RULE TITLE: Noxious Weed List  
 RULE NO.: 5B-57.007

PURPOSE AND EFFECT: The purpose of this rule amendment is to add eleven new plant species to the noxious weed list and to reorganize the list for improved readability. The effect of the amendment will be the restriction of the movement of additional plants considered to be noxious weeds thereby reducing the artificial spread of these species into new areas. This will protect agricultural and native areas from encroachment by these invasive plant species.

SUBJECT AREA TO BE ADDRESSED: The noxious weed list is amended to exclude specific species in the Cuscuta, Orobanche and Prosopis genera instead of listing each noxious weed species individually. Eleven other species are added to the list. None are grown commercially except carrotwood, Cupaniopsis anacardioides, and a period until July 1, 2001 is provided to permit adequate time for nurseries to clear these trees from inventory.

64B18-14.009 Minor Violations; Notices of Noncompliance.

(1) Section 455.621(3), F.S., authorizes the Board, when enforcing rules and statutes, to permit the Department to issue a notice of noncompliance for any initial offense which is a minor violation as defined by Board rule. A minor violation under this statute is defined as one which does not endanger public health, safety, or welfare and does not demonstrate a serious inability to practice.

(2) Section 120.695, F.S., authorizes the Board, when enforcing rules, to permit the Department to issue a notice of noncompliance when there is a first time offense that is a minor violation as defined by Board rule. A minor violation is defined as one in which there is no economic or physical harm; no adverse effect to the public health, safety, or welfare; and no significant threat of such harm.

(3) A notice of noncompliance in lieu of other actions is authorized only if the violation is not a repeat violation and only if there is only one violation. If there are multiple violations, then the Department may not issue a notice of noncompliance, but must prosecute the violation under the other provisions of Section 455.621, F.S. There is only one exception to the prohibition against use of a notice of noncompliance when there is more than one violation. A notice of noncompliance may be issued to a registered dispensing practitioner for a first time violation of one or more of the violations listed in subsection (4), paragraphs (f), (g), (l), (m), (n), (o) and (p), if there is not evidence of diversion.

(4) The Board hereby establishes the following as minor violations which the Department may act upon by issuing notices of noncompliance for an initial offense:

(a)(1) No change.

(b)(2) No change.

(c)(3) No change.

(d) Section 893.02, Florida Statutes, which provides that a prescription order for a controlled substance shall not be issued on the same prescription blank with another prescription order for a controlled substance which is named or described in a different schedule, nor shall any prescription order for a

controlled substance be issued on the same prescription blank as a prescription order for a medicinal drug, as defined in Section 465.003(7), Florida Statutes, which does not fall within the definition of a controlled substance as defined in Chapter 893, Florida Statutes.

(e) Failing to maintain records relating to the receipt and disposition of controlled substances, and the required biennial inventory, as provided for in Section 893.07, Florida Statutes. This violation may be resolved by a notice of noncompliance only if the whereabouts of the drugs can be accounted for by other means and there is no evidence of diversion.

(f) Failing to, before dispensing any drug, give the patient a written prescription and orally or in writing advise the patient that the prescription may be filled in the practitioner's office or at any pharmacy, in violation of Section 465.0276(2)(c), Florida Statutes. This applies to dispensing practitioners only.

(g) Dispensing medication without proper labeling, contrary to the provisions of Section 893.05(2), Florida Statutes, and Rule 64B16-28.108, Florida Administrative Code. This applies to dispensing practitioners only.

(h) For a practitioner who is not required to register as a dispensing practitioner, failing to dispense drugs in the manufacturer's labeled package with the practitioner's name, patient's name, and the date dispensed or, if such drugs are not dispensed in the manufacturer's labeled package, failing to dispense the medication in a container which bears the following information: practitioner's name; patient's name; date dispensed; name and strength of the drug; and directions for use, contrary to Section 465.0276, Florida Statutes.

(i) Failing to properly store medications which require refrigeration, contrary to Rule 64B16-28.104, Florida Administrative Code.

(j) Failing to remove outdated medications from stock, contrary to Rule 64B16-28.110, Florida Administrative Code.

(k) Failing to have proper labeling on all stock medications, contrary to Section 499.007(2), Florida Statutes.

(l) Failing to post the generic drug sign, contrary to Section 465.025(7), Florida Statutes. This applies to dispensing practitioners only.

(m) Failing to initial and date all controlled substances dispensed and all refills thereof, contrary to Section 893.04(1)(c)6., Florida Statutes. This applies to dispensing practitioners only.

(n) Filling controlled substance prescriptions which do not have the patient's address on them, contrary to Section 893.04(1)(c)1., Florida Statutes. This applies to dispensing practitioners only.

(o) Filling controlled substance prescriptions which do not have the practitioner's DEA number on them, contrary to Section 893.04(1)(c)2., Florida Statutes. This applies to dispensing practitioners only.

(p) Using a computer system, but failing to maintain a daily hard copy printout of controlled substances initialed and dated by the practitioner and failing to assure that the computer information is readily retrievable, contrary to Rule 64B16-28.119(5), Florida Administrative Code. This applies to dispensing practitioners only.

(q) Failing to maintain records relating to controlled substances in a readily retrievable form, contrary to Section 893.07(4), Florida Statutes, and 21 CFR 1304.04.

WATER MANAGEMENT DISTRICTS

Southwest Florida Water Management District

RULE CHAPTER TITLE: Water Levels and Rates of Flow RULE CHAPTER NO.: 40D-8

RULE TITLE: Minimum Flows RULE NO.: 40D-8.041

PURPOSE AND EFFECT: To adopt a minimum flow for the Lower Hillsborough River pursuant to section 373.042, F.S. (1996 Supp.)

SUMMARY: The proposed rule sets forth that the Minimum Flow for the Lower Hillsborough River shall be 10 cubic feet per second at the base of the City of Tampa's dam, as measured at the Rowlett Park Drive bridge. The proposed rule addresses how and when the Minimum Flow is to be met through December 31, 2007. The Minimum Flow may be re-established based on a study to be conducted by the City and the District. A Minimum Flow shall be established for Sulphur Springs by December 31, 2001.

SUMMARY OF STATEMENT OF ESTIMATED REGULATORY COST:

1.0 Introduction

Section 373.042, Florida Statutes, requires the Southwest Florida Water Management District (SWFWMD) to establish minimum flows and levels for priority water bodies. As part of

the response to this mandate, the District has initiated efforts to adopt minimum flows for the Lower Hillsborough River. For the purposes of a Minimum Flow for the Lower Hillsborough River, the Lower Hillsborough River is defined as the river downstream of Fletcher Avenue. A tributary of the Lower Hillsborough River is Sulphur Springs, an artesian spring that enters the River via a short spring run located 2.2 miles downstream of the City of Tampa's dam.

Under current rules, the City of Tampa's Water Use Permit for withdrawals from the Hillsborough River required that the City conduct a feasibility study for reducing the number of no-flow days to bring the permit more into compliance with existing stream flow performance standards in Chapter 40D-2, F.A.C. Furthermore, no additional quantities would likely be permitted under current rules that would affect the base flow of the Hillsborough River due to concerns over the potential impacts to the existing use of the river for drinking water supplies for the City of Tampa and the potential additional ecological harm caused by an increase in the number of no-flow days in the Lower Hillsborough River, particularly the stretch between the dam and Sulphur Springs.

The proposed rule prescribes a phased flow regime for the Lower Hillsborough River which will minimize, and eventually eliminate, no-flow days. This Summary is based on analysis of the February 22, 1999 Hillsborough River Minimum Flow draft rule approved for publication by the Governing Board of the Southwest Florida Water Management District.

#### 2.0 Individuals and Entities Likely to be Required to Comply

The permittee directly affected by the proposed rule is the City of Tampa in that the proposed rule specifies the circumstances and manner under which the City must comply with the proposed Minimum Flow. However, reducing and eliminating no-flow conditions in the Lower Hillsborough River would be required under existing rules.

Any other existing permittees, and new applicants, requesting additional withdrawals that would affect the base flow of the Hillsborough River are not affected by the proposed rule revision. Such applications would likely not meet current rule criteria.

#### 3.0 Cost to the District, the State and Local Government Entities

The proposed rule revision is not anticipated to incur costs to either the State of Florida or to local government entities in terms of changes in tax revenues or changes in costs. The proposed rule revisions do not require State or local government agencies to implement or enforce rules or ordinances. The proposed rule will not change the District's emphasis on water conservation and alternative source development as is required under current rule. Furthermore, no loss of jobs or income is anticipated under the proposed rule revision. Therefore, tax revenues and the level of government services are not anticipated to change as a result of the proposed rule revision. Costs to government entities who have

a water use permit affected by the proposed rule revision are described in Section 4.0, "Transactional Costs Likely to be Incurred by Individuals and Entities".

No loss of jobs or income is anticipated under the proposed rule revision because the requirements of permittees and applicants will not be significantly different under the proposed rule than under current rule. The proposed rule revision is consistent with the purpose and intent of the existing Chapter 40D-2.301, Conditions for Issuance of Permits, and the actions that the District has taken to address adverse impacts of withdrawals in the Northern Tampa Bay area. Therefore, sales and property tax revenues and the level of government services are not anticipated to change as a result of the proposed rule revision.

The minimum flow requirement does not place a limit on overall water sales. Therefore, no significant changes in utility tax revenues are anticipated as a result of the proposed rule revision.

No significant additional permit review or monitoring costs to the SWFWMD are anticipated as a result of the implementation of the proposed rules. Enforcement costs to the SWFWMD are also not likely to increase unless there is significant disagreement between the District, the City of Tampa, or a third party over whether providing the Minimum Flow at a particular time and from a particular source constitutes a drinking water supply-related threat to public health, safety and welfare.

In the future, there may be additional costs to the District, however these costs could not be estimated at this time. Such costs include the District's share of the cost of conducting an evaluation of the quality of Minimum Flow sources other than the City's reservoir and Sulphur Springs, and the District's share of the cost of the Minimum Flow reevaluation study to be completed by December 31, 2005, as required by the proposed rule.

#### 4.0 Transactional Costs Likely to be Incurred by Individuals and Entities

Additional water from Sulphur Springs or other sources may be needed by the City of Tampa to augment flows in the lower Hillsborough River at the base of the Hillsborough River Reservoir dam in order to comply with the proposed minimum flow for this section of the river. The cost of obtaining additional quantities would likely have been incurred under current rule requirements and does not necessarily represent rule revision-related additional cost. They are, however, addressed for illustrative purposes.

There are several potential sources of minimum flow water. Additional water conservation may extend the period of time that the minimum flow can be met by flow from the reservoir. Additional conservation costs may range from \$.17 to \$2.00 per thousand gallons saved. The annual capital and operation and maintenance costs of providing the minimum flow from Sulphur Springs is estimated as \$203,000. The City of Tampa

and the SWFWMD are already co-funding projects to determine the feasibility of obtaining water from Blue Sink and the Curiosity Creek watershed. The total feasibility study project cost is \$50,000. Up to \$100,000 is being budgeted by SWFWMD and the City in Fiscal Year 2000 for implementation if the projects are found feasible. Under certain circumstances, Tampa Bypass Canal water permitted to Tampa Bay Water could be back pumped to make more water available for augmentation of the reservoir. Assuming the necessary agreements could be negotiated, the estimated annualized cost of providing the minimum flow (6.5 mgd) would be \$271,180. If water had to be purchased from Tampa Bay Water, the cost to the City would be, at a minimum, the difference between the City's and Tampa Bay Water's in production cost.

In the future, there may be additional costs to the City of Tampa, however these costs could not be estimated at this time. Such costs include the City's share of the cost of conducting an evaluation of the quality of Minimum Flow sources other than the City's reservoir and Sulphur Springs, and the District's share of the cost of the Minimum Flow reevaluation study to be completed by December 31, 2005, as required by the proposed rule.

5.0 Impact to Small Businesses, Small Cities and Small Counties

Impact on Small Businesses

There are no known small business permittees whose current withdrawal quantities will be affected by the implementation of the proposed minimum flow for the lower Hillsborough River. Further it is unlikely that any additional base flow quantities that would affect the minimum flow proposed for the lower Hillsborough River would meet current or proposed rule criteria. Therefore, the proposed rule will not cause any additional impact to small businesses.

Impact to Small Cities and Small Counties

There are no small counties or cities affected by the proposed rule.

(Substantial rewording of Rule 40D-8.041 follows. See Florida Administrative Code for present text).

40D-8.041 Minimum ~~Rates of Flows and Levels.~~

(1) Minimum Flows for the Lower Hillsborough River

(a) For the purposes of Minimum Flows, the Lower Hillsborough River is defined as the River downstream of Fletcher Avenue. A tributary of the Lower Hillsborough River is Sulphur Springs, an artesian spring which enters the River via a short spring run at a point 2.2 miles downstream of the City's dam.

(b) Effective January 1, 2000, the Minimum Flow for the Lower Hillsborough River shall be at the rate of flow of ten (10) cubic feet per second (cfs) at the base of the dam as measured at the Rowlett Park Drive bridge gauging station. Through December 31, 2007, the City shall be required to supply this Minimum Flow from the Reservoir or other sources when the surface water elevation is above 22.5 NGVD at USGS Gauge 02304500. Because the storage of water within the Reservoir is critical to the public health, safety, and welfare of those dependent on the City potable water supply, this flow requirement may be met by diverting flow from sources other than the City's Reservoir. The City shall provide this flow from sources other than the City's Reservoir, when the surface water elevation is below 22.5 ft. NGVD at USGS Gauge 02304500 and it is feasible to provide the flow without compromising public health, safety or welfare. This Minimum Flow has been determined based on the loss of historical hydrologic functions, the existing changes and structural alterations in and along the river and its water shed pursuant to subsection 373.0421(1), F.S., and the dependence of viable ecological communities downstream of the dam on flows from the Hillsborough River and Sulphur Springs. Following completion of the District and City study described in Rule 40D-80.73(4)(d), F.A.C., the Minimum Flow shall be re-established, as necessary, based on the results of the study.

(c) Pursuant to the District priority schedule for establishment of minimum flows and levels required by Section 373.042, F.S., the District will establish a Minimum Flow for Sulphur Springs by December 31, 2001.

Prevention and Recovery Strategies	
for Minimum Flows and Levels	40D-80
RULE TITLE:	RULE NO.:
Regulatory Portion of Recovery Strategy	
for Pasco, Northern Hillsborough,	
and Pinellas Counties	40D-80.073

PURPOSE AND EFFECT: Simultaneously with this notice of rulemaking, the District is giving notice of rulemaking to revise the established Minimum Flow for the Lower Hillsborough River as one of the priority water bodies within Hillsborough, Pasco and Pinellas Counties pursuant to Section 373.042, F.S. (1996 Supp.) Subsection 373.042(2), F.S., (1997) states that when the District determines that the actual water level or flow for a water body is below the established Minimum Flow or Level, the District must expeditiously implement a plan to recover the water levels or flow to the established Minimum Flow or Level. The District's recovery strategy to achieve the established Minimum Flow for the Lower Hillsborough River is included in the proposed rules. SUMMARY: The proposed rules set forth the recovery strategy for achieving the Minimum Flow for the Lower Hillsborough River as follows:

1. Effective January 1, 2000, the Minimum Flow for the Lower Hillsborough River is 10 cubic feet per second at the base of the City of Tampa's dam as measured at Rowlett Park Drive bridge.
2. From January 1, 2000 through December 31, 2007, the Minimum Flow must be provided from either the City of Tampa's Reservoir or other sources when the surface water elevation at USGS gauge No. 02304500 is above 22.5 feet NGVD. When the surface water elevation is below 22.5 feet NGVD the Minimum Flow will be provided from sources other

than the Reservoir so long as public health, safety and welfare are not compromised. When other sources are determined feasible, then flow will be provided such that the Minimum Flow will be met.

3. From January 1, 2008 through December 31, 2009, the Minimum Flow will be met unless other sources of water for the Flow are not feasible, water is not available from Tampa Bay Water to meet the Minimum Flow and providing flow from the City's drinking water supplies to meet the Minimum Flow would compromise public health, safety and welfare.
4. Beginning January 1, 2010, the Minimum Flow shall be met.
5. By December 31, 2003, the City shall complete an investigation of the feasibility of using sources other than the City's Reservoir to meet the Minimum Flow.
6. By December 31, 2005, the City and the District shall complete a study of the biological communities below the dam, taking into account certain factors to reevaluate the Minimum Flow requirement to maintain the existing biological communities in the Lower Hillsborough River. If the study demonstrates the need for revisions to the Minimum Flow the District shall initiate rulemaking to adopt the revised Minimum Flow resulting from this study.

As part of the response to this mandate, the District has initiated efforts to adopt minimum flows for the Lower Hillsborough River. For the purposes of a Minimum Flow for the Lower Hillsborough River, the Lower Hillsborough River is defined as the river downstream of Fletcher Avenue. A tributary of the Lower Hillsborough River is Sulphur Springs, an artesian spring that enters the River via a short spring run located 2.2 miles downstream of the City of Tampa's dam.

Under current rules, the City of Tampa's Water Use Permit for withdrawals from the Hillsborough River required that the City conduct a feasibility study for reducing the number of no-flow days to bring the permit more into compliance with existing stream flow performance standards in Chapter 40D-2, F.A.C. Furthermore, no additional quantities would likely be permitted under current rules that would affect the base flow of the Hillsborough River due to concerns over the potential impacts to the existing use of the river for drinking water supplies for the City of Tampa and the potential additional ecological harm caused by an increase in the number of no-flow days in the Lower Hillsborough River, particularly the stretch between the dam and Sulphur Springs.

The proposed rule prescribes a phased flow regime for the Lower Hillsborough River which will minimize, and eventually eliminate, no-flow days. This Summary is based on analysis of

the February 22, 1999 Hillsborough River Minimum Flow draft rule approved for publication by the Governing Board of the Southwest Florida Water Management District.

#### 2.0 Individuals and Entities Likely to be Required to Comply

The permittee directly affected by the proposed rule is the City of Tampa in that the proposed rule specifies the circumstances and manner under which the City must comply with the proposed Minimum Flow. However, reducing and eliminating no-flow conditions in the Lower Hillsborough River would be required under existing rules.

Any other existing permittees, and new applicants, requesting additional withdrawals that would affect the base flow of the Hillsborough River are not affected by the proposed rule revision. Such applications would likely not meet current rule criteria.

#### 3.0 Cost to the District, the State and Local Government Entities

The proposed rule revision is not anticipated to incur costs to either the State of Florida or to local government entities in terms of changes in tax revenues or changes in costs. The proposed rule revisions do not require State or local government agencies to implement or enforce rules or ordinances. The proposed rule will not change the District's emphasis on water conservation and alternative source development as is required under current rule. Furthermore, no loss of jobs or income is anticipated under the proposed rule revision. Therefore, tax revenues and the level of government services are not anticipated to change as a result of the proposed rule revision. Costs to government entities who have a water use permit affected by the proposed rule revision are described in Section 4.0, "Transactional Costs Likely to be Incurred by Individuals and Entities".

No loss of jobs or income is anticipated under the proposed rule revision because the requirements of permittees and applicants will not be significantly different under the proposed rule than under current rule. The proposed rule revision is consistent with the purpose and intent of the existing Chapter 40D-2.301, Conditions for Issuance of Permits, and the actions that the District has taken to address adverse impacts of withdrawals in the Northern Tampa Bay area. Therefore, sales and property tax revenues and the level of government services are not anticipated to change as a result of the proposed rule revision.

The minimum flow requirement does not place a limit on overall water sales. Therefore, no significant changes in utility tax revenues are anticipated as a result of the proposed rule revision.

No significant additional permit review or monitoring costs to the SWFWMD are anticipated as a result of the implementation of the proposed rules. Enforcement costs to the SWFWMD are also not likely to increase unless there is significant disagreement between the District, the City of Tampa, or a third party over whether providing the Minimum

Flow at a particular time and from a particular source constitutes a drinking water supply-related threat to public health, safety and welfare.

In the future, there may be additional costs to the District, however these costs could not be estimated at this time. Such costs include the District's share of the cost of conducting an evaluation of the quality of Minimum Flow sources other than the City's reservoir and Sulphur Springs, and the District's share of the cost of the Minimum Flow reevaluation study to be completed by December 31, 2005, as required by the proposed rule.

#### 4.0 Transactional Costs Likely to be Incurred by Individuals and Entities

Additional water from Sulphur Springs or other sources may be needed by the City of Tampa to augment flows in the lower Hillsborough River at the base of the Hillsborough River Reservoir dam in order to comply with the proposed minimum flow for this section of the river. The cost of obtaining additional quantities would likely have been incurred under current rule requirements and does not necessarily represent rule revision-related additional cost. They are, however, addressed for illustrative purposes.

There are several potential sources of minimum flow water. Additional water conservation may extend the period of time that the minimum flow can be met by flow from the reservoir. Additional conservation costs may range from \$.17 to \$2.00 per thousand gallons saved. The annual capital and operation and maintenance costs of providing the minimum flow from Sulphur Springs is estimated as \$203,000. The City of Tampa and the SWFWMD are already co-funding projects to determine the feasibility of obtaining water from Blue Sink and the Curiosity Creek watershed. The total feasibility study project cost is \$50,000. Up to \$100,000 is being budgeted by SWFWMD and the City in Fiscal Year 2000 for implementation if the projects are found feasible. Under certain circumstances, Tampa Bypass Canal water permitted to Tampa Bay Water could be back pumped to make more water available for augmentation of the reservoir. Assuming the necessary agreements could be negotiated, the estimated annualized cost of providing the minimum flow (6.5 mgd) would be \$271,180. If water had to be purchased from Tampa Bay Water, the cost to the City would be, at a minimum, the difference between the City's and Tampa Bay Water's in production cost.

In the future, there may be additional costs to the City of Tampa, however these costs could not be estimated at this time. Such costs include the City's share of the cost of conducting an evaluation of the quality of Minimum Flow sources other than the City's reservoir and Sulphur Springs, and the District's share of the cost of the Minimum Flow reevaluation study to be completed by December 31, 2005, as required by the proposed rule.

## 5.0 Impact to Small Businesses, Small Cities and Small Counties

### Impact on Small Businesses

There are no known small business permittees whose current withdrawal quantities will be affected by the implementation of the proposed minimum flow for the lower Hillsborough River. Further it is unlikely that any additional base flow quantities that would affect the minimum flow proposed for the lower Hillsborough River would meet current or proposed rule criteria. Therefore, the proposed rule will not cause any additional impact to small businesses.

### Impact to Small Cities and Small Counties

There are no small counties or cities affected by the proposed rule.

#### (4) Hillsborough River Strategy.

(a) Beginning January 1, 2000, the Minimum Flow for the Lower Hillsborough River shall be at the rate of flow of 10 cubic feet per second (cfs). The City shall provide measurement of the delivery of water to the base of the dam. The Minimum Flow shall be measured at the Rowlett Park Drive bridge gauging station.

1. Through December 31, 2007, the City shall be required to provide the 10 cfs Minimum Flow from the Reservoir or other sources when the surface water elevation is above 22.5 ft. NGVD at USGS Gauge 02304500. The City shall provide this flow from sources other than the City's Reservoir when the surface water elevation is below 22.5 ft. NGVD at USGS Gauge 02304500 and it is feasible to provide the flow without

compromising the public health, safety and welfare of the City. Once the City has determined that flow from another source or sources is feasible pursuant to 40D-80.073(4)(b), F.A.C., below and the evaluation of the source(s) pursuant to 40D-80.073(4)(c), F.A.C., is complete, such flow shall be supplied when necessary to maintain the Minimum Flow.

2. Beginning January 1, 2008 through December 31, 2009, the City shall meet the Minimum Flow unless flow is not feasible from the other source(s) as set forth in 40D-80.073(4)(b), F.A.C., below. If these other source(s) are not feasible, the City will request sufficient quantity of water from Tampa Bay Water to meet the Minimum Flow. If Tampa Bay Water is unable to provide sufficient additional water supply needed to meet the required Minimum Flow, and if the provision of water for Minimum Flow from the City's drinking water supply would compromise the public health, safety, and welfare the City shall not be required to meet the Minimum Flow until Tampa Bay Water can supply sufficient replacement water or January 1, 2010, whichever occurs first.

3. Beginning January 1, 2010, the City shall meet the Minimum Flow.

(b) By December 31, 2003, the City, with District consideration of financial participation, shall complete a study of the economic and technical feasibility of meeting the Minimum Flow for the Lower Hillsborough River from sources other than the City's Reservoir, including but not limited to Blue Sink, Curiosity Creek watershed, and the Howard F. Curren Advanced Wastewater Treatment Plant. The City shall submit to the District a written report each December 31 through December 31, 2003, on the sources investigated, the results of the investigation, and the City's determination as to the feasibility of each of the sources.

(c) The City's implementation of the use of any source other than the City's Reservoir or Sulphur Springs is subject to a coordinated evaluation with the District to determine that its quality is at least equivalent to the water being used from Sulphur Springs. After the study specified in 40D-80.073(4)(d), F.A.C., below, is completed, the District shall use the findings of that study to

**Section V**  
**Petitions and Dispositions Regarding Rule Variance or Waiver**

**PUBLIC SERVICE COMMISSION**

NOTICE IS HEREBY GIVEN that on February 23, 1999, the Florida Public Service Commission received a Petition from BellSouth Public Communications, Inc. (Docket No. 990204-TC), seeking waiver of Rule 25-24.515(13), Florida Administrative Code. The petition is a request for an exemption from the rule which requires that all pay telephone stations allow incoming calls to be received. The location of the pay telephone station is as follows: Mike's Food Store, 317 S. W. 4th Avenue, Gainesville, FL 32601. Comments on this Petition should be filed with the Commission's Division of Records and Reporting, Public Service Commission, 2540 Shumard Oak Boulevard, Tallahassee, FL 32399-0863, within 14 days of publication of this notice.

A copy of the Petition may be obtained from the Commission's Division of Records and Reporting, Betty Easley Conference Center, 4075 Esplanade Way, Tallahassee, FL 32399-0850, or by calling (850)413-6770. For additional information, contact: John Miller, Division of Legal Services, 2540 Shumard Oak Boulevard, Tallahassee, FL 32399-0862, or telephone (850)413-6230.

**DEPARTMENT OF BUSINESS AND PROFESSIONAL REGULATION**

NOTICE IS HEREBY given that the Board of Professional Engineers has received a petition from SARITA NEBHRAJANI on February 4, 1999 seeking a variance/waiver pursuant to 120.452, Florida Statutes. Petitioner requests a variance/waiver from rule 61G15-20.007, in order to have her education accepted under 20.007. The applicant is requesting that a deficiency of 2.5 hours in Basic Sciences be waived based on her substantial number of courses in other areas of engineering both at the BS and MS level. The petition has been assigned #VW99-002.

A copy of the petition may be received from, and written comments submitted to: Teresa Baker, Clerk, Florida Board of Professional Engineers, 1208 Hays Street, Tallahassee, Florida 32301.

**DEPARTMENT OF ENVIRONMENTAL PROTECTION**

The Department of Environmental Protection gives notice of its intent to issue a variance (File No. VE-28-735) from the provisions of Rule 62-4.244(5)(c), Florida Administrative Code, to the U. S. Army Corps of Engineers, Jacksonville District, P. O. Box 4970, Jacksonville, Florida 32232-0019 to temporarily extend the allowable mixing zone for turbidity during construction.

Rule 62-4.244(5)(c), F.A.C., requires that the boundary of a dredge and fill mixing zone shall not be more than 150 meters downstream in flowing waters or 150 meters in radius in other bodies of water as measured from the points of generation of turbidity or other pollutants. The petitioner seeks a variance from these provisions to allow dredge and fill activities associated with the construction work necessary to accomplish the Kissimmee River Restoration Reach 1 Backfill Project. The variance is needed because the placement of fill material in the C-38 Canal and excavation of channel segments intrinsic to the project may result in the temporary and localized movement of soil and sediments into suspension within the water column, temporarily elevating turbidity levels. The petitioner seeks a variance allowing a mixing zone extending up to 3,200 meters south of the project boundary. The project encompasses approximately 12,000 meters of the C-38 Canal; therefore, the total extent of the requested mixing zone is approximately 15,200 meters, depending upon the location of construction activities within the project limits. The S-65C water control structure in the C-38 Canal shall be the compliance measurement point established by this variance. This variance request is associated with an application for an environmental resource permit, file no. 0147658.

The proposed project is located in several sections within Townships 34 and 35 South, Ranges 31 and 32 East, in Highlands and Okeechobee Counties. The nearest municipalities to the proposed construction sites are Sebring and Avon Park in Highlands County and Okeechobee in Okeechobee County. Reach 1 may be generally described as the area of the C-38 Canal beginning just north of the existing S-65C water control structure northward to just north of the existing S-65B water control structure.

The Department's file on this matter is available for public inspection during normal business hours, 8:00 a.m. to 5:00 p.m., Monday through Friday, except legal holidays, at the Department of Environmental Protection, Everglades Technical Support Section, 2600 Blair Stone Road, Tallahassee, Florida 32399-2400, telephone (850)921-5213.

This application for a variance will be granted unless a sufficient petition for an administrative hearing is timely filed under Sections 120.569 and 120.57 of the Florida Statutes as provided below. The procedures for petitioning for a hearing are set forth below.

Mediation is not available.

A person whose substantial interests are affected by the Department's agency action may petition for an administrative proceeding (hearing) under Sections 120.569 and 120.57 of the Florida Statutes. The petition must contain the information set forth below and must be filed (received by the clerk) in the Office of General Counsel of the Department at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida 32399-3000.

Because the administrative hearing process is designed to redetermine final agency action on the application, the filing of a petition for an administrative hearing may result in a modification of the agency action or even a denial of the application.

Under Rule 62-110.106(4) of the Florida Administrative Code, a person whose substantial interests are affected by the Department's action may also request an extension of time to file a petition for an administrative hearing. The Department may, for good cause shown, grant the request for an extension of time. Requests for extension of time must be filed with the Office of General Counsel of the Department at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida 32399-3000, before the applicable deadline. A timely request for extension of time shall toll the running of the time period for filing a petition until the request is acted upon. If a request is filed late, the Department may still grant it upon a motion by the requesting party showing that the failure to file a request for an extension of time before the deadline was the result of excusable neglect.

In the event that a timely and sufficient petition for an administrative hearing is filed, other persons whose substantial interests will be affected by the outcome of the administrative process have the right to petition to intervene in the proceeding. Any intervention will be only at the discretion of the presiding officer upon the filing of a motion in compliance with Rule 28-106.205 of the Florida Administrative Code.

In accordance with Rules 28-106.111(2) and 62-110.106(3)(a)(4), petitions for an administrative hearing by the applicant must be filed within 21 days of receipt of this written notice. Petitions filed by any persons other than the applicant, and other than those entitled to written notice under Section 120.60(3) of the Florida Statutes must be filed within 21 days of publication of the notice or within 21 days of receipt of the written notice, whichever occurs first.

Under Section 120.60(3) of the Florida Statutes, however, any person who has asked the Department for notice of agency action may file a petition within 21 days of receipt of such notice, regardless of the date of publication.

The petitioner shall mail a copy of the petition to the applicant at the address indicated above at the time of filing. The failure of any person to file a petition for an administrative hearing within the appropriate time period shall constitute a

waiver of that person's right to request an administrative determination (hearing) under Sections 120.569 and 120.57 of the Florida Statutes.

A petition that disputes the material facts on which the Department's action is based must contain the following information:

(a) The name and address of each agency affected and each agency's file or identification number, if known;

(b) The name, address, and telephone number of the petitioner; the name, address, and telephone number of the petitioner's representative, if any, which shall be the address for service purposes during the course of the proceeding; and an explanation of how the petitioner's substantial interests are or will be affected by the agency determination;

(c) A statement of when and how the petitioner received notice of the agency decision,

(d) statement of all disputed issues of material fact. If there are none, the petition must so indicate;

(e) A concise statement of the ultimate facts alleged, including the specific facts that the petitioner contends warrant reversal or modification of the agency's proposed action; and

(f) A statement of the specific rules or statutes that the petitioner contends require reversal or modification of the agency's proposed action; and

(g) A statement of the relief sought by the petitioner, stating precisely the action that the petitioner wishes the agency to take with respect to the agency's proposed action.

A petition that does not dispute the material facts on which the Department's action is based shall state that no such facts are in dispute and otherwise shall contain the same information as set forth above, as required by Rule 28-106.301, Florida Administrative Code. Under Sections 120.569(2)(c) and (d) of the Florida Statutes, a petition for administrative hearing must be dismissed by the agency if the petition does not substantially comply with the above requirements or is untimely filed.

This action is final and effective on the date filed with the Clerk of the Department unless a petition is filed in accordance with the above. Upon the timely filing of a petition this order will not be effective until further order of the Department.

This intent to issue a variance constitutes an order of the Department. The applicant has the right to seek judicial review of the order under Section 120.68 of the Florida Statutes, by the filing of a notice of appeal under Rule 9.110 of the Florida Rules of Appellate Procedure with the Clerk of the Department in the Office of General Counsel, 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida 32399-3000; and by filing a copy of the notice of appeal accompanied by the applicable filing fees with the appropriate district court of

appeal. The notice of appeal must be filed within 30 days from the date when the final order is filed with the Clerk of the Department.

The Securities Guaranty Fund is disbursed as provided in  
 Section 517.141, Florida Statutes, to a person who is adjudged  
 by a court of competent jurisdiction to have suffered monetary

7. The total claims may not exceed \$100,000, and all claims will be prorated based upon the ratio that the person's claim bears to the total claims filed, as set forth in Section 517.141(2), Florida Statutes.
8. Section 517.141(3), Florida Statutes, provides that no payment from the Fund shall be made until 2 years after the first claim has been determined by the Department to be eligible for payment from the Fund. **AGENCY FOR HEALTH CARE ADMINISTRATION**

The Florida Agency for Health Care Administration (the Agency), Bureau of Medicaid Program Analysis provides the following public notice regarding reimbursement for nursing facilities participating in the Florida Medicaid Program.

**PURPOSE:** To comply with federal public notice requirements in Section 1902(a)(13)(A) of the Social Security Act in changing reimbursement for nursing facilities, the Agency is publishing the proposed rates, the methodologies underlying the establishment of such rates, and justifications for the proposed rates. The Agency is in the process of amending its long-term care reimbursement plan to phase in a case-mix reimbursement methodology.

**PROPOSED RATES:** The proposed rates effective April 1, 1999, for nursing facilities participating in the Florida Medicaid Program will be rates resulting from the current methodology used to calculate rates, except that there will be a case-mix adjustment, which will be paid as an add-on to the patient care component of the per diem rate.

**METHODOLOGIES:** The methodology underlying the establishment of the proposed rates for nursing facilities is based on the methodology currently being used for calculating rates, except that a case-mix adjustment will be paid as an add-on to the patient care component of the per diem rate.

The Agency will utilize the Minimum Data Set (MDS) assessments currently being submitted by nursing facilities to classify residents based on their acuity levels and resource needs. Based on the MDS assessments for individual Medicaid residents an average case-mix score will be determined for each nursing facility. The average case-mix score will be computed by using the Resource Utilization Grouper (RUGS III) to classify the MDS assessments into one of thirty-four (34) RUGS III categories. Each facility's average case-mix

score and Medicaid days will be used to calculate the case-mix add-on that will be added to the nursing facility's patient care component.

**JUSTIFICATION:** The justification for the proposed rates is based on the legislative direction provided in the proviso language following Specific Appropriation 255 of the 1998-99 General Appropriations Act, Chapter 98-46, Laws of Florida. This language directs the Agency to phase in a case-mix reimbursement methodology, which uses a resident classification system that accounts for the relative resource utilization by different acuity levels of residents. The case-mix methodology is to be implemented only as data becomes available and no earlier than April 1, 1999. The Agency is proposing the above rates and changes in methodology, effective April 1, 1999, to comply with the legislative direction. Providers, beneficiaries and their representatives, and other concerned State residents may provide written comment on the proposed rates, methodologies and justification underlying the establishment of such rates. Written comments may be submitted to: John Owens, Agency for Health Care Administration, Post Office Box 12400, Tallahassee, Florida 32317-2400. Written comments should be submitted no later than March 16, 1999.

Copies of the proposed reimbursement plan incorporating the above changes may be obtained by contacting: John Owens, Medicaid Cost Reimbursement Section, at the address above.
