**NOTICE TO PROFESSIONAL CONSULTANTS:**

The University of Florida, Board of Trustees announces that Professional Services in the discipline of architecture will be required for the projects listed below:

Projects: UF-150, Legal Information Center; UF-128, Phase II Law Building

Location: University of Florida, Gainesville, Florida

This solicitation combines the design and construction of two distinct facilities programs for the Levin College of Law at the University of Florida. Phase I will include a 57,500 GSF addition to the existing Legal Information Center (law library), plus studies and master planning for development of a detailed Phase II facilities program. Phase II will include a 48,000 GSF multi-purpose facility with classroom and office space, plus renovations in one or both of the existing College of Law buildings. The scope of services will include development of construction phasing alternatives and examination of options for separate buildings that are connected to each other and/or the existing facilities, a single building to house the spaces implied in both programs, and other alternatives. The individual construction budgets are estimated to be approximately \$10,333,000 for Phase I and \$9,360,000 for Phase II, though the Owner seeks to garner savings in both time and cost by merging the two projects. The project(s) will be delivered using the Construction Manager-At-Risk (CM) method. Basic LEED (Leadership in Energy and Environmental Design) accreditation by the US Green Building Council is mandatory. The design team shall include a LEED-accredited professional to facilitate and document this process.

The selected firm will provide design, construction documents, and construction administration services, plus planning and programming services for Phase II, and will participate in the selection of the CM. Basic Services will include law library planning and conceptual design, "smart" classroom design, and audio/visual design and integration, so proposed design teams shall include such expertise, whether in-house or as added specialties. Blanket professional liability insurance is required for this project in the amount of \$1,500,000, and shall be provided as a part of Basic Services.

**INSTRUCTIONS**

Firms desiring to apply for consideration shall submit a proposal only after thoroughly reviewing the facilities program(s), Project Fact Sheet, and other background information. The proposal shall be limited to 40 single-sided pages and shall include:

1. A Letter of Application that concisely illustrates the applicant's understanding of the scope of services, design intent, and other goals and considerations as outlined in the facilities programs.
2. A completed "Professional Qualifications Supplement," using the project-specific version available at the UF Facilities Planning and Construction website. Applications on any other form will not be considered.
3. A copy of the applicant's current Professional Registration Certificate(s) from the appropriate governing board, LEED certification, and other pertinent credentials. An
