FISH AND WILDLIFE CONSERVATION COMMISSION

Marine Fisheries

RULE NOS.:	RULE TITLES:
68B-14.001	Purpose and Intent, Designation as Restricted Species
68B-14.0035	Size Limits: Amberjacks, Black Sea Bass, Gray Triggerfish, Grouper, Hogfish, Red Porgy, Snapper
68B-14.00355	Size Limits for Importation and Sale
68B-14.0036	Recreational Bag Limits: Snapper, Grouper, Hogfish, Black Sea Bass, Red Porgy, Amberjacks, Tilefish, Exception, Wholesale/Retail Purchase Exemption
68B-14.0042	Recreational Hogfish Season
68B-14.0045	Commercial Harvest Requirements; Licenses, Season Closures, Bag and Trip Limits

PURPOSE AND EFFECT: The Florida Fish and Wildlife Conservation Commission (Commission) is considering several changes to state reef fish regulations based on stakeholder input. The purpose of these rule amendments is to update reef fish regulations to align with stakeholder requests. Several of these changes would result in increased consistency with regulations for adjacent federal waters, may result in longer fishing seasons for federally-permitted commercial fishermen, or reduce regulatory dead discards. In addition, this rulemaking includes several technical changes to rule, corrects outdated references to federal rules, streamlines gag and black grouper minimum size limit language, and clarifies that the import size limit for gag grouper is 24 inches, which is the same as the minimum size limit for harvest statewide.

The effect of the proposed rule amendments would be:

- Blueline tilefish is designated a restricted species. This designation means commercial harvesters must have a Restricted Species Endorsement (RS) for harvest and sale of blueline tilefish. This may result in a longer blueline tilefish season for federally-permitted Atlantic commercial fishermen.
- The commercial minimum size limit for almaco jack is set at 20 inches fork length for Atlantic state waters. This will end harvest of small fish, increase reproductive potential of the

stock, and may lengthen the fishing season. The South Atlantic Council recently approved a 20-inch commercial minimum size limit for Atlantic federal waters.

- The minimum size limit for blackfin, queen, and silk snapper is removed. These deep-water fish are extremely susceptible to barotrauma, thus allowing fishermen to keep any of these fish that they catch will reduce dead discards. This matches current and pending regulations in federal waters.
- Outdated commercial vessel limit and season language for Atlantic red porgy is removed. Because other provisions in FWC rule require commercial harvesters to follow federal vessel limits and seasons in Atlantic state waters, removing this outdated rule language would reduce confusion.
- Technical updates are made and outdated references to federal rules are corrected.
- The minimum size limit rule language for gag and black grouper is streamlined and the gag grouper import size limit is clarified.

SUMMARY: The proposed rule amendments would modify state reef fish regulations to align with stakeholder requests; increase consistency with regulations in adjacent federal waters; reduce regulatory dead discards; incorporate technical changes and correct outdated references; and streamline and clarify existing regulations. Specifically, the proposed rule amendments will designate blueline tilefish as a restricted species; set the commercial minimum size limit for almaco jack in Atlantic state waters at 20 inches; remove the minimum size limits for blackfin, queen, and silk snapper; remove outdated commercial vessel limit and season rule language for Atlantic red porgy; make technical updates and correct outdated federal rule citations; streamline the minimum size limit rule language for gag and black grouper; and clarify the minimum import size limit for gag grouper.

SUMMARY OF STATEMENT OF ESTIMATED REGULATORY COSTS AND LEGISLATIVE RATIFICATION:

The Agency has determined that this will not have an adverse impact on small business or likely increase directly or indirectly regulatory costs in excess of \$200,000 in the aggregate within one year after the implementation of the rule. A SERC has not been prepared by the Agency.

The Agency has determined that the proposed rule is not expected to require legislative ratification based on the statement of estimated regulatory costs or if no SERC is required, the information expressly relied upon and described herein: the nature of the rule and the preliminary analysis conducted to determine whether a SERC was required.

Any person who wishes to provide information regarding a statement of estimated regulatory costs, or provide a proposal for a lower cost regulatory alternative must do so in writing within 21 days of this notice.

DEPARTMENT OF BUSINESS AND PROFESSIONAL REGULATION

Division of Hotels and Restaurants

RULE NO.: RULE TITLE:

61C-1.004 General Sanitation and Safety Requirements

The Florida Department of Business and Professional Regulation, Division of Hotels and Restaurants hereby gives notice: On April 17, 2019 the Division of Hotels and Restaurants received a Petition for a Routine Variance for paragraph 61C-1.004(1)(a), Florida Administrative Code, Paragraph 5-202.11(A), 2009 FDA Food Code, Paragraph 4-301.12(A), 2009 FDA Food Code, subsection 61C-4.010(5), Florida Administrative Code, Subparagraph 3-305.11(A)(2), 2009 FDA Food Code, and subsection 61C-4.010(1), Florida Administrative Code from Pacific Counter Portable located in St. Petersburg. The above referenced F.A.C. addresses the requirement that each establishment have an approved plumbing system installed to transport potable water and wastewater; that dishwashing facilities for manually washing, rinsing and sanitizing equipment and utensils are provided, and that each establishment have areas for food storage. They are requesting to utilize holding tanks to provide potable water and to collect wastewater at the handwash sink and to share the dishwashing and food storage areas with another food service establishment under the same ownership and on the same premise.

The Petition for this variance was published in Vol. 45/76 on April 18, 2019. The Order for this Petition was signed and approved on May 03, 2019. After a complete review of the variance request, the Division finds that the application of this Rule will create a financial hardship to the food service establishment. Furthermore, the Division finds that the Petitioner meets the burden of demonstrating that the underlying statute has been achieved by the Petitioner ensuring the wastewater holding tank for the handwash sink is emptied at a frequency as to not create a sanitary nuisance; and potable water provided must come from an approved source and be protected from contamination during handling. The Petitioner shall also ensure that all the handwash sink are provided with hot and cold running water under pressure, soap, an approved hand drying device and a handwashing sign. The dishwashing, food preparation and food storage areas within Main Kitchen (SEA6214214) must be maintained in a clean and sanitary manner. This area must also be available to Pacific Counter Portable during all hours of operation. If the ownership of Main Kitchen (Levy Premium Foodservice Limited Partnership) or Pacific Counter Portable (Levy Premium Foodservice Limited Partnership) changes, a signed agreement between the establishments for the use of the shared facilities must be provided to the division immediately.

A copy of the Order or additional information may be obtained by contacting: Daisy.Lee@myfloridalicense.com, Division of Hotels and Restaurants, 2601 Blair Stone Road, Tallahassee, Florida 32399-1011.

The Petition for this variance was published in Vol. 45/76 on April 18, 2019. The Order for this Petition was signed and approved on May 03, 2019. After a complete review of the variance request, the Division finds that the application of this Rule will create a financial hardship to the food service establishment. Furthermore, the Division finds that the Petitioner meets the burden of demonstrating that the underlying statute has been achieved by the Petitioner ensuring the wastewater holding tank for the handwash sink is emptied at a frequency as to not create a sanitary nuisance; and potable water provided must come from an approved source and be protected from contamination during handling. The Petitioner shall also ensure that all the handwash sink are provided with hot and cold running water under pressure, soap, an approved hand drying device and a handwashing sign. The dishwashing, food preparation and food storage areas within Main Kitchen (SEA6214214) must be maintained in a clean and sanitary manner. This area must also be available to Carvery Cart 3B during all hours of operation. If the ownership of Main Kitchen (Levy Premium Foodservice Limited Partnership) or Carvery

Cart 3B (Levy Premium Foodservice Limited Partnership) changes, a signed agreement between the establishments for the use of the shared facilities must be provided to the division immediately.
