5B-57.004 Introduction, Possession or Movement of Arthropods, Biological Control Agents, Plant Pests, Noxious Weeds, and Invasive Plants, Regulated by the Department.

(1) It is unlawful to introduce, multiply, possess, move, or release any arthropod, plant pest, biological control agent, noxious weed, or invasive plant regulated by the Department or the USDA except under permit issued by the Department unless a federal permit, PPQ 526, has been issued by the USDA with concurrence by the Department. No permit shall be issued nor concurrence with a federal permit, PPQ 526 made unless the Department has determined that the arthropod, plant pest, biological control agent, noxious weed, or invasive plant can be contained to prevent escape into the environment or that it will not pose a threat to agriculture, beneficial organisms, or the environment or become a public nuisance. If the possession of a plant listed in Rule 5B-57.007, F.A.C., has resulted from natural dispersion and there is neither danger of nor intent to further disperse the plant, then no permit is required. Any person transporting noxious or prohibited aquatic plants for disposal shall not be required to possess a permit pursuant to this chapter; however, disposal shall be carried out in such a manner that there is no further spread of the the plant species and no contamination of any waterbody of the state. In the case of biological control agents, they must be specialized to the target pest or pests. The Department's evaluation of permit applications may rely on findings of the Florida Department of Environmental Protection, the Florida Fish and Wildlife Conservation Commission, the USDA, the University of Florida, or any other State or Federal agency with expertise in these areas. In cases where there is inadequate information about the potential environmental impact of importing or releasing an organism, the Department will require the applicant to provide evidence that the accidental escape of organisms not intended for release would not be hazardous to Florida or U.S. agriculture, beneficial organisms, the public, or the environment and to provide contingency plans for containment should escape occur. The application procedures for permits are as follows:

(2) through (5) No change.
