Reactivation of the inactive license will not require payment of the fee set forth in Rule 61G18-12.008. DOCKET NO.: 98-52R

RULE CHAPTER TITLE:

RULE CHAPTER NO.:

Surface Water Quality Standards

62-302

PURPOSE AND EFFECT: The Federal Clean Water Act requires states to conduct a comprehensive review of their surface water quality standards every three years ("triennial review"). The proposed rule development and associated public workshops are intended to meet this requirement. Preliminary issues that have been identified under this rulemaking include total recoverable metals criteria, dissolved metals criteria, specific conductance, unionized ammonia, criteria table (Rule 62-302.530, FAC.) changes, and site specific alternative criteria (SSACs). Four public workshops have been conducted (9/22/98, 9/23/98, 8/31/99, and 9/2/99). One topic in this Triennial Review has been adoption of dissolved metals criteria to replace the current total recoverable metals criteria. Because permits limits for discharges containing metals are expressed as total recoverable metal, a translator is required to convert the proposed dissolved criteria to total recoverable permit limits. The Department is considering the development of a translator protocol as part of the current Triennial Review.

SUBJECT AREA TO BE ADDRESSED: This workshop is being conducted as part of a comprehensive review of State surface water quality standards. The purpose of this particular workshop, however, will be limited to discussion and development of a guidance document for collecting site specific data to establish translators to convert dissolved metals criteria to effluent permit limits. It is the Department's intent to schedule future public workshops that will address all aspects of the current Triennial Review, including but not limited to development of a dissolved metals translator.
