**NOTICE TO DESIGN/BUILDER:**

The University of Florida Board of Trustees announces that Design/Build services will be required for the project listed below:

Project: UF-342, Weimer Hall Expansion (Gainesville, FL)

The project consists of expansion and renovation of Weimer Hall, home of the College of Journalism and Communications. The total project budget is \$4,400,000, including utilities infrastructure, fees, surveys and tests, total building commissioning, and contingencies. Design and construction must be “fast-tracked” to avoid the loss of expiring funds, and minimum GOLD LEED (Leadership in Energy and Environmental Design) certification by the U.S. Green Building Council is mandatory.

The contract for design/build services will consist of two parts. Part one services include design, construction administration, value engineering, constructability analyses, development of a cost model, estimating, and the development of a Guaranteed Maximum Price (GMP) proposal based on 60% or 100% Construction Documents, for which the design/builder will be paid a fixed fee.

If the GMP is accepted, part two, the construction phase, will be implemented. In part two of the contract, the design/builder becomes the single point of responsibility for completion of the construction documents, performance of the construction of the project and shall publicly bid trade contracts. Failure to negotiate an acceptable fixed fee for part one of the contract, or to arrive at an acceptable GMP within the time provided in the agreement may result in the termination of the design/builder’s contract.
