Board of Pharmacy

RULE NO.:	RULE TITLE:
64B16-27.797	The Standards of Practice for Compounding Sterile Products
	NOTICE OF CHANGE

Notice is hereby given that the following changes have been made to the proposed rule in accordance with subparagraph 120.54(3)(d)1., F.S., published in Vol. 45 No. 82, April 26, 2019 issue of the Florida Administrative Register.

The change is in response to written comments submitted by the staff of the Joint Administrative Procedures Committee and a public hearing on the rule held on June 17, 2019. The board voted at the public board meeting held June 18, 2019, to amend the rule. The rule shall now read as follows:

64B16-27.797 The Standards of Practice for Compounding Sterile Products.

The purpose of this section is to assure positive patient outcomes through the provision of standards for 1)

pharmaceutical care; 2) the preparation, labeling, and distribution of sterile pharmaceuticals by pharmacies, pursuant to or in anticipation of a prescription drug order; and 3) product quality and characteristics. These standards are intended to apply to all sterile pharmaceuticals, notwithstanding the location of the patient (e.g., home, hospital, nursing home, hospice, doctor's office, or ambulatory infusion center).

(1) through (4) No change.

(5) The board finds that the production of sterile compounded products prepared with a process that includes the lyophilization of the sterile product may not be adequately regulated under the provisions of subsection (1). Sterile compounded products prepared using a process that includes lyophilization shall, in addition to all applicable provisions of USP Chapter <797>, be subject to the following additional requirements:

(a) through (b) No change.

(c) The pharmacy shall, initially and after any change to the cleaning process or agents, validate a high-level disinfection process for the lyophilizer. For the purposes of this rule, validation means that the high-level disinfection process shall be proven with validation studies performed with the 5 aerobic bacterial and fungal ATCC organisms referenced in USP Chapter <71>. The validation studies must be performed by an external vendor or by an internal laboratory ~~following proper protocols~~. A pharmacy with an internal laboratory shall be separated from the compounding area and the work area to prevent contamination in the pharmacy. Documentation of validation shall be readily available for inspection.
