliant with lawful orders.

2. An inmate shall at no time be removed from his or her assigned cell or placed at an alternate location, have clothing removed, or be restrained for the purpose of chemical agent application. If an officer administers chemical agents while an inmate is handcuffed or wearing restraints, and removal of such restraints was not possible prior to the application, the officer shall record an explanation of the circumstances in the use of force narrative report.

(c) Use of Chemical Agents on Inmates in Controlled Conditions.

1. The warden or designee shall be consulted and his or her written use of force authorization must be obtained for any organized use of force, prior to application of chemical agents. The person who was responsible for submitting the use of force authorization shall prepare, date, and sign the authorization either prior to or immediately after the end of the shift in which force was used. If the authorization for use of force is granted after normal working hours, the authority granting the action shall sign the use of force authorization within one day following the incident, excluding weekends and holidays.

2. When an inmate in a controlled condition creates a disturbance, or the officer's ability to provide unit security is adversely impacted by an inmate's behavior, and the inmate refuses to comply with clear and audible orders to cease his or her behavior, the following steps will be followed unless there is an emergency or other circumstances arise that would dictate alternative actions.

a. The housing unit supervisor will counsel with the inmate, ordering compliance with lawful commands or cessation of the behavior that would justify using force.

b. If the inmate remains non-compliant, the confinement lieutenant, close management lieutenant, or shift supervisor will counsel with the inmate, ordering compliance with lawful commands or cessation of the behavior that would justify using force.

c. If the inmate remains non-compliant, prior to issuance of a final order to an inmate ordering compliance or cessation of the behavior that would justify using force, the confinement lieutenant, close management lieutenant or shift supervisor shall have control room staff check the Bed Inventory List to ascertain whether the inmate involved is classified as S-2 or higher. During regular work hours, if the involved inmate is S-2 or higher, the housing lieutenant or shift supervisor shall have a qualified mental health professional, if available, or CIT-trained security staff member provide crisis intervention and attempt to de-escalate the situation and prevent a use of force. After regular work hours, the housing lieutenant or shift supervisor shall have an uninvolved CIT-trained officer speak with the inmate in an attempt to de-escalate the situation and prevent a use of force.

d. If the inmate remains non-compliant or continues in his behavior that would justify using force and it is evident that the use of chemical agents is necessary to gain control of the inmate while minimizing the risk of injuries to others the housing lieutenant or shift supervisor shall ensure that the following order of events takes place:

(I) Uninvolved inmates in the cell or immediate area shall be given the opportunity to exit or depart the potentially affected area, if such relocation does not create or cause a hazard to the safety of others.

(II) The shift supervisor shall review the risk assessment for the use of chemical restraint agents and electronic immobilization devices to determine whether the inmate has a medical condition that may be exacerbated by the intended force. If the inmate has a medical risk factor for chemical agents, chemical agents shall not be used on the inmate unless each of the following conditions exists: the inmate possesses a weapon capable of causing great bodily harm or death, the warden or designee approves, and medical staff are present in the housing unit prior to the application of chemical agents. However, if the inmate has a medical risk factor for chemical agents as indicated on the risk assessment, this does not automatically preclude the use of electronic immobilization devices on the inmate. Medical staff shall be consulted about physical conditions of an inmate that may be aggravated by the application of chemical agents unless safety concerns prevent prior consultation.

(III) The warden or designee shall be contacted for authorization to use chemical agents or other force in the area. The warden shall not give authorization if the use of chemical agents or other force is not appropriate under the circumstances.

(IV) Chemical agents or EIDs shall be retrieved from secure storage or preparations shall be made for a forced cell extraction.

(V) Video recording procedures shall be initiated as outlined in subsection (4) of this rule.

(VI) A confinement or close management lieutenant or shift supervisor shall issue a clear concise and audible final order to the inmate(s) ordering compliance. The inmate shall be advised chemical agents shall be used, if necessary, to gain compliance. If the inmate complies, the compliance shall be video recorded for 3 minutes and then the video recording shall cease. If, during the same shift, the inmate resumes his/her disruptive behavior, video recording shall resume prior to the application of chemical agents or other force. This recording shall include a statement referring to the originating incident, and continue from this point until the decontaminating shower is given, medical examination is offered, and the inmate is returned to secure, decontaminated housing or transport vehicle.

(VII) If, after 3 minutes, the inmate remains non-compliant with the final order of the housing lieutenant or shift supervisor and continues to disobey lawful orders or continues the behavior that would justify using force, the shift supervisor shall administer chemical agents upon the inmate in the amount of no greater than three (3) one-second bursts.

(VIII) If the inmate's disruptive behavior continues after the initial application, a subsequent application of chemical agents in the amount of no greater than three (3) one-second bursts may be administered upon an inmate after at least five (5) minutes have elapsed since the initial chemical agent application.

(IX) If the inmate does not comply with orders after a minimum of five (5) minutes have elapsed from the conclusion of the second application of chemical agents, the warden or designee shall be consulted to evaluate what further response, which may include a third application of chemical agents, is necessary to regain compliance or control of the inmate.

e. Protocol following a third application of chemical agents.

(I) The warden or designee shall be consulted to evaluate further responses. Additional use of force narrative reports shall be used to document the incident. The shift supervisor shall ensure all use of force applications are properly documented in a use of force narrative report.

(II) The warden or designee shall authorize the activation of a cell extraction team as necessary to obtain safety or compliance; however additional applications of chemical

agents shall not be administered or discharged upon an inmate after the initial three applications until at least sixty (60) minutes have elapsed from the time of the last application.

f. Post-chemical agent use protocol.

(I) Once the inmate becomes compliant with orders and ceases his or her disruptive behavior, Department staff shall initiate decontamination protocol as outlined in paragraph (9)(b) of this rule.

(II) Once decontamination protocol is complete, the inmate shall be offered medical examination as outlined in paragraph (9)(c) of this rule.

(III) Reports for the completed use of force shall be completed in accordance with paragraph (9)(a) of this rule.

(6) Use of Less-Lethal Weapons.

(a) Less-lethal weapons may be used in either reactionary or organized uses of force.

(b) The use of electronic immobilization devices (EIDs), batons, the types of chemical agents mentioned in this section, specialty impact munitions, or other less-lethal weapons within institutions shall be authorized, only by the warden or designee, when their use is necessary, their use would comport with the other provisions of this rule, and the use of the chemical agents referenced elsewhere in this rule would be either inappropriate or ineffective. Such weapons shall be utilized by officers who have completed the Department's standard training on their use and shall be used in accordance with manufacturer specifications.

1. EIDs.

a. EIDs shall not be used on anyone other than an inmate during an authorized use of force, or upon any person to prevent serious injury or death. If possible, the shift supervisor shall counsel with the inmate, issue the final order to the inmate ordering compliance or cessation of disruptive behavior, and be present prior to the use of an EID at an institution or during work detail or transport.

b. EIDs authorized by the Department include:

(I) Handheld EIDs, which shall be the intermediate level of force alternative, issued primarily for the purpose of transportation and supervision of inmates outside the institution;

(II) Electronic shields, which may be used by force cell extraction teams; and

(III) Electronic restraint belts, which are authorized to be placed on an inmate for appearance in court, during transportation, or when the inmate is determined to be high risk or to have a history of violent behavior.

c. Prior to any organized use of force of the type described in sub-sub-subparagraph (6)(b)1.b.(II) above, the shift supervisor shall review the risk assessment for the use of chemical restraint agents and EIDs to determine whether the inmate has a medical condition that may be exacerbated by the

intended force. If the inmate has a medical risk factor for EIDs, they shall not be used on the inmate unless each of the following conditions exists: the inmate possesses a weapon capable of causing great bodily harm or death, the warden or designee approves, and medical staff are present in the housing unit prior to the application of EIDs. However, if the inmate has a medical risk factor for EIDs, this does not automatically preclude the use of chemical agents on the inmate. Medical staff shall be consulted about physical conditions of an inmate that may be aggravated by the application of EIDs unless safety concerns prevent prior consultation.

2. Specialty impact munitions. Specialty impact munitions shall only be used after all other reasonable alternatives to regain control have been exhausted and their use is necessary. They are intended to be used as an interim force response between the use of chemical agents and deadly force.

a. Specialty impact munitions shall be used only by the Department's designated armed response teams, Rapid Response Teams, Correctional Emergency Response Teams and/or trained staff as authorized by the Deputy Secretary of Institutions for use during riots and disturbances and to respond to staff assaults. They are intended as a less-lethal alternative to the use of deadly force. Specialty impact munitions shall not be used on anyone other than an inmate during an authorized use of force.

b. The following specialty impact munitions have been approved for use by the Department:

(I) 37/40-mm rubber ball pellet rounds;

(II) 12 gauge rubber ball pellet rounds – high velocity;

(III) 12 gauge rubber ball pellet rounds – low velocity;

(IV) 12 gauge drag stabilized (bean bag) rounds;

(V) 37/40-mm wooden baton rounds (skip fired 6 feet in front of target, no direct fire);

(VI) Stinger rubber ball grenades (stun grenade);

(VII) 40-mm impact munitions (OC, marking and inert foam) long range; and

(VIII) 40-mm impact munitions (OC, marking and inert foam) short range.

c. Selection and deployment of specialty impact munitions during a riot or disturbance or other instance where less-lethal force options are needed shall be authorized by the Secretary, regional director, or warden or designee.

d. Specialty impact munitions shall not be deployed in the direction of any individual in a manner contrary to the manufacturer's directions or at a distance of less than that recommended by the manufacturer, unless the threat of bodily harm or death justifies the escalation to deadly force.

3. Pepperball Launching System (PLS). Subject to the other provisions of this rule and Department policy, the PLS shall be used instead of aerosol-type chemical agents when aerosol-type chemical agents would not be effective due to

weather conditions or when their use could subject the officer or uninvolved inmates to injury. The PLS shall be used only by restricted labor squad supervisors and exercise officers for confinement, close management, maximum management, and death row populations. The PLS shall only be employed by officers who have completed the Department's standard trained in their use and effects.

a. General Provisions.

(I) The Deputy Secretary of Institutions shall designate those institutions authorized to use the PLS.

(II) PLS is classified as less-lethal at all distances, but, unless the incident necessitates otherwise, it only should be utilized at a distance of five (5) feet or greater to prevent the inmate from attempting to take control of the launcher.

b. PLS In Controlled Conditions.

(I) Written authorization from the warden or designee shall be received prior to utilization of the PLS for situations other than those described in sub-subparagraph (6)(c)3.c., below. This written authorization shall detail the reasons it was necessary to utilize the PLS in addition to or in place of aerosol-type chemical agents.

(II) In controlled situations when time constraints are not an issue, the PLS can only be used if authorized by the warden or designee. The warden or designee shall only authorize trained and certified officers to use the PLS.

c. PLS Outside of Controlled Conditions.

(I) The PLS is authorized for use to quell mass disturbances, violent events, assaults, and fights among inmates assigned to restricted labor squads. Authorized activation of the PLS by staff assigned to restricted labor squads does not constitute deadly force.

(II) PLS is authorized for use in confinement, close management, maximum management, and death row recreation areas to quell mass disturbances, violent events, assaults, and fights among inmates.

4. Noise flash distraction devices. Noise flash distraction devices shall be used only by the Department's Rapid Response Teams, Correctional Emergency Response Teams and/or other trained staff as authorized by the Deputy Secretary of Institutions for the purpose of creating a momentary diversion to assist correctional staff in restoring order in hostile situations. These situations include hostage rescue, crowd control and certain escape and recapture efforts. The following noise flash distraction devices have been approved for use by the Department:

(a) Hand-launched, reloaded noise flash distraction devices;

(b) Hand-launched, single use noise flash distraction devices;

(c) Shotgun-launched (aerial distraction) noise flash distraction devices.

(7) Use of Deadly Force.

(a) Use of Deadly Force. Except as set forth elsewhere in this subsection, an officer is authorized to use deadly force only when the officer believes that such force is necessary to prevent imminent death or great bodily harm to him or herself or another.

1. Use of Firearms. The procedures set forth in this rule shall be readily available at all institutions and facilities for staff review.

2. Firearms or weapons shall be issued to an officer only upon instructions of the warden or designee, chief of security, or shift supervisor by the arsenal officer or the officer designated to issue weapons. Officers shall not intentionally discharge a firearm loaded with lethal ammunition—as opposed to less-lethal ammunition—at or in the direction of another person except under the following circumstances and after all reasonable non-lethal alternatives have been exhausted, and there is no reasonable danger to innocent bystanders:

a. To prevent an escape of an inmate who is actively attempting to flee custody;

b. To prevent any conveyance to gain unauthorized entry into or exit from a correctional institution;

c. To prevent death or great bodily harm; or

d. To quell a riot.

3. Subparagraph (7)(a)2. shall not be read to say that there are always reasonable non-lethal alternatives to the intentional discharge of firearms loaded with lethal ammunition. In many circumstances there is no such alternative.

4. Firearms and other weapons are approved for use by the Department's designated armed response team, Rapid Response Teams, Correctional Emergency Response Teams and/or other trained staff as authorized by the Deputy Secretary of Institutions for use during riots and mass disturbances. The Incident Commander shall determine the type of authorized lethal or less-lethal ammunition that is necessary to quell the riot or mass disturbance, and shall give orders accordingly.

5. The Incident Commander shall determine which weapons are necessary to quell the riot or mass disturbance, and shall give orders accordingly.

6. Firearms shall not be discharged:

a. In any case where there is a reasonable belief that the life of a bystander may be endangered by discharge of the firearm;

b. From any moving vehicle unless such action is reasonably believed necessary to protect oneself or another from imminent death or great bodily harm;

c. As a warning, except during escapes or when the officer reasonably believes it necessary to protect oneself or another from imminent death or great bodily harm, and time permits to do so.

d. Until the employee reasonably believes that the person to be fired upon is an escaping department inmate;

e. Except after all reasonable non-lethal alternatives have been exhausted;

f. On the mere suspicion that a crime, no matter how serious, has been committed; or

g. Except as authorized by Florida law.

(b) Because helicopters or other aircraft may be used during an escape or assault, the following policy shall apply:

1. When it can be done safely, actions other than firing weapons, such as waving arms in a manner to indicate disapproval to enter an area, shall be made in an attempt to cause the aircraft to leave.

2. If these attempts fail, the aircraft shall be allowed to land.

3. All inmates shall be kept away from the aircraft.

4. The aircraft shall be secured using armed security staff and shall be prevented from being flown away by securing the flight equipment with locks and chains, without causing damage to the aircraft, so that the aircraft can safely be removed by the proper authorities.

5. If the landing occurs due to an in-flight emergency—e.g., engine failure—staff shall maintain security of the aircraft and all occupants until their removal from the site.

6. Once the aircraft lands, efforts shall be directed to stop any inmate from boarding the aircraft. Staff are authorized to shoot any inmate attempting to escape in accordance with this rule. When circumstances permit, a verbal warning to halt and a warning shot shall be fired prior to the inmate reaching the aircraft to board.

7. If weapons are fired from an aircraft, Department personnel are authorized to return fire and use deadly force to protect themselves and others upon property of the institution.

8. Firearms shall not be used on departing aircraft after leaving contact with the ground. Immediate notification, without delay, shall be made to the law enforcement agency of local jurisdiction and the Office of Inspector General upon an aircraft landing on Department property. The Office of Inspector General shall notify the Florida Department of Law Enforcement, Federal Bureau of Investigation, and the Federal Aviation Administration.

9. All inmates shall receive orientation in regard to this subsection of the rule. This subsection of the rule shall be made a part of the Department's orientation program at all reception centers. This orientation shall contain instructions indicating that should any aircraft attempt to land on or near the property of any Department facility, inmates are required to move away from the aircraft. Movement toward the aircraft by an inmate shall be viewed as an escape attempt and shall subject the inmate to the use of deadly force to prevent him or her from escaping.

(c) Use of a conveyance to gain unauthorized entry into or exit from a correctional institution or facility. The institution or facility shall take the following steps to prevent any conveyance

or vehicle from being used to gain unauthorized forced entry into or forced exit from its perimeter area:

1. Time permitting, a verbal order to halt shall be issued followed by a warning shot if the vehicle fails to stop.

2. If the vehicle does not stop and continues to be driven or operated in a manner that indicates the driver intends to or is in the process of forcibly entering or exiting the perimeter, officers may use deadly force to prevent imminent death or great bodily harm or to prevent the escape of an inmate.

(d) Use of Force to Prevent Escape or to Recapture Escapee. Officers are authorized to use force, including deadly force, as necessary to prevent the escape of an inmate from a correctional institution.

1. Escape attempts from inside an institutional perimeter where armed perimeter staff are assigned:

a. Institutions with a double perimeter fence. A loud verbal warning shall be made, if possible, instructing the inmate to stop or halt prior to the inmate's contact with any inner perimeter fence. A warning shot may be safely fired prior to any inmate's attempt to cross or pass over, through, or under the inner perimeter fence. The firearm shall not be fired at the inmate until he or she has begun to cross or pass over, through, or under the inner perimeter fence.

b. Institutions with a single perimeter fence. A loud verbal warning shall be reasonably made where possible instructing the inmate to stop or halt and a warning shot safely fired prior to the inmate's contact with the perimeter fence. A firearm shall not be fired at the inmate until he or she has begun to cross, or to pass over, through, or under the perimeter fence.

c. Warning shots are authorized only as provided herein. In all other instances where deadly force is authorized during inmate escape attempts, a loud verbal warning shall be issued if time and circumstances permit.

2. Apprehension of escaped inmates once they are outside an institutional perimeter.

a. Officers are considered to be in active pursuit of an escaped inmate who has fled from an institution or supervised work detail so long as the escape commander determines that the escape recovery efforts are active. An officer is authorized to use deadly force, after giving a loud verbal warning for the inmate to stop or halt the escape attempt, when the inmate is demonstrating a refusal to cease active flight or escape from an institution or supervised work detail. A firearm shall not be fired if it creates a hazard to persons other than the inmate.

b. The officer in charge of the incident shall be the Incident Commander until relieved by a higher authority or the incident is turned over to a law enforcement agency. The Incident Commander of the escape attempt shall determine when active recapture efforts are terminated. Upon order of incident termination, the Incident Commander of the escape attempt may provide assistance to any law enforcement agency that is

conducting an investigation of the incident. Officers who are utilized to assist outside law enforcement agencies are authorized to use deadly force pursuant to Florida law.

c. Officers may provide assistance to any law enforcement agency that is seeking to capture or take into custody any inmate who has failed to return from a furlough or non-supervised outside assignment or who has escaped from any work release center. Correctional officers who are utilized to assist outside law enforcement agencies are authorized to use deadly force pursuant to Florida law.

3. Escape attempts by inmates who are being transported or escorted outside institutional perimeters, e.g., court appearances, hearings, and medical visits, or while being supervised while in a hospital for treatment, are included within the purview of this subsection.

(e) Post-Firearm Discharge Protocol.

1. In addition to the any applicable post-use of force protocol set forth in subsection (9) of this rule, Department officers shall comply with the following protocol after a firearm is discharged. Any officer who discharges a firearm shall complete a use of force detailed narrative report. Any officer who has fired a weapon during the performance of his or her duty shall, as soon as is reasonably possible, notify his or her supervisor. Such shift supervisor shall, as soon as reasonably possible after learning of such an incident, have the scene secured and notify the Office of Inspector General. The senior officer in charge at the scene of the incident shall ensure all evidence is undisturbed, including locations of empty cartridges, until processed by a law enforcement agency or the Office of Inspector General.

2. Any officer who accidentally or negligently discharges a Department firearm or any firearm upon institutional property shall report the incident to the warden or designee without unnecessary delay and shall complete a use of force detailed narrative report.

(8) Use of Force Considerations and Protocol Unique to Inmates in Mental Health Treatment Settings.

(a) It is often necessary to use force on inmates who are in the mental health treatment settings set forth in the following paragraph. Though these situations present unique issues and challenges, they are subject to all the provisions of this rule, including the following paragraph. Where this subsection may depart from use of force protocol set forth in other subsections of this rule, the provisions of this subsection shall nonetheless bind Department staff members in situations involving those inmates described in the following paragraph.

(b) Batons, chemical agents, EIDs, specialty impact munitions, and other authorized less-lethal weapons shall not be used on inmates who are housed in isolation management rooms or observation rooms for the purpose of mental health services, assigned to inpatient mental health care in an

infirmary, transitional care unit, crisis stabilization unit, corrections mental health institution, or other mental health treatment facility, as such facilities are defined in Rule 33-404.103, F.A.C., except when force reasonably appears necessary to:

1. Prevent an inmate or inmates from taking control of the health unit;
2. Prevent an inmate or inmates from taking a hostage;
3. Prevent an inmate or inmates from escaping;
4. Prevent an assault on staff or other inmates;
5. Stop an ongoing assault on staff or inmates;
6. Disarm an inmate in possession of a weapon capable of causing injury to staff;
7. Subdue a take-over of the health unit; or
8. Free a hostage.

(c) As to the objectives set forth in subparagraphs (8)(b)1.-4., force is necessary only where initiating or continuing non-force de-escalation of the situation by mental health staff would likely result in failure to achieve the objective.

(d) As to the objectives set forth in subparagraphs (8)(b)5.-8., force is necessary only where initiating or continuing non-force de-escalation of the situation by mental health staff would likely result in serious injury to the inmate on whom force would be used, any injury to any other person, or a breach of the Department's duty to maintain the order, security, and proper functioning of the institutions.

(e) Use of Psychiatric Restraints.

1. Psychiatric restraints are devices, procedures, or techniques used to restrict movement or behavior as to greatly reduce or eliminate the ability of an individual to harm him/herself or others, and include, but are not limited to, four-point and five-point psychiatric restraints.

2. The warden or designee may authorize placing an inmate in psychiatric restraints after consultation with a member of health services staff. Approval from the warden or designee shall be obtained prior to any inmate being placed in psychiatric restraints. Health services staff shall review the medical record of the inmate prior to advising the warden or designee of known medical conditions that would affect the health of the inmate should the inmate be placed in psychiatric restraints. There are some instances when an inmate must be placed in psychiatric restraints immediately after having chemical agents applied. In such situations, the inmate shall be monitored by health services staff without interruption. Medical attention shall be provided, upon detection of physical distress, without unnecessary delay. No inmate shall be restrained in a manner which restricts breathing.

3. When the use of psychiatric restraints is authorized, and the inmate does not offer resistance to the application of the restraints, the completion of Form DC6-210, Incident Report, shall be required. Form DC6-210, Incident Report, is hereby

incorporated by reference. Copies of this form are available from the Forms Control Administrator, 501 South Calhoun Street, Tallahassee, Florida 32399-2500, <http://www.flrules.org/Gateway/reference.asp?No=Ref-01697>. The effective date of the form is 12-12. The application of the psychiatric restraints will be videotaped. The videotape, Form DC6-210, a written use of force authorization, Form DC4-701C, Emergency Room Record, and Form DC4-708, Diagram of Injury, shall also be completed in their entirety with applicable data or the letters "N/A" used to indicate inapplicability and shall be forwarded to the warden or acting warden for review within one working day. Each institution shall retain the reports for the applicable retention period. If at any time prior to or during the application of the psychiatric restraints, the inmate offers resistance to the application, force shall be used, if necessary and justified.

(9) Post-Use of Force Protocol.

(a) Reporting.

1. The warden or designee shall be notified without unnecessary delay any time a reactionary use of force incident occurs.

2. Any time force is used, the staff person initially using force shall complete a use of force narrative report. The completed report must contain a clear and comprehensive narrative of the circumstances that led to the use of force, the specific justification and necessity for the use of force, and a description of the actual events that occurred as well as the post-event actions. If more than one staff member was involved in the use of force, the initial staff member using force shall complete the use of force narrative report. All participants who agree with the initial staff member shall sign the use of force narrative report. Any participant who objects to information recorded by the reporting staff member or who has additional observations to add to the narrative or description of the incident written by the reporting staff member shall complete a use of force narrative report and attach it to the use of force narrative report completed by the staff member initially using force. To provide additional detail, each participant in the use of force shall also complete their own use of force detailed narrative report, and each such report shall be attached to the use of force narrative report that was written by the person initially using force. However, if a participant writes his or her own use of force narrative report, his or her use of force detailed narrative report shall be attached to their own use of force narrative report. All use of force narrative reports and use of force detailed narrative reports shall be placed in one folder or binder.

3. A use of force narrative report shall be completed by those staff involved in any application of force, reactionary or organized, that occurred during their shift. This use of force narrative report shall be completed no later than the end of the

shift during which the use of force occurred, or within 24 hours of the use of force incident. All reports must be typed. No use of force narrative report may be altered, changed, or destroyed by any employee. However, staff members may submit amendments to a report at any time with authorization from the warden or designee. In such situations, the original report itself shall remain intact and shall remain as part of the file; an amendment—a separate document—shall be added to the file. The warden or designee shall then appoint a staff member of equal or higher rank than those involved in the use of force incident to collect all pertinent information and required documentation. This information shall include the reports of all involved staff who do not agree with the account as reported in the use of force narrative report or the statements of staff witnesses, inmate witnesses, or the inmate subject. Any employee who witnesses but does not participate in a use of force and suspects inappropriate action shall complete a use of force detailed narrative report. The warden shall ensure that Form DC4-701C, Emergency Room Record, and Form DC4-708, Diagram of Injury, are included in the review of all uses of force and also forwarded with the rest of the required documentation to the Office of the Inspector General – Use of Force Unit. The Office of Inspector General field offices within each region shall provide the institutions, via electronic mail, with a use of force number once one is assigned and entered into the Office of Inspector General electronic logging system.

4. Form DC6-112C, Witness Statement, shall be completed by the inmate whom force was used upon within three (3) working days of the use of force incident. This statement shall be obtained by a staff member who was not involved in the use of force or assigned to the shift on which the use of force occurred. If the inmate refuses to sign the statement the inmate's refusal shall be witnessed by two staff members. In instances where the force occurred outside of controlled conditions, the uninvolved staff member assigned to obtain witness statements shall interview a random sample of the inmate witnesses and provide them with the opportunity to submit a written statement on Form DC6-112C. Form DC6-112C is incorporated by reference in Rule 33-601.313, F.A.C.

5. Any accidental or incidental discharge of a chemical agent by a staff member within any institution shall be recorded in a use of force detailed narrative report.

6. The application of force by an EID or less-lethal weapon shall be reported by completion of a use of force narrative report by the staff member who deployed the device.

7. In any case where specialty impact munitions are deployed, the incident shall be recorded on a use of force narrative report.

8. Any time a witness of a reported use of force chooses to make a written statement, or is a use of force participating staff member and chooses to provide information not included in the

reporting staff member's initial use of force narrative report, such person shall complete a use of force narrative report of their own. No employee may interfere with or obstruct such reporting or order any participant or witness involved in the use of force to alter, change, or not produce a written report of an incident in which the employee was involved or which he or she observed.

9. Any employee who witnesses, has reasonable cause to suspect, or has knowledge that any inmate has been a victim or subject of an unlawful battery or has been abused in violation of law or the Department's administrative rules shall without unnecessary delay submit a use of force detailed narrative report to the warden or designee describing his or her observations, knowledge, or suspicion. No employee shall commit a battery on or engage in cruel or inhumane treatment of any inmate. The warden or designee shall forward a copy of all reports involving allegations of inmate abuse, neglect, or battery to the Office of Inspector General without unnecessary delay.

10. Staff members may use reasonable hands-on force to restrain an inmate, upon supervision and direction of a physician or medical practitioner, for the purpose of providing necessary treatment to protect the health of others or to satisfy a duty to protect an inmate against self-inflicted injury or death. The attending qualified health care provider who directs or observes medically necessary use of force shall prepare a written authorization to use force. Staff members who use force pursuant to a physician or medical practitioner's request shall prepare a use of force narrative report and a use of force detailed narrative report when actual force is used, or Form DC6-210 when restraints are applied with no physical resistance by the inmate, and the reports shall be forwarded to the warden. Any report required in the preceding sentence shall be completed and forwarded to the warden without unnecessary delay.

11. Any application of chemical agents within an institution shall be documented in a use of force narrative report. Any staff member who uses chemical agents shall record the following in the use of force narrative report:

a. Type of agent discharged;

b. Amount of agent discharged;

c. Method of administration;

d. Name of the person who authorized issuance or possession of the chemical agent;

e. Name of person who administered the chemical agent;

f. Amount of the chemical agent used; and

g. Reason the chemical agent was used.

(b) Decontamination and Monitoring After Chemical Agent Exposure.

1. Inmates who have been exposed to any chemical agent shall be constantly monitored by a staff member or officer for no less than one (1) hour after application. The affected inmate

shall remain in a standing or sitting position. The monitoring staff members or officers shall immediately seek medical attention by the appropriate medical staff or competent medical authority any time signs of respiratory distress, labored breathing, excessive or persistent coughing, or chest or arm pain are evident or if unconsciousness occurs or other signs of medical distress are observed. The absence of medical staff on scene does not preclude taking action as an emergency responder. The shift supervisor shall summon a medical staff member to the physical location of an inmate who has been exposed to a chemical application.

2. All inmates exposed to chemical agents shall be ordered to shower in cool water and change inner and outer garments within 20 minutes from the last application of chemical agents, unless there is a documentable emergency resulting in an extension of this time frame. The shift supervisor or confinement lieutenant shall record the decontamination activities in a use of force detailed narrative report and on Form DC6-229, Daily Record of Special Housing. Form DC6-229 is incorporated by reference in Rule 33-601.800, F.A.C.

3. The shift supervisor shall order the inmate to submit to cuffing procedures in order to exit her/his cell for a shower and decontamination of the cell. If at any time an inmate complies with orders to submit to a shower and decontamination procedures, then normal cuffing and escort procedures shall be followed and documented. Any portion of the inmate's body, including the eyes, that was exposed to, or that came in contact with, chemical agents, including the eyes, shall be flushed with water as soon as possible after application for 2 minutes or until the affected inmate experiences relief, whichever is longer. The inmate shall be advised by the officer in charge to avoid rubbing any irritated area with a cloth or towel. Under no circumstances will oils, creams, or topical medications be applied to the inmate without approval of a member of the medical services staff.

4. If the affected inmate refuses to participate in a decontamination shower, a second order shall be given by the shift supervisor. Inmates are not allowed to refuse a shower or refuse the decontamination of their cell after exposure to chemical agents. The shift supervisor shall record in a use of force detailed narrative report that a second order was administered and the inmate refused to comply. The shift supervisor shall submit Form DC6-112F, Disciplinary Report Worksheet, for processing.

5. Any time an inmate refuses to take a shower after an application of chemical agents, medical staff shall report cell-front and explain in a clear and audible tone the purpose of a decontamination shower and potential physical implications of not completing decontamination. Medical staff members shall record notes of any decontamination consultation on Form DC4-701C, Emergency Room Record.

6. After the second refusal by the inmate the shift supervisor shall contact the warden or designee for authorization to initiate cell extraction procedures. Upon approval by the warden or designee, the shift supervisor shall instruct the cell extraction team to enter the cell and place the inmate in restraints.

7. At least two (2) team members of the same sex of the inmate will maintain custodial grasp control of the inmate and physically guide the inmate to the shower to ensure that he/she remains under cool running water for no less than 2 minutes. Any portion of the inmate's body exposed to or that came into contact with chemical agents, including the eyes, shall be flushed with water as soon as possible after application. Staff shall not inhibit the ability of the inmate to move her/his head from under the water. The inmate should be advised by the officer in charge to avoid rubbing any irritated area with a cloth or towel. Caution shall be exercised to prevent injury to both staff and inmate. During the shower, all contaminated clothing with the exception of undergarments shall be removed, and the cell shall be decontaminated and searched for contraband.

8. Upon introduction into a decontamination cell, the inmate who refused or obstructed efforts to participate in a decontamination shower shall be placed in a sitting or standing position for a minimum of sixty (60) minutes after the use of chemical agents, including any inmate who must be physically held or is incapacitated, to permit officers to place approved restraining devices on the inmate.

9. Officers shall use all reasonable and due care to avoid physically placing the inmate in any position that may contribute to positional asphyxia, restricted blood circulation, or interference with physical functions that permit life processes to occur or in any position that causes any physical injury. Restraints shall not be applied in any manner for the purpose of administration of punishment. The inmate shall not be directed, ordered, or required to stand or sit uninterrupted if such action is intended for reasons of punishment or likely to cause injury.

10. Any uninvolved inmate within the same cell shall also be offered shower and decontamination procedures.

11. All subsequent reports, medical requirements, and reviews required for the use of chemical agents as outlined in this rule shall be completed after the use of the PLS.

(c) Medical Attention Following Use of Force.

1. Medical Attention for Inmates Following Use of Force.

a. Appropriate medical treatment shall be provided immediately or, in the case of a riot or other man-made or natural disaster, as soon as possible following resolution of the riot or disaster. Any treatment or follow-up action shall be documented in the use of force narrative report. A qualified health care provider shall examine any person physically involved in a use of force to determine the extent of injury, if

any, and shall prepare a report that shall include a statement of whether further examination by a physician is necessary.  In accordance with Section 120.74(5), Florida Statutes, the Department of State extends the April 1 deadline to publish a Notice of Proposed Rule for Rule 1S-2.039, FVRS Voter Registration Procedures. The extension is to facilitate further review of voter registration procedures including validation of residential street addresses in light of the statewide voter registration system’s ongoing modernization efforts. A rule development workshop was held on February 14, 2017, and notice of the workshop was published in the Florida Administrative Register on October 27, 2016.

A Notice of Rule Development for the above referenced rules was published in the Vol. 42, No. 208, October 25, 2016, issue of the Florida Administrative Register wherein the Department proposed to adopt rules to implement Section 500.81, F.S., which was created by the 2016 Florida Legislature. Subsequently, legislation has been filed for the 2017 legislative session to repeal and replace Section 500.81, F.S. *See HB 1083 and SB 1052*. Therefore, the Department will exercise the extension provided by Section 120.74(5), F.S, and will not publish the Notice of Proposed Rule for the above referenced rules until it is clear whether the statutory authority for the rules will remain in effect.

WATER MANAGEMENT DISTRICTS

St. Johns River Water Management District

RULE NO.: RULE TITLE:

40C-8.031 Minimum Surface Water Levels and Flows and Groundwater Levels

Notice of Extension of Regulatory Plan Deadlines

The St. Johns River Water Management District (District) hereby provides notice of extension of the deadline set forth in subsection 120.74(5), Fla. Stat., requiring publication of a Notice of Proposed Rule by April 1 for certain rules listed on the District’s 2016-2017 Regulatory Plan. More specifically, the deadline for publication of a Notice of Proposed Rule is extended for Rule 40C-8.031, F.A.C.

a) Concise statement identifying issues causing the delay in rulemaking:

As required by subsection 373.042(2), F.S., by July 1, 2017, the District must adopt minimum flows or water levels (MFLs) for the following Outstanding Florida Springs, as defined in subsection 373.802(4), F.S.: Alexander Springs in Lake County, De Leon Springs in Volusia County, Gemini Springs in Volusia County, Silver Glen Springs in Marion/Lake Counties, and Silver Springs in Marion County. The District has already adopted MFLs for De Leon Springs, which became effective on February 1, 2017. Scientific peer review of the District’s MFLs reports for the remaining Outstanding Florida Springs (OFS) slowed the District’s rulemaking on those remaining MFLs. However, the District is on track to adopt all the required OFS MFLs for the remaining water bodies by July 1, 2017.

The District held a rule workshop regarding the proposed Silver Springs MFLs on March 16, 2017, and staff will request authorization to publish a Notice of Proposed Rule for Silver Springs at the District’s April 11, 2017 Governing Board Meeting. The District will hold a rule workshop regarding the remaining proposed OFS MFLs on April 20, 2017, and staff will request authorization to publish a Notice of Proposed Rule for those remaining OFS MFLs at the District’s May 9, 2017 Governing Board Meeting. To ensure that the proposed OFS MFLs are scientifically defensible, the delay in rulemaking to complete scientific peer review is warranted.

b) Applicable notice as published in the Florida Administrative Register:

Notice of Rule Development for Rule 40C-8.031 was published in the FAR on October 12, 2016, (Vol. 42, No. 199).

Expiration

Pursuant to subsection 120.74(5), Fla. Stat., this extension expires on October 1, 2017.
