**NOTICE TO CONSTRUCTION MANAGERS**

Florida State University announces that construction management services will be required for the project listed below:

Project No.: BR-246  
Project and Location: Landis Hall Remodeling  
Florida State University  
Tallahassee, Florida

The project consists of the renovation and remodeling of Landis Hall. Built in 1939, Landis Hall is a 6-level dormitory providing housing to up to 400 students. The project involves restoration of the building's envelope, replacement of the building's engineering systems, asbestos and lead paint abatement, and life safety and ADA code corrections. Each floor will be remodeled to accommodate a suite arrangement of rooms. The construction budget is approximately \$14,300,000. The contract for construction management services will consist of two phases. Phase one is pre-construction services, for which the construction manager will be paid a fixed fee. Phase one services include value engineering, constructability analyses, development of a cost model, estimating, and the development of a Guaranteed Maximum Price (GMP) at 50% Construction Document phase. If the GMP is accepted, phase two, the construction phase, will be implemented. In phase two of the contract, the construction manager becomes the single

point of responsibility for performance of the construction of the project and shall publicly bid trade contracts, ensuring the inclusion of Minority Business Enterprises (MBEs). Failure to negotiate an acceptable fixed fee for phase one of the contract, or to arrive at an acceptable GMP within the time provided in the agreement may result in the termination of the construction manager's contract.

Selection of finalists for interviews will be made on the basis of construction manager qualifications, including experience and ability; past experience; bonding capacity; record-keeping/administrative ability, critical path scheduling expertise; cost estimating; cost control ability; quality control capability; qualification of the firm's personnel, staff and consultants; and ability to meet the minority business enterprise participation requirements. Finalists will be provided with a copy of the building program and the latest documentation prepared by the project architect/engineer, a description of the final interview requirements and a copy of the standard Florida State University's construction management agreement. The Selection Committee may reject all proposals and stop the selection process at any time. The construction manager shall have no ownership, entrepreneurial or financial affiliation with the selected architect/engineer involved with this project.

Firms desiring to provide construction management services for the project shall submit a letter of application and the completed Florida State University "Construction Manager Qualifications Supplement." Proposals must not exceed 80 pages, including the Construction Manager Qualifications Supplement and letter of application. Pages must be numbered consecutively. Submittals which do not comply with these requirements or do not include the requested data will not be considered. No submittal material will be returned.

All applicants must be licensed to practice as general contractors in the State of Florida at the time of application. Corporations must be registered to operate in the State of Florida by the Department of State, Division of Corporations, at the time of application. As required by Section 287.133, Florida Statutes, a construction management firm may not submit a proposal for this project if it is on the convicted vendor list for a public entity crime committed within the past 36 months. The selected construction management firm must warrant that it will neither utilize the services of, nor contract with, any supplier, subcontractor, or consultant in excess of \$25,000.00 in connection with this project for a period of 36 months from the date of their being placed on the convicted vendor list.

The Florida State University Construction Manager Qualifications Supplement form and the Project Fact Sheet may be obtained on line at [www.fpc.fsu.edu](http://www.fpc.fsu.edu) or by contacting:
