25-6.0435 Interim Rate Relief.

(1) Each electric utility petitioning for interim rate relief pursuant to s. 366.071, F.S., shall file the data required by in Schedules 2 through 14, 17, and 23, in paragraph 25-6.043(1)(a). In addition, a schedule shall be submitted calculating the interim relief in accordance with s. 366.07, F.S., and allocation factors by functional group approved in the company's last rate case.

(2)(a) The requested interim increase in base rate revenues shall be divided by interim test year base rate revenues to derive a percentage increase factor. The percentage increase factor shall be applied uniformly to all existing base rates and charges to derive the interim base rates and charges. $$\text{Constant base fuel revenue to rate schedule}$$

III. Dollar Increase = Percent increase applied

$$\frac{\text{total base rate revenue to rate schedule}}$$

(3) Interim rate relief collected is subject to refund pending final order in the permanent rate relief request. Such increase shall be subject to a corporate undertaking or under bond as authorized by the Commission and any refund shall be made with an interest factor determined by using the 30-day commercial paper rate for high-grade, unsecured notes, sold through dealers by major corporations in multiples of \$1,000 as regularly published in the Wall Street Journal. The annual rate as published on the first day of the current business month would be added to the rate as published on the first day of the subsequent business month and halved to obtain the simple average rate to be applied in that month. This rate of interest would be applied to the refund amount for that month.
