(1) Purpose. This rule provides the method and procedure for the medical advisory panel review required by Section 766.308, Florida Statutes. This procedure was developed in coordination with the Department of Health to determine compensability of claims filed against the Florida Birth-Related Neurological Injury Compensation Association.

(2) Definitions. In its review of claims made pursuant to the provisions of the Florida Birth-Related Neurological Compensation Plan, the medical advisory panel shall employ the following definitions, in addition to the definitions in Section 766.302, Florida Statutes:

(a) "Association" means the Florida Birth-Related Neurological Injury Compensation Plan.

(b) "Brain" means that portion of the cerebro-spinal axis which is contained within the cavity of the cranium and which consists of five major parts identified as the cerebrum, the cerebellum, the pons Varolii, the medulla oblongata, and the midbrain.

(c) "Spinal Cord" means an ovoid column of nervous tissue extending from the medulla oblongata to the second lumbar vertebra in the spinal canal.

(d) "Delivery" is the moment when the fetus is expelled from the vaginal canal or mechanically removed from the uterus.

(e) "Labor" is that period of time commencing with the onset of increasingly painful uterine contractions of sufficient frequency, intensity, and duration to bring about readily demonstrable effacement and dilation of the cervix in conjunction with the progressive descent of the fetus.

(f) "Permanent and substantial mental and physical impairment" means a neurological injury caused by oxygen deprivation or mechanical injury during labor, delivery or resuscitation in the immediate post-delivery period in a hospital which leaves the infant both mentally and physically impaired.

1. The neurological impairment must be permanent and substantial. For a neurological injury to be permanent, it must be determined that the neurological injury will exist throughout the life of the affected infant within a reasonable degree of medical probability.

2. For a physical neurological impairment to be substantial, the infant must exhibit a physical impairment to the extent that the infant's ability to ambulate, speak and engage in physical activities of daily living such as toileting and feeding, are either severely impaired or non-existent. For a mental neurological impairment to be substantial, the infant must exhibit a severe mental impairment such that the infant has or would score, within a reasonable degree of medical probability 50 or below on the mental component of the Bayley Scales of Infant Development (between ages 12-24 months) or the Stanford Binet Intelligence Test (between ages 4-5).

(3) A medical advisory panel appointed by the Insurance Commissioner in accordance with Section 766.308, Florida Statutes, shall review each claim for which a review is requested by any party for the purpose of making a non-binding recommendation regarding the claim.

(4) The medical advisory panel shall elect a panel member as chairperson. The chairperson shall delegate the various administrative duties required for the operation of the medical advisory panel, and when necessary, shall convene the medical advisory panel for the purpose of conducting the business of the medical advisory panel.

(5) Each medical advisory panel member shall be provided a complete copy of each claim submitted for review and shall consider therewith all relevant written information submitted by the Association which relates to the issue of whether or not the injury under review is a birth-related neurological injury within the meaning of Section 766.302(2), Florida Statutes.

(6) The medical advisory panel may request the Administrative Law Judge to order the production of additional information or records from any health care provider who has provided treatment to the infant or obstetrical care to the mother and, if necessary, may further request that the injured infant be examined by a physician or other professional selected by the medical advisory panel.

DEPARTMENT OF REVENUE

Sales and Use Tax

RULE TITLE: Sales of Coins, Currency, or Bullion
 RULE NO.: 12A-1.0371

PURPOSE AND EFFECT: The purpose of the proposed substantial rewording of Rule 12A-1.0371, FAC., is to implement the changes to ss. 212.05(1)(k) and 212.08(7)(ddd), F.S., made by the 1999 Legislature, regarding the sale of coins, currency, and bullion. The effect of this proposed substantial rewording will be to provide the public current guidelines regarding the sales tax imposed on the sale of coins, currency, and bullion.

SUMMARY: The proposed substantial rewording of Rule 12A-1.0371, FAC., provides that the sale of U.S. legal tender is exempt regardless of its selling price. The terms “legal tender,” “bullion,” and “single transaction” are defined for purposes of the rule. The proposed amendments provide that the sale of coins or currency, in a single transaction, is exempt when the sales price charged for coins or currency that are not legal tender of the United States or legal tender of another country sold at its face value exceeds \$500. The sale of gold, silver, or platinum bullion, or a combination thereof, in a single transaction, is exempt when the total sales price of the bullion exceeds \$500. Examples of such transactions are provided in the proposed substantial rewording.

The proposed substantial rewording provides that no tax is due on the exchange of coins and currency in circulation in, and the legal tender of, a nation in exchange for the same of another nation when the exchange is solely for use as legal tender and the rate of exchange is based on the value of each nation’s coins or currency as a medium of exchange.

The proposed substantial rewording of the rule also provides that dealers of coins, currency, or bullion must maintain proper documentation until tax imposed by Chapter 212, F.S., may no longer be determined and assessed under s. 95.091(3), F.S. The documentation to be maintained is described.

SUMMARY OF STATEMENT OF ESTIMATED REGULATORY COST: Since this proposed rule only implements statutory provisions, no new regulatory costs are being created. Therefore, no statement of estimated regulatory costs has been prepared.

Any person who wishes to provide information regarding the statement of estimated regulatory costs, or to provide a proposal for a lower cost regulatory alternative, must do so in writing within 21 days of this notice.

THE FULL TEXT OF THE PROPOSED RULE IS:

(Substantial Rewording of Rule 12A-1.0371 follows. See Florida Administrative Code for present text.)

12A-1.0371 Sales of Coins, ~~or~~ Currency, or Bullion.

(1)(a) The sale, use, consumption, or storage for use in this state of any coin or currency, whether in circulation or not, is subject to tax unless:

1. The coin or currency is legal tender of the United States;
- or
2. The coin or currency is legal tender of a country other than the United States, and the coin or currency is sold at its face value.

(b) For purposes of this rule, "legal tender" means coins or currency that, at the time of the sale transaction, a creditor would be required to accept in payment of a debt.

(c) Examples:

1. United States Olympic Coin Sets and United States Double Eagles are legal tender of the United States, and their sale is not taxable.

2. Ancient Roman coins, medieval English coins, and Confederate money are no longer legal tender in any country, and their sale is taxable.

3. A coin dealer sells a 1983 British pound, composed of nickel and brass, for a price in U.S. currency that exceeds the current exchange rate. The sale is taxable.

4. A retail sale of a gold Krugerrand is taxable, even though it may be legal tender in the Republic of South Africa, because it has no face value and is sold based upon its precious metal content.

(2) The sale, use, consumption, or storage for use in this state of bullion is subject to tax. For purposes of this rule, "bullion" means gold, silver, or platinum in the form of bars, ingots, or plates, normally sold by weight. Finished goods,

such as coins and jewelry, are not bullion. Sales of commodity contracts of bullion are not subject to tax unless delivery of the commodity is taken in Florida.

(3)(a)1. The sale of coins or currency, in a single transaction, is exempt when the sales price charged for coins or currency that are not legal tender of the United States or legal tender of another country sold at its face value exceeds \$500.

2. Example: In one transaction, an investor purchases one United States \$40 coin, called a gold double eagle, for \$295, one Krugerrand for \$295, and one one-ounce gold ingot for \$295. Because the gold double eagle is United States legal tender, its sale is not subject to tax. The sale of the gold ingot is not a taxable sale of coins or currency, but is a taxable sale of bullion. The sale of the Krugerrand is a taxable sale of coins or currency. Because the portion of the sales price charged for taxable coins or currency is \$295, the transaction does not qualify for exemption and the sale of the Krugerrand and the ingot is taxable.

(b)1. The sale of gold, silver, or platinum bullion, or any combination thereof, in a single transaction, is exempt when the total sales price of such bullion exceeds \$500.

2. Example: An investor purchases two one-ounce gold ingots and one one-ounce platinum ingot in one transaction for \$1020. The sale is exempt, because the sales price of the bullion exceeds \$500.

(c) For purposes of this rule, a "single transaction" has the same meaning as the term "single sale," described in Rule 12A-1.003, F.A.C.

(4) Jewelry or other objects made or fabricated by incorporating or using coins, currency, or bullion are subject to tax. Tax is due on the total sales price of the jewelry or other objects, without deduction or credit for the price or value of the coins, currency, or bullion.

(5) When coins or currency that are in circulation in, and the legal tender of, a nation are exchanged for coins or currency in circulation in, and legal tender of, another nation, no tax is due when the coins or currency are exchanged solely for use as legal tender and the rate of the exchange is based on the value of each nation's coins or currency as a medium of exchange.

(6) The dealer must maintain proper documentation to exempt, in whole or in part, the sale of coins, currency, or bullion until tax imposed by Chapter 212, F.S., may no longer be determined and assessed under s. 95.091(3), F.S. Failure to maintain and preserve proper documentation will subject the entire transaction to tax. Proper documentation, in the case of a transaction involving coins or currency, will describe the country, issue, grade, denomination, face value, and sales price of each item of coin or currency and additional information to clearly identify each coin or currency. In the case of a transaction involving bullion, proper documentation will describe the metal, quantity, form (such as bars or ingots), and sales price of each item of bullion.

33-203.201 Inmate Bank Trust Fund.

(1) The following are the policies of the Department with respect to money received for the personal use or benefit of inmates:

(a) No change.

(b) In the case of probation and restitution center offenders who violate the conditions of probation and owe fees for room and board, a staff member of the probation and restitution center may file a claim for a cost judgment in conjunction with the violation report. The staff member shall file with the Bureau of Sentence Structure and Transportation Admission and Release, 2601 Blair Stone Road, Tallahassee, Florida 32399-2500, a true copy of the judgment or other monetary order or sanction which has been entered by the appropriate court, together with a cover letter stating the date and amount of the judgment, money order or sanction, or the balance remaining if less than the face amount thereof.

(c) through (f) No change.

(2)(a) All monies (cashiers checks, money orders, or certified bank drafts only; no cash allowed) that are mailed to a service center for an inmate shall be initially deposited in the Inmate Bank Trust Fund. Deposits mailed to institutional or other department addresses other than the service centers will be forwarded to the service center, but this process will result in delay in deposit of the funds. In order to deposit the funds

the sender must complete Form DC2-303, Inmate Trust Fund Deposit Form. Form DC2-303 is hereby incorporated by reference. A copy of this form may be obtained from any institution, facility, service center, or the Forms Control Administrator, Office of the General Counsel, 2601 Blair Stone Road, Tallahassee, Florida 32399-2500. ~~If forms are to be mailed the request must be accompanied by a self-addressed stamped envelope.~~ The effective date of this form is _____.

(b) Attempts will be made to process deposits sent without the accompanying form, but the absence of the form may result in delays. If staff are unable to determine to which inmate the money is being sent, the money will be returned to the sender with a request for additional information necessary to process the deposit. If staff are unable to determine to which inmate the money is being sent and are unable to return the money because the sender did not provide a valid return address, the money will be held in a clearing account until the sender or receiving inmate is identified. If the inmate remains unidentified for 5 years the funds shall escheat to the state as unclaimed funds held by fiduciaries.

~~(c) An inmate may, however, withdraw his funds from the Inmate Bank Trust Fund for deposit into a savings account with a private financial institution. If an inmate does not wish his monies to be deposited into the Inmate Bank Trust Fund, he must advise the donor of the funds to send them directly to the savings institution of his choice. This option shall not be available when an inmate is on work release or a similar paid work program. In this case, the provisions of rule 33-601.602, disbursement of earnings shall apply. All inmates on work release shall submit their full pay for deposit in the Inmate Bank Trust Fund so that subsistence and transportation costs, restitution, 10% savings hold, and court ordered payments, if applicable, may be deducted. The inmate may transfer any excess funds to a private account as defined in paragraph (1)(b) in accordance with the personalized program plan ~~after complying with the Letter of Notice, DC6-102. Form DC6-102 is hereby incorporated by reference. A copy of this form may be obtained from the Forms Control Administrator, Office of the General Counsel, 2601 Blair Stone Road, Tallahassee, Florida 32399-2500. The effective date of this form is:~~~~

(3) through (5) No change.

(6) When an inmate is released from the control of the department, the inmate's balance in the inmate bank trust fund at the time of discharge shall be mailed by the service center to an address of the inmate's choice ~~the inmate~~. However, if deposits of checks, money orders or other negotiable instruments have been made to the inmate's account but have not cleared the account of the payor by the time the inmate is discharged, funds equal to the amount of the uncleared deposits shall be retained in the inmate's trust fund account. Immediately after the deposits have cleared, the balance due the inmate shall be forwarded by mail to the inmate. Inmates being released will be provided with cash for travel and related

expenses. For inmates who meet eligibility requirements set forth in rule 33-601.502, this money shall be in the form of a discharge gratuity. For inmates who are not eligible for discharge gratuities, the amount will be later deducted from the inmate's trust fund account, with any remaining account balance being forwarded as indicated above.

(7) Upon the death of any inmate affected by the provisions of this section during the period of incarceration, any unclaimed money held for him in trust by the Department or by the State Treasurer shall be applied first to the payment of any unpaid claim against the inmate. Any remaining funds shall be transferred to the inmate's designated beneficiary or to the decedent's estate. In the event that the funds are unclaimed after ~~for~~ a period of 1 year, the balance shall escheat to the state as unclaimed funds held by fiduciaries.

Southwest Florida Water Management District

RULE NO.: 40D-2.091
 RULE TITLE: Publications Incorporated by Reference

NOTICE OF CHANGE

Notice is hereby given that the following changes have been made to Section 4.3 subsections A.-A.1.a.ii(I) of the Basis of Review (incorporated by reference in Rule 40D-2.091) published in Vol.24, No.48, November 25, 1998, issue of Florida Administrative Weekly on pages 6464 through 6467 as changed in Vol. 25, No. 48, December 3, 1999, issue of the Florida Administrative Weekly on pages 5582 through 5585.

WATER USE PERMITTING BASIS OF REVIEW

The following changes are made to Chapter 4.0:

4.0 CONDITIONS FOR ISSUANCE – TECHNICAL CRITERIA

4.3 MINIMUM FLOWS AND LEVELS

The District has adopted Minimum Flows and Levels for certain waters within the District. Those Minimum Flows and Levels are set forth in Chapter 40D-8, Florida Administrative Code (F.A.C.). Through implementation in Rule 40D-2.301(1)(d), F.A.C., and this Section 4.3, those Minimum Flows and Levels are one criterion used by the District in evaluating applications for water use permits under Chapter 40D-2, F.A.C. Rule 40D-2.301(1)(d), F.A.C., this Section 4.3 and Chapter 40D-80, F.A.C. govern the manner in which this one criterion is utilized in evaluating a water use permit application. Accordingly, applicants shall demonstrate

compliance with established Minimum Flows, Minimum Wetland Levels, Minimum Lake Levels and Salt Water Intrusion Minimum Aquifer Levels (hereinafter sometimes collectively called Minimum Flows and Levels) set forth in Chapter 40D-8, F.A.C., as follows:

A. Withdrawals That Affect Water Bodies for Which Minimum Flows and Levels Have Been Adopted Within Those Portions of Hillsborough County north of State Road 60, and Pasco and Pinellas Counties (Hereinafter the "Area")

In establishing Minimum Flows and Levels, the District has determined that the actual water levels in many of the water bodies for which Minimum Flows and Levels have been established are below the Minimum Flow and Level. The District is expeditiously implementing a recovery strategy for the Area in keeping with the District's legislative mandate pursuant to Sections 373.036, 373.0361, 373.0421, 373.0831, 373.1962 and 373.1963, F.S., to resolve the water supply and water resource impact concerns of the Northern Tampa Bay Area in a cooperative manner with the water suppliers and interested parties. This Section 4.3 A. and Chapter 40D-80, F.A.C., set forth the regulatory portion of the first phase (through December 31, 2010) of the recovery strategy for the Area. The following requirements of this Section 4.3 A. effectuate that recovery strategy and shall be effective only through December 31, 2010. The District will evaluate the state of knowledge of these matters in 2010. Compliance with Section 4.3 A does not, by itself, satisfy the requirements of Chapter 40D-2 for new withdrawals proposed after [effective date of rule]. Based on that evaluation, the District may revise this Section 4.3 A. as appropriate.

1. For New Withdrawals Proposed After [effective date of rule]

a. Where above Minimum Flow or Level - For water bodies that are predicted to be impacted by the proposed withdrawal and where the actual flow or level is at or above a Minimum Flow or Level, withdrawals shall be limited to that quantity, as may be further limited by other provisions of 40D-2.301, F.A.C. and this Basis of Review, that does not cause the actual flow to fall below the Minimum Flow, nor cause the actual level to fall below the Minimum Level on a Long-term average basis (the "Baseline Quantity"). For purposes of this Section 4.3 A., "Long-term" means a period which spans the range of hydrologic conditions which can be expected to occur based upon historical records, ranging from high water levels to low water levels. In the context of a predictive model simulation, a Long-term simulation will be insensitive to temporal fluctuations in withdrawal rates and hydrologic conditions, so as to simulate steady-state average conditions. In the context of an average water level, the average will reflect the expected range and frequency of levels based upon historic conditions. This period will vary because reasonable scientific judgement is necessary to establish the factors to be used in the assessment of each application

depending on the geology and climate of the area of withdrawal, the depth of and number of wells and the quantity to be withdrawn.

i. If the withdrawal of the requested quantity of water does not meet the condition in 4.3 A.1.a. above, the applicant shall identify the Baseline Quantity, and the District shall consider, as may be further limited by other provisions of 40D-2.301, F.A.C. and this Basis of Review, the authorization of the additional quantity of water to be withdrawn where the applicant:

(1) Demonstrates that there ~~are~~ is no reasonable practical means to modify the proposed withdrawal to meet the conditions in 4.3 A.1.a., including the use of alternative supplies, or to reduce or replace the amount of the requested quantity exceeding the Baseline Quantity. Cost shall not be the sole basis for determining whether the means are reasonable; and

(2) Provides reasonable assurance that significant harm will be prevented to the wetlands and surface water bodies that could be affected by the proposed withdrawal if the requested quantity is withdrawn; and water body that the Minimum Flow or Level has been established to protect; and

(3) Demonstrates that any measures used to provide the reasonable assurance specified in 4.3 A.1.a.i(2) above will not cause a violation of any of the criteria listed in 40D-2.301(1)(a)-(n), 40D-4.301, or 40D-4.302, F.A.C., as applicable.

ii. ~~To support In determining~~ whether the applicant has provided reasonable assurance pursuant to 4.3 A.1.a.i(2) above, the applicant must submit an environmental management plan ("EMP") for approval by the District describing the measures to be used to prevent significant harm from withdrawal of the requested quantity. The EMP plan must include a monitoring program for early detection of impacts to wetlands and surface water bodies that could be affected by the proposed withdrawal unacceptable adverse and an implementation scheme for corrective actions to prevent unacceptable adverse impacts these impacts. The EMP shall include provisions to evaluate changes in water quality, water levels, vegetation, and fish and wildlife. The EMP shall also include clear thresholds as to when the implementation scheme will be initiated. The implementation scheme shall include details as to how the proposed measures will be effected, the methods to be followed in order to functionally replicate the natural hydrologic regime of affected water bodies, and efforts to be undertaken to minimize the effects of changes in water chemistry. The implementation scheme shall also require reduction of pumping to the Baseline Quantity as a corrective action if no other measures, including supplemental hydration, are successful in preventing unacceptable adverse impacts to wetlands and surface water bodies due to withdrawals. An approved EMP shall be incorporated as a special condition to any permit issued.

(1) The measures proposed may include hydration of the affected water ~~bodies body~~ or modification of existing drainage structures to prevent significant harm to the affected water ~~bodies~~, provided that the measures within the EMP minimize the need for supplemental hydration to the greatest extent practical body.

(2) If supplemental hydration ~~with ground water~~ is proposed, the applicant will be required to identify in the application and monitor a representative number of wetlands in the vicinity of the withdrawal. The monitored wetlands shall include a representative number of MFL or MFL surrogate wetlands not receiving supplemental hydration. An MFL surrogate wetland is the nearest wetland site of the same type and condition to the proposed withdrawal that is not anticipated to require supplemental hydration. The monitored wetlands shall also include, where available, non-MFL wetlands not receiving hydration as well as MFL and non-MFL wetlands proposed for supplemental hydration.

(3) A representative number of wetlands is a number of a particular type or types of wetlands, in the vicinity of the withdrawal, sufficient to adequately determine the hydrologic response of the wetlands and surface water bodies that could be affected by the proposed withdrawal to rainfall and water withdrawals.

(4) If supplemental hydration ~~with ground water~~ is proposed to rehydrate lakes or wetlands, in order for a water use permit authorizing the Requested Quantity such hydration to be issued, ~~it must be issued by the Governing Board must determine whether; and the following factors shall be considered by the Governing Board:~~

(A) ~~The measures within the proposed EMP minimize the quantity of water required for supplemental hydration by The feasibility of raising water levels by filling or blocking ditches, removing culverts or outflows, or other alterations, where practical and- feasible, and whether such alterations will achieve the applicable minimum level (where the measures proposed by the applicant identify the need for specific Environmental Resource Permits, such permits must be obtained prior to withdrawal of the requested quantities;~~

(B) ~~The applicant has proposed use of the lowest quality availability of water other sources for rehydration which is scientifically, technically and environmentally feasible to prevent unacceptable adverse impacts;~~

(C) ~~Measures within the proposed EMP The applicant's efforts to minimize the need for ground water hydration to the greatest extent practical based on considering the quantity, frequency and duration of the anticipated use;~~

(D) ~~The measures within the proposed EMP minimize or avoid the potential for unacceptable adverse impacts to water quality or fish and wildlife in the receiving wetland or surface water body receiving supplemental hydration, and, if such a potential exists, the EMP contains adequate measures to detect~~

~~whether impacts at an early stage can be detected and to prevent unacceptable adverse impacts in an expeditious manner corrected;~~

(E) ~~The measures within the proposed EMP minimize or avoid the potential for the establishment or spread of undesirable aquatic vegetation in the receiving wetland or surface water body receiving supplemental hydration and, if such a potential exists, the EMP contains adequate measures to detect vegetative changes at an early stage and to prevent undesirable vegetative changes in an expeditious manner; and the applicant's ability to prevent this;~~

(F) ~~The quantity of water needed for supplemental hydration is outweighed by compared to the quantity of water made available for other uses;~~

(G) ~~The quantity of water needed for supplemental hydration is reasonable compared to the unacceptable adverse impacts to be prevented; achieved; environmental benefit~~

(H) ~~The unacceptable adverse impact to be prevented by The environmental benefits of supplemental hydration results in benefits that outweigh compared to the potential for impacts caused by the additional withdrawal; and,~~

(I) ~~The quantity of the water used for supplemental hydration is reasonable considering compared to the proportion expected to percolate into return to the aquifer through recharge.~~

**Section IV
Emergency Rules**

DEPARTMENT OF AGRICULTURE AND CONSUMER SERVICES

Division of Animal Industry

RULE TITLES:	RULE NOS.:
Definitions	5CER00-1
Additional Testing and Culture Requirements	5CER00-2
SPECIFIC REASONS FOR FINDING AN IMMEDIATE DANGER TO THE PUBLIC HEALTH, SAFETY AND WELFARE: Contagious equine metritis (CEM) is a highly contagious venereal disease that can affect all equid (horses, donkeys, mules, etc.) and is caused by the bacterium <i>Taylorella equigenitalis</i> . The infection can result in short term infertility in mares that is sometimes associated with a vaginal discharge and rarely abortion. Mares can become inapparent carriers of the bacterium in their reproductive tracts and can shed the organism into the environment and transmit it through subsequent breeding. Stallions do not develop clinical signs but can carry the organism on their genitalia for years and spread the disease by breeding susceptible mares.	

CEM is considered an exotic disease in the United States, which means it isn't found in the native horse population. However, there are at least 25 countries and/or territories where CEM exists, including a number of the member states of the European Union. CEM is a serious venereal disease because it is highly contagious. CEM, if it becomes established in the United States, would have a devastating economic impact on the horse industry. While there is no vaccine against CEM, there are ways to detect infected horses and to rid infected stallions and mares of the bacterium via treatment and testing protocols.

The February 11, 2000 detection of CEM cases in the United States from imported stallions has caused concern among state health officials about the effectiveness of the current USDA required protocol for testing imported animals in 9 CFR §§ 93.301 (1999). These recent cases have prompted some state officials, including Florida, to recommend that USDA/APHIS strengthen its federal testing procedures for importing horses from known CEM affected countries. The recommended changes include:

(1) requiring a Complement Fixation (CF) test for CEM on test mares selected to breed to stallions to be extended to no less than 20 days post breeding rather than 15 days (the current requirement);

(2) require all import mares have blood collected for a CF test for CEM upon arrival at the Approved CEM Quarantine Facility and include endometrial and/or cervical cultures in addition to the required cultures taken from the clitoral fossa and sinuses, and (3) require the first three mares bred to a stallion following his release from an Approved CEM Quarantine Facility to be CF tested for evidence of CEM infection.

The justification for this action is based on the February 11, 2000 disclosure of a CEM positive test mare at a CEM quarantine facility in Florida. The mare had been test bred to a stallion imported from Germany. The mare in question was test negative on the required 15 day post breeding test but was positive on a second test conducted 22 days post breeding.

REASONS FOR CONCLUDING THAT THE PROCEDURE IS FAIR UNDER THE CIRCUMSTANCES: Under this action requiring additional testing and culture locations on imported mares, extending the post breeding test from 15 days to 21 days and requiring post quarantine testing of 3 mares bred to a stallion released from CEM quarantine facilities is justified to insure that imported mares and stallions are free of CEM and the state's horse industry is protected from the potential devastating effects of CEM.

SUMMARY OF THE RULES: These rules place added testing and culturing requirements on stallion and mares imported into Florida from CEM affected countries to insure that CEM does not become established in the state's equine population.

Notice to Professional Consultants

The University of Florida for and on behalf of the Board of Regents, a public corporation of the State of Florida, announces that professional services in the discipline of engineering will be required for the study listed below:

Study: To determine if the O'Connell Center, UF Building #0094, is considered a smoke-protected Assembly

Background:

The O'Connell Center is a three level multi-purpose assembly building containing a 12,000 person arena, various locker rooms, offices, basketball practice courts, gymnastics practice facility, weight training area, storage rooms, concession stands, and swimming/diving pool. The main arena hosts many different events including basketball, volleyball, indoor track, gymnastic events, trade shows, plays and concerts. The building was completed in 1980 and contains 295,990 square feet of floor space. The height of the arena is approximately 100 feet from the arena floor to the roofing structure. Originally, the main arena roof was an air-supported fabric roofing system with the outer ring of tension fabric. In 1998, the main arena roof was replaced with a space frame metal roofing system. The outer tension fabric ring is scheduled to be replaced in this year (2000).

During the main roof replacement, a fire occurred in one of the gymnastics foam pits due to improper welding techniques. The outer ring of the arena quickly filled with smoke. After the arrival of the fire department and extinguishment of the fire, they found it very difficult to remove the smoke and heat from the building. In the end, they were required to cut the fabric roofing over the fire area to remove the smoke and other products of combustion.

The space frame system was designed to support a fire sprinkler system. The building contains a partial fire sprinkler system in the office areas and lower level locker rooms and storage areas. The main arena and outer ring do not contain a fire sprinkler system. The building contains a manual fire alarm system. The original fire alarm system has been partially upgraded to a new computer based system consisting of a new fire alarm control panel and individually addressed devices. As the building is renovated, the existing fire alarm devices have been replaced with new devices. Each panel reports to the other. The University Police Department monitors the fire alarm system.

During a recent renovation project review the State Fire Marshal (SFM), the authority having jurisdiction, questioned whether this building needed separation between the main arena and the multi-level stair structures. None of the stairs empty directly to the building exterior.

Scope of Work:

Work will consist of preparing a report to determine if the O'Connell Center is considered a smoke-protected assembly, as defined by 1994 NFPA 101 Life Safety Code. If the O'Connell Center is not considered a smoke-protected assembly, the firm shall make recommendations that will achieve smoke protected assembly classification.

The following services must be performed:

1. Survey the facility and review existing drawings to become familiar with the building construction.

2. Prepare a smoke protected assembly report for submittal to the State Fire Marshal's office. This report must include an analysis of the smoke layer descent compared to the required egress time.
3. Review fire sprinkler coverage throughout the building. Include recommendations for completion of the fire sprinkler system, where necessary, in various areas of the building.
4. Meet with the Owner to review the draft report.
5. Meet with the representative of the State Fire Marshal to discuss the report.
6. Prepare final report based on comments from the Owner and the State Fire Marshal's office.
7. Include recommended improvements and estimated cost of these improvements in the final report.

Instructions:

Firm desiring to apply for considerations shall submit a letter of application. The letter of application must have attached:

1. A completed Board of Regents "Professional Qualifications Supplement" dated 2/99. Applications on any other forms will not be considered.
2. A copy of applicant's current Professional Registration Certificate from the appropriate governing board. An applicant must be properly registered at the time of application to practice its profession in the State of Florida. If the applicant is a corporation, it must be chartered by the Florida Department of State to operate in Florida.

The University of Florida and Campus Planning and Construction Management assumes no liability or responsibility for the costs incurred by the firm for any materials, efforts or expenses required in the preparation of application or in connection with presentations or demonstrations prior to issuance of a contract.

Submit five(5) copies of the above requested data bound in the order listed above. Applications which do not comply with the above instructions may be disqualified. CENTRAL FLORIDA TECHNOLOGY TRANSIT CONSORTIUM**REQUEST FOR LETTERS OF QUALIFICATION**

The Central Florida Technology Transit Consortium (“the Consortium”) is a predominately private consortium of Florida corporations, transportation ports, chambers of commerce and economic development commissions and other entities. The Consortium requests Letters of Qualification from firms or teams of firms, interested in, and capable of, completing a comprehensive study of the realistic potential for a cross-state rail service. Such service would connect the Cape Canaveral Spaceport, the seaports of Tampa and Canaveral, the airports of Orlando and Tampa, and the urban communities of St. Petersburg, Tampa, Orlando, Lakeland / Polk County, Osceola County, Orlando / Orange County and Brevard County. This initiative is fresh, unique and distinct from any previous proposals for cross-state or intercity rail service and requires a critical reorientation from all past projects.

(1) The Consortium is private sector-led, with broad and meaningful public participation, and with the mission of bolstering the economic competitiveness of the major regions comprising Central Florida and increasing the mobility of residents, and tourists as well, who live, work, play and visit in this Spacecoast to Suncoast corridor. Its mission is to combine the economic power, diversity and opportunities of regions that are now separate, into a super-regional economic powerhouse of over six million residents. Success in doing so would position Central Florida as one of the most prosperous and attractive regions in the country with a quality of life superior to or significantly competitive with any other location—especially relative, but not limited to, global high technology business recruitment and international tourism attraction.

(2) The Consortium’s primary goal is to evaluate if, and to what extent, development of such a cross-state corridor, should be further pursued. It does not include vendors of any specific technology and its members are committed to determine if there is an appropriate, cost-efficient, rail technology that could allow the development of a rail system in the corridors identified in this application, which maximizes private investment and minimizes public investment. The Consortium intends this study to include provisions for passenger and freight and address the potential for car ferry service.

(3) The Consortium is dedicated to working in close cooperation with the Governor’s Office, the Legislature, and the Florida Department of Transportation (Central Office and Districts 1, 5 and 7), local governments and other stakeholder--public and private-- through formation of one or more inclusive Project Advisory Council(s). It is anticipated that these Council(s) will include, but not be limited to, representatives of the Chairman of the respective Florida Senate and House Committees overseeing the State’s transportation policy, a representative of each Legislative Delegation, representatives of the cities, counties and transit

agencies along the corridor, each Metropolitan Planning Organization encompassed in the Corridor as well as the Executive Directors the seaports of Tampa and Canaveral, airports of Orlando and Tampa, and the director of the Cape Canaveral Spaceport Management Council. There are a number of local government entities along the corridors, which have jurisdictional, permitting, right of way ownership, etc., over the corridors to be evaluated. It is anticipated that, in addition to the general participation in the Council(s), the selected consultant, working with the Consortium’s Executive Director, will maintain close coordination with these entities to ensure their priority jurisdictional issues are identified and addressed, to the maximum extent possible, by the Consortium

(4) Qualifications demonstrated on comparable assignments, time, creativity and flexibility are of the essence to this study. A key portion of this study will be due on September 15, 2000 to provide one Consortium member, Florida 2012, with competitive input into the Florida 2012 Olympic bid which will go to press that month. The final deadline for the complete study will be February 15, 2001. Firms may team to respond to this request, but the Consortium will seek simple and efficient teaming arrangements so as to not get delayed by administrative overhead or by overly burdensome project management.

(5) The Consortium’s Executive Director will manage the firm, or team of firms, selected with active participation by the Chairman, Vice Chairman and Committees of the Board of Directors, and members of the Project Advisory Council(s). Committees to be created by the Consortium Board will be based on the major activities of the study and be delegated to monitor various components of the overall endeavor. Each Committee would be comprised of members from the Board of Directors of the Consortium. In addition, it is anticipated that members from Project Advisory Council(s) (who have regulatory or other relevant jurisdiction over issues being addressed by the respective Committee), will participate with one or more of the Committees, in an advisory capacity. Final decisions on the management and conclusions of the study will be made by the Board of Directors of the Consortium, following appropriate consideration of the input from the Project Advisory Council(s), advisory members of Board Committees and any other stakeholder who actively participates in the study process. The membership of the Consortium, and therefore its Board of Directors, is expected to grow significantly in size by the time the study begins.

(6) The general criteria to be used by the Consortium’s Selection Committee, to select the shortlist and final consultant, will include, but not be limited to:

- (a) Demonstrated experience in comparable assignments
- (b) Availability to complete the work within the time frame of the Consortium’s schedule

The Department of Community Affairs announces the availability of Federal Fiscal Year 2000 Edward Byrne Memorial State and Local Law Enforcement Assistance Formula Block Grant funds. Program specifics are included in the following program announcement:

Introduction

The State of Florida, Department of Community Affairs (DCA), has available from the United States Department of Justice \$14,158,119 in local share Edward Byrne State and Local Law Enforcement Assistance Formula Block Grant funds. Local governments applying for these federal funds must use them to implement local drug control and system improvement projects designed to reduce the production, transfer and use of controlled substances, reduce the incidence of drug-related violent crime, and make improvements to the criminal justice system.

Applicants must supply no less than 25 percent of a project's cost in cash from non-federal funds; however, Indian Tribes are exempt from this matching requirement. These matching funds must be funds that would not have been available for drug control and system improvement efforts in the absence of federal funds; that is, they must represent an additional local effort in addressing the drug abuse problem.

Rule Chapter 9B-61, Florida Administrative Code (F.A.C.), governs program administration and funding. Local governments should thoroughly review rule provisions before applying for subgrant funds.

Program Strategy and Purposes

This program uses a balanced strategy of prevention, education, rehabilitation, treatment, law enforcement and criminal justice subgrant funded projects in its effort to reduce human suffering associated with drug abuse and drug-related violent crime. Projects must comply with federally authorized program areas identified in state rule and may provide personnel, equipment, training, technical assistance and information systems (See Rule 9B-61.007, F.A.C.).

Program Development

Federal and state funds cannot meet all local drug control and system improvement needs. Therefore, this program requires maximum coordination among all units of government. For these reasons, the DCA allocates by rule a sum of money to each county for the use of all local governments within the county. The DCA requests a county board of commissioners to coordinate all local governments within the county to:

- Define local drug problems and drug-related violence, and describe current efforts to control them (including prevention, education, rehabilitation, treatment, law enforcement, and criminal justice activities);
- Identify additional resources needed to address drug control and system improvement issues;
- Develop subgrant funded projects to provide additional resources;
- Identify local government agencies and service providers to implement projects; and,
- Ensure that local governments within a county agree on projects receiving subgrant funds.

To accomplish these tasks, the DCA encourages each county to appoint a substance abuse policy advisory board. Board members represent all components of the criminal justice system (law enforcement officers, prosecutors, public defenders, judges, and corrections officials), the education system, and the treatment system [See Rule 9B-61.008(2)(a), F.A.C.]. Each county is also encouraged to designate an office of substance abuse policy to:

- Develop a countywide drug control and drug-related violent crime strategy (including short-range and long-range plans);
- Coordinate local government agencies in implementing the strategy;
- Prepare and submit subgrant project applications agreed upon by at least 51 percent of local units of government representing at least 51 percent of the county population; and,
- Administer subgrant funds and monitor project activities.

The DCA strongly discourages local subgrant funding of projects of less than \$25,000. Local governments should not submit subgrant applications for amounts less than this figure. The costs of any small project may outweigh anticipated long-term benefits that would be derived from it, especially if local project funding is in doubt in future years. Economies of scale also play an important role in whether a project can

achieve its targeted objectives. In addition, if the project is a new one and not an enhancement of an existing program, the initial start-up costs may substantially limit a project's program effectiveness. Finally, all projects, regardless of the amount of subgrant funding, must meet federal and state financial and program compliance requirements which represent a significant fixed administrative cost of "doing business" under the federal Act.

Special Subgrant Award Conditions

Your application is not complete unless you comply with the following special conditions. An incomplete application cannot be considered for subgrant funding.

Nine (9) special conditions apply when submitting an application to the DCA for approval and subgrant funding:

- Any state agency, county or city submitting an application must enclose a completed Application Review Checklist.
- Units of local government within a county must enclose signed Letters of Approval accompanied with an application. These letters must represent agreement among at least 51 percent of all units of local government representing at least 51 percent of the county population as to the allocation of dollars to each project.
- If equipment or services costing \$100,000 or more will be purchased from a sole source, a Sole Source Justification Form must be submitted with the application.
- If automated data processing (ADP) hardware or software will be purchased at a cost of \$100,000 or more, an ADP Equipment Form must be submitted with the application.
- Each unit of government (subgrant recipient) and each criminal justice agency that is the implementing agency of the subgrant, whether or not it is required to have a written Equal Employment Opportunity (EEO) Program according to provisions of the Federal Omnibus Crime Control and Safe Streets Act of 1968 as amended, must enclose signed EEO Program Certification Letters with a subgrant application (See EEO Program criteria in Subgrant Application Instructions under Special Requirements, sample letters, and 28 Code of Federal Regulations (CFR) Part 42, Subparts C, D, E, F, G and H.
- Any state agency, county or city receiving \$500,000 or more in federal program funds must provide a copy of their EEO Program Plan, and/or the most recent update, with their application, for submittal to the U.S. Department of Justice, Bureau of Justice Assistance, for approval.
- If a project will receive subgrant funds for the principal purpose of operating a criminal intelligence system, contact the DCA at the address below. Such a system must be in compliance with the Federal Omnibus Crime Control and Safe Streets Act of 1968 as amended and provisions of 28 CFR Part 23 – Criminal Intelligence Systems Operating Policies before subgrant funds will be awarded.
- A Drug Court Project funded by the Byrne Formula Grant

Program must contain the 10 key elements outlined in the U.S. Department of Justice, Office of Justice Programs, Drug Courts Program Office, program guidelines "Defining Drug Courts: The Key Components", January 1997. This document can be accessed on the Office of Justice Programs World Wide Web Homepage:

- <http://www.ojp.usdoj.job>. Additionally, to ensure more effective management and evaluation of drug court programs, the recipient agrees that drug court programs funded with Byrne funds shall collect and maintain follow-up data on program participants criminal recidivism and drug use relapse. The data will be assessed during Bureau of Justice Assistance field monitoring trips.
- Prior to obligating funds to support overtime by law enforcement officers, the U.S. Department of Justice encourages consultation with all allied components of the criminal justice system in the affected jurisdiction. The purpose of this consultation is to anticipate and plan for systemic impacts such as increased court dockets and the need for detention space.

Applications

Once the Certificate of Participation is returned to the Bureau of Community Assistance, a hard copy of the application package will be mailed to the County Coordinator. Additionally, if (1) you work in a Windows environment and have Corel WordPerfect 8.0 for Windows; and (2) submit a diskette with the Certificate of Participation, we will copy the application and required forms to the diskette and mail it with the hard copy to the County Coordinator.
