

one year after the implementation of the rule. A SERC has not been prepared by the Agency.

The revision of the Caloosahatchee MFL rule criteria (salinity and timing of exceedances) are irrelevant to the evaluation of an application, because all the water from the MFL recovery strategy (C-43 Reservoir water) is protected from allocation by a water reservation rule (40E-10.041, FAC). The current MFL and a revised MFL criteria share the same recovery strategy. Therefore, there would be no adverse impacts to small businesses through water use regulation. Additionally, there are no anticipated changes to the ways in which the rule is implemented or enforced. Using the revised MFL criteria, there are no additional regulatory fees, modeling analysis, or other technical analyses required to meet the water use regulatory criteria outlined in the Applicant's Handbook for Water Use Permit Applications. The regulatory permitting process is identical. As such, there would be no additional direct or indirect regulatory costs.

The Agency has determined that the proposed rule is not expected to require legislative ratification based on the statement of estimated regulatory costs or if no SERC is required, the information expressly relied upon and described herein: The District has completed the Governor's Office of Fiscal Accountability and Regulatory Reform (OFARR) the "Is a SERC Required?" form, which is available upon request. Based on the completed "Is a SERC Required?" form, the proposed rule amendments will not require legislative ratification pursuant to the subsection 120.541(3), F.S.

Any person who wishes to provide information regarding a statement of estimated regulatory costs, or provide a proposal for a lower cost regulatory alternative must do so in writing within 21 days of this notice.

40E-8.221 Minimum Flows and Levels (MFLs): Surface Waters.

The MFLs contained in this Part identify the point at which further withdrawals would cause significant harm to the water resources, or ecology, of the area as applicable, pursuant to Sections 373.042 and 373.0421, F.S. It is the District's intent to correct or prevent the violation of these MFLs through management of the water resources and implementation of a recovery strategy.

(1) No change.

(2) Caloosahatchee River. The MFL for the Caloosahatchee River is the 30-day moving average flow of 400 cubic feet per second (cfs) at S-79. A minimum mean monthly flow of 300 CFS is necessary to maintain sufficient salinities at S-79 in order to prevent a MFL exceedance. A MFL exceedance occurs during a 365-day period, when:

(a) A MFL exceedance occurs during a 365-day period when the 30-day moving average flow at S-79 is below 400 cfs and the 30-day moving average salinity exceeds 10 at the Ft. Myers salinity monitoring station (located at latitude 26° 38' 57.84" N, longitude 81° 52' 5.68" W). Salinity at the Ft. Myers salinity monitoring station shall be measured at 20% of the total river depth at mean low water. A 30-day average salinity concentration exceeds 10 parts per thousand at the Ft. Myers salinity station (measured at 20% of the total river depth from the water surface at a location of latitude 263907.260, longitude 845209.296); or

(b) A MFL violation occurs when a MFL exceedance occurs more than once in a 5-year period A single, daily average salinity exceeds a concentration of 20 parts per thousand at the Ft. Myers salinity station. Exceedance of either paragraph (a) or (b), for two consecutive years is a violation of the MFL.

(3) through (5) No change.

61C-1.004 General Sanitation and Safety Requirements
The Florida Department of Business and Professional Regulation, Division of Hotels and Restaurants hereby gives notice:

On July 11, 2018, the Division of Hotels and Restaurants received a Petition for an Emergency Variance for Subparagraph 61C-1.004(1)(a), Florida Administrative Code and Paragraph 5-202.11(A), 2009 FDA Food Code from Holiday Village of Sandpiper Inc. located in Port St. Lucie. The above referenced F.A.C. addresses the requirement that each establishment have an approved plumbing system installed to transport potable water and wastewater. They are requesting to utilize holding tanks to provide potable water and to collect wastewater at the handwash sink.

The Petition for this variance was published in Vol. 44/135 on July 12, 2018. The Order for this Petition was signed and approved on July 19, 2018. After a complete review of the

variance request, the Division finds that the application of this Rule will create a financial hardship to the food service establishment. Furthermore, the Division finds that the Petitioner meets the burden of demonstrating that the underlying statute has been achieved by the Petitioner ensuring he wastewater holding tank for the handwash sink is emptied at a frequency as to not create a sanitary nuisance; and potable water provided must come from an approved source and be protected from contamination during handling. The Petitioner shall also ensure that the handwash sink is provided with hot and cold running water under pressure, soap, an approved hand drying device and a handwashing sign.

A copy of the Order or additional information may be obtained by contacting: Daisy.Aleman@myfloridalicense.co, Division of Hotels and Restaurants, 2601 Blair Stone Road, Tallahassee, Florida 32399-1011.
