DEPARTMENT OF REVENUE

Miscellaneous Tax

RULE NO.:	RULE TITLE:
12B-4.060	Tax on Transfers of Ownership Interest in Legal Entities

PURPOSE AND EFFECT: Section 201.02(1)(b), F.S., as created by Chapter 2009-131, Laws of Florida (L.O.F.), imposes tax on transfers of ownership interests in a conduit entity when the transfer is within three years of a transfer of Florida real property into the conduit entity, documentary stamp tax was not paid on the full consideration when the real property was transferred into the conduit entity, and the ownership interest transferred belonged to the grantor of the real property. Chapter 2009-131, L.O.F., authorized the Department to promulgate an emergency rule and a permanent rule to implement the provisions of the law. The Department is seeking public participation and information to develop new Rule 12B-4.060, F.A.C. (Tax on Transfers of Ownership Interest in Legal Entities), regarding the documentary stamp tax imposed under Section 201.02(1)(b), F.S., on the transfer of ownership interest in a conduit entity.

SUBJECT AREA TO BE ADDRESSED: This is a rule development workshop at which participation and information regarding Chapter 2009-131, L.O.F., is encouraged. This rule development workshop will assist the Department in understanding issues related to the application of the documentary stamp tax on the transfer of ownership interest in a conduit entity, as provided in Section 201.02(1)(b), F.S., as created by Chapter 2009-131, L.O.F.

Persons are encouraged to participate in the rule development workshop and to submit written comments regarding the tax imposed under Chapter 2009-131, L.O.F., for the following issues:

1. **Undefined Terms.** The legislation uses several terms that are undefined and may require increased administration. These terms include, but are not limited to:

- Legal Entity,
- Arm's length transaction,
- Direct or indirect ownership,
- Real property interest, and
- Transfer of an interest for consideration.

2. **Giving Credit for Prior Tax Paid.** The legislation imposes tax on sales of ownership interests in entities after Florida real property is transferred into the entity. The statute appears to contemplate that no tax was paid when property was put into the entity. However, tax may be paid on partial consideration. The statute does not specify whether any credit should be granted for these prior taxes.

1. **Mergers.** The statute is silent with regard to treatment of mergers.

2. **Additional Issues Related to Section 201.02(1)(b), F.S.** Additional issues regarding the documentary stamp tax on the transfer of ownership interest in a conduit entity, as provided in Section 201.02(1)(b), F.S.

The purpose of the proposed amendments to Rule 12A-1.005, F.S., is to remove provisions regarding this exemption from the rule.

The proposed amendments to Rule 12A-1.097, F.A.C. (Public Use Forms): (1) remove the adoption, by reference, of forms that are no longer used in the administration of the exemption for qualified production companies provided in Section 288.1258, F.S.; and (2) adopt, by reference, revisions to the Certificate of Exemption for Entertainment Industry Qualified Production Company (Form DR-231).

DEPARTMENT OF REVENUE

Corporate, Estate and Intangible Tax

RULE NOS.:	RULE TITLES:
12C-1.0186	Credit for Florida Alternative Minimum Tax
12C-1.018	Credits for Contributions to Nonprofit Scholarship Funding Organizations
12C-1.051	Forms

PURPOSE AND EFFECT: Chapter 2009-108, L.O.F., expands the Florida Tax Credit Scholarship Program to allow insurers, who make contributions to nonprofit funding organizations, to take a tax credit against the insurance premium tax imposed under Section 624.509, F.S. Chapter 2008-227, L.O.F., eliminated the Florida renewable energy production credit from the alternative minimum tax credit calculation. The purpose of the proposed amendments to Rule 12C-1.0186, F.A.C. (Credit for Florida Alternative Minimum Tax), Rule 12C-1.0187, F.A.C. (Credits for Contributions to Nonprofit Scholarship Funding Organizations), and Rule 12C-1.051, F.A.C. (Forms), is to update these rules and the forms used by the Department to administer the credit for contributions to nonprofit scholarship funding organizations authorized under Sections 220.187 and 624.51055, F.S., and to update provisions on the calculation of the amount of the alternative minimum tax.

SUMMARY: The proposed amendments to Rule 12C-1.0186, F.A.C. (Credit for Florida Alternative Minimum Tax), Rule 12C-1.0187, F.A.C. (Credits for Contributions to Nonprofit Scholarship Funding Organizations), and Rule 12C-1.051, F.A.C. (Forms), reflect the changes to the calculation of the alternative minimum tax credit imposed by Chapters 2008-227 and 2009-108, L.O.F., and the expansion of the Florida Nonprofit Scholarship Program provided in Chapter 2009-108, L.O.F.

The proposed amendments to Rule 12C-1.0186, F.A.C. (Credit for Florida Alternative Minimum Tax), provide that the amount of the alternative minimum tax credit is computed without application of the tax credit for contributions to nonprofit scholarship funding organizations or the tax credit for renewable energy production.

The proposed amendments to Rule 12C-1.0187, F.A.C. (Credits for Contributions to Nonprofit Scholarship Funding Organizations): (1) provide that insurers may claim a credit against their insurance premium tax liability for eligible contributions made to a nonprofit scholarship funding organization; (2) clarify that contributions to nonprofit scholarship funding organizations are not payments of

estimated tax or installment payments required under Chapter 220, F.S., or Section 624.5092, F.S.; and (3) remove unnecessary provisions regarding the annual list of eligible nonprofit scholarship funding organizations provided by the Department of Education.

The proposed amendments to Rule 12C-1.051, F.A.C. (Forms), adopt, by reference, changes to Form F-1160 (Application for Corporate Income Tax and Insurance Premium Tax Credit for Contributions to Nonprofit Scholarship Funding Organizations), and Form F-1161 (Application for Rescindment of Corporate Income Tax and Insurance Premium Tax Credit for Contributions to Nonprofit Scholarship Funding Organizations).

SUMMARY OF STATEMENT OF ESTIMATED REGULATORY COSTS: No Statement of Estimated Regulatory Cost was prepared.

Any person who wishes to provide information regarding a statement of estimated regulatory costs, or provide a proposal for a lower cost regulatory alternative must do so in writing within 21 days of this notice.

12C-1.0193 Florida Renewable Energy Production Credit.

(1) A Florida Renewable Energy Production Credit is provided in Section 220.193, F.S., for the sale of electricity from a new Florida renewable energy facility operationally placed in service after May 1, 2006, and for increases of more than five percent (5%) in the production and sale of electricity from renewable energy sources at an existing Florida renewable energy facility. The terms “sale” and “sold” include the use of electricity by the producer of such electricity from renewable sources if such use reduces the amount of electricity that the producer would otherwise have to purchase. To claim the credit, an Application for Florida Renewable Energy Production Credit Allocation (Form F-1193, incorporated by reference in Rule 12C-1.051, F.A.C.), must be filed with the Department on or before February 1 of each year for an allocation of credit. The allocation of credit is based upon the applicant's increased production and sales of electricity and the increased production and sales of all applicants. On or before March 1 of each year, the Department will notify eligible taxpayers by letter of the amount of credit that is allocated to them and the tax year in which the taxpayer may claim the credit on its Florida corporate income tax return. A copy of this letter must be attached to the taxpayer's Florida corporate income tax return on which the credit is taken.

(2) Taxpayers that increase both production and sales of renewable electrical energy by more than five percent (5%) over the 2005 calendar year for each expanded Florida renewable energy facility may submit one application each year for each qualifying facility. For a new Florida renewable energy facility, the credit is based on the taxpayer's sale of the

facility's entire electrical production. A taxpayer may not transfer its right to apply for a credit to another taxpayer. Florida Renewable Energy Production credits may only be taken once against the Florida corporate income tax, may not be carried back to an earlier tax year, and must be taken in the order prescribed in Section 220.02(8), F.S. A taxpayer claiming the credit on its Florida corporate income tax return must add back the amount of the credit to its Florida net income. Credit amounts that are not granted in full or in part due to the annual \$5 million limitation are not eligible for a Florida Renewable Energy Production credit in later years.

(3) The Florida Renewable Energy Production Credit may be transferred in a merger or acquisition. In addition, unused credits may be transferred one time (outside a merger or acquisition) to another taxpayer in whole or in increments of not less than twenty-five percent (25%) of the remaining credit. Taxpayers are required to file a Notice of Intent to Transfer A Florida Energy Tax Credit (Form F-1193T, incorporated by reference in Rule 12C-1.051, F.A.C.) to transfer the unused renewable energy production credits available for transfer. The transfer must be verified by the Department prior to the transferee claiming the credit. Within 15 days of receipt of a completed Form F-1193T, the Department will notify the transferor and the transferee by letter of the amount of tax credit authorized for transfer. A copy of the letter from the Department allowing the transfer must be attached by the transferee to the Florida Corporate Income/Franchise and Emergency Excise Tax Return (Form F-1120, incorporated by reference in Rule 12C-1.051, F.A.C.) on which the credit is claimed. The transfer of a credit does not affect the time for taking the credit, and the credit is subject to the same limitations imposed on the transferor.

(4) Every taxpayer claiming a Florida Renewable Energy Production Credit must retain documentation that substantiates and supports the credit, a copy of the letter received from the Department granting the credit, a schedule reconciling all credit carryovers, transfers, and sales, and a copy of the letter from the Department allowing the transfer until tax imposed by Chapter 220, F.S., may no longer be determined and assessed under Section 95.091(3), F.S. Documentation to substantiate and support the credit includes: production records or other evidence of the amount of electricity produced; evidence of the increase in production and sales of electricity over the 2005 calendar year by an expanded facility; and evidence establishing that the electricity was produced from renewable energy.

(Returns, Notices, and Elections; Signing and Verification), provide that the inclusion of the preparer's name on an electronically-filed corporate income tax return or notice: (1) means that the return or notice has been signed by the tax return preparer; (2) meets the requirement that the tax return preparer must have examined the information on the return or notice and must declare that it is true, correct, and complete to the best of the preparer's knowledge and belief; and (3) follows the requirements of Internal Revenue Notice 2004-54 (Alternative Methods of Signing for Income Tax Return Preparers).

SUMMARY OF STATEMENT OF ESTIMATED REGULATORY COSTS: No Statement of Estimated Regulatory Cost was prepared.

Any person who wishes to provide information regarding a statement of estimated regulatory costs, or provide a proposal for a lower cost regulatory alternative must do so in writing within 21 days of this notice.

WATER MANAGEMENT DISTRICTS

Southwest Florida Water Management District

RULE NOS.:	RULE TITLES:
40D-2.091	Publications Incorporated by Reference
40D-2.301	Conditions for Issuance of Permits
40D-2.801	Water Use Caution Areas

PURPOSE AND EFFECT: To amend Chapter 40D-2, F.A.C., and Part B, Basis of Review, of the Water Use Permit Information Manual to set forth the permitting criteria applicable to new and renewal water use permit applications and water use permittees that will be governed by the Minimum Flows and Levels Recovery Strategy and Environmental Resources Recovery Plan for the Northern Tampa Bay Water Use Caution Area (the “Comprehensive Plan”). The Comprehensive Plan is encompassed within rule amendments to Chapter 40D-80, F.A.C. that are simultaneously with this rulemaking being proposed for adoption.

SUMMARY: The proposed amendments revise the Conditions for Issuance of Permits, Part B, Basis of Review, of the Water Use Permit Information Manual, and the Northern Tampa Bay Water Use Caution Area (“NTBWUCA”) provisions to reflect the permitting criteria for wetlands, lakes, streams, springs, saltwater intrusion/aquifers levels and minimum flows and levels applicable to water withdrawals within the Northern Tampa Bay Water Use Caution Area through the year 2020 that will be governed by the Comprehensive Plan. The revised permitting criteria, together with all other permitting criteria, if satisfied, allows for the renewal of Tampa Bay Water’s Central System Facilities that are currently permitted pursuant to rules that will expire in December 2010. The Comprehensive Plan is encompassed within rule amendments to Chapter 40D-80, F.A.C., that are simultaneously with this rulemaking being proposed for adoption. The amendments also clarify the purpose for which a water use caution area is established.

SUMMARY OF STATEMENT OF ESTIMATED REGULATORY COSTS: The proposed rule revisions to Chapters 40D-2 and 40D-80, F.A.C., establish Minimum Flow and Level recovery and prevention strategy elements and other necessary rule elements to address unacceptable adverse environmental impacts and Minimum Flows and Level impacts in the Northern Tampa Bay Water Use Caution Area. These revisions continue existing requirements for applicants and existing permittees, except as to certain provisions for renewal of Tampa Bay Water’s Consolidated Permit for the Central

System Facilities. Tampa Bay Water is currently permitted for the Central System Facilities pursuant to the terms of the Partnership Agreement and related rules which expire on December 31, 2010. The amendments impose no additional requirements to applicants or existing water use permittees other than Tampa Bay Water. A number of the requirements for Tampa Bay Water currently exist as part of the Partnership Agreement or as permit or rule conditions, and therefore, impose no additional cost. New assessment and reporting requirements related to stream and spring flow impacts may require additional monitoring sites, input and analysis of monitoring data, and possibly revisions to the Optimized Regional Operations Plan. For the District, evaluation, processing and monitoring of available information to assess the impacts remaining in 2020 may create a one-time additional cost. Small businesses, including those that may be applicants or existing permittees, are not expected to incur costs resulting from the proposed rule. No changes in state or local government revenues are anticipated.

Any person who wishes to provide information regarding a statement of estimated regulatory costs, or provide a proposal for a lower cost regulatory alternative must do so in writing within 21 days of this notice.

40D-2.801 Water Use Caution Areas.

(1) When the Governing Board determines that regional action is necessary to address cumulative water withdrawals which are causing or may cause adverse impacts to the water and related ~~natural land~~ resources or the public interest, it shall declare, delineate, or modify Water Use Caution Areas. The Governing Board shall declare a Water Use Caution Area by adopting a rule or issuing an order imposing special requirements for existing water users and permit applicants to prevent or remedy impacts to water and related natural resources or the public interest ~~and site-specific problems~~.

(2) No change.

(3) The regions described in this Rule have been declared Water Use Caution Areas by the District Governing Board. This Rule reaffirms the declaration of Water Use Caution Areas and creates conditions to be applied to water users in those areas.

(a) Northern Tampa Bay Water Use Caution Area. To address groundwater ~~ground water~~ withdrawals that have resulted in lowering of lake levels, destruction or deterioration of wetlands, reduction in streamflow, and salt water intrusion, the Governing Board declared portions of northern Hillsborough County, southwestern Pasco County, and all of Pinellas County a Water Use Caution Area on June 28, 1989, pursuant to Resolution Number 934. The Governing Board approved expansion of the boundaries of the Water Use Caution Area in June 2007.

2. Regulations specifically applicable to this Water Use Caution Area are set forth contained in “Sections 4.2, 4.3, 4.5 and 7.3, Part B, Basis of Review, of the Water Use Permit Information Manual and are in addition to all other regulations set forth in Chapter 40D-2, F.A.C., and Part B and Part D of the Water Use Permit Information Manual, incorporated by reference in Rule 40D-2.091, F.A.C.”

CHAPTER 4 CONDITIONS FOR ISSUANCE – TECHNICAL CRITERIA

4.2 ENVIRONMENTAL IMPACTS

The following sentence is added to section 4.2 as a new last paragraph just before the subsection titled “A. Wetlands”:

Compliance with the performance standards for permittees encompassed within the Comprehensive Plan set forth in Rule 40D-80.073, F.A.C., shall be addressed as specified in Rule 40D-80.073, F.A.C.

Revised _____

4.3 MINIMUM FLOWS AND LEVELS

The following changes are made to the subsection titled “A. Withdrawals That Affect Water bodies for Which Minimum Flows and Levels Have Been Adopted within Those Portions of Hillsborough County north of State Road 60, and Pasco and Pinellas Counties (hereinafter the “Area”):

A. Withdrawals That Affect Water Bodies for Which Minimum Flows and Levels Have Been Adopted Within the Northern Tampa Bay Water Use Caution Area Within Those Portions of Hillsborough County north of State Road 60, and Pasco and Pinellas Counties (hereinafter the “Area”). In establishing Minimum Flows and Levels, the District has determined that the actual water levels in many of the water bodies for which Minimum Flows and Levels have been established are below the Minimum Flow and Level. The District is implementing a recovery strategy to address water bodies that are below their Minimum Flows and Levels. The recovery strategy, and associated mitigation plan, referred to as the Comprehensive Plan, is described in Rule 40D-80.073, F.A.C. The District is expeditiously implementing a recovery strategy for the Area in keeping with the District’s legislative mandate pursuant to Sections 373.036, 373.0361, 373.0421, 373.0831, 373.1962 and 373.1963, F.S., to resolve the water supply and water resource impact concerns of the Northern Tampa Bay Area in a cooperative manner with the water suppliers and interested parties. This Section 4.3 A. and Chapter 40D-80, F.A.C., set forth the regulatory portion of the first phase (through

~~December 31, 2010) of the recovery strategy for the Area. The following requirements of this Section 4.3 A. effectuate part of the Comprehensive Plan that recovery strategy and shall be effective only through December 31, ~~2020~~ 2010. ~~The District will evaluate the state of knowledge of these matters in 2010. Based on that evaluation, the District may revise this Section 4.3 A. as appropriate.~~ Compliance with Section 4.3 A. does not, by itself, satisfy the other conditions for issuance requirements of Chapter 40D-2, F.A.C., including Rule 40D-2.301, F.A.C for new withdrawals proposed after August 3, 2000.~~

1. For New Withdrawals Proposed After August 3, 2000, Except For Withdrawals Subject to 4.3 A.2. Below.

a. Where above Minimum Flow or Level – For water bodies that are predicted to be impacted by the proposed withdrawal and where the actual flow or level is at or above a Minimum Flow or Level, withdrawals shall be limited to that quantity, as may be further limited by other provisions of Rule 40D-2.301, F.A.C., and this Basis of Review, that does not cause the actual flow to fall below the Minimum Flow, nor cause the actual level to fall below the Minimum Level on a long-term average basis (the “Baseline Quantity”). For purposes of this Section 4.3 A., “long-term” means a period which spans the range of hydrologic conditions which can be expected to occur based upon historical records, ranging from high water levels to low water levels. In the context of a predictive model simulation, a long-term simulation will be insensitive to temporal fluctuations in withdrawal rates and hydrologic conditions, so as to simulate steady-state average conditions. In the context of an average water level, the average will reflect the expected range and frequency of levels based upon historic conditions. This period will vary because reasonable scientific judgment is necessary to establish the factors to be used in the assessment of each application depending on the geology and climate of the area of withdrawal, the depth of and number of wells and the quantity to be withdrawn.

i. If the withdrawal of the requested quantity of water does not meet the condition in 4.3 A.1.a. above, the applicant shall identify the Baseline Quantity, and the District shall consider, as may be further limited by other provisions of Rule 40D-2.301, F.A.C., and this Basis of Review, the authorization of the additional quantity of water to be withdrawn where the applicant:

(1) Demonstrates that there are no reasonable means to modify the proposed withdrawal to meet the conditions in 4.3 A.1.a., including the use of alternative supplies, to reduce or replace the amount of the requested quantity exceeding the Baseline Quantity. Cost shall not be the sole basis for determining whether the means are reasonable; and

(2) Provides reasonable assurance that significant harm will be prevented to the wetlands and surface water bodies that could be affected by the proposed withdrawal if the requested quantity is withdrawn; and

(3) Demonstrates that any measures used to provide the reasonable assurance specified in 4.3 A.1.a.i(2) above will not cause a violation of any of the criteria listed in paragraphs 40D-2.301(1)(a)-(n), Rule 40D-4.301 or 40D-4.302, F.A.C., as applicable.

(1) The measures proposed may include hydration of affected water bodies or modification of existing drainage structures to prevent significant harm to affected water bodies, provided that the measures within the EMP minimize the need for supplemental hydration to the greatest extent practical.

ii. To support whether the applicant has provided reasonable assurance pursuant to 4.3 A.1.a.i(2) above, the applicant must submit an environmental management plan (“EMP”) for approval by the District describing the measures to be used to prevent significant harm from withdrawal of the requested quantity. The EMP must include a monitoring program for early detection of impacts to wetlands and surface water bodies that could be affected by the proposed withdrawal and an implementation scheme for corrective actions to prevent unacceptable adverse impacts. The EMP shall include provisions to evaluate changes in water quality, water levels, vegetation, and fish and wildlife. The EMP shall also include clear thresholds as to when the implementation scheme will be initiated. The implementation scheme shall include details as to how the proposed measures will be effected, the methods to be followed in order to functionally replicate the natural hydrologic regime of affected water bodies, and efforts to be undertaken to minimize the effects of changes in water chemistry. The implementation scheme shall also require reduction of pumping to the Baseline Quantity as a corrective action if no other measures, including supplemental hydration, are successful in preventing unacceptable adverse impacts to wetlands and surface water bodies due to withdrawals. An approved EMP shall be incorporated as a special condition to any permit issued.

(2) If supplemental hydration is proposed, the applicant will be required to identify in the application and monitor a representative number of wetlands in the vicinity of the withdrawal. The monitored wetlands shall include a representative number of MFL or MFL surrogate wetlands not receiving supplemental hydration. An MFL surrogate wetland is the nearest wetland site of the same type and condition to the proposed withdrawal that is not anticipated to require supplemental hydration. The monitored wetlands shall also include, where available, non-MFL wetlands not receiving hydration as well as MFL and non-MFL wetlands proposed for supplemental hydration.

(3) A representative number of wetlands is a number of a particular type or types of wetlands, in the vicinity of the withdrawal, sufficient to adequately determine the hydrologic response of the wetlands and surface water bodies that could be affected by the proposed withdrawal to rainfall and water withdrawals.

(4) If supplemental hydration is proposed to rehydrate lakes or wetlands, in order for a water use permit authorizing the Requested Quantity to be issued, the applicant shall demonstrate that ~~Governing Board must determine whether:~~

(A) The measures within the proposed EMP minimize the quantity of water required for supplemental hydration by raising water levels by filling or blocking ditches, removing culverts or outflows, or other alterations, where practical and feasible, and whether such alterations will achieve the applicable minimum level (where the measures proposed by the application identify the need for specific Environmental Resource Permits, such permits must be obtained prior to withdrawal of the requested quantities);

(B) The applicant has proposed use of the lowest quality of water for rehydration which is scientifically, technically and environmentally feasible to prevent unacceptable adverse impacts;

(C) Measures within the proposed EMP minimize the need for ground water hydration to the greatest extent practical based on the quantity, frequency and duration of the anticipated use;

(D) The measures within the proposed EMP minimize or avoid the potential for unacceptable adverse impacts to water quality or fish and wildlife in the wetland or surface water body receiving supplemental hydration, and, if such a potential exists, the EMP contains adequate measures to detect impacts at an early stage and to prevent unacceptable adverse impacts in an expeditious manner;

(E) The measures within the proposed EMP minimize or avoid the potential for the establishment or spread of undesirable aquatic vegetation in the wetland or surface water body receiving supplemental hydration and, if such a potential exists, the EMP contains adequate measures to detect vegetative changes at an early stage and to prevent undesirable vegetative changes in an expeditious manner;

(F) The quantity of water needed for supplemental hydration is outweighed by the quantity of water made available for other uses;

(G) The quantity of water needed for supplemental hydration is reasonable compared to the unacceptable adverse impacts to be prevented;

(H) The unacceptable adverse impact to be prevented by supplemental hydration results in benefits that outweigh the potential for impacts caused by the additional withdrawal; and

(I) The quantity of the water used for supplemental hydration is reasonable considering the proportion expected to percolate into the aquifer.

iii. Wetlands or other surface water bodies receiving supplemental hydration must have flow meters to measure the quantity of supplemental hydration water used at each site. This information shall be reported to the District as required by permit condition.

iv. Pursuant to Chapter 373, F.S., and Chapter 40D-2, F.A.C., permits may be conditioned to include aquifer regulatory levels intended to achieve compliance with one or more of the Chapter 40D-2, F.A.C., conditions for issuance, including paragraph 40D-2.301(1)(d), F.A.C., Minimum Flows and Levels criteria. The aquifer regulatory level that will be appropriate for any particular permit, considering all conditions for issuance, is the level that results from the more stringent condition.

v. If supplemental hydration with ground water is proposed pursuant to paragraph 4.3 A.1.a.i. and 4.3 A.1.a.ii, the applicant will be required to propose a Floridan aquifer regulatory level for each of the MFL wetlands (defined in 4.3 A.1.a.vi.(2)(A) below) or MFL surrogate wetlands not receiving supplemental hydration in the vicinity of the proposed water use permit. The aquifer regulatory level for each MFL wetland or MFL surrogate wetland not receiving supplemental hydration with ground water shall be the Floridan aquifer level that does not cause the Minimum Level to be exceeded on a long-term basis, based solely on withdrawal management. The aquifer regulatory level for MFL wetlands receiving supplemental hydration with ground water shall be the Floridan aquifer level taking into account the benefits of the hydration.

vi. The procedures described below are those applicable to the determination of an aquifer regulatory level relating to paragraph 40D-2.301(1)(~~e~~)(~~d~~), F.A.C., where the District Governing Board authorizes a quantity of Upper Floridan aquifer ground water pursuant to 4.3 A.1.a.i. where an applicant proposes prevention measures, and shall be determined for, and specified in, any permit issued as follows:

(1) The aquifer regulatory level is the long-term average potentiometric level that will not result in significant harm to a water body for which a Minimum Flow or Level has been established in Chapter 40D-8, F.A.C., taking into account the effects of prevention measures such as hydration on the impacted Minimum Flow or Level. The aquifer regulatory level for the Upper Floridan aquifer shall be proposed by the water use permit applicant with the permit application for review, modification as needed, and approval by the District as part of any permit issued. The aquifer regulatory level will be used to determine the annual average daily quantity for the permit that does not result in significant harm to water resources taking into account prevention measures such as hydration. The aquifer regulatory level is one of several long-term compliance tools that are evaluated by the District, but is not a mechanism to control withdrawals on a short term basis. The aquifer regulatory level and the quantities granted

based on this level shall be adjusted if data indicate that significant harm is occurring because of the withdrawals or if data indicates that additional withdrawals can be permitted without causing significant harm.

(2) The aquifer regulatory level for the Upper Floridan aquifer shall be calculated based on the relationship between the potentiometric level of the Upper Floridan aquifer and water levels in the surficial aquifer system and associated wetlands and lakes, taking into account the measures proposed by the applicant to prevent the significantly harmful impacts of withdrawals. The Floridan aquifer regulatory levels associated with MFL wetlands or MFL surrogate wetlands not receiving supplemental hydration, shall be equal to the Floridan aquifer level that does not cause the Minimum Level to be exceeded on a long-term basis, based solely on withdrawal management. The Floridan aquifer regulatory level associated with MFL wetlands that receive supplemental hydration shall be determined according to the following guidelines:

(A) Determine the historic average Upper Floridan aquifer potentiometric level in the vicinity of the wetland or lake for which a minimum wetland level or minimum lake level has been established in Chapter 40D-8, F.A.C. (Referred to hereafter as “MFL wetland” or “MFL lake,” as applicable). The historic average potentiometric level is estimated for each site as follows:

(i) If an Upper Floridan aquifer monitor well is located in the vicinity, and if the available pre-withdrawal potentiometric level data are sufficient to capture the expected long-term range of pre-withdrawal potentiometric levels, then the historic average potentiometric level is calculated by taking the average of the pre-withdrawal potentiometric level data.

(ii) If an Upper Floridan aquifer monitor well is located in the vicinity, and if the available pre-withdrawal potentiometric level data are not sufficient to capture the expected long-term range of pre-withdrawal potentiometric levels, then the historic average potentiometric level shall be estimated using best available data and methods. Methods may include correlation of the available pre-withdrawal potentiometric level data to historic potentiometric data in other areas of the region and estimating the historic average potentiometric level at the site in question using statistical analysis.

(iii) If no pre-withdrawal potentiometric level data for an existing Upper Floridan aquifer monitor well in the vicinity are available, then the historic average potentiometric level is determined by adding the absolute value of the estimated current average cumulative drawdown at the well to the current average potentiometric level of the well.

(iv) If no Upper Floridan aquifer monitor well exists in the vicinity of each MFL lake or MFL wetland, the historic average potentiometric level can be determined based on an evaluation of regional aquifer potentiometric level data, including potentiometric surface maps.

(B) Estimate the resulting cumulative Upper Floridan aquifer potentiometric level drawdown at the location of the MFL wetland or MFL lake utilizing acceptable ground water flow models or analytical techniques, resulting from the proposed and existing withdrawals, taking into account the effect of the prevention measures proposed by the permit applicant such that the drawdown together with the prevention measures will not cause significant harm to the MFL wetland or MFL lake (hereinafter referred to as the “Resulting Drawdown”).

(C) Subtract the Resulting Drawdown from the historic average potentiometric level to calculate the aquifer regulatory level.

(D) The Resulting Drawdown shall be determined using industry-standard ground water flow models or analytical techniques, based on best available aquifer-characteristic information, simulating long-term average water use and hydrologic conditions.

vii. If the ~~District Board~~ determines that reasonable assurances have been provided pursuant to 4.3 A.1.a., the ~~District Board~~ shall authorize the additional quantity of water to be withdrawn.

b. For new quantities that affect a water body that is below Minimum Flow or Level – requests for withdrawals of new quantities of water that are projected to impact a water body which is below its minimum flow or level shall not be approved unless the new quantities are used solely for furthering the attainment of the objective set forth in the ~~Comprehensive Recovery Plan recovery strategy~~ in Rule 40D-80.073, F.A.C.

2.e. Quantities Authorized to Be Withdrawn as of August 3, 2000.

~~a.i.~~ Where above Minimum Flow or Level – For water bodies that are affected by the withdrawals, and where the actual flow or level is at or above a Minimum Flow or Level, withdrawals, including those from the Tampa Bay Water Central System Facilities, shall be evaluated pursuant to 4.3 A.1.a. above.

~~b.ii.~~ Where below Minimum Flow or Level – For water bodies that are affected by the withdrawal and where the actual flow or level is below a Minimum Flow or Level:

~~i.(A)~~ Tampa Bay Water Central System Facilities Wellfields.

Compliance with established Minimum Flows and Levels for waterbodies that are adversely impacted by withdrawals from the Tampa Bay Water Central System Facilities shall be addressed as specified in Sections 4.3 A. and 7.3 8., Part B, Basis of Review, of the Water Use Permit Information Manual and Rule 40D-80.073, F.A.C. The Central System Wellfields (i.e., Cosme-Odessa, Eldridge-Wilde, Section 21, South Pasco, Cypress Creek, Cross Bar Ranch, Starkey, Morris Bridge, Northwest Hillsborough Regional, Cypress Bridge, and North Pasco) are encompassed within a recovery strategy referenced

~~in Rule 40D-80.073, F.A.C., and are controlled by the New Water Supply and Ground Water Reduction Agreement (Agreement) through the term of the Agreement. Recovery to Wetland and Lake Minimum Levels for wetlands and lakes described in and established in subsection 40D-8.623(3) and 40D-8.624(12), F.A.C., is the objective of the recovery strategy under Rule 40D-80.073, F.A.C., and reductions in ground water withdrawals from the Central System Wellfields to reduce the impacts of withdrawals on wetlands and lakes is an objective of the Agreement. Therefore, withdrawals from these Wellfields shall not be required to comply with the Minimum Flows and Levels established within the area described in Section 4.3 A. during the term of the Agreement, nor shall Aquifer Regulatory Levels as set forth in Section 4.3 A.1.a.v. be applied to these Wellfields during the term of the Agreement.~~

~~ii.(B)~~ Other Existing Permittees as of August 3, 2000.

Compliance with the performance standards for permittees encompassed within the Comprehensive Plan set forth in Rule 40D-80.073, F.A.C., shall be addressed as specified in Rule 40D-80.073, F.A.C.

~~Permittees not subject to 4.3 A.2.b.i. above within this Area who apply for renewal shall reduce the impacts, if any, of their withdrawals, as set forth in subsection 40D-80.073(5), F.A.C., and therefore are not required to comply with the Minimum Flows and Levels established within this Area through the period of the first phase of the recovery strategy, ending December 31, 2010.~~

7.0 WATER USE CAUTION AREAS

7.3 NORTHERN TAMPA BAY WATER USE CAUTION AREA

1. through 7. No change.

8. Tampa Bay Water Central System Facilities Permitting

From the 1930's through the 1990's eleven wellfields were developed within the Northern Tampa Bay Water Use Caution Area (the "Area"). Those wellfields are Cosme-Odessa, Eldridge-Wilde, Section 21, South Pasco, Cypress Creek, Cross Bar Ranch, Starkey, Morris Bridge, Northwest Hillsborough Regional, Cypress Bridge, and North Pasco, and are collectively hereinafter referred to as the Central System Facilities. The Central System Facilities are operating under Water Use Permit No. 2011771 (the "Consolidated Permit"). The Consolidated Permit will expire on December 31, 2010. The predominant cause of the lowered aquifer levels in the

vicinity of the Central System Facilities is groundwater withdrawals from the Central System Facilities. As a result, wetlands, lakes, streams, springs and aquifer levels in the vicinity of the Central System Facilities have been impacted by reduced water flows and levels. In addition to the impacts occurring to wetlands, lakes, streams, springs and aquifer levels, the existing water levels and flows in certain wetlands, lakes, streams, springs and aquifer levels are below the Minimum Flows or Levels established by the District. The recovery strategy developed by the District and ending December 31, 2010, has had the effect of increasing water levels and flows and improving the condition of many wetlands, lakes, streams, springs and aquifer levels in the Area due to the reduction of groundwater withdrawal from the Central System Facilities. However, compliance with permitting criteria of Rule 40D-2.301, F.A.C. has not been demonstrated since the current permitted withdrawal limit of 90 MGD on a 12-month moving average basis will have only been in effect for two years when the permit expires. Since these facilities supply potable water to Pinellas, Pasco, and Hillsborough counties and evaluation of the effect of the reduced withdrawal rate has not been completed, the District has determined that it is in the public interest and consistent with the objectives of the District to develop a second phase titled Recovery and Mitigation Plan. This Plan includes renewal of the Consolidated Permit based on this Section 7.3.8 and Rule 40D-80.073, F.A.C., in lieu of the standard permitting criteria for wetlands, lakes, streams, springs and aquifer levels set forth in Sections 4.2, 4.3.A and 4.5 of Part B, Basis of Review, Water Use Permit Information Manual incorporated in Rule 40D-2.091, F.A.C. In all other respects, the renewal of the Consolidated Permit shall be governed by the criteria set forth in Rule 40D-2.301, F.A.C. As part of the establishment of minimum flows and levels pursuant to Sections 373.042 and 373.0421, F.S., the District is implementing a recovery strategy. The Northern Tampa Bay New Water Supply and Ground Water Withdrawal Reduction Agreement ("Partnership Agreement") is part of that recovery strategy. An integral part of the recovery strategy is issuance of water use permits and the procedures applicable to the issuance of those permits. Criteria for issuance of those permits will be governed by this Section 7.3.8. The procedure and rule criteria applicable to the issuance of water use permits for the Cross Bar Ranch, Cypress Creek, Cypress Bridge, Starkey, North Pasco, South Pasco, Eldridge-Wilde, Cosme-Odessa, Section 21, Morris Bridge and Northwest Hillsborough Regional Wellfields ("Central System") are those procedures and criteria set forth in the Partnership Agreement, which is incorporated herein by reference and available from the District upon request. This rule shall apply only to consolidated and non-consolidated permits as defined under the Partnership Agreement. The procedures and criteria set forth in the Partnership Agreement shall supersede and replaced all conflicting District rules, if any. Upon termination of the water use permits issued

~~pursuant to this Section, or December 31, 2010, whichever is first, this District's then existing rules would thereafter apply to the issuance of water use permits for the Central System.~~

Southwest Florida Water Management District

RULE NO.:	RULE TITLE:
40D-80.073	Comprehensive Environmental Resources Recovery Plan for the Northern Tampa Bay Water Use Caution Area, and the Hillsborough River Strategy

PURPOSE AND EFFECT: To amend Chapter 40D-80, F.A.C., to establish the Minimum Flows and Levels Recovery Strategy and Environmental Resources Recovery Plan for the Northern Tampa Bay Water Use Caution Area (the "Comprehensive Plan"). The Comprehensive Plan is proposed to govern through 2020 the recovery and mitigation actions to be undertaken by water use permit applicants and permittees with withdrawals that adversely impact lakes, wetlands, streams, springs and aquifers within the Northern Tampa Bay Water Use Caution Area.

SUMMARY: The proposed amendments set forth the Minimum Flows and Levels Recovery Strategy and Environmental Resources Recovery Plan for the Northern Tampa Bay Water Use Caution Area (the "Comprehensive Plan"). The Comprehensive Plan addresses water use permittees and applicants whose withdrawals are located within the Northern Tampa Bay Water Use Caution Area ("NTBWUCA") through the year 2020. Existing rules are extended and expanded beyond the existing 2010 termination to provide for all water use permittees, except Tampa Bay Water, consideration of certain factors in determining the permittee's responsibility to implement measures to reduce unacceptable adverse impacts to Minimum Flows and Levels and other environmental features. Comprehensive Plan amendments relating to Tampa Bay Water include: that a renewal of the Consolidated Permit is limited to 10 years (through 2020) for not more than 90 MGD; a provision for a temporary exceedance of 90 MGD during extreme drought; continue use of an Operations Plan that optimizes Central

System Facilities to minimize environmental stress in the wellfield area; continuation of the use of Floridan Aquifer Recovery Management Levels as long-term guidelines for allocating groundwater withdrawals within the Operations Plan; implementation of an Environmental Management Plan for the environmental monitoring of groundwater impacts, continuation of ongoing Phase 1 Mitigation feasibility and implementation of projects for identified sites; a provision for implementation of a Consolidated Permit Recovery Assessment Plan to evaluate recovery and identify potential options to address remaining impacts; and water conservation reporting by TBW/Member Governments. The existing provision limiting new permitted quantities to those that contribute to the attainment of the objective of the existing recovery strategy that expires in 2010 is now applicable to the Comprehensive Plan. The amendments provide that progress toward attainment of the objective of the Comprehensive Plan will be evaluated in 2020 when developing a strategy for the second renewal of the Consolidated Permit and a third phase of the Comprehensive Plan.

SUMMARY OF STATEMENT OF ESTIMATED REGULATORY COSTS: The proposed rule revisions to Chapters 40D-2 and 40D-80, F.A.C., establish Minimum Flow and Level recovery and prevention strategy elements and other necessary rule elements to address unacceptable adverse environmental impacts and Minimum Flows and Level impacts in the Northern Tampa Bay Water Use Caution Area. These revisions continue existing requirements for applicants and existing permittees, except as to certain provisions for renewal of Tampa Bay Water's Consolidated Permit for the Central System Facilities. Tampa Bay Water is currently permitted for the Central System Facilities pursuant to the terms of the Partnership Agreement and related rules which expire on December 31, 2010. The amendments impose no additional requirements to applicants or existing water use permittees other than Tampa Bay Water. A number of the requirements for Tampa Bay Water currently exist as part of the Partnership Agreement or as permit or rule conditions, and therefore, impose no additional cost. New assessment and reporting requirements related to stream and spring flow impacts may require additional monitoring sites, input and analysis of monitoring data, and possibly revisions to the Optimized Regional Operations Plan. For the District, evaluation, processing and monitoring of available information to assess the impacts remaining in 2020 may create a one-time additional cost. Small businesses, including those that may be applicants or existing permittees, are not expected to incur costs resulting from the proposed rule. No changes in state or local government revenues are anticipated.

Any person who wishes to provide information regarding a statement of estimated regulatory costs, or provide a proposal for a lower cost regulatory alternative must do so in writing within 21 days of this notice.

THE FULL TEXT OF THE PROPOSED RULE IS:

40D-80.073 Comprehensive Environmental Resources Recovery Plan for the Northern Tampa Bay Water Use Caution Area and the Hillsborough River Strategy Regulatory Portion of Recovery Strategy For Pasco, Northern Hillsborough and Pinellas Counties.

(1) Overview: Background.

This rule sets forth the Minimum Flows and Levels Recovery Strategy and Environmental Resources Recovery Plan for the Northern Tampa Bay Water Use Caution Area (the "Comprehensive Plan"). The Comprehensive Plan addresses water use permittees whose withdrawals are located within the Northern Tampa Bay Water Use Caution Area ("NTBWUCA"). Within the NTBWUCA, certain wetlands, lakes, streams, springs and aquifer levels have been impacted by lower groundwater levels resulting from groundwater withdrawals. Within the area of surficial aquifer impacts as generally depicted in Figure 80-1, the Central System Facilities, as described below, account for the majority of groundwater withdrawals. For this reason, the Central System Facilities are the primary focus of the Comprehensive Plan as other users' water withdrawals result in relatively minimal water resource impacts within the area generally depicted on Figure 80-1. The objective of this Comprehensive Plan is to achieve recovery of MFL waterbodies and avoidance and mitigation of unacceptable adverse impacts to wetlands, lakes, streams, springs and aquifer levels. The provisions of the Comprehensive Plan specifically applicable to Tampa Bay Water's Central System Facilities are contained in subsections 40D-80.073(2) and (3), F.A.C., below. All other water use permittees are addressed in subsections 40D-80.073(4) and (8), F.A.C., below. Other provisions applicable to permittees are included in subsections 40D-80.073(5), (6), and (7), F.A.C. The Comprehensive Plan is effective through December 31, 2020. Chapter 96-339, Laws of Florida, requires the District to establish Minimum Flows and Levels for priority waters within Pasco, Hillsborough and Pinellas Counties by October 1, 1997. The District has so established Minimum Flows and Levels within Pasco, Hillsborough North of State Road 60, and Pinellas Counties (the "Northern Tampa Bay Area" or "Area"). Those Minimum Flows and Levels are contained within

Chapter 40D-8, F.A.C. In establishing those Flows and Levels, the District has determined that the existing water levels in many of the priority waters are below the Minimum Flows or Levels. This section sets forth the regulatory portion of the first phase of the Recovery Strategy for the Area.

(2) Tampa Bay Water's Central System Facilities. Objective of Recovery Strategy.

(a) From the 1930's through the 1990's eleven wellfields were developed within the Northern Tampa Bay Water Use Caution Area. Those wellfields are Cosme-Odessa, Eldridge-Wilde, Section 21, South Pasco, Cypress Creek, Cross Bar Ranch, Starkey, Morris Bridge, Northwest Hillsborough Regional, Cypress Bridge and North Pasco, and are collectively hereinafter referred to as the Central System Facilities. The Central System Facilities are operating under Water Use Permit No. 2011771 (the "Consolidated Permit"). Groundwater withdrawals from the Central System Facilities have caused lowered aquifer levels in and near the Central System Facilities. In 1974, pursuant to Chapter 373, F.S., the District established a permitting system to assure that such use is consistent with the overall objectives of the District and is not harmful to the water resources of the area. All water use permittees within the Area are addressed by this Rule 40D-80.073, F.A.C. However, Tampa Bay Water (formerly known as the West Coast Regional Water Supply Authority), Pinellas County, Pasco County, the City of New Port Richey, Hillsborough County, the City of Tampa, and the City of St. Petersburg, the last six listed referred to as "Member Governments," water supply facilities account for the majority of water withdrawals within the Area. For this reason, these facilities are the primary focus of the portion of the recovery strategy encompassed by this Rule 40D-80.073, F.A.C. Those facilities are the following wellfields: Cosme-Odessa, Eldridge-Wilde, Section 21, South Pasco, Cypress Creek, Cross Bar Ranch, Starkey, Morris Bridge, Northwest Hillsborough Regional, Cypress Bridge, and North Pasco, (the "Central System Facilities"). Other users' water withdrawals result in relatively minimal water resource impacts, and they are addressed in subsection 40D-80.073(5), F.A.C.

(b) Pursuant to Chapter 96-339, Laws of Florida, the District established Minimum Flows and Levels for priority waters within Pasco, Hillsborough and Pinellas Counties which became effective in 2000. Those Minimum Flows and Levels are contained within Chapter 40D-8, F.A.C. The District determined that groundwater withdrawals have contributed to existing water levels and flows in many of these priority waters being below the established Minimum Flows or Levels. To address unacceptable adverse impacts caused by the Central System Facilities, the District implemented a recovery strategy and mitigation plan ("Recovery and Mitigation Plan"), the first phase of which occurred between 1998 and 2010 and resulted in the phased reduction of the permitted withdrawal rate of the Central System Facilities from 158 Million Gallons per Day

(MGD) in 1998 to 121 MGD in 2003, and to 90 MGD on a 12-month moving average basis in 2008. The recovery strategy included the District and Tampa Bay Water and its Member Governments entering into the Northern Tampa Bay New Water Supply and Ground Water Withdrawal Reduction Agreement (the "Agreement") in 1998. The Agreement has constituted that portion of the first phase of the District's recovery strategy that is specifically applicable to the Central System Facilities. The Agreement has governed the development of new water supplies, reduction of groundwater withdrawals, litigation and administrative hearings between the District, Tampa Bay Water and its Member Governments. The Agreement also governed the District's financial assistance to Tampa Bay Water to develop the new water supplies and achieve the reduction of groundwater withdrawals from the Central System Facilities. The Agreement expires on December 31, 2010. Consistent with the Agreement, Tampa Bay Water has constructed an enhanced surface water system, which includes a surface water treatment facility (which treats surface water flows from the Alafia River, the Tampa Bypass Canal and the Hillsborough River), an offstream reservoir, the Brandon Urban Dispersed Wellfield, a seawater desalination facility, and an integrated regional delivery system. Further, Tampa Bay Water has reported that the Member Governments have exceeded the 17 MGD reduction in water demand through conservation contemplated under the Agreement. Water supplied by these facilities and conservation allowed Tampa Bay Water to meet the required phased reductions in groundwater withdrawals. While the Area has recently seen cyclical low levels of precipitation, the predominant cause of the lowered surficial water table in the vicinity of the Central System Facilities is the ground water withdrawals from the Central System Facilities. As a result, in the vicinity of the Central System Facilities, wetlands and lakes have been and continued to be impacted by reduced water levels, including wetlands and lakes for which minimum wetlands and lake levels have been established. Recovery to Wetland and Lake Minimum Levels for wetlands and lakes described in and established in subsection 40D 8.623(3), Table 8-1 and 40D-8.624(12), Table 8-2, F.A.C., is the objective of this Rule 40D-80.073, F.A.C. This portion of the Recovery Strategy for the Area is effective through December 31, 2010.

(c) Although the Recovery and Mitigation Plan has had the effect of increasing water levels and flows and improving the condition of many wetlands, lakes, streams, springs and aquifer levels due to the reduction of groundwater withdrawals from the Central System Facilities, compliance with the criteria of Rule 40D-2.301, F.A.C., has not been demonstrated.

(d) Since the Central System Facilities supply potable water to Pinellas, Pasco, and Hillsborough counties and evaluation of the effect of the reduced withdrawal rate has not been completed, the District has determined it is in the public interest and consistent with the objectives of the District to

develop a second phase of the Recovery and Mitigation Plan. This section sets forth the regulatory portion of the second phase of the Recovery and Mitigation Plan.

(e) This Recovery and Mitigation Plan is a comprehensive approach to address unacceptable adverse impacts and Minimum Flows and Levels impacts to wetlands, lakes, streams, springs and aquifer levels caused by groundwater withdrawals from the Central System Facilities. This Plan sets forth the criteria to address recovery to Minimum Flows and Levels as well as avoidance and mitigation of unacceptable adverse environmental impacts as described in Sections 4.2, 4.3, and 4.5 in Part B, Basis of Review, of the Water Use Permit Information Manual, incorporated by reference in Rule 40D-2.091, F.A.C. This Recovery and Mitigation Plan allows renewal of the Consolidated Permit based, in part, on continued environmental assessment and mitigation, and further development of a plan to avoid or mitigate unacceptable adverse impacts to wetlands, lakes, streams, springs and aquifer levels attributable to groundwater withdrawals from the Central System Facilities.

(f) Central System Facilities Withdrawals and Duration – The Central System Facilities shall be limited in the renewal of the Consolidated Permit as follows:

1. Total annual average daily withdrawal shall not exceed a rate of 90 MGD on a 12-month moving average basis, except as provided in subparagraph 2., below. Tampa Bay Water shall undertake its best efforts to maintain the total withdrawal rate at or below 90 MGD so that the impacts of sustained withdrawals at that rate can be assessed during the second phase of the Recovery and Mitigation Plan. The duration of the Consolidated Permit shall be for a period of 10 years. Withdrawals from the Central System Facilities shall be optimized to minimize environmental stresses in or near the wellfields as provided in the Operations Plan described in paragraph (g), below.

2. During the course of this Recovery and Mitigation Plan, Tampa Bay Water will be performing a renovation project on the C.W. Bill Young Regional Reservoir (the "Reservoir"). During the period of the renovation project, Tampa Bay Water's withdrawals from the Central System Facilities are limited to a total annual average daily withdrawal rate of 90 MGD on a 12-month moving average basis, except as provided below:

a. The period during which withdrawals may be greater than 90 MGD on a 12-month moving average basis ("Exception Period") begins when:

(i) Tampa Bay Water demonstrates the date that the Reservoir cannot produce water supply and the renovation project has begun, and

(ii) The District has determined that hydrologic factors exist that are contributing to a water supply deficit. These factors include the designated water resource indicators in the

District's water shortage plan and stream flow and rainfall conditions in the Alafia and/or the Hillsborough River watersheds, and

(iii) Tampa Bay Water demonstrates there are not sufficient surface water, desalination and other interconnected sources available that would allow the Consolidated Permit withdrawals to remain at or below 90 MGD on a 12-month moving average basis, and

(iv) Tampa Bay Water and its member governments demonstrate that they have complied with any Board or Executive water shortage or emergency order relating to water supply.

b. The Exception Period shall end on the date on which the earlier of the following occurs:

(i) 36 months after the period begins, or,

(ii) When water stored in the C.W. Bill Young Regional Reservoir equals 11.0 billion gallons.

c. During the Exception Period, Tampa Bay Water shall maximize its authorized use of alternative water supply sources, including the Alafia River and Hillsborough River/Tampa Bypass Canal system, the desalination plant and other available interconnected sources in order to minimize groundwater withdrawals from the Central System Facilities. A monthly report demonstrating the maximized use of these sources shall be submitted to the District.

d. During the Exception Period, Tampa Bay Water and its Member Governments shall comply with any Board or Executive water shortage or emergency order relating to Tampa Bay Water's or a Member Government's water supply.

e. The District shall notify Tampa Bay Water of the beginning and ending dates of the Exception Period.

f. Compliance with the 90 MGD on a 12-month moving annual average basis is tolled during the Exception Period and compliance shall recommence beginning 365 days from the date the Exception Period ends.

g. Tampa Bay Water shall use its best efforts to minimize the period of the renovation project and reduce the duration of the Exception Period.

(g) Operations Plan.

1. Optimization of Tampa Bay Water's Central System Facilities is critical to the success of the second phase of the Recovery and Mitigation Plan. To this end, Tampa Bay Water shall continue to implement and refine the Operations Plan which was submitted to the District as part of the first phase of the Recovery and Mitigation Plan. Tampa Bay Water shall submit to the District an updated Operations Plan with the renewal application of the Consolidated Permit that describes how Tampa Bay Water will operate its water supply system with the intent to increase groundwater levels and minimize environmental stresses caused by the Central System Facilities. To fully evaluate optimization, it is essential for Tampa Bay Water to operate the Central System Facilities at or below 90 MGD on a 12 month moving average basis for a sustained

period of time that encompasses a wide spectrum of climatic conditions, therefore the focus of the Operations Plan during the second phase of the Recovery and Mitigation Plan is the operation of the Central System Facilities. Included in the Operations Plan is the optimized Regional Operations Plan ("OROP") which is an optimization model, input data sets, constraint data sets, and other models used to establish boundary conditions. The OROP shall continue to be used to define and control how wellfield withdrawal points from the Central System Facilities will be operated to avoid or minimize environmental stress. Throughout the term of the renewed Consolidated Permit, any proposed change to the optimization formulation or operations protocol or OROP models included in the Consolidated Permit renewal application will require prior District approval. Tampa Bay Water shall submit to the District an Operations Plan report by July 10 of years 2012, 2014, 2016, 2018 and in conjunction with the application to renew the Consolidated Permit. The report shall document updates to the Operations Plan submitted with the Consolidated Permit renewal application, provide a work plan that encompasses the upcoming two years, include activities approved in Tampa Bay Water's budget for the upcoming year that starts October 1 and provide summary information and data on Operations Plan activities during the preceding reporting period.

2. The Operations Plan shall:

a. Define how Tampa Bay Water will operate the Central System Facilities;

b. Provide the protocol under which Tampa Bay Water will select among the Central System Facilities to meet demand;

c. Provide the protocol under which Tampa Bay Water will rotate among the Central System Facilities to avoid or minimize environmental stresses;

d. Rely upon ground water elevation target levels in the aquifer systems as a surrogate for water levels in wetlands and lakes, and flows in streams and springs at a specified set of existing and proposed monitor wells, to gauge environmental stresses in and around the well fields wherein increased ground water elevations will denote reduced environmental stresses;

e. Include procedures for analyzing relationships between the distribution and rate of withdrawal at the well fields, flow rates in rivers and streams; and the associated Floridan, and surficial aquifer system levels, using available models;

f. Include procedures for selecting optimal scenarios for the distribution and rate of ground water withdrawals from the well fields, using available mathematically-based optimization software, based on projected demand and operating system constraints, such that ground water levels in the surficial aquifer system are maximized according to a specified weighting/ranking system as a surrogate for water levels in wetlands and lakes and flow in rivers and streams.

g. Include in the optimization analysis a weighting/ranking system to enable priority factors to be applied to reduce environmental stress preferentially at selected locations, with such factors to be associated with the specified surficial aquifer monitor wells;

h. Propose a set of surficial aquifer monitor wells as well as a priority weighting system for those wells; and

i. Provide data and software for all models used in the OROP.

(h) Environmental Management Plan, Phase 1 Mitigation Plan, and Consolidated Permit Recovery Assessment Plan – An essential component of the second phase of the Recovery and Mitigation Plan is Tampa Bay Water’s continued assessment of unacceptable adverse environmental impacts related to groundwater withdrawals from the Central System Facilities. During the first phase of the Recovery and Mitigation Plan, Tampa Bay Water developed an Environmental Management Plan (EMP) and a Phase 1 Mitigation Plan. Under this second phase of the Recovery and Mitigation Plan, Tampa Bay Water shall continue to implement the EMP and the Phase 1 Mitigation Plan, and develop a Consolidated Permit Recovery Assessment Plan, all as described below.

1. The Environmental Management Plan (“EMP”) that was developed for the Central System Facilities under the first phase of the Recovery and Mitigation Plan addresses the monitoring of water resources and environmental systems in the vicinity of the Central System Facilities, assesses water resources and environmental systems for impact by groundwater withdrawals from the Central System Facilities, and coordinates with Tampa Bay Water’s Operations Plan to facilitate wellfield operational changes to address persistent water level impacts attributed to Central System Facility withdrawals. A revised EMP shall be submitted with the renewal application for the Consolidated Permit and shall be implemented throughout the duration of the renewed Consolidated Permit. The revised EMP shall:

a. Identify and propose a revised list of monitoring sites within the areas potentially affected by the Central System Facilities and unaffected control/reference sites;

b. Define and describe the monitoring and data collection methods and reports utilized for documenting the hydrologic and biologic conditions of surface water bodies in and near the Central System Facilities; and

c. Describe the process used to determine impacts to water bodies in and near the Central System Facilities and the procedures used to attempt corrective action through Operations Plan changes.

2. The Phase 1 Mitigation Plan that was developed for the Central System Facilities under the first phase of the Recovery and Mitigation Plan assessed and prioritized, as candidate sites for mitigation, those lakes and wetlands that were predicted to not fully recover following the reduction in groundwater

withdrawals from the Central System Facilities to a long-term average of 90 MGD. Conceptual mitigation projects were developed for the highest priority water bodies and Tampa Bay Water has been evaluating and implementing these projects, where feasible. Evaluation and implementation of these conceptual Phase 1 Mitigation Plan projects, where feasible, shall be continued throughout the duration of the renewed Consolidated Permit. In addition, Tampa Bay Water shall revise the list of candidate water bodies to include any sites monitored through the EMP that are impacted by Central System Facilities withdrawals and are predicted to not fully recover at a long-term average withdrawal rate of 90 MGD from the Central System Facilities.

3. The Consolidated Permit Recovery Assessment Plan will evaluate the recovery of water resource and environmental systems attributable to reduction of the groundwater withdrawals from the Central System Facilities to a long-term average of 90 MGD, identify any remaining unacceptable adverse impacts caused by the Central System Facilities withdrawals at a long-term average rate of 90 MGD, and will identify and evaluate potential options to address any remaining unacceptable adverse impacts at the time of the Consolidated Permit renewal in 2020. The remaining unacceptable adverse impacts will be determined through an update of the assessment of impact previously performed as part of the Phase 1 Mitigation effort. As part of this effort, Tampa Bay Water shall:

a. Work cooperatively with the District throughout this second phase of the Recovery and Mitigation Plan to discuss the ongoing development of the Consolidated Permit Recovery Assessment Plan.

b. Submit status reports to the District on a frequency to be defined in the renewed Consolidated Permit demonstrating ongoing progress of the development of the Consolidated Permit Recovery Assessment Plan throughout the duration of this second phase of the Recovery and Mitigation Plan.

c. Submit the final results of the Consolidated Permit Recovery Assessment Plan with the application for the second renewal of the Consolidated Permit in 2020.

4. Nothing contained in this rule shall be construed to require Tampa Bay Water to be responsible for more than its proportionate share of impacts to a Minimum Flow and Levels waterbody that fails to meet, due to impacts from ground water withdrawals, the established minimum flow or level.

(i) Water Conservation – Water conservation as a means to reduce demand for withdrawals is a key element of the Recovery and Mitigation Plan. The issuance of Wholesale Water Use Permits for Member Governments whose withdrawals and use are not covered by other water use permits is essential to this element. Until Wholesale Water Use Permits are obtained by the Member Governments as required by Chapter 40D-2, F.A.C., Tampa Bay Water shall report on the Authority’s, as applicable, and the Member Governments’ per

capita rates, water losses, reclaimed water use, residential water use, and the following measures to reduce water demand. During the term of the renewed permit, Tampa Bay Water shall only be responsible for reporting data for any Member Government that does not have a water use permit or a wholesale water use permit that requires such reporting. In the year following the year in which a Member Government is required by permit to report this data, Tampa Bay Water shall no longer be required to submit the data on behalf of the Member Government. This Report shall detail the evaluation of the below-listed measures, the findings and conclusions, and the schedule for implementing selected measures.

1. Toilet rebate/replacement
2. Fixture retrofit
3. Clothes washer rebate/replacement
4. Dishwasher rebate/replacement
5. Irrigation and landscape evaluation
6. Irrigation/landscape rebate
7. Cisterns/rain water harvesting rebate
8. Industrial/commercial/institutional audits and repair
9. Florida-Friendly landscape principles
10. Water Conservation Education
11. Water-conserving rate structures and drought rates
12. Multi-family residential metering

In addition to the above, Tampa Bay Water shall report the quantity of water distributed from each source and the recipients and non-Member Government information required by the Public Supply Annual Report.

(3) Recovery Strategy Elements for Tampa Bay Water and Member Governments.

(a) The District and Tampa Bay Water ("TBW") and Member Governments have entered into the Northern Tampa Bay New Water Supply and Ground Water Withdrawal Reduction Agreement (the "Agreement"). The Agreement constitutes that portion of the District's recovery strategy that is specifically applicable to the Central System Facilities as provided for in Sections 373.036, 373.0361, 373.0421(2), 373.0831 and 373.1963, Florida Statutes. The Agreement governs the development of new water supplies, reduction of pumpage, litigation and administrative hearings between the District, TBW and its Member Governments and the District's financial assistance to the TBW to achieve new water supplies and reduction of pumpage at the Central System Facilities all of which contribute to the attainment of the objective of this portion of the recovery strategy. The Agreement makes available to TBW from the District \$183,000,000.00 to be used for new water supply development projects excluding ground water sources and including alternative sources of potable water and regionally significant transmission pipelines. Independently, the Tampa Bay Water Master Water Plan provides for the development of at least 85 million gallons per day (mgd) annual average daily quantity of additional water

~~supply sources and partially offsets additional water supply needs for growth by increased conservation and demand management.~~

(3)(b) Recovery Management – The ~~pumping~~ reductions in groundwater withdrawals required for the Central System Facilities were the principal means of achieving the objective of the first phase of the Recovery and Mitigation Plan. The use of sound decision protocols to determine groundwater withdrawal distribution and assessment of the remaining impacts at or below 90 MGD on a 12-month moving average basis are necessary components of this second phase of the Recovery and Mitigation Plan. ~~under the Agreement shall be implemented by the TBW and Member Governments as specified below as the principal means of achieving the objective of this Rule 40D-80.073, F.A.C. Additionally, The~~ the Floridan Aquifer Recovery Management Levels set forth in Table 80-1 below shall be used as long-term guidelines for allocating groundwater withdrawals within the Operations Plan, submitted to the District by TBW pursuant to the Agreement and shall be reevaluated in 2010. The Floridan Aquifer Recovery Management Levels are based on the hydrogeologic properties and environmental conditions in the Northern Tampa Bay Area, and are set to advise and guide in determining planned groundwater ~~ground~~ withdrawal rates in 2007, but not as the sole basis by which the District will approve or disapprove the Operations Plan and any amendments or updates.

(e) Periodic Review of Recovery Strategy.

1. The District shall review the recovery strategy periodically to assess the progress of strategy elements. The District will evaluate the water resource recovery attained in light of the reductions in quantities withdrawn achieved based on an evaluation of whether wetland and lake stage frequency data indicate that wetland and lake water levels are improving.

2. These reviews shall consider reports generated by the TBW and the Member Governments describing the status of all additional sources either developed or in development to offset water withdrawals from Central System Facilities as well as any other water supply and water resource information available to the District.

3. The information considered by the District pursuant to subparagraphs (c)1. and 2. above is intended to be also considered during preparation of the update pursuant to Section 373.036, F.S., which is due in 2003, of the District's Water Management Plan as it relates to the water supply assessment for the West-Central Planning Region.

(4) Hillsborough River Strategy. Beginning November 25, 2007, the Minimum Flow for the Lower Hillsborough River shall be as provided in subsection 40D-8.041(1), F.A.C., to be achieved on the time schedule as set forth below. The District and the City of Tampa (City) shall measure the delivery of water to the base of the dam relative to their respective elements as described below. The City shall report this information to the District monthly on the 15th day of the following month. In addition, the City shall submit a quarterly written report of all activities and all progress towards timely completion of its elements of the recovery strategy. Such reports will be submitted to the District within 15 calendar days after each calendar year quarter.

(a) The District and the City have entered into the Joint Funding Agreement Between The Southwest Florida Water Management District and The City of Tampa For Implementation of Recovery Projects To Meet Minimum Flows Of The Lower Hillsborough River (the "Agreement"). The Agreement and subsection 40D-80.073(4), F.A.C., constitute the District's recovery strategy for the Lower Hillsborough River required by Section 373.0421(2), F.S., and shall not compromise public health, safety and welfare.

(b) The schedule to achieve the Minimum Flows for the Lower Hillsborough River is as follows:

1. Sulphur Springs—Beginning on November 25, 2007, the City shall be required to provide 10 cubic feet per second (cfs) of water to the base of the City's dam each day provided such use will not compromise public health, safety and welfare.

2. Tampa Bypass Canal Diversions—By January 1, 2008, provided that any permit that may be required is approved, the District shall divert up to 7.1 million gallons of water on any given day from the District's Tampa Bypass Canal ("TBC") to the Hillsborough River at the District's Structure 161. The District shall then deliver water from the Hillsborough River immediately above the City's dam to the base of the City's dam to help meet the minimum flow requirements of the Lower Hillsborough River. Such diversions shall not occur if public health, safety and welfare will be compromised.

a. The District shall complete a comprehensive analysis of these diversions within 90 days of the first year of operation to identify and subsequently make any mechanical or efficiency adjustments that may be necessary. The District shall use its best efforts to expedite obtaining any permit that may be needed to undertake these actions.

b. By October 1, 2013, provided that the transmission pipeline has been constructed and is operational, all of the water diverted from the TBC middle pool under this provision to help meet the minimum flow shall be provided to the Lower Hillsborough River per subparagraph 40D-80.073(4)(b)7., F.A.C.

c. These diversions shall be prioritized as follows:

(i) Priority Source One—Diversions From the TBC Middle Pool When the TBC Middle Pool is Above 12.0 feet NGVD (1929 or its 1988 equivalent), and There is Flow of at Least 11 cfs Over the District's Structure 162—On days when the TBC middle pool is above 12.0 feet NGVD (1929 or its 1988 equivalent), as measured by the downstream gauge at the District's Structure 161, and there is flow of at least 11 cfs over the District's Structure 162, the District shall divert water from the TBC middle pool to the Hillsborough River.

A. The District shall then deliver 75 percent of any water diverted from the TBC to the Hillsborough River under this provision to the Lower Hillsborough River. Delivery of 75 percent of the water diverted from the TBC addresses concerns about potential losses due to subsurface leakage, evaporation and transpiration. This delivery shall be from the Hillsborough River just above the City's dam to the base of the City's dam, and shall supplement diversions from Sulphur Springs, Blue Sink and Morris Bridge Sink, as they are implemented, and as described in subparagraphs 40D-80.073(4)(b)1., 3., 6. and 8., F.A.C.

B. The TBC middle pool diversions will be limited to the quantity needed to achieve the minimum flow requirements of the Lower Hillsborough River set forth in subsection 40D-8.041(1), F.A.C., but will not exceed 7.1 million gallons on any given day.

C. Such diversions shall cease from the TBC middle pool if the elevation difference between the TBC middle and lower pools exceeds 7.0 feet.

D. On days when flow over the Hillsborough River Dam naturally exceeds 20 cfs during the months of July through March or 24 cfs during the months of April through June and when diversions from the TBC middle pool are not needed to replenish the supply from Storage Projects described in paragraphs 40D-80.073(4)(e) and (d), F.A.C., diversions from the TBC middle pool shall not occur, and any flows in the TBC lower pool above elevation 9.0 feet NGVD (1929 or its 1988 equivalent), shall be available for water supply.

E. Prior to October 1, 2013, and during the months of March through June, on days when some water is needed from the TBC middle pool to help meet the minimum flow for the Lower Hillsborough River, all available water from the TBC middle pool not needed to be diverted in accordance with SWFWMD Water Use Permit No. 20006675 but not exceeding 7.1 million gallons on any given day will be diverted to the Hillsborough River. Water delivered to the Hillsborough River in excess of that needed to help meet the minimum flow of the Lower Hillsborough River shall remain in the Hillsborough River above the dam. Keeping this water in the Hillsborough River above the dam will reduce the time and quantities of supplemental flow needed to help meet the minimum flow requirements.

F. During the months of July through February, on days when water is needed from the TBC middle pool to help meet the minimum flow of the Lower Hillsborough River, only that amount of water needed to help meet the minimum flow but not in excess of 7.1 million gallons on any given day shall be diverted from the TBC middle pool to the Hillsborough River, and any water in the TBC middle and lower pools above elevations 12.0 and 9.0 feet NGVD (1929 or its 1988 equivalent), respectively, shall be available for water supply.

(ii) Priority Source Two Diversions When the TBC Middle Pool is above 12.0 feet NGVD (1929 or its 1988 equivalent), and the Flow Over the District's Structure 162 is Less Than 11 cfs — On days when the TBC middle pool is above 12.0 feet NGVD (1929 or its 1988 equivalent), as measured by the downstream gauge at the District's Structure 161, and the flow over the District's Structure 162 is less than 11 cfs, the District shall divert water from the TBC middle pool to the Hillsborough River.

A. The District shall then deliver 75 percent of any water diverted from the TBC middle pool to the Hillsborough River under this provision to the Lower Hillsborough River. Delivery of 75 percent of the water diverted from the TBC addresses concerns about potential losses due to subsurface leakage, evaporation and transpiration. This delivery shall be from the Hillsborough River just above the City's dam to immediately below the City's dam, and shall supplement

diversions from Sulphur Springs, Blue Sink and Morris Bridge Sink, as they are implemented, and as described in subparagraphs 40D-80.073(4)(b)1., 3., 6. and 8., F.A.C.

B. The TBC middle pool diversions will be limited to the quantity needed to achieve the minimum flow requirements of the Lower Hillsborough River, but will not exceed 7.1 million gallons on any given day.

I. On days such diversions occur, the District will divert from the TBC lower pool to the TBC middle pool quantity equivalent to that diverted by the District from the TBC middle pool to the Hillsborough River.

II. Such diversions shall cease from both the TBC middle and lower pool when the stage of the TBC lower pool reaches 6.0 feet NGVD (1929 or its 1988 equivalent), as measured by the gauge at the District's Structure 160, or the elevation difference between the TBC middle and lower pools exceeds 7.0 feet.

C. Once the stage in the TBC lower pool is below 8.7 feet NGVD (1929 or its 1988 equivalent), withdrawals from this priority source to help meet the minimum flow for the lower Hillsborough River are considered withdrawals from the storage of the TBC lower pool. When the stage in the TBC lower pool is below 8.7 feet NGVD (1929 or its 1988 equivalent), the following restrictions apply:

I. At no time shall withdrawals from the lower pool to help meet the minimum flow for the lower Hillsborough River cause the stage in the lower pool to go below 6.0 feet NGVD (1929 or its 1988 equivalent), or cause the elevation difference between the TBC middle and lower pools to exceed 7.0 feet, as measured on either side of the District's Structure 162.

II. If supplemental flows are required to help meet the lower Hillsborough River minimum flow from this Priority Source, once withdrawals begin from storage they will continue until the TBC lower pool reaches an elevation of 6.0 feet NGVD (1929 or its 1988 equivalent). At such time as either of the conditions set forth in sub paragraph 40D-80.073(4)(b)2.(ii)C.I., F.A.C., above, are met, the District shall cease withdrawals from the TBC lower pool. The District shall only reinstate withdrawals from the TBC lower pool when its elevation equals or exceeds 9.0 feet NGVD (1929 or its 1988 equivalent), for 20 consecutive days, which is defined as the TBC lower pool replenishment.

III. The total withdrawn from storage on any given day shall not exceed 7.1 million gallons on any given day.

IV. Withdrawals from storage will be limited to the quantity needed to help achieve the minimum flow requirements of the Lower Hillsborough River after utilizing the quantity diverted from all other sources, as they are implemented, and as described in paragraphs 40D-80.073(4)(b), (c) and (d), F.A.C.

(iii) Priority Source Three Diversions When TBC Middle Pool Elevations are Between 10.0 and 12.0 Feet NGVD (1929 or its 1988 equivalent) — The District will make

all reasonable efforts to obtain authorization from the United States Army Corps of Engineers to allow the withdrawals of up to 7.1 million gallons on any given day from the TBC middle pool to aid in the Lower Hillsborough River minimum flow requirements when the TBC middle pool is below 12.0 feet and above 10.0 feet NGVD (1929 or its 1988 equivalent):

A. These diversions will only occur when the stage of the TBC lower pool has reached 6.0 feet NGVD (1929 or its 1988 equivalent), or the TBC lower pool is in a state of replenishment as described in sub-subparagraph 40D-80.073(4)(b)2.(ii)C.II., F.A.C. These diversions will be limited to the quantity needed to help achieve the minimum flow requirements of the Lower Hillsborough River after utilizing the quantity diverted from all other sources, as they are implemented, and as described in paragraphs 40D-80.073(4)(b), (c) and (d), F.A.C., but will not exceed 7.1 million gallons on any given day.

B. These diversions shall cease if the elevation difference between the Hillsborough River and TBC middle pool exceeds 9.5 feet, if approved by the United States Army Corps of Engineers, as measured on either side of the District's Structure 161, or if the elevation difference between the TBC middle and lower pools exceeds 7.0 feet, as measured on either side of the District's Structure 162.

C. Diversions associated with this provision will not occur until the water transmission pipeline as set forth in subparagraph 40D-80.073(4)(b)7., F.A.C., is completed or by October 1, 2013, whichever is sooner. Once the stage in the TBC middle pool is below 12.0 feet NGVD (1929 or its 1988 equivalent), withdrawals to help meet the minimum flow for the Lower Hillsborough River are considered withdrawals from the storage of the TBC middle pool. When the stage is below 12.0 feet NGVD (1929 or its 1988 equivalent), the following restrictions apply:

I. At no time shall withdrawals from the TBC middle pool to help meet the minimum flow for the Lower Hillsborough River cause the stage in the middle pool to go below 10.0 feet NGVD (1929 or 1988 equivalent), or cause the elevation difference between the TBC middle pool and Hillsborough River to exceed 9.5 feet, as measured on either side of the District's Structure 161, or cause the elevation difference between the TBC middle and lower pools to exceed 7.0 feet, as measured on either side of the District's Structure 162.

II. If supplemental flows are required to help meet the Lower Hillsborough River minimum flow from this Priority Source, once withdrawals begin from storage they will continue until the TBC middle pool reaches an elevation of 10.0 feet NGVD (1929 or its 1988 equivalent). At such time as either of the conditions set forth in sub-subparagraph 40D-80.073(4)(b)2.c.(iii)C.I., F.A.C., above, are met, the District shall cease withdrawals from the TBC middle pool. The District shall only reinitiate withdrawals from the TBC middle pool when its elevation equals or exceeds 12.0 feet

NGVD (1929 or its 1988 equivalent), for 20 consecutive days, which is defined as the TBC Pool Replenishment, and there is less than 11 cfs of flow over the District's Structure 162.

III. The total withdrawn from storage on any one day shall not exceed 7.1 million gallons.

IV. Withdrawals from storage will be limited to the quantity needed to help achieve the minimum flow requirements of the Lower Hillsborough River after utilizing the quantity diverted from all other sources, as they are implemented, and as described in paragraphs 40D-80.073(4)(b), (c) and (d), F.A.C.

3. Sulphur Springs Project.

a. By October 1, 2009, and as specified in the Agreement, the City shall complete the modification of the lower weir to provide to the base of the dam all available flow from Sulphur Springs not needed to maintain the minimum flow for manatees as set forth in paragraph 40D-8.041(2)(b), F.A.C.

b. By October 1, 2010, the City shall complete the construction of the upper gates and the pump station to provide to the base of the dam all available flow from Sulphur Springs not needed to maintain the minimum flow for manatees as set forth in paragraph 40D-8.041(2)(b), F.A.C.

c. By October 1, 2012, and as specified in the Agreement, the City is to provide to the base of the dam all available flow, from Sulphur Springs not needed to maintain the minimum flow for Sulphur Springs as set forth in paragraph 40D-8.041(2)(a), F.A.C.

(i) These diversions shall not exceed 11.6 million gallons on any given day.

(ii) The City is authorized to use any remaining quantities at Sulphur Springs for water supply purposes consistent with SWFWMD Water Use Permit No. 20002062.

d. Additionally, beginning on October 1, 2010, on days when the minimum flow requirements are being adjusted for the Lower Hillsborough River, as described in paragraph 40D-8.041(1)(b), F.A.C., and there is flow at Sulphur Springs in excess of the quantity needed to help meet the adjusted flow as described in paragraph 40D-8.041(1)(b), F.A.C., and the minimum flow requirements in paragraph 40D-8.041(2)(b), F.A.C., and the City is not using such flow to augment the Hillsborough River above the dam, the City shall move such quantity to the base of the City's dam up to the unadjusted quantities described in paragraph 40D-8.041(1)(b), F.A.C.

4. Blue Sink Analysis — By October 1, 2010, and as specified in the Agreement, the City in cooperation with the District shall complete a thorough cost/benefit analysis to divert all available flow from Blue Sink in north Tampa to a location to help meet the minimum flow or to the base of the City's dam.

5. Transmission Pipeline Evaluation — By October 1, 2010, and as specified in the Agreement, the City shall complete a thorough design development evaluation to construct a water

transmission pipeline from the TBC middle pool to the City's David L. Tippin Water Treatment Facility, including a spur to just below the City's dam.

6. Blue Sink Project — By October 1, 2011, and as specified in the Agreement, the City will provide all available flow from Blue Sink project to help meet the minimum flow provided that all required permits are approved, and it is determined that the project is feasible. Once developed, all water from this source shall be used to the extent that flow is available to help meet the minimum flow for the Lower Hillsborough River.

7. Transmission Pipeline Project — By October 1, 2013, and as specified in the Agreement, the City shall complete the water transmission pipeline described in subparagraph 40D-80.073(4)(b)5., F.A.C., and move the water the District will move as specified in subparagraphs 40D-80.073(4)(b)2. and 8., F.A.C., to the Lower Hillsborough River directly below the dam as needed to help meet the minimum flow or to transport water in accordance with SWFWMD Water Use Permit No. 20006675.

a. This transmission line will eliminate all adjustment for losses described in subparagraphs 40D-80.073(4)(b)2. and 8., F.A.C.

b. Additionally, the City will provide an additional flow of 1.9 million gallons each day to the base of the dam from the TBC middle pool provided that water is being transported in accordance with SWFWMD Water Use Permit No. 20006675. This additional 1.9 million gallons each day is anticipated to be part of the water savings associated with this transmission pipeline.

c. Once the pipeline is completed, the 1.9 million gallons each day of additional flow provided by the City as part of the water savings associated with the pipeline will be used in preference to all other sources except Sulphur Springs and Blue Sink to help meet the minimum flow for the Lower Hillsborough River.

d. In the event that this pipeline is not substantially completed by October 1, 2013, or that the City did not provide the District with a minimum ninety (90) days notice prior to October 1, 2013, of the delay of completion of the pipe due to circumstances beyond its control, then, the City will be responsible for delivering the flows the District was previously obligated to divert from the TBC middle pool to the Hillsborough River and then to immediately below the City's dam under subparagraphs 40D-80.073(4)(b)2. and 8., F.A.C.; except that the District shall continue to be responsible to pump water from the TBC lower pool to the middle pool as described in sub-subparagraph 40D-80.073(4)(b)2.b., F.A.C., and from Morris Bridge Sink to the TBC middle pool as described in subparagraph 40D-80.073(4)(b)8., F.A.C.

e. The City shall also provide the 1.9 million gallons each day if needed to help meet the flow described in this provision, from some other permitable source and is obligated to do so pursuant to d. above.

8. Morris Bridge Sink Project.

a. By October 1, 2012, or earlier, and upon completion of the project, provided that any permit that may be required is approved, the District shall divert up to 3.9 million gallons of water on any given day from the Morris Bridge Sink to the TBC middle pool.

(i) The Morris Bridge Sink diversions will be limited to the quantity needed to achieve the minimum flow requirements of the Lower Hillsborough River, after utilizing the quantity diverted from Sulphur Springs, Blue Sink and the 1.9 million gallons of water savings each day anticipated from the transmission pipeline, as they are implemented, and as described in subparagraphs 40D-80.073(4)(b)1., 3., 6. and 7., F.A.C.

(ii) However, on days when TBW does not draw the TBC lower pool down to 9.0 feet NGVD (1929 or its 1988 equivalent) for water supply purposes, and supplemental flow is needed for the Lower Hillsborough River minimum flow requirements beyond water that can be delivered from Sulphur Springs, Blue Sink and the 1.9 million gallons of water savings each day anticipated from the transmission pipeline described in subparagraphs 40D-80.073(4)(b)1., 3., 6. and 7., F.A.C., the District shall divert up to 7.1 million gallons on any given day from the TBC lower pool to the TBC middle pool prior to diverting flows from the Morris Bridge Sink to the TBC middle pool.

(iii) The District shall cease to divert water from the TBC lower pool under this provision once the elevation of the TBC lower pool reaches 9.0 feet NGVD (1929 or its 1988 equivalent).

b. Prior to the completion of the pipeline described in subparagraph 40D-80.073(4)(b)7., F.A.C., the District shall transfer any water delivered to the TBC middle pool from the Morris Bridge Sink or the TBC lower pool under this provision to the Hillsborough River near the District's Structure 161.

(i) These deliveries shall be made on the same day the District delivers water from the Morris Bridge Sink or the TBC lower pool.

(ii) The District shall then deliver 75 percent of any water diverted to the Hillsborough River under this provision to the Lower Hillsborough River. This delivery shall be from the Hillsborough River just above the City's dam to immediately below the City's dam.

(iii) The deliveries of the water from the Morris Bridge Sink to the TBC middle pool then on to the Hillsborough River are in addition to any other diversions from the TBC middle pool to the Hillsborough River described in subparagraphs 40D-80.073(4)(b)2. and 8., F.A.C.

e. Once the City completes the water transmission pipeline described in subparagraphs 40D-80.073(4)(b)5. and 7., F.A.C., or as may be otherwise responsible for delivering the flows the District was previously obligated to divert pursuant to subparagraph 40D-80.073(4)(b)7., F.A.C., the City shall move any water the District delivers to the TBC middle pool from Morris Bridge Sink or the TBC lower pool under this provision to the Lower Hillsborough River directly below the dam. Such delivery by the City will occur on the same day the District delivers the water from the Morris Bridge Sink or the TBC lower pool to the TBC middle pool.

d. At no time shall withdrawals from the TBC under this provision cause:

(i) The elevation difference between the TBC middle pool and Hillsborough River to exceed 9.5 feet as measured on either side of the District's Structure 161; or

(ii) The elevation difference between the TBC middle and lower pools to exceed 7.0 feet as measured on either side of the District's Structure 162.

9. Beginning October 1, 2017, the City shall be required to meet the minimum flows at the base of the dam as set forth in subsection 40D-8.041(1), F.A.C.

(e) The City and the District shall, as specified in the Agreement, cooperate in the evaluation of options for storage of water ("Storage Projects") such as aquifer storage and recovery (ASR), and additional source options (e.g., diversions from Morris Bridge Sink greater than those described in subparagraph 40D-80.073(4)(b)8., F.A.C.), in sufficient permitable quantities, that upon discharge to the base of the dam, together with the other sources of flow described in paragraph 40D-80.073(4)(b), F.A.C., will meet the minimum flows beginning October 1, 2017, or earlier.

(d) The City may propose for District approval additional source or storage projects that when completed may be used in lieu of all or part of one or more sources described in subparagraphs 40D-80.073(4)(b)2., 8., F.A.C.

(e) Any District sponsored project, which shall include evaluation of up to 3.9 million gallons per day of additional quantities other than those identified in subparagraph 40D-80.073(4)(b)8., F.A.C., from the Morris Bridge Sink, shall be implemented by the District no later than October 1, 2017, provided that it is deemed feasible by the District, to eliminate or reduce the need to divert water from the TBC middle and lower pool storage as described in subparagraph 40D-80.073(4)(b)2., F.A.C. Such projects shall be implemented only after receiving any required permits.

(f) Each spring, beginning in 2008, the District shall review the recovery strategy to assess the progress of implementation of the recovery strategy and report that progress to the Governing Board. This annual review and report shall include identification of the Storage Projects or other additional sources options that will be operational by October 1, 2017. If and when developed, Storage Projects or

other additional source options to supply supplemental flows to meet the minimum flow will be used in preference to removal of water from storage in either the middle or lower pools of the TBC as described in paragraph 40D-80.073(4)(b), F.A.C.

(g) The City and the District shall continue the existing monitoring and analysis of the water resources within the Lower Hillsborough River and the District shall provide this information to the Governing Board as part of the annual review and report described in paragraph (4)(d), above.

(h) In 2013, and for each five year period through 2023, the District shall evaluate the hydrology, dissolved oxygen, salinity, temperature, pH and biologic results achieved from implementation of the recovery strategy for the prior five years, including the duration, frequency and impacts of the adjusted minimum flow as described in paragraph 40D-8.041(1)(b), F.A.C. As part of the evaluation the District will assess the recording systems used to monitor these parameters. The District shall also monitor and evaluate the effect the Recovery Strategy is having on water levels in the Hillsborough River above the City's dam to at least Fletcher Avenue. The District will evaluate all projects described in this Recovery Strategy relative to their potential to cause unacceptable adverse impacts prior to their implementation.

(i) In conjunction with recovery of the Lower Hillsborough River and to enhance restoration of McKay Bay and Palm River estuary, the District intends to undertake a wetland restoration project adjacent to McKay Bay. The City agrees to contribute to the project by providing up to 7.1 million gallons on any given day of reclaimed water, as needed for the project. Within five years of completion of this wetland project, and for two subsequent five year periods thereafter, the District shall review the hydrologic, dissolved oxygen, salinity, temperature, pH and biologic results achieved from the implementation of the restoration project and other similar District projects that may occur.

(4)(5) Comprehensive Plan Recovery Strategy Elements Relating to Other Existing Water Use Permittees.

In conjunction with the development of a recovery strategy developed pursuant to Section 373.0421(2), F.S., and in addition to applicable permitting requirements contained in Rule 40D-2.301, F.A.C., existing permittees whose water withdrawals impact Minimum Flows or Levels will be evaluated upon permit renewal to determine the permittee's practical ability to implement measures to reduce its impacts on the Flow or Level or unacceptably adversely impacted environmental feature during the period of recovery. For purposes of this Chapter, in areas where the existing flow or level is below the Minimum Flow or Level, any measurable drawdown or flow reduction at a location where a Minimum Flow or Level is established or to an unacceptably adversely impacted environmental feature is deemed to be a water

withdrawal impact. The items that shall be considered in determining the permittee's responsibility to implement measures to reduce impacts are:

(a) The proportionate amount of impact that the permittee's water withdrawals have on the Minimum Flow or Level or other unacceptably adverse impact;

(b) The cost to the permittee to implement the measures;

(c) The time that it will take the permittee to fully implement the measures;

(d) Any unavoidable public health, safety or welfare emergency that would be caused by implementation of the measures;

(e) Whether the water resources benefits gained from implementation of the permittee's measures to attain the Minimum Flow or Level or mitigate the unacceptably adversely impacted environmental feature outweigh water resources impacts that may result from the measures; and

(f) Alternative actions or programs in lieu of or in combination with reductions in withdrawals that will contribute to the attainment of the Minimum Flow or Level or mitigate the unacceptably adversely impacted environmental feature and will optimize the net positive effect on the impacted water resources.

~~(5)~~(6) Supplemental Hydration of Wetlands and Lakes.

In addition to the reduction of groundwater withdrawals pumpage, the development of new water supplies and wellfield operational changes addressed by the Comprehensive Plan recovery strategy, provisions, of this Rule 40D-80.073, supplemental hydration of wetlands and lakes that are unacceptably adversely impacted or are below their established Minimum Levels through the use of ground water in appropriate circumstances will contribute to the attainment of the objective of the Comprehensive Plan recovery strategy. The circumstances under which supplemental hydration using ground water will be considered an appropriate recovery mechanism are set forth in Section 4.3 A.1.a.ii.(4) and 4.3 A.1.b. of the Basis of Review For Water Use Permit Applications which is incorporated by reference in Rule 40D-2.091, F.A.C., and is available upon request to the District.

~~(6)~~(7) Applications for New Quantities.

Requests for withdrawals of new quantities of water that are projected to impact a water body which is unacceptably adversely impacted or below its Minimum Flow or Level shall not be approved unless they contribute to the attainment of the objective set forth in the Comprehensive Plan recovery strategy in subsection Rule 40D-80.073(1), F.A.C.

~~(7)~~(8) 2020 2010 Evaluation of the Comprehensive Plan Recovery Strategy.

The District shall review the information available during 2020 to determine whether it is sufficient to fully assess remaining impacts from Tampa Bay Water's Central System Facilities at a withdrawal rate of 90 MGD on a 12-month moving average

basis. This information will be considered when developing a strategy for the second renewal of the Consolidated Permit and a third phase of the Comprehensive Plan. Additionally, the District will determine whether the third phase of the Comprehensive Plan is necessary to address other permittees. This recovery strategy is in keeping with the District's legislative mandate pursuant to Sections 373.036, 373.0361, 373.0421, 373.0831, 373.1962 and 373.1963, F.S., to resolve the water supply and water resource impact concerns of the Northern Tampa Bay Area in a cooperative manner with the water suppliers and interested parties. The portion of the District's recovery strategy embodied within this Rule 40D-80.073, F.A.C., is the first regulatory phase of a long-term approach toward eventual attainment of the minimum flows and levels established in Chapter 40D-8, F.A.C., for priority waters in the Northern Tampa Bay Area. Except as to subsection 40D-80.073(4), F.A.C., this phase of the recovery strategy is through the year 2010 based on the current knowledge of the state of the water resources of the Area, the technology for water supply development including alternative sources and conservation and existing and future reasonable beneficial uses. In addition, it is possible that this phase will achieve recovery to the minimum flows and levels but it is impossible to determine whether this will occur given that it is unknown which recovery management mechanisms will be utilized by water use permittees. Except as to the Lower Hillsborough River, Sulphur Springs and the Tampa Bypass Canal, the District will evaluate the state of knowledge of these matters in 2010, including analysis of all information and reports submitted pursuant to Rule 40D-80.073(3)(c), F.A.C., data collected and analyzed and relationships determined pursuant to subsection 40D-8.011(5), F.A.C., regarding the minimum flows and levels for the priority waters in the area (The "MFLs") and the Central System Facilities. Based on that analysis and evaluation, on or before December 31, 2010, except as to the Lower Hillsborough River, Sulphur Springs and the Tampa Bypass Canal, the District shall initiate rulemaking to 1) revise the MFLs (the "New MFLs"), as necessary; 2) adopt rules to implement the existing or the New MFLs (The "Implementation Rules"); and 3) revise this Rule 40D-80.073, F.A.C., to incorporate a second phase to this Recovery Strategy ("Recovery Strategy Rules"), as necessary, consistent with Subsection 373.0421(2), F.S. In the event that the District determines that it is not necessary to initiate rulemaking to adopt New MFLs, and a substantially affected person is granted an administrative hearing to challenge the Implementation Rules or the Recovery Strategy Rules, and the MFL Rules, the District will not object to a motion to consolidate the hearings.

~~(8)~~ Hillsborough River Strategy.

Beginning November 25, 2007, the Minimum Flow for the Lower Hillsborough River shall be as provided in subsection 40D-8.041(1), F.A.C., to be achieved on the time schedule as set forth below. The District and the City of Tampa (City) shall

measure the delivery of water to the base of the dam relative to their respective elements as described below. The City shall report this information to the District monthly on the 15th day of the following month. In addition, the City shall submit a quarterly written report of all activities and all progress towards timely completion of its elements of the recovery strategy. Such reports will be submitted to the District within 15 calendar days after each calendar year quarter.

(a) The District and the City have entered into the Joint Funding Agreement Between The Southwest Florida Water Management District and The City of Tampa For Implementation of Recovery Projects To Meet Minimum Flows Of The Lower Hillsborough River (the "Agreement"). The Agreement and subsection 40D-80.073(8), F.A.C., constitute the District's recovery strategy for the Lower Hillsborough River required by Section 373.0421(2), F.S., and shall not compromise public health, safety and welfare.

(b) The schedule to achieve the Minimum Flows for the Lower Hillsborough River is as follows:

1. Sulphur Springs – Beginning on November 25, 2007, the City shall be required to provide 10 cubic feet per second (cfs) of water to the base of the City's dam each day-provided such use will not compromise public health, safety and welfare.

2. Tampa Bypass Canal Diversions – By January 1, 2008, provided that any permit that may be required is approved, the District shall divert up to 7.1 million gallons of water on any given day from the District's Tampa Bypass Canal ("TBC") to the Hillsborough River at the District's Structure 161. The District shall then deliver water from the Hillsborough River immediately above the City's dam to the base of the City's dam to help meet the minimum flow requirements of the Lower Hillsborough River. Such diversions shall not occur if public health, safety and welfare will be compromised.

a. The District shall complete a comprehensive analysis of these diversions within 90 days of the first year of operation to identify and subsequently make any mechanical or efficiency adjustments that may be necessary. The District shall use its best efforts to expedite obtaining any permit that may be needed to undertake these actions.

b. By October 1, 2013, provided that the transmission pipeline has been constructed and is operational, all of the water diverted from the TBC middle pool under this provision to help meet the minimum flow shall be provided to the Lower Hillsborough River per subparagraph 40D-80.073(8)(b)7., F.A.C.

c. These diversions shall be prioritized as follows:

(i) Priority Source One – Diversions From the TBC Middle Pool When the TBC Middle Pool is Above 12.0 feet NGVD (1929 or its 1988 equivalent), and There is Flow of at Least 11 cfs Over the District's Structure 162 – On days when the TBC middle pool is above 12.0 feet NGVD (1929 or its 1988 equivalent), as measured by the downstream gauge at the

District's Structure 161, and there is flow of at least 11 cfs over the District's Structure 162, the District shall divert water from the TBC middle pool to the Hillsborough River.

A. The District shall then deliver 75 percent of any water diverted from the TBC to the Hillsborough River under this provision to the Lower Hillsborough River. Delivery of 75 percent of the water diverted from the TBC addresses concerns about potential losses due to subsurface leakage, evaporation and transpiration. This delivery shall be from the Hillsborough River just above the City's dam to the base of the City's dam, and shall supplement diversions from Sulphur Springs, Blue Sink and Morris Bridge Sink, as they are implemented, and as described in subparagraphs 40D-80.073(8)(b)1., 3., 6. and 8., F.A.C.

B. The TBC middle pool diversions will be limited to the quantity needed to achieve the minimum flow requirements of the Lower Hillsborough River set forth in subsection 40D-8.041(1), F.A.C., but will not exceed 7.1 million gallons on any given day.

C. Such diversions shall cease from the TBC middle pool if the elevation difference between the TBC middle and lower pools exceeds 7.0 feet.

D. On days when flow over the Hillsborough River Dam naturally exceeds 20 cfs during the months of July through March or 24 cfs during the months of April through June and when diversions from the TBC middle pool are not needed to replenish the supply from Storage Projects described in paragraphs 40D-80.073(8)(c) and (d), F.A.C., diversions from the TBC middle pool shall not occur, and any flows in the TBC lower pool above elevation 9.0 feet NGVD (1929 or its 1988 equivalent), shall be available for water supply.

E. Prior to October 1, 2013, and during the months of March through June, on days when some water is needed from the TBC middle pool to help meet the minimum flow for the Lower Hillsborough River, all available water from the TBC middle pool not needed to be diverted in accordance with SWFWMD Water Use Permit No. 20006675 but not exceeding 7.1 million gallons on any given day will be diverted to the Hillsborough River. Water delivered to the Hillsborough River in excess of that needed to help meet the minimum flow of the Lower Hillsborough River shall remain in the Hillsborough River above the dam. Keeping this water in the Hillsborough River above the dam will reduce the time and quantities of supplemental flow needed to help meet the minimum flow requirements.

F. During the months of July through February, on days when water is needed from the TBC middle pool to help meet the minimum flow of the Lower Hillsborough River, only that amount of water needed to help meet the minimum flow but not in excess of 7.1 million gallons on any given day shall be diverted from the TBC middle pool to the Hillsborough River.

and any water in the TBC middle and lower pools above elevations 12.0 and 9.0 feet NGVD (1929 or its 1988 equivalent), respectively, shall be available for water supply.

(ii) Priority Source Two – Diversions When the TBC Middle Pool is above 12.0 feet NGVD (1929 or its 1988 equivalent), and the Flow Over the District's Structure 162 is Less Than 11 cfs – On days when the TBC middle pool is above 12.0 feet NGVD (1929 or its 1988 equivalent), as measured by the downstream gauge at the District's Structure 161, and the flow over the District's Structure 162 is less than 11 cfs, the District shall divert water from the TBC middle pool to the Hillsborough River.

A. The District shall then deliver 75 percent of any water diverted from the TBC middle pool to the Hillsborough River under this provision to the Lower Hillsborough River. Delivery of 75 percent of the water diverted from the TBC addresses concerns about potential losses due to subsurface leakage, evaporation and transpiration. This delivery shall be from the Hillsborough River just above the City's dam to immediately below the City's dam, and shall supplement diversions from Sulphur Springs, Blue Sink and Morris Bridge Sink, as they are implemented, and as described in subparagraphs 40D-80.073(8)(b)1., 3., 6. and 8., F.A.C.

B. The TBC middle pool diversions will be limited to the quantity needed to achieve the minimum flow requirements of the Lower Hillsborough River, but will not exceed 7.1 million gallons on any given day.

I. On days such diversions occur, the District will divert from the TBC lower pool to the TBC middle pool quantity equivalent to that diverted by the District from the TBC middle pool to the Hillsborough River.

II. Such diversions shall cease from both the TBC middle and lower pool when the stage of the TBC lower pool reaches 6.0 feet NGVD (1929 or its 1988 equivalent), as measured by the gauge at the District's Structure 160, or the elevation difference between the TBC middle and lower pools exceeds 7.0 feet.

C. Once the stage in the TBC lower pool is below 8.7 feet NGVD (1929 or its 1988 equivalent), withdrawals from this priority source to help meet the minimum flow for the lower Hillsborough River are considered withdrawals from the storage of the TBC lower pool. When the stage in the TBC lower pool is below 8.7 feet NGVD (1929 or its 1988 equivalent), the following restrictions apply:

I. At no time shall withdrawals from the lower pool to help meet the minimum flow for the lower Hillsborough River cause the stage in the lower pool to go below 6.0 feet NGVD (1929 or its 1988 equivalent), or cause the elevation difference between the TBC middle and lower pools to exceed 7.0 feet, as measured on either side of the District's Structure 162.

II. If supplemental flows are required to help meet the lower Hillsborough River minimum flow from this Priority Source, once withdrawals begin from storage they will

continue until the TBC lower pool reaches an elevation of 6.0 feet NGVD (1929 or its 1988 equivalent). At such time as either of the conditions set forth in sub-subparagraph 40D-80.073(8)(b)2.(ii)C.I., F.A.C., above, are met, the District shall cease withdrawals from the TBC lower pool. The District shall only reinitiate withdrawals from the TBC lower pool when its elevation equals or exceeds 9.0 feet NGVD (1929 or its 1988 equivalent), for 20 consecutive days, which is defined as the TBC lower pool replenishment.

III. The total withdrawn from storage on any given day shall not exceed 7.1 million gallons on any given day.

IV. Withdrawals from storage will be limited to the quantity needed to help achieve the minimum flow requirements of the Lower Hillsborough River after utilizing the quantity diverted from all other sources, as they are implemented, and as described in paragraphs 40D-80.073(8)(b), (c) and (d), F.A.C.

(iii) Priority Source Three – Diversions When TBC Middle Pool Elevations are Between 10.0 and 12.0 Feet NGVD (1929 or its 1988 equivalent) – The District will make all reasonable efforts to obtain authorization from the United States Army Corps of Engineers to allow the withdrawals of up to 7.1 million gallons on any given day from the TBC middle pool to aid in the Lower Hillsborough River minimum flow requirements when the TBC middle pool is below 12.0 feet and above 10.0 feet NGVD (1929 or its 1988 equivalent).

A. These diversions will only occur when the stage of the TBC lower pool has reached 6.0 feet NGVD (1929 or its 1988 equivalent), or the TBC lower pool is in a state of replenishment as described in sub-subparagraph 40D-80.073(8)(b)2.(ii)C.II., F.A.C. These diversions will be limited to the quantity needed to help achieve the minimum flow requirements of the Lower Hillsborough River after utilizing the quantity diverted from all other sources, as they are implemented, and as described in paragraphs 40D-80.073(8)(b), (c) and (d), F.A.C., but will not exceed 7.1 million gallons on any given day.

B. These diversions shall cease if the elevation difference between the Hillsborough River and TBC middle pool exceeds 9.5 feet, if approved by the United States Army Corps of Engineers, as measured on either side of the District's Structure 161, or if the elevation difference between the TBC middle and lower pools exceeds 7.0 feet, as measured on either side of the District's Structure 162.

C. Diversions associated with this provision will not occur until the water transmission pipeline as set forth in subparagraph 40D-80.073(8)(b)7., F.A.C., is completed or by October 1, 2013, whichever is sooner. Once the stage in the TBC middle pool is below 12.0 feet NGVD (1929 or its 1988 equivalent), withdrawals to help meet the minimum flow for the Lower Hillsborough River are considered withdrawals

from the storage of the TBC middle pool. When the stage is below 12.0 feet NGVD (1929 or its 1988 equivalent), the following restrictions apply:

I. At no time shall withdrawals from the TBC middle pool to help meet the minimum flow for the Lower Hillsborough River cause the stage in the middle pool to go below 10.0 feet NGVD (1929 or 1988 equivalent), or cause the elevation difference between the TBC middle pool and Hillsborough River to exceed 9.5 feet, as measured on either side of the District's Structure 161, or cause the elevation difference between the TBC middle and lower pools to exceed 7.0 feet, as measured on either side of the District's Structure 162.

II. If supplemental flows are required to help meet the Lower Hillsborough River minimum flow from this Priority Source, once withdrawals begin from storage they will continue until the TBC middle pool reaches an elevation of 10.0 feet NGVD (1929 or its 1988 equivalent). At such time as either of the conditions set forth in sub-subparagraph 40D-80.073(8)(b)2.c.(iii)C.I., F.A.C., above, are met, the District shall cease withdrawals from the TBC middle pool. The District shall only reinitiate withdrawals from the TBC middle pool when its elevation equals or exceeds 12.0 feet NGVD (1929 or its 1988 equivalent), for 20 consecutive days, which is defined as the TBC Pool Replenishment, and there is less than 11 cfs of flow over the District's Structure 162.

III. The total withdrawn from storage on any one day shall not exceed 7.1 million gallons.

IV. Withdrawals from storage will be limited to the quantity needed to help achieve the minimum flow requirements of the Lower Hillsborough River after utilizing the quantity diverted from all other sources, as they are implemented, and as described in paragraphs 40D-80.073(8)(b), (c) and (d), F.A.C.

3. Sulphur Springs Project.

a. By October 1, 2009, and as specified in the Agreement, the City shall complete the modification of the lower weir to provide to the base of the dam all available flow from Sulphur Springs not needed to maintain the minimum flow for manatees as set forth in paragraph 40D-8.041(2)(b), F.A.C.

b. By October 1, 2010, the City shall complete the construction of the upper gates and the pump station to provide to the base of the dam all available flow from Sulphur Springs not needed to maintain the minimum flow for manatees as set forth in paragraph 40D-8.041(2)(b), F.A.C.

c. By October 1, 2012, and as specified in the Agreement, the City is to provide to the base of the dam all available flow from Sulphur Springs not needed to maintain the minimum flow for Sulphur Springs as set forth in paragraph 40D-8.041(2)(a), F.A.C.

(i) These diversions shall not exceed 11.6 million gallons on any given day.

(ii) The City is authorized to use any remaining quantities at Sulphur Springs for water supply purposes consistent with SWFWMD Water Use Permit No. 20002062.

d. Additionally, beginning on October 1, 2010, on days when the minimum flow requirements are being adjusted for the Lower Hillsborough River, as described in paragraph 40D-8.041(1)(b), F.A.C., and there is flow at Sulphur Springs in excess of the quantity needed to help meet the adjusted flow as described in paragraph 40D-8.041(1)(b), F.A.C., and the minimum flow requirements in paragraph 40D-8041(2)(b), F.A.C., and the City is not using such flow to augment the Hillsborough River above the dam, the City shall move such quantity to the base of the City's dam up to the unadjusted quantities described in paragraph 40D-8.041(1)(b), F.A.C.

4. Blue Sink Analysis – By October 1, 2010, and as specified in the Agreement, the City in cooperation with the District shall complete a thorough cost/benefit analysis to divert all available flow from Blue Sink in north Tampa to a location to help meet the minimum flow or to the base of the City's dam.

5. Transmission Pipeline Evaluation – By October 1, 2010, and as specified in the Agreement, the City shall complete a thorough design development evaluation to construct a water transmission pipeline from the TBC middle pool to the City's David L. Tippin Water Treatment Facility, including a spur to just below the City's dam.

6. Blue Sink Project – By October 1, 2011, and as specified in the Agreement, the City will provide all available flow from Blue Sink project to help meet the minimum flow provided that all required permits are approved, and it is determined that the project is feasible. Once developed, all water from this source shall be used to the extent that flow is available to help meet the minimum flow for the Lower Hillsborough River.

7. Transmission Pipeline Project – By October 1, 2013, and as specified in the Agreement, the City shall complete the water transmission pipeline described in subparagraph 40D-80.073(8)(b)5., F.A.C., and move the water the District will move as specified in sub-paragraphs 40D-80.073(8)(b)2. and 8., F.A.C., to the Lower Hillsborough River directly below the dam as needed to help meet the minimum flow or to transport water in accordance with SWFWMD Water Use Permit No. 20006675.

a. This transmission line will eliminate all adjustment for losses described in subparagraphs 40D-80.073(8)(b)2. and 8., F.A.C.

b. Additionally, the City will provide an additional flow of 1.9 million gallons each day to the base of the dam from the TBC middle pool provided that water is being transported in accordance with SWFWMD Water Use Permit No. 20006675. This additional 1.9 million gallons each day is anticipated to be part of the water savings associated with this transmission pipeline.

c. Once the pipeline is completed, the 1.9 million gallons each day of additional flow provided by the City as part of the water savings associated with the pipeline will be used in

preference to all other sources except Sulphur Springs and Blue Sink to help meet the minimum flow for the Lower Hillsborough River.

d. In the event that this pipeline is not substantially completed by October 1, 2013, or that the City did not provide the District with a minimum ninety (90) days notice prior to October 1, 2013, of the delay of completion of the pipe due to circumstances beyond its control, then, the City will be responsible for delivering the flows the District was previously obligated to divert from the TBC middle pool to the Hillsborough River and then to immediately below the City's dam under subparagraphs 40D-80.073(8)(b)2. and 8., F.A.C.; except that the District shall continue to be responsible to pump water from the TBC lower pool to the middle pool as described in sub-subparagraph 40D-80.073(8)(b)2.b., F.A.C., and from Morris Bridge Sink to the TBC middle pool as described in subparagraph 40D-80.073(8)(b)8., F.A.C.

e. The City shall also provide the 1.9 million gallons each day if needed to help meet the flow described in this provision, from some other permissible source and is obligated to do so pursuant to d. above.

8. Morris Bridge Sink Project.

a. By October 1, 2012, or earlier, and upon completion of the project, provided that any permit that may be required is approved, the District shall divert up to 3.9 million gallons of water on any given day from the Morris Bridge Sink to the TBC middle pool.

(i) The Morris Bridge Sink diversions will be limited to the quantity needed to achieve the minimum flow requirements of the Lower Hillsborough River, after utilizing the quantity diverted from Sulphur Springs, Blue Sink and the 1.9 million gallons of water savings each day anticipated from the transmission pipeline, as they are implemented, and as described in subparagraphs 40D-80.073(8)(b)1., 3., 6. and 7., F.A.C.

(ii) However, on days when TBW does not draw the TBC lower pool down to 9.0 feet NGVD (1929 or its 1988 equivalent) for water supply purposes, and supplemental flow is needed for the Lower Hillsborough River minimum flow requirements beyond water that can be delivered from Sulphur Springs, Blue Sink and the 1.9 million gallons of water savings each day anticipated from the transmission pipeline described in subparagraphs 40D-80.073(8)(b)1., 3., 6. and 7., F.A.C., the District shall divert up to 7.1 million gallons on any given day from the TBC lower pool to the TBC middle pool prior to diverting flows from the Morris Bridge Sink to the TBC middle pool.

(iii) The District shall cease to divert water from the TBC lower pool under this provision once the elevation of the TBC lower pool reaches 9.0 feet NGVD (1929 or its 1988 equivalent).

b. Prior to the completion of the pipeline described in subparagraph 40D-80.073(8)(b)7., F.A.C., the District shall transfer any water delivered to the TBC middle pool from the Morris Bridge Sink or the TBC lower pool under this provision to the Hillsborough River near the District's Structure 161.

(i) These deliveries shall be made on the same day the District delivers water from the Morris Bridge Sink or the TBC lower pool.

(ii) The District shall then deliver 75 percent of any water diverted to the Hillsborough River under this provision to the Lower Hillsborough River. This delivery shall be from the Hillsborough River just above the City's dam to immediately below the City's dam.

(iii) The deliveries of the water from the Morris Bridge Sink to the TBC middle pool then on to the Hillsborough River are in addition to any other diversions from the TBC middle pool to the Hillsborough River described in subparagraphs 40D-80.073(8)(b)2. and 8., F.A.C.

c. Once the City completes the water transmission pipeline described in subparagraphs 40D-80.073(8)(b)5. and 7., F.A.C., or as may be otherwise responsible for delivering the flows the District was previously obligated to divert pursuant to subparagraph 40D-80.073(8)(b)7., F.A.C., the City shall move any water the District delivers to the TBC middle pool from Morris Bridge Sink or the TBC lower pool under this provision to the Lower Hillsborough River directly below the dam. Such delivery by the City will occur on the same day the District delivers the water from the Morris Bridge Sink or the TBC lower pool to the TBC middle pool.

d. At no time shall withdrawals from the TBC under this provision cause:

(i) The elevation difference between the TBC middle pool and Hillsborough River to exceed 9.5 feet as measured on either side of the District's Structure 161; or

(ii) The elevation difference between the TBC middle and lower pools to exceed 7.0 feet as measured on either side of the District's Structure 162.

9. Beginning October 1, 2017, the City shall be required to meet the minimum flows at the base of the dam as set forth in subsection 40D-8.041(1), F.A.C.

(c) The City and the District shall, as specified in the Agreement, cooperate in the evaluation of options for storage of water ("Storage Projects") such as aquifer storage and recovery (ASR), and additional source options (e.g., diversions from Morris Bridge Sink greater than those described in subparagraph 40D-80.073(8)(b)8., F.A.C.), in sufficient permissible quantities, that upon discharge to the base of the dam, together with the other sources of flow described in paragraph 40D-80.073(8)(b), F.A.C., will meet the minimum flows beginning October 1, 2017, or earlier.

(d) The City may propose for District approval additional source or storage projects that when completed may be used in lieu of all or part of one or more sources described in subparagraphs 40D-80.073(8)(b)2.-8., F.A.C.

(e) Any District sponsored project, which shall include evaluation of up to 3.9 million gallons per day of additional quantities other than those identified in subparagraph 40D-80.073(8)(b)8., F.A.C., from the Morris Bridge Sink, shall be implemented by the District no later than October 1, 2017, provided that it is deemed feasible by the District, to eliminate or reduce the need to divert water from the TBC middle and lower pool storage as described in subparagraph 40D-80.073(8)(b)2., F.A.C. Such projects shall be implemented only after receiving any required permits.

(f) Each spring, beginning in 2008, the District shall review the recovery strategy to assess the progress of implementation of the recovery strategy and report that progress to the Governing Board. This annual review and report shall include identification of the Storage Projects or other additional sources options that will be operational by October 1, 2017. If and when developed, Storage Projects or other additional source options to supply supplemental flows to meet the minimum flow will be used in preference to removal of water from storage in either the middle or lower pools of the TBC as described in paragraph 40D-80.073(8)(b), F.A.C.

(g) The City and the District shall continue the existing monitoring and analysis of the water resources within the Lower Hillsborough River and the District shall provide this information to the Governing Board as part of the annual review and report described in paragraph (8)(d), above.

(h) In 2013, and for each five year period through 2023, the District shall evaluate the hydrology, dissolved oxygen, salinity, temperature, pH and biologic results achieved from implementation of the recovery strategy for the prior five years, including the duration, frequency and impacts of the adjusted minimum flow as described in paragraph 40D-8.041(1)(b), F.A.C. As part of the evaluation the District will assess the recording systems used to monitor these parameters. The District shall also monitor and evaluate the

effect the Recovery Strategy is having on water levels in the Hillsborough River above the City's dam to at least Fletcher Avenue. The District will evaluate all projects described in this Recovery Strategy relative to their potential to cause unacceptable adverse impacts prior to their implementation.

(i) In conjunction with recovery of the Lower Hillsborough River and to enhance restoration of McKay Bay and Palm River estuary, the District intends to undertake a wetland restoration project adjacent to McKay Bay. The City agrees to contribute to the project by providing up to 7.1 million gallons on any given day of reclaimed water, as needed for the project. Within five years of completion of this wetland project, and for two subsequent five year periods thereafter, the District shall review the hydrologic, dissolved oxygen, salinity, temperature, pH and biologic results achieved from the implementation of the restoration project and other similar District projects that may occur.

(Substantial Rewording of Rule 61J2-24.001 follows. See Florida Administrative Code for present text.)

61J2-24.001 Disciplinary Guidelines.

(1) Pursuant to Section 455.2273, F.S., the Commission sets forth below a range of disciplinary guidelines from which disciplinary penalties will be imposed upon licensees guilty of

violating Chapter 455 or 475, F.S. The purpose of the disciplinary guidelines is to give notice to licensees of the range of penalties which normally will be imposed for each count during a formal or an informal hearing. For purposes of this rule, the order of penalties, ranging from lowest to highest, is: reprimand, fine, probation, suspension, and revocation or denial. Pursuant to Section 475.25(1), F.S., combinations of these penalties are permissible by law. Nothing in this rule shall preclude any discipline imposed upon a licensee pursuant to a stipulation or settlement agreement, nor shall the range of penalties set forth in this rule preclude the Probable Cause Panel from issuing a letter of guidance.

(2) As provided in Section 475.25(1), F.S., the Commission may, in addition to other disciplinary penalties, place a licensee on probation. The placement of the licensee on probation shall be for such a period of time and subject to such conditions as the Commission may specify. Standard probationary conditions may include, but are not limited to, requiring the licensee: to attend pre-licensure courses; to satisfactorily complete a pre-licensure course; to attend post-licensure courses; to satisfactorily complete a post-licensure course; to attend continuing education courses; to submit to and successfully complete the state-administered examination; to be subject to periodic inspections and interviews by a DBPR investigator; if a broker, to place the license on a broker associate status; or, if a broker, to file escrow account status reports with the Commission or with a DBPR investigator at such intervals as may be prescribed.

(3) The penalties are as listed unless aggravating or mitigating circumstances apply pursuant to subsection (4). The verbal identification of offenses is descriptive only; the full language of each statutory provision cited must be consulted in order to determine the conduct included.

62-213.205 Annual Emissions Fee.

Each Title V source permitted to operate in this state must pay between January 15 and March 1 of each year, upon written notice as provided in the Title V permit, an annual emissions fee in an amount determined as set forth in subsection 62-213.205(1), F.A.C.

(1) Emissions Fee Calculation and Payment. Each Title V source must calculate the annual fee, based upon the source's previous year's emissions, by multiplying the applicable annual emissions fee factor times the tons of each regulated air pollutant (except carbon monoxide) allowed to be emitted per hour by specific condition of the source's most recent certification, construction permit or operation permit, times the annual hours of operation allowed by specific condition; provided, however, that:

(a) through (d) No change.

(e) For any Title V source that emits less of any regulated air pollutant than allowed by specific condition, the annual fee calculation for such pollutant may, at a responsible official's option, be based upon emissions determined as follows:

1. The Department will accept, for fee purposes, emissions determined by means of data from a certified continuous emissions monitor which, for other than an acid rain source; ~~or CAIR source, or Hg Budget source,~~ meets the certification and quality assurance requirements of Appendices B and F of 40 C.F.R. Part 60, or for an acid rain source; ~~or CAIR source, or Hg Budget source,~~ meets the certification and quality assurance requirements of 40 C.F.R. Part 75, which are adopted and incorporated by reference in Rule 62-204.800, F.A.C. Stack gas volumetric flow rates will be determined using, if available at the source, calibrated flowmeters with recorders that record data on a continuous basis. In the absence of a flowmeter, flow rates will be determined by the average flow rate for the three most recent stack tests that were conducted at 90 percent to 100 percent of the maximum allowable operating rate for the unit. If three such stack tests have not been conducted, the average of the latest two tests conducted at the 90 percent to 100 percent level will be used. If two or more such tests have not been conducted, the results of the latest test conducted at the 90 percent to 100 percent level shall be used. For purposes of this determination, a stack test shall consist of all test runs required under subsection 62-297.310(1), F.A.C. Flow rates as determined in this paragraph shall be used with continuous emission monitors to determine the mass emissions for fee purposes.

- 2. through 3. No change.
- (f) through (k) No change.
- (2) through (4) No change.

~~b. For a Hg Budget unit not covered by a Title V permit prior to May 1, 2008, a certified Hg Budget Part form shall be submitted to the Department prior to the unit commencing operation. The form shall be incorporated into the Title V permit upon issuance of an initial, revised, or renewal Title V permit, whichever comes first.~~

~~e. A Hg Budget Part form shall be submitted simultaneously with any Title V permit renewal application for a Hg Budget source:~~

- (b) Complete Application.
- 1. No change.

2. The application shall be deemed complete sixty days after receipt, unless the Department, within sixty days after receipt of a certified application for permit, permit revision or permit renewal, requests additional documentation or information needed to process the application. An applicant making timely and complete application for permit, or for permit renewal, shall continue to operate the source under the authority and provisions of any existing valid permit or Florida Electrical Power Plant Siting Certification, and in accordance with applicable requirements of the Acid Rain Program; and application requirements of the CAIR Program, and applicable requirements of the Hg Budget Trading Program, until the conclusion of proceedings associated with its permit application or until the new permit becomes effective, whichever is later, provided the applicant complies with all the provisions of subparagraphs 62-213.420(1)(b)3., F.A.C. 1. No permit revision shall be required for increases in emissions that are authorized by allowances acquired pursuant to the Federal Acid Rain Program; or the CAIR Program, ~~or the Hg Budget Trading Program~~, provided that such increases do not require a permit revision pursuant to Rule 62-213.400, F.A.C. Each CAIR Part incorporates every allocation, transfer, or deduction of a CAIR NO_x or CAIR NO_x ozone season allowance to or from the compliance account of the CAIR source covered by the permit, upon recording by the Administrator. ~~Each Hg Budget Part incorporates every allocation, transfer, or deduction of a Hg allowance to or from the compliance account of the Hg Budget source covered by the permit, upon recording by the Administrator.~~

THE PERSON TO BE CONTACTED REGARDING THE PROPOSED RULE IS: Susan Foster, Executive Director, Board of Dentistry, 4052 Bald Cypress Way, Bin #C08, Tallahassee, FL 32399-3258

THE FULL TEXT OF THE PROPOSED RULE IS:

64B5-4.002 Advertising and Soliciting by Dentists.

(1) As used in the rules of the Board, the terms “advertisement” and “advertising” shall mean any statements, oral or written, disseminated to or before the public or any portion thereof with the intent of furthering the purpose, either directly or indirectly, of selling professional services, or offering to perform professional services, or inducing members of the public to enter into any obligation relating to such professional services. The provisions of this rule shall apply to media exposure of any nature regardless of whether it is in the form of paid advertising.

(2) All advertising in any media must identify the Florida licensed dentist, who assumes total responsibility for the advertisement. The term “identify” shall mean the use of the license number of the dentist as it appears on his license and renewal certificate or the use of the licensee’s commonly used name together with the current address and telephone number the licensee has on file with the Department.

(3) No dentist shall disseminate or cause the dissemination of any advertisement or advertising which is in any way fraudulent, false, deceptive, or misleading in form or content. Additionally, no dentist shall disseminate or cause the dissemination of any advertisement or advertising which:

- (a) Contains misrepresentations of fact;
- (b) Is likely to mislead or deceive because in its context or in the context in which it is presented it makes only a partial disclosure of relevant facts;
- (c) Contains laudatory statements about the dentist or group of dentists;
- (d) Is intended or is likely to create false, unjustified expectations of favorable results;
- (e) Relates to the quality of dental services provided as compared to other available dental services;
- (f) Contains other representations or implications that in reasonable probability will cause an ordinary prudent person to misunderstand or to be deceived. For example, it is fraudulent, false, deceptive, and misleading for a dentist who utilizes the laser in his dental practice to advertise that the use of lasers is painless, heals faster, or provides better results than other dental procedures. However, a dentist may advertise that he treats patients with a laser in certain instances.

(g) Is intended or is likely to appeal primarily to a layperson’s fears.

(h) States or implies that the dentist has received formal recognition as a specialist in any aspect of the practice of dentistry, unless the dentist has in fact received such recognition and such recognizing agency is approved by the Board. However, a dentist may use on letterhead or advertising a reference to the dentist's specialty recognition received from a recognizing agency that has not been approved by the Board only if the letterhead or advertising also contains in the same print size or volume the statement that "The specialty recognition identified herein has been received from a private organization not affiliated with or recognized by the Florida Board of Dentistry." For purposes of this rule, the Board approves the dental specialty certifying agencies recognized by the American Dental Association and the Commission on Dental Accreditation as recognizing agencies, and such other recognizing agencies as may request and receive future approval by the Board.

(4) In person and telephone solicitation of dental services by a dentist or his agent poses an inherent danger to the public because such advertising cannot be supervised, may exert pressure, and often demands an immediate response without affording the recipient an opportunity for comparison or reflection. Unlike an advertisement appearing in print or on television or radio, in person and telephone solicitation does not simply provide information and leave the recipient free to act or not, but is ripe with the potential for overbearing persuasion. Accordingly, in person and telephone solicitation of dental services by a dentist or his agent is prohibited. The term "solicitation" as used in this rule does not include in person or telephone communication by a dentist or his or her agent with a patient or former patient for purposes of scheduling an appointment or offering follow-up care.

(5) Advertising which includes the name of a person who is not either actually involved in the practice of dentistry at the advertised location or an owner of the practice being advertised is not permitted. However, to facilitate the smooth transition of a practice after its sale from one licensee to another, it is permissible to identify the previous owner in advertising by the new owner for a reasonable period of time not to exceed a period of 2 years. This rule does not provide authority to use a previous owner's name in any advertising without first obtaining that licensee's written permission to do so.

(6) Any dentist who advertises by, through or with a referral service shall be held responsible for the content of such advertising and all such advertisements shall comply with this rule and contain the following:

(a) A statement that the advertisement is for a dental referral service and is in behalf of the dentist members of the referral service.

(b) A statement that the referral service refers only to those dentists who have paid or been otherwise selected for membership in the referral service.

(c) A statement that membership in the referral service is limited by the referral agency.

(d) A statement that dentists who receive referrals from the referral service charge no more than their usual and customary professional fees for service.

(e) These required statements shall be present in reasonably recognizable print or volume equivalent to the size or volume of other information in the advertisement.

(7) No licensee may use, or cause the use of the term "sleep dentistry" in any advertisement, unless the licensee possesses a valid general anesthesia permit issued by the Board of Dentistry pursuant to the requirement of subsection 64B5-14.003(1) and Rule 64B5-14.005, F.A.C.

RULE NO.: 60BB-2.025
 RULE TITLE: Reports Required of Liable Employers; Filing of Reports by Electronic Means

NOTICE OF CORRECTION

Notice is hereby given that the following correction has been made to the proposed rule in Vol. 35, No. 48, December 4, 2009 issue of the Florida Administrative Weekly.

The Summary of Statement of Estimated Regulatory Costs should say:

The agency has determined that this rule will have an impact on small business. A SERC has been prepared by the agency. The agency will upgrade a position to handle the additional workload created by the legislation. That upgrade will be federally funded, so rule changes will have no impact on agency costs. The Agency does not anticipate any direct or indirect additional cost to other state and local government entities as a result of the rule amendment. It is not expected that the proposed changes will result in any increase or decrease in the amount of wages subject to unemployment compensation taxes, and thus should have no impact on state or local revenues. The proposed rule changes increase the frequency of reporting from biannual to quarterly and amend the information that must be reported. Employee leasing companies with 30 or more client companies will be required to file the report electronically with the United States Bureau of Labor Statistics. The cost of submitting electronic reports will vary depending on the existing capabilities of each employee leasing company. The Agency believes that the following factors will impact costs: a) Whether an employee leasing company currently has the capability to file electronic reports; b) The cost to design, program, and test an electronic data system; c) The cost to contract out the services to a private vendor to develop the technical design, and perform the necessary programming and testing; and d) For those employee leasing companies that already use an outside vendor for reporting, the cost to develop a system to submit these reports. Employee leasing companies with less than 30 client companies may file the required report by submitting a completed paper form to the Agency. The U.S. Bureau of Labor Statistics estimates that it takes one hour to complete the form. This should result in minimal cost to those employee leasing companies that file paper reports. The proposed rule changes are not expected to impact municipalities or counties.

Any person who wishes to provide information regarding the statement of estimated regulatory costs, or to provide a proposal for a lower cost regulatory alternative must do so in writing within 21 days of this notice.

THE PERSON TO BE CONTACTED REGARDING THE PROPOSED RULE IS: Karen Bishop, Assistant General Counsel, Agency for Workforce Innovation, Office of General Counsel, 107 East Madison Street, MSC #110, Tallahassee, Florida 32399-4128, (850)245-7150

12DER09-15 Disclosure and Certification of Compliance; Filing of Documents Relating to Millage Levy Compliance Commencing 2009

SPECIFIC REASONS FOR FINDING AN IMMEDIATE DANGER TO THE PUBLIC HEALTH, SAFETY OR WELFARE: Chapter 2008-173 (Senate Bill 1588), Laws of Florida, authorized the Department of Revenue to adopt emergency rules that could remain in effect for 18 months and that could be renewed. These acts further provided that all conditions imposed by Chapter 120, Florida Statutes, were deemed to be met.

REASON FOR CONCLUDING THAT THE PROCEDURE IS FAIR UNDER THE CIRCUMSTANCES: The Legislature expressly authorized the Department of Revenue to adopt emergency rules that implement the provisions of and Chapter 2008-173 (Senate Bill 1588), Laws of Florida. The law provides that these emergency rules remain in effect for a period of 18 months and that they may be renewed. The forms included here are based on the requirements of Chapter 2008-173 (Senate Bill 1588), Laws of Florida, as passed by the Legislature, and will replace the forms used in previous years. The Department of Revenue has taken several actions to inform interested parties about the forms, procedures, and emergency rules that are being developed to implement this new law, and to give such parties an opportunity to review and comment. These interested parties include Property Appraisers and the professional associations that represent them, taxing authorities, including counties, municipalities, and independent districts, school districts, their associations, and practitioners who have told the Department that they want to receive all information associated with property tax rulemaking. The actions that the Department has taken include: making the proposed drafts available via the Internet for public review and comments, establishing a new Department email address to make it easier for interested parties to submit comments and questions to the agency; emailing copies of the draft forms to interested parties, as well as receiving and incorporating public comments on the drafts of forms.

SUMMARY: Chapter 2008-173 (Senate Bill 1588), Laws of Florida, authorized the Department of Revenue to adopt emergency rules that could remain in effect for 18 months and that could be renewed. The purpose of these emergency rules is to renew previous emergency rules on the same subject matter. These rules renew and replace emergency rules as listed, and these rules will remain in effect during the pendency of procedures to adopt rules addressing the subject matter of these emergency rules. Rule 12DER09-06 (Denials and Late Filed Applications for Transfer of Assessment Limitation Differential (Portability)) will replace Rule 12DER08-25. This rule provides the procedure and forms for applicant taxpayers

and property appraisers regarding denials and late applications of portability. Rule 12DER09-07 (Appeals to the Value Adjustment Board of Denials and of Amount of Transfer of Assessment Limitation Difference (Portability)) will replace Rule 12DER08-26. This rule provides for the applicable forms and the appeal process before the value adjustment board for denials for portability. Rule 12DER09-08 (Tax Collector Non-Ad Valorem Assessment Roll Reports) will replace Rule 12DER08-30. This rule provides assistance regarding certain actions to be taken by local governments and officials. Section 10 of Senate Bill 1588 (Chapter 2008-173, L.O.F.) states that Tax Collectors are required to report information concerning non-ad valorem assessments collected on the property tax bill to the Department of Revenue. This summary information on each non-ad valorem assessment must be provided by December 15th each year starting in 2008. This rule adopts and incorporates by reference Form DR-503NA, Tax Collector's Report on Non-Ad Valorem Assessments Collected on the Notice of Taxes (N. 12/08), to be used by tax collector for this report. Rule 12DER09-09 (Scope of Emergency Rules 12DER09-10 Through 12DER09-12; How to Obtain Forms) describes in detail the scope and application of emergency rules when implementing the provisions of Chapter 2008-173 (Senate Bill 1588), Laws of Florida. Emergency Rules 12DER09-10 through 12DER09-12 supersede any other existing rules of the Department that deal with the same or similar issues and should be read in conjunction with those source documents that created the laws, and not rely solely on these rules. Rule 12DER09-10 (Transfer of Assessment Limitation Difference; "Portability;" Sworn Statement Required) will replace Rule 12DER08-33. This rule sets forth the limitations and special rules to be observed and the forms to be used by applicant taxpayers and property appraisers for the transfer of assessment limitation difference, when a homestead is abandoned. Rule 12DER09-11 (Tangible Personal Property Exemption) will replace Rule 12DER08-34. This rule describes the procedure applicant taxpayers can use to apply for and receive this exemption, and the duties of the property appraiser when allocating exemptions and preparing the tax roll. Rule 12DER09-12 (Additional Homestead Exemption Pursuant to Section 196.031(1)(b), F.S.) will replace Rule 12DER08-35. This rule provides that no new application form will be necessary. The additional homestead exemption shall only apply to non-school levies, and the property appraiser shall have additional duties when documenting changes in the assessment roll. Rule 12DER09-13 (Reporting of Fiscal Data by Fiscally Constrained Counties to the Department of Revenue For Fiscal Year 2009-2010) will replace Rule 12DER09-02. This Rule provides assistance regarding certain actions to be taken by local governments and officials. Section 218.12, Florida Statutes, states each fiscally constrained county shall apply to the Department of Revenue to participate in the distribution of funds appropriated by the Legislature in the form and manner

prescribed by the Department by November 15 each year. This rule adopts and incorporates by reference Form DR-420FC, Distribution To Fiscally Constrained Counties Application (R. 09/09), to be used by counties that meet the fiscally constrained definition in Section 218.67(1), Florida Statutes. Rule 12DER09-14, (Forms for Use in the Truth in Millage and Maximum Millage Calculations Required by Section 200.065, Florida Statutes, and Chapter 2008-173 (Senate Bill 1588), Laws of Florida) will replace Rule 12DER09-03. This rule provides assistance regarding certain actions to be taken by local governments and officials. This rule adopts and incorporates by reference certain millage levy calculation forms to be used by each county, municipality, independent special district and their related dependent special districts, municipal service taxing units, and each local taxing authority. These forms are necessary to fully implement the requirements of Section 200.065(5), F.S., as created by Chapter 2008-173 L.O.F (Senate Bill 1588). Emergency Rule 12DER09-14 replaces Emergency Rules 12DER09-03, 12DER09-18 and 12DER08-27. Former Emergency Rule 12DER08-18 included Forms DR-420, DR-420TIF, DR-420VMA and DR-420MM-P. Former Emergency Rule 12DER08-27 included Forms DR-420MM, DR-420S, DR-422, DR-428A, DR-487 and DR-487V. New Forms DR-420DEBT and DR-422DEBT were created based on section 200.065, F.S., and will be used in place of Form DR-420VMA. Form DR-420VMA is replaced by Form DR-420DEBT, adopted in this rule. Form DR-428B replaces Form DR-428A from Emergency Rule 12DER08-27. Rule 12DER09-015 (Disclosure and Certification of Compliance; Filing of Documents Relating to Millage Levy Compliance Commencing 2009) replaces Rule 12DER09-05. This rule provides assistance regarding certain actions to be taken by local governments and officials. This rule explains the certification process as provided in Section 200.065(5), Florida Statutes, to county, municipality, independent special districts and their related dependent special districts, municipal service taxing units, and each local taxing authority for 2009 compliance. These requirements apply to all taxing jurisdictions, other than school districts.

THE PERSON TO BE CONTACTED REGARDING THE EMERGENCY RULE IS: Janice Forrester, Department of Revenue, Property Tax Technical Unit, 725 S. Calhoun Street, Tallahassee, Florida 32399-0100; telephone (850)922-7945; Fax (850)488-9482; email address: forrestj@dor.state.fl.us

THE FULL TEXT OF THE EMERGENCY RULE IS:

12DER09-06 Denials and Late Filed Applications for Transfer of Assessment Limitation Differential (Portability).

(1) Denials.

(a) If the taxpayer is not qualified for transfer of any assessment limitation differential, the property appraiser in the county in which the new homestead is located shall send Form DR-490PORT, (Notice of Denial of Transfer of Homestead

Assessment Difference; R. 08/09) which the Department of Revenue hereby adopts and incorporates in this rule by reference, by July 1, including the reasons for the denial. Such notice shall be sent on or before July 1. Form DR-490PORT can be obtained from the Department's website at <http://dor.myflorida.com/dor/property/codownloads.html>.

(b) Any property appraiser that has not received, from the previous property appraiser, information sufficient to identify the previous homestead and the amount of the assessment limitation difference which is transferable, and has sent a notice of denial on or before July 1 may, if information is received from the previous property appraiser and the applicant is qualified, grant the transfer of assessment increase differential and, if a petition was filed based on a timely application for transfer of homestead assessment difference, the value adjustment board shall refund the taxpayer the \$15.

(2) Late applications.

Any person who is qualified to have his or her property assessed under Section 193.155(8), Florida Statutes, and who fails to file an application by March 1 may file an application for assessment under that subsection and may, pursuant to Section 194.011(3), Florida Statutes, file a petition with the value adjustment board requesting that an assessment under Section 193.155(8), Florida Statutes, be granted. Such petition may be filed at any time during the taxable year on or before the 25th day following the mailing of the notice by the property appraiser as provided in Section 194.011(1), Florida Statutes. Notwithstanding Section 194.013, Florida Statutes, such person must pay a nonrefundable fee of \$15 upon filing the petition. Upon reviewing the petition, if the person is qualified to receive the assessment under Section 193.155(8), Florida Statutes, and demonstrates particular extenuating circumstances judged by the property appraiser or the value adjustment board to warrant granting the assessment, the property appraiser or the value adjustment board may grant an assessment under this subsection.

(3) This rule renews and replaces Rule 12DER08-25, and this rule will remain in effect during the pendency of procedures to adopt rules addressing the subject matter of this emergency rule.

Rulemaking Authority Section 13 of Chapter 2008-173, L.O.F. (Senate Bill 1588) Law Implemented 193.155, 194.011 FS., Section 14 of Chapter 2008-173, L.O.F. (Senate Bill 1588) History--New 12-17-09.

12DER09-07 Appeals to the Value Adjustment Board of Denials and of Amount of Transfer of Assessment Limitation Difference (Portability).

(1) Appeals.

(a) This rule applies to the review of denials of assessment limitation difference transfers or of the amount of an assessment limitation difference transfer. No adjustment to the just, assessed or taxable value of the previous homestead parcel may be made pursuant to an appeal under this rule.

(b) A taxpayer may file a petition with the value adjustment board, in the county where the new homestead is located, to petition either a denial of a transfer or the amount of the transfer, on Form DR-486PORT (Petition to the Value Adjustment Board, Transfer of Homestead Assessment Difference; R. 08/09), which the Department of Revenue hereby adopts and incorporates in this rule by reference. Form DR-486PORT can be obtained from the Department's website at <http://dor.myflorida.com/dor/property/codownloads.html>. Such petition must be filed within 25 days following the mailing of the notice of proposed property taxes as provided in Section 194.011, Florida Statutes. If only a part of a transfer of assessment increase differential is granted, the notice of proposed property taxes shall function as notice of the taxpayer's right to appeal to the value adjustment board.

(2) The applicant may appeal the decision of the property appraiser refusing to allow the transfer of an assessment difference to the value adjustment board, and the board shall review the application and evidence presented to the property appraiser upon which the applicant based the claim and shall hear the applicant in person or by agent on behalf of his or her right to such assessment. Such appeal shall be heard by an attorney special magistrate if the value adjustment board uses special magistrates. The value adjustment board shall reverse the decision of the property appraiser in the cause and grant assessment under this subsection to the applicant if, in its judgment, the applicant is entitled to be granted the assessment or shall affirm the decision of the property appraiser.

(3) This rule will apply to value adjustment board proceedings in a county in which the previous homestead is located. Any petitioner desiring to appeal the action of a property appraiser in a county in which the previous homestead is located must so designate on Form DR-486PORT.

(a) If the taxpayer does not agree with the amount of the assessment limitation difference for which the taxpayer qualifies as stated by the property appraiser in the county where the previous homestead property was located, or if the property appraiser in that county has not stated that the taxpayer qualifies to transfer any assessment limitation difference, upon the taxpayer filing a petition to the value adjustment board in the county where the new homestead property is located, the clerk of the value adjustment board in that county shall, upon receiving the appeal, send a notice using Form DR-486XCO, (Cross-County Notice of Appeal and Petition, Transfer of Homestead Assessment Difference; R. 08/09) which the Department of Revenue hereby adopts and incorporates in this rule by reference, to the clerk of the value adjustment board in the county where the previous homestead was located, which shall reconvene if it has already adjourned. Form DR-486XCO can be obtained from the Department's website at <http://dor.myflorida.com/dor/property/codownloads.html>.

(b) Such notice operates as a timely petition in, and creates an appeal to, the value adjustment board in the county where the previous homestead was located of all issues surrounding the previous assessment differential for the taxpayer involved. However, the taxpayer may not petition to have the just, assessed, or taxable value of the previous homestead changed.

(c) The value adjustment board in the county where the previous homestead was located shall set the petition for hearing and notify the taxpayer, the property appraiser in the county where the previous homestead was located, the property appraiser in the county where the new homestead is located, and the value adjustment board in that county, and shall hear the appeal.

(d) The clerk in the county in which the previous homestead was located must note the petition from the county in which the new homestead is located. No filing fee is required. The clerk shall notify each petitioner of the scheduled time of appearance. The notice shall be in writing and delivered by regular or certified U.S. mail or personal delivery so that the notice shall be received by the taxpayer no less than twenty-five (25) calendar days prior to the day of such scheduled appearance. The clerk will have prima facie complied with the requirements of this section if the notice was deposited in the U.S. mail thirty (30) days prior to the day of such scheduled appearance.

(e) Such appeal shall be heard by an attorney special magistrate if the value adjustment board in the county where the previous homestead was located uses special magistrates. The taxpayer may attend such hearing and present evidence, but need not do so. The value adjustment board in the county where the previous homestead was located shall issue a decision and send a copy of the decision to the clerk of the value adjustment board in the county where the new homestead is located.

(f) In hearing the appeal in the county where the new homestead is located, that value adjustment board shall consider the decision of the value adjustment board in the county where the previous homestead was located on the issues pertaining to the previous homestead and on the amount of any assessment reduction for which the taxpayer qualifies. The value adjustment board in the county where the new homestead is located may not hold its hearing until it has received the decision from the value adjustment board in the county where the previous homestead was located.

(4) This rule does not authorize the consideration or adjustment of the just, assessed, or taxable value of the previous homestead property.

(5) This rule renews and replaces Rule 12DER08-26, and this rule will remain in effect during the pendency of procedures to adopt rules addressing the subject matter of this emergency rule.

Rulemaking Authority Section 13 of Chapter 2008-173, L.O.F. (Senate Bill 1588) Law Implemented 193.155, 194.011 FS. History—New 12-17-09.

12DER09-08 Tax Collector Non-Ad Valorem Assessment Roll Reports.

(1) Each county tax collector shall provide to the Department of Revenue a report including information concerning each non-ad valorem assessment collected using the notice of taxes and referenced in Section 197.3632(5)(b), Florida Statutes. The following information shall be included in the report:

(a) The name of the local government levying the non-ad valorem assessment and a code indicating whether the local government is a county, municipality or independent special district.

(b) The name of the non-ad valorem levy as included on the tax notice.

(c) A short description of the function of the non-ad valorem levy and a code indicting the nature of the function.

(d) The basis, or unit of measurement against which the rate is applied to determine the non-ad valorem assessment, of the levy and a code indicating type of basis.

(e) The rate per each unit of basis of the non-ad valorem levy.

(f) The number of parcels on which the non-ad valorem assessment is levied.

(g) The total dollar amount of the non-ad valorem assessment levied.

(h) An indication of whether or not the local government levying the non-ad valorem assessment also levies an ad valorem tax.

(2) The report shall be filed with the Department of Revenue by December 15 each year beginning in 2008, by mailing the report to the Florida Department of Revenue, Property Tax Oversight: Non-Ad Valorem Assessments, Post Office Box 3000, Tallahassee, Florida 32315-3000. The report shall be filed on Form DR-503NA, Tax Collector's Report on Non-Ad Valorem Assessments Collected on the Notice of Taxes (R.06/09), which the Department of Revenue hereby adopts and incorporates in this rule by reference. The Form DR-503NA can be obtained from the Department's website at <http://dor.myflorida.com/dor/property/codownloads.html>.

(3) This rule renews and replaces emergency Rule 12DER08-30 and this rule will remain in effect during the pendency of procedures to adopt rules addressing the subject matter of this emergency rule.

12DER09-09 Scope of Emergency Rules 12DER09-10 Through 12DER09-12; How to Obtain Forms.

(1) These rules shall replace Rules 12DER08-33 through 12DER08-35, which were effective December 31, 2008.

(2) These rules shall supersede existing rules to the contrary, where indicated, to the extent necessary to implement Chapter 2007-339 (Senate Bill 4-D) and Chapter 2008-173 (Senate Bill 1588), Laws of Florida.

(3) These rules are to be read in conjunction with applicable statutes and not as a substitute for them. They are designed to assist with the understanding and deployment of the requirements of Chapter 2007-339 (Senate Bill 4-D) and Chapter 2008-173 (Senate Bill 1588), Laws of Florida. Users should consult those laws as the source documents that created the legal requirements, and not rely solely on these rules.

(4) Copies of the forms incorporated in Emergency Rules 12DER09-10 and 12DER09-12 may be obtained at the Department's Internet site: <http://dor.myflorida.com/dor/codownloads.html>.

(5) This rule renews and replaces emergency Rule 12DER08-32 and this rule will remain in effect during the pendency of procedures to adopt rules addressing the subject matter of this emergency rule.

Rulemaking Authority Section 13 of Ch. 2008-173, L.O.F. (Senate Bill 1588) Law Implemented 193.155, 196.031, 196.183 FS. History--New 12-17-09.

12DER09-10 Transfer of Assessment Limitation Difference; "Portability;" Sworn Statement Required.

(1) This rule shall replace Rule 12DER08-33, which was effective December 31, 2008.

(2) Section 193.155(8), Florida Statutes, provides the procedures for the transfer of the assessment limitation difference, within stated limits, when a homestead is abandoned. These rules describe those procedures, which are an alternative to assessment at just value. The transfer of the assessment limitation difference is to the just value of the interest owned by those persons that qualify and receive homestead exemption on a new homestead.

(a) These rules set forth limitations and special rules that must be met consistent with Section 193.155(8), Florida Statutes. A person may apply for the transfer of a homestead assessment difference from a previous homestead property to a new homestead property if:

1. That person received a homestead exemption on the previous property as of January 1 of either of the two (2) immediately preceding years; and,

2. The previous property was abandoned as a homestead after such January 1 and was, or will be, reassessed at just value or assessed under Section 193.155(8), Florida Statutes, as of January 1 of the year after the year in which the abandonment occurred; and,

3. The new homestead property was assessed at just value without the homestead exemption either because it did not receive a homestead exemption, or the homestead exemption was abandoned, as of January 1 of the year for which application is made.

(b) Under Section 193.155(8), Florida Statutes, the transfer of an assessment limitation difference is available to a person only from a prior homestead in which that person received a homestead exemption.

1. For a husband and wife who owned, shared and both resided on a previous homestead, each shall be considered to have received the homestead exemption for purposes of these rules.

2. For joint tenants with right of survivorship, those tenants that applied for, received the homestead exemption, and resided on a previous homestead shall be considered to have received the homestead exemption for purposes of these rules.

3. For tenants in common, those tenants that applied for and received the homestead exemption and resided on a previous homestead shall be considered to have received the homestead exemption for purposes of these rules.

(3) To apply for portability, the applicant taxpayer shall file Form DR-501T (Transfer of Homestead Assessment Difference-Attachment to Original Application for Ad Valorem Tax Exemption R. 12/08), which the Department of Revenue hereby adopts and incorporates in this rule by reference, by March 1, as an attachment to the homestead exemption application, Form DR-501, Original Application for Tax Exemption, (incorporated by reference in Rule 12D-16.002, Florida Administrative Code). Completing Form DR-501T, including a sworn statement, and Form DR-501 shall be considered sufficient documentation for applying for the transfer. Note: Section 192.047(2), Florida Statutes provides "When the deadline for filing an ad valorem tax application or return falls on a Saturday, Sunday, or legal holiday, the filing period shall extend through the next working day immediately following such Saturday, Sunday, or legal holiday."

(4)(a) Upsizing – When the just value of the new homestead is equal to or greater than the just value of the previous homestead, the maximum assessment limitation difference that can be transferred is \$500,000. Within that limit, the differential between assessed value and just value can be transferred to the new property, subject also to provisions for multiple owners described below.

(b) Downsizing – When the just value of the new homestead is less than the just value of the previous homestead, the maximum assessment difference that can be transferred is \$500,000. However, within that limit, the transferred assessment difference must be the same proportion of the new homestead's just value as the proportion of the

assessment difference of the previous homestead was of the just value of the previous homestead, subject also to provisions for multiple owners described below.

(5)(a) Transferring without splitting or joining – When one or more people who previously owned a single homestead and each received the homestead exemption as described in these rules together qualify for a new homestead, where all persons who qualify for homestead exemption in the new homestead also qualified for homestead exemption in the previous homestead without an additional person qualifying for homestead exemption in the new homestead, the maximum assessment difference that can be transferred is \$500,000. Within that limit, the assessment limitation difference from the previous homestead may be transferred, and it is not considered to be a splitting or joining as discussed in paragraphs (b) and (c) below. Further, the rules for “upsizing” and “downsizing” as set forth above apply.

(b) Splitting – When two or more people who previously shared a homestead abandon that homestead and establish separate homesteads, the maximum total limitation that can be transferred from the previous homestead is \$500,000. However, within that limit, each person that received a homestead exemption and who is eligible to transfer an assessment limitation difference is also limited to a share of the previous homestead’s difference between assessed value and just value. For tenants in common, this share is equal to the difference between just value and assessed value for the tenant’s proportionate interest in the property, in other words, the just value of the person’s interest minus the assessed value of the person’s interest. For tenancy with right of survivorship, the share is equal to the assessed value of the homestead portion of the property divided by the number of owners that received the exemption, unless another interest share is stated on the title in which case the portion of the assessment limitation difference that may be transferred is equal to the difference between just value and assessed value for the stated share. Within this limit, the rules for “upsizing” and “downsizing” as set forth above would apply. For purposes of the transfer of the assessment limitation difference, the shares of the assessment limitation difference cannot be sold, transferred, or pledged to any person. For example, a husband and wife divorcing and both abandoning the homestead would each take their share of the assessment limitation difference and the property appraiser could not accept a stipulation otherwise. In no case shall the shares of the persons that received the homestead exemption add up to more than 100 percent.

(c) Joining – When two or more people, some of whom previously owned separate homesteads on which they received homestead exemption, join together in qualifying for a new homestead, the maximum assessment limitation difference that can be transferred is \$500,000. However, within that limit, the assessment difference that can be transferred is further limited

to the highest difference between assessed value and just value from any of the applicants’ former homesteads. Within that limit, the rules for “upsizing” and “downsizing” as set forth above apply.

(6) For the applicant taxpayer to be eligible for any transfer, the prior homestead must be “reassessed” at just value in the year after the year in which the abandonment occurred, or subject to such reassessment, either under the “change in ownership” rules of Section 193.155(3), Florida Statutes, or because the property is no longer used as a homestead. After it is assessed at just value, the prior homestead could have some assessment limitation difference transferred to it and be assessed under Section 193.155(8), Florida Statutes. Generally, if all joint owners of the prior homestead “abandon” it, then the prior homestead is reassessed at just value. However, under the referenced “change in ownership” rules of Section 193.155(3), Florida Statutes, some transfers do not subject property to re-assessment, such as transfers between husband and wife, equitable and legal title, and addition of persons to a title. Unless the property is reassessed at just value, or assessed under Section 193.155(8), Florida Statutes, if only one of the previous owners of the homestead property moved to another parcel and other previous owners of the homestead property stayed in the original homestead, the homestead would not be abandoned and the one who moved could not transfer any assessment limitation difference. For purposes of transferring an assessment limitation difference, a homestead owner may abandon his or her homestead, as of or before January 1 of the year for which application is made, even though it remains his or her primary residence. To do so, the person must notify the property appraiser in writing before or at the same time as filing the timely new application for homestead exemption on the property. Such an abandonment will result in reassessment at just value as provided in subparagraph (2)(a)2, of this rule above.

(7) Classified use assessment and living quarters for parents and grandparents – The assessment limitation difference that is eligible for transfer under these rules is the amount of difference between assessed value and just value of the portion of the property used as a homestead. This difference is equal to the reduction in value due to Section 193.155, Florida Statutes. For property with both a classified use assessment, such as agricultural, and assessed pursuant to Section 193.155, Florida Statutes, the difference eligible for transfer is equal to the difference between just and assessed value on the homestead portion of the property. No portion of property classified and used for agricultural or other non-homestead purpose may be included in the calculation of the eligible assessment limitation difference under Section 193.155(8), Florida Statutes. In calculating the assessment reduction to be transferred from a prior homestead that has an assessment reduction for living quarters of parents or grandparents pursuant to Section 193.703, Florida Statutes, the

value calculated pursuant to Section 193.703(6), Florida Statutes, must first be added back to the assessed value of the prior homestead.

(8) Procedures for property appraiser:

(a) If the previous homestead was located in a different county than the new homestead, the property appraiser in the new county must transmit a copy of the completed Form DR-501T together with a completed Form DR-501 to the property appraiser in the previous county. If the previous homesteads of applicants for transfer were in more than one county, each applicant from a different county must fill out a separate Form DR-501T.

1. The property appraiser in the previous county must complete Form DR-501RVSH (Certificate for Transfer of Homestead Assessment Difference) R. 12/08, which the Department of Revenue hereby adopts and incorporates in this rule by reference, within two weeks of receipt of Form DR-501T, and forward this form to the new property appraiser. As part of the information returned on Form DR-501RVSH, the previous property appraiser shall certify that the homestead assessment difference to be transferred is part of a previous homestead that has been or will be reassessed at just value as of January 1 of the year after the year in which the abandonment occurred.

2. Based on the information provided on Form DR-501RVSH from the previous property appraiser, the new property appraiser shall calculate the amount of the assessment limitation difference that may be transferred and apply such difference to the January 1 assessment of the new homestead for the year for which application is made.

(b) If the transfer is requested from the same county in which the new homestead is located, the property appraiser shall retain the Form DR-501T and Form DR-501RVSH is not required. Upon request of a taxpayer that had timely applied for the transfer of assessment limitation difference, the property appraiser shall update the ownership share information using the share methodology in this rule.

(c) The property appraiser in the county in which the new homestead is located shall record in the assessment roll submitted to the Department pursuant to Section 193.1142, Florida Statutes, the following information for the year in which the transfer is made to the homestead parcel:

1. Flag for current year assessment difference transfer;
2. Number of owners among whom previous assessment difference split. Enter 1 if previous difference was not split;
3. Assessment difference value transferred;
4. County number of previous homestead;
5. Parcel ID of previous homestead;
6. Year from which assessment difference value transferred;

(d) All information sharing agreements in effect in 2007 that were extended by previous emergency rule, and such agreements in effect in 2008, covering confidential tax

information are hereby perpetuated and extended during the period these emergency rules are in effect, and property appraisers having information sharing agreements with the Department are authorized to share confidential tax information with each other pursuant to Section 195.084, Florida Statutes, including social security numbers and linked information on Forms DR-501, DR-501T, and DR-501RVSH.

(9) Documenting changes in the assessment roll due to this provision will necessitate changes to the record layout and the information provided on the Rule 12D-8.013, Florida Administrative Code, NAL file submitted to the Department. See Section 193.114, Florida Statutes.

(10) The transfer of any limitation is not final until any values on the assessment roll on which the transfer is based are final. If such values are final after the procedures in these rules are exercised, the property appraiser(s) shall make appropriate corrections and a corrected tax notice bill shall be sent. Any values that are in administrative or judicial review shall be noticed to the tribunal or court for accelerated hearing and resolution so that the intent of Section 193.155(8), Florida Statutes may be carried out and fulfilled.

(11) Additional provisions.

(a) If the information from the property appraiser in the county where the previous homestead was located is provided after the procedures in this section are exercised, the property appraiser in the county where the new homestead is located shall make appropriate corrections and a corrected tax notice and tax bill shall be sent.

(b) The property appraiser in the county where the new homestead is located shall promptly notify a taxpayer if the information received or available is insufficient to identify the previous homestead and the amount of the assessment limitation difference which is transferable. Such notification shall be sent on or before July 1.

(c) If the property appraiser in the county where the previous homestead was located supplies sufficient information to the property appraiser in the county where the new homestead is located, such information shall be considered timely if provided in time for inclusion on the notice of proposed property taxes sent pursuant to Sections 194.011 and 200.065(1), Florida Statutes.

(d) If the property appraiser has not received information sufficient to identify the previous homestead and the amount of the assessment limitation difference which is transferable before mailing the notice of proposed property taxes, and such amount is not included on such notice, the taxpayer may file a petition with the value adjustment board in the county where the new homestead is located.

(13) This rule renews and replaces emergency Rule 12DER08-33 and this rule will remain in effect during the pendency of procedures to adopt rules addressing the subject matter of this emergency rule.

12DER09-11 Tangible Personal Property Exemption.

(1) This rule shall replace Rule 12DER08-34, which was effective December 31, 2008.

(2)(a) To apply for the exemption, no new form will be necessary: Form DR-405, DR-470, or Form DR-471 (incorporated by reference in Rule 12D-16.002, Florida Administrative Code), if required, will be considered the application for exemption. Form DR-405EZ (Tangible Personal Property Exemption Application and Return (R. 12/08)) formerly incorporated in Rule 12DER08-34, was retired by the Department effective April 2, 2009. Nothing in this rule shall preclude a property appraiser from requiring that Form DR-405 be filed.

(3) For taxpayers who fail to make a complete return and file a return by April 1 or within any applicable extension period, or who late file, the \$25,000 exemption shall not apply; however, at the option of the property appraiser, owners of property previously assessed without a return being filed may qualify for the exemption without filing an initial return. For returns not timely filed and for which the property appraiser does not grant the exemption, the penalties enumerated in Section 193.072, Florida Statutes, are applicable. Note: Section 192.047(2), Florida Statutes, provides “When the deadline for filing an ad valorem tax application or return falls on a Saturday, Sunday, or legal holiday, the filing period shall extend through the next working day immediately following such Saturday, Sunday, or legal holiday.”

(4) Section 196.183(1), Florida Statutes, specifically states that a single return must be filed, and therefore a single exemption granted, for all freestanding equipment not located at the place where the owner transacts business.

(5) “Site where the owner of tangible personal property transacts business”.

(a) The “site where the owner of tangible personal property transacts business” includes facilities where the business ships or receives goods, employees of the business are located, goods or equipment of the business are stored, or goods or services of the business are produced, manufactured, or developed, or similar facilities located in offices, stores, warehouses, plants, or other locations of the business. Sites where only the freestanding property of the owner is located shall not be considered sites where the owner of tangible personal property transacts business.

(b) Example: For a business leasing copying machines or other freestanding equipment, the location where the leased equipment is located does not constitute a site where the owner transacts business. If it is not a site where one or more of the activities stated in paragraph (a) occur, for purposes of the tangible personal property exemption, it is not considered a site where the owner transacts business.

(6) Property Appraiser actions – maintaining assessment roll entry.

(a) For all freestanding equipment not located at a site where the owner transacts business, and for which a single return is required, and for property assessed pursuant to Section 193.085, Florida Statutes, the property appraiser is responsible for allocating the exemption to taxing jurisdictions in which freestanding equipment or property assessed pursuant to Section 193.085, Florida Statutes is located. Allocation should be based on the proportionate share of the just value of such property in each jurisdiction. However, the amount of the exemption allocated to each taxing authority may not change following the extension of the tax roll pursuant to Section 193.122, Florida Statutes. All accounts shall be listed on the assessment roll submitted to the Department pursuant to Section 193.1142, Florida Statutes, whether fully exempt or not.

(b) Documenting changes in the assessment roll due to this provision will necessitate changes to the record layout and the information provided on the Rule 12D-8.013, Florida Administrative Code, NAP file submitted to the Department. See Section 193.114, Florida Statutes.

(7) By February 1 of each year, the property appraiser shall notify by mail all taxpayers whose requirement for filing an annual tangible personal property tax return was waived in the previous year. The notification shall state that a return must be filed if the value of the taxpayer’s tangible personal property exceeds the exemption and include the penalties for failure to file such a return. Form DR-405W (Notice to Taxpayer Whose Tangible Personal Property Return Was Waived in the Previous Year, N. 12/08) which the Department of Revenue hereby adopts and incorporates in this rule by reference, may be used by property appraisers at their option.

12DER09-12 Additional Homestead Exemption Pursuant to Section 196.031(1)(b), Florida Statutes.

(1) This rule shall replace Rule 12DER08-35, which was effective December 31, 2008.

(2) To apply for the additional homestead exemption, no new application form will be necessary. Form DR-501, "Original Application for Ad Valorem Tax Exemption" (incorporated by reference in Rule 12D-16.002, Florida Administrative Code), will be considered the application for exemption.

(3) The additional homestead exemption shall only apply to non-school levies.

(4) Property appraiser actions – Documenting changes in the assessment roll due to this provision will necessitate changes to the record layout and the information provided on the assessment roll submitted to the Department pursuant to Section 193.1142, Florida Statutes. The property appraiser's programming may use a different approach than that set forth in this rule for exemption ordering as long as such programming achieves the same result as this rule requires.

The rule provides that the following actions shall be taken for inactive gas service lines that have been used, but have become inactive without reuse:

- (a) If there is no prospect for reuse, the service line shall be retired and physically abandoned within three months;

legal proceedings detailed below may be an applicable or appropriate remedy. You may wish to consult an attorney regarding your legal rights.

Right to Request Administrative Hearing – A person whose substantial interests are or may be affected by the South Florida Water Management District's (SFWMD or District) action has the right to request an administrative hearing on that action pursuant to Sections 120.569 and 120.57, Florida Statutes. Persons seeking a hearing on a District decision which does or may determine their substantial interests shall file a petition for hearing with the District Clerk within 21 days of receipt of written notice of the decision, unless one of the following shorter time periods apply: 1) within 14 days of the notice of consolidated intent to grant or deny concurrently reviewed applications for environmental resource permits and use of sovereign submerged lands pursuant to Section 373.427, Florida Statutes; or 2) within 14 days of service of an Administrative Order pursuant to Subsection 373.119(1), Florida Statutes "Receipt of written notice of agency decision" means receipt of either written notice through mail, or electronic mail, or posting that the District has or intends to take final agency action, or publication of notice that the District has or intends to take final agency action. Any person who receives written notice of a SFWMD decision and fails to file a written request for hearing within the timeframe described above waives the right to request a hearing on that decision.

Filing Instructions – The Petition must be filed with the Office of the District Clerk of the SFWMD. Filings with the District Clerk may be made by mail, hand-delivery or facsimile. Filings by e-mail will not be accepted. Any person wishing to receive a clerked copy with the date and time stamped must provide an additional copy. A petition for administrative hearing is deemed filed upon receipt during normal business hours by the: District Clerk, SFWMD Headquarters, West Palm Beach, Florida. Any document received by the office of the SFWMD Clerk after 5:00 p.m., shall be filed as of 8:00 a.m., on the next regular business day. Additional filing instructions are as follows:

- Filings by mail must be addressed to the Office of the SFWMD Clerk, P. O. Box 24680, West Palm Beach, Florida 33416.
- Filings by hand-delivery must be delivered to the Office of the SFWMD Clerk. Delivery of a petition to the SFWMD's security desk does not constitute filing. To ensure proper filing, it will be necessary to request the

SFWMD's security officer to contact the Clerk's office. An employee of the SFWMD's Clerk's office will receive and file the petition.

- Filings by facsimile must be transmitted to the SFWMD Clerk's Office at (561)682-6010. Pursuant to subsections 28-106.104(7), (8) and (9), Florida Administrative Code, a party who files a document by facsimile represents that the original physically signed document will be retained by that party for the duration of that proceeding and of any subsequent appeal or subsequent proceeding in that cause. Any party who elects to file any document by facsimile shall be responsible for any delay, disruption, or interruption of the electronic signals and accepts the full risk that the document may not be properly filed with the clerk as a result. The filing date for a document filed by facsimile shall be the date the SFWMD Clerk receives the complete document.

Initiation of an Administrative Hearing – Pursuant to Rules 28-106.201 and 28-106.301, Florida Administrative Code, initiation of an administrative hearing shall be made by written petition to the SFWMD in legible form and on 8 and 1/2 by 11 inch white paper. All petitions shall contain:

1. Identification of the action being contested, including the permit number, application number, District file number or any other SFWMD identification number, if known.
2. The name, address and telephone number of the petitioner and petitioner's representative, if any.
3. An explanation of how the petitioner's substantial interests will be affected by the agency determination.
4. A statement of when and how the petitioner received notice of the SFWMD's decision.
5. A statement of all disputed issues of material fact. If there are none, the petition must so indicate.
6. A concise statement of the ultimate facts alleged, including the specific facts the petitioner contends warrant reversal or modification of the SFWMD's proposed action.
7. A statement of the specific rules or statutes the petitioner contends require reversal or modification of the SFWMD's proposed action.

8. If disputed issues of material fact exist, the statement must also include an explanation of how the alleged facts relate to the specific rules or statutes.

9. A statement of the relief sought by the petitioner, stating precisely the action the petitioner wishes the SFWMD to take with respect to the SFWMD's proposed action.

A person may file a request for an extension of time for filing a petition. The SFWMD may, for good cause, grant the request. Requests for extension of time must be filed with the SFWMD prior to the deadline for filing a petition for hearing. Such requests for extension shall contain a certificate that the moving party has consulted with all other parties concerning the extension and that the SFWMD and any other parties agree to or oppose the extension. A timely request for extension of time shall toll the running of the time period for filing a petition until the request is acted upon.

If the District takes action with substantially different impacts on water resources from the notice of intended agency decision, the persons who may be substantially affected shall have an additional point of entry pursuant to Rule 28-106.111, Florida Administrative Code, unless otherwise provided by law.

Mediation – The procedures for pursuing mediation are set forth in Section 120.573, Fla. Stat., and Rules 28-106.111 and 28-106.401-.405, Florida Administrative Code. The SFWMD is not proposing mediation for this agency action under Section 120.573, Florida Statutes, at this time.

Right to Seek Judicial Review – Pursuant to Sections 120.60(3) and 120.68, Florida Statutes, a party who is adversely affected by final SFWMD action may seek judicial review of the SFWMD's final decision by filing a notice of appeal pursuant to Florida Rule of Appellate Procedure 9.110 in the Fourth District Court of Appeal or in the appellate district where a party resides and filing a second copy of the notice with the SFWMD Clerk within 30 days of rendering of the final SFWMD action.
