MU.912.F.3.4:	Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.
MU.912.H.1.2:	Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class. **Clarifications:** e.g., vocal, instrumental, guitar, keyboard, electronic, handbells
MU.912.H.1.3:	Compare two or more works of a composer across performance media. **Clarifications:** e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto
MU.912.H.2.1:	Evaluate the social impact of music on specific historical periods.
MU.912.H.3.1:	Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects musical performance. **Clarifications:** e.g., acoustics, sound amplification, materials, mechanics
MU.912.O.1.1:	Evaluate the organizational principles and conventions in musical works and discuss their effect on structure. **Clarifications:** e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble
MU.912.O.3.2:	Interpret and perform expressive elements indicated by the musical score and/or conductor.
MU.912.S.1.1:	Improvise rhythmic and melodic phrases over harmonic progressions. **Clarifications:** e.g., using text or scat syllables
MU.912.S.1.3:	Arrange a musical work by manipulating two or more aspects of the composition. **Clarifications:** e.g., texture, mode, form, tempo, voicing
MU.912.S.1.4:	Perform and notate, independently and accurately, melodies by ear. **Clarifications:** e.g., singing, playing, writing
MU.912.S.2.1:	Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature. **Clarifications:** e.g., memorization, sequential process
MU.912.S.2.2:	Transfer expressive elements and performance techniques from one piece of music to another.
MU.912.S.3.1:	Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.
MU.912.S.3.2:	Sight-read music accurately and expressively to show synthesis of skills. **Clarifications:** e.g., musical elements, expressive qualities, performance technique
MU.912.S.3.4:	Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.
MU.912.S.3.5:	Develop and demonstrate proper vocal or instrumental technique. **Clarifications:** e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming
LAFS.910.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 9–10 texts and topics.

LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented. **Standard Relation to Course: Supporting**
LAFS.910.SL.1.2:	Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.
LAFS.910.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.
LAFS.910.SL.2.4:	Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.
LAFS.910.WHST.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.910.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 – 3(x – y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
DA.912.S.2.1:	Sustain focused attention, respect, and discipline during class, rehearsal, and performance.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students with jazz experience become conversant with basic chord progressions and the scale/chord relationship, strengthen aural skills, and learn to improvise and compose melodies over progressions as they rehearse, perform, and study high-quality jazz ensemble literature. Musicians study jazz history and become familiar with the cultural context of various compositions and artists. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. Students in this class may need to obtain (e.g., borrow, rent, purchase) an instrument from an outside source.

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area

concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

GENERAL INFORMATION

Course Number: 1302510

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 9 to 12 and Adult Education Courses > **Subject:** Music Education > **SubSubject:** Instrumental Music >

Abbreviated Title: JAZZ ENS 2

Number of Credits: One (1) credit

Course Length: Year (Y)

Course Type: Core Academic Course

Course Level: 2

Course Status: Course Approved

Grade Level(s): 9,10,11,12

Graduation Requirement: Performing/Fine Arts

Educator Certifications

Music (Elementary and Secondary Grades K-12)
Instrumental Music (Secondary Grades 7-12)
Instrumental Music (Elementary and Secondary Grades K-12)

Jazz Ensemble 3 (#1302520) 2020 - 2022 (current)

Course Standards

Name	Description
MU.912.C.1.1:	Apply listening strategies to promote appreciation and understanding of unfamiliar musical works. **Clarifications:** e.g., listening maps, active listening, checklists
MU.912.C.1.2:	Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the composer's intent. **Clarifications:** e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title
MU.912.C.2.1:	Evaluate and make appropriate adjustments to personal performance in solo and ensembles.
MU.912.C.2.2:	Evaluate performance quality in recorded and/or live performances.
MU.912.C.2.3:	Evaluate one's own or other's compositions and/or improvisations and generate improvements independently or cooperatively.
MU.912.C.3.1:	Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.
MU.912.F.2.1:	Design or refine a résumé for application to higher education or the workforce that highlights marketable skills and knowledge gained through music training. **Clarifications:** e.g., repertoire lists, technology-based work, ability to research and analyze, and examples of leadership and collaborative skills
MU.912.F.3.2:	Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.
MU.912.F.3.4:	Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.
MU.912.H.1.1:	Investigate and discuss how a culture's traditions are reflected through its music. **Clarifications:** e.g., patriotic, folk, celebration, entertainment, spiritual
MU.912.H.1.2:	Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class. **Clarifications:** e.g., vocal, instrumental, guitar, keyboard, electronic, handbells
MU.912.H.1.3:	Compare two or more works of a composer across performance media. **Clarifications:** e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto
MU.912.H.2.4:	Examine the effects of developing technology on composition, performance, and acquisition of music.
MU.912.H.3.1:	Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects musical performance. **Clarifications:** e.g., acoustics, sound amplification, materials, mechanics
MU.912.H.3.2:	Combine personal interest with skills and knowledge from a non-music class to explore, design, and present a music-based or music-enhanced topic of interest to demonstrate the ability to make transfers across contexts. **Clarifications:** e.g., music and health, Holocaust, tolerance, African American history, world languages, scientific research, data analysis, problem-solving, public speaking
MU.912.O.1.1:	Evaluate the organizational principles and conventions in musical works and discuss their effect on structure. **Clarifications:** e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble
MU.912.O.3.2:	Interpret and perform expressive elements indicated by the musical score and/or conductor.
MU.912.S.1.1:	Improvise rhythmic and melodic phrases over harmonic progressions. **Clarifications:** e.g., using text or scat syllables
MU.912.S.1.2:	Compose music for voices and/or acoustic, digital, or electronic instruments.
MU.912.S.1.3:	Arrange a musical work by manipulating two or more aspects of the composition. **Clarifications:** e.g., texture, mode, form, tempo, voicing
MU.912.S.1.4:	Perform and notate, independently and accurately, melodies by ear. **Clarifications:** e.g., singing, playing, writing
MU.912.S.2.1:	Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature. **Clarifications:**

	e.g., memorization, sequential process
MU.912.S.2.2:	Transfer expressive elements and performance techniques from one piece of music to another.
MU.912.S.3.1:	Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.
MU.912.S.3.2:	Sight-read music accurately and expressively to show synthesis of skills. **Clarifications:** e.g., musical elements, expressive qualities, performance technique
MU.912.S.3.4:	Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.
MU.912.S.3.5:	Develop and demonstrate proper vocal or instrumental technique. **Clarifications:** e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming
LAFS.1112.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics.
LAFS.1112.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed. c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives. d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task. **Standard Relation to Course: Supporting**
LAFS.1112.SL.1.2:	Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.
LAFS.1112.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.
LAFS.1112.SL.2.4:	Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.
LAFS.1112.SL.2.5:	Make strategic use of digital media (e.g., textual, graphical, audio, visual, and interactive elements) in presentations to enhance understanding of findings, reasoning, and evidence and to add interest.
LAFS.1112.WHST.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.1112.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
DA.912.S.2.1:	Sustain focused attention, respect, and discipline during class, rehearsal, and performance.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students with considerable jazz experience become conversant with more complex forms and harmonic progressions, and strengthen their aural and improvisational skills as they rehearse, perform, and study high-quality jazz ensemble literature. Musicians apply their theory skills to arranging, transposition, and composing; and study various periods, cultural contexts, compositions, and artists in jazz history. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. Students in this class may need to obtain (e.g., borrow, rent, purchase) an instrument from an outside source.

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. Course Standards

Name	Description
MU.912.C.1.1:	Apply listening strategies to promote appreciation and understanding of unfamiliar musical works. **Clarifications:** e.g., listening maps, active listening, checklists
MU.912.C.1.2:	Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the composer's intent. **Clarifications:** e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title
MU.912.C.2.1:	Evaluate and make appropriate adjustments to personal performance in solo and ensembles.
MU.912.C.2.2:	Evaluate performance quality in recorded and/or live performances.
MU.912.C.2.3:	Evaluate one's own or other's compositions and/or improvisations and generate improvements independently or cooperatively.
MU.912.C.3.1:	Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.
MU.912.F.1.1:	Analyze and evaluate the effect of "traditional" and contemporary technologies on the development of music.
MU.912.F.2.1:	Design or refine a résumé for application to higher education or the workforce that highlights marketable skills and knowledge gained through music training. **Clarifications:** e.g., repertoire lists, technology-based work, ability to research and analyze, and examples of leadership and collaborative skills
MU.912.F.2.2:	Analyze the effect of the arts and entertainment industry on the economic and social health of communities and regions. **Clarifications:** e.g., community revitalization, industry choosing new locations, cultural and social enrichment
MU.912.F.2.3:	Compare the organizational structure of a professional orchestra, chorus, quintet, or other ensemble to that of a business. **Clarifications:** e.g., leadership, financial needs and structure, marketing, personnel matters, manager, travel
MU.912.F.3.1:	Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of leadership in school and/or non-school settings.
MU.912.F.3.2:	Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.
MU.912.F.3.3:	Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace.
MU.912.F.3.4:	Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.
MU.912.H.1.3:	Compare two or more works of a composer across performance media. **Clarifications:** e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto
MU.912.H.1.4:	Analyze how Western music has been influenced by historical and current world cultures.
MU.912.H.1.5:	Analyze music within cultures to gain understanding of authentic performance practices.
MU.912.H.2.2:	Analyze current musical trends, including audience environments and music acquisition, to predict possible directions of music.
MU.912.H.2.3:	Analyze the evolution of a music genre. **Clarifications:** e.g., jazz, blues
MU.912.H.2.4:	Examine the effects of developing technology on composition, performance, and acquisition of music.
MU.912.H.3.2:	Combine personal interest with skills and knowledge from a non-music class to explore, design, and present a music-based or music-enhanced topic of interest to demonstrate the ability to make transfers across contexts. **Clarifications:** e.g., music and health, Holocaust, tolerance, African American history, world languages, scientific research, data analysis, problem-solving, public speaking
MU.912.O.1.1:	Evaluate the organizational principles and conventions in musical works and discuss their effect on structure. **Clarifications:** e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble
MU.912.O.2.1:	Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.
MU.912.O.2.2:	Transpose melodies into different modalities through performance and composition.
MU.912.O.3.1:	Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer. **Clarifications:** e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm, orchestration
MU.912.O.3.2:	Interpret and perform expressive elements indicated by the musical score and/or conductor.

MU.912.S.1.1:	Improvise rhythmic and melodic phrases over harmonic progressions. **Clarifications:** e.g., using text or scat syllables
MU.912.S.1.2:	Compose music for voices and/or acoustic, digital, or electronic instruments.
MU.912.S.1.3:	Arrange a musical work by manipulating two or more aspects of the composition. **Clarifications:** e.g., texture, mode, form, tempo, voicing
MU.912.S.1.4:	Perform and notate, independently and accurately, melodies by ear. **Clarifications:** e.g., singing, playing, writing
MU.912.S.2.1:	Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature. **Clarifications:** e.g., memorization, sequential process
MU.912.S.2.2:	Transfer expressive elements and performance techniques from one piece of music to another.
MU.912.S.3.1:	Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.
MU.912.S.3.2:	Sight-read music accurately and expressively to show synthesis of skills. **Clarifications:** e.g., musical elements, expressive qualities, performance technique
MU.912.S.3.3:	Transcribe aurally presented songs into melodic and/or rhythmic notation to show synthesis of aural and notational skills.
MU.912.S.3.4:	Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.
MU.912.S.3.5:	Develop and demonstrate proper vocal or instrumental technique. **Clarifications:** e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming
LAFS.1112.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics.
LAFS.1112.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed. c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives. d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task. **Standard Relation to Course: Supporting**
LAFS.1112.SL.1.2:	Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.
LAFS.1112.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.
LAFS.1112.SL.2.4:	Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.
LAFS.1112.SL.2.5:	Make strategic use of digital media (e.g., textual, graphical, audio, visual, and interactive elements) in presentations to enhance understanding of findings, reasoning, and evidence and to add interest.
LAFS.1112.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.1112.WHST.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products in response to ongoing feedback, including new arguments or information.
LAFS.1112.WHST.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.1112.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently,

	express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 – 3(x – y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
DA.912.S.2.1:	Sustain focused attention, respect, and discipline during class, rehearsal, and performance.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students with significant jazz experience become highly conversant with complex harmonic structures; compose or arrange for small groups; improvise over various forms, keys, and styles; and are knowledgeable about the professional jazz scene and its icons. Musicians study the impact of technology on jazz and the music industry, and learn the basics of sound reinforcement for solo and ensemble performance. In keeping with the rigor expected in an Honors course, students undertake independent study that includes synthesis of learning and experience. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. Students in this class may need to obtain (e.g., borrow, rent, purchase) an instrument from an outside source.

GENERAL NOTES

Honors and Advanced Level Course Note: Academic rigor is more than simply assigning to students a greater quantity of work. Through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted, students are challenged to think and collaborate critically on the content they are learning.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

GENERAL INFORMATION

Course Number: 1302530

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 9 to 12 and Adult Education Courses > **Subject:** Music Education > **SubSubject:** Instrumental Music >

Abbreviated Title: JAZZ ENS 4 HON

Number of Credits: One (1) credit

Course Length: Year (Y)

Course Attributes:

- Honors

Course Type: Core Academic Course

Course Level: 3

Course Status: Course Approved

Grade Level(s): 9,10,11,12

Graduation Requirement: Performing/Fine Arts

Educator Certifications

Music (Elementary and Secondary Grades K-12)
Instrumental Music (Secondary Grades 7-12)
Instrumental Music (Elementary and Secondary Grades K-12)

M/J Chorus 1 (#1303000) 2020 - 2022 (current)

Course Standards

Name	Description
MU.68.C.1.1:	Develop strategies for listening to unfamiliar musical works. **Clarifications:** e.g., listening maps, active listening, checklists
MU.68.C.1.4:	Identify, aurally, a variety of vocal styles and ensembles. **Clarifications:** e.g., chant, spiritual, folk, opera, world, jazz, pop, solo, duet, trio, quartet, small ensembles, choirs
MU.68.C.2.2:	Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal. **Clarifications:** e.g., blend, balance, ensemble playing, sonority, technique, tone quality
MU.68.F.3.2:	Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.
MU.68.H.1.1:	Describe the functions of music from various cultures and time periods.
MU.68.H.2.3:	Classify the literature being studied by genre, style, and/or time period.
MU.68.H.3.1:	Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration. **Clarifications:** e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural connections and traditions, ceremonial music, sales and advertising, communication
MU.68.H.3.2:	Discuss how the absence of music would affect other content areas and contexts. **Clarifications:** e.g., theatre and dance, movies, sporting events, video games, commercial advertising, social gatherings, civic and religious ceremonies, plays
MU.68.O.1.1:	Compare performances of a musical work to identify artistic choices made by performers. **Clarifications:** e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble
MU.68.O.3.1:	Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image. **Clarifications:** e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration
MU.68.S.1.1:	Improvise rhythmic and melodic phrases to accompany familiar songs and/or standard harmonic progressions. **Clarifications:** e.g., blues, rock
MU.68.S.1.3:	Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.
MU.68.S.1.4:	Sing or play melodies by ear with support from the teacher and/or peers. **Clarifications:** e.g., melodies using traditional classroom instruments and/or voice
MU.68.S.3.1:	Sing and/or play age-appropriate repertoire expressively. **Clarifications:** e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response
MU.68.S.3.2:	Demonstrate proper vocal or instrumental technique. **Clarifications:** e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming
MU.68.S.3.3:	Sight-read standard exercises and simple repertoire. **Clarifications:** e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols
MU.68.S.3.5:	Notate rhythmic phrases and/or melodies, in varying simple meters, performed by someone else.
LAFS.6.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and issues, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions, set specific goals and deadlines, and define individual roles as needed. c. Pose and respond to specific questions with elaboration and detail by making comments that contribute to the topic, text, or issue under discussion. d. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing. **Standard Relation to Course: Supporting**
LAFS.6.SL.1.2:	Interpret information presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how it contributes to a topic, text, or issue under study.
LAFS.6.SL.1.3:	Delineate a speaker's argument and specific claims, distinguishing claims that are supported by reasons and evidence from claims that are not.

LAFS.6.SL.2.4:	Present claims and findings, sequencing ideas logically and using pertinent descriptions, facts, and details to accentuate main ideas or themes; use appropriate eye contact, adequate volume, and clear pronunciation.
LAFS.68.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.68.WHST.3.9:	Draw evidence from informational texts to support analysis reflection, and research.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. DA.68.S.2.1:	Sustain focused attention, respect, and discipline during classes and performances.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students with little or no choral experience develop beginning vocal technique and skills, critical and creative thinking skills, and an appreciation of music from around the world and through time. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. Course Standards

Name	Description
MU.68.C.1.1:	Develop strategies for listening to unfamiliar musical works. **Clarifications:** e.g., listening maps, active listening, checklists
MU.68.C.1.2:	Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent. **Clarifications:** e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title
MU.68.C.1.4:	Identify, aurally, a variety of vocal styles and ensembles. **Clarifications:** e.g., chant, spiritual, folk, opera, world, jazz, pop, solo, duet, trio, quartet, small ensembles, choirs
MU.68.C.2.1:	Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers. **Clarifications:** e.g., intonation, balance, blend, phrasing, rhythm
MU.68.C.2.2:	Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal. **Clarifications:** e.g., blend, balance, ensemble playing, sonority, technique, tone quality
MU.68.F.2.2:	Describe how concert attendance can financially impact a community. **Clarifications:** e.g., increased revenues at restaurants, hotels, and travel agencies; venue maintenance, parking attendants
MU.68.F.3.2:	Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.
MU.68.H.1.1:	Describe the functions of music from various cultures and time periods.
MU.68.H.1.5:	Using representative musical works by selected composers, classify compositional characteristics common to a specific time period and/or genre.
MU.68.H.2.1:	Describe the influence of historical events and periods on music composition and performance.
MU.68.H.2.3:	Classify the literature being studied by genre, style, and/or time period.
MU.68.H.3.1:	Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration. **Clarifications:** e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural connections and traditions, ceremonial music, sales and advertising, communication
MU.68.H.3.2:	Discuss how the absence of music would affect other content areas and contexts. **Clarifications:** e.g., theatre and dance, movies, sporting events, video games, commercial advertising, social gatherings, civic and religious ceremonies, plays
MU.68.O.1.1:	Compare performances of a musical work to identify artistic choices made by performers. **Clarifications:** e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble
MU.68.O.3.1:	Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image. **Clarifications:** e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration
MU.68.O.3.2:	Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to other musical works.
MU.68.S.1.1:	Improvise rhythmic and melodic phrases to accompany familiar songs and/or standard harmonic progressions. **Clarifications:** e.g., blues, rock
MU.68.S.1.3:	Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.
MU.68.S.1.4:	Sing or play melodies by ear with support from the teacher and/or peers. **Clarifications:** e.g., melodies using traditional classroom instruments and/or voice
MU.68.S.2.1:	Perform music from memory to demonstrate knowledge of the musical structure. **Clarifications:** e.g., basic themes, patterns, tonality, melody, harmony
MU.68.S.3.1:	Sing and/or play age-appropriate repertoire expressively. **Clarifications:** e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response
MU.68.S.3.2:	Demonstrate proper vocal or instrumental technique. **Clarifications:** e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming

MU.68.S.3.3:	Sight-read standard exercises and simple repertoire. **Clarifications:** e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols
MU.68.S.3.4:	Compare written notation to aural examples and analyze for accuracy of rhythm and pitch. **Clarifications:** e.g., error detection, interval reinforcement
MU.68.S.3.5:	Notate rhythmic phrases and/or melodies, in varying simple meters, performed by someone else.
MU.68.S.3.6:	Develop and demonstrate efficient rehearsal strategies to apply skills and techniques. **Clarifications:** e.g., independently, collaboratively
LAFS.6.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and issues, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions, set specific goals and deadlines, and define individual roles as needed. c. Pose and respond to specific questions with elaboration and detail by making comments that contribute to the topic, text, or issue under discussion. d. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing. **Standard Relation to Course: Supporting**
LAFS.6.SL.1.2:	Interpret information presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how it contributes to a topic, text, or issue under study.
LAFS.6.SL.1.3:	Delineate a speaker's argument and specific claims, distinguishing claims that are supported by reasons and evidence from claims that are not.
LAFS.6.SL.2.4:	Present claims and findings, sequencing ideas logically and using pertinent descriptions, facts, and details to accentuate main ideas or themes; use appropriate eye contact, adequate volume, and clear pronunciation.
LAFS.68.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.68.WHST.3.9:	Draw evidence from informational texts to support analysis reflection, and research.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. DA.68.S.2.1:	Sustain focused attention, respect, and discipline during classes and performances.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students build on previous choral experience to expand vocal, technical, musical, and ensemble skills through rehearsal, performance, and study of high-quality choral literature. Singers focus on increasing knowledge of music theory, music literacy, and aesthetic response. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. Course Standards

Name	Description
MU.68.C.1.1:	Develop strategies for listening to unfamiliar musical works. **Clarifications:** e.g., listening maps, active listening, checklists
MU.68.C.1.2:	Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent. **Clarifications:** e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title
MU.68.C.2.1:	Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers. **Clarifications:** e.g., intonation, balance, blend, phrasing, rhythm
MU.68.C.2.2:	Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal. **Clarifications:** e.g., blend, balance, ensemble playing, sonority, technique, tone quality
MU.68.C.3.1:	Apply specific criteria to evaluate why a musical work is an exemplar in a specific style or genre.
MU.68.F.2.1:	Describe several routes a composition or performance could travel from creator to consumer. **Clarifications:** e.g., MIDI and other technology, production, sharing on the Internet, home studios, professional recording studios, sales
MU.68.F.2.2:	Describe how concert attendance can financially impact a community. **Clarifications:** e.g., increased revenues at restaurants, hotels, and travel agencies; venue maintenance, parking attendants
MU.68.F.3.1:	Describe how studying music can enhance citizenship, leadership, and global thinking. **Clarifications:** e.g., dedication to mastering a task, problem-solving, self-discipline, dependability, ability to organize, cultural awareness, mutual respect
MU.68.F.3.2:	Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.
MU.68.H.1.2:	Identify the works of representative composers within a specific style or time period.
MU.68.H.1.3:	Describe how American music has been influenced by other cultures.
MU.68.H.1.4:	Classify authentic stylistic features in music originating from various cultures. **Clarifications:** e.g., rhythm, layered texture, key patterns, tonality, melodic line, quarter- or semi-tones, national folk melodies, improvisation, instrumentation, aural/oral traditions, drumming patterns
MU.68.H.2.1:	Describe the influence of historical events and periods on music composition and performance.
MU.68.H.2.2:	Analyze how technology has changed the way music is created, performed, acquired, and experienced. **Clarifications:** e.g., from harpsichord to piano; from phonograph to CD
MU.68.H.2.3:	Classify the literature being studied by genre, style, and/or time period.
MU.68.H.3.1:	Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration. **Clarifications:** e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural connections and traditions, ceremonial music, sales and advertising, communication
MU.68.H.3.2:	Discuss how the absence of music would affect other content areas and contexts. **Clarifications:** e.g., theatre and dance, movies, sporting events, video games, commercial advertising, social gatherings, civic and religious ceremonies, plays
MU.68.O.1.1:	Compare performances of a musical work to identify artistic choices made by performers. **Clarifications:** e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble
MU.68.O.2.2:	Demonstrate knowledge of major and minor tonalities through performance and composition. **Clarifications:** e.g., scales; key signatures; relative major/minor; parallel major/minor
MU.68.O.3.1:	Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image. **Clarifications:** e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration
MU.68.O.3.2:	Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to other musical works.
MU.68.S.1.1:	Improvise rhythmic and melodic phrases to accompany familiar songs and/or standard harmonic progressions. **Clarifications:**

	e.g., blues, rock
MU.68.S.1.3:	Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.
MU.68.S.1.4:	Sing or play melodies by ear with support from the teacher and/or peers. **Clarifications:** e.g., melodies using traditional classroom instruments and/or voice
MU.68.S.2.1:	Perform music from memory to demonstrate knowledge of the musical structure. **Clarifications:** e.g., basic themes, patterns, tonality, melody, harmony
MU.68.S.2.2:	Transfer performance techniques from familiar to unfamiliar pieces.
MU.68.S.3.1:	Sing and/or play age-appropriate repertoire expressively. **Clarifications:** e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response
MU.68.S.3.2:	Demonstrate proper vocal or instrumental technique. **Clarifications:** e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming
MU.68.S.3.3:	Sight-read standard exercises and simple repertoire. **Clarifications:** e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols
MU.68.S.3.4:	Compare written notation to aural examples and analyze for accuracy of rhythm and pitch. **Clarifications:** e.g., error detection, interval reinforcement
MU.68.S.3.5:	Notate rhythmic phrases and/or melodies, in varying simple meters, performed by someone else.
MU.68.S.3.6:	Develop and demonstrate efficient rehearsal strategies to apply skills and techniques. **Clarifications:** e.g., independently, collaboratively
LAFS.68.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.68.WHST.3.9:	Draw evidence from informational texts to support analysis reflection, and research.
LAFS.7.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 7 topics, texts, and issues, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions, track progress toward specific goals and deadlines, and define individual roles as needed. c. Pose questions that elicit elaboration and respond to others' questions and comments with relevant observations and ideas that bring the discussion back on topic as needed. d. Acknowledge new information expressed by others and, when warranted, modify their own views. **Standard Relation to Course: Supporting**
LAFS.7.SL.1.2:	Analyze the main ideas and supporting details presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how the ideas clarify a topic, text, or issue under study.
LAFS.7.SL.1.3:	Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and the relevance and sufficiency of the evidence.
LAFS.7.SL.2.4:	Present claims and findings, emphasizing salient points in a focused, coherent manner with pertinent descriptions, facts, details, and examples; use appropriate eye contact, adequate volume, and clear pronunciation.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and

	can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 – 3(x – y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
DA.68.S.2.1:	Sustain focused attention, respect, and discipline during classes and performances.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students with previous choral experience build intermediate-level knowledge of vocal technique, musical literacy, ensemble skills, and related musical knowledge through rehearsal, performance, and study of a variety of high-quality 2-, 3-, and 4-part choral literature. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 6 to 8 Education Courses > **Subject:** Music Education > **SubSubject:** Choral Music >

Abbreviated Title: M/J CHORUS 3

Course Length: Year (Y)

Course Level: 2

Course Status: Course Approved

Grade Level(s): 6,7,8

Educator Certifications

Music (Elementary and Secondary Grades K-12)
Instrumental Music (Secondary Grades 7-12)
Instrumental Music (Elementary and Secondary Grades K-12)
Vocal Music (Elementary and Secondary Grades K-12)

M/J Chorus 4 (#1303030) 2020 - 2022 (current)

Course Standards

Name	Description
MU.68.C.1.1:	Develop strategies for listening to unfamiliar musical works. **Clarifications:** e.g., listening maps, active listening, checklists
MU.68.C.1.2:	Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent. **Clarifications:** e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title
MU.68.C.1.4:	Identify, aurally, a variety of vocal styles and ensembles. **Clarifications:** e.g., chant, spiritual, folk, opera, world, jazz, pop, solo, duet, trio, quartet, small ensembles, choirs
MU.68.C.2.1:	Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers. **Clarifications:** e.g., intonation, balance, blend, phrasing, rhythm
MU.68.C.2.2:	Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal. **Clarifications:** e.g., blend, balance, ensemble playing, sonority, technique, tone quality
MU.68.C.2.3:	Critique personal composition and/or improvisation, using simple criteria, to generate improvements with guidance from teachers and/or peers.
MU.68.C.3.1:	Apply specific criteria to evaluate why a musical work is an exemplar in a specific style or genre.
MU.68.F.1.1:	Create a composition and/or performance, using visual, kinesthetic, digital, and/or acoustic means to manipulate musical elements.
MU.68.F.2.1:	Describe several routes a composition or performance could travel from creator to consumer. **Clarifications:** e.g., MIDI and other technology, production, sharing on the Internet, home studios, professional recording studios, sales
MU.68.F.2.2:	Describe how concert attendance can financially impact a community. **Clarifications:** e.g., increased revenues at restaurants, hotels, and travel agencies; venue maintenance, parking attendants
MU.68.F.3.1:	Describe how studying music can enhance citizenship, leadership, and global thinking. **Clarifications:** e.g., dedication to mastering a task, problem-solving, self-discipline, dependability, ability to organize, cultural awareness, mutual respect
MU.68.F.3.2:	Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.
MU.68.F.3.3:	Identify the tasks involved in the compositional process and discuss how the process might be applied in the work place. **Clarifications:** e.g., idea, development, editing, selling, revising, testing, presenting
MU.68.H.1.2:	Identify the works of representative composers within a specific style or time period.
MU.68.H.1.3:	Describe how American music has been influenced by other cultures.
MU.68.H.1.4:	Classify authentic stylistic features in music originating from various cultures. **Clarifications:** e.g., rhythm, layered texture, key patterns, tonality, melodic line, quarter- or semi-tones, national folk melodies, improvisation, instrumentation, aural/oral traditions, drumming patterns
MU.68.H.1.5:	Using representative musical works by selected composers, classify compositional characteristics common to a specific time period and/or genre.
MU.68.H.2.1:	Describe the influence of historical events and periods on music composition and performance.
MU.68.H.2.2:	Analyze how technology has changed the way music is created, performed, acquired, and experienced. **Clarifications:** e.g., from harpsichord to piano; from phonograph to CD
MU.68.H.2.3:	Classify the literature being studied by genre, style, and/or time period.
MU.68.H.3.1:	Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration. **Clarifications:** e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural connections and traditions, ceremonial music, sales and advertising, communication
MU.68.H.3.2:	Discuss how the absence of music would affect other content areas and contexts. **Clarifications:** e.g., theatre and dance, movies, sporting events, video games, commercial advertising, social gatherings, civic and religious ceremonies, plays
MU.68.O.1.1:	Compare performances of a musical work to identify artistic choices made by performers. **Clarifications:** e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble
	Create a composition, manipulating musical elements and exploring the effects of those manipulations.

MU.68.O.2.1:	**Clarifications:** e.g., using electronic or paper-and-pencil means to experiment with timbre, melody, rhythm, harmony, form, tonality
MU.68.O.2.2:	Demonstrate knowledge of major and minor tonalities through performance and composition. **Clarifications:** e.g., scales; key signatures; relative major/minor; parallel major/minor
MU.68.O.3.1:	Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image. **Clarifications:** e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration
MU.68.O.3.2:	Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to other musical works.
MU.68.S.1.1:	Improvise rhythmic and melodic phrases to accompany familiar songs and/or standard harmonic progressions. **Clarifications:** e.g., blues, rock
MU.68.S.1.2:	Compose a short musical piece. **Clarifications:** e.g., using traditional, non-traditional, digital, or classroom instruments and/or voice
MU.68.S.1.3:	Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.
MU.68.S.1.4:	Sing or play melodies by ear with support from the teacher and/or peers. **Clarifications:** e.g., melodies using traditional classroom instruments and/or voice
MU.68.S.2.1:	Perform music from memory to demonstrate knowledge of the musical structure. **Clarifications:** e.g., basic themes, patterns, tonality, melody, harmony
MU.68.S.2.2:	Transfer performance techniques from familiar to unfamiliar pieces.
MU.68.S.3.1:	Sing and/or play age-appropriate repertoire expressively. **Clarifications:** e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response
MU.68.S.3.2:	Demonstrate proper vocal or instrumental technique. **Clarifications:** e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming
MU.68.S.3.3:	Sight-read standard exercises and simple repertoire. **Clarifications:** e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols
MU.68.S.3.4:	Compare written notation to aural examples and analyze for accuracy of rhythm and pitch. **Clarifications:** e.g., error detection, interval reinforcement
MU.68.S.3.5:	Notate rhythmic phrases and/or melodies, in varying simple meters, performed by someone else.
MU.68.S.3.6:	Develop and demonstrate efficient rehearsal strategies to apply skills and techniques. **Clarifications:** e.g., independently, collaboratively
LAFS.68.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.68.WHST.3.9:	Draw evidence from informational texts to support analysis reflection, and research.
LAFS.8.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 8 topics, texts, and issues, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions and decision-making, track progress toward specific goals and deadlines, and define individual roles as needed. c. Pose questions that connect the ideas of several speakers and respond to others' questions and comments with relevant evidence, observations, and ideas. d. Acknowledge new information expressed by others, and, when warranted, qualify or justify their own views in light of the evidence presented. **Standard Relation to Course: Supporting**
LAFS.8.SL.1.2:	Analyze the purpose of information presented in diverse media and formats (e.g., visually, quantitatively, orally) and evaluate the motives (e.g., social, commercial, political) behind its presentation.
LAFS.8.SL.1.3:	Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and relevance and sufficiency of the evidence and identifying when irrelevant evidence is introduced.
LAFS.8.SL.2.4:	Present claims and findings, emphasizing salient points in a focused, coherent manner with relevant evidence, sound valid reasoning, and well-chosen details; use appropriate eye contact, adequate volume, and clear pronunciation.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other

	mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
DA.68.S.2.1:	Sustain focused attention, respect, and discipline during classes and performances.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students with significant experience in a choral ensemble develop advanced knowledge of vocal techniques, music literacy, ensemble skills, and related musical knowledge through rehearsal, performance, and study of a variety of high-quality advanced choral literature. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. Course Standards

Name	Description
MU.68.C.1.1:	Develop strategies for listening to unfamiliar musical works. **Clarifications:** e.g., listening maps, active listening, checklists
MU.68.C.1.2:	Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent. **Clarifications:** e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title
MU.68.C.2.1:	Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers. **Clarifications:** e.g., intonation, balance, blend, phrasing, rhythm
MU.68.C.2.2:	Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal. **Clarifications:** e.g., blend, balance, ensemble playing, sonority, technique, tone quality
MU.68.H.2.3:	Classify the literature being studied by genre, style, and/or time period.
MU.68.O.1.1:	Compare performances of a musical work to identify artistic choices made by performers. **Clarifications:** e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble
MU.68.O.3.1:	Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image. **Clarifications:** e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration
MU.68.S.1.1:	Improvise rhythmic and melodic phrases to accompany familiar songs and/or standard harmonic progressions. **Clarifications:** e.g., blues, rock
MU.68.S.1.4:	Sing or play melodies by ear with support from the teacher and/or peers. **Clarifications:** e.g., melodies using traditional classroom instruments and/or voice
MU.68.S.2.1:	Perform music from memory to demonstrate knowledge of the musical structure. **Clarifications:** e.g., basic themes, patterns, tonality, melody, harmony
MU.68.S.2.2:	Transfer performance techniques from familiar to unfamiliar pieces.
MU.68.S.3.1:	Sing and/or play age-appropriate repertoire expressively. **Clarifications:** e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response
MU.68.S.3.2:	Demonstrate proper vocal or instrumental technique. **Clarifications:** e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming
MU.68.S.3.3:	Sight-read standard exercises and simple repertoire. **Clarifications:** e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols
MU.68.S.3.4:	Compare written notation to aural examples and analyze for accuracy of rhythm and pitch. **Clarifications:** e.g., error detection, interval reinforcement
MU.68.S.3.5:	Notate rhythmic phrases and/or melodies, in varying simple meters, performed by someone else.
MU.68.S.3.6:	Develop and demonstrate efficient rehearsal strategies to apply skills and techniques. **Clarifications:** e.g., independently, collaboratively
LAFS.6.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and issues, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions, set specific goals and deadlines, and define individual roles as needed. c. Pose and respond to specific questions with elaboration and detail by making comments that contribute to the topic, text, or issue under discussion. d. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing. **Standard Relation to Course: Supporting**

LAFS.6.SL.1.2:	Interpret information presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how it contributes to a topic, text, or issue under study.
LAFS.6.SL.1.3:	Delineate a speaker's argument and specific claims, distinguishing claims that are supported by reasons and evidence from claims that are not.
LAFS.6.SL.2.4:	Present claims and findings, sequencing ideas logically and using pertinent descriptions, facts, and details to accentuate main ideas or themes; use appropriate eye contact, adequate volume, and clear pronunciation.
LAFS.68.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students with little or no vocal experience develop musicianship, technical proficiency, and performance skills. Beginning musicians focus on development of skills and techniques through scales, etudes, and solo literature. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. Name	Description
MU.68.C.1.1:	Develop strategies for listening to unfamiliar musical works. **Clarifications:** e.g., listening maps, active listening, checklists
MU.68.C.1.2:	Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent. **Clarifications:** e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title
MU.68.C.2.1:	Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers. **Clarifications:** e.g., intonation, balance, blend, phrasing, rhythm
MU.68.C.2.2:	Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal. **Clarifications:** e.g., blend, balance, ensemble playing, sonority, technique, tone quality
MU.68.F.3.1:	Describe how studying music can enhance citizenship, leadership, and global thinking. **Clarifications:** e.g., dedication to mastering a task, problem-solving, self-discipline, dependability, ability to organize, cultural awareness, mutual respect
MU.68.H.2.2:	Analyze how technology has changed the way music is created, performed, acquired, and experienced. **Clarifications:** e.g., from harpsichord to piano; from phonograph to CD
MU.68.H.2.3:	Classify the literature being studied by genre, style, and/or time period.
MU.68.O.1.1:	Compare performances of a musical work to identify artistic choices made by performers. **Clarifications:** e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble
MU.68.O.2.2:	Demonstrate knowledge of major and minor tonalities through performance and composition. **Clarifications:** e.g., scales; key signatures; relative major/minor; parallel major/minor
MU.68.O.3.1:	Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image. **Clarifications:** e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration
MU.68.O.3.2:	Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to other musical works.
MU.68.S.1.1:	Improvise rhythmic and melodic phrases to accompany familiar songs and/or standard harmonic progressions. **Clarifications:** e.g., blues, rock
MU.68.S.1.4:	Sing or play melodies by ear with support from the teacher and/or peers. **Clarifications:** e.g., melodies using traditional classroom instruments and/or voice
MU.68.S.2.1:	Perform music from memory to demonstrate knowledge of the musical structure. **Clarifications:** e.g., basic themes, patterns, tonality, melody, harmony
MU.68.S.2.2:	Transfer performance techniques from familiar to unfamiliar pieces.
MU.68.S.3.1:	Sing and/or play age-appropriate repertoire expressively. **Clarifications:** e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response
MU.68.S.3.2:	Demonstrate proper vocal or instrumental technique. **Clarifications:** e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming
MU.68.S.3.3:	Sight-read standard exercises and simple repertoire. **Clarifications:** e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols
MU.68.S.3.4:	Compare written notation to aural examples and analyze for accuracy of rhythm and pitch. **Clarifications:** e.g., error detection, interval reinforcement
MU.68.S.3.5:	Notate rhythmic phrases and/or melodies, in varying simple meters, performed by someone else.

	Develop and demonstrate efficient rehearsal strategies to apply skills and techniques.
MU.68.S.3.6:	**Clarifications:** e.g., independently, collaboratively
LAFS.68.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.7.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 7 topics, texts, and issues, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions, track progress toward specific goals and deadlines, and define individual roles as needed. c. Pose questions that elicit elaboration and respond to others' questions and comments with relevant observations and ideas that bring the discussion back on topic as needed. d. Acknowledge new information expressed by others and, when warranted, modify their own views. **Standard Relation to Course: Supporting**
LAFS.7.SL.1.2:	Analyze the main ideas and supporting details presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how the ideas clarify a topic, text, or issue under study.
LAFS.7.SL.1.3:	Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and the relevance and sufficiency of the evidence.
LAFS.7.SL.2.4:	Present claims and findings, emphasizing salient points in a focused, coherent manner with pertinent descriptions, facts, details, and examples; use appropriate eye contact, adequate volume, and clear pronunciation.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 – 3(x – y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students build on previous instruction to strengthen their musicianship, technique, and performance skills through preparation of scales, etudes, and solo literature. Through problem-solving, critical thinking, and reflection, students develop the physical and cognitive skills necessary to be more disciplined performers. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area

concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

GENERAL INFORMATION

Course Number: 1303080

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 6 to 8 Education Courses > **Subject:** Music Education > **SubSubject:** Choral Music >

Abbreviated Title: M/J VOCAL TECNQS 2

Course Length: Year (Y)

Course Level: 2

Course Status: Course Approved

Grade Level(s): 6,7,8

Educator Certifications

Instrumental Music (Secondary Grades 7-12)
Instrumental Music (Elementary and Secondary Grades K-12)
Music (Elementary and Secondary Grades K-12)
Vocal Music (Elementary and Secondary Grades K-12)

M/J Vocal Ensemble 1 (#1303100) 2020 - 2022 (current)

Course Standards

Name	Description
MU.68.C.1.1:	Develop strategies for listening to unfamiliar musical works. **Clarifications:** e.g., listening maps, active listening, checklists
MU.68.C.1.2:	Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent. **Clarifications:** e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title
MU.68.C.2.1:	Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers. **Clarifications:** e.g., intonation, balance, blend, phrasing, rhythm
MU.68.C.2.2:	Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal. **Clarifications:** e.g., blend, balance, ensemble playing, sonority, technique, tone quality
MU.68.F.3.2:	Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.
MU.68.H.1.4:	Classify authentic stylistic features in music originating from various cultures. **Clarifications:** e.g., rhythm, layered texture, key patterns, tonality, melodic line, quarter- or semi-tones, national folk melodies, improvisation, instrumentation, aural/oral traditions, drumming patterns
MU.68.H.2.3:	Classify the literature being studied by genre, style, and/or time period.
MU.68.H.3.1:	Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration. **Clarifications:** e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural connections and traditions, ceremonial music, sales and advertising, communication
MU.68.O.3.1:	Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image. **Clarifications:** e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration
MU.68.O.3.2:	Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to other musical works.
MU.68.S.1.3:	Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.
MU.68.S.1.4:	Sing or play melodies by ear with support from the teacher and/or peers. **Clarifications:** e.g., melodies using traditional classroom instruments and/or voice
MU.68.S.2.2:	Transfer performance techniques from familiar to unfamiliar pieces.
MU.68.S.3.1:	Sing and/or play age-appropriate repertoire expressively. **Clarifications:** e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response
MU.68.S.3.2:	Demonstrate proper vocal or instrumental technique. **Clarifications:** e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming
MU.68.S.3.3:	Sight-read standard exercises and simple repertoire. **Clarifications:** e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols
MU.68.S.3.4:	Compare written notation to aural examples and analyze for accuracy of rhythm and pitch. **Clarifications:** e.g., error detection, interval reinforcement
MU.68.S.3.6:	Develop and demonstrate efficient rehearsal strategies to apply skills and techniques. **Clarifications:** e.g., independently, collaboratively
LAFS.6.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and issues, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions, set specific goals and deadlines, and define individual roles as needed. c. Pose and respond to specific questions with elaboration and detail by making comments that contribute to the topic, text, or issue under discussion. d. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing.

	Standard Relation to Course: Supporting
LAFS.6.SL.1.2:	Interpret information presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how it contributes to a topic, text, or issue under study.
LAFS.6.SL.1.3:	Delineate a speaker's argument and specific claims, distinguishing claims that are supported by reasons and evidence from claims that are not.
LAFS.6.SL.2.4:	Present claims and findings, sequencing ideas logically and using pertinent descriptions, facts, and details to accentuate main ideas or themes; use appropriate eye contact, adequate volume, and clear pronunciation.
LAFS.68.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.68.WHST.3.9:	Draw evidence from informational texts to support analysis reflection, and research.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students with little or no small vocal ensemble experience develop musicianship and performance skills as they study, rehearse, and perform high-quality ensemble literature in diverse styles. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:

Name	Description
MU.68.C.1.1:	Develop strategies for listening to unfamiliar musical works. **Clarifications:** e.g., listening maps, active listening, checklists
MU.68.C.1.2:	Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent. **Clarifications:** e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title
MU.68.C.2.1:	Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers. **Clarifications:** e.g., intonation, balance, blend, phrasing, rhythm
MU.68.C.2.2:	Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal. **Clarifications:** e.g., blend, balance, ensemble playing, sonority, technique, tone quality
MU.68.F.2.1:	Describe several routes a composition or performance could travel from creator to consumer. **Clarifications:** e.g., MIDI and other technology, production, sharing on the Internet, home studios, professional recording studios, sales
MU.68.F.3.1:	Describe how studying music can enhance citizenship, leadership, and global thinking. **Clarifications:** e.g., dedication to mastering a task, problem-solving, self-discipline, dependability, ability to organize, cultural awareness, mutual respect
MU.68.F.3.2:	Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.
MU.68.H.1.4:	Classify authentic stylistic features in music originating from various cultures. **Clarifications:** e.g., rhythm, layered texture, key patterns, tonality, melodic line, quarter- or semi-tones, national folk melodies, improvisation, instrumentation, aural/oral traditions, drumming patterns
MU.68.H.2.3:	Classify the literature being studied by genre, style, and/or time period.
MU.68.H.3.1:	Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration. **Clarifications:** e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural connections and traditions, ceremonial music, sales and advertising, communication
MU.68.H.3.2:	Discuss how the absence of music would affect other content areas and contexts. **Clarifications:** e.g., theatre and dance, movies, sporting events, video games, commercial advertising, social gatherings, civic and religious ceremonies, plays
MU.68.O.1.1:	Compare performances of a musical work to identify artistic choices made by performers. **Clarifications:** e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble
MU.68.O.3.1:	Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image. **Clarifications:** e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration
MU.68.O.3.2:	Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to other musical works.
MU.68.S.1.3:	Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.
MU.68.S.1.4:	Sing or play melodies by ear with support from the teacher and/or peers. **Clarifications:** e.g., melodies using traditional classroom instruments and/or voice
MU.68.S.2.1:	Perform music from memory to demonstrate knowledge of the musical structure. **Clarifications:** e.g., basic themes, patterns, tonality, melody, harmony
MU.68.S.2.2:	Transfer performance techniques from familiar to unfamiliar pieces.
MU.68.S.3.1:	Sing and/or play age-appropriate repertoire expressively. **Clarifications:** e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response
MU.68.S.3.2:	Demonstrate proper vocal or instrumental technique. **Clarifications:** e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming
	Sight-read standard exercises and simple repertoire.

MU.68.S.3.3:	**Clarifications:** e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols
MU.68.S.3.4:	Compare written notation to aural examples and analyze for accuracy of rhythm and pitch. **Clarifications:** e.g., error detection, interval reinforcement
MU.68.S.3.6:	Develop and demonstrate efficient rehearsal strategies to apply skills and techniques. **Clarifications:** e.g., independently, collaboratively
LAFS.68.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.68.WHST.3.9:	Draw evidence from informational texts to support analysis reflection, and research.
LAFS.7.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 7 topics, texts, and issues, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions, track progress toward specific goals and deadlines, and define individual roles as needed. c. ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students with previous vocal ensemble experience continue to build musicianship and performance skills through the study, rehearsal, and performance of high-quality ensemble literature in a variety of styles. Student musicians learn to self-assess and collaborate as they study relevant musical styles and time periods. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

MU.68.C.1.1:	Develop strategies for listening to unfamiliar musical works. **Clarifications:** e.g., listening maps, active listening, checklists
MU.68.C.1.2:	Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent. **Clarifications:** e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title
MU.68.C.2.1:	Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers. **Clarifications:** e.g., intonation, balance, blend, phrasing, rhythm
MU.68.C.2.2:	Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal. **Clarifications:** e.g., blend, balance, ensemble playing, sonority, technique, tone quality
MU.68.C.3.1:	Apply specific criteria to evaluate why a musical work is an exemplar in a specific style or genre.
MU.68.F.2.2:	Describe how concert attendance can financially impact a community. **Clarifications:** e.g., increased revenues at restaurants, hotels, and travel agencies; venue maintenance, parking attendants
MU.68.F.3.1:	Describe how studying music can enhance citizenship, leadership, and global thinking. **Clarifications:** e.g., dedication to mastering a task, problem-solving, self-discipline, dependability, ability to organize, cultural awareness, mutual respect
MU.68.F.3.2:	Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.
MU.68.H.1.1:	Describe the functions of music from various cultures and time periods.
MU.68.H.1.2:	Identify the works of representative composers within a specific style or time period.
MU.68.H.1.4:	Classify authentic stylistic features in music originating from various cultures. **Clarifications:** e.g., rhythm, layered texture, key patterns, tonality, melodic line, quarter- or semi-tones, national folk melodies, improvisation, instrumentation, aural/oral traditions, drumming patterns
MU.68.H.2.1:	Describe the influence of historical events and periods on music composition and performance.
MU.68.H.2.3:	Classify the literature being studied by genre, style, and/or time period.
MU.68.H.3.1:	Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration. **Clarifications:** e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural connections and traditions, ceremonial music, sales and advertising, communication
MU.68.H.3.2:	Discuss how the absence of music would affect other content areas and contexts. **Clarifications:** e.g., theatre and dance, movies, sporting events, video games, commercial advertising, social gatherings, civic and religious ceremonies, plays
MU.68.O.1.1:	Compare performances of a musical work to identify artistic choices made by performers. **Clarifications:** e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble
MU.68.O.2.2:	Demonstrate knowledge of major and minor tonalities through performance and composition. **Clarifications:** e.g., scales; key signatures; relative major/minor; parallel major/minor
MU.68.O.3.1:	Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image. **Clarifications:** e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration
MU.68.O.3.2:	Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to other musical works.
MU.68.S.1.3:	Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.
MU.68.S.1.4:	Sing or play melodies by ear with support from the teacher and/or peers. **Clarifications:** e.g., melodies using traditional classroom instruments and/or voice
MU.68.S.2.1:	Perform music from memory to demonstrate knowledge of the musical structure. **Clarifications:** e.g., basic themes, patterns, tonality, melody, harmony
MU.68.S.2.2:	Transfer performance techniques from familiar to unfamiliar pieces.

MU.68.S.3.1:	Sing and/or play age-appropriate repertoire expressively. **Clarifications:** e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response
MU.68.S.3.2:	Demonstrate proper vocal or instrumental technique. **Clarifications:** e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming
MU.68.S.3.3:	Sight-read standard exercises and simple repertoire. **Clarifications:** e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols
MU.68.S.3.4:	Compare written notation to aural examples and analyze for accuracy of rhythm and pitch. **Clarifications:** e.g., error detection, interval reinforcement
MU.68.S.3.6:	Develop and demonstrate efficient rehearsal strategies to apply skills and techniques. **Clarifications:** e.g., independently, collaboratively
LAFS.68.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.68.WHST.3.9:	Draw evidence from informational texts to support analysis reflection, and research.
LAFS.8.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 8 topics, texts, and issues, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions and decision-making, track progress toward specific goals and deadlines, and define individual roles as needed. c. Pose questions that connect the ideas of several speakers and respond to others' questions and comments with relevant evidence, observations, and ideas. d. Acknowledge new information expressed by others, and, when warranted, qualify or justify their own views in light of the evidence presented. **Standard Relation to Course: Supporting**
LAFS.8.SL.1.2:	Analyze the purpose of information presented in diverse media and formats (e.g., visually, quantitatively, orally) and evaluate the motives (e.g., social, commercial, political) behind its presentation.
LAFS.8.SL.1.3:	Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and relevance and sufficiency of the evidence and identifying when irrelevant evidence is introduced.
LAFS.8.SL.2.4:	Present claims and findings, emphasizing salient points in a focused, coherent manner with relevant evidence, sound valid reasoning, and well-chosen details; use appropriate eye contact, adequate volume, and clear pronunciation.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 – 3(x – y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students continue to build musicianship and performance skills through the study, rehearsal, and performance of increasingly challenging, high-quality vocal ensemble literature. Student musicians strengthen their techniques, ensemble skills, music literacy, and analytical skills as they study relevant history, cultures, and music genres. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 6 to 8 Education Courses > **Subject:** Music Education > **SubSubject:** Choral Music >

Abbreviated Title: M/J VOCAL ENS 3

Course Length: Year (Y)

Course Level: 2

Course Status: Course Approved

Grade Level(s): 6,7,8

Educator Certifications

Instrumental Music (Secondary Grades 7-12)
Instrumental Music (Elementary and Secondary Grades K-12)
Music (Elementary and Secondary Grades K-12)
Vocal Music (Elementary and Secondary Grades K-12)

M/J Music Technology (#1303150) 2020 - 2022 (current)

Course Standards

Name	Description
MU.68.C.2.1:	Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers. **Clarifications:** e.g., intonation, balance, blend, phrasing, rhythm
MU.68.C.2.3:	Critique personal composition and/or improvisation, using simple criteria, to generate improvements with guidance from teachers and/or peers.
MU.68.F.1.1:	Create a composition and/or performance, using visual, kinesthetic, digital, and/or acoustic means to manipulate musical elements.
MU.68.F.1.2:	Create an original composition that reflects various performances that use "traditional" and contemporary technologies. **Clarifications:** e.g., MIDI, Internet video resources, personal digital assistants, MP3 players, cell phones, digital recording, music software
MU.68.F.2.1:	Describe several routes a composition or performance could travel from creator to consumer. **Clarifications:** e.g., MIDI and other technology, production, sharing on the Internet, home studios, professional recording studios, sales
MU.68.F.3.2:	Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.
MU.68.F.3.3:	Identify the tasks involved in the compositional process and discuss how the process might be applied in the work place. **Clarifications:** e.g., idea, development, editing, selling, revising, testing, presenting
MU.68.H.2.2:	Analyze how technology has changed the way music is created, performed, acquired, and experienced. **Clarifications:** e.g., from harpsichord to piano; from phonograph to CD
MU.68.H.3.1:	Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration. **Clarifications:** e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural connections and traditions, ceremonial music, sales and advertising, communication
MU.68.O.2.1:	Create a composition, manipulating musical elements and exploring the effects of those manipulations. **Clarifications:** e.g., using electronic or paper-and-pencil means to experiment with timbre, melody, rhythm, harmony, form, tonality
MU.68.O.3.1:	Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image. **Clarifications:** e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration
MU.68.S.1.2:	Compose a short musical piece. **Clarifications:** e.g., using traditional, non-traditional, digital, or classroom instruments and/or voice
MU.68.S.1.3:	Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.
MU.68.S.1.8:	Demonstrate specified mixing and editing techniques using selected software and hardware.
LAFS.6.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and issues, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions, set specific goals and deadlines, and define individual roles as needed. c. Pose and respond to specific questions with elaboration and detail by making comments that contribute to the topic, text, or issue under discussion. d. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing. **Standard Relation to Course: Supporting**
LAFS.6.SL.1.2:	Interpret information presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how it contributes to a topic, text, or issue under study.
LAFS.6.SL.1.3:	Delineate a speaker's argument and specific claims, distinguishing claims that are supported by reasons and evidence from claims that are not.
LAFS.6.SL.2.4:	Present claims and findings, sequencing ideas logically and using pertinent descriptions, facts, and details to accentuate main ideas or themes; use appropriate eye contact, adequate volume, and clear pronunciation.
LAFS.68.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.
LAFS.68.WHST.3.7:	Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.
LAFS.68.WHST.3.9:	Draw evidence from informational texts to support analysis reflection, and research.
	Use appropriate tools strategically. Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools

MAFS.K12.MP.5.1:	might be helpful, recognizing both the insight to be gained and their limitations. DA.68.S.2.1:	Sustain focused attention, respect, and discipline during classes and performances.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students investigate the fundamental applications, tools, history, and aesthetics of music technology. Student musicians explore traditional, current, and emerging technologies, including personal devices; and use them to explore, capture, create, arrange, manipulate, reproduce, and distribute music. Public performances may serve as a resource for specific instructional goals. Students may be expected to attend one or more performances outside the school day to support, extend, and assess learning in the classroom.

Name	Description
MU.68.C.1.1:	Develop strategies for listening to unfamiliar musical works. **Clarifications:** e.g., listening maps, active listening, checklists
MU.68.C.1.2:	Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent. **Clarifications:** e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title
MU.68.C.2.1:	Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers. **Clarifications:** e.g., intonation, balance, blend, phrasing, rhythm
MU.68.C.2.2:	Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal. **Clarifications:** e.g., blend, balance, ensemble playing, sonority, technique, tone quality
MU.68.F.3.2:	Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.
MU.68.H.1.4:	Classify authentic stylistic features in music originating from various cultures. **Clarifications:** e.g., rhythm, layered texture, key patterns, tonality, melodic line, quarter- or semi-tones, national folk melodies, improvisation, instrumentation, aural/oral traditions, drumming patterns
MU.68.H.2.3:	Classify the literature being studied by genre, style, and/or time period.
MU.68.H.3.1:	Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration. **Clarifications:** e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural connections and traditions, ceremonial music, sales and advertising, communication
MU.68.O.3.1:	Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image. **Clarifications:** e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration
MU.68.O.3.2:	Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to other musical works.
MU.68.S.1.3:	Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.
MU.68.S.1.4:	Sing or play melodies by ear with support from the teacher and/or peers. **Clarifications:** e.g., melodies using traditional classroom instruments and/or voice
MU.68.S.2.2:	Transfer performance techniques from familiar to unfamiliar pieces.
MU.68.S.3.1:	Sing and/or play age-appropriate repertoire expressively. **Clarifications:** e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response
MU.68.S.3.2:	Demonstrate proper vocal or instrumental technique. **Clarifications:** e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming
MU.68.S.3.3:	Sight-read standard exercises and simple repertoire. **Clarifications:** e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols
MU.68.S.3.4:	Compare written notation to aural examples and analyze for accuracy of rhythm and pitch. **Clarifications:** e.g., error detection, interval reinforcement
MU.68.S.3.6:	Develop and demonstrate efficient rehearsal strategies to apply skills and techniques. **Clarifications:** e.g., independently, collaboratively
LAFS.6.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and issues, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions, set specific goals and deadlines, and define individual roles as needed. c. Pose and respond to specific questions with elaboration and detail by making comments that contribute to the topic, text, or issue under discussion. d. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing.

	Standard Relation to Course: Supporting
LAFS.6.SL.1.2:	Interpret information presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how it contributes to a topic, text, or issue under study.
LAFS.6.SL.1.3:	Delineate a speaker's argument and specific claims, distinguishing claims that are supported by reasons and evidence from claims that are not.
LAFS.6.SL.2.4:	Present claims and findings, sequencing ideas logically and using pertinent descriptions, facts, and details to accentuate main ideas or themes; use appropriate eye contact, adequate volume, and clear pronunciation.
LAFS.68.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.68.WHST.3.9:	Draw evidence from informational texts to support analysis reflection, and research.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students with little or no small vocal or instrumental ensemble experience develop musicianship and performance skills as they study, rehearse, and perform high-quality ensemble literature in diverse styles. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course, if used for an instrumental ensemble, may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. Name	Description
MU.68.C.1.1:	Develop strategies for listening to unfamiliar musical works. **Clarifications:** e.g., listening maps, active listening, checklists
MU.68.C.1.2:	Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent. **Clarifications:** e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title
MU.68.C.2.1:	Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers. **Clarifications:** e.g., intonation, balance, blend, phrasing, rhythm
MU.68.C.2.2:	Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal. **Clarifications:** e.g., blend, balance, ensemble playing, sonority, technique, tone quality
MU.68.F.2.1:	Describe several routes a composition or performance could travel from creator to consumer. **Clarifications:** e.g., MIDI and other technology, production, sharing on the Internet, home studios, professional recording studios, sales
MU.68.F.3.1:	Describe how studying music can enhance citizenship, leadership, and global thinking. **Clarifications:** e.g., dedication to mastering a task, problem-solving, self-discipline, dependability, ability to organize, cultural awareness, mutual respect
MU.68.F.3.2:	Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.
MU.68.H.1.4:	Classify authentic stylistic features in music originating from various cultures. **Clarifications:** e.g., rhythm, layered texture, key patterns, tonality, melodic line, quarter- or semi-tones, national folk melodies, improvisation, instrumentation, aural/oral traditions, drumming patterns
MU.68.H.2.3:	Classify the literature being studied by genre, style, and/or time period.
MU.68.H.3.1:	Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration. **Clarifications:** e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural connections and traditions, ceremonial music, sales and advertising, communication
MU.68.H.3.2:	Discuss how the absence of music would affect other content areas and contexts. **Clarifications:** e.g., theatre and dance, movies, sporting events, video games, commercial advertising, social gatherings, civic and religious ceremonies, plays
MU.68.O.1.1:	Compare performances of a musical work to identify artistic choices made by performers. **Clarifications:** e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble
MU.68.O.3.1:	Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image. **Clarifications:** e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration
MU.68.O.3.2:	Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to other musical works.
MU.68.S.1.3:	Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.
MU.68.S.1.4:	Sing or play melodies by ear with support from the teacher and/or peers. **Clarifications:** e.g., melodies using traditional classroom instruments and/or voice
MU.68.S.2.1:	Perform music from memory to demonstrate knowledge of the musical structure. **Clarifications:** e.g., basic themes, patterns, tonality, melody, harmony
MU.68.S.2.2:	Transfer performance techniques from familiar to unfamiliar pieces.
MU.68.S.3.1:	Sing and/or play age-appropriate repertoire expressively. **Clarifications:** e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response
MU.68.S.3.2:	Demonstrate proper vocal or instrumental technique. **Clarifications:** e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming
	Sight-read standard exercises and simple repertoire.

MU.68.S.3.3:	**Clarifications:** e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols
MU.68.S.3.4:	Compare written notation to aural examples and analyze for accuracy of rhythm and pitch. **Clarifications:** e.g., error detection, interval reinforcement
MU.68.S.3.6:	Develop and demonstrate efficient rehearsal strategies to apply skills and techniques. **Clarifications:** e.g., independently, collaboratively
LAFS.68.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.68.WHST.3.9:	Draw evidence from informational texts to support analysis reflection, and research.
LAFS.7.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 7 topics, texts, and issues, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions, track progress toward specific goals and deadlines, and define individual roles as needed. c. Pose questions that elicit elaboration and respond to others' questions and comments with relevant observations and ideas that bring the discussion back on topic as needed. d. Acknowledge new information expressed by others and, when warranted, modify their own views. **Standard Relation to Course: Supporting**
LAFS.7.SL.1.2:	Analyze the main ideas and supporting details presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how the ideas clarify a topic, text, or issue under study.
LAFS.7.SL.1.3:	Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and the relevance and sufficiency of the evidence.
LAFS.7.SL.2.4:	Present claims and findings, emphasizing salient points in a focused, coherent manner with pertinent descriptions, facts, details, and examples; use appropriate eye contact, adequate volume, and clear pronunciation.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students with previous vocal or instrumental ensemble experience continue to build musicianship and performance skills through the study, rehearsal, and performance of high-quality ensemble literature in a variety of styles. Student musicians learn to self-assess and collaborate as they study relevant musical styles and time periods. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course, if used for an instrumental ensemble, may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

M/J Music Ensemble 3 (#1303220) 2020 - 2022 (current)

Course Standards

Name	Description
MU.68.C.1.1:	Develop strategies for listening to unfamiliar musical works. **Clarifications:** e.g., listening maps, active listening, checklists
MU.68.C.1.2:	Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent. **Clarifications:** e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title
MU.68.C.2.1:	Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers. **Clarifications:** e.g., intonation, balance, blend, phrasing, rhythm
MU.68.C.2.2:	Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal. **Clarifications:** e.g., blend, balance, ensemble playing, sonority, technique, tone quality
MU.68.C.3.1:	Apply specific criteria to evaluate why a musical work is an exemplar in a specific style or genre.
MU.68.F.2.2:	Describe how concert attendance can financially impact a community. **Clarifications:** e.g., increased revenues at restaurants, hotels, and travel agencies; venue maintenance, parking attendants
MU.68.F.3.1:	Describe how studying music can enhance citizenship, leadership, and global thinking. **Clarifications:** e.g., dedication to mastering a task, problem-solving, self-discipline, dependability, ability to organize, cultural awareness, mutual respect
MU.68.F.3.2:	Investigate and discuss laws that protect intellectual property, and practice safe, legal, and responsible acquisition and use of musical media.
MU.68.H.1.1:	Describe the functions of music from various cultures and time periods.
MU.68.H.1.2:	Identify the works of representative composers within a specific style or time period.
MU.68.H.1.4:	Classify authentic stylistic features in music originating from various cultures. **Clarifications:** e.g., rhythm, layered texture, key patterns, tonality, melodic line, quarter- or semi-tones, national folk melodies, improvisation, instrumentation, aural/oral traditions, drumming patterns
MU.68.H.2.1:	Describe the influence of historical events and periods on music composition and performance.
MU.68.H.2.3:	Classify the literature being studied by genre, style, and/or time period.
MU.68.H.3.1:	Identify connections among music and other content areas and/or contexts through interdisciplinary collaboration. **Clarifications:** e.g., school: other music classes, social studies, dance, physical education, science, health, math, world languages; community: cultural connections and traditions, ceremonial music, sales and advertising, communication
MU.68.H.3.2:	Discuss how the absence of music would affect other content areas and contexts. **Clarifications:** e.g., theatre and dance, movies, sporting events, video games, commercial advertising, social gatherings, civic and religious ceremonies, plays
MU.68.O.1.1:	Compare performances of a musical work to identify artistic choices made by performers. **Clarifications:** e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble
MU.68.O.2.2:	Demonstrate knowledge of major and minor tonalities through performance and composition. **Clarifications:** e.g., scales; key signatures; relative major/minor; parallel major/minor
MU.68.O.3.1:	Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image. **Clarifications:** e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration
MU.68.O.3.2:	Perform the expressive elements of a musical work indicated by the musical score and/or conductor, and transfer new knowledge and experiences to other musical works.
MU.68.S.1.3:	Arrange a short musical piece by manipulating melody, form, rhythm, and/or voicing.
MU.68.S.1.4:	Sing or play melodies by ear with support from the teacher and/or peers. **Clarifications:** e.g., melodies using traditional classroom instruments and/or voice
MU.68.S.2.1:	Perform music from memory to demonstrate knowledge of the musical structure. **Clarifications:** e.g., basic themes, patterns, tonality, melody, harmony
MU.68.S.2.2:	Transfer performance techniques from familiar to unfamiliar pieces.

MU.68.S.3.1:	Sing and/or play age-appropriate repertoire expressively. **Clarifications:** e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response
MU.68.S.3.2:	Demonstrate proper vocal or instrumental technique. **Clarifications:** e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming
MU.68.S.3.3:	Sight-read standard exercises and simple repertoire. **Clarifications:** e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols
MU.68.S.3.4:	Compare written notation to aural examples and analyze for accuracy of rhythm and pitch. **Clarifications:** e.g., error detection, interval reinforcement
MU.68.S.3.6:	Develop and demonstrate efficient rehearsal strategies to apply skills and techniques. **Clarifications:** e.g., independently, collaboratively
LAFS.68.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.68.WHST.3.9:	Draw evidence from informational texts to support analysis reflection, and research.
LAFS.8.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 8 topics, texts, and issues, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions and decision-making, track progress toward specific goals and deadlines, and define individual roles as needed. c. Pose questions that connect the ideas of several speakers and respond to others' questions and comments with relevant evidence, observations, and ideas. d. Acknowledge new information expressed by others, and, when warranted, qualify or justify their own views in light of the evidence presented. **Standard Relation to Course: Supporting**
LAFS.8.SL.1.2:	Analyze the purpose of information presented in diverse media and formats (e.g., visually, quantitatively, orally) and evaluate the motives (e.g., social, commercial, political) behind its presentation.
LAFS.8.SL.1.3:	Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and relevance and sufficiency of the evidence and identifying when irrelevant evidence is introduced.
LAFS.8.SL.2.4:	Present claims and findings, emphasizing salient points in a focused, coherent manner with relevant evidence, sound valid reasoning, and well-chosen details; use appropriate eye contact, adequate volume, and clear pronunciation.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students continue to build musicianship and performance skills through the study, rehearsal, and performance of increasingly challenging, high-quality vocal or instrumental ensemble literature. Student musicians strengthen their techniques, ensemble skills, music literacy, and analytical skills as they study relevant history, cultures, and music genres. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course, if used for an instrumental ensemble, may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

Name	Description
MU.68.C.1.1:	Develop strategies for listening to unfamiliar musical works. **Clarifications:** e.g., listening maps, active listening, checklists
MU.68.C.1.2:	Compare, using correct music vocabulary, the aesthetic impact of a performance to one's own hypothesis of the composer's intent. **Clarifications:** e.g., quality recordings, peer group and individual performances, composer notes, instrumentation, expressive elements, title
MU.68.C.2.1:	Critique personal performance, experiment with a variety of solutions, and make appropriate adjustments with guidance from teachers and peers. **Clarifications:** e.g., intonation, balance, blend, phrasing, rhythm
MU.68.C.2.2:	Critique, using correct music vocabulary, changes in one's own or others' musical performance resulting from practice or rehearsal. **Clarifications:** e.g., blend, balance, ensemble playing, sonority, technique, tone quality
MU.68.H.2.3:	Classify the literature being studied by genre, style, and/or time period.
MU.68.O.1.1:	Compare performances of a musical work to identify artistic choices made by performers. **Clarifications:** e.g., rhythm, melody, timbre, form, tonality, harmony, expressive elements; choral, orchestral, band, ensemble
MU.68.O.3.1:	Describe how the combination of instrumentation and expressive elements in a musical work can convey a specific thought, idea, mood, and/or image. **Clarifications:** e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre, rhythm, orchestration
MU.68.S.1.1:	Improvise rhythmic and melodic phrases to accompany familiar songs and/or standard harmonic progressions. **Clarifications:** e.g., blues, rock
MU.68.S.1.4:	Sing or play melodies by ear with support from the teacher and/or peers. **Clarifications:** e.g., melodies using traditional classroom instruments and/or voice
MU.68.S.2.1:	Perform music from memory to demonstrate knowledge of the musical structure. **Clarifications:** e.g., basic themes, patterns, tonality, melody, harmony
MU.68.S.2.2:	Transfer performance techniques from familiar to unfamiliar pieces.
MU.68.S.3.1:	Sing and/or play age-appropriate repertoire expressively. **Clarifications:** e.g., technique, phrasing, dynamics, tone quality, blend, balance, intonation, kinesthetic support/response
MU.68.S.3.2:	Demonstrate proper vocal or instrumental technique. **Clarifications:** e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming
MU.68.S.3.3:	Sight-read standard exercises and simple repertoire. **Clarifications:** e.g., note and rest values, key signatures, time signatures, expressive markings, special harmonic and/or notation symbols
MU.68.S.3.4:	Compare written notation to aural examples and analyze for accuracy of rhythm and pitch. **Clarifications:** e.g., error detection, interval reinforcement
MU.68.S.3.5:	Notate rhythmic phrases and/or melodies, in varying simple meters, performed by someone else.
MU.68.S.3.6:	Develop and demonstrate efficient rehearsal strategies to apply skills and techniques. **Clarifications:** e.g., independently, collaboratively
LAFS.6.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and issues, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions, set specific goals and deadlines, and define individual roles as needed. c. Pose and respond to specific questions with elaboration and detail by making comments that contribute to the topic, text, or issue under discussion. d. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing. **Standard Relation to Course: Supporting**

LAFS.6.SL.1.2:	Interpret information presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how it contributes to a topic, text, or issue under study.
LAFS.6.SL.1.3:	Delineate a speaker's argument and specific claims, distinguishing claims that are supported by reasons and evidence from claims that are not.
LAFS.6.SL.2.4:	Present claims and findings, sequencing ideas logically and using pertinent descriptions, facts, and details to accentuate main ideas or themes; use appropriate eye contact, adequate volume, and clear pronunciation.
LAFS.68.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students with little or no instrumental or vocal experience develop musicianship, technical proficiency, and performance skills. Beginning musicians focus on development of skills and techniques through scales, etudes, and solo literature. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course, if used for an instrumental class, may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. Course Number: 1303230

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 6 to 8 Education Courses > **Subject:** Music Education > **SubSubject:** General Music >
Abbreviated Title: M/J MUSIC TECNQS 1
Course Length: Year (Y)

Course Level: 2

Course Status: Course Approved

Grade Level(s): 6,7,8

Educator Certifications

Instrumental Music (Secondary Grades 7-12)
Instrumental Music (Elementary and Secondary Grades K-12)
Music (Elementary and Secondary Grades K-12)
Vocal Music (Elementary and Secondary Grades K-12)

Chorus 1 (#1303300) 2020 - 2022 (current)

Course Standards

Name	Description
MU.912.C.1.1:	Apply listening strategies to promote appreciation and understanding of unfamiliar musical works. **Clarifications:** e.g., listening maps, active listening, checklists
MU.912.C.1.2:	Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the composer's intent. **Clarifications:** e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title
MU.912.C.1.4:	Compare and perform a variety of vocal styles and ensembles.
MU.912.C.2.1:	Evaluate and make appropriate adjustments to personal performance in solo and ensembles.
MU.912.C.2.2:	Evaluate performance quality in recorded and/or live performances.
MU.912.C.2.3:	Evaluate one's own or other's compositions and/or improvisations and generate improvements independently or cooperatively.
MU.912.C.3.1:	Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.
MU.912.F.3.1:	Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of leadership in school and/or non-school settings.
MU.912.F.3.2:	Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.
MU.912.F.3.3:	Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace.
MU.912.H.1.1:	Investigate and discuss how a culture's traditions are reflected through its music. **Clarifications:** e.g., patriotic, folk, celebration, entertainment, spiritual
MU.912.H.2.1:	Evaluate the social impact of music on specific historical periods.
MU.912.H.3.1:	Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects musical performance. **Clarifications:** e.g., acoustics, sound amplification, materials, mechanics
MU.912.O.1.1:	Evaluate the organizational principles and conventions in musical works and discuss their effect on structure. **Clarifications:** e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble
MU.912.O.2.1:	Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.
MU.912.O.3.1:	Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer. **Clarifications:** e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm, orchestration
MU.912.O.3.2:	Interpret and perform expressive elements indicated by the musical score and/or conductor.
MU.912.S.1.1:	Improvise rhythmic and melodic phrases over harmonic progressions. **Clarifications:** e.g., using text or scat syllables
MU.912.S.1.4:	Perform and notate, independently and accurately, melodies by ear. **Clarifications:** e.g., singing, playing, writing
MU.912.S.2.1:	Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature. **Clarifications:** e.g., memorization, sequential process
MU.912.S.2.2:	Transfer expressive elements and performance techniques from one piece of music to another.
MU.912.S.3.1:	Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.
MU.912.S.3.2:	Sight-read music accurately and expressively to show synthesis of skills. **Clarifications:** e.g., musical elements, expressive qualities, performance technique
MU.912.S.3.3:	Transcribe aurally presented songs into melodic and/or rhythmic notation to show synthesis of aural and notational skills.
MU.912.S.3.4:	Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.
MU.912.S.3.5:	Develop and demonstrate proper vocal or instrumental technique. **Clarifications:**

	e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming
LAFS.910.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 9–10 texts and topics.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented. **Standard Relation to Course: Supporting**
LAFS.910.SL.1.2:	Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.
LAFS.910.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.
LAFS.910.SL.2.4:	Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.
LAFS.910.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.910.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
DA.912.S.2.1:	Sustain focused attention, respect, and discipline during class, rehearsal, and performance.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

This year-long, entry-level class, designed for students with little or no choral experience, promotes the enjoyment and appreciation of music through performance of beginning choral repertoire from a variety of times and places. Rehearsals focus on the development of critical listening skills; foundational instrumental technique and skills, music literacy, and ensemble skills; and aesthetic musical awareness culminating in periodic public performances.

GENERAL NOTES

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

Special Note: This course may require students to participate in extra rehearsals and performances beyond the school day.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

Course Standards

Name	Description
MU.912.C.1.1:	Apply listening strategies to promote appreciation and understanding of unfamiliar musical works. **Clarifications:** e.g., listening maps, active listening, checklists
MU.912.C.1.2:	Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the composer's intent. **Clarifications:** e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title
MU.912.C.1.4:	Compare and perform a variety of vocal styles and ensembles.
MU.912.C.2.1:	Evaluate and make appropriate adjustments to personal performance in solo and ensembles.
MU.912.C.2.2:	Evaluate performance quality in recorded and/or live performances.
MU.912.C.2.3:	Evaluate one's own or other's compositions and/or improvisations and generate improvements independently or cooperatively.
MU.912.C.3.1:	Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.
MU.912.F.3.1:	Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of leadership in school and/or non-school settings.
MU.912.F.3.2:	Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.
MU.912.F.3.3:	Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace.
MU.912.H.1.1:	Investigate and discuss how a culture's traditions are reflected through its music. **Clarifications:** e.g., patriotic, folk, celebration, entertainment, spiritual
MU.912.H.1.2:	Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class. **Clarifications:** e.g., vocal, instrumental, guitar, keyboard, electronic, handbells
MU.912.H.1.4:	Analyze how Western music has been influenced by historical and current world cultures.
MU.912.H.1.5:	Analyze music within cultures to gain understanding of authentic performance practices.
MU.912.H.2.1:	Evaluate the social impact of music on specific historical periods.
MU.912.H.2.4:	Examine the effects of developing technology on composition, performance, and acquisition of music.
MU.912.H.3.1:	Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects musical performance. **Clarifications:** e.g., acoustics, sound amplification, materials, mechanics
MU.912.H.3.2:	Combine personal interest with skills and knowledge from a non-music class to explore, design, and present a music-based or music-enhanced topic of interest to demonstrate the ability to make transfers across contexts. **Clarifications:** e.g., music and health, Holocaust, tolerance, African American history, world languages, scientific research, data analysis, problem-solving, public speaking
MU.912.O.1.1:	Evaluate the organizational principles and conventions in musical works and discuss their effect on structure. **Clarifications:** e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble
MU.912.O.2.1:	Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.
MU.912.O.3.1:	Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer. **Clarifications:** e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm, orchestration
MU.912.O.3.2:	Interpret and perform expressive elements indicated by the musical score and/or conductor.
MU.912.S.1.1:	Improvise rhythmic and melodic phrases over harmonic progressions. **Clarifications:** e.g., using text or scat syllables
MU.912.S.1.4:	Perform and notate, independently and accurately, melodies by ear. **Clarifications:** e.g., singing, playing, writing
MU.912.S.2.1:	Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature. **Clarifications:**

	e.g., memorization, sequential process
MU.912.S.2.2:	Transfer expressive elements and performance techniques from one piece of music to another.
MU.912.S.3.1:	Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.
MU.912.S.3.2:	Sight-read music accurately and expressively to show synthesis of skills. **Clarifications:** e.g., musical elements, expressive qualities, performance technique
MU.912.S.3.3:	Transcribe aurally presented songs into melodic and/or rhythmic notation to show synthesis of aural and notational skills.
MU.912.S.3.4:	Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.
MU.912.S.3.5:	Develop and demonstrate proper vocal or instrumental technique. **Clarifications:** e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming
LAFS.910.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 9–10 texts and topics.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented. **Standard Relation to Course: Supporting**
LAFS.910.SL.1.2:	Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.
LAFS.910.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.
LAFS.910.SL.2.4:	Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.
LAFS.910.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.910.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
DA.912.F.3.8:	Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.
DA.912.S.2.1:	Sustain focused attention, respect, and discipline during class, rehearsal, and performance.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

This year-long, beginning-level class, designed for students with one year of experience or less in a choral performing group, promotes the enjoyment and appreciation of music through performance of basic, high-quality choral music. Rehearsals focus on the development of critical listening/aural skills; foundational instrumental technique and skills, music literacy, and ensemble skills; and aesthetic musical awareness culminating in periodic public performances.

GENERAL NOTES

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

Special Note: This course may require students to participate in extra rehearsals and performances beyond the school day.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

Course Standards

Name	Description
MU.912.C.1.1:	Apply listening strategies to promote appreciation and understanding of unfamiliar musical works. **Clarifications:** e.g., listening maps, active listening, checklists
MU.912.C.1.2:	Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the composer's intent. **Clarifications:** e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title
MU.912.C.1.4:	Compare and perform a variety of vocal styles and ensembles.
MU.912.C.2.1:	Evaluate and make appropriate adjustments to personal performance in solo and ensembles.
MU.912.C.2.2:	Evaluate performance quality in recorded and/or live performances.
MU.912.C.2.3:	Evaluate one's own or other's compositions and/or improvisations and generate improvements independently or cooperatively.
MU.912.C.3.1:	Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.
MU.912.F.3.1:	Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of leadership in school and/or non-school settings.
MU.912.F.3.2:	Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.
MU.912.F.3.3:	Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace.
MU.912.F.3.4:	Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.
MU.912.H.1.1:	Investigate and discuss how a culture's traditions are reflected through its music. **Clarifications:** e.g., patriotic, folk, celebration, entertainment, spiritual
MU.912.H.1.2:	Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class. **Clarifications:** e.g., vocal, instrumental, guitar, keyboard, electronic, handbells
MU.912.H.1.3:	Compare two or more works of a composer across performance media. **Clarifications:** e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto
MU.912.H.1.4:	Analyze how Western music has been influenced by historical and current world cultures.
MU.912.H.1.5:	Analyze music within cultures to gain understanding of authentic performance practices.
MU.912.H.2.1:	Evaluate the social impact of music on specific historical periods.
MU.912.H.2.3:	Analyze the evolution of a music genre. **Clarifications:** e.g., jazz, blues
MU.912.H.3.1:	Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects musical performance. **Clarifications:** e.g., acoustics, sound amplification, materials, mechanics
MU.912.H.3.2:	Combine personal interest with skills and knowledge from a non-music class to explore, design, and present a music-based or music-enhanced topic of interest to demonstrate the ability to make transfers across contexts. **Clarifications:** e.g., music and health, Holocaust, tolerance, African American history, world languages, scientific research, data analysis, problem-solving, public speaking
MU.912.O.1.1:	Evaluate the organizational principles and conventions in musical works and discuss their effect on structure. **Clarifications:** e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble
MU.912.O.2.1:	Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.
MU.912.O.3.1:	Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer. **Clarifications:** e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm, orchestration
MU.912.O.3.2:	Interpret and perform expressive elements indicated by the musical score and/or conductor.
MU.912.S.1.1:	Improvise rhythmic and melodic phrases over harmonic progressions. **Clarifications:**

	e.g., using text or scat syllables
MU.912.S.1.4:	Perform and notate, independently and accurately, melodies by ear. **Clarifications:** e.g., singing, playing, writing
MU.912.S.2.1:	Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature. **Clarifications:** e.g., memorization, sequential process
MU.912.S.2.2:	Transfer expressive elements and performance techniques from one piece of music to another.
MU.912.S.3.1:	Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.
MU.912.S.3.2:	Sight-read music accurately and expressively to show synthesis of skills. **Clarifications:** e.g., musical elements, expressive qualities, performance technique
MU.912.S.3.3:	Transcribe aurally presented songs into melodic and/or rhythmic notation to show synthesis of aural and notational skills.
MU.912.S.3.4:	Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.
MU.912.S.3.5:	Develop and demonstrate proper vocal or instrumental technique. **Clarifications:** e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming
LAFS.1112.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics.
LAFS.1112.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed. c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives. d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task. **Standard Relation to Course: Supporting**
LAFS.1112.SL.1.2:	Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.
LAFS.1112.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.
LAFS.1112.SL.2.4:	Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.
LAFS.1112.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.1112.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.

	Standard Relation to Course: Supporting
DA.912.F.3.8:	Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.
DA.912.S.2.1:	Sustain focused attention, respect, and discipline during class, rehearsal, and performance.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

This year-long, formative class, designed for students with previous participation in a school chorus who have basic knowledge of note-reading and vocal technique, concentrates on providing students opportunities to strengthen existing skills in critical listening, vocal techniques, and ensemble performance using high-quality three- and four-part choral literature. Rehearsals focus on gaining independence in music literacy and aesthetic engagement through critical listening and thinking skills.

GENERAL NOTES

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

Special Note: This course requires students to participate in extra rehearsals and performances beyond the school day.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

GENERAL INFORMATION

Course Number: 1303320

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 9 to 12 and Adult Education Courses > **Subject:** Music Education > **SubSubject:** Choral Music > **Abbreviated Title:** CHORUS 3

Number of Credits: One (1) credit

Course Length: Year (Y)

Course Type: Core Academic Course

Course Level: 2

Course Status: Course Approved

Grade Level(s): 9,10,11,12

Graduation Requirement: Performing/Fine Arts

Educator Certifications

Vocal Music (Elementary and Secondary Grades K-12)
Music (Elementary and Secondary Grades K-12)

Chorus 4 (#1303330) 2020 - 2022 (current)

Course Standards

Name	Description
MU.912.C.1.1:	Apply listening strategies to promote appreciation and understanding of unfamiliar musical works. **Clarifications:** e.g., listening maps, active listening, checklists
MU.912.C.1.2:	Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the composer's intent. **Clarifications:** e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title
MU.912.C.1.4:	Compare and perform a variety of vocal styles and ensembles.
MU.912.C.2.1:	Evaluate and make appropriate adjustments to personal performance in solo and ensembles.
MU.912.C.2.2:	Evaluate performance quality in recorded and/or live performances.
MU.912.C.2.3:	Evaluate one's own or other's compositions and/or improvisations and generate improvements independently or cooperatively.
MU.912.C.3.1:	Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.
MU.912.F.1.1:	Analyze and evaluate the effect of "traditional" and contemporary technologies on the development of music.
MU.912.F.2.1:	Design or refine a résumé for application to higher education or the workforce that highlights marketable skills and knowledge gained through music training. **Clarifications:** e.g., repertoire lists, technology-based work, ability to research and analyze, and examples of leadership and collaborative skills
MU.912.F.2.2:	Analyze the effect of the arts and entertainment industry on the economic and social health of communities and regions. **Clarifications:** e.g., community revitalization, industry choosing new locations, cultural and social enrichment
MU.912.F.3.1:	Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of leadership in school and/or non-school settings.
MU.912.F.3.2:	Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.
MU.912.F.3.3:	Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace.
MU.912.F.3.4:	Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.
MU.912.H.1.1:	Investigate and discuss how a culture's traditions are reflected through its music. **Clarifications:** e.g., patriotic, folk, celebration, entertainment, spiritual
MU.912.H.1.2:	Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class. **Clarifications:** e.g., vocal, instrumental, guitar, keyboard, electronic, handbells
MU.912.H.1.3:	Compare two or more works of a composer across performance media. **Clarifications:** e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto
MU.912.H.1.4:	Analyze how Western music has been influenced by historical and current world cultures.
MU.912.H.1.5:	Analyze music within cultures to gain understanding of authentic performance practices.
MU.912.H.2.1:	Evaluate the social impact of music on specific historical periods.
MU.912.H.2.2:	Analyze current musical trends, including audience environments and music acquisition, to predict possible directions of music.
MU.912.H.2.4:	Examine the effects of developing technology on composition, performance, and acquisition of music.
MU.912.O.1.1:	Evaluate the organizational principles and conventions in musical works and discuss their effect on structure. **Clarifications:** e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble
MU.912.O.2.1:	Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.
MU.912.O.3.1:	Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer. **Clarifications:** e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm, orchestration
MU.912.O.3.2:	Interpret and perform expressive elements indicated by the musical score and/or conductor.
MU.912.S.1.1:	Improvise rhythmic and melodic phrases over harmonic progressions. **Clarifications:** e.g., using text or scat syllables
	Arrange a musical work by manipulating two or more aspects of the composition.

MU.912.S.1.3:	**Clarifications:** e.g., texture, mode, form, tempo, voicing
MU.912.S.1.4:	Perform and notate, independently and accurately, melodies by ear. **Clarifications:** e.g., singing, playing, writing
MU.912.S.2.1:	Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature. **Clarifications:** e.g., memorization, sequential process
MU.912.S.2.2:	Transfer expressive elements and performance techniques from one piece of music to another.
MU.912.S.3.1:	Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.
MU.912.S.3.2:	Sight-read music accurately and expressively to show synthesis of skills. **Clarifications:** e.g., musical elements, expressive qualities, performance technique
MU.912.S.3.3:	Transcribe aurally presented songs into melodic and/or rhythmic notation to show synthesis of aural and notational skills.
MU.912.S.3.4:	Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.
MU.912.S.3.5:	Develop and demonstrate proper vocal or instrumental technique. **Clarifications:** e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming
LAFS.1112.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics.
LAFS.1112.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed. c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives. d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task. **Standard Relation to Course: Supporting**
LAFS.1112.SL.1.2:	Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.
LAFS.1112.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.
LAFS.1112.SL.2.4:	Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.
LAFS.1112.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.1112.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.

	Standard Relation to Course: Supporting
DA.912.F.3.8:	Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.
DA.912.S.2.1:	Sustain focused attention, respect, and discipline during class, rehearsal, and performance.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

This year-long, intermediate-level class is designed for students with previous participation in a high school chorus and moderate skills in critical listening, vocal techniques, music literacy, and choral performance. Rehearsals focus on enhancing these skills and students' aesthetic engagement with music through a variety of high-quality three- and four-part choral literature, providing students with the means to learn how to reflect and use a combination of analytical, assessment, and problem-solving skills consistently to improve their own and others' performance.

GENERAL NOTES

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

Special Note: This course requires students to participate in extra rehearsals and performances beyond the school day. Additional experiences with small ensembles and solo performance may be available. Students who enjoy the challenges and successes of this course may wish to take an accelerated music class in the future.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. Course Standards

Name	Description
MU.912.C.1.1:	Apply listening strategies to promote appreciation and understanding of unfamiliar musical works. **Clarifications:** e.g., listening maps, active listening, checklists
MU.912.C.1.2:	Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the composer's intent. **Clarifications:** e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title
MU.912.C.1.4:	Compare and perform a variety of vocal styles and ensembles.
MU.912.C.2.1:	Evaluate and make appropriate adjustments to personal performance in solo and ensembles.
MU.912.C.2.2:	Evaluate performance quality in recorded and/or live performances.
MU.912.C.2.3:	Evaluate one's own or other's compositions and/or improvisations and generate improvements independently or cooperatively.
MU.912.C.3.1:	Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.
MU.912.F.1.1:	Analyze and evaluate the effect of "traditional" and contemporary technologies on the development of music.
MU.912.F.2.1:	Design or refine a résumé for application to higher education or the workforce that highlights marketable skills and knowledge gained through music training. **Clarifications:** e.g., repertoire lists, technology-based work, ability to research and analyze, and examples of leadership and collaborative skills
MU.912.F.2.2:	Analyze the effect of the arts and entertainment industry on the economic and social health of communities and regions. **Clarifications:** e.g., community revitalization, industry choosing new locations, cultural and social enrichment
MU.912.F.2.3:	Compare the organizational structure of a professional orchestra, chorus, quintet, or other ensemble to that of a business. **Clarifications:** e.g., leadership, financial needs and structure, marketing, personnel matters, manager, travel
MU.912.F.3.1:	Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of leadership in school and/or non-school settings.
MU.912.F.3.2:	Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.
MU.912.F.3.3:	Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace.
MU.912.F.3.4:	Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.
MU.912.H.1.1:	Investigate and discuss how a culture's traditions are reflected through its music. **Clarifications:** e.g., patriotic, folk, celebration, entertainment, spiritual
MU.912.H.1.2:	Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class. **Clarifications:** e.g., vocal, instrumental, guitar, keyboard, electronic, handbells
MU.912.H.1.3:	Compare two or more works of a composer across performance media. **Clarifications:** e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto
MU.912.H.1.4:	Analyze how Western music has been influenced by historical and current world cultures.
MU.912.H.1.5:	Analyze music within cultures to gain understanding of authentic performance practices.
MU.912.H.2.1:	Evaluate the social impact of music on specific historical periods.
MU.912.H.2.2:	Analyze current musical trends, including audience environments and music acquisition, to predict possible directions of music.
MU.912.H.2.3:	Analyze the evolution of a music genre. **Clarifications:** e.g., jazz, blues
MU.912.H.2.4:	Examine the effects of developing technology on composition, performance, and acquisition of music.
MU.912.H.3.1:	Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects musical performance. **Clarifications:** e.g., acoustics, sound amplification, materials, mechanics
MU.912.H.3.2:	Combine personal interest with skills and knowledge from a non-music class to explore, design, and present a music-based or music-enhanced topic of interest to demonstrate the ability to make transfers across contexts. **Clarifications:** e.g., music and health, Holocaust, tolerance, African American history, world languages, scientific research, data analysis, problem-solving, public

	speaking
MU.912.O.1.1:	Evaluate the organizational principles and conventions in musical works and discuss their effect on structure. **Clarifications:** e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble
MU.912.O.2.1:	Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.
MU.912.O.2.2:	Transpose melodies into different modalities through performance and composition.
MU.912.O.3.1:	Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer. **Clarifications:** e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm, orchestration
MU.912.O.3.2:	Interpret and perform expressive elements indicated by the musical score and/or conductor.
MU.912.S.1.1:	Improvise rhythmic and melodic phrases over harmonic progressions. **Clarifications:** e.g., using text or scat syllables
MU.912.S.1.2:	Compose music for voices and/or acoustic, digital, or electronic instruments.
MU.912.S.1.3:	Arrange a musical work by manipulating two or more aspects of the composition. **Clarifications:** e.g., texture, mode, form, tempo, voicing
MU.912.S.1.4:	Perform and notate, independently and accurately, melodies by ear. **Clarifications:** e.g., singing, playing, writing
MU.912.S.2.1:	Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature. **Clarifications:** e.g., memorization, sequential process
MU.912.S.2.2:	Transfer expressive elements and performance techniques from one piece of music to another.
MU.912.S.3.1:	Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.
MU.912.S.3.2:	Sight-read music accurately and expressively to show synthesis of skills. **Clarifications:** e.g., musical elements, expressive qualities, performance technique
MU.912.S.3.3:	Transcribe aurally presented songs into melodic and/or rhythmic notation to show synthesis of aural and notational skills.
MU.912.S.3.4:	Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.
MU.912.S.3.5:	Develop and demonstrate proper vocal or instrumental technique. **Clarifications:** e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming
LAFS.1112.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics.
LAFS.1112.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed. c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives. d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task. **Standard Relation to Course: Supporting**
LAFS.1112.SL.1.2:	Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.
LAFS.1112.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.
LAFS.1112.SL.2.4:	Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.
LAFS.1112.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.1112.WHST.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.1112.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
	Use appropriate tools strategically. Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools

MAFS.K12.MP.5.1:	might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 – 3(x – y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
DA.912.F.3.8:	Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.
DA.912.S.2.1:	Sustain focused attention, respect, and discipline during class, rehearsal, and performance.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
SS.912.H.1.5:	Examine artistic response to social issues and new ideas in various cultures. **Clarifications:** Examples are Victor Hugo's Les Miserables, Langston Hughes' poetry, Pete Seeger's Bring 'Em Home.

General Course Information and Notes

VERSION DESCRIPTION

This year-long, advanced class is designed for students with previous participation in a high school chorus who have demonstrated a capacity for developing advanced listening/aural skills and advanced knowledge of vocal techniques, musical literacy, and choral performance. Chorus V focuses on development and application of these skills and provides opportunities for aesthetic engagement and making individual musical choices, where appropriate, while preparing a variety of high-quality choral literature.

GENERAL NOTES

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

Special Notes: Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. Additional experiences with small ensembles, solo performance, and leadership opportunities may be available. Students who enjoy the challenges and successes of this course may wish to take an accelerated music class in the future.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

Course Standards

Name	Description
MU.912.C.1.1:	Apply listening strategies to promote appreciation and understanding of unfamiliar musical works. **Clarifications:** e.g., listening maps, active listening, checklists
MU.912.C.1.2:	Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the composer's intent. **Clarifications:** e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title
MU.912.C.1.4:	Compare and perform a variety of vocal styles and ensembles.
MU.912.C.2.1:	Evaluate and make appropriate adjustments to personal performance in solo and ensembles.
MU.912.C.2.2:	Evaluate performance quality in recorded and/or live performances.
MU.912.C.2.3:	Evaluate one's own or other's compositions and/or improvisations and generate improvements independently or cooperatively.
MU.912.C.3.1:	Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.
MU.912.F.1.1:	Analyze and evaluate the effect of "traditional" and contemporary technologies on the development of music.
MU.912.F.1.2:	Incorporate or adapt new, emerging, or previously unfamiliar technology to create an innovative composition, music project, or related product.
MU.912.F.2.1:	Design or refine a résumé for application to higher education or the workforce that highlights marketable skills and knowledge gained through music training. **Clarifications:** e.g., repertoire lists, technology-based work, ability to research and analyze, and examples of leadership and collaborative skills
MU.912.F.2.2:	Analyze the effect of the arts and entertainment industry on the economic and social health of communities and regions. **Clarifications:** e.g., community revitalization, industry choosing new locations, cultural and social enrichment
MU.912.F.2.3:	Compare the organizational structure of a professional orchestra, chorus, quintet, or other ensemble to that of a business. **Clarifications:** e.g., leadership, financial needs and structure, marketing, personnel matters, manager, travel
MU.912.F.3.1:	Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of leadership in school and/or non-school settings.
MU.912.F.3.2:	Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.
MU.912.F.3.3:	Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace.
MU.912.F.3.4:	Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.
MU.912.H.1.1:	Investigate and discuss how a culture's traditions are reflected through its music. **Clarifications:** e.g., patriotic, folk, celebration, entertainment, spiritual
MU.912.H.1.2:	Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class. **Clarifications:** e.g., vocal, instrumental, guitar, keyboard, electronic, handbells
MU.912.H.1.3:	Compare two or more works of a composer across performance media. **Clarifications:** e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto
MU.912.H.1.4:	Analyze how Western music has been influenced by historical and current world cultures.
MU.912.H.1.5:	Analyze music within cultures to gain understanding of authentic performance practices.
MU.912.H.2.1:	Evaluate the social impact of music on specific historical periods.
MU.912.H.2.2:	Analyze current musical trends, including audience environments and music acquisition, to predict possible directions of music.
MU.912.H.2.3:	Analyze the evolution of a music genre. **Clarifications:** e.g., jazz, blues
MU.912.H.2.4:	Examine the effects of developing technology on composition, performance, and acquisition of music.
MU.912.H.3.1:	Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects musical performance. **Clarifications:** e.g., acoustics, sound amplification, materials, mechanics
	Combine personal interest with skills and knowledge from a non-music class to explore, design, and present a music-based or music-enhanced topic of interest to demonstrate the ability to make transfers across contexts.

MU.912.H.3.2:	**Clarifications:** e.g., music and health, Holocaust, tolerance, African American history, world languages, scientific research, data analysis, problem-solving, public speaking
MU.912.O.1.1:	Evaluate the organizational principles and conventions in musical works and discuss their effect on structure. **Clarifications:** e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble
MU.912.O.2.1:	Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.
MU.912.O.2.2:	Transpose melodies into different modalities through performance and composition.
MU.912.O.3.1:	Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer. **Clarifications:** e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm, orchestration
MU.912.O.3.2:	Interpret and perform expressive elements indicated by the musical score and/or conductor.
MU.912.S.1.1:	Improvise rhythmic and melodic phrases over harmonic progressions. **Clarifications:** e.g., using text or scat syllables
MU.912.S.1.2:	Compose music for voices and/or acoustic, digital, or electronic instruments.
MU.912.S.1.3:	Arrange a musical work by manipulating two or more aspects of the composition. **Clarifications:** e.g., texture, mode, form, tempo, voicing
MU.912.S.1.4:	Perform and notate, independently and accurately, melodies by ear. **Clarifications:** e.g., singing, playing, writing
MU.912.S.2.1:	Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature. **Clarifications:** e.g., memorization, sequential process
MU.912.S.2.2:	Transfer expressive elements and performance techniques from one piece of music to another.
MU.912.S.3.1:	Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.
MU.912.S.3.2:	Sight-read music accurately and expressively to show synthesis of skills. **Clarifications:** e.g., musical elements, expressive qualities, performance technique
MU.912.S.3.3:	Transcribe aurally presented songs into melodic and/or rhythmic notation to show synthesis of aural and notational skills.
MU.912.S.3.4:	Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.
MU.912.S.3.5:	Develop and demonstrate proper vocal or instrumental technique. **Clarifications:** e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming
LAFS.1112.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics.
LAFS.1112.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed. c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives. d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task. **Standard Relation to Course: Supporting**
LAFS.1112.SL.1.2:	Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.
LAFS.1112.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.
LAFS.1112.SL.2.4:	Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.
LAFS.1112.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.1112.WHST.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.1112.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
	Use appropriate tools strategically. Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software.

MAFS.K12.MP.5.1:	Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 – 3(x – y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
DA.912.F.3.8:	Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.
DA.912.S.2.1:	Sustain focused attention, respect, and discipline during class, rehearsal, and performance.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
SS.912.H.1.5:	Examine artistic response to social issues and new ideas in various cultures. **Clarifications:** Examples are Victor Hugo's Les Miserables, Langston Hughes' poetry, Pete Seeger's Bring 'Em Home.

General Course Information and Notes

VERSION DESCRIPTION

This year-long, very advanced class is designed for students who have demonstrated a capacity for developing very advanced listening/aural skills and performance techniques, as well as very advanced knowledge of vocal techniques, musical literacy, ensemble skills, and related musical knowledge. Chorus VI focuses on managing, mastering, and refining these skills and techniques through a variety of high-quality choral literature at a high level of aesthetic engagement. Musical independence and student leadership are promoted through significant opportunities for peer mentoring, solo work, and participation as a performer, conductor, or coach in a small or large ensemble.

GENERAL NOTES

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

Special Note: Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. Additional experiences with small ensembles, solo performance, and leadership opportunities may be available. Students who enjoy the challenges and successes of this course may wish to take an accelerated music class in the future.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

English Language Development ELD Standards Special Notes Section:

MU.912.S.3.2:	Sight-read music accurately and expressively to show synthesis of skills. **Clarifications:** e.g., musical elements, expressive qualities, performance technique
MU.912.S.3.4:	Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.
MU.912.S.3.5:	Develop and demonstrate proper vocal or instrumental technique. **Clarifications:** e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming
LAFS.910.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 9–10 texts and topics.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented. **Standard Relation to Course: Supporting**
LAFS.910.SL.1.2:	Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.
LAFS.910.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.

LAFS.910.SL.2.4:	Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.
LAFS.910.SL.2.6:	Adapt speech to a variety of contexts and tasks, demonstrating command of formal English when indicated or appropriate.
LAFS.910.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.910.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 – 3(x – y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
DA.912.S.2.1:	Sustain focused attention, respect, and discipline during class, rehearsal, and performance.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students in this entry-level class focus on the rehearsal, performance, and study of high-quality music literature for singers of a similar voice range. As they address the technical needs of singers in a specific range of notes, they learn beginning music theory, musicianship, and choral performance skills. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

Name	Description
MU.912.C.1.1:	Apply listening strategies to promote appreciation and understanding of unfamiliar musical works. **Clarifications:** e.g., listening maps, active listening, checklists
MU.912.C.1.2:	Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the composer's intent. **Clarifications:** e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title
MU.912.C.1.4:	Compare and perform a variety of vocal styles and ensembles.
MU.912.C.2.1:	Evaluate and make appropriate adjustments to personal performance in solo and ensembles.
MU.912.C.2.2:	Evaluate performance quality in recorded and/or live performances.
MU.912.C.3.1:	Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.
MU.912.F.3.1:	Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of leadership in school and/or non-school settings.
MU.912.F.3.2:	Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.
MU.912.H.1.1:	Investigate and discuss how a culture's traditions are reflected through its music. **Clarifications:** e.g., patriotic, folk, celebration, entertainment, spiritual
MU.912.H.1.3:	Compare two or more works of a composer across performance media. **Clarifications:** e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto
MU.912.H.2.1:	Evaluate the social impact of music on specific historical periods.
MU.912.H.2.4:	Examine the effects of developing technology on composition, performance, and acquisition of music.
MU.912.H.3.1:	Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects musical performance. **Clarifications:** e.g., acoustics, sound amplification, materials, mechanics
MU.912.O.1.1:	Evaluate the organizational principles and conventions in musical works and discuss their effect on structure. **Clarifications:** e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble
MU.912.O.3.2:	Interpret and perform expressive elements indicated by the musical score and/or conductor.
MU.912.S.1.1:	Improvise rhythmic and melodic phrases over harmonic progressions. **Clarifications:** e.g., using text or scat syllables
MU.912.S.1.3:	Arrange a musical work by manipulating two or more aspects of the composition. **Clarifications:** e.g., texture, mode, form, tempo, voicing
MU.912.S.1.4:	Perform and notate, independently and accurately, melodies by ear. **Clarifications:** e.g., singing, playing, writing
MU.912.S.2.1:	Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature. **Clarifications:** e.g., memorization, sequential process
MU.912.S.2.2:	Transfer expressive elements and performance techniques from one piece of music to another.
MU.912.S.3.1:	Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.
MU.912.S.3.2:	Sight-read music accurately and expressively to show synthesis of skills. **Clarifications:** e.g., musical elements, expressive qualities, performance technique
MU.912.S.3.4:	Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.
MU.912.S.3.5:	Develop and demonstrate proper vocal or instrumental technique. **Clarifications:** e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming

LAFS.910.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 9–10 texts and topics.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented. **Standard Relation to Course: Supporting**
LAFS.910.SL.1.2:	Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.
LAFS.910.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.
LAFS.910.SL.2.4:	Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.
LAFS.910.SL.2.6:	Adapt speech to a variety of contexts and tasks, demonstrating command of formal English when indicated or appropriate.
LAFS.910.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.910.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 – 3(x – y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
DA.912.S.2.1:	Sustain focused attention, respect, and discipline during class, rehearsal, and performance.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students with prior choral or vocal instruction focus on developing skills to perform high-quality literature with singers in a similar vocal range. Through two- and three-part music, students build musicianship and choral ensemble skills. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level

words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

Course Standards

Name	Description
MU.912.C.1.1:	Apply listening strategies to promote appreciation and understanding of unfamiliar musical works. **Clarifications:** e.g., listening maps, active listening, checklists
MU.912.C.1.2:	Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the composer's intent. **Clarifications:** e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title
MU.912.C.1.4:	Compare and perform a variety of vocal styles and ensembles.
MU.912.C.2.1:	Evaluate and make appropriate adjustments to personal performance in solo and ensembles.
MU.912.C.2.2:	Evaluate performance quality in recorded and/or live performances.
MU.912.C.3.1:	Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.
MU.912.F.2.3:	Compare the organizational structure of a professional orchestra, chorus, quintet, or other ensemble to that of a business. **Clarifications:** e.g., leadership, financial needs and structure, marketing, personnel matters, manager, travel
MU.912.F.3.1:	Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of leadership in school and/or non-school settings.
MU.912.F.3.2:	Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.
MU.912.F.3.4:	Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.
MU.912.H.1.1:	Investigate and discuss how a culture's traditions are reflected through its music. **Clarifications:** e.g., patriotic, folk, celebration, entertainment, spiritual
MU.912.H.1.2:	Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class. **Clarifications:** e.g., vocal, instrumental, guitar, keyboard, electronic, handbells
MU.912.H.1.3:	Compare two or more works of a composer across performance media. **Clarifications:** e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto
MU.912.H.2.1:	Evaluate the social impact of music on specific historical periods.
MU.912.H.2.4:	Examine the effects of developing technology on composition, performance, and acquisition of music.
MU.912.H.3.1:	Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects musical performance. **Clarifications:** e.g., acoustics, sound amplification, materials, mechanics
MU.912.O.1.1:	Evaluate the organizational principles and conventions in musical works and discuss their effect on structure. **Clarifications:** e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble
MU.912.O.3.2:	Interpret and perform expressive elements indicated by the musical score and/or conductor.
MU.912.S.1.1:	Improvise rhythmic and melodic phrases over harmonic progressions. **Clarifications:** e.g., using text or scat syllables
MU.912.S.1.3:	Arrange a musical work by manipulating two or more aspects of the composition. **Clarifications:** e.g., texture, mode, form, tempo, voicing
MU.912.S.1.4:	Perform and notate, independently and accurately, melodies by ear. **Clarifications:** e.g., singing, playing, writing
MU.912.S.2.1:	Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature. **Clarifications:** e.g., memorization, sequential process
MU.912.S.2.2:	Transfer expressive elements and performance techniques from one piece of music to another.
MU.912.S.3.1:	Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.

MU.912.S.3.2:	Sight-read music accurately and expressively to show synthesis of skills. **Clarifications:** e.g., musical elements, expressive qualities, performance technique
MU.912.S.3.4:	Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.
MU.912.S.3.5:	Develop and demonstrate proper vocal or instrumental technique. **Clarifications:** e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming
LAFS.1112.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed. c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives. d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task. **Standard Relation to Course: Supporting**
LAFS.910.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 9–10 texts and topics.
LAFS.910.SL.1.2:	Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.
LAFS.910.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.
LAFS.910.SL.2.4:	Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.
LAFS.910.SL.2.6:	Adapt speech to a variety of contexts and tasks, demonstrating command of formal English when indicated or appropriate.
LAFS.910.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.910.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**

ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students continue to build on previous choral experience to develop skills to perform increasingly challenging, high-quality literature for singers in a similar vocal range. As singers explore two-, three-, and four-part literature in its historical and cultural context, they enhance their musicianship and choral ensemble skills. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and

assess learning in the classroom.

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. Course Standards

Name	Description
MU.912.C.1.1:	Apply listening strategies to promote appreciation and understanding of unfamiliar musical works. **Clarifications:** e.g., listening maps, active listening, checklists
MU.912.C.1.2:	Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the composer's intent. **Clarifications:** e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title
MU.912.C.1.4:	Compare and perform a variety of vocal styles and ensembles.
MU.912.C.2.1:	Evaluate and make appropriate adjustments to personal performance in solo and ensembles.
MU.912.C.2.2:	Evaluate performance quality in recorded and/or live performances.
MU.912.C.2.3:	Evaluate one's own or other's compositions and/or improvisations and generate improvements independently or cooperatively.
MU.912.C.3.1:	Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.
MU.912.F.1.1:	Analyze and evaluate the effect of "traditional" and contemporary technologies on the development of music.
MU.912.F.2.1:	Design or refine a résumé for application to higher education or the workforce that highlights marketable skills and knowledge gained through music training. **Clarifications:** e.g., repertoire lists, technology-based work, ability to research and analyze, and examples of leadership and collaborative skills
MU.912.F.2.2:	Analyze the effect of the arts and entertainment industry on the economic and social health of communities and regions. **Clarifications:** e.g., community revitalization, industry choosing new locations, cultural and social enrichment
MU.912.F.3.1:	Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of leadership in school and/or non-school settings.
MU.912.F.3.2:	Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.
MU.912.F.3.3:	Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace.
MU.912.F.3.4:	Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.
MU.912.H.1.1:	Investigate and discuss how a culture's traditions are reflected through its music. **Clarifications:** e.g., patriotic, folk, celebration, entertainment, spiritual
MU.912.H.1.3:	Compare two or more works of a composer across performance media. **Clarifications:** e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto
MU.912.H.1.4:	Analyze how Western music has been influenced by historical and current world cultures.
MU.912.H.1.5:	Analyze music within cultures to gain understanding of authentic performance practices.
MU.912.H.2.2:	Analyze current musical trends, including audience environments and music acquisition, to predict possible directions of music.
MU.912.H.2.3:	Analyze the evolution of a music genre. **Clarifications:** e.g., jazz, blues
MU.912.H.3.1:	Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects musical performance. **Clarifications:** e.g., acoustics, sound amplification, materials, mechanics
MU.912.H.3.2:	Combine personal interest with skills and knowledge from a non-music class to explore, design, and present a music-based or music-enhanced topic of interest to demonstrate the ability to make transfers across contexts. **Clarifications:** e.g., music and health, Holocaust, tolerance, African American history, world languages, scientific research, data analysis, problem-solving, public speaking
MU.912.O.1.1:	Evaluate the organizational principles and conventions in musical works and discuss their effect on structure. **Clarifications:** e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble
MU.912.O.2.1:	Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.
MU.912.O.2.2:	Transpose melodies into different modalities through performance and composition.
	Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied

	meaning of the composer/performer.
MU.912.O.3.1:	**Clarifications:** e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm, orchestration
MU.912.O.3.2:	Interpret and perform expressive elements indicated by the musical score and/or conductor.
MU.912.S.1.1:	Improvise rhythmic and melodic phrases over harmonic progressions. **Clarifications:** e.g., using text or scat syllables
MU.912.S.1.2:	Compose music for voices and/or acoustic, digital, or electronic instruments.
MU.912.S.1.3:	Arrange a musical work by manipulating two or more aspects of the composition. **Clarifications:** e.g., texture, mode, form, tempo, voicing
MU.912.S.1.4:	Perform and notate, independently and accurately, melodies by ear. **Clarifications:** e.g., singing, playing, writing
MU.912.S.2.1:	Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature. **Clarifications:** e.g., memorization, sequential process
MU.912.S.2.2:	Transfer expressive elements and performance techniques from one piece of music to another.
MU.912.S.3.1:	Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.
MU.912.S.3.2:	Sight-read music accurately and expressively to show synthesis of skills. **Clarifications:** e.g., musical elements, expressive qualities, performance technique
MU.912.S.3.3:	Transcribe aurally presented songs into melodic and/or rhythmic notation to show synthesis of aural and notational skills.
MU.912.S.3.4:	Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.
MU.912.S.3.5:	Develop and demonstrate proper vocal or instrumental technique. **Clarifications:** e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming
LAFS.1112.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics.
LAFS.1112.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed. c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives. d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task. **Standard Relation to Course: Supporting**
LAFS.1112.SL.1.2:	Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.
LAFS.1112.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.
LAFS.1112.SL.2.4:	Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.
LAFS.1112.SL.2.5:	Make strategic use of digital media (e.g., textual, graphical, audio, visual, and interactive elements) in presentations to enhance understanding of findings, reasoning, and evidence and to add interest.
LAFS.1112.WHST.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.1112.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
	Attend to precision.

MAFS.K12.MP.6.1:	Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 – 3(x – y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
DA.912.S.2.1:	Sustain focused attention, respect, and discipline during class, rehearsal, and performance.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students build and refine technical and expressive skills through the study, rehearsal, and performance of high-quality literature for singers in a similar vocal range. As singers explore three- and four-part literature in its historical and cultural context, they develop advanced musicianship and choral ensemble skills. In keeping with the rigor expected in an Honors course, students undertake independent study that includes synthesis of learning and experience. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

GENERAL INFORMATION

Course Number: 1303390

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 9 to 12 and Adult Education Courses > **Subject:** Music Education > **SubSubject:** Choral Music >

Abbreviated Title: CHORUS REG-SPEC 4 H

Number of Credits: One (1) credit

Course Length: Year (Y)

Course Attributes:

- Honors

Course Type: Core Academic Course

Course Level: 3

Course Status: Course Approved

Grade Level(s): 9,10,11,12

Graduation Requirement: Performing/Fine Arts

Educator Certifications

Music (Elementary and Secondary Grades K-12)
Vocal Music (Elementary and Secondary Grades K-12)

Vocal Techniques 1 (#1303400) 2020 - 2022 (current)

Course Standards

Name	Description
MU.912.C.1.1:	Apply listening strategies to promote appreciation and understanding of unfamiliar musical works. **Clarifications:** e.g., listening maps, active listening, checklists
MU.912.C.2.1:	Evaluate and make appropriate adjustments to personal performance in solo and ensembles.
MU.912.C.2.2:	Evaluate performance quality in recorded and/or live performances.
MU.912.C.3.1:	Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.
MU.912.F.3.3:	Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace.
MU.912.O.2.1:	Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.
MU.912.O.3.2:	Interpret and perform expressive elements indicated by the musical score and/or conductor.
MU.912.S.2.2:	Transfer expressive elements and performance techniques from one piece of music to another.
MU.912.S.3.1:	Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.
MU.912.S.3.4:	Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.
MU.912.S.3.5:	Develop and demonstrate proper vocal or instrumental technique. **Clarifications:** e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming
LAFS.910.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 9–10 texts and topics.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented. **Standard Relation to Course: Supporting**
LAFS.910.SL.1.2:	Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.
LAFS.910.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.
LAFS.910.SL.2.4:	Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.
LAFS.910.SL.2.6:	Adapt speech to a variety of contexts and tasks, demonstrating command of formal English when indicated or appropriate.
LAFS.910.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
	Look for and make use of structure. Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven

MAFS.K12.MP.7.1:	more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.
	Standard Relation to Course: Supporting
DA.912.S.2.1:	Sustain focused attention, respect, and discipline during class, rehearsal, and performance.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students in this entry-level class focus on the development of musical and technical skills on a specific voice through etudes, scales, and selected music literature. Through problem-solving, critical thinking, and reflection, students develop the physical and cognitive skills to be more disciplined performers. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students in this novice-level class continue to develop musical and technical skills on a specific voice through developmentally appropriate solo literature, etudes, scales, and exercises. Through problem-solving, critical thinking, and reflection, students develop the physical and cognitive skills necessary to be more disciplined performers. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

Course Standards

Name	Description
MU.912.C.1.1:	Apply listening strategies to promote appreciation and understanding of unfamiliar musical works. **Clarifications:** e.g., listening maps, active listening, checklists
MU.912.C.2.1:	Evaluate and make appropriate adjustments to personal performance in solo and ensembles.
MU.912.C.2.2:	Evaluate performance quality in recorded and/or live performances.
MU.912.C.3.1:	Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.
MU.912.F.3.3:	Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace.
MU.912.F.3.4:	Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.
MU.912.H.1.1:	Investigate and discuss how a culture's traditions are reflected through its music. **Clarifications:** e.g., patriotic, folk, celebration, entertainment, spiritual
MU.912.H.3.1:	Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects musical performance. **Clarifications:** e.g., acoustics, sound amplification, materials, mechanics
MU.912.O.2.1:	Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.
MU.912.O.3.1:	Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer. **Clarifications:** e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm, orchestration
MU.912.O.3.2:	Interpret and perform expressive elements indicated by the musical score and/or conductor.
MU.912.S.2.2:	Transfer expressive elements and performance techniques from one piece of music to another.
MU.912.S.3.1:	Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.
MU.912.S.3.2:	Sight-read music accurately and expressively to show synthesis of skills. **Clarifications:** e.g., musical elements, expressive qualities, performance technique
MU.912.S.3.4:	Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.
MU.912.S.3.5:	Develop and demonstrate proper vocal or instrumental technique. **Clarifications:** e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming
LAFS.1112.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics.
LAFS.1112.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed. c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives. d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task. **Standard Relation to Course: Supporting**
LAFS.1112.SL.1.2:	Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.
LAFS.1112.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.
LAFS.1112.SL.2.4:	Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.
LAFS.1112.SL.2.6:	Adapt speech to a variety of contexts and tasks, demonstrating a command of formal English when indicated or appropriate.
LAFS.1112.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
	Use appropriate tools strategically.

MAFS.K12.MP.5.1:	Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 – 3(x – y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
DA.912.S.2.1:	Sustain focused attention, respect, and discipline during class, rehearsal, and performance.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students in this intermediate-level class develop their musical and technical skills further on a specific voice, and expand their technical and performance skills, enhanced by historical and cultural background knowledge of the music. Students explore more demanding solo literature, etudes, and technical exercises with increasing independence. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

Course Standards

Name	Description
MU.912.C.1.1:	Apply listening strategies to promote appreciation and understanding of unfamiliar musical works. **Clarifications:** e.g., listening maps, active listening, checklists
MU.912.C.1.2:	Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the composer's intent. **Clarifications:** e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title
MU.912.C.2.1:	Evaluate and make appropriate adjustments to personal performance in solo and ensembles.
MU.912.C.2.2:	Evaluate performance quality in recorded and/or live performances.
MU.912.C.3.1:	Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.
MU.912.F.2.1:	Design or refine a résumé for application to higher education or the workforce that highlights marketable skills and knowledge gained through music training. **Clarifications:** e.g., repertoire lists, technology-based work, ability to research and analyze, and examples of leadership and collaborative skills
MU.912.F.3.1:	Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of leadership in school and/or non-school settings.
MU.912.F.3.3:	Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace.
MU.912.F.3.4:	Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.
MU.912.H.1.1:	Investigate and discuss how a culture's traditions are reflected through its music. **Clarifications:** e.g., patriotic, folk, celebration, entertainment, spiritual
MU.912.H.3.1:	Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects musical performance. **Clarifications:** e.g., acoustics, sound amplification, materials, mechanics
MU.912.O.2.1:	Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.
MU.912.O.2.2:	Transpose melodies into different modalities through performance and composition.
MU.912.O.3.1:	Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer. **Clarifications:** e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm, orchestration
MU.912.O.3.2:	Interpret and perform expressive elements indicated by the musical score and/or conductor.
MU.912.S.2.1:	Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature. **Clarifications:** e.g., memorization, sequential process
MU.912.S.2.2:	Transfer expressive elements and performance techniques from one piece of music to another.
MU.912.S.3.1:	Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.
MU.912.S.3.2:	Sight-read music accurately and expressively to show synthesis of skills. **Clarifications:** e.g., musical elements, expressive qualities, performance technique
MU.912.S.3.4:	Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.
MU.912.S.3.5:	Develop and demonstrate proper vocal or instrumental technique. **Clarifications:** e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming
LAFS.1112.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics.
	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as

LAFS.1112.SL.1.1:	needed. c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives. d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task. **Standard Relation to Course: Supporting**
LAFS.1112.SL.1.2:	Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.
LAFS.1112.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.
LAFS.1112.SL.2.4:	Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.
LAFS.1112.SL.2.6:	Adapt speech to a variety of contexts and tasks, demonstrating a command of formal English when indicated or appropriate.
LAFS.1112.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.1112.WHST.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.1112.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
DA.912.S.2.1:	Sustain focused attention, respect, and discipline during class, rehearsal, and performance.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students in this advanced class refine their musicianship and performance skills on a specified voice. Students prepare for post-secondary and community music experiences and develop artistry independently through a variety of advanced solos, etudes, and excerpts. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional

purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students with little or no experience in a vocal ensemble develop basic musicianship and ensemble performance skills through the study of basic, high-quality music in diverse styles. Student musicians focus on building foundational music techniques, music literacy, listening skills, and aesthetic awareness. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 – 3(x – y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
DA.912.F.3.8:	Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.
DA.912.S.2.1:	Sustain focused attention, respect, and discipline during class, rehearsal, and performance.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students with previous vocal ensemble experience continue building musicianship and performance skills through the study of high-quality music in diverse styles. Student musicians learn to self-assess and collaborate as they rehearse, perform, and study relevant musical styles and time periods. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

Vocal Music (Elementary and Secondary Grades K-12)
Music (Elementary and Secondary Grades K-12)

Vocal Ensemble 3 (#1303460) 2020 - 2022 (current)

Course Standards

Name	Description
MU.912.C.1.1:	Apply listening strategies to promote appreciation and understanding of unfamiliar musical works. **Clarifications:** e.g., listening maps, active listening, checklists
MU.912.C.1.2:	Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the composer's intent. **Clarifications:** e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title
MU.912.C.2.1:	Evaluate and make appropriate adjustments to personal performance in solo and ensembles.
MU.912.C.2.2:	Evaluate performance quality in recorded and/or live performances.
MU.912.C.3.1:	Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.
MU.912.F.2.1:	Design or refine a résumé for application to higher education or the workforce that highlights marketable skills and knowledge gained through music training. **Clarifications:** e.g., repertoire lists, technology-based work, ability to research and analyze, and examples of leadership and collaborative skills
MU.912.F.2.3:	Compare the organizational structure of a professional orchestra, chorus, quintet, or other ensemble to that of a business. **Clarifications:** e.g., leadership, financial needs and structure, marketing, personnel matters, manager, travel
MU.912.F.3.1:	Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of leadership in school and/or non-school settings.
MU.912.F.3.2:	Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.
MU.912.F.3.3:	Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace.
MU.912.H.1.3:	Compare two or more works of a composer across performance media. **Clarifications:** e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto
MU.912.H.1.5:	Analyze music within cultures to gain understanding of authentic performance practices.
MU.912.H.2.4:	Examine the effects of developing technology on composition, performance, and acquisition of music.
MU.912.O.1.1:	Evaluate the organizational principles and conventions in musical works and discuss their effect on structure. **Clarifications:** e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble
MU.912.O.2.1:	Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.
MU.912.O.3.1:	Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer. **Clarifications:** e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm, orchestration
MU.912.O.3.2:	Interpret and perform expressive elements indicated by the musical score and/or conductor.
MU.912.S.1.3:	Arrange a musical work by manipulating two or more aspects of the composition. **Clarifications:** e.g., texture, mode, form, tempo, voicing
MU.912.S.1.4:	Perform and notate, independently and accurately, melodies by ear. **Clarifications:** e.g., singing, playing, writing
MU.912.S.2.1:	Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature. **Clarifications:** e.g., memorization, sequential process
MU.912.S.2.2:	Transfer expressive elements and performance techniques from one piece of music to another.
MU.912.S.3.1:	Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.
MU.912.S.3.2:	Sight-read music accurately and expressively to show synthesis of skills. **Clarifications:** e.g., musical elements, expressive qualities, performance technique
MU.912.S.3.4:	Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.

MU.912.S.3.5:	Develop and demonstrate proper vocal or instrumental technique. **Clarifications:** e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming
LAFS.1112.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics.
LAFS.1112.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed. c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives. d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task. **Standard Relation to Course: Supporting**
LAFS.1112.SL.1.2:	Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.
LAFS.1112.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.
LAFS.1112.SL.2.4:	Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.
LAFS.1112.SL.2.6:	Adapt speech to a variety of contexts and tasks, demonstrating a command of formal English when indicated or appropriate.
LAFS.1112.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.1112.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
DA.912.F.3.8:	Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.
DA.912.S.2.1:	Sustain focused attention, respect, and discipline during class, rehearsal, and performance.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students strengthen vocal ensemble performance skills, music literacy, and analytical skills through the study of high-quality music in diverse styles. Student musicians learn to self-assess and collaborate as they rehearse, perform, and study relevant history and cultures. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. Course Standards

Name	Description
MU.912.C.1.1:	Apply listening strategies to promote appreciation and understanding of unfamiliar musical works. **Clarifications:** e.g., listening maps, active listening, checklists
MU.912.C.1.2:	Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the composer's intent. **Clarifications:** e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title
MU.912.C.2.1:	Evaluate and make appropriate adjustments to personal performance in solo and ensembles.
MU.912.C.2.2:	Evaluate performance quality in recorded and/or live performances.
MU.912.C.3.1:	Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.
MU.912.F.1.1:	Analyze and evaluate the effect of "traditional" and contemporary technologies on the development of music.
MU.912.F.2.1:	Design or refine a résumé for application to higher education or the workforce that highlights marketable skills and knowledge gained through music training. **Clarifications:** e.g., repertoire lists, technology-based work, ability to research and analyze, and examples of leadership and collaborative skills
MU.912.F.2.2:	Analyze the effect of the arts and entertainment industry on the economic and social health of communities and regions. **Clarifications:** e.g., community revitalization, industry choosing new locations, cultural and social enrichment
MU.912.F.2.3:	Compare the organizational structure of a professional orchestra, chorus, quintet, or other ensemble to that of a business. **Clarifications:** e.g., leadership, financial needs and structure, marketing, personnel matters, manager, travel
MU.912.F.3.1:	Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of leadership in school and/or non-school settings.
MU.912.F.3.2:	Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.
MU.912.F.3.3:	Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace.
MU.912.F.3.4:	Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.
MU.912.H.1.2:	Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class. **Clarifications:** e.g., vocal, instrumental, guitar, keyboard, electronic, handbells
MU.912.H.1.3:	Compare two or more works of a composer across performance media. **Clarifications:** e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto
MU.912.H.1.5:	Analyze music within cultures to gain understanding of authentic performance practices.
MU.912.H.2.1:	Evaluate the social impact of music on specific historical periods.
MU.912.H.2.2:	Analyze current musical trends, including audience environments and music acquisition, to predict possible directions of music.
MU.912.H.2.4:	Examine the effects of developing technology on composition, performance, and acquisition of music.
MU.912.O.1.1:	Evaluate the organizational principles and conventions in musical works and discuss their effect on structure. **Clarifications:** e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble
MU.912.O.2.1:	Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.
MU.912.O.3.1:	Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer. **Clarifications:** e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm, orchestration
MU.912.O.3.2:	Interpret and perform expressive elements indicated by the musical score and/or conductor.
MU.912.S.1.3:	Arrange a musical work by manipulating two or more aspects of the composition. **Clarifications:** e.g., texture, mode, form, tempo, voicing
MU.912.S.1.4:	Perform and notate, independently and accurately, melodies by ear. **Clarifications:** e.g., singing, playing, writing

MU.912.S.2.1:	Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature. **Clarifications:** e.g., memorization, sequential process
MU.912.S.2.2:	Transfer expressive elements and performance techniques from one piece of music to another.
MU.912.S.3.1:	Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.
MU.912.S.3.2:	Sight-read music accurately and expressively to show synthesis of skills. **Clarifications:** e.g., musical elements, expressive qualities, performance technique
MU.912.S.3.4:	Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.
MU.912.S.3.5:	Develop and demonstrate proper vocal or instrumental technique. **Clarifications:** e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming
LAFS.1112.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics.
LAFS.1112.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed. c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives. d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task. **Standard Relation to Course: Supporting**
LAFS.1112.SL.1.2:	Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.
LAFS.1112.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.
LAFS.1112.SL.2.4:	Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.
LAFS.1112.SL.2.6:	Adapt speech to a variety of contexts and tasks, demonstrating a command of formal English when indicated or appropriate.
LAFS.1112.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.1112.WHST.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.1112.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 – 3(x – y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
DA.912.F.3.8:	Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.

DA.912.S.2.1:	Sustain focused attention, respect, and discipline during class, rehearsal, and performance.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students with extensive vocal ensemble experience refine their critical listening, music literacy, and ensemble skills through the study, rehearsal, and performance of high-quality, advanced literature. Students use reflection and problem-solving skills with increasing independence to improve their performance and musical expressivity. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

Course Standards

Name	Description
MU.912.C.1.1:	Apply listening strategies to promote appreciation and understanding of unfamiliar musical works. **Clarifications:** e.g., listening maps, active listening, checklists
MU.912.C.2.2:	Evaluate performance quality in recorded and/or live performances.
MU.912.C.2.3:	Evaluate one's own or other's compositions and/or improvisations and generate improvements independently or cooperatively.
MU.912.C.3.1:	Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.
MU.912.F.1.2:	Incorporate or adapt new, emerging, or previously unfamiliar technology to create an innovative composition, music project, or related product.
MU.912.F.3.2:	Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.
MU.912.H.2.4:	Examine the effects of developing technology on composition, performance, and acquisition of music.
MU.912.H.3.1:	Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects musical performance. **Clarifications:** e.g., acoustics, sound amplification, materials, mechanics
MU.912.S.1.3:	Arrange a musical work by manipulating two or more aspects of the composition. **Clarifications:** e.g., texture, mode, form, tempo, voicing
MU.912.S.1.5:	Research and report on the impact of MIDI as an industry-standard protocol.
MU.912.S.1.7:	Combine and/or create virtual and audio instruments.
MU.912.S.1.8:	Record, mix, and edit a recorded performance.
MU.912.S.3.4:	Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.
LAFS.910.L.1.1:	Demonstrate command of the conventions of standard English grammar and usage when writing or speaking. a. Use parallel structure. b. Use various types of phrases (noun, verb, adjectival, adverbial, participial, prepositional, absolute) and clauses (independent, dependent; noun, relative, adverbial) to convey specific meanings and add variety and interest to writing or presentations.
LAFS.910.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 9–10 texts and topics.
LAFS.910.RST.3.7:	Translate quantitative or technical information expressed in words in a text into visual form (e.g., a table or chart) and translate information expressed visually or mathematically (e.g., in an equation) into words.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented. **Standard Relation to Course: Supporting**
LAFS.910.SL.1.2:	Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.
LAFS.910.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.
LAFS.910.SL.2.4:	Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.
LAFS.910.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
MAFS.912.A-CED.1.1:	Create equations and inequalities in one variable and use them to solve problems. Include equations arising from linear and quadratic functions, and simple rational, absolute, and exponential functions. ★ **Standard Relation to Course: Supporting**
MAFS.912.A-CED.1.2:	Create equations in two or more variables to represent relationships between quantities; graph equations on coordinate axes with labels and scales. ★ **Standard Relation to Course: Supporting**
MAFS.912.A-CED.1.3:	Represent constraints by equations or inequalities, and by systems of equations and/or inequalities, and interpret solutions as viable or non-viable options in a modeling context. *For example, represent inequalities describing nutritional and cost constraints on combinations of different foods.* ★ **Standard Relation to Course: Supporting**

MAFS.912.A-CED.1.4:	Rearrange formulas to highlight a quantity of interest, using the same reasoning as in solving equations. *For example, rearrange Ohm's law V = IR to highlight resistance R.* ★ **Standard Relation to Course: Supporting**
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
DA.912.S.2.1:	Sustain focused attention, respect, and discipline during class, rehearsal, and performance.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students explore the fundamental applications and tools of music technology and sound engineering. As they create and learn its terminology, students also learn the history and aesthetic development of technology used to capture, create, and distribute music. Public performances may serve as a resource for specific instructional goals. Students may be required to attend one or more performances outside the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

GENERAL INFORMATION

Course Number: 1304300

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 9 to 12 and Adult Education Courses > **Subject:** Music Education > **SubSubject:** Music Technology >

Abbreviated Title: MUS TECH & SO ENG 1

Number of Credits: One (1) credit

Course Length: Year (Y)

Course Type: Core Academic Course

Course Level: 2

Course Status: Course Approved

Grade Level(s): 9,10,11,12

Graduation Requirement: Performing/Fine Arts

Educator Certifications

Instrumental Music (Secondary Grades 7-12)
Instrumental Music (Elementary and Secondary Grades K-12)
Vocal Music (Elementary and Secondary Grades K-12)
Music (Elementary and Secondary Grades K-12)

Music Technology and Sound Engineering 2 (#1304310) 2020 - 2022 (current)

Course Standards

Name	Description
MU.912.C.1.1:	Apply listening strategies to promote appreciation and understanding of unfamiliar musical works. **Clarifications:** e.g., listening maps, active listening, checklists
MU.912.C.2.2:	Evaluate performance quality in recorded and/or live performances.
MU.912.C.2.3:	Evaluate one's own or other's compositions and/or improvisations and generate improvements independently or cooperatively.
MU.912.C.3.1:	Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.
MU.912.F.1.2:	Incorporate or adapt new, emerging, or previously unfamiliar technology to create an innovative composition, music project, or related product.
MU.912.F.3.2:	Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.
MU.912.H.1.2:	Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class. **Clarifications:** e.g., vocal, instrumental, guitar, keyboard, electronic, handbells
MU.912.H.2.1:	Evaluate the social impact of music on specific historical periods.
MU.912.H.2.4:	Examine the effects of developing technology on composition, performance, and acquisition of music.
MU.912.H.3.1:	Apply knowledge of science, math, and music to demonstrate, through an acoustic or digital performance medium, how sound production affects musical performance. **Clarifications:** e.g., acoustics, sound amplification, materials, mechanics
MU.912.S.1.2:	Compose music for voices and/or acoustic, digital, or electronic instruments.
MU.912.S.1.3:	Arrange a musical work by manipulating two or more aspects of the composition. **Clarifications:** e.g., texture, mode, form, tempo, voicing
MU.912.S.1.5:	Research and report on the impact of MIDI as an industry-standard protocol.
MU.912.S.1.7:	Combine and/or create virtual and audio instruments.
MU.912.S.1.8:	Record, mix, and edit a recorded performance.
MU.912.S.2.2:	Transfer expressive elements and performance techniques from one piece of music to another.
MU.912.S.3.4:	Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.
LAFS.910.L.1.1:	Demonstrate command of the conventions of standard English grammar and usage when writing or speaking. a. Use parallel structure. b. Use various types of phrases (noun, verb, adjectival, adverbial, participial, prepositional, absolute) and clauses (independent, dependent; noun, relative, adverbial) to convey specific meanings and add variety and interest to writing or presentations.
LAFS.910.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 9–10 texts and topics.
LAFS.910.RST.3.7:	Translate quantitative or technical information expressed in words in a text into visual form (e.g., a table or chart) and translate information expressed visually or mathematically (e.g., in an equation) into words.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented. **Standard Relation to Course: Supporting**
LAFS.910.SL.1.2:	Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.
LAFS.910.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.
LAFS.910.SL.2.4:	Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.
LAFS.910.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
	Create equations and inequalities in one variable and use them to solve problems. Include equations arising from linear and quadratic functions, and

DA.912.S.2.1:	Sustain focused attention, respect, and discipline during class, rehearsal, and performance.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students build on previous experience with the fundamentals of music technology and sound engineering to integrate their knowledge of traditional musical elements with past and current technologies used to capture, create, mix, and present music. They explore the creative and aesthetic implications of music technology and sound engineering through class work. Public performances may serve as a resource for specific instructional goals. Students may be required to attend one or more performances outside the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

Course Standards

Name	Description
DA.912.C.1.2:	Apply replication, physical rehearsal, and cognitive rehearsal to aid in the mental and physical retention of patterns, complex steps, and sequences performed by another dancer. **Clarifications:** e.g., mind/body connection, watching, following, marking, visualizing, imagery, using rhythmic clues
DA.912.C.2.3:	Develop a plan to improve technique, performance quality, and/or compositional work with artistic intent.
DA.912.F.3.6:	Practice conditioning methods that complement the physical instrument, and determine the degree of personal improvement in established dance techniques. **Clarifications:** e.g., Feldenkrais, Bartenieff, Pilates, yoga, cardio routines
DA.912.F.3.8:	Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.
DA.912.O.1.2:	Apply standards of class and performance etiquette consistently to attain optimal working conditions. **Clarifications:** e.g., appropriate attire, professional respect, traditions, procedures
DA.912.O.3.1:	Perform dance pieces to express feelings, ideas, cultural identity, music, and other abstract concepts through movements, steps, pantomime, and gestures.
DA.912.O.3.2:	Use imagery, analogy, and metaphor to improve body alignment and/or enhance the quality of movements, steps, phrases, or dances.
DA.912.S.2.1:	Sustain focused attention, respect, and discipline during class, rehearsal, and performance.
DA.912.S.2.4:	Demonstrate retention of directions, corrections, and memorization of dance from previous rehearsals and classes.
DA.912.S.3.2:	Develop and maintain flexibility, strength, and stamina for wellness and performance.
DA.912.S.3.4:	Perform dance vocabulary with musicality and sensitivity. **Clarifications:** e.g., on the counts, fill the music, emulate musical nuance
LAFS.910.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 9–10 texts and topics.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented. **Standard Relation to Course: Supporting**
LAFS.910.SL.1.2:	Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.
LAFS.910.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.
LAFS.910.SL.2.4:	Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.
LAFS.910.SL.2.6:	Adapt speech to a variety of contexts and tasks, demonstrating command of formal English when indicated or appropriate.
LAFS.910.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.910.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
MU.912.C.1.1:	Apply listening strategies to promote appreciation and understanding of unfamiliar musical works. **Clarifications:** e.g., listening maps, active listening, checklists
MU.912.C.2.2:	Evaluate performance quality in recorded and/or live performances.
MU.912.C.3.1:	Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.
MU.912.F.3.2:	Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.
MU.912.O.1.1:	Evaluate the organizational principles and conventions in musical works and discuss their effect on structure. **Clarifications:** e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble
	Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer.

MU.912.O.3.1:	**Clarifications:** e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm, orchestration
MU.912.S.2.1:	Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature. **Clarifications:** e.g., memorization, sequential process
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
PE.912.C.2.2:	Apply terminology and etiquette in dance.
PE.912.C.2.3:	Analyze the movement performance of self and others. **Clarifications:** Some examples are video analysis and checklist.
PE.912.C.2.5:	Analyze the relationship between music and dance.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Student dancers develop basic skills in performing and evaluating choreographed performances as an independent ensemble and in cooperation with a music ensemble. Emphasis is placed on dance, equipment manipulation, precision, and the relationship between music and dance. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

QUALIFICATIONS

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

Any field when certification reflects a bachelor or higher degree.

Course Standards

Name	Description
DA.912.C.1.2:	Apply replication, physical rehearsal, and cognitive rehearsal to aid in the mental and physical retention of patterns, complex steps, and sequences performed by another dancer. **Clarifications:** e.g., mind/body connection, watching, following, marking, visualizing, imagery, using rhythmic clues
DA.912.C.2.2:	Make informed critical assessments of the quality and effectiveness of one's own technique and performance quality, based on criteria developed from a variety of sources, to support personal competence and artistic growth. **Clarifications:** e.g., exemplary models, critical processes, background knowledge, experience, self-assessment, constructive criticism, comparison to other works
DA.912.C.2.3:	Develop a plan to improve technique, performance quality, and/or compositional work with artistic intent.
DA.912.F.3.6:	Practice conditioning methods that complement the physical instrument, and determine the degree of personal improvement in established dance techniques. **Clarifications:** e.g., Feldenkrais, Bartenieff, Pilates, yoga, cardio routines
DA.912.F.3.8:	Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.
DA.912.O.1.2:	Apply standards of class and performance etiquette consistently to attain optimal working conditions. **Clarifications:** e.g., appropriate attire, professional respect, traditions, procedures
DA.912.O.3.1:	Perform dance pieces to express feelings, ideas, cultural identity, music, and other abstract concepts through movements, steps, pantomime, and gestures.
DA.912.O.3.2:	Use imagery, analogy, and metaphor to improve body alignment and/or enhance the quality of movements, steps, phrases, or dances.
DA.912.S.1.2:	Generate choreographic ideas through improvisation and physical brainstorming.
DA.912.S.2.1:	Sustain focused attention, respect, and discipline during class, rehearsal, and performance.
DA.912.S.2.4:	Demonstrate retention of directions, corrections, and memorization of dance from previous rehearsals and classes.
DA.912.S.3.2:	Develop and maintain flexibility, strength, and stamina for wellness and performance.
DA.912.S.3.4:	Perform dance vocabulary with musicality and sensitivity. **Clarifications:** e.g., on the counts, fill the music, emulate musical nuance
MU.912.C.1.1:	Apply listening strategies to promote appreciation and understanding of unfamiliar musical works. **Clarifications:** e.g., listening maps, active listening, checklists
MU.912.C.2.2:	Evaluate performance quality in recorded and/or live performances.
MU.912.C.3.1:	Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.
MU.912.F.3.1:	Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of leadership in school and/or non-school settings.
MU.912.F.3.2:	Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.
MU.912.F.3.4:	Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.
MU.912.H.2.1:	Evaluate the social impact of music on specific historical periods.
MU.912.O.1.1:	Evaluate the organizational principles and conventions in musical works and discuss their effect on structure. **Clarifications:** e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble
MU.912.O.3.1:	Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer. **Clarifications:** e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm, orchestration
MU.912.S.2.1:	Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature. **Clarifications:** e.g., memorization, sequential process
MU.912.S.2.2:	Transfer expressive elements and performance techniques from one piece of music to another.
MU.912.S.3.4:	Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.
LAFS.910.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 9–10 texts and topics.

LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented. **Standard Relation to Course: Supporting**
LAFS.910.SL.1.2:	Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.
LAFS.910.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.
LAFS.910.SL.2.4:	Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.
LAFS.910.SL.2.6:	Adapt speech to a variety of contexts and tasks, demonstrating command of formal English when indicated or appropriate.
LAFS.910.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.910.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
PE.912.C.2.2:	Apply terminology and etiquette in dance.
PE.912.C.2.3:	Analyze the movement performance of self and others. **Clarifications:** Some examples are video analysis and checklist.
PE.912.C.2.5:	Analyze the relationship between music and dance.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Student dancers build on previous experience to perform and evaluate choreographed performances as an independent ensemble and in cooperation with a music ensemble. Students focus on strengthening dance skills, equipment manipulation, precision, and the relationship between music and dance. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

QUALIFICATIONS

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

Any field when certification reflects a bachelor or higher degree.

GENERAL INFORMATION

Course Number: 1305310

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 9 to 12 and Adult Education Courses > **Subject:** Music Education > **SubSubject:** Eurythmics >

Abbreviated Title: EURHY 2

Number of Credits: One (1) credit

Course Length: Year (Y)

Course Type: Core Academic Course

Course Level: 2

Course Status: Draft - Course Pending Approval

Grade Level(s): 9,10,11,12

Graduation Requirement: Performing/Fine Arts

Eurhythmics 3 (#1305320) 2015 - 2022 (current)

Course Standards

Name	Description
DA.912.C.1.2:	Apply replication, physical rehearsal, and cognitive rehearsal to aid in the mental and physical retention of patterns, complex steps, and sequences performed by another dancer. **Clarifications:** e.g., mind/body connection, watching, following, marking, visualizing, imagery, using rhythmic clues
DA.912.C.1.4:	Weigh and discuss the personal significance of using both physical and cognitive rehearsal over time to strengthen one's own retention of patterns, complex steps, and sequences for rehearsal and performance.
DA.912.C.2.2:	Make informed critical assessments of the quality and effectiveness of one's own technique and performance quality, based on criteria developed from a variety of sources, to support personal competence and artistic growth. **Clarifications:** e.g., exemplary models, critical processes, background knowledge, experience, self-assessment, constructive criticism, comparison to other works
DA.912.C.2.3:	Develop a plan to improve technique, performance quality, and/or compositional work with artistic intent.
DA.912.C.3.1:	Critique the quality and effectiveness of performances based on exemplary models and self-established criteria. **Clarifications:** e.g., use of movements, elements, principles of design, lighting, costumes, music
DA.912.C.3.2:	Assess artistic or personal challenges, holistically and in parts, to explore and weigh potential solutions to problems in technique or composition. **Clarifications:** e.g., time management, refining dance steps, research
DA.912.F.2.1:	Investigate and report potential careers, requirements for employment, markets, potential salaries, and the degree of competition in dance and dance-related fields. **Clarifications:** e.g., dancer, teacher, artistic director, stage manager, videographer, costumer, agent, Pilates teacher, dance therapist, nutritionist
DA.912.F.3.6:	Practice conditioning methods that complement the physical instrument, and determine the degree of personal improvement in established dance techniques. **Clarifications:** e.g., Feldenkrais, Bartenieff, Pilates, yoga, cardio routines
DA.912.F.3.8:	Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.
DA.912.H.1.1:	Explore and select music from a broad range of cultures to accompany, support, and/or inspire choreography.
DA.912.H.1.3:	Adhere to copyright laws for choreography and music licensing to show respect for the intellectual property of others.
DA.912.H.3.3:	Explain the importance of proper nutrition, injury prevention, and safe practices to optimal performance and the life-long health of a dancer.
DA.912.O.1.2:	Apply standards of class and performance etiquette consistently to attain optimal working conditions. **Clarifications:** e.g., appropriate attire, professional respect, traditions, procedures
DA.912.O.3.1:	Perform dance pieces to express feelings, ideas, cultural identity, music, and other abstract concepts through movements, steps, pantomime, and gestures.
DA.912.O.3.2:	Use imagery, analogy, and metaphor to improve body alignment and/or enhance the quality of movements, steps, phrases, or dances.
DA.912.S.1.2:	Generate choreographic ideas through improvisation and physical brainstorming.
DA.912.S.2.1:	Sustain focused attention, respect, and discipline during class, rehearsal, and performance.
DA.912.S.2.2:	Apply corrections and concepts from previously learned steps to different material to improve processing of new information. **Clarifications:** e.g., repetition, revision, refinement, focus
DA.912.S.2.4:	Demonstrate retention of directions, corrections, and memorization of dance from previous rehearsals and classes.
DA.912.S.3.2:	Develop and maintain flexibility, strength, and stamina for wellness and performance.
DA.912.S.3.4:	Perform dance vocabulary with musicality and sensitivity. **Clarifications:** e.g., on the counts, fill the music, emulate musical nuance
MU.912.C.1.1:	Apply listening strategies to promote appreciation and understanding of unfamiliar musical works. **Clarifications:** e.g., listening maps, active listening, checklists
MU.912.C.2.2:	Evaluate performance quality in recorded and/or live performances.
MU.912.C.3.1:	Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.
MU.912.F.2.2:	Analyze the effect of the arts and entertainment industry on the economic and social health of communities and regions. **Clarifications:** e.g., community revitalization, industry choosing new locations, cultural and social enrichment

MU.912.F.3.1:	Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of leadership in school and/or non-school settings.
MU.912.F.3.2:	Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.
MU.912.F.3.4:	Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.
MU.912.H.1.1:	Investigate and discuss how a culture's traditions are reflected through its music. **Clarifications:** e.g., patriotic, folk, celebration, entertainment, spiritual
MU.912.H.2.1:	Evaluate the social impact of music on specific historical periods.
MU.912.H.2.2:	Analyze current musical trends, including audience environments and music acquisition, to predict possible directions of music.
MU.912.O.1.1:	Evaluate the organizational principles and conventions in musical works and discuss their effect on structure. **Clarifications:** e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble
MU.912.O.3.1:	Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer. **Clarifications:** e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm, orchestration
MU.912.O.3.2:	Interpret and perform expressive elements indicated by the musical score and/or conductor.
MU.912.S.2.1:	Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature. **Clarifications:** e.g., memorization, sequential process
MU.912.S.2.2:	Transfer expressive elements and performance techniques from one piece of music to another.
MU.912.S.3.4:	Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.
LAFS.1112.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics.
LAFS.1112.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed. c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives. d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task. **Standard Relation to Course: Supporting**
LAFS.1112.SL.1.2:	Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.
LAFS.1112.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.
LAFS.1112.SL.2.4:	Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.
LAFS.1112.SL.2.6:	Adapt speech to a variety of contexts and tasks, demonstrating a command of formal English when indicated or appropriate.
LAFS.1112.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.1112.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
	Look for and make use of structure.

MAFS.K12.MP.7.1:	Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 – 3(x – y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
PE.912.C.2.2:	Apply terminology and etiquette in dance.
PE.912.C.2.3:	Analyze the movement performance of self and others. **Clarifications:** Some examples are video analysis and checklist.
PE.912.C.2.5:	Analyze the relationship between music and dance.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Student dancers strengthen their performance and evaluative skills, and explore the basic processes of designing choreography for an independent ensemble or in cooperation with a music ensemble. Students develop more sophisticated dance skills and equipment manipulation. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. Course Standards

Name	Description
DA.912.C.1.2:	Apply replication, physical rehearsal, and cognitive rehearsal to aid in the mental and physical retention of patterns, complex steps, and sequences performed by another dancer. **Clarifications:** e.g., mind/body connection, watching, following, marking, visualizing, imagery, using rhythmic clues
DA.912.C.1.3:	Develop and articulate criteria for use in critiquing dance, drawing on background knowledge and personal experience, to show independence in one's response. **Clarifications:** e.g., journal entries, discussion
DA.912.C.1.4:	Weigh and discuss the personal significance of using both physical and cognitive rehearsal over time to strengthen one's own retention of patterns, complex steps, and sequences for rehearsal and performance.
DA.912.C.2.1:	Analyze movement from varying perspectives and experiment with a variety of creative solutions to solve technical or choreographic challenges. **Clarifications:** e.g., improvisation, trial and error, collaboration
DA.912.C.2.2:	Make informed critical assessments of the quality and effectiveness of one's own technique and performance quality, based on criteria developed from a variety of sources, to support personal competence and artistic growth. **Clarifications:** e.g., exemplary models, critical processes, background knowledge, experience, self-assessment, constructive criticism, comparison to other works
DA.912.C.2.3:	Develop a plan to improve technique, performance quality, and/or compositional work with artistic intent.
DA.912.C.2.4:	Evaluate nuances of movement and their relationship to style, choreographic elements, and/or other dancers, and apply this knowledge to alter personal performance.
DA.912.C.3.1:	Critique the quality and effectiveness of performances based on exemplary models and self-established criteria. **Clarifications:** e.g., use of movements, elements, principles of design, lighting, costumes, music
DA.912.C.3.2:	Assess artistic or personal challenges, holistically and in parts, to explore and weigh potential solutions to problems in technique or composition. **Clarifications:** e.g., time management, refining dance steps, research
DA.912.F.1.3:	Employ acquired knowledge to stimulate creative risk-taking and broaden one's own dance technique, performance, and choreography.
DA.912.F.2.1:	Investigate and report potential careers, requirements for employment, markets, potential salaries, and the degree of competition in dance and dance-related fields. **Clarifications:** e.g., dancer, teacher, artistic director, stage manager, videographer, costumer, agent, Pilates teacher, dance therapist, nutritionist
DA.912.F.3.1:	Demonstrate leadership and responsibility through designing choreography, planning rehearsals, or directing a dance piece.
DA.912.F.3.2:	Synthesize information and make use of a variety of experiences and resources from outside dance class to inform and inspire one's work as a dancer. **Clarifications:** e.g., private studio work, school subjects, athletics, outside interests, news, personal life, music, poetry, environment
DA.912.F.3.6:	Practice conditioning methods that complement the physical instrument, and determine the degree of personal improvement in established dance techniques. **Clarifications:** e.g., Feldenkrais, Bartenieff, Pilates, yoga, cardio routines
DA.912.F.3.8:	Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.
DA.912.H.1.1:	Explore and select music from a broad range of cultures to accompany, support, and/or inspire choreography.
DA.912.H.1.2:	Study dance works created by artists of diverse backgrounds, and use their work as inspiration for performance or creating new works.
DA.912.H.1.3:	Adhere to copyright laws for choreography and music licensing to show respect for the intellectual property of others.
DA.912.H.3.3:	Explain the importance of proper nutrition, injury prevention, and safe practices to optimal performance and the life-long health of a dancer.
DA.912.O.1.2:	Apply standards of class and performance etiquette consistently to attain optimal working conditions. **Clarifications:** e.g., appropriate attire, professional respect, traditions, procedures
DA.912.O.1.5:	Construct a dance that uses specific choreographic structures to express an idea and show understanding of continuity and framework. **Clarifications:** e.g., ABA, ABCA, ABACA, narrative, motif, beginning-middle-end, motif manipulation
DA.912.O.3.1:	Perform dance pieces to express feelings, ideas, cultural identity, music, and other abstract concepts through movements, steps, pantomime, and gestures.
DA.912.O.3.2:	Use imagery, analogy, and metaphor to improve body alignment and/or enhance the quality of movements, steps, phrases, or dances.
DA.912.S.1.1:	Synthesize a variety of choreographic principles and structures to create a dance. **Clarifications:**

	e.g., unity, variety, contrast, repetition, transition
DA.912.S.1.2:	Generate choreographic ideas through improvisation and physical brainstorming.
DA.912.S.2.1:	Sustain focused attention, respect, and discipline during class, rehearsal, and performance.
DA.912.S.2.2:	Apply corrections and concepts from previously learned steps to different material to improve processing of new information. **Clarifications:** e.g., repetition, revision, refinement, focus
DA.912.S.2.4:	Demonstrate retention of directions, corrections, and memorization of dance from previous rehearsals and classes.
DA.912.S.3.2:	Develop and maintain flexibility, strength, and stamina for wellness and performance.
DA.912.S.3.4:	Perform dance vocabulary with musicality and sensitivity. **Clarifications:** e.g., on the counts, fill the music, emulate musical nuance
MU.912.C.1.1:	Apply listening strategies to promote appreciation and understanding of unfamiliar musical works. **Clarifications:** e.g., listening maps, active listening, checklists
MU.912.C.2.2:	Evaluate performance quality in recorded and/or live performances.
MU.912.C.3.1:	Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.
MU.912.F.1.2:	Incorporate or adapt new, emerging, or previously unfamiliar technology to create an innovative composition, music project, or related product.
MU.912.F.2.2:	Analyze the effect of the arts and entertainment industry on the economic and social health of communities and regions. **Clarifications:** e.g., community revitalization, industry choosing new locations, cultural and social enrichment
MU.912.F.3.1:	Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of leadership in school and/or non-school settings.
MU.912.F.3.2:	Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.
MU.912.F.3.3:	Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace.
MU.912.F.3.4:	Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.
MU.912.H.1.1:	Investigate and discuss how a culture's traditions are reflected through its music. **Clarifications:** e.g., patriotic, folk, celebration, entertainment, spiritual
MU.912.H.2.1:	Evaluate the social impact of music on specific historical periods.
MU.912.H.2.2:	Analyze current musical trends, including audience environments and music acquisition, to predict possible directions of music.
MU.912.O.1.1:	Evaluate the organizational principles and conventions in musical works and discuss their effect on structure. **Clarifications:** e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble
MU.912.O.3.1:	Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer. **Clarifications:** e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm, orchestration
MU.912.O.3.2:	Interpret and perform expressive elements indicated by the musical score and/or conductor.
MU.912.S.2.1:	Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature. **Clarifications:** e.g., memorization, sequential process
MU.912.S.2.2:	Transfer expressive elements and performance techniques from one piece of music to another.
MU.912.S.3.4:	Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.
LAFS.1112.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics.
LAFS.1112.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed. c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives. d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task. **Standard Relation to Course: Supporting**
LAFS.1112.SL.1.2:	Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.
LAFS.1112.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.
	Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning,

LAFS.1112.SL.2.4:	alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.
LAFS.1112.SL.2.6:	Adapt speech to a variety of contexts and tasks, demonstrating a command of formal English when indicated or appropriate.
LAFS.1112.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.1112.WHST.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.1112.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
PE.912.C.2.2:	Apply terminology and etiquette in dance.
PE.912.C.2.3:	Analyze the movement performance of self and others. **Clarifications:** Some examples are video analysis and checklist.
PE.912.C.2.5:	Analyze the relationship between music and dance.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Student dancers develop advanced skills in creating, performing, and evaluating choreographed performances as an independent ensemble and in cooperation with a music ensemble. Coursework focuses on dance, equipment manipulation, precision, and analysis of the relationship between music and dance. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

QUALIFICATIONS

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

Any field when certification reflects a bachelor or higher degree.

GENERAL INFORMATION

Course Number: 1305330

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 9 to 12 and Adult Education Courses > **Subject:** Music Education > **SubSubject:** Eurythmics >

Abbreviated Title: EURHY 4

Number of Credits: One (1) credit

Course Length: Year (Y)

Course Type: Core Academic Course

Course Level: 2

Course Status: Draft - Course Pending Approval

Grade Level(s): 9,10,11,12

Graduation Requirement: Performing/Fine Arts

Music Ensemble 1 (#1305400) 2020 - 2022 (current)

Course Standards

Name	Description
MU.912.C.1.1:	Apply listening strategies to promote appreciation and understanding of unfamiliar musical works. **Clarifications:** e.g., listening maps, active listening, checklists
MU.912.C.2.1:	Evaluate and make appropriate adjustments to personal performance in solo and ensembles.
MU.912.C.2.2:	Evaluate performance quality in recorded and/or live performances.
MU.912.C.3.1:	Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.
MU.912.F.3.2:	Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.
MU.912.H.1.5:	Analyze music within cultures to gain understanding of authentic performance practices.
MU.912.H.2.4:	Examine the effects of developing technology on composition, performance, and acquisition of music.
MU.912.O.3.2:	Interpret and perform expressive elements indicated by the musical score and/or conductor.
MU.912.S.1.3:	Arrange a musical work by manipulating two or more aspects of the composition. **Clarifications:** e.g., texture, mode, form, tempo, voicing
MU.912.S.2.2:	Transfer expressive elements and performance techniques from one piece of music to another.
MU.912.S.3.1:	Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.
MU.912.S.3.2:	Sight-read music accurately and expressively to show synthesis of skills. **Clarifications:** e.g., musical elements, expressive qualities, performance technique
MU.912.S.3.5:	Develop and demonstrate proper vocal or instrumental technique. **Clarifications:** e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming
LAFS.910.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 9–10 texts and topics.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented. **Standard Relation to Course: Supporting**
LAFS.910.SL.1.2:	Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.
LAFS.910.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.
LAFS.910.SL.2.4:	Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.
LAFS.910.SL.2.6:	Adapt speech to a variety of contexts and tasks, demonstrating command of formal English when indicated or appropriate.
LAFS.910.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.910.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
	Attend to precision.

MAFS.K12.MP.6.1:	Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 – 3(x – y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
DA.912.F.3.8:	Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.
DA.912.S.2.1:	Sustain focused attention, respect, and discipline during class, rehearsal, and performance.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students with little or no experience in a vocal or instrumental ensemble develop basic musicianship and ensemble performance skills through the study of basic, high-quality music in diverse styles. Student musicians focus on building foundational music techniques, music literacy, listening skills, and aesthetic awareness. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course, if used for an instrumental ensemble, may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. Course Standards

Name	Description
MU.912.C.1.1:	Apply listening strategies to promote appreciation and understanding of unfamiliar musical works. **Clarifications:** e.g., listening maps, active listening, checklists
MU.912.C.2.1:	Evaluate and make appropriate adjustments to personal performance in solo and ensembles.
MU.912.C.2.2:	Evaluate performance quality in recorded and/or live performances.
MU.912.C.3.1:	Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.
MU.912.F.3.2:	Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.
MU.912.H.1.5:	Analyze music within cultures to gain understanding of authentic performance practices.
MU.912.H.2.4:	Examine the effects of developing technology on composition, performance, and acquisition of music.
MU.912.O.1.1:	Evaluate the organizational principles and conventions in musical works and discuss their effect on structure. **Clarifications:** e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble
MU.912.O.3.1:	Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer. **Clarifications:** e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm, orchestration
MU.912.O.3.2:	Interpret and perform expressive elements indicated by the musical score and/or conductor.
MU.912.S.1.3:	Arrange a musical work by manipulating two or more aspects of the composition. **Clarifications:** e.g., texture, mode, form, tempo, voicing
MU.912.S.2.1:	Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature. **Clarifications:** e.g., memorization, sequential process
MU.912.S.2.2:	Transfer expressive elements and performance techniques from one piece of music to another.
MU.912.S.3.1:	Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.
MU.912.S.3.2:	Sight-read music accurately and expressively to show synthesis of skills. **Clarifications:** e.g., musical elements, expressive qualities, performance technique
MU.912.S.3.5:	Develop and demonstrate proper vocal or instrumental technique. **Clarifications:** e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming
LAFS.910.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 9–10 texts and topics.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented. **Standard Relation to Course: Supporting**
LAFS.910.SL.1.2:	Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.
LAFS.910.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.
LAFS.910.SL.2.4:	Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.
LAFS.910.SL.2.6:	Adapt speech to a variety of contexts and tasks, demonstrating command of formal English when indicated or appropriate.
LAFS.910.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.

LAFS.910.WHST.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.910.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
DA.912.S.2.1:	Sustain focused attention, respect, and discipline during class, rehearsal, and performance.
DA.912.S.3.8:	Articulate and apply a stylistically appropriate sense of line to enhance artistry in one or more dance forms. **Clarifications:** e.g., arabesque, lateral T, jazz hands
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students with previous vocal or instrumental ensemble experience continue building musicianship and performance skills through the study of high-quality music in diverse styles. Student musicians learn to self-assess and collaborate as they rehearse, perform, and study relevant musical styles and time periods. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course, if used for an instrumental ensemble, may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

Course Standards

Name	Description
MU.912.C.1.1:	Apply listening strategies to promote appreciation and understanding of unfamiliar musical works. **Clarifications:** e.g., listening maps, active listening, checklists
MU.912.C.1.2:	Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the composer's intent. **Clarifications:** e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title
MU.912.C.2.1:	Evaluate and make appropriate adjustments to personal performance in solo and ensembles.
MU.912.C.2.2:	Evaluate performance quality in recorded and/or live performances.
MU.912.C.3.1:	Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.
MU.912.F.2.1:	Design or refine a résumé for application to higher education or the workforce that highlights marketable skills and knowledge gained through music training. **Clarifications:** e.g., repertoire lists, technology-based work, ability to research and analyze, and examples of leadership and collaborative skills
MU.912.F.2.3:	Compare the organizational structure of a professional orchestra, chorus, quintet, or other ensemble to that of a business. **Clarifications:** e.g., leadership, financial needs and structure, marketing, personnel matters, manager, travel
MU.912.F.3.1:	Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of leadership in school and/or non-school settings.
MU.912.F.3.2:	Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.
MU.912.F.3.3:	Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace.
MU.912.H.1.3:	Compare two or more works of a composer across performance media. **Clarifications:** e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto
MU.912.H.1.5:	Analyze music within cultures to gain understanding of authentic performance practices.
MU.912.H.2.4:	Examine the effects of developing technology on composition, performance, and acquisition of music.
MU.912.O.1.1:	Evaluate the organizational principles and conventions in musical works and discuss their effect on structure. **Clarifications:** e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble
MU.912.O.2.1:	Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.
MU.912.O.3.1:	Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer. **Clarifications:** e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm, orchestration
MU.912.O.3.2:	Interpret and perform expressive elements indicated by the musical score and/or conductor.
MU.912.S.1.3:	Arrange a musical work by manipulating two or more aspects of the composition. **Clarifications:** e.g., texture, mode, form, tempo, voicing
MU.912.S.1.4:	Perform and notate, independently and accurately, melodies by ear. **Clarifications:** e.g., singing, playing, writing
MU.912.S.2.1:	Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature. **Clarifications:** e.g., memorization, sequential process
MU.912.S.2.2:	Transfer expressive elements and performance techniques from one piece of music to another.
MU.912.S.3.1:	Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.
MU.912.S.3.2:	Sight-read music accurately and expressively to show synthesis of skills. **Clarifications:** e.g., musical elements, expressive qualities, performance technique
MU.912.S.3.4:	Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.

MU.912.S.3.5:	Develop and demonstrate proper vocal or instrumental technique. **Clarifications:** e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming
LAFS.1112.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics.
LAFS.1112.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed. c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives. d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task. **Standard Relation to Course: Supporting**
LAFS.1112.SL.1.2:	Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.
LAFS.1112.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.
LAFS.1112.SL.2.4:	Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.
LAFS.1112.SL.2.6:	Adapt speech to a variety of contexts and tasks, demonstrating a command of formal English when indicated or appropriate.
LAFS.1112.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.1112.WHST.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.1112.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
DA.912.F.3.8:	Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.
DA.912.S.2.1:	Sustain focused attention, respect, and discipline during class, rehearsal, and performance.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students strengthen vocal or instrumental ensemble performance skills, music literacy, and analytical skills through the study of high-quality music in diverse styles. Student musicians learn to self-assess and collaborate as they rehearse, perform, and study relevant history and cultures. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the

classroom. This course, if used for an instrumental ensemble, may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

Course Level: 2

Course Status: Course Approved

Grade Level(s): 9,10,11,12

Graduation Requirement: Performing/Fine Arts

Educator Certifications

Music (Elementary and Secondary Grades K-12)
Vocal Music (Elementary and Secondary Grades K-12)
Instrumental Music (Secondary Grades 7-12)
Instrumental Music (Elementary and Secondary Grades K-12)

Music Ensemble 4 Honors (#1305430) 2020 - 2022 (current)

Course Standards

Name	Description
MU.912.C.1.1:	Apply listening strategies to promote appreciation and understanding of unfamiliar musical works. **Clarifications:** e.g., listening maps, active listening, checklists
MU.912.C.1.2:	Compare, using correct music vocabulary, the aesthetic impact of two or more performances of a musical work to one's own hypothesis of the composer's intent. **Clarifications:** e.g., quality recordings, individual and peer-group performances, composer notes, instrumentation, expressive elements, title
MU.912.C.2.1:	Evaluate and make appropriate adjustments to personal performance in solo and ensembles.
MU.912.C.2.2:	Evaluate performance quality in recorded and/or live performances.
MU.912.C.3.1:	Make critical evaluations, based on exemplary models, of the quality and effectiveness of performances and apply the criteria to personal development in music.
MU.912.F.1.1:	Analyze and evaluate the effect of "traditional" and contemporary technologies on the development of music.
MU.912.F.2.1:	Design or refine a résumé for application to higher education or the workforce that highlights marketable skills and knowledge gained through music training. **Clarifications:** e.g., repertoire lists, technology-based work, ability to research and analyze, and examples of leadership and collaborative skills
MU.912.F.2.2:	Analyze the effect of the arts and entertainment industry on the economic and social health of communities and regions. **Clarifications:** e.g., community revitalization, industry choosing new locations, cultural and social enrichment
MU.912.F.2.3:	Compare the organizational structure of a professional orchestra, chorus, quintet, or other ensemble to that of a business. **Clarifications:** e.g., leadership, financial needs and structure, marketing, personnel matters, manager, travel
MU.912.F.3.1:	Analyze and describe how meeting one's responsibilities in music offers opportunities to develop leadership skills, and identify personal examples of leadership in school and/or non-school settings.
MU.912.F.3.2:	Summarize copyright laws that govern printed, recorded, and on-line music to promote legal and responsible use of intellectual property and technology.
MU.912.F.3.3:	Define, prioritize, monitor, and successfully complete tasks related to individual musical performance or project presentation, without direct oversight, demonstrating skills for use in the workplace.
MU.912.F.3.4:	Design and implement a personal learning plan, related to the study of music, which demonstrates self-assessment, brain-storming, decision-making, and initiative to advance skills and/or knowledge.
MU.912.H.1.2:	Compare the work of, and influences on, two or more exemplary composers in the performance medium studied in class. **Clarifications:** e.g., vocal, instrumental, guitar, keyboard, electronic, handbells
MU.912.H.1.3:	Compare two or more works of a composer across performance media. **Clarifications:** e.g., orchestral and choral; guitar and string quartet; piano solo and piano concerto
MU.912.H.1.5:	Analyze music within cultures to gain understanding of authentic performance practices.
MU.912.H.2.1:	Evaluate the social impact of music on specific historical periods.
MU.912.H.2.2:	Analyze current musical trends, including audience environments and music acquisition, to predict possible directions of music.
MU.912.H.2.4:	Examine the effects of developing technology on composition, performance, and acquisition of music.
MU.912.O.1.1:	Evaluate the organizational principles and conventions in musical works and discuss their effect on structure. **Clarifications:** e.g., rhythm, melody, timbre, form, tonality, harmony, texture; solo, chamber ensemble, large ensemble
MU.912.O.2.1:	Transfer accepted composition conventions and performance practices of a specific style to a contrasting style of music.
MU.912.O.3.1:	Analyze expressive elements in a musical work and describe how the choices and manipulations of the elements support, for the listener, the implied meaning of the composer/performer. **Clarifications:** e.g., tempo markings, expression markings, articulation markings, phrasing, scales, modes, harmonic structure, timbre choice, rhythm, orchestration
MU.912.O.3.2:	Interpret and perform expressive elements indicated by the musical score and/or conductor.
MU.912.S.1.3:	Arrange a musical work by manipulating two or more aspects of the composition. **Clarifications:** e.g., texture, mode, form, tempo, voicing
MU.912.S.1.4:	Perform and notate, independently and accurately, melodies by ear. **Clarifications:** e.g., singing, playing, writing

MU.912.S.2.1:	Apply the ability to memorize and internalize musical structure, accurate and expressive details, and processing skills to the creation or performance of music literature. **Clarifications:** e.g., memorization, sequential process
MU.912.S.2.2:	Transfer expressive elements and performance techniques from one piece of music to another.
MU.912.S.3.1:	Synthesize a broad range of musical skills by performing a varied repertoire with expression, appropriate stylistic interpretation, technical accuracy, and kinesthetic energy.
MU.912.S.3.2:	Sight-read music accurately and expressively to show synthesis of skills. **Clarifications:** e.g., musical elements, expressive qualities, performance technique
MU.912.S.3.4:	Analyze and describe the effect of rehearsal sessions and/or strategies on refinement of skills and techniques.
MU.912.S.3.5:	Develop and demonstrate proper vocal or instrumental technique. **Clarifications:** e.g., posture, breathing, fingering, embouchure, bow technique, tuning, strumming
LAFS.1112.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics.
LAFS.1112.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed. c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives. d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task. **Standard Relation to Course: Supporting**
LAFS.1112.SL.1.2:	Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.
LAFS.1112.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.
LAFS.1112.SL.2.4:	Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.
LAFS.1112.SL.2.6:	Adapt speech to a variety of contexts and tasks, demonstrating a command of formal English when indicated or appropriate.
LAFS.1112.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.1112.WHST.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products in response to ongoing feedback, including new arguments or information.
LAFS.1112.WHST.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.1112.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**

DA.912.F.3.8:	Demonstrate effective teamwork and accountability, using compromise, collaboration, and conflict resolution, to set and achieve goals as required in the work environment.
DA.912.S.2.1:	Sustain focused attention, respect, and discipline during class, rehearsal, and performance.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students with extensive vocal or instrumental ensemble experience refine their critical listening, music literacy, and ensemble skills through the study, rehearsal, and performance of high-quality, advanced literature. Students use reflection and problem-solving skills with increasing independence to improve their performance and musical expression. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course, if used for an instrumental ensemble, may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

GENERAL NOTES

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. General Course Information and Notes

VERSION DESCRIPTION

Students in this entry-level class focus on the development of musical and technical skills on a specific instrument or voice through etudes, scales, and selected music literature. Through problem-solving, critical thinking, and reflection, students develop the physical and cognitive skills to be more disciplined performers. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course, if used for an instrumental class, may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

Course Standards

Name	Description
MU.3.C.1.1:	Describe listening skills and how they support appreciation of musical works. **Clarifications:** e.g., focus: form, instrumentation, tempo, dynamics; organize: listening maps, active listening, checklists
MU.3.C.1.2:	Respond to a musical work in a variety of ways and compare individual interpretations. **Clarifications:** e.g., move, draw, sing, play, gesture, conduct
MU.3.C.1.4:	Discriminate between unison and two-part singing.
MU.3.C.2.1:	Evaluate performances of familiar music using teacher-established criteria.
MU.3.C.3.1:	Identify musical characteristics and elements within a piece of music when discussing the value of the work. **Clarifications:** e.g., tempo, rhythm, timbre, form, instrumentation, texture
MU.3.F.2.1:	Identify musicians in the school, community, and media. **Clarifications:** e.g., band, chorus, and/or orchestra member; music teacher; cantor, choir director, or song leader in religious services
MU.3.F.2.2:	Describe opportunities for personal music-making. **Clarifications:** e.g., performing ensembles, individual lessons, community and church music groups, family, playground, computer-generated music
MU.3.F.3.1:	Collaborate with others to create a musical presentation and acknowledge individual contributions as an integral part of the whole. **Clarifications:** e.g., work together, communicate effectively, share tasks and responsibilities, work well in cooperative learning groups
MU.3.H.1.2:	Identify significant information about specified composers and one or more of their musical works.
MU.3.H.3.1:	Experience and discuss, using correct music and other relevant content-area vocabulary, similarities in the use of pattern, line, and form in music and other teacher-selected contexts. **Clarifications:** e.g., in dance, visual art, language arts, pulse, rhythm, fluency
MU.3.O.1.1:	Identify, using correct music vocabulary, the elements in a musical work. **Clarifications:** e.g., rhythm, pitch, timbre, form
MU.3.O.1.2:	Identify and describe the musical form of a familiar song. **Clarifications:** e.g., AB, ABA, ABABA, call-and-response, verse/refrain, rondo, intro, coda
MU.3.O.3.1:	Describe how tempo and dynamics can change the mood or emotion of a piece of music.
MU.3.S.2.1:	Identify patterns in songs to aid the development of sequencing and memorization skills. **Clarifications:** e.g., parts of a round, parts of a layered work
MU.3.S.3.1:	Sing rounds, canons, or ostinati in an appropriate range, using head voice and maintaining pitch.
MU.3.S.3.3:	Sing simple la-sol-mi-re-do patterns at sight. **Clarifications:** e.g., reading from hand signs; reading from nontraditional or traditional notation
MU.4.C.1.1:	Develop effective listening strategies and describe how they can support appreciation of musical works. **Clarifications:** e.g., listen for form, instrumentation, tempo, dynamics, melodic line, rhythm patterns; organize thoughts using listening maps, active listening, checklists
MU.4.C.1.2:	Describe, using correct music vocabulary, what is heard in a specific musical work. **Clarifications:** e.g., movement of melodic line, tempo, repeated and contrasting patterns
MU.4.C.1.4:	Identify and describe the four primary voice parts, i.e., soprano, alto, tenor, bass.
MU.4.C.2.1:	Identify and describe basic music performance techniques to provide a foundation for critiquing one's self and others. **Clarifications:** e.g., intonation, balance, blend, timbre, posture, breath support
MU.4.C.2.2:	Critique specific techniques in one's own and others performances using teacher-established criteria.
MU.4.C.3.1:	Describe characteristics that make various musical works appealing. **Clarifications:** e.g., tempo, rhythm, dynamics, blend, timbre, form, texture, instrumentation

MU.4.F.2.1:	Describe roles and careers of selected musicians. **Clarifications:** e.g., teacher, conductor, composer, studio musician, recording technician, sound engineer, entertainer
MU.4.F.3.1:	Identify the characteristics and behaviors displayed by successful student musicians, and discuss how these qualities will contribute to success beyond the music classroom. **Clarifications:** e.g., punctual, prepared, dependable, self-disciplined, solutions-oriented, shows initiative, uses time wisely
MU.4.H.1.2:	Describe the influence of selected composers on the musical works and practices or traditions of their time.
MU.4.H.3.1:	Identify connections among music and other contexts, using correct music and other relevant content-area vocabulary, and explore how learning in one academic area can help with knowledge or skill acquisition in a different academic area. **Clarifications:** e.g., movement, form, repetition, rhythmic patterns/numeric patterns, fractions, vibrations/sound waves
MU.4.O.1.1:	Compare musical elements in different types of music, using correct music vocabulary, as a foundation for understanding the structural conventions of specific styles. **Clarifications:** e.g., rules of rhythm, melody, timbre, form, tonality, harmony, meter; styles: Classical, Baroque
MU.4.O.3.1:	Identify how expressive elements and lyrics affect the mood or emotion of a song. **Clarifications:** e.g., tempo, dynamics, phrasing, articulation
MU.4.O.3.2:	Apply expressive elements to a vocal or instrumental piece and, using correct music vocabulary, explain one's choices.
MU.4.S.1.3:	Arrange a familiar song for voices or instruments by manipulating form. **Clarifications:** e.g., introduction, interlude/bridge, coda, ABA, rondo
MU.4.S.2.1:	Apply knowledge of musical structure to aid in sequencing and memorization and to internalize details of rehearsal and performance.
MU.4.S.3.1:	Sing rounds, canons, and/or partner songs in an appropriate range, using proper vocal technique and maintaining pitch.
MU.4.S.3.3:	Perform extended pentatonic melodies at sight. **Clarifications:** e.g., high do, low sol, low la; vocal and/or instrumental
MU.5.C.1.1:	Discuss and apply listening strategies to support appreciation of musical works. **Clarifications:** e.g., focus: structure, instrumentation, tempo, dynamics, melodic line, rhythm patterns, style/genre; organize: listening maps, active listening, checklists
MU.5.C.1.2:	Hypothesize and discuss, using correct music vocabulary, the composer's intent for a specific musical work. **Clarifications:** e.g., title, historical notes, quality recordings, instrumentation, expressive elements
MU.5.C.1.4:	Identify, aurally, the four primary voice parts, i.e., soprano, alto, tenor, bass, of a mixed choir.
MU.5.C.2.1:	Define criteria, using correct music vocabulary, to critique one's own and others performance. **Clarifications:** e.g., intonation, balance, blend, timbre
MU.5.C.2.2:	Describe changes, using correct music vocabulary, in one's own and/or others performance over time.
MU.5.C.3.1:	Develop criteria to evaluate an exemplary musical work from a specific period or genre.
MU.5.F.2.1:	Describe jobs associated with various types of concert venues and performing arts centers. **Clarifications:** e.g., music merchant, ticket agent, marketer, agent, security guard, food-and-beverage merchant
MU.5.F.2.2:	Explain why live performances are important to the career of the artist and the success of performance venues.
MU.5.F.3.1:	Examine and discuss the characteristics and behaviors displayed by successful student musicians that can be applied outside the music classroom. **Clarifications:** e.g., dedicated, works toward mastery, punctual, prepared, dependable, self-disciplined, solutions-oriented
MU.5.H.1.2:	Compare and describe the compositional characteristics used by two or more composers whose works are studied in class.
MU.5.H.3.1:	Examine critical-thinking processes in music and describe how they can be transferred to other disciplines. **Clarifications:** e.g., reading, writing, observing, listening, evaluating, embellishing, revising
MU.5.O.1.1:	Analyze, using correct music vocabulary, the use of musical elements in various styles of music as a foundation for understanding the creative process. **Clarifications:** e.g., rhythm patterns, melody, timbre, form, tonality, harmony, meter, key; styles: Classical, Baroque, Romantic, nationalistic, jazz
MU.5.O.3.1:	Examine and explain how expressive elements, when used in a selected musical work, affect personal response. **Clarifications:** e.g., tempo, dynamics, timbre, texture, phrasing, articulation
MU.5.O.3.2:	Perform expressive elements in a vocal or instrumental piece as indicated by the score and/or conductor.
MU.5.S.1.3:	Arrange a familiar song by manipulating specified aspects of music. **Clarifications:** e.g., dynamics, tempo, lyrics, form, rhythm, instrumentation
MU.5.S.1.4:	Sing or play simple melodic patterns by ear with support from the teacher.

MU.5.S.2.1:	Use expressive elements and knowledge of musical structure to aid in sequencing and memorization and to internalize details of rehearsals and performance.
MU.5.S.2.2:	Apply performance techniques to familiar music.
MU.5.S.3.1:	Sing part songs in an appropriate range, using proper vocal technique and maintaining pitch.
MU.5.S.3.3:	Perform simple diatonic melodies at sight. **Clarifications:** e.g., vocal and/or instrumental
LAFS.3.RI.2.4:	Determine the meaning of general academic and domain-specific words and phrases in a text relevant to a grade 3 topic or subject area.
LAFS.3.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 3 *topics and texts*, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation and other information known about the topic to explore ideas under discussion. b. Follow agreed-upon rules for discussions (e.g., gaining the floor in respectful ways, listening to others with care, speaking one at a time about the topics and texts under discussion). c. Ask questions to check understanding of information presented, stay on topic, and link their comments to the remarks of others. d. Explain their own ideas and understanding in light of the discussion. **Standard Relation to Course: Supporting**
LAFS.3.SL.1.2:	Determine the main ideas and supporting details of a text read aloud or information presented in diverse media and formats, including visually, quantitatively, and orally.
LAFS.3.SL.1.3:	Ask and answer questions about information from a speaker, offering appropriate elaboration and detail.
LAFS.4.RI.2.4:	Determine the meaning of general academic and domain-specific words or phrases in a text relevant to a *grade 4 topic or subject area*.
LAFS.4.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade *4 topics and texts*, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation and other information known about the topic to explore ideas under discussion. b. Follow agreed-upon rules for discussions and carry out assigned roles. c. Pose and respond to specific questions to clarify or follow up on information, and make comments that contribute to the discussion and link to the remarks of others. d. Review the key ideas expressed and explain their own ideas and understanding in light of the discussion. **Standard Relation to Course: Supporting**
LAFS.4.SL.1.2:	Paraphrase portions of a text read aloud or information presented in diverse media and formats, including visually, quantitatively, and orally.
LAFS.4.SL.1.3:	Identify the reasons and evidence a speaker provides to support particular points.
LAFS.5.RI.2.4:	Determine the meaning of general academic and domain-specific words and phrases in a text relevant to a *grade 5 topic or subject area*.
LAFS.5.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on *grade 5 topics and texts*, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation and other information known about the topic to explore ideas under discussion. b. Follow agreed-upon rules for discussions and carry out assigned roles. c. Pose and respond to specific questions by making comments that contribute to the discussion and elaborate on the remarks of others. d. Review the key ideas expressed and draw conclusions in light of information and knowledge gained from the discussions. **Standard Relation to Course: Supporting**
LAFS.5.SL.1.2:	Summarize a written text read aloud or information presented in diverse media and formats, including visually, quantitatively, and orally.
LAFS.5.SL.1.3:	Summarize the points a speaker makes and explain how each claim is supported by reasons and evidence.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x$

	– y)² as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students who have varying levels of experience in chorus develop beginning vocal technique and skills, notational literacy and fluency, expressive and stylistic interpretation, part-singing, critical and creative thinking skills, and an appreciation of music from around the world and throughout history. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

GENERAL NOTES

The course descriptions for Elementary Music Electives have been designed to accommodate the mixing of grade levels, experience, and abilities within the same ensemble. Music teachers for elementary music electives should select the most appropriate set of grade-specific benchmarks based on each student's experience, music literacy, and available instruction time. Once an elementary student has entered a course at a specific level of benchmarks, he or she should progress to the next set of grade-specific benchmarks in the sequence for purposes of assessment. If a student reaches the Grade 5 level prior to 5th grade, he or she may continue to participate in the ensemble; the teacher is responsible for designating an appropriate means of increasing the rigor for the student in each subsequent year.

Examples:

- A 3rd grade student beginning in Elementary Band may receive instruction and be assessed according to the Grade 3 benchmarks.
- A 2nd grade student who has taken violin lessons for several years and who is musically literate may receive instruction in Elementary Orchestra and be assessed according to the Grade 5 benchmarks, repeating use of these benchmarks with increased rigor in each subsequent year.
- A 5th grader singing in Elementary Chorus for the first time may receive instruction and be assessed according to the Grade 3 benchmarks.
- A 4th grader in Handbell Ensemble (Special Ensemble) for the first time may receive instruction and be assessed according to the Grade 3 benchmarks. The same student, in Orff Ensemble (Special Ensemble) for the second year, may receive instruction and be assessed according to the Grade 4 benchmarks.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

GENERAL INFORMATION

Course Number: 5013010

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades PreK to 5 Education Courses > **Subject:** Music Education > **SubSubject:** General >
Abbreviated Title: ELEM CHORUS
Course Length: Year (Y)

Course Status: Draft - Course Pending Approval

Grade Level(s): K,1,2,3,4,5,PreK

Educator Certifications

Music Education (Elementary Grades 1-6)
Music (Elementary and Secondary Grades K-12)
Vocal Music (Elementary and Secondary Grades K-12)

Elementary Band (#5013020) 2015 - 2022 (current)

Course Standards

Name	Description
MU.3.C.1.1:	Describe listening skills and how they support appreciation of musical works. **Clarifications:** e.g., focus: form, instrumentation, tempo, dynamics; organize: listening maps, active listening, checklists
MU.3.C.1.2:	Respond to a musical work in a variety of ways and compare individual interpretations. **Clarifications:** e.g., move, draw, sing, play, gesture, conduct
MU.3.C.1.3:	Identify families of orchestral and band instruments. **Clarifications:** e.g., strings, woodwinds, brass, percussion, keyboards
MU.3.C.2.1:	Evaluate performances of familiar music using teacher-established criteria.
MU.3.C.3.1:	Identify musical characteristics and elements within a piece of music when discussing the value of the work. **Clarifications:** e.g., tempo, rhythm, timbre, form, instrumentation, texture
MU.3.F.2.1:	Identify musicians in the school, community, and media. **Clarifications:** e.g., band, chorus, and/or orchestra member; music teacher; cantor, choir director, or song leader in religious services
MU.3.F.2.2:	Describe opportunities for personal music-making. **Clarifications:** e.g., performing ensembles, individual lessons, community and church music groups, family, playground, computer-generated music
MU.3.F.3.1:	Collaborate with others to create a musical presentation and acknowledge individual contributions as an integral part of the whole. **Clarifications:** e.g., work together, communicate effectively, share tasks and responsibilities, work well in cooperative learning groups
MU.3.H.1.2:	Identify significant information about specified composers and one or more of their musical works.
MU.3.H.3.1:	Experience and discuss, using correct music and other relevant content-area vocabulary, similarities in the use of pattern, line, and form in music and other teacher-selected contexts. **Clarifications:** e.g., in dance, visual art, language arts, pulse, rhythm, fluency
MU.3.O.1.1:	Identify, using correct music vocabulary, the elements in a musical work. **Clarifications:** e.g., rhythm, pitch, timbre, form
MU.3.O.1.2:	Identify and describe the musical form of a familiar song. **Clarifications:** e.g., AB, ABA, ABABA, call-and-response, verse/refrain, rondo, intro, coda
MU.3.O.3.1:	Describe how tempo and dynamics can change the mood or emotion of a piece of music.
MU.3.S.2.1:	Identify patterns in songs to aid the development of sequencing and memorization skills. **Clarifications:** e.g., parts of a round, parts of a layered work
MU.3.S.3.3:	Sing simple la-sol-mi-re-do patterns at sight. **Clarifications:** e.g., reading from hand signs; reading from nontraditional or traditional notation
MU.4.C.1.1:	Develop effective listening strategies and describe how they can support appreciation of musical works. **Clarifications:** e.g., listen for form, instrumentation, tempo, dynamics, melodic line, rhythm patterns; organize thoughts using listening maps, active listening, checklists
MU.4.C.1.2:	Describe, using correct music vocabulary, what is heard in a specific musical work. **Clarifications:** e.g., movement of melodic line, tempo, repeated and contrasting patterns
MU.4.C.1.3:	Classify orchestral and band instruments as strings, woodwinds, brass, percussion, or keyboard.
MU.4.C.2.1:	Identify and describe basic music performance techniques to provide a foundation for critiquing one's self and others. **Clarifications:** e.g., intonation, balance, blend, timbre, posture, breath support
MU.4.C.2.2:	Critique specific techniques in one's own and others performances using teacher-established criteria.
MU.4.C.3.1:	Describe characteristics that make various musical works appealing. **Clarifications:**

	e.g., tempo, rhythm, dynamics, blend, timbre, form, texture, instrumentation
MU.4.F.2.1:	Describe roles and careers of selected musicians. **Clarifications:** e.g., teacher, conductor, composer, studio musician, recording technician, sound engineer, entertainer
MU.4.F.3.1:	Identify the characteristics and behaviors displayed by successful student musicians, and discuss how these qualities will contribute to success beyond the music classroom. **Clarifications:** e.g., punctual, prepared, dependable, self-disciplined, solutions-oriented, shows initiative, uses time wisely
MU.4.F.3.2:	Discuss the safe, legal way to download songs and other media. **Clarifications:** e.g., sharing personal and financial information, copying and sharing music
MU.4.H.1.2:	Describe the influence of selected composers on the musical works and practices or traditions of their time.
MU.4.H.3.1:	Identify connections among music and other contexts, using correct music and other relevant content-area vocabulary, and explore how learning in one academic area can help with knowledge or skill acquisition in a different academic area. **Clarifications:** e.g., movement, form, repetition, rhythmic patterns/numeric patterns, fractions, vibrations/sound waves
MU.4.O.1.1:	Compare musical elements in different types of music, using correct music vocabulary, as a foundation for understanding the structural conventions of specific styles. **Clarifications:** e.g., rules of rhythm, melody, timbre, form, tonality, harmony, meter; styles: Classical, Baroque
MU.4.O.3.1:	Identify how expressive elements and lyrics affect the mood or emotion of a song. **Clarifications:** e.g., tempo, dynamics, phrasing, articulation
MU.4.O.3.2:	Apply expressive elements to a vocal or instrumental piece and, using correct music vocabulary, explain one's choices.
MU.4.S.1.3:	Arrange a familiar song for voices or instruments by manipulating form. **Clarifications:** e.g., introduction, interlude/bridge, coda, ABA, rondo
MU.4.S.2.1:	Apply knowledge of musical structure to aid in sequencing and memorization and to internalize details of rehearsal and performance.
MU.4.S.3.3:	Perform extended pentatonic melodies at sight. **Clarifications:** e.g., high do, low sol, low la; vocal and/or instrumental
MU.5.C.1.1:	Discuss and apply listening strategies to support appreciation of musical works. **Clarifications:** e.g., focus: structure, instrumentation, tempo, dynamics, melodic line, rhythm patterns, style/genre; organize: listening maps, active listening, checklists
MU.5.C.1.2:	Hypothesize and discuss, using correct music vocabulary, the composer's intent for a specific musical work. **Clarifications:** e.g., title, historical notes, quality recordings, instrumentation, expressive elements
MU.5.C.1.3:	Identify, aurally, selected instruments of the band and orchestra. **Clarifications:** e.g., violin, cello, string bass, flute, clarinet, oboe, bassoon, trumpet, trombone, tuba, French horn, bass drum, snare drum, xylophone, chimes, piano, harpsichord
MU.5.C.2.1:	Define criteria, using correct music vocabulary, to critique one's own and others performance. **Clarifications:** e.g., intonation, balance, blend, timbre
MU.5.C.2.2:	Describe changes, using correct music vocabulary, in one's own and/or others performance over time.
MU.5.C.3.1:	Develop criteria to evaluate an exemplary musical work from a specific period or genre.
MU.5.F.2.1:	Describe jobs associated with various types of concert venues and performing arts centers. **Clarifications:** e.g., music merchant, ticket agent, marketer, agent, security guard, food-and-beverage merchant
MU.5.F.2.2:	Explain why live performances are important to the career of the artist and the success of performance venues.
MU.5.F.3.1:	Examine and discuss the characteristics and behaviors displayed by successful student musicians that can be applied outside the music classroom. **Clarifications:** e.g., dedicated, works toward mastery, punctual, prepared, dependable, self-disciplined, solutions-oriented
MU.5.F.3.2:	Practice safe, legal, and responsible acquisition and use of music media, and describe why it is important to do so. **Clarifications:** e.g., downloading music and other digital media, sharing personal and financial information, copying music
MU.5.H.1.2:	Compare and describe the compositional characteristics used by two or more composers whose works are studied in class.
MU.5.H.3.1:	Examine critical-thinking processes in music and describe how they can be transferred to other disciplines. **Clarifications:** e.g., reading, writing, observing, listening, evaluating, embellishing, revising
MU.5.O.1.1:	Analyze, using correct music vocabulary, the use of musical elements in various styles of music as a foundation for understanding the creative process. **Clarifications:**

	e.g., rhythm patterns, melody, timbre, form, tonality, harmony, meter, key; styles: Classical, Baroque, Romantic, nationalistic, jazz
MU.5.O.3.1:	Examine and explain how expressive elements, when used in a selected musical work, affect personal response. **Clarifications:** e.g., tempo, dynamics, timbre, texture, phrasing, articulation
MU.5.O.3.2:	Perform expressive elements in a vocal or instrumental piece as indicated by the score and/or conductor.
MU.5.S.1.3:	Arrange a familiar song by manipulating specified aspects of music. **Clarifications:** e.g., dynamics, tempo, lyrics, form, rhythm, instrumentation
MU.5.S.1.4:	Sing or play simple melodic patterns by ear with support from the teacher.
MU.5.S.2.1:	Use expressive elements and knowledge of musical structure to aid in sequencing and memorization and to internalize details of rehearsals and performance.
MU.5.S.2.2:	Apply performance techniques to familiar music.
MU.5.S.3.3:	Perform simple diatonic melodies at sight. **Clarifications:** e.g., vocal and/or instrumental
LAFS.3.RI.2.4:	Determine the meaning of general academic and domain-specific words and phrases in a text relevant to a grade 3 topic or subject area.
LAFS.3.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 3 *topics and texts*, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation and other information known about the topic to explore ideas under discussion. b. Follow agreed-upon rules for discussions (e.g., gaining the floor in respectful ways, listening to others with care, speaking one at a time about the topics and texts under discussion). c. Ask questions to check understanding of information presented, stay on topic, and link their comments to the remarks of others. d. Explain their own ideas and understanding in light of the discussion. **Standard Relation to Course: Supporting**
LAFS.3.SL.1.2:	Determine the main ideas and supporting details of a text read aloud or information presented in diverse media and formats, including visually, quantitatively, and orally.
LAFS.3.SL.1.3:	Ask and answer questions about information from a speaker, offering appropriate elaboration and detail.
LAFS.4.RI.2.4:	Determine the meaning of general academic and domain-specific words or phrases in a text relevant to a *grade 4 topic or subject area*.
LAFS.4.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade *4 topics and texts*, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation and other information known about the topic to explore ideas under discussion. b. Follow agreed-upon rules for discussions and carry out assigned roles. c. Pose and respond to specific questions to clarify or follow up on information, and make comments that contribute to the discussion and link to the remarks of others. d. Review the key ideas expressed and explain their own ideas and understanding in light of the discussion. **Standard Relation to Course: Supporting**
LAFS.4.SL.1.2:	Paraphrase portions of a text read aloud or information presented in diverse media and formats, including visually, quantitatively, and orally.
LAFS.4.SL.1.3:	Identify the reasons and evidence a speaker provides to support particular points.
LAFS.5.RI.2.4:	Determine the meaning of general academic and domain-specific words and phrases in a text relevant to a *grade 5 topic or subject area*.
LAFS.5.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on *grade 5 topics and texts*, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation and other information known about the topic to explore ideas under discussion. b. Follow agreed-upon rules for discussions and carry out assigned roles. c. Pose and respond to specific questions by making comments that contribute to the discussion and elaborate on the remarks of others. d. Review the key ideas expressed and draw conclusions in light of information and knowledge gained from the discussions. **Standard Relation to Course: Supporting**
LAFS.5.SL.1.2:	Summarize a written text read aloud or information presented in diverse media and formats, including visually, quantitatively, and orally.
LAFS.5.SL.1.3:	Summarize the points a speaker makes and explain how each claim is supported by reasons and evidence.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully

	formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 – 3(x – y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students who have varying levels of experience on a band instrument to explore high-quality beginning band music. They develop foundational instrumental techniques, skills, and music literacy. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

GENERAL NOTES

The course descriptions for Elementary Music Electives have been designed to accommodate the mixing of grade levels, experience, and abilities within the same ensemble. Music teachers for elementary music electives should select the most appropriate set of grade-specific benchmarks based on each student's experience, music literacy, and available instruction time. Once an elementary student has entered a course at a specific level of benchmarks, he or she should progress to the next set of grade-specific benchmarks in the sequence for purposes of assessment. If a student reaches the Grade 5 level prior to 5th grade, he or she may continue to participate in the ensemble; the teacher is responsible for designating an appropriate means of increasing the rigor for the student in each subsequent year.

Examples:

- A 3rd grade student beginning in Elementary Band may receive instruction and be assessed according to the Grade 3 benchmarks.
- A 2nd grade student who has taken violin lessons for several years and who is musically literate may receive instruction in Elementary Orchestra and be assessed according to the Grade 5 benchmarks, repeating use of these benchmarks with increased rigor in each subsequent year.
- A 5th grader singing in Elementary Chorus for the first time may receive instruction and be assessed according to the Grade 3 benchmarks.
- A 4th grader in Handbell Ensemble (Special Ensemble) for the first time may receive instruction and be assessed according to the Grade 3 benchmarks. The same student, in Orff Ensemble (Special Ensemble) for the second year, may receive instruction and be assessed according to the Grade 4 benchmarks.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

GENERAL INFORMATION

Course Number: 5013020

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades PreK to 5 Education Courses > **Subject:** Music Education > **SubSubject:** General >

Abbreviated Title: ELEM BAND

Course Length: Year (Y)

Course Status: Draft - Course Pending Approval

Grade Level(s): K,1,2,3,4,5,PreK

Educator Certifications

Music Education (Elementary Grades 1-6)
Music (Elementary and Secondary Grades K-12)
Instrumental Music (Elementary and Secondary Grades K-12)

Elementary Orchestra (#5013030) 2015 - 2022 (current)

Course Standards

Name	Description
MU.3.C.1.1:	Describe listening skills and how they support appreciation of musical works. **Clarifications:** e.g., focus: form, instrumentation, tempo, dynamics; organize: listening maps, active listening, checklists
MU.3.C.1.2:	Respond to a musical work in a variety of ways and compare individual interpretations. **Clarifications:** e.g., move, draw, sing, play, gesture, conduct
MU.3.C.1.3:	Identify families of orchestral and band instruments. **Clarifications:** e.g., strings, woodwinds, brass, percussion, keyboards
MU.3.C.2.1:	Evaluate performances of familiar music using teacher-established criteria.
MU.3.C.3.1:	Identify musical characteristics and elements within a piece of music when discussing the value of the work. **Clarifications:** e.g., tempo, rhythm, timbre, form, instrumentation, texture
MU.3.F.2.1:	Identify musicians in the school, community, and media. **Clarifications:** e.g., band, chorus, and/or orchestra member; music teacher; cantor, choir director, or song leader in religious services
MU.3.F.2.2:	Describe opportunities for personal music-making. **Clarifications:** e.g., performing ensembles, individual lessons, community and church music groups, family, playground, computer-generated music
MU.3.F.3.1:	Collaborate with others to create a musical presentation and acknowledge individual contributions as an integral part of the whole. **Clarifications:** e.g., work together, communicate effectively, share tasks and responsibilities, work well in cooperative learning groups
MU.3.H.1.2:	Identify significant information about specified composers and one or more of their musical works.
MU.3.H.3.1:	Experience and discuss, using correct music and other relevant content-area vocabulary, similarities in the use of pattern, line, and form in music and other teacher-selected contexts. **Clarifications:** e.g., in dance, visual art, language arts, pulse, rhythm, fluency
MU.3.O.1.1:	Identify, using correct music vocabulary, the elements in a musical work. **Clarifications:** e.g., rhythm, pitch, timbre, form
MU.3.O.1.2:	Identify and describe the musical form of a familiar song. **Clarifications:** e.g., AB, ABA, ABABA, call-and-response, verse/refrain, rondo, intro, coda
MU.3.O.3.1:	Describe how tempo and dynamics can change the mood or emotion of a piece of music.
MU.3.S.2.1:	Identify patterns in songs to aid the development of sequencing and memorization skills. **Clarifications:** e.g., parts of a round, parts of a layered work
MU.3.S.3.3:	Sing simple la-sol-mi-re-do patterns at sight. **Clarifications:** e.g., reading from hand signs; reading from nontraditional or traditional notation
MU.4.C.1.1:	Develop effective listening strategies and describe how they can support appreciation of musical works. **Clarifications:** e.g., listen for form, instrumentation, tempo, dynamics, melodic line, rhythm patterns; organize thoughts using listening maps, active listening, checklists
MU.4.C.1.2:	Describe, using correct music vocabulary, what is heard in a specific musical work. **Clarifications:** e.g., movement of melodic line, tempo, repeated and contrasting patterns
MU.4.C.1.3:	Classify orchestral and band instruments as strings, woodwinds, brass, percussion, or keyboard.
MU.4.C.2.1:	Identify and describe basic music performance techniques to provide a foundation for critiquing one's self and others. **Clarifications:** e.g., intonation, balance, blend, timbre, posture, breath support
MU.4.C.2.2:	Critique specific techniques in one's own and others performances using teacher-established criteria.
MU.4.C.3.1:	Describe characteristics that make various musical works appealing. **Clarifications:**

	e.g., tempo, rhythm, dynamics, blend, timbre, form, texture, instrumentation
MU.4.F.2.1:	Describe roles and careers of selected musicians. **Clarifications:** e.g., teacher, conductor, composer, studio musician, recording technician, sound engineer, entertainer
MU.4.F.3.1:	Identify the characteristics and behaviors displayed by successful student musicians, and discuss how these qualities will contribute to success beyond the music classroom. **Clarifications:** e.g., punctual, prepared, dependable, self-disciplined, solutions-oriented, shows initiative, uses time wisely
MU.4.F.3.2:	Discuss the safe, legal way to download songs and other media. **Clarifications:** e.g., sharing personal and financial information, copying and sharing music
MU.4.H.1.2:	Describe the influence of selected composers on the musical works and practices or traditions of their time.
MU.4.H.3.1:	Identify connections among music and other contexts, using correct music and other relevant content-area vocabulary, and explore how learning in one academic area can help with knowledge or skill acquisition in a different academic area. **Clarifications:** e.g., movement, form, repetition, rhythmic patterns/numeric patterns, fractions, vibrations/sound waves
MU.4.O.1.1:	Compare musical elements in different types of music, using correct music vocabulary, as a foundation for understanding the structural conventions of specific styles. **Clarifications:** e.g., rules of rhythm, melody, timbre, form, tonality, harmony, meter; styles: Classical, Baroque
MU.4.O.3.1:	Identify how expressive elements and lyrics affect the mood or emotion of a song. **Clarifications:** e.g., tempo, dynamics, phrasing, articulation
MU.4.O.3.2:	Apply expressive elements to a vocal or instrumental piece and, using correct music vocabulary, explain one's choices.
MU.4.S.1.3:	Arrange a familiar song for voices or instruments by manipulating form. **Clarifications:** e.g., introduction, interlude/bridge, coda, ABA, rondo
MU.4.S.2.1:	Apply knowledge of musical structure to aid in sequencing and memorization and to internalize details of rehearsal and performance.
MU.4.S.3.3:	Perform extended pentatonic melodies at sight. **Clarifications:** e.g., high do, low sol, low la; vocal and/or instrumental
MU.5.C.1.1:	Discuss and apply listening strategies to support appreciation of musical works. **Clarifications:** e.g., focus: structure, instrumentation, tempo, dynamics, melodic line, rhythm patterns, style/genre; organize: listening maps, active listening, checklists
MU.5.C.1.2:	Hypothesize and discuss, using correct music vocabulary, the composer's intent for a specific musical work. **Clarifications:** e.g., title, historical notes, quality recordings, instrumentation, expressive elements
MU.5.C.1.3:	Identify, aurally, selected instruments of the band and orchestra. **Clarifications:** e.g., violin, cello, string bass, flute, clarinet, oboe, bassoon, trumpet, trombone, tuba, French horn, bass drum, snare drum, xylophone, chimes, piano, harpsichord
MU.5.C.2.1:	Define criteria, using correct music vocabulary, to critique one's own and others performance. **Clarifications:** e.g., intonation, balance, blend, timbre
MU.5.C.2.2:	Describe changes, using correct music vocabulary, in one's own and/or others performance over time.
MU.5.C.3.1:	Develop criteria to evaluate an exemplary musical work from a specific period or genre.
MU.5.F.2.1:	Describe jobs associated with various types of concert venues and performing arts centers. **Clarifications:** e.g., music merchant, ticket agent, marketer, agent, security guard, food-and-beverage merchant
MU.5.F.2.2:	Explain why live performances are important to the career of the artist and the success of performance venues.
MU.5.F.3.1:	Examine and discuss the characteristics and behaviors displayed by successful student musicians that can be applied outside the music classroom. **Clarifications:** e.g., dedicated, works toward mastery, punctual, prepared, dependable, self-disciplined, solutions-oriented
MU.5.F.3.2:	Practice safe, legal, and responsible acquisition and use of music media, and describe why it is important to do so. **Clarifications:** e.g., downloading music and other digital media, sharing personal and financial information, copying music
MU.5.H.1.2:	Compare and describe the compositional characteristics used by two or more composers whose works are studied in class.
MU.5.H.3.1:	Examine critical-thinking processes in music and describe how they can be transferred to other disciplines. **Clarifications:** e.g., reading, writing, observing, listening, evaluating, embellishing, revising
MU.5.O.1.1:	Analyze, using correct music vocabulary, the use of musical elements in various styles of music as a foundation for understanding the creative process. **Clarifications:**

	e.g., rhythm patterns, melody, timbre, form, tonality, harmony, meter, key; styles: Classical, Baroque, Romantic, nationalistic, jazz
MU.5.O.3.1:	Examine and explain how expressive elements, when used in a selected musical work, affect personal response. **Clarifications:** e.g., tempo, dynamics, timbre, texture, phrasing, articulation
MU.5.O.3.2:	Perform expressive elements in a vocal or instrumental piece as indicated by the score and/or conductor.
MU.5.S.1.3:	Arrange a familiar song by manipulating specified aspects of music. **Clarifications:** e.g., dynamics, tempo, lyrics, form, rhythm, instrumentation
MU.5.S.1.4:	Sing or play simple melodic patterns by ear with support from the teacher.
MU.5.S.2.1:	Use expressive elements and knowledge of musical structure to aid in sequencing and memorization and to internalize details of rehearsals and performance.
MU.5.S.2.2:	Apply performance techniques to familiar music.
MU.5.S.3.3:	Perform simple diatonic melodies at sight. **Clarifications:** e.g., vocal and/or instrumental
LAFS.3.RI.2.4:	Determine the meaning of general academic and domain-specific words and phrases in a text relevant to a grade 3 topic or subject area.
LAFS.3.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 3 *topics and texts*, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation and other information known about the topic to explore ideas under discussion. b. Follow agreed-upon rules for discussions (e.g., gaining the floor in respectful ways, listening to others with care, speaking one at a time about the topics and texts under discussion). c. Ask questions to check understanding of information presented, stay on topic, and link their comments to the remarks of others. d. Explain their own ideas and understanding in light of the discussion. **Standard Relation to Course: Supporting**
LAFS.3.SL.1.2:	Determine the main ideas and supporting details of a text read aloud or information presented in diverse media and formats, including visually, quantitatively, and orally.
LAFS.3.SL.1.3:	Ask and answer questions about information from a speaker, offering appropriate elaboration and detail.
LAFS.4.RI.2.4:	Determine the meaning of general academic and domain-specific words or phrases in a text relevant to a *grade 4 topic or subject area*.
LAFS.4.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade *4 topics and texts*, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation and other information known about the topic to explore ideas under discussion. b. Follow agreed-upon rules for discussions and carry out assigned roles. c. Pose and respond to specific questions to clarify or follow up on information, and make comments that contribute to the discussion and link to the remarks of others. d. Review the key ideas expressed and explain their own ideas and understanding in light of the discussion. **Standard Relation to Course: Supporting**
LAFS.4.SL.1.2:	Paraphrase portions of a text read aloud or information presented in diverse media and formats, including visually, quantitatively, and orally.
LAFS.4.SL.1.3:	Identify the reasons and evidence a speaker provides to support particular points.
LAFS.5.RI.2.4:	Determine the meaning of general academic and domain-specific words and phrases in a text relevant to a *grade 5 topic or subject area*.
LAFS.5.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on *grade 5 topics and texts*, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation and other information known about the topic to explore ideas under discussion. b. Follow agreed-upon rules for discussions and carry out assigned roles. c. Pose and respond to specific questions by making comments that contribute to the discussion and elaborate on the remarks of others. d. Review the key ideas expressed and draw conclusions in light of information and knowledge gained from the discussions. **Standard Relation to Course: Supporting**
LAFS.5.SL.1.2:	Summarize a written text read aloud or information presented in diverse media and formats, including visually, quantitatively, and orally.
LAFS.5.SL.1.3:	Summarize the points a speaker makes and explain how each claim is supported by reasons and evidence.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully

	formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 – 3(x – y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
SC.4.P.10.3:	Investigate and explain that sound is produced by vibrating objects and that pitch depends on how fast or slow the object vibrates.

General Course Information and Notes

VERSION DESCRIPTION

Students who have varying levels of experience on orchestral string instruments explore high-quality literature written and/or arranged for string orchestra. Rehearsals focus on the development of instrumental techniques and skills, critical listening and aural skills, music literacy, ensemble skills, and aesthetic musical awareness. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

GENERAL NOTES

The course descriptions for Elementary Music Electives have been designed to accommodate the mixing of grade levels, experience, and abilities within the same ensemble. Music teachers for elementary music electives should select the most appropriate set of grade-specific benchmarks based on each student's experience, music literacy, and available instruction time. Once an elementary student has entered a course at a specific level of benchmarks, he or she should progress to the next set of grade-specific benchmarks in the sequence for purposes of assessment. If a student reaches the Grade 5 level prior to 5th grade, he or she may continue to participate in the ensemble; the teacher is responsible for designating an appropriate means of increasing the rigor for the student in each subsequent year.

Examples:

- A 3rd grade student beginning in Elementary Band may receive instruction and be assessed according to the Grade 3 benchmarks.
- A 2nd grade student who has taken violin lessons for several years and who is musically literate may receive instruction in Elementary Orchestra and be assessed according to the Grade 5 benchmarks, repeating use of these benchmarks with increased rigor in each subsequent year.
- A 5th grader singing in Elementary Chorus for the first time may receive instruction and be assessed according to the Grade 3 benchmarks.
- A 4th grader in Handbell Ensemble (Special Ensemble) for the first time may receive instruction and be assessed according to the Grade 3 benchmarks. The same student, in Orff Ensemble (Special Ensemble) for the second year, may receive instruction and be assessed according to the Grade 4 benchmarks.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

Course Standards

Name	Description
MU.3.C.1.1:	Describe listening skills and how they support appreciation of musical works. **Clarifications:** e.g., focus: form, instrumentation, tempo, dynamics; organize: listening maps, active listening, checklists
MU.3.C.1.2:	Respond to a musical work in a variety of ways and compare individual interpretations. **Clarifications:** e.g., move, draw, sing, play, gesture, conduct
MU.3.C.2.1:	Evaluate performances of familiar music using teacher-established criteria.
MU.3.C.3.1:	Identify musical characteristics and elements within a piece of music when discussing the value of the work. **Clarifications:** e.g., tempo, rhythm, timbre, form, instrumentation, texture
MU.3.F.2.1:	Identify musicians in the school, community, and media. **Clarifications:** e.g., band, chorus, and/or orchestra member; music teacher; cantor, choir director, or song leader in religious services
MU.3.F.2.2:	Describe opportunities for personal music-making. **Clarifications:** e.g., performing ensembles, individual lessons, community and church music groups, family, playground, computer-generated music
MU.3.F.3.1:	Collaborate with others to create a musical presentation and acknowledge individual contributions as an integral part of the whole. **Clarifications:** e.g., work together, communicate effectively, share tasks and responsibilities, work well in cooperative learning groups
MU.3.H.1.2:	Identify significant information about specified composers and one or more of their musical works.
MU.3.H.3.1:	Experience and discuss, using correct music and other relevant content-area vocabulary, similarities in the use of pattern, line, and form in music and other teacher-selected contexts. **Clarifications:** e.g., in dance, visual art, language arts, pulse, rhythm, fluency
MU.3.O.1.1:	Identify, using correct music vocabulary, the elements in a musical work. **Clarifications:** e.g., rhythm, pitch, timbre, form
MU.3.O.1.2:	Identify and describe the musical form of a familiar song. **Clarifications:** e.g., AB, ABA, ABABA, call-and-response, verse/refrain, rondo, intro, coda
MU.3.O.3.1:	Describe how tempo and dynamics can change the mood or emotion of a piece of music.
MU.3.S.2.1:	Identify patterns in songs to aid the development of sequencing and memorization skills. **Clarifications:** e.g., parts of a round, parts of a layered work
MU.3.S.3.3:	Sing simple la-sol-mi-re-do patterns at sight. **Clarifications:** e.g., reading from hand signs; reading from nontraditional or traditional notation
MU.4.C.1.1:	Develop effective listening strategies and describe how they can support appreciation of musical works. **Clarifications:** e.g., listen for form, instrumentation, tempo, dynamics, melodic line, rhythm patterns; organize thoughts using listening maps, active listening, checklists
MU.4.C.1.2:	Describe, using correct music vocabulary, what is heard in a specific musical work. **Clarifications:** e.g., movement of melodic line, tempo, repeated and contrasting patterns
MU.4.C.2.1:	Identify and describe basic music performance techniques to provide a foundation for critiquing one's self and others. **Clarifications:** e.g., intonation, balance, blend, timbre, posture, breath support
MU.4.C.2.2:	Critique specific techniques in one's own and others performances using teacher-established criteria.
MU.4.C.3.1:	Describe characteristics that make various musical works appealing. **Clarifications:** e.g., tempo, rhythm, dynamics, blend, timbre, form, texture, instrumentation
MU.4.F.2.1:	Describe roles and careers of selected musicians. **Clarifications:** e.g., teacher, conductor, composer, studio musician, recording technician, sound engineer, entertainer

MU.4.F.3.1:	Identify the characteristics and behaviors displayed by successful student musicians, and discuss how these qualities will contribute to success beyond the music classroom. **Clarifications:** e.g., punctual, prepared, dependable, self-disciplined, solutions-oriented, shows initiative, uses time wisely
MU.4.H.1.2:	Describe the influence of selected composers on the musical works and practices or traditions of their time.
MU.4.H.3.1:	Identify connections among music and other contexts, using correct music and other relevant content-area vocabulary, and explore how learning in one academic area can help with knowledge or skill acquisition in a different academic area. **Clarifications:** e.g., movement, form, repetition, rhythmic patterns/numeric patterns, fractions, vibrations/sound waves
MU.4.O.1.1:	Compare musical elements in different types of music, using correct music vocabulary, as a foundation for understanding the structural conventions of specific styles. **Clarifications:** e.g., rules of rhythm, melody, timbre, form, tonality, harmony, meter; styles: Classical, Baroque
MU.4.O.3.1:	Identify how expressive elements and lyrics affect the mood or emotion of a song. **Clarifications:** e.g., tempo, dynamics, phrasing, articulation
MU.4.O.3.2:	Apply expressive elements to a vocal or instrumental piece and, using correct music vocabulary, explain one's choices.
MU.4.S.1.3:	Arrange a familiar song for voices or instruments by manipulating form. **Clarifications:** e.g., introduction, interlude/bridge, coda, ABA, rondo
MU.4.S.2.1:	Apply knowledge of musical structure to aid in sequencing and memorization and to internalize details of rehearsal and performance.
MU.4.S.3.3:	Perform extended pentatonic melodies at sight. **Clarifications:** e.g., high do, low sol, low la; vocal and/or instrumental
MU.5.C.1.1:	Discuss and apply listening strategies to support appreciation of musical works. **Clarifications:** e.g., focus: structure, instrumentation, tempo, dynamics, melodic line, rhythm patterns, style/genre; organize: listening maps, active listening, checklists
MU.5.C.1.2:	Hypothesize and discuss, using correct music vocabulary, the composer's intent for a specific musical work. **Clarifications:** e.g., title, historical notes, quality recordings, instrumentation, expressive elements
MU.5.C.2.1:	Define criteria, using correct music vocabulary, to critique one's own and others performance. **Clarifications:** e.g., intonation, balance, blend, timbre
MU.5.C.2.2:	Describe changes, using correct music vocabulary, in one's own and/or others performance over time.
MU.5.C.3.1:	Develop criteria to evaluate an exemplary musical work from a specific period or genre.
MU.5.F.2.1:	Describe jobs associated with various types of concert venues and performing arts centers. **Clarifications:** e.g., music merchant, ticket agent, marketer, agent, security guard, food-and-beverage merchant
MU.5.F.2.2:	Explain why live performances are important to the career of the artist and the success of performance venues.
MU.5.F.3.1:	Examine and discuss the characteristics and behaviors displayed by successful student musicians that can be applied outside the music classroom. **Clarifications:** e.g., dedicated, works toward mastery, punctual, prepared, dependable, self-disciplined, solutions-oriented
MU.5.H.1.2:	Compare and describe the compositional characteristics used by two or more composers whose works are studied in class.
MU.5.H.3.1:	Examine critical-thinking processes in music and describe how they can be transferred to other disciplines. **Clarifications:** e.g., reading, writing, observing, listening, evaluating, embellishing, revising
MU.5.O.1.1:	Analyze, using correct music vocabulary, the use of musical elements in various styles of music as a foundation for understanding the creative process. **Clarifications:** e.g., rhythm patterns, melody, timbre, form, tonality, harmony, meter, key; styles: Classical, Baroque, Romantic, nationalistic, jazz
MU.5.O.3.1:	Examine and explain how expressive elements, when used in a selected musical work, affect personal response. **Clarifications:** e.g., tempo, dynamics, timbre, texture, phrasing, articulation
MU.5.O.3.2:	Perform expressive elements in a vocal or instrumental piece as indicated by the score and/or conductor.
MU.5.S.1.3:	Arrange a familiar song by manipulating specified aspects of music. **Clarifications:** e.g., dynamics, tempo, lyrics, form, rhythm, instrumentation
MU.5.S.1.4:	Sing or play simple melodic patterns by ear with support from the teacher.
MU.5.S.2.1:	Use expressive elements and knowledge of musical structure to aid in sequencing and memorization and to internalize details of rehearsals and performance.
MU.5.S.2.2:	Apply performance techniques to familiar music.
MU.5.S.3.3:	Perform simple diatonic melodies at sight. **Clarifications:** e.g., vocal and/or instrumental

LAFS.3.RI.2.4:	Determine the meaning of general academic and domain-specific words and phrases in a text relevant to a grade 3 topic or subject area.
LAFS.3.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 3 *topics and texts*, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation and other information known about the topic to explore ideas under discussion. b. Follow agreed-upon rules for discussions (e.g., gaining the floor in respectful ways, listening to others with care, speaking one at a time about the topics and texts under discussion). c. Ask questions to check understanding of information presented, stay on topic, and link their comments to the remarks of others. d. Explain their own ideas and understanding in light of the discussion. **Standard Relation to Course: Supporting**
LAFS.3.SL.1.2:	Determine the main ideas and supporting details of a text read aloud or information presented in diverse media and formats, including visually, quantitatively, and orally.
LAFS.3.SL.1.3:	Ask and answer questions about information from a speaker, offering appropriate elaboration and detail.
LAFS.4.RI.2.4:	Determine the meaning of general academic and domain-specific words or phrases in a text relevant to a *grade 4 topic or subject area*.
LAFS.4.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade *4 topics and texts*, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation and other information known about the topic to explore ideas under discussion. b. Follow agreed-upon rules for discussions and carry out assigned roles. c. Pose and respond to specific questions to clarify or follow up on information, and make comments that contribute to the discussion and link to the remarks of others. d. Review the key ideas expressed and explain their own ideas and understanding in light of the discussion. **Standard Relation to Course: Supporting**
LAFS.4.SL.1.2:	Paraphrase portions of a text read aloud or information presented in diverse media and formats, including visually, quantitatively, and orally.
LAFS.4.SL.1.3:	Identify the reasons and evidence a speaker provides to support particular points.
LAFS.5.RI.2.4:	Determine the meaning of general academic and domain-specific words and phrases in a text relevant to a *grade 5 topic or subject area*.
LAFS.5.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on *grade 5 topics and texts*, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation and other information known about the topic to explore ideas under discussion. b. Follow agreed-upon rules for discussions and carry out assigned roles. c. Pose and respond to specific questions by making comments that contribute to the discussion and elaborate on the remarks of others. d. Review the key ideas expressed and draw conclusions in light of information and knowledge gained from the discussions. **Standard Relation to Course: Supporting**
LAFS.5.SL.1.2:	Summarize a written text read aloud or information presented in diverse media and formats, including visually, quantitatively, and orally.
LAFS.5.SL.1.3:	Summarize the points a speaker makes and explain how each claim is supported by reasons and evidence.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Students with varying levels of experience in an elementary ensemble other than chorus, band, or orchestra develop foundational techniques, skills, and music literacy. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course, if used for such small-instrument ensembles as recorder or guitar, may require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

GENERAL NOTES

The course descriptions for Elementary Music Electives have been designed to accommodate the mixing of grade levels, experience, and abilities within the same ensemble. Music teachers for elementary music electives should select the most appropriate set of grade-specific benchmarks based on each student's experience, music literacy, and available instruction time. Once an elementary student has entered a course at a specific level of benchmarks, he or she should progress to the next set of grade-specific benchmarks in the sequence for purposes of assessment. If a student reaches the Grade 5 level prior to 5th grade, he or she may continue to participate in the ensemble; the teacher is responsible for designating an appropriate means of increasing the rigor for the student in each subsequent year.

Examples:

- A 3rd grade student beginning in Elementary Band may receive instruction and be assessed according to the Grade 3 benchmarks.
- A 2nd grade student who has taken violin lessons for several years and who is musically literate may receive instruction in Elementary Orchestra and be assessed according to the Grade 5 benchmarks, repeating use of these benchmarks with increased rigor in each subsequent year.
- A 5th grader singing in Elementary Chorus for the first time may receive instruction and be assessed according to the Grade 3 benchmarks.
- A 4th grader in Handbell Ensemble (Special Ensemble) for the first time may receive instruction and be assessed according to the Grade 3 benchmarks. The same student, in Orff Ensemble (Special Ensemble) for the second year, may receive instruction and be assessed according to the Grade 4 benchmarks.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

GENERAL INFORMATION

Course Number: 5013035

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades PreK to 5 Education Courses > **Subject:** Music Education > **SubSubject:** General >
Abbreviated Title: ELEM SPEC ENS
Course Length: Year (Y)

Course Status: Draft - Course Pending Approval

Grade Level(s): K,1,2,3,4,5,PreK

Educator Certifications

Music Education (Elementary Grades 1-6)
Music (Elementary and Secondary Grades K-12)
Instrumental Music (Elementary and Secondary Grades K-12)

Music - Grade Kindergarten (#5013060) 2015 - 2022 (current)

Course Standards

Name	Description
MU.K.C.1.1:	Respond to music from various sound sources to show awareness of steady beat. **Clarifications:** e.g., steady beat, pulse
MU.K.C.1.2:	Identify various sounds in a piece of music. **Clarifications:** e.g., vocal/instrumental timbres, environmental sounds
MU.K.C.1.3:	Identify, visually and aurally, pitched and unpitched classroom instruments. **Clarifications:** e.g., rhythm sticks, woodblock, xylophone, metallophone, autoharp
MU.K.C.1.4:	Identify singing, speaking, and whispering voices.
MU.K.C.2.1:	Identify similarities and/or differences in a performance.
MU.K.C.3.1:	Share opinions about selected pieces of music.
MU.K.F.1.1:	Respond to and explore music through creative play and found sounds in the music classroom. **Clarifications:** e.g., creative play, drama/acting, kinesthetic response, vocalizations, sound carpets
MU.K.F.3.1:	Exhibit age-appropriate music and life skills that will add to the success in the music classroom. **Clarifications:** e.g., take turns, share, be a good listener, be respectful, display good manners
MU.K.H.1.1:	Respond to music from diverse cultures through singing and movement. **Clarifications:** e.g., nursery rhymes, singing games, folk dances
MU.K.H.2.1:	Respond to and/or perform folk music of American cultural sub-groups. **Clarifications:** e.g., African American, Anglo-American, Latin American, Native American
MU.K.H.3.1:	Perform simple songs, finger plays, and rhymes to experience connections among music, language, and numbers. **Clarifications:** e.g., decoding simple words, phonemes, rhyming words, vocabulary, making predictions, cardinal numbers, sequencing
MU.K.O.1.1:	Respond to beat, rhythm, and melodic line through imitation. **Clarifications:** e.g., locomotor and non-locomotor movement, body levels
MU.K.O.1.2:	Identify similarities and differences in melodic phrases and/or rhythm patterns. **Clarifications:** e.g., visually, aurally
MU.K.O.3.1:	Respond to music to demonstrate how it makes one feel. **Clarifications:** e.g., movement, drawings
MU.K.S.1.1:	Improvise a response to a musical question sung or played by someone else. **Clarifications:** e.g., melodic, rhythmic
MU.K.S.2.1:	Sing or play songs from memory. **Clarifications:** e.g., rhymes, chants, poems
MU.K.S.3.1:	Sing songs of limited range appropriate to the young child and use the head voice.
MU.K.S.3.2:	Perform simple songs and accompaniments. **Clarifications:** e.g., singing, using body percussion or classroom instruments
MU.K.S.3.3:	Match pitches in a song or musical phrase in one or more keys. **Clarifications:** e.g., la, sol, mi
MU.K.S.3.4:	Imitate simple rhythm patterns played by the teacher or a peer. **Clarifications:** e.g., quarter note, quarter rest, beamed eighth notes
LAFS.K.RL.1.2:	With prompting and support, retell familiar stories, including key details.

LAFS.K.RL.4.10:	Actively engage in group reading activities with purpose and understanding.
LAFS.K.SL.1.1:	Participate in collaborative conversations with diverse partners about *kindergarten topics* and texts with peers and adults in small and larger groups. a. Follow agreed-upon rules for discussions (e.g., listening to others and taking turns speaking about the topics and texts under discussion). b. Continue a conversation through multiple exchanges. **Standard Relation to Course: Supporting**
LAFS.K.SL.1.2:	Confirm understanding of a text read aloud or information presented orally or through other media by asking and answering questions about key details and requesting clarification if something is not understood.
LAFS.K.SL.1.3:	Ask and answer questions in order to seek help, get information, or clarify something that is not understood.
PE.K.C.2.1:	Recognize locomotor skills. **Clarifications:** Some examples of locomotor skills are walking, running, skipping, leaping, hopping, jumping and galloping.
PE.K.C.2.2:	Recognize physical activities have safety rules and procedures. **Clarifications:** An example would be to put equipment away when not in use in order to keep the physical activity area safe.
PE.K.R.6.2:	Identify a benefit of willingly trying new movements and motor skills.
PE.K.R.6.3:	Identify the benefits of continuing to participate when not successful on the first try.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
DA.K.O.3.1:	Use movement to express a feeling, idea, or story.
DA.K.S.3.3:	Develop kinesthetic awareness by maintaining personal space and moving in pathways through space.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
HE.K.B.5.3:	Recognize the consequences of not following rules/practices when making healthy and safe decisions. **Clarifications:** Injury to self and/or others.
SC.K.P.10.1:	Observe that things that make sound vibrate.
TH.K.S.1.3:	Describe personal preferences related to a performance.

General Course Information and Notes

VERSION DESCRIPTION

Kindergarten students in music class explore their environment and music world through a variety of experiences. Singing, listening, and movement activities will form the foundation for musical development, along with thinking, self-expression, and communication skills will be developed through singing, movement, creative musical play, creating, listening, and understanding activities. A variety of carefully chosen music will allow students to gain knowledge of one's self and build understanding, acceptance, and enrichment throughout their lives. By fostering creativity throughout the curriculum, the seeds of innovation will begin to bloom even in these novice learners.

GENERAL NOTES

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and

should be fully integrated in support of arts instruction.

Special Note: This class may include opportunities to participate in extra rehearsals and performances beyond the school day.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. Course Standards

Name	Description
MU.1.C.1.1:	Respond to specific, teacher-selected musical characteristics in a song or instrumental piece. **Clarifications:** e.g., beat, rhythm, phrasing, dynamics, tempo
MU.1.C.1.2:	Respond to music from various sound sources to show awareness of differences in musical ideas. **Clarifications:** e.g., moods, images
MU.1.C.1.3:	Classify instruments into pitched and unpitched percussion families. **Clarifications:** e.g., xylophone, glockenspiel, woodblock, tambourine
MU.1.C.1.4:	Differentiate between music performed by one singer and music performed by a group of singers.
MU.1.C.2.1:	Identify the similarities and differences between two performances of a familiar song. **Clarifications:** e.g., tempo, lyrics/no lyrics, style
MU.1.C.3.1:	Share different thoughts or feelings people have about selected pieces of music.
MU.1.F.1.1:	Create sounds or movement freely with props, instruments, and/or found sounds in response to various music styles and/or elements. **Clarifications:** e.g., staccato/legato, phrasing, melodic direction, steady beat, rhythm; props: use scarves, ribbon sticks, fabric shapes
MU.1.F.2.1:	Describe how he or she likes to participate in music. **Clarifications:** e.g., sing with a family member or friend, make up songs, tap rhythms, play a musical instrument
MU.1.F.3.1:	Demonstrate appropriate manners and teamwork necessary for success in a music classroom. **Clarifications:** e.g., take turns, share, be a good listener, be respectful, display good manners
MU.1.H.1.1:	Perform simple songs, dances, and musical games from a variety of cultures. **Clarifications:** e.g., nursery rhymes, singing games, play parties, folk dances
MU.1.H.1.2:	Explain the work of a composer.
MU.1.H.2.1:	Identify and perform folk music used to remember and honor America and its cultural heritage. **Clarifications:** e.g., "This Land is Your Land," "Short'nin' Bread," "America"
MU.1.H.3.1:	Explore the use of instruments and vocal sounds to replace or enhance specified words or phrases in children's songs, choral readings of poems and stories, and/or chants. **Clarifications:** e.g., rhyming words, vowel sounds, characters, setting, mood
MU.1.O.1.1:	Respond to contrasts in music as a foundation for understanding structure. **Clarifications:** e.g., high/low, fast/slow, long/short, phrases
MU.1.O.1.2:	Identify patterns of a simple, four-measure song or speech piece. **Clarifications:** e.g., AABA, ABCA, ABAC
MU.1.O.3.1:	Respond to changes in tempo and/or dynamics within musical examples.
MU.1.S.1.1:	Improvise a four-beat response to a musical question sung or played by someone else. **Clarifications:** e.g., melodic, rhythmic
MU.1.S.1.2:	Create short melodic and rhythmic patterns based on teacher-established guidelines.
MU.1.S.2.1:	Sing or play songs, which may include changes in verses or repeats, from memory.
MU.1.S.3.1:	Sing simple songs in a group, using head voice and maintaining pitch. **Clarifications:** e.g., folk songs, finger-plays, call-and-response, echo songs
MU.1.S.3.2:	Play three- to five-note melodies and/or accompaniments on classroom instruments.
MU.1.S.3.3:	Sing simple la-sol-mi patterns at sight. **Clarifications:** e.g., reading from hand signs or iconic representations
	Match simple aural rhythm patterns in duple meter with written patterns.

MU.1.S.3.4:	**Clarifications:** e.g., quarter note/rest, beamed eighth notes
MU.1.S.3.5:	Show visual representation of simple melodic patterns performed by the teacher or a peer. **Clarifications:** e.g., draw, body/hand signs, manipulatives, la-sol-mi
MAFS.1.OA.1.1:	Use addition and subtraction within 20 to solve word problems[1] involving situations of adding to, taking from, putting together, taking apart, and comparing, with unknowns in all positions, e.g., by using objects, drawings, and equations with a symbol for the unknown number to represent the problem ([1]Students are not required to independently read the word problems.) **Standard Relation to Course: Supporting**
MAFS.1.OA.1.2:	Solve word problems that call for addition of three whole numbers whose sum is less than or equal to 20, e.g., by using objects, drawings, and equations with a symbol for the unknown number to represent the problem. **Standard Relation to Course: Supporting**
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
LAFS.1.RL.2.4:	Identify words and phrases in stories or poems that suggest feelings or appeal to the senses.
LAFS.1.SL.1.1:	Participate in collaborative conversations with diverse partners about grade 1 topics and texts with peers and adults in small and larger groups. a. Follow agreed-upon rules for discussions (e.g., listening to others with care, speaking one at a time about the topics and texts under discussion). b. Build on others' talk in conversations by responding to the comments of others through multiple exchanges. c. Ask questions to clear up any confusion about the topics and texts under discussion. **Standard Relation to Course: Supporting**
LAFS.1.SL.1.2:	Ask and answer questions about key details in a text read aloud or information presented orally or through other media.
LAFS.1.SL.1.3:	Ask and answer questions about what a speaker says in order to gather additional information or clarify something that is not understood.
DA.1.O.3.1:	Create movement phrases to express a feeling, idea, or story.
DA.1.S.3.4:	Demonstrate acuity in transferring given rhythmic patterns from the aural to the kinesthetic. **Clarifications:** e.g., verbalized rhythm transferred to the feet
PE.1.C.2.1:	Identify the critical elements of locomotor skills. **Clarifications:** Some examples of critical elements of locomotor skills are step-hop for skipping and use of one foot for hopping.
PE.1.C.2.2:	Identify safety rules and procedures for teacher-selected physical activities. **Clarifications:** An example of a safety procedure is having students stand a safe distance away from a student swinging a bat during striking activities.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
HE.1.B.5.3:	Explain the consequences of not following rules/practices when making healthy and safe decisions. **Clarifications:** Tooth decay and environmental damage.
TH.1.S.1.3:	Explain personal preferences related to a performance.

General Course Information and Notes

VERSION DESCRIPTION

First-grade students in music class explore their world through listening, singing, moving, playing instruments, and creating to stimulate the imagination and lead to innovation and creative risk-taking. As they develop basic skills, techniques, and processes in music, they strengthen their music and extra-music vocabulary and music literacy, as well as their ability to remember, focus on, process, and sequence information. As students sing, play, move, and create together, they develop the foundation for important skills such as teamwork, acceptance, respect, and responsibility that will help students be successful in the 21st century.

GENERAL NOTES

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

Special Note: This class may include opportunities to participate in extra rehearsals and performances beyond the school day.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

GENERAL INFORMATION

Course Number: 5013070

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades PreK to 5 Education Courses > **Subject:** Music Education > **SubSubject:** General >
Abbreviated Title: MUSIC - GRADE 1
Course Length: Year (Y)

Course Status: Draft - Course Pending Approval

Grade Level(s): 1

Educator Certifications

Music Education (Elementary Grades 1-6)
Music (Elementary and Secondary Grades K-12)
Vocal Music (Elementary and Secondary Grades K-12)

Music - Grade 2 (#5013080) 2015 - 2022 (current)

Course Standards

Name	Description
MU.2.C.1.1:	Identify appropriate listening skills for learning about musical examples selected by the teacher. **Clarifications:** e.g., listen for form, voices/instruments; organize thoughts using listening maps, active listening, checklists
MU.2.C.1.2:	Respond to a piece of music and discuss individual interpretations. **Clarifications:** e.g., move, write, draw, describe, gesture
MU.2.C.1.3:	Classify unpitched instruments into metals, membranes, shakers, and wooden categories.
MU.2.C.1.4:	Identify child, adult male, and adult female voices by timbre.
MU.2.C.2.1:	Identify strengths and needs in classroom performances of familiar songs.
MU.2.C.3.1:	Discuss why musical characteristics are important when forming and discussing opinions about music. **Clarifications:** e.g., tempo, rhythm, dynamics, instrumentation
MU.2.F.1.1:	Create a musical performance that brings a story or poem to life. **Clarifications:** e.g., sound carpets, original stories and poems, literary works
MU.2.F.2.1:	Describe how people participate in music. **Clarifications:** e.g., singing with family or friends, school music classes, live concerts, parades, sound recordings, video games, movie soundtracks, television and radio commercials
MU.2.F.3.1:	Collaborate with others in a music presentation and discuss what was successful and what could be improved. **Clarifications:** e.g., take turns, share, be a good listener, be respectful, display good manners, work well in cooperative learning groups
MU.2.H.1.1:	Perform songs, musical games, dances, and simple instrumental accompaniments from a variety of cultures. **Clarifications:** e.g., multi-cultural and classroom pitched or non-pitched instruments; bordun, ostinato
MU.2.H.1.2:	Identify the primary differences between composed and folk music.
MU.2.H.2.1:	Discuss how music is used for celebrations in American and other cultures. **Clarifications:** e.g., birthdays, New Year, national and religious holidays
MU.2.H.3.1:	Perform and compare patterns, aurally and visually, found in songs, finger plays, or rhymes to gain a foundation for exploring patterns in other contexts.
MU.2.O.1.1:	Identify basic elements of music in a song or instrumental excerpt. **Clarifications:** e.g., melody, rhythm, pitch, form
MU.2.O.1.2:	Identify the form of a simple piece of music. **Clarifications:** e.g., AB, ABA, call-and-response
MU.2.O.3.1:	Describe changes in tempo and dynamics within a musical work.
MU.2.S.1.1:	Improvise short phrases in response to a given musical question.
MU.2.S.1.2:	Create simple ostinati to accompany songs or poems.
MU.2.S.2.1:	Sing or play songs, which may include changes in dynamics, lyrics, and form, from memory.
MU.2.S.3.1:	Sing songs in an appropriate range, using head voice and maintaining pitch.
MU.2.S.3.2:	Play simple melodies and/or accompaniments on classroom instruments.
MU.2.S.3.3:	Sing simple la-sol-mi-do patterns at sight. **Clarifications:** e.g., reading from hand signs and/or iconic or traditional representations
MU.2.S.3.4:	Compare aural melodic patterns with written patterns to determine whether they are the same or different. **Clarifications:** e.g., la-sol-mi-do; quarter note/rest, beamed eighth notes
MU.2.S.3.5:	Show visual, gestural, and traditional representation of simple melodic patterns performed by someone else. **Clarifications:** e.g., draw, body/hand signs, manipulatives, la-sol-mi
LAFS.2.RI.1.1:	Ask and answer such questions as *who, what, where, when, why*, and *how* to demonstrate understanding of key details in a text.
	Participate in collaborative conversations with diverse partners about grade 2 topics and texts with peers and adults in small and larger groups. a. Follow agreed-upon rules for discussions (e.g., gaining the floor in respectful ways, listening to others with care, speaking one at a time about the

LAFS.2.SL.1.1:	topics and texts under discussion). b. Build on others' talk in conversations by linking their comments to the remarks of others. c. Ask for clarification and further explanation as needed about the topics and texts under discussion. **Standard Relation to Course: Supporting**
LAFS.2.SL.1.2:	Recount or describe key ideas or details from a text read aloud or information presented orally or through other media.
LAFS.2.SL.1.3:	Ask and answer questions about what a speaker says in order to clarify comprehension, gather additional information, or deepen understanding of a topic or issue.
PE.2.C.2.2:	Identify safety rules and procedures for selected physical activities. **Clarifications:** An example of a safety procedure is having students stand a safe distance away from a student swinging a bat during striking activities.
PE.2.M.1.9:	Perform one folk or line dance accurately. **Clarifications:** An example of a line dance is the Electric Slide.
PE.2.R.6.2:	Discuss the relationship between skill competence and enjoyment.
PE.2.R.6.3:	Identify ways to contribute as a member of a cooperative group.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
DA.2.O.3.1:	Use movement to interpret feelings, stories, pictures, and songs.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
HE.2.B.5.3:	Compare the consequences of not following rules/practices when making healthy and safe decisions. **Clarifications:** Negative emotions, accidents, injuries, and pollution.
TH.2.C.1.1:	Describe a character in a story and tell why the character is important to the story.

General Course Information and Notes

VERSION DESCRIPTION

Second-grade students in music class continue exploration of their world as they strengthen their musical skills, techniques, and processes. Student's working vocabulary and musical literacy and understanding deepen with the ability to use unique musical language to communicate their own ideas. Connections with the arts and other disciplines allow students to transfer knowledge and skills to and from other fields of study. As students sing, play, move, and create together, they continue to build such important skills as teamwork, acceptance, respect, and responsibility that will help them be successful in the 21st century.

GENERAL NOTES

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

Special Note: This class may include opportunities to participate in extra rehearsals and performances beyond the school day.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

Course Status: Draft - Course Pending Approval

Grade Level(s): 2

Educator Certifications

Music Education (Elementary Grades 1-6)
Vocal Music (Elementary and Secondary Grades K-12)
Music (Elementary and Secondary Grades K-12)

Music - Intermediate 1 (#5013090) 2015 - 2022 (current)

Course Standards

Name	Description
MU.3.C.1.1:	Describe listening skills and how they support appreciation of musical works. **Clarifications:** e.g., focus: form, instrumentation, tempo, dynamics; organize: listening maps, active listening, checklists
MU.3.C.1.2:	Respond to a musical work in a variety of ways and compare individual interpretations. **Clarifications:** e.g., move, draw, sing, play, gesture, conduct
MU.3.C.1.3:	Identify families of orchestral and band instruments. **Clarifications:** e.g., strings, woodwinds, brass, percussion, keyboards
MU.3.C.1.4:	Discriminate between unison and two-part singing.
MU.3.C.2.1:	Evaluate performances of familiar music using teacher-established criteria.
MU.3.C.3.1:	Identify musical characteristics and elements within a piece of music when discussing the value of the work. **Clarifications:** e.g., tempo, rhythm, timbre, form, instrumentation, texture
MU.3.F.1.1:	Enhance the meaning of a story or poem by creating a musical interpretation using voices, instruments, movement, and/or found sounds. **Clarifications:** e.g., sound carpets, original stories and poems, literary works
MU.3.F.2.1:	Identify musicians in the school, community, and media. **Clarifications:** e.g., band, chorus, and/or orchestra member; music teacher; cantor, choir director, or song leader in religious services
MU.3.F.2.2:	Describe opportunities for personal music-making. **Clarifications:** e.g., performing ensembles, individual lessons, community and church music groups, family, playground, computer-generated music
MU.3.F.3.1:	Collaborate with others to create a musical presentation and acknowledge individual contributions as an integral part of the whole. **Clarifications:** e.g., work together, communicate effectively, share tasks and responsibilities, work well in cooperative learning groups
MU.3.H.1.1:	Compare indigenous instruments of specified cultures. **Clarifications:** e.g., congas, dundun drums, maracas, dulcimer, darabukah
MU.3.H.1.2:	Identify significant information about specified composers and one or more of their musical works.
MU.3.H.1.3:	Identify timbre(s) in music from a variety of cultures. **Clarifications:** e.g., metals, woods, shakers, strings, voice: adult, child
MU.3.H.2.1:	Discuss how music in America was influenced by people and events in its history. **Clarifications:** e.g., slavery, expansion of railroad, jazz, war, politics
MU.3.H.3.1:	Experience and discuss, using correct music and other relevant content-area vocabulary, similarities in the use of pattern, line, and form in music and other teacher-selected contexts. **Clarifications:** e.g., in dance, visual art, language arts, pulse, rhythm, fluency
MU.3.O.1.1:	Identify, using correct music vocabulary, the elements in a musical work. **Clarifications:** e.g., rhythm, pitch, timbre, form
MU.3.O.1.2:	Identify and describe the musical form of a familiar song. **Clarifications:** e.g., AB, ABA, ABABA, call-and-response, verse/refrain, rondo, intro, coda
MU.3.O.2.1:	Rearrange melodic or rhythmic patterns to generate new phrases.
MU.3.O.3.1:	Describe how tempo and dynamics can change the mood or emotion of a piece of music.
MU.3.S.1.1:	Improvise rhythms or melodies over ostinati.
MU.3.S.1.2:	Create an alternate ending to a familiar song. **Clarifications:** e.g., dynamics, tempo, lyrics
MU.3.S.2.1:	Identify patterns in songs to aid the development of sequencing and memorization skills. **Clarifications:**

	e.g., parts of a round, parts of a layered work
MU.3.S.3.1:	Sing rounds, canons, or ostinati in an appropriate range, using head voice and maintaining pitch.
MU.3.S.3.2:	Play melodies and layered ostinati, using proper instrumental technique, on pitched and unpitched instruments.
MU.3.S.3.3:	Sing simple la-sol-mi-re-do patterns at sight. **Clarifications:** e.g., reading from hand signs; reading from nontraditional or traditional notation
MU.3.S.3.4:	Match simple aural rhythm patterns in duple and triple meter with written patterns. **Clarifications:** e.g., 2/4, 3/4, 4/4
MU.3.S.3.5:	Notate simple rhythmic and melodic patterns using traditional notation. **Clarifications:** e.g., rhythmic: quarter notes, beamed eighth notes, half notes, quarter rests, half rests; melodic: la-sol-mi-do
LAFS.3.RI.1.1:	Ask and answer questions to demonstrate understanding of a text, referring explicitly to the text as the basis for the answers.
LAFS.3.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 3 *topics and texts*, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation and other information known about the topic to explore ideas under discussion. b. Follow agreed-upon rules for discussions (e.g., gaining the floor in respectful ways, listening to others with care, speaking one at a time about the topics and texts under discussion). c. Ask questions to check understanding of information presented, stay on topic, and link their comments to the remarks of others. d. Explain their own ideas and understanding in light of the discussion. **Standard Relation to Course: Supporting**
LAFS.3.SL.1.2:	Determine the main ideas and supporting details of a text read aloud or information presented in diverse media and formats, including visually, quantitatively, and orally.
LAFS.3.SL.1.3:	Ask and answer questions about information from a speaker, offering appropriate elaboration and detail.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
PE.3.C.2.2:	Understand the importance of safety rules and procedures in all physical activities. **Clarifications:** An example of a safety procedure is wearing a helmet when riding a bicycle.
PE.3.M.1.10:	Perform one dance accurately. **Clarifications:** Some examples of dances are square, contra, step and social.
DA.3.H.1.1:	Practice and perform social, cultural, or folk dances, using associated traditional music, to identify commonalities and differences.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
VA.3.H.1.3:	Identify and be respectful of ideas important to individuals, groups, or cultures that are reflected in their artworks.

General Course Information and Notes

VERSION DESCRIPTION

Third-grade* students in music class explore their world by engaging in active learning processes to refine the skills, techniques, and processes of musicianship through such activities as improvisation and arranging. As they continue to develop their working music and cross-content vocabulary and become able to identify fundamental characteristics of musical structures, they demonstrate artistic growth through cognition and reflection and endeavor to use their own artistic voices to communicate ideas and inventions. They recognize the importance of cultural experiences in music throughout history and in emerging art forms. Music students examine the positive impact of the arts in society and practice creative risk-taking in preparation for contributive citizenship in the 21st century.

GENERAL NOTES

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

* Intermediate Music 1, 2, and 3 have been designed in two ways: 1) to challenge students on grade level who have previously taken classes in this content area; and 2) to challenge students whose education in this content area has been delayed until the intermediate grades. Music teachers of classes in Grades 3, 4, and 5 should select the most appropriate course level in the series based on each group's prior experience, the benchmarks, and available instruction time. Once elementary students have entered the series, they must progress to the next course in sequence.

Examples:

- A 3rd grade class that may or may not have taken Music previously should be enrolled in Intermediate Music 1 and progress through the series in subsequent grades.
- 4th graders beginning formal instruction in Music for the first time may be enrolled, as a class, in Intermediate Music 1, and must then progress to Intermediate Music 2 in the following year.]

Special Note: This class may include opportunities to participate in extra rehearsals and performances beyond the school day.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

Course Standards

Name	Description
MU.4.C.1.1:	Develop effective listening strategies and describe how they can support appreciation of musical works. **Clarifications:** e.g., listen for form, instrumentation, tempo, dynamics, melodic line, rhythm patterns; organize thoughts using listening maps, active listening, checklists
MU.4.C.1.2:	Describe, using correct music vocabulary, what is heard in a specific musical work. **Clarifications:** e.g., movement of melodic line, tempo, repeated and contrasting patterns
MU.4.C.1.3:	Classify orchestral and band instruments as strings, woodwinds, brass, percussion, or keyboard.
MU.4.C.1.4:	Identify and describe the four primary voice parts, i.e., soprano, alto, tenor, bass.
MU.4.C.2.1:	Identify and describe basic music performance techniques to provide a foundation for critiquing one's self and others. **Clarifications:** e.g., intonation, balance, blend, timbre, posture, breath support
MU.4.C.2.2:	Critique specific techniques in one's own and others performances using teacher-established criteria.
MU.4.C.3.1:	Describe characteristics that make various musical works appealing. **Clarifications:** e.g., tempo, rhythm, dynamics, blend, timbre, form, texture, instrumentation
MU.4.F.1.1:	Create new interpretations of melodic or rhythmic pieces by varying or adding dynamics, timbre, tempo, lyrics, and/or movement. **Clarifications:** e.g., mallet use, vocal and instrumental changes, digital sounds, literature, poetry
MU.4.F.2.1:	Describe roles and careers of selected musicians. **Clarifications:** e.g., teacher, conductor, composer, studio musician, recording technician, sound engineer, entertainer
MU.4.F.3.1:	Identify the characteristics and behaviors displayed by successful student musicians, and discuss how these qualities will contribute to success beyond the music classroom. **Clarifications:** e.g., punctual, prepared, dependable, self-disciplined, solutions-oriented, shows initiative, uses time wisely
MU.4.F.3.2:	Discuss the safe, legal way to download songs and other media. **Clarifications:** e.g., sharing personal and financial information, copying and sharing music
MU.4.H.1.1:	Examine and describe a cultural tradition, other than one's own, learned through its musical style and/or use of authentic instruments.
MU.4.H.1.2:	Describe the influence of selected composers on the musical works and practices or traditions of their time.
MU.4.H.1.3:	Identify pieces of music that originated from cultures other than one's own.
MU.4.H.2.1:	Perform, listen to, and discuss music related to Florida's history. **Clarifications:** e.g., music of Stephen Foster; Spanish, African American, and Native American influences; folk music; early music used to heal, signal, impress, intimidate, immortalize
MU.4.H.2.2:	Identify ways in which individuals of varying ages and cultures experience music. **Clarifications:** e.g., live concert, musical theatre, Internet, recordings
MU.4.H.3.1:	Identify connections among music and other contexts, using correct music and other relevant content-area vocabulary, and explore how learning in one academic area can help with knowledge or skill acquisition in a different academic area. **Clarifications:** e.g., movement, form, repetition, rhythmic patterns/numeric patterns, fractions, vibrations/sound waves
MU.4.O.1.1:	Compare musical elements in different types of music, using correct music vocabulary, as a foundation for understanding the structural conventions of specific styles. **Clarifications:** e.g., rules of rhythm, melody, timbre, form, tonality, harmony, meter; styles: Classical, Baroque
MU.4.O.2.1:	Create variations for selected melodies.
MU.4.O.3.1:	Identify how expressive elements and lyrics affect the mood or emotion of a song. **Clarifications:** e.g., tempo, dynamics, phrasing, articulation
MU.4.O.3.2:	Apply expressive elements to a vocal or instrumental piece and, using correct music vocabulary, explain one's choices.
MU.4.S.1.1:	Improvise phrases, using familiar songs. **Clarifications:** e.g., altering text, rhythm, pitch, melody

MU.4.S.1.2:	Create melodic patterns using a variety of sound sources. **Clarifications:** e.g., voice, instrument
MU.4.S.1.3:	Arrange a familiar song for voices or instruments by manipulating form. **Clarifications:** e.g., introduction, interlude/bridge, coda, ABA, rondo
MU.4.S.2.1:	Apply knowledge of musical structure to aid in sequencing and memorization and to internalize details of rehearsal and performance.
MU.4.S.3.1:	Sing rounds, canons, and/or partner songs in an appropriate range, using proper vocal technique and maintaining pitch.
MU.4.S.3.2:	Play rounds, canons, or layered ostinati on classroom instruments.
MU.4.S.3.3:	Perform extended pentatonic melodies at sight. **Clarifications:** e.g., high do, low sol, low la; vocal and/or instrumental
MU.4.S.3.4:	Play simple ostinati, by ear, using classroom instruments.
MU.4.S.3.5:	Notate simple rhythmic phrases and extended pentatonic melodies using traditional notation. **Clarifications:** e.g., rhythmic: quarter notes, beamed eighth notes, half notes, whole notes; corresponding rests; dotted half note; melodic: la-sol-mi-re-do
LAFS.4.RL.1.3:	Describe in depth a character, setting, or event in a story or drama, drawing on specific details in the text (e.g., a character's thoughts, words, or actions).
LAFS.4.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade *4 topics and texts*, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation and other information known about the topic to explore ideas under discussion. b. Follow agreed-upon rules for discussions and carry out assigned roles. c. Pose and respond to specific questions to clarify or follow up on information, and make comments that contribute to the discussion and link to the remarks of others. d. Review the key ideas expressed and explain their own ideas and understanding in light of the discussion. **Standard Relation to Course: Supporting**
LAFS.4.SL.1.2:	Paraphrase portions of a text read aloud or information presented in diverse media and formats, including visually, quantitatively, and orally.
LAFS.4.SL.1.3:	Identify the reasons and evidence a speaker provides to support particular points.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
PE.4.C.2.2:	Understand the importance of safety rules and procedures in all physical activities, especially those that are high risk. **Clarifications:** An example of a safety procedure is having students stand a safe distance away from a student swinging a golf club during striking activities.
PE.4.M.1.10:	Perform two or more dances accurately. **Clarifications:** Some examples of dances are line, square, contra, folk, step and social.
DA.4.H.3.3:	Describe how dance and music can each be used to interpret and support the other.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
SC.4.P.10.3:	Investigate and explain that sound is produced by vibrating objects and that pitch depends on how fast or slow the object vibrates.

General Course Information and Notes

VERSION DESCRIPTION

Fourth-grade* students in music class explore artistic intent by investigating the inventive development of ideas, applying musicianship skills and techniques while engaging in the creation and interpretation of the arts. They analyze the characteristics of musical structures from simple to complex to build understanding and respect for the creative process. As they examine the significant cultural contributions in the arts throughout history, particularly in Florida, they become increasingly able to identify the connections among music and other fields of study. Music students also develop knowledge of careers in, and related to, the arts as they explore the impact of music on the local and global economies of the 21st century and strengthen personal skills for success throughout school and beyond.

GENERAL NOTES

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

* Intermediate Music 1, 2, and 3 have been designed in two ways: 1) to challenge students on grade level who have previously taken classes in this content area; and 2) to challenge students whose education in this content area has been delayed until the intermediate grades. Music teachers of classes in Grades 3, 4, and 5 should select the most appropriate course level in the series based on each group's prior experience, the benchmarks, and available instruction time. Once elementary students have entered the series, they must progress to the next course in sequence.

Examples:

- A 3rd grade class that may or may not have taken Music previously should be enrolled in Intermediate Music 1 and progress through the series in subsequent grades.
- 4th graders beginning formal instruction in Music for the first time may be enrolled, as a class, in Intermediate Music 1, and must then progress to Intermediate Music 2 in the following year.

Special Note: This class may include opportunities to participate in extra rehearsals and performances beyond the school day.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

Course Status: Draft - Course Pending Approval

Grade Level(s): K,1,2,3,4,5,PreK

Educator Certifications

Music Education (Elementary Grades 1-6)
Music (Elementary and Secondary Grades K-12)
Vocal Music (Elementary and Secondary Grades K-12)

Music - Intermediate 3 (#5013110) 2015 - 2022 (current)

Course Standards

Name	Description
MU.5.C.1.1:	Discuss and apply listening strategies to support appreciation of musical works. **Clarifications:** e.g., focus: structure, instrumentation, tempo, dynamics, melodic line, rhythm patterns, style/genre; organize: listening maps, active listening, checklists
MU.5.C.1.2:	Hypothesize and discuss, using correct music vocabulary, the composer's intent for a specific musical work. **Clarifications:** e.g., title, historical notes, quality recordings, instrumentation, expressive elements
MU.5.C.1.3:	Identify, aurally, selected instruments of the band and orchestra. **Clarifications:** e.g., violin, cello, string bass, flute, clarinet, oboe, bassoon, trumpet, trombone, tuba, French horn, bass drum, snare drum, xylophone, chimes, piano, harpsichord
MU.5.C.1.4:	Identify, aurally, the four primary voice parts, i.e., soprano, alto, tenor, bass, of a mixed choir.
MU.5.C.2.1:	Define criteria, using correct music vocabulary, to critique one's own and others performance. **Clarifications:** e.g., intonation, balance, blend, timbre
MU.5.C.2.2:	Describe changes, using correct music vocabulary, in one's own and/or others performance over time.
MU.5.C.3.1:	Develop criteria to evaluate an exemplary musical work from a specific period or genre.
MU.5.F.1.1:	Create a performance, using visual, kinesthetic, digital, and/or acoustic means to manipulate musical elements.
MU.5.F.2.1:	Describe jobs associated with various types of concert venues and performing arts centers. **Clarifications:** e.g., music merchant, ticket agent, marketer, agent, security guard, food-and-beverage merchant
MU.5.F.2.2:	Explain why live performances are important to the career of the artist and the success of performance venues.
MU.5.F.3.1:	Examine and discuss the characteristics and behaviors displayed by successful student musicians that can be applied outside the music classroom. **Clarifications:** e.g., dedicated, works toward mastery, punctual, prepared, dependable, self-disciplined, solutions-oriented
MU.5.F.3.2:	Practice safe, legal, and responsible acquisition and use of music media, and describe why it is important to do so. **Clarifications:** e.g., downloading music and other digital media, sharing personal and financial information, copying music
MU.5.H.1.1:	Identify the purposes for which music is used within various cultures. **Clarifications:** e.g., communication, celebration, ceremony
MU.5.H.1.2:	Compare and describe the compositional characteristics used by two or more composers whose works are studied in class.
MU.5.H.1.3:	Compare stylistic and musical features in works originating from different cultures. **Clarifications:** e.g., use of rhythm, texture, tonality, use of folk melodies, improvisation, instrumentation, aural/oral traditions, principle drumming patterns
MU.5.H.2.1:	Examine the contributions of musicians and composers for a specific historical period.
MU.5.H.2.2:	Describe how technology has changed the way audiences experience music.
MU.5.H.3.1:	Examine critical-thinking processes in music and describe how they can be transferred to other disciplines. **Clarifications:** e.g., reading, writing, observing, listening, evaluating, embellishing, revising
MU.5.O.1.1:	Analyze, using correct music vocabulary, the use of musical elements in various styles of music as a foundation for understanding the creative process. **Clarifications:** e.g., rhythm patterns, melody, timbre, form, tonality, harmony, meter, key; styles: Classical, Baroque, Romantic, nationalistic, jazz
MU.5.O.2.1:	Create a new melody from two or more melodic motifs.
MU.5.O.3.1:	Examine and explain how expressive elements, when used in a selected musical work, affect personal response. **Clarifications:** e.g., tempo, dynamics, timbre, texture, phrasing, articulation
MU.5.O.3.2:	Perform expressive elements in a vocal or instrumental piece as indicated by the score and/or conductor.
MU.5.S.1.1:	Improvise rhythmic and melodic phrases to create simple variations on familiar melodies.
MU.5.S.1.2:	Compose short vocal or instrumental pieces using a variety of sound sources.
MU.5.S.1.3:	Arrange a familiar song by manipulating specified aspects of music. **Clarifications:** e.g., dynamics, tempo, lyrics, form, rhythm, instrumentation
MU.5.S.1.4:	Sing or play simple melodic patterns by ear with support from the teacher.

MU.5.S.2.1:	Use expressive elements and knowledge of musical structure to aid in sequencing and memorization and to internalize details of rehearsals and performance.
MU.5.S.2.2:	Apply performance techniques to familiar music.
MU.5.S.3.1:	Sing part songs in an appropriate range, using proper vocal technique and maintaining pitch.
MU.5.S.3.2:	Play melodies and accompaniments, using proper instrumental technique, on pitched and unpitched instruments.
MU.5.S.3.3:	Perform simple diatonic melodies at sight. **Clarifications:** e.g., vocal and/or instrumental
MU.5.S.3.4:	Play melodies and accompaniments, by ear, using classroom instruments.
MU.5.S.3.5:	Notate rhythmic phrases and simple diatonic melodies using traditional notation. **Clarifications:** e.g., rhythmic: quarter notes, beamed eighth notes, half notes, whole notes; corresponding rests; dotted half note; sixteenth notes; syncopation
LAFS.5.L.2.3:	Use knowledge of language and its conventions when writing, speaking, reading, or listening. a. Expand, combine, and reduce sentences for meaning, reader/listener interest, and style. b. Compare and contrast the varieties of English (e.g., *dialects, registers*) used in stories, dramas, or poems. **Standard Relation to Course: Supporting**
LAFS.5.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on *grade 5 topics and texts*, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation and other information known about the topic to explore ideas under discussion. b. Follow agreed-upon rules for discussions and carry out assigned roles. c. Pose and respond to specific questions by making comments that contribute to the discussion and elaborate on the remarks of others. d. Review the key ideas expressed and draw conclusions in light of information and knowledge gained from the discussions. **Standard Relation to Course: Supporting**
LAFS.5.SL.1.2:	Summarize a written text read aloud or information presented in diverse media and formats, including visually, quantitatively, and orally.
LAFS.5.SL.1.3:	Summarize the points a speaker makes and explain how each claim is supported by reasons and evidence.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
TH.5.H.1.2:	Participate in a performance to explore and celebrate a variety of human experiences.

General Course Information and Notes

VERSION DESCRIPTION

Fifth-grade* students in music class develop and analyze the skills necessary for the critical assessment of artistic works and creative works in other contexts. They demonstrate the proficiency of comprehensive musicianship and interpretive skills in the arts, which allows them to explore manipulation of musical structures to represent a personal and creative form of artistic communication. As students become more musically sophisticated, they establish and document reciprocal relationships among music and other disciplines of study. They learn to transfer their music knowledge and innovative skills as a means of discovering the significant contributions of music and the arts, in general, to positive social development and global economic success in the 21st Century.

GENERAL NOTES

All instruction related to Music benchmarks should be framed by the Big Ideas and Enduring Understandings. Non-Music benchmarks listed in this course are also required and should be fully integrated in support of arts instruction.

* Intermediate Music 1, 2, and 3 have been designed in two ways: 1) to challenge students on grade level who have previously taken classes in this content area; and 2) to challenge students whose education in this content area has been delayed until the intermediate grades. Music teachers of classes in Grades 3, 4, and 5 should select the most appropriate course level in the series based on each group's prior experience, the benchmarks, and available instruction time. Once elementary students have entered the series, they must progress to the next course in sequence.

Examples:

- 3rd grade class that may or may not have taken Music previously should be enrolled in Intermediate Music 1 and progress through the series in subsequent grades.
- 4th graders beginning formal instruction in Music for the first time may be enrolled, as a class, in Intermediate Music 1, and must then progress to Intermediate Music 2 in the following year.

Special Note: This class may include opportunities to participate in extra rehearsals and performances beyond the school day.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. M/J Peer Counseling 1 (#1400000) 2015 - 2022 (current)

Course Standards

Name	Description
HE.6.B.4.1:	Determine strategies to improve effective verbal- and nonverbal-communication skills to enhance health. **Clarifications:** Role playing, short stories, and open-ended scenarios.
HE.6.B.4.2:	Practice refusal skills and negotiation skills to reduce health risks. **Clarifications:** Assertiveness, compromising, and use of "I" messages.
HE.6.B.5.1:	Investigate health-related situations that require the application of a thoughtful decision-making process. **Clarifications:** Peer pressure, exposure to unsupervised firearms, and tobacco use.
HE.6.B.5.2:	Choose healthy alternatives over unhealthy alternatives when making a decision. **Clarifications:** Not smoking, limiting sedentary activity, and practicing good character.
HE.6.C.2.8:	Determine how social norms may impact healthy and unhealthy behavior. **Clarifications:** Alcohol, tobacco and inhalant-use, bullying behaviors, and walking/biking vs. riding in a vehicle to a close location.
HE.6.P.8.4:	Identify ways health messages and communication techniques can be targeted for different audiences. **Clarifications:** Surveys, advertisements, music, and clothing.
HE.7.B.4.1:	Apply effective communication skills when interacting with others to enhance health. **Clarifications:** Clear and concise words, nonverbal language, discussion, "I" messages, and assertive vs. passive or aggressive communication.
HE.7.B.4.2:	Demonstrate refusal, negotiation, and collaboration skills to enhance health and reduce health risks. **Clarifications:** Working together, compromise, direct statement, peer mediation, personal boundaries, and reflective listening.
HE.7.B.4.3:	Articulate the possible causes of conflict among youth in schools and communities. **Clarifications:** Ethnic prejudice and diversity, substance use, group dynamics, relationship issues/dating violence, gossip/rumors, and sexual identity.
HE.7.B.4.4:	Demonstrate how to ask for assistance to enhance the health of self and others. **Clarifications:** "I" messages, ask on behalf of a friend, written request, riding in a vehicle with someone who is intoxicated, and bullying.
HE.7.B.5.2:	Select healthy alternatives over unhealthy alternatives when making a decision. **Clarifications:** Proper prescription-drug use, using safety equipment, Internet safety, and managing stress.
HE.8.B.5.2:	Categorize healthy and unhealthy alternatives to health-related issues or problems. **Clarifications:** (Alcohol consumption, sleep requirements, physical activity, and time management.)
LAFS.68.WHST.2.6:	Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas clearly and efficiently.
LAFS.7.RI.1.3:	Analyze the interactions between individuals, events, and ideas in a text (e.g., how ideas influence individuals or events, or how individuals influence ideas or events).
LAFS.7.RI.3.8:	Trace and evaluate the argument and specific claims in a text, assessing whether the reasoning is sound and the evidence is relevant and sufficient to support the claims.
LAFS.7.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 7 topics, texts, and issues, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions, track progress toward specific goals and deadlines, and define individual roles as needed. c. Pose questions that elicit elaboration and respond to others' questions and comments with relevant observations and ideas that bring the discussion back on topic as needed. d. Acknowledge new information expressed by others and, when warranted, modify their own views.
LAFS.7.SL.2.5:	Include multimedia components and visual displays in presentations to clarify claims and findings and emphasize salient points.
LAFS.7.W.3.8:	Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

GENERAL NOTES

The purpose of this course is to enable students to develop awareness of self and others. Emphasis will be on acquisition of basic skills for thoughtful planning, peer facilitation, effective communication and making healthy choices.

The content should include, but not be limited to, the following:

- Peer Facilitating
- Human Needs
- Self Awareness and Expression
- Peer Pressure
- Peer and Family Relationships
- Conflict Resolution
- Goal Setting
- Social Skills
- Active Listening
- Personal Choices
- Healthy Lifestyles
- Effects of Stress

Special Notes:

Instructional Practices
Teaching from a well-written, grade-level textbook enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high- level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

QUALIFICATIONS

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

Any field when certification reflects a bachelor or higher degree.

M/J Peer Counseling 2 (#1400010) 2015 - 2022 (current)

Course Standards

Name	Description
HE.6.B.3.1:	Examine the validity of health information, and determine the cost of health products, and services. **Clarifications:** Advertisements, Internet, infomercials, articles, flyers, diet supplements, generic vs. name brand, individual fitness plan vs. gym membership, and private lessons vs. recreational play.
HE.6.B.4.1:	Determine strategies to improve effective verbal- and nonverbal-communication skills to enhance health. **Clarifications:** Role playing, short stories, and open-ended scenarios.
HE.6.B.4.2:	Practice refusal skills and negotiation skills to reduce health risks. **Clarifications:** Assertiveness, compromising, and use of "I" messages.
HE.6.B.4.3:	Demonstrate effective conflict-management and/or resolution strategies. **Clarifications:** Talk to an adult, anger management, and conflict mediation.
HE.6.B.5.1:	Investigate health-related situations that require the application of a thoughtful decision-making process. **Clarifications:** Peer pressure, exposure to unsupervised firearms, and tobacco use.
HE.6.B.5.2:	Choose healthy alternatives over unhealthy alternatives when making a decision. **Clarifications:** Not smoking, limiting sedentary activity, and practicing good character.
HE.6.B.5.3:	Specify the potential outcomes of each option when making a health-related decision. **Clarifications:** Physical, social, emotional, financial, and legal consequences, and emergency preparedness.
HE.6.B.6.2:	Develop an individual goal to adopt, maintain, or improve a personal health practice. **Clarifications:** Physical activity, eating habits, safety habits, computer use/safety, bullying-prevention skills, and personal hygiene.
HE.6.C.1.2:	Describe how the physical, mental/emotional, social, and intellectual dimensions of health are interrelated. **Clarifications:** Nutrition/mental alertness, interpersonal conflicts/emotional stress, sleep/physical stamina, and hunger/solving problems.
HE.6.C.2.2:	Examine how peers influence the health of adolescents. **Clarifications:** Conflict resolution skills, reproductive-health misinformation, and spreading rumors.
HE.6.C.2.3:	Identify the impact of health information conveyed to students by the school and community. **Clarifications:** First-aid education program, refusal-skills practice, and healthy body composition: BMI.
HE.6.C.2.6:	Propose ways that technology can influence peer and community health behaviors. **Clarifications:** Internet social media/networking sites, heart-rate monitors, and cross-walk signals.
HE.6.C.2.9:	Identify the influence of personal values, attitudes, and beliefs about individual health practices and behaviors. **Clarifications:** Curiosity, interests, fears, likes, and dislikes.
HE.6.P.7.1:	Explain the importance of assuming responsibility for personal-health behaviors. **Clarifications:** Medical/dental checkups, resisting peer pressure, and healthy relationships.
HE.6.P.8.1:	Practice how to influence and support others when making positive health choices. **Clarifications:** Encourage others to read food labels, promote physical activity, encourage practice of universal precautions, and leading by example.
HE.6.P.8.3:	Work cooperatively to advocate for healthy individuals, families, and schools. **Clarifications:** Media campaigns, posters, skits, and PSAs.
HE.7.B.3.1:	Analyze the validity of health information, products, and services. **Clarifications:** Advertisements, health-claim articles, personal-care product claims, and tobacco-use information, internet searches, store visits, newspaper use, phonebook search, and personal call to sources for information.

HE.7.B.4.1:	Apply effective communication skills when interacting with others to enhance health. **Clarifications:** Clear and concise words, nonverbal language, discussion, "I" messages, and assertive vs. passive or aggressive communication.
HE.7.B.4.2:	Demonstrate refusal, negotiation, and collaboration skills to enhance health and reduce health risks. **Clarifications:** Working together, compromise, direct statement, peer mediation, personal boundaries, and reflective listening.
HE.7.B.4.4:	Demonstrate how to ask for assistance to enhance the health of self and others. **Clarifications:** "I" messages, ask on behalf of a friend, written request, riding in a vehicle with someone who is intoxicated, and bullying.
HE.7.B.5.2:	Select healthy alternatives over unhealthy alternatives when making a decision. **Clarifications:** Proper prescription-drug use, using safety equipment, Internet safety, and managing stress.
HE.7.C.2.9:	Explain the influence of personal values, attitudes, and beliefs about individual health practices and behaviors. **Clarifications:** Social conformity, social status/appearance, experimentation with drugs, food relationships, and spirituality.
HE.7.P.7.1:	Examine the importance of assuming responsibility for personal-health behaviors. **Clarifications:** Physical activity, eating habits, stress management, quality of life, sexual behaviors, and adequate sleep.
HE.7.P.8.3:	Work cooperatively to advocate for healthy individuals, peers, and families. **Clarifications:** Assist with or conduct needs assessments, write advocacy letters, and volunteer at information kiosks.
HE.8.B.3.2:	Analyze the accessibility, validity, and reliability of products and services that enhance home, school, and community health. **Clarifications:** Reliability of advertisements, articles, infomercials, and web-based products; health department; community agencies; and prescribed medications vs. over-the-counter.
HE.8.B.5.2:	Categorize healthy and unhealthy alternatives to health-related issues or problems. **Clarifications:** (Alcohol consumption, sleep requirements, physical activity, and time management.)
HE.8.C.2.3:	Analyze how the school and community may influence adolescent health. **Clarifications:** Drug-abuse education programs, volunteering opportunities, and availability of recreational facilities/programs.
HE.8.C.2.8:	Explain how the perceptions of norms influence healthy and unhealthy behaviors. **Clarifications:** Sexual abstinence, prescription-drug use, marijuana use, and perception that certain abusive-relationship behaviors are "normal."
HE.8.P.8.3:	Work cooperatively to advocate for healthy individuals, peers, families, and schools. **Clarifications:** Promote community initiatives; create media campaigns, peer-led prevention campaigns, and school wellness councils.
LAFS.68.WHST.2.6:	Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas clearly and efficiently.
LAFS.68.WHST.3.8:	Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
LAFS.7.RI.1.3:	Analyze the interactions between individuals, events, and ideas in a text (e.g., how ideas influence individuals or events, or how individuals influence ideas or events).
LAFS.7.RI.3.8:	Trace and evaluate the argument and specific claims in a text, assessing whether the reasoning is sound and the evidence is relevant and sufficient to support the claims.
LAFS.7.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 7 topics, texts, and issues, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions, track progress toward specific goals and deadlines, and define individual roles as needed. c. Pose questions that elicit elaboration and respond to others' questions and comments with relevant observations and ideas that bring the discussion back on topic as needed. d. Acknowledge new information expressed by others and, when warranted, modify their own views.
LAFS.7.SL.2.5:	Include multimedia components and visual displays in presentations to clarify claims and findings and emphasize salient points.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

GENERAL NOTES

The purpose of this course is to enable students to further develop awareness of self and others. Emphasis will be on acquisition of intermediate level skills for thoughtful planning, peer facilitation, effective communication and making healthy choices.

The content should include, but not be limited to, the following:

- Peer Facilitating
- Behavioral Dynamics
- Human Needs
- Group Dynamics
- Leadership Skills
- Intra/Interpersonal Skills
- Peer and Family Relationships
- Conflict Resolution
- School/Community Resources
- Mediation
- Effective Communication
- Problem Solving

Special Notes:

Instructional Practices
Teaching from a well-written, grade-level textbook enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

QUALIFICATIONS

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

Any field when certification reflects a bachelor or higher degree.

M/J Peers as Partners in Learning (#1400025) 2019 - 2022 (current)

Course Standards

Name	Description
LAFS.6.RI.1.3:	Analyze in detail how a key individual, event, or idea is introduced, illustrated, and elaborated in a text (e.g., through examples or anecdotes).
LAFS.6.RI.2.4:	Determine the meaning of words and phrases as they are used in a text, including figurative, connotative, and technical meanings.
LAFS.6.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and issues, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions, set specific goals and deadlines, and define individual roles as needed. c. Pose and respond to specific questions with elaboration and detail by making comments that contribute to the topic, text, or issue under discussion. d. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing.
LAFS.6.SL.1.2:	Interpret information presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how it contributes to a topic, text, or issue under study.
LAFS.6.SL.2.5:	Include multimedia components (e.g., graphics, images, music, sound) and visual displays in presentations to clarify information.
LAFS.6.W.1.2:	Write informative/explanatory texts to examine a topic and convey ideas, concepts, and information through the selection, organization, and analysis of relevant content. a. Introduce a topic; organize ideas, concepts, and information, using strategies such as definition, classification, comparison/contrast, and cause/effect; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension. b. Develop the topic with relevant facts, definitions, concrete details, quotations, or other information and examples. c. Use appropriate transitions to clarify the relationships among ideas and concepts. d. Use precise language and domain-specific vocabulary to inform about or explain the topic. e. Establish and maintain a formal style. f. Provide a concluding statement or section that follows from the information or explanation presented.
LAFS.6.W.2.6:	Use technology, including the Internet, to produce and publish writing as well as to interact and collaborate with others; demonstrate sufficient command of keyboarding skills to type a minimum of three pages in a single sitting.
LAFS.6.W.3.7:	Conduct short research projects to answer a question, drawing on several sources and refocusing the inquiry when appropriate.
LAFS.7.RI.1.3:	Analyze the interactions between individuals, events, and ideas in a text (e.g., how ideas influence individuals or events, or how individuals influence ideas or events).
LAFS.7.RI.2.4:	Determine the meaning of words and phrases as they are used in a text, including figurative, connotative, and technical meanings; analyze the impact of a specific word choice on meaning and tone.
LAFS.7.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 7 topics, texts, and issues, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions, track progress toward specific goals and deadlines, and define individual roles as needed. c. Pose questions that elicit elaboration and respond to others' questions and comments with relevant observations and ideas that bring the discussion back on topic as needed. d. Acknowledge new information expressed by others and, when warranted, modify their own views.
LAFS.7.SL.1.2:	Analyze the main ideas and supporting details presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how the ideas clarify a topic, text, or issue under study.
LAFS.7.SL.2.5:	Include multimedia components and visual displays in presentations to clarify claims and findings and emphasize salient points.
LAFS.7.W.1.2:	Write informative/explanatory texts to examine a topic and convey ideas, concepts, and information through the selection, organization, and analysis of relevant content. a. Introduce a topic clearly, previewing what is to follow; organize ideas, concepts, and information, using strategies such as definition, classification, comparison/contrast, and cause/effect; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension. b. Develop the topic with relevant facts, definitions, concrete details, quotations, or other information and examples. c. Use appropriate transitions to create cohesion and clarify the relationships among ideas and concepts. d. Use precise language and domain-specific vocabulary to inform about or explain the topic. e. Establish and maintain a formal style. f. Provide a concluding statement or section that follows from and supports the information or explanation presented.
LAFS.7.W.2.6:	Use technology, including the Internet, to produce and publish writing and link to and cite sources as well as to interact and collaborate with others, including linking to and citing sources.
LAFS.7.W.3.7:	Conduct short research projects to answer a question, drawing on several sources and generating additional related, focused questions for further research and investigation.
LAFS.8.RI.1.3:	Analyze how a text makes connections among and distinctions between individuals, ideas, or events (e.g., through comparisons, analogies, or categories).
LAFS.8.RI.2.4:	Determine the meaning of words and phrases as they are used in a text, including figurative, connotative, and technical meanings; analyze the impact of specific word choices on meaning and tone, including analogies or allusions to other texts.
	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 8 topics, texts, and

LAFS.8.SL.1.1:	issues, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions and decision-making, track progress toward specific goals and deadlines, and define individual roles as needed. c. Pose questions that connect the ideas of several speakers and respond to others' questions and comments with relevant evidence, observations, and ideas. d. Acknowledge new information expressed by others, and, when warranted, qualify or justify their own views in light of the evidence presented.
LAFS.8.SL.1.2:	Analyze the purpose of information presented in diverse media and formats (e.g., visually, quantitatively, orally) and evaluate the motives (e.g., social, commercial, political) behind its presentation.
LAFS.8.SL.2.5:	Integrate multimedia and visual displays into presentations to clarify information, strengthen claims and evidence, and add interest.
LAFS.8.W.1.2:	Write informative/explanatory texts to examine a topic and convey ideas, concepts, and information through the selection, organization, and analysis of relevant content. a. Introduce a topic clearly, previewing what is to follow; organize ideas, concepts, and information into broader categories; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension. b. Develop the topic with relevant, well-chosen facts, definitions, concrete details, quotations, or other information and examples. c. Use appropriate and varied transitions to create cohesion and clarify the relationships among ideas and concepts. d. Use precise language and domain-specific vocabulary to inform about or explain the topic. e. Establish and maintain a formal style. f. Provide a concluding statement or section that follows from and supports the information or explanation presented.
LAFS.8.W.2.6:	Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas efficiently as well as to interact and collaborate with others.
LAFS.8.W.3.7:	Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.
HE.6.B.4.3:	Demonstrate effective conflict-management and/or resolution strategies. **Clarifications:** Talk to an adult, anger management, and conflict mediation.
HE.6.B.4.4:	Compile ways to ask for assistance to enhance the health of self and others. **Clarifications:** Verbalize, write, and ask others for help.
HE.6.C.2.8:	Determine how social norms may impact healthy and unhealthy behavior. **Clarifications:** Alcohol, tobacco and inhalant-use, bullying behaviors, and walking/biking vs. riding in a vehicle to a close location.
HE.7.B.4.3:	Articulate the possible causes of conflict among youth in schools and communities. **Clarifications:** Ethnic prejudice and diversity, substance use, group dynamics, relationship issues/dating violence, gossip/rumors, and sexual identity.
HE.7.B.4.4:	Demonstrate how to ask for assistance to enhance the health of self and others. **Clarifications:** "I" messages, ask on behalf of a friend, written request, riding in a vehicle with someone who is intoxicated, and bullying.
HE.7.C.2.8:	Evaluate how changes in social norms impact healthy and unhealthy behavior. **Clarifications:** Secondhand smoke, menu items at restaurants, anti-bullying behavior, and social norms that justify/promote violence.
HE.8.B.4.3:	Examine the possible causes of conflict among youth in schools and communities. **Clarifications:** Relationships, territory, jealousy, and gossip/rumors.
HE.8.B.4.4:	Compare and contrast ways to ask for and offer assistance to enhance the health of self and others. **Clarifications:** Compare responses, passive vs. assertive, written vs. spoken, and anonymous vs. face-to-face.
HE.8.C.2.8:	Explain how the perceptions of norms influence healthy and unhealthy behaviors. **Clarifications:** Sexual abstinence, prescription-drug use, marijuana use, and perception that certain abusive-relationship behaviors are "normal."
SS.7.C.2.11:	Analyze media and political communications (bias, symbolism, propaganda). **Clarifications:** This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 44-45. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.7.C.2.12:	Develop a plan to resolve a state or local problem by researching public policy alternatives, identifying appropriate government agencies to address the issue, and determining a course of action. **Clarifications:** This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 46-47. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.7.C.2.14:	Conduct a service project to further the public good. **Clarifications:** The project can be at the school, community, state, national, or international level.

SS.7.C.3.6:	Evaluate Constitutional rights and their impact on individuals and society. **Clarifications:** This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 57. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
MAFS.K12.MP.1.1:	**Make sense of problems and persevere in solving them.** Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.

General Course Information and Notes

VERSION DESCRIPTION

This course is designed to provide reciprocal academic and social benefits to students with disabilities and their peers without disabilities. Students enrolled in the course will learn and apply knowledge and skilled practices in the areas of academic engagement, communication, social barriers, leadership, problem solving, and other disability-related topics such as historical perspectives, inclusion, Universal Design for Learning, person-first language, presumed competence, equitable services for students with disabilities, and media representation of diverse people.

The content and concepts should include, but not be limited to, the following:

- Know and understand the legal and human rights of people with disabilities and their families.
- Understand and apply the concepts of confidentiality and self-determination.
- Understand historical events and aspects of disability and their influence on current attitudes, beliefs, and practices.
- Build awareness and understanding, through research and communication, of disability rights issues in the local community and beyond.
- Apply methods for problem-solving and advocacy (including self-advocacy for students with disabilities).
- Apply knowledge and strategies to promote learning for people with disabilities, in inclusive settings, through academic, communication, physical and social supports.
- Facilitate meaningful peer relationships in and out of school.
- Understand and facilitate team and cooperative learning skills among all students.
- Contribute to the concept of civic responsibility by researching and communicating information about equitable services in a democratic society.
- Design and implement one or more projects to demonstrate knowledge, understanding, and application of course content and concepts.
- Assess and evaluate the impact of course efforts on self and others.

This course should be taught using the appropriate standards/benchmarks for the grade.

Course Standards

Name	Description
HE.912.B.3.1:	Verify the validity of health information, products, and services. **Clarifications:** Understanding product-packaging claims, magazine articles, diet/nutritional supplements, energy drinks, exercise video or equipment, tanning salon, fitness club, health professionals, health-related community resources, CPR procedure, qualifications of service provider, type of service, type of product, product safety, and reliability.
HE.912.B.4.1:	Explain skills needed to communicate effectively with family, peers, and others to enhance health. **Clarifications:** Using "I" messages, voice pitch/volume, eye contact, journal experiences, writing letters, persuasive speech, and assertive communication.
HE.912.B.4.2:	Assess refusal, negotiation, and collaboration skills to enhance health and avoid or reduce health risks. **Clarifications:** Validate other's opinions, use direct statement, use active statement, and offer alternatives.
HE.912.B.4.3:	Demonstrate strategies to prevent, manage, or resolve interpersonal conflicts without harming self or others. **Clarifications:** Effective verbal and nonverbal communication, compromise, and conflict-resolution.
HE.912.B.4.4:	Analyze the validity of ways to ask for and offer assistance to enhance the health of self and others. **Clarifications:** Verbal and written communication, active listening, and how to seek help for a friend.
HE.912.B.5.3:	Appraise the potential short-term and long-term outcomes of each alternative on self and others. **Clarifications:** Nutrition plan based on personal needs and preferences, impact of chronic health condition on individual and family, weapons on campus, and use of stress management and coping skills.
HE.912.B.5.5:	Examine barriers that can hinder healthy decision making. **Clarifications:** Interpersonal, financial, environmental factors, and accessibility of health information.
HE.912.C.1.1:	Predict how healthy behaviors can affect health status. **Clarifications:** Making positive choices/avoiding risky behaviors: healthy food, substance abuse, and healthy relationship skills; regular medical and dental screenings; regular physical activity, and workplace safety.
HE.912.C.1.2:	Interpret the significance of interrelationships in mental/emotional, physical, and social health. **Clarifications:** Substance abuse, eating disorders, sexual behaviors, healthy/unhealthy relationships, self-esteem, stress/anger management, and regular exercise.
HE.912.C.2.6:	Evaluate the impact of technology on personal, family, and community health. **Clarifications:** Automated external defibrillator in the community, pedestrian crosswalks with audible directions, type of information requested from local 211/hotlines or websites, consumer websites, Internet safety, and disease prevention and control.
HE.912.P.8.3:	Work cooperatively as an advocate for improving personal, family, and community health. **Clarifications:** Support local availability of healthy food options; environmentally friendly shopping; victim, drug or teen court advocacy; advocate for peer-led abuse-prevention education programs, community resource information; and home/school safety.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.
MAFS.912.S-IC.2.6:	Evaluate reports based on data. ★

General Course Information and Notes

GENERAL NOTES

The purpose of this course is to enable students to develop basic knowledge and skills in communication, meeting human needs, and conflict resolution.

The content should include the following:

- Demonstrate knowledge of the functions and responsibilities of peer facilitators (e.g., listening, confidentiality, team building, conflict resolution, intervention).
- Demonstrate awareness of varied behavioral responses to situational, environmental, and chemical elements; and the impact of subsequent decision-making on self and others.
- Demonstrate knowledge of basic human needs (e.g., food, clothing, shelter, recognition, development, security, identity) and the ways in which they can be met while developing group cohesion.
- Demonstrate use of basic facilitative communication skills (e.g., listening, questioning, feedback, paraphrasing, nonverbal communication, nonjudgmental response).
- Identify own feelings and needs and communicate them in a positive way.
- Demonstrate awareness of leadership styles (e.g., authoritarian, democratic, permissive).
- Demonstrate awareness of methods for dealing with conflict (e.g., communication, assertion, avoidance, aggression) and steps to resolution (i.e., set rules, gather perspectives, identify needs and goals, create and evaluate options, and generate agreement)
- Make inferences and justify conclusions from sample surveys, experiments, and observational studies.

Special Notes:

Instructional Practices Teaching from a well-written, grade-level textbook enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lesson.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. MAFS.912.S-IC.2.6:	Evaluate reports based on data. ★

General Course Information and Notes

GENERAL NOTES

The purpose of this course is to enable students to develop intermediate-level knowledge and skills in communication, personal and group dynamics, and conflict resolution.

The content should include the following:

- Demonstrate understanding of the functions and responsibilities of peer facilitators (listening, team building, confidentiality, conflict resolution, and intervention).
- Demonstrate knowledge of varied behavioral responses to situational, environmental, and chemical elements; and the impact of subsequent decision-making on self and others.
- Demonstrate understanding of the impact of self-knowledge and interpersonal skills on relationships with peers and family.
- Demonstrate knowledge of the positive and negative impacts of peer pressure on oneself and on relationships with peers and family.
- Demonstrate use of intermediate-level facilitative communication skills (listening, questioning, feedback, paraphrasing, nonverbal communication, nonjudgmental response).
- Make inferences and justify conclusions from sample surveys, experiments, and observational studies.

Special Notes:

Instructional Practices Teaching from a well-written, grade-level textbook enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. Course Standards

Name	Description
HE.912.B.3.1:	Verify the validity of health information, products, and services. **Clarifications:** Understanding product-packaging claims, magazine articles, diet/nutritional supplements, energy drinks, exercise video or equipment, tanning salon, fitness club, health professionals, health-related community resources, CPR procedure, qualifications of service provider, type of service, type of product, product safety, and reliability.
HE.912.B.4.1:	Explain skills needed to communicate effectively with family, peers, and others to enhance health. **Clarifications:** Using "I" messages, voice pitch/volume, eye contact, journal experiences, writing letters, persuasive speech, and assertive communication.
HE.912.B.4.2:	Assess refusal, negotiation, and collaboration skills to enhance health and avoid or reduce health risks. **Clarifications:** Validate other's opinions, use direct statement, use active statement, and offer alternatives.
HE.912.B.4.3:	Demonstrate strategies to prevent, manage, or resolve interpersonal conflicts without harming self or others. **Clarifications:** Effective verbal and nonverbal communication, compromise, and conflict-resolution.
HE.912.B.4.4:	Analyze the validity of ways to ask for and offer assistance to enhance the health of self and others. **Clarifications:** Verbal and written communication, active listening, and how to seek help for a friend.
HE.912.B.5.1:	Determine the value of applying a thoughtful decision-making process in health-related situations. **Clarifications:** Defining healthy boundaries and relationships, sexual activity, alcohol consumption, organ-donor decisions, child care, protection against infectious agents, wellness promotion, and first-aid-treatment options.
HE.912.B.6.4:	Formulate an effective long-term personal health plan. **Clarifications:** Stress reduction, weight management, healthier eating habits, improved physical fitness, and individual responsibilities for protecting health.
HE.912.C.1.1:	Predict how healthy behaviors can affect health status. **Clarifications:** Making positive choices/avoiding risky behaviors: healthy food, substance abuse, and healthy relationship skills; regular medical and dental screenings; regular physical activity, and workplace safety.
HE.912.C.1.2:	Interpret the significance of interrelationships in mental/emotional, physical, and social health. **Clarifications:** Substance abuse, eating disorders, sexual behaviors, healthy/unhealthy relationships, self-esteem, stress/anger management, and regular exercise.
HE.912.C.1.3:	Evaluate how environment and personal health are interrelated. **Clarifications:** Food options within a community; prenatal-care services; availability of recreational facilities; air quality; weather-safety awareness; and weather, air, and water conditions.
HE.912.C.2.1:	Analyze how the family influences the health of individuals. **Clarifications:** Nutritional management of meals, composition of and relationships within families, and health-insurance status.
HE.912.C.2.2:	Compare how peers influence healthy and unhealthy behaviors. **Clarifications:** Binge drinking and social groups, sexual coercion [pressure, force, or manipulation] by a dating partner, students' recommendations for school vending machines, healthy lifestyle, review trends in current and emerging diseases, and use of helmets and seatbelts.
HE.912.C.2.3:	Assess how the school and community can affect personal health practice and behaviors. **Clarifications:** Healthier foods, required health education, health screenings, and enforcement of "no tolerance" policies related to all forms of violence, and AED availability and training.
HE.912.P.8.2:	Utilize current, accurate data/information to formulate a health-enhancing message. **Clarifications:** Validate perceptions of peers and societal norms regarding drug use, violence, sexual activity, visiting parenting-focused websites, data provided by government or community agencies, societal influences on the workplace, and teen-driving safety.
HE.912.P.8.3:	Work cooperatively as an advocate for improving personal, family, and community health. **Clarifications:** Support local availability of healthy food options; environmentally friendly shopping; victim, drug or teen court advocacy; advocate for peer-led abuse-prevention education programs, community resource information; and home/school safety.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.
MAFS.912.S-IC.2.6:	Evaluate reports based on data. ★

General Course Information and Notes

GENERAL NOTES

The purpose of this course is to enable students to develop proficient knowledge and skills in communication, personal and group dynamics, and conflict resolution. Emphasis will be on the issues and concerns of students within the school.

The content should include the following:

- Select and use appropriate, effective leadership and interpersonal skills and techniques in group settings.
- Demonstrate knowledge of varied behavioral responses to situational, environmental, and chemical elements; and the impact of subsequent decision-making on self and others.
- Demonstrate use of proficient facilitative communication skills (listening, feedback, nonverbal communication, nonjudgmental response, repairing communication breakdown).
- Demonstrate understanding of methods for dealing with conflict (communication, assertion, avoidance, aggression) and use strategies specific to varied types of conflict to facilitate resolution.
- Demonstrate knowledge of varied school and community resources (school counseling center, School Resource Officer, community mental health services, public health services, AIDS clinic, rape crisis center, drug and alcohol intervention/prevention programs, hotlines, Internet).
- Assess needs and issues among individuals and groups of students within the school.
- Work cooperatively to plan, implement, and evaluate effective student programs designed to address needs and issues identified through assessment.

Special Notes:

Instructional Practices Teaching from a well-written, grade-level textbook enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

QUALIFICATIONS

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

Any field when certification reflects a bachelor or higher degree.

Peer Counseling 4 (#1400330) 2015 - 2022 (current)

Course Standards

Name	Description
HE.912.B.3.1:	Verify the validity of health information, products, and services. **Clarifications:** Understanding product-packaging claims, magazine articles, diet/nutritional supplements, energy drinks, exercise video or equipment, tanning salon, fitness club, health professionals, health-related community resources, CPR procedure, qualifications of service provider, type of service, type of product, product safety, and reliability.
HE.912.B.3.2:	Compile data reflecting the accessibility of resources from home, school, and community that provide valid health information. **Clarifications:** Internet, family member, nurse, guidance counselor, physician, clinic, hotline, support group, community agency, domestic/dating-violence service provider, and first-aid training location, expense, services available, eligibility, scheduling appointments, healthcare, and mental-health resources.
HE.912.B.3.4:	Justify when professional health services or providers may be required. **Clarifications:** Injury, depression, suicide, drug abuse, medical emergency, 911, child abuse, domestic and/or dating violence, and natural or man-made conditions.
HE.912.B.4.2:	Assess refusal, negotiation, and collaboration skills to enhance health and avoid or reduce health risks. **Clarifications:** Validate other's opinions, use direct statement, use active statement, and offer alternatives.
HE.912.B.4.3:	Demonstrate strategies to prevent, manage, or resolve interpersonal conflicts without harming self or others. **Clarifications:** Effective verbal and nonverbal communication, compromise, and conflict-resolution.
HE.912.B.4.4:	Analyze the validity of ways to ask for and offer assistance to enhance the health of self and others. **Clarifications:** Verbal and written communication, active listening, and how to seek help for a friend.
HE.912.B.5.3:	Appraise the potential short-term and long-term outcomes of each alternative on self and others. **Clarifications:** Nutrition plan based on personal needs and preferences, impact of chronic health condition on individual and family, weapons on campus, and use of stress management and coping skills.
HE.912.C.1.1:	Predict how healthy behaviors can affect health status. **Clarifications:** Making positive choices/avoiding risky behaviors: healthy food, substance abuse, and healthy relationship skills; regular medical and dental screenings; regular physical activity, and workplace safety.
HE.912.C.1.2:	Interpret the significance of interrelationships in mental/emotional, physical, and social health. **Clarifications:** Substance abuse, eating disorders, sexual behaviors, healthy/unhealthy relationships, self-esteem, stress/anger management, and regular exercise.
HE.912.C.2.3:	Assess how the school and community can affect personal health practice and behaviors. **Clarifications:** Healthier foods, required health education, health screenings, and enforcement of "no tolerance" policies related to all forms of violence, and AED availability and training.
HE.912.C.2.4:	Evaluate how public health policies and government regulations can influence health promotion and disease prevention. **Clarifications:** Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.
HE.912.P.8.3:	Work cooperatively as an advocate for improving personal, family, and community health. **Clarifications:** Support local availability of healthy food options; environmentally friendly shopping; victim, drug or teen court advocacy; advocate for peer-led abuse-prevention education programs, community resource information; and home/school safety.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.

General Course Information and Notes

GENERAL NOTES

The purpose of this course is to enable students to develop advanced knowledge and skills in communication, personal and group dynamics, and conflict resolution. Emphasis will be on program development and intervention for students in the school and community.

The content should include the following:

- Select and use appropriate, effective leadership and interpersonal skills and techniques in group settings.
- Demonstrate understanding of varied behavioral responses to situational, environmental, and chemical elements; and the impact of subsequent decision-making on self and others.
- Demonstrate use of advanced facilitative communication skills (listening, feedback, nonverbal communication, nonjudgmental response, repairing communication breakdown).
- Demonstrate understanding of methods for dealing with conflict (communication, assertion, avoidance, aggression) and use strategies specific to varied types of conflict to facilitate resolution.
- Demonstrate knowledge of varied school and community resources (school counseling center, School Resource Officer, community mental health services, public health services, AIDS clinic, drug and alcohol intervention/prevention programs, rape crisis center, hotlines, Internet).
- Analyze feedback and previous assessments to identify current needs and issues within the school or community.
- Work cooperatively to plan, implement, and evaluate effective student programs designed to address needs and issues identified through assessment.

Special Notes:

Instructional Practices Teaching from a well-written, grade-level textbook enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. Course Standards

Name	Description
LAFS.1112.L.3.4:	Determine or clarify the meaning of unknown and multiple-meaning words and phrases based on *grades 11–12 reading and content*, choosing flexibly from a range of strategies. a. Use context (e.g., the overall meaning of a sentence, paragraph, or text; a word's position or function in a sentence) as a clue to the meaning of a word or phrase. b. Identify and correctly use patterns of word changes that indicate different meanings or parts of speech (e.g., conceive, conception, conceivable). c. Consult general and specialized reference materials (e.g., dictionaries, glossaries, thesauruses), both print and digital, to find the pronunciation of a word or determine or clarify its precise meaning, its part of speech, its etymology, or its standard usage. d. Verify the preliminary determination of the meaning of a word or phrase (e.g., by checking the inferred meaning in context or in a dictionary).
LAFS.1112.RI.3.7:	Integrate and evaluate multiple sources of information presented in different media or formats (e.g., visually, quantitatively) as well as in words in order to address a question or solve a problem.
LAFS.1112.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed. c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives. d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task.
LAFS.1112.W.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience. (Grade-specific expectations for writing types are defined in standards 1–3 above.)
LAFS.1112.W.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products in response to ongoing feedback, including new arguments or information.
LAFS.1112.W.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.1112.W.3.8:	Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the strengths and limitations of each source in terms of the task, purpose, and audience; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and overreliance on any one source and following a standard format for citation.
LAFS.910.L.3.4:	Determine or clarify the meaning of unknown and multiple-meaning words and phrases based on *grades 9–10 reading and content*, choosing flexibly from a range of strategies. a. Use context (e.g., the overall meaning of a sentence, paragraph, or text; a word's position or function in a sentence) as a clue to the meaning of a word or phrase. b. Identify and correctly use patterns of word changes that indicate different meanings or parts of speech (e.g., *analyze, analysis, analytical; advocate, advocacy*). c. Consult general and specialized reference materials (e.g., dictionaries, glossaries, thesauruses), both print and digital, to find the pronunciation of a word or determine or clarify its precise meaning, its part of speech, or its etymology. d. Verify the preliminary determination of the meaning of a word or phrase (e.g., by checking the inferred meaning in context or in a dictionary).
LAFS.910.RI.3.7:	Analyze various accounts of a subject told in different mediums (e.g., a person's life story in both print and multimedia), determining which details are emphasized in each account.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.
LAFS.910.W.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience. (Grade-specific expectations for writing types are defined in standards 1–3 above.)
LAFS.910.W.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibly and dynamically.
LAFS.910.W.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.910.W.3.8:	Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the usefulness of each source in answering the research question; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and

	following a standard format for citation.
SS.912.C.2.5:	Conduct a service project to further the public good. **Clarifications:** Examples are school, community, state, national, international.
SS.912.P.9.8:	Discuss the nature and effects of stereotyping, prejudice, and discrimination.
SS.912.P.10.3:	Discuss the relationship between culture and conceptions of self and identity.
SS.912.P.12.2:	Define processes involved in problem solving and decision making. **Clarifications:** Examples may include, but are not limited to, identification, analysis, solution generation, plan, implement, and evaluate.
SS.912.P.12.5:	Describe obstacles to decision making. **Clarifications:** Examples may include, but are not limited to, confirmation bias, counterproductive heuristics, and overconfidence.
SS.912.S.8.4:	Define a social issue to be analyzed.
SS.912.S.8.9:	Identify a community social problem and discuss appropriate actions to address the problem.
SS.912.S.8.10:	Investigate how incorrect communications, such as rumors or gossip, can influence group behavior. **Clarifications:** Examples may include, but are not limited to, Orson Welles "The War of the Worlds" radio broadcast, and rumors in the mass media, on the internet, or in the community.
MAFS.K12.MP.1.1:	**Make sense of problems and persevere in solving them.** Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.
MAFS.K12.MP.3.1:	**Construct viable arguments and critique the reasoning of others.** Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
HE.912.C.2.2:	Compare how peers influence healthy and unhealthy behaviors. **Clarifications:** Binge drinking and social groups, sexual coercion [pressure, force, or manipulation] by a dating partner, students' recommendations for school vending machines, healthy lifestyle, review trends in current and emerging diseases, and use of helmets and seatbelts.

General Course Information and Notes

GENERAL NOTES

This course is designed to provide reciprocal academic and social benefits to students with disabilities and their peers without disabilities. Students enrolled in this course will learn and apply knowledge and skilled practices in the areas of academic engagement, communication, social barriers, leadership, problem solving, and other disability-related topics such as historical perspectives, inclusion, Universal Design for Learning, person-first language, presumed competence, social justice for minority populations, and media representation of diverse people.

The content and concepts should include but not limited to the following:

- Know and understand the legal and human rights of people with disabilities and their families.
- Understand and apply the concepts of confidentiality and self-determination.
- Understand historical events and aspects of disability and their influence on current attitudes, beliefs, and practices.
- Build awareness and understanding, through research and communication, of disability rights issues in the local community and beyond.
- Apply methods for problem-solving and advocacy (including self-advocacy for students with disabilities).
- Apply knowledge and strategies to promote learning for people with disabilities, in inclusive settings, through academic, communication, physical and social supports.
- Facilitate meaningful peer relationships in and out of school.
- Understand and facilitate team and cooperative learning skills among all students.
- Contribute to the concept of civic responsibility by researching and communicating information about social justice in a democratic society.
- Design and implement one or more projects to demonstrate knowledge, understanding, and application of course content and concepts.
- Assess and evaluate the impact of course efforts on self and others.

This course should be taught using the appropriate standards/benchmarks for the grade.

English Language Development (ELD) Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf.

Course Standards

Name	Description
PE.6.C.2.2:	List safety procedures that should be followed when engaging in activities to improve the health-related components of fitness. **Clarifications:** The health-related components of fitness are cardiorespiratory endurance, muscular strength, muscular endurance, flexibility and body composition.
PE.6.C.2.6:	Classify activities as aerobic or anaerobic.
PE.6.C.2.13:	List appropriate warm-up and cool-down techniques and the reasons for using them.
PE.6.C.2.14:	List terminology and etiquette in educational gymnastics or dance.
PE.6.L.3.1:	Participate in moderate physical activity on a daily basis.
PE.6.L.3.2:	Participate in vigorous physical activity on a daily basis.
PE.6.L.4.4:	Develop a personal fitness program including a variety of physical activities.
PE.6.M.1.4:	Perform at least three activities having value for cardiorespiratory fitness.
PE.6.M.1.5:	Perform movements using a variety of equipment which lead to improved or maintained muscular strength and endurance.
PE.6.M.1.9:	Create and perform a rhythmic movement sequence while working with a partner or group.
PE.6.M.1.10:	Design and perform different group dance and rhythm sequences that incorporate equipment.
PE.6.M.1.11:	Apply proper warm-up and cool-down techniques.
PE.6.M.1.12:	Use proper safety practices. **Clarifications:** Some examples of safety practices are the use of sun screen, hydration, selection of clothing and correct biomechanics.
PE.6.R.5.1:	List ways that peer pressure can be positive and negative.
PE.6.R.5.2:	Demonstrate acceptance and respect for persons of diverse backgrounds and abilities in physical-activity settings.
PE.6.R.5.3:	Demonstrate responsible behaviors during physical activities. **Clarifications:** Some examples of responsible behaviors are controlling emotions, resolving conflicts, respecting opponents and officials and accepting both victory and defeat.
PE.6.R.5.4:	Describe the personal, social and ethical behaviors that apply to specific physical activities.
PE.6.R.5.5:	Demonstrate appropriate etiquette, care of equipment, respect for facilities and safe behaviors while participating in a variety of physical activities.
PE.6.R.6.3:	Participate in games, sports and/or physical activities from other cultures.
PE.7.C.2.1:	Identify the basic rules for team sports. **Clarifications:** Some examples are setting up to start, violating rules and keeping accurate score.
PE.7.C.2.2:	Identify the basic rules for outdoor pursuits/aquatics. **Clarifications:** Some examples are setting up to start, violating rules and keeping accurate score.
PE.7.L.3.1:	Participate in moderate physical activity on a daily basis.
PE.7.L.3.2:	Participate in vigorous physical activity on a daily basis.
PE.7.M.1.1:	Participate in modified versions of team sports demonstrating mature patterns while using a variety of manipulative skills. **Clarifications:** Some examples of manipulative skills are throwing, catching, kicking, punting, trapping, dribbling, volleying and striking.
PE.7.M.1.7:	Utilize proper equipment and implement appropriate safety procedures for participation in a variety of sports or activities.
PE.7.R.5.1:	Identify situations in which peer pressure could negatively impact one's own behavior choices.
PE.7.R.6.2:	Discuss the potential benefits of participation in a variety of physical activities. **Clarifications:** Some examples of potential benefits are physical, mental, emotional and social.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
LAFS.6.RI.3.7:	Integrate information presented in different media or formats (e.g., visually, quantitatively) as well as in words to develop a coherent understanding of a topic or issue.

General Course Information and Notes

VERSION DESCRIPTION

Content for students enrolled in this course should be based upon each individual students IEP or 504 Plan.

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

QUALIFICATIONS

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

Any field when certification reflects a bachelor or higher degree.

Personal Fitness (#1501300) 2015 - 2022 (current)

Course Standards

Name	Description
PE.912.C.2.15:	Calculate individual target heart-rate zone and analyze how to adjust intensity level to stay within the desired range.
PE.912.C.2.16:	Explain the methods of monitoring levels of intensity during aerobic activity. **Clarifications:** Some examples are a talk test, rate of perceived exertion and checking one's heart rate/pulse.
PE.912.C.2.17:	Assess physiological effects of exercise during and after physical activity. **Clarifications:** Some examples are breathing, resting heart rate and blood pressure.
PE.912.C.2.18:	Differentiate between fact and fallacy as it relates to consumer physical fitness products and programs. **Clarifications:** Some examples are weight-loss pills, food labels and exercise equipment.
PE.912.C.2.22:	Explain the skill-related components of fitness and how they enhance performance levels. **Clarifications:** The skill-related components of fitness are speed, coordination, balance, power, agility and reaction time.
PE.912.C.2.23:	Apply appropriate technology and analyze data to evaluate, monitor and/or improve performance.
PE.912.L.3.1:	Participate in a variety of physical activities to meet the recommended number of minutes of moderate to vigorous physical activity beyond physical education on five or more days of the week.
PE.912.L.3.2:	Participate in a variety of activities that promote the health-related components of fitness. **Clarifications:** The health-related components of fitness are cardiorespiratory endurance, muscular strength, muscular endurance, flexibility and body composition.
PE.912.L.3.3:	Identify a variety of activities that promote effective stress management.
PE.912.L.3.6:	Identify risks and safety factors that may affect physical activity throughout life.
PE.912.L.4.1:	Design a personal fitness program. **Clarifications:** Some examples of things to consider when designing a personal fitness program are timelines and current fitness level.
PE.912.L.4.2:	Identify ways to self-assess and modify a personal fitness program.
PE.912.L.4.3:	Identify strategies for setting goals when developing a personal fitness program.
PE.912.L.4.4:	Use available technology to assess, design and evaluate a personal fitness program.
PE.912.L.4.5:	Apply the principles of training to personal fitness goals. **Clarifications:** Some examples of training principles are overload, specificity and progression.
PE.912.L.4.6:	Identify health-related problems associated with low levels of cardiorespiratory endurance, muscular strength and endurance, flexibility and body composition.
PE.912.L.4.7:	Evaluate how to make changes in an individual wellness plan as lifestyle changes occur.
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.
PE.912.M.1.12:	Select and perform complex movements using a variety of equipment which lead to improved or maintained muscular strength and endurance. **Clarifications:** An example is performing plyometrics.
PE.912.M.1.13:	Perform a student-designed cardiorespiratory enhancing workout.
PE.912.M.1.14:	Utilize technology to assess, enhance and maintain health and skill-related fitness levels. **Clarifications:** Some examples of technology are Excel spreadsheets or web based programs to chart or log activities, heart rate monitors, videotapes or digital cameras.
PE.912.M.1.15:	Select and apply sport/activity specific warm-up and cool-down techniques.
PE.912.M.1.19:	Use correct body alignment, strength, flexibility and coordination in the performance of technical movements.
PE.912.M.1.34:	Demonstrate use of the mechanical principles as they apply to specific course activities. **Clarifications:** Some examples are balance, force and leverage.
PE.912.M.1.35:	Select proper equipment and apply all appropriate safety procedures necessary for participation.
PE.912.R.5.2:	Develop strategies for including persons of diverse backgrounds and abilities while participating in a variety of physical activities.
PE.912.R.5.3:	Demonstrate sportsmanship during game situations. **Clarifications:** Some examples are controlling emotions, resolving conflicts, respecting opponents and officials, and accepting both victory and defeat.
PE.912.R.5.5:	Demonstrate appropriate etiquette, care of equipment, respect for facilities and safe behaviors while participating in a variety of physical activities.
PE.912.R.6.1:	Discuss opportunities for participation in a variety of physical activities outside of the school setting that contribute to personal enjoyment and the attainment or maintenance of a healthy lifestyle.

PE.912.R.6.2:	Analyze physical activities from which benefits can be derived. **Clarifications:** Some examples of potential benefits are physical, mental, emotional and social.
PE.912.R.6.3:	Analyze the roles of games, sports and/or physical activities in other cultures.
HE.912.B.6.4:	Formulate an effective long-term personal health plan. **Clarifications:** Stress reduction, weight management, healthier eating habits, improved physical fitness, and individual responsibilities for protecting health.
HE.912.C.1.1:	Predict how healthy behaviors can affect health status. **Clarifications:** Making positive choices/avoiding risky behaviors: healthy food, substance abuse, and healthy relationship skills; regular medical and dental screenings; regular physical activity, and workplace safety.
HE.912.C.1.3:	Evaluate how environment and personal health are interrelated. **Clarifications:** Food options within a community; prenatal-care services; availability of recreational facilities; air quality; weather-safety awareness; and weather, air, and water conditions.
HE.912.C.1.4:	Propose strategies to reduce or prevent injuries and health problems. **Clarifications:** Mandatory passenger-restraint/helmet laws, refusal skills, mandatory immunizations, healthy relationship skills, and improved inspection of food sources.
HE.912.C.2.2:	Compare how peers influence healthy and unhealthy behaviors. **Clarifications:** Binge drinking and social groups, sexual coercion [pressure, force, or manipulation] by a dating partner, students' recommendations for school vending machines, healthy lifestyle, review trends in current and emerging diseases, and use of helmets and seatbelts.
HE.912.C.2.5:	Evaluate the effect of media on personal and family health. **Clarifications:** Compares brand-name/store-brand items in home, analyzes television viewing habits, identifies effective PSAs, consumer skills, advertisements of health-related community resources, participation in risky behaviors, and deconstructs media to identify promotion of unhealthy stereotypes, and normalization of violence.
HE.912.P.7.1:	Analyze the role of individual responsibility in enhancing health. **Clarifications:** Food choices, media messages, future impact of lifestyle choices, individual responsibility for health protection, and stress management.
HE.912.P.7.2:	Evaluate healthy practices and behaviors that will maintain or improve health and reduce health risks. **Clarifications:** Lifestyle choices: drug use/abuse, healthy diet, controlling modes of transmission of infectious agents, riding with impaired drivers, seeking mental-health services when needed, sexual behavior, and engaging in healthy relationships.
LAFS.1112.RST.3.7:	Integrate and evaluate multiple sources of information presented in diverse formats and media (e.g., quantitative data, video, multimedia) in order to address a question or solve a problem.
LAFS.910.L.3.4:	Determine or clarify the meaning of unknown and multiple-meaning words and phrases based on *grades 9–10 reading and content*, choosing flexibly from a range of strategies. a. Use context (e.g., the overall meaning of a sentence, paragraph, or text; a word's position or function in a sentence) as a clue to the meaning of a word or phrase. b. Identify and correctly use patterns of word changes that indicate different meanings or parts of speech (e.g., *analyze, analysis, analytical; advocate, advocacy*). c. Consult general and specialized reference materials (e.g., dictionaries, glossaries, thesauruses), both print and digital, to find the pronunciation of a word or determine or clarify its precise meaning, its part of speech, or its etymology. d. Verify the preliminary determination of the meaning of a word or phrase (e.g., by checking the inferred meaning in context or in a dictionary).
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.
LAFS.910.W.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibly and dynamically.
MAFS.912.S-ID.1.2:	Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★ **Clarifications:** In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.
MAFS.912.S-MD.2.7:	Analyze decisions and strategies using probability concepts (e.g., product testing, medical testing, pulling a hockey goalie at the end of a game). ★
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

The purpose of this course is to provide students with the knowledge, skills, and values they need to become healthy and physically active for a lifetime. This course addresses both the health and skill-related components of physical fitness which are critical for students' success.

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. Course Standards

Name	Description
PE.912.C.2.7:	Evaluate the effectiveness of specific warm-up and cool-down activities.
PE.912.C.2.10:	Analyze long-term benefits of regularly participating in physical activity.
PE.912.C.2.13:	Document food intake, calories consumed and energy expended through physical activity and analyze the results.
PE.912.C.2.23:	Apply appropriate technology and analyze data to evaluate, monitor and/or improve performance.
PE.912.C.2.24:	Analyze the mechanical principles as they apply to specific course activities. **Clarifications:** Some examples are balance, force and leverage.
PE.912.C.2.25:	Analyze and evaluate the risks, safety procedures, rules and equipment associated with specific course activities.
PE.912.C.2.26:	Evaluate skill patterns of self and/or partner by detecting and correcting mechanical errors.
PE.912.C.2.27:	Compare and contrast how movement skills from one physical activity can be transferred and used in other physical activities. **Clarifications:** Some examples are volleyball and tennis serve, surfing and skate boarding.
PE.912.L.3.1:	Participate in a variety of physical activities to meet the recommended number of minutes of moderate to vigorous physical activity beyond physical education on five or more days of the week.
PE.912.L.3.3:	Identify a variety of activities that promote effective stress management.
PE.912.L.3.4:	Identify the in-school opportunities for participation in a variety of physical activities.
PE.912.L.3.5:	Identify the community opportunities for participation in a variety of physical activities.
PE.912.L.3.6:	Identify risks and safety factors that may affect physical activity throughout life.
PE.912.L.4.7:	Evaluate how to make changes in an individual wellness plan as lifestyle changes occur.
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.
PE.912.M.1.13:	Perform a student-designed cardiorespiratory enhancing workout.
PE.912.M.1.14:	Utilize technology to assess, enhance and maintain health and skill-related fitness levels. **Clarifications:** Some examples of technology are Excel spreadsheets or web based programs to chart or log activities, heart rate monitors, videotapes or digital cameras.
PE.912.M.1.15:	Select and apply sport/activity specific warm-up and cool-down techniques.
PE.912.M.1.16:	Apply the principles of training and conditioning to accommodate individual needs and strengths. **Clarifications:** Some examples of training principles are overload, specificity and progression.
PE.912.M.1.34:	Demonstrate use of the mechanical principles as they apply to specific course activities. **Clarifications:** Some examples are balance, force and leverage.
PE.912.M.1.35:	Select proper equipment and apply all appropriate safety procedures necessary for participation.
PE.912.R.5.2:	Develop strategies for including persons of diverse backgrounds and abilities while participating in a variety of physical activities.
PE.912.R.5.4:	Maintain appropriate personal, social and ethical behavior while participating in a variety of physical activities. **Clarifications:** Some examples are respecting teammates, opponents and officials, and accepting both victory and defeat.
PE.912.R.5.5:	Demonstrate appropriate etiquette, care of equipment, respect for facilities and safe behaviors while participating in a variety of physical activities.
PE.912.R.6.2:	Analyze physical activities from which benefits can be derived. **Clarifications:** Some examples of potential benefits are physical, mental, emotional and social.
PE.912.R.6.3:	Analyze the roles of games, sports and/or physical activities in other cultures.
LAFS.1112.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics.
LAFS.910.L.3.4:	Determine or clarify the meaning of unknown and multiple-meaning words and phrases based on *grades 9–10 reading and content*, choosing flexibly from a range of strategies. a. Use context (e.g., the overall meaning of a sentence, paragraph, or text; a word's position or function in a sentence) as a clue to the meaning of a word or phrase. b. Identify and correctly use patterns of word changes that indicate different meanings or parts of speech (e.g., *analyze, analysis, analytical; advocate, advocacy*). c. Consult general and specialized reference materials (e.g., dictionaries, glossaries, thesauruses), both print and digital, to find the pronunciation of a word or determine or clarify its precise meaning, its part of speech, or its etymology. d. Verify the preliminary determination of the meaning of a word or phrase (e.g., by checking the inferred meaning in context or in a dictionary).
MAFS.912.S-ID.1.2:	Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★ **Clarifications:** In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the

	characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.
MAFS.912.S-MD.2.7:	Analyze decisions and strategies using probability concepts (e.g., product testing, medical testing, pulling a hockey goalie at the end of a game). ★
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

Grade Level(s): 9,10,11,12

Graduation Requirement: Physical Education

Educator Certifications

Physical Education (Grades 6-12)
Physical Education (Elementary and Secondary Grades K-12)

Fitness Issues for Adolescence (#1501320) 2015 - 2022 (current)

Course Standards

Name	Description
PE.912.C.2.9:	Explain the precautions to be taken when exercising in extreme weather and/or environmental conditions. **Clarifications:** Some examples of precautions are hydration and appropriate attire.
PE.912.C.2.10:	Analyze long-term benefits of regularly participating in physical activity.
PE.912.C.2.13:	Document food intake, calories consumed and energy expended through physical activity and analyze the results.
PE.912.C.2.15:	Calculate individual target heart-rate zone and analyze how to adjust intensity level to stay within the desired range.
PE.912.C.2.18:	Differentiate between fact and fallacy as it relates to consumer physical fitness products and programs. **Clarifications:** Some examples are weight-loss pills, food labels and exercise equipment.
PE.912.L.3.1:	Participate in a variety of physical activities to meet the recommended number of minutes of moderate to vigorous physical activity beyond physical education on five or more days of the week.
PE.912.L.3.2:	Participate in a variety of activities that promote the health-related components of fitness. **Clarifications:** The health-related components of fitness are cardiorespiratory endurance, muscular strength, muscular endurance, flexibility and body composition.
PE.912.L.3.3:	Identify a variety of activities that promote effective stress management.
PE.912.L.3.6:	Identify risks and safety factors that may affect physical activity throughout life.
PE.912.L.4.1:	Design a personal fitness program. **Clarifications:** Some examples of things to consider when designing a personal fitness program are timelines and current fitness level.
PE.912.L.4.2:	Identify ways to self-assess and modify a personal fitness program.
PE.912.L.4.4:	Use available technology to assess, design and evaluate a personal fitness program.
PE.912.L.4.5:	Apply the principles of training to personal fitness goals. **Clarifications:** Some examples of training principles are overload, specificity and progression.
PE.912.L.4.7:	Evaluate how to make changes in an individual wellness plan as lifestyle changes occur.
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.
PE.912.M.1.12:	Select and perform complex movements using a variety of equipment which lead to improved or maintained muscular strength and endurance. **Clarifications:** An example is performing plyometrics.
PE.912.M.1.13:	Perform a student-designed cardiorespiratory enhancing workout.
PE.912.M.1.14:	Utilize technology to assess, enhance and maintain health and skill-related fitness levels. **Clarifications:** Some examples of technology are Excel spreadsheets or web based programs to chart or log activities, heart rate monitors, videotapes or digital cameras.
PE.912.M.1.15:	Select and apply sport/activity specific warm-up and cool-down techniques.
PE.912.M.1.35:	Select proper equipment and apply all appropriate safety procedures necessary for participation.
PE.912.R.5.1:	Describe ways to act independently of peer pressure during physical activities.
PE.912.R.5.4:	Maintain appropriate personal, social and ethical behavior while participating in a variety of physical activities. **Clarifications:** Some examples are respecting teammates, opponents and officials, and accepting both victory and defeat.
PE.912.R.5.5:	Demonstrate appropriate etiquette, care of equipment, respect for facilities and safe behaviors while participating in a variety of physical activities.
PE.912.R.6.1:	Discuss opportunities for participation in a variety of physical activities outside of the school setting that contribute to personal enjoyment and the attainment or maintenance of a healthy lifestyle.
PE.912.R.6.2:	Analyze physical activities from which benefits can be derived. **Clarifications:** Some examples of potential benefits are physical, mental, emotional and social.
PE.912.R.6.3:	Analyze the roles of games, sports and/or physical activities in other cultures.
LAFS.910.L.3.4:	Determine or clarify the meaning of unknown and multiple-meaning words and phrases based on *grades 9–10 reading and content*, choosing flexibly from a range of strategies. a. Use context (e.g., the overall meaning of a sentence, paragraph, or text; a word's position or function in a sentence) as a clue to the meaning of a word or phrase. b. Identify and correctly use patterns of word changes that indicate different meanings or parts of speech (e.g., *analyze, analysis, analytical; advocate, advocacy*). c. Consult general and specialized reference materials (e.g., dictionaries, glossaries, thesauruses), both print and digital, to find the pronunciation of a word or determine or clarify its precise meaning, its part of speech, or its etymology. d. Verify the preliminary determination of the meaning of a word or phrase (e.g., by checking the inferred meaning in context or in a dictionary).

LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.
MAFS.912.S-ID.1.2:	Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★ **Clarifications:** In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.
MAFS.912.S-MD.2.7:	Analyze decisions and strategies using probability concepts (e.g., product testing, medical testing, pulling a hockey goalie at the end of a game). ★
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

Name	Description
PE.912.C.2.3:	Analyze the movement performance of self and others. **Clarifications:** Some examples are video analysis and checklist.
PE.912.C.2.6:	Compare and contrast the health-related benefits of various physical activities.
PE.912.C.2.16:	Explain the methods of monitoring levels of intensity during aerobic activity. **Clarifications:** Some examples are a talk test, rate of perceived exertion and checking one's heart rate/pulse.
PE.912.C.2.23:	Apply appropriate technology and analyze data to evaluate, monitor and/or improve performance.
PE.912.C.2.25:	Analyze and evaluate the risks, safety procedures, rules and equipment associated with specific course activities.
PE.912.C.2.26:	Evaluate skill patterns of self and/or partner by detecting and correcting mechanical errors.
PE.912.L.3.2:	Participate in a variety of activities that promote the health-related components of fitness. **Clarifications:** The health-related components of fitness are cardiorespiratory endurance, muscular strength, muscular endurance, flexibility and body composition.
PE.912.L.3.3:	Identify a variety of activities that promote effective stress management.
PE.912.L.3.6:	Identify risks and safety factors that may affect physical activity throughout life.
PE.912.L.4.2:	Identify ways to self-assess and modify a personal fitness program.
PE.912.L.4.4:	Use available technology to assess, design and evaluate a personal fitness program.
PE.912.L.4.5:	Apply the principles of training to personal fitness goals. **Clarifications:** Some examples of training principles are overload, specificity and progression.
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.
PE.912.M.1.12:	Select and perform complex movements using a variety of equipment which lead to improved or maintained muscular strength and endurance. **Clarifications:** An example is performing plyometrics.
PE.912.M.1.15:	Select and apply sport/activity specific warm-up and cool-down techniques.
PE.912.M.1.16:	Apply the principles of training and conditioning to accommodate individual needs and strengths. **Clarifications:** Some examples of training principles are overload, specificity and progression.
PE.912.M.1.19:	Use correct body alignment, strength, flexibility and coordination in the performance of technical movements.
PE.912.M.1.30:	Combine and apply movement patterns from simple to complex.
PE.912.M.1.34:	Demonstrate use of the mechanical principles as they apply to specific course activities. **Clarifications:** Some examples are balance, force and leverage.
PE.912.M.1.35:	Select proper equipment and apply all appropriate safety procedures necessary for participation.
PE.912.R.5.5:	Demonstrate appropriate etiquette, care of equipment, respect for facilities and safe behaviors while participating in a variety of physical activities.
PE.912.R.6.2:	Analyze physical activities from which benefits can be derived. **Clarifications:** Some examples of potential benefits are physical, mental, emotional and social.
PE.912.R.6.3:	Analyze the roles of games, sports and/or physical activities in other cultures.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.
LAFS.910.WHST.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibly and dynamically.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
MAFS.912.S-ID.1.2:	Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★ **Clarifications:**

	In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

General Course Information and Notes

VERSION DESCRIPTION

The purpose of this course is to develop the physical skills necessary to be competent in many forms of movement as it relates to weight training. The integration of fitness concepts throughout the content is critical to the success of this course.

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. Course Standards

Name	Description
PE.912.C.2.7:	Evaluate the effectiveness of specific warm-up and cool-down activities.
PE.912.C.2.17:	Assess physiological effects of exercise during and after physical activity. **Clarifications:** Some examples are breathing, resting heart rate and blood pressure.
PE.912.C.2.22:	Explain the skill-related components of fitness and how they enhance performance levels. **Clarifications:** The skill-related components of fitness are speed, coordination, balance, power, agility and reaction time.
PE.912.C.2.23:	Apply appropriate technology and analyze data to evaluate, monitor and/or improve performance.
PE.912.C.2.24:	Analyze the mechanical principles as they apply to specific course activities. **Clarifications:** Some examples are balance, force and leverage.
PE.912.C.2.25:	Analyze and evaluate the risks, safety procedures, rules and equipment associated with specific course activities.
PE.912.C.2.26:	Evaluate skill patterns of self and/or partner by detecting and correcting mechanical errors.
PE.912.L.3.2:	Participate in a variety of activities that promote the health-related components of fitness. **Clarifications:** The health-related components of fitness are cardiorespiratory endurance, muscular strength, muscular endurance, flexibility and body composition.
PE.912.L.3.3:	Identify a variety of activities that promote effective stress management.
PE.912.L.3.6:	Identify risks and safety factors that may affect physical activity throughout life.
PE.912.L.4.2:	Identify ways to self-assess and modify a personal fitness program.
PE.912.L.4.4:	Use available technology to assess, design and evaluate a personal fitness program.
PE.912.L.4.5:	Apply the principles of training to personal fitness goals. **Clarifications:** Some examples of training principles are overload, specificity and progression.
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.
PE.912.M.1.12:	Select and perform complex movements using a variety of equipment which lead to improved or maintained muscular strength and endurance. **Clarifications:** An example is performing plyometrics.
PE.912.M.1.16:	Apply the principles of training and conditioning to accommodate individual needs and strengths. **Clarifications:** Some examples of training principles are overload, specificity and progression.
PE.912.M.1.19:	Use correct body alignment, strength, flexibility and coordination in the performance of technical movements.
PE.912.M.1.30:	Combine and apply movement patterns from simple to complex.
PE.912.M.1.33:	Practice complex motor activities in order to improve performance.
PE.912.M.1.34:	Demonstrate use of the mechanical principles as they apply to specific course activities. **Clarifications:** Some examples are balance, force and leverage.
PE.912.M.1.35:	Select proper equipment and apply all appropriate safety procedures necessary for participation.
PE.912.R.5.5:	Demonstrate appropriate etiquette, care of equipment, respect for facilities and safe behaviors while participating in a variety of physical activities.
PE.912.R.6.2:	Analyze physical activities from which benefits can be derived. **Clarifications:** Some examples of potential benefits are physical, mental, emotional and social.
PE.912.R.6.3:	Analyze the roles of games, sports and/or physical activities in other cultures.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.
	Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★

MAFS.912.S-ID.1.2:	**Clarifications:** In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

Course Standards

Name	Description
PE.912.C.2.6:	Compare and contrast the health-related benefits of various physical activities.
PE.912.C.2.7:	Evaluate the effectiveness of specific warm-up and cool-down activities.
PE.912.C.2.8:	Differentiate between the three different types of heat illnesses associated with fluid loss. **Clarifications:** The three types of heat illnesses are heat cramps, heat exhaustion and heat stroke.
PE.912.C.2.9:	Explain the precautions to be taken when exercising in extreme weather and/or environmental conditions. **Clarifications:** Some examples of precautions are hydration and appropriate attire.
PE.912.C.2.10:	Analyze long-term benefits of regularly participating in physical activity.
PE.912.C.2.11:	Explain how each of the health-related components of fitness are improved through the application of training principles. **Clarifications:** The health-related components of fitness are cardiorespiratory endurance, muscular strength, muscular endurance, flexibility and body composition.
PE.912.C.2.12:	Compare and contrast aerobic versus anaerobic activities.
PE.912.C.2.13:	Document food intake, calories consumed and energy expended through physical activity and analyze the results.
PE.912.C.2.14:	Compare and contrast the skill-related components of fitness used in various physical activities. **Clarifications:** The skill-related components of fitness are speed, coordination, balance, power, agility and reaction time.
PE.912.C.2.15:	Calculate individual target heart-rate zone and analyze how to adjust intensity level to stay within the desired range.
PE.912.C.2.16:	Explain the methods of monitoring levels of intensity during aerobic activity. **Clarifications:** Some examples are a talk test, rate of perceived exertion and checking one's heart rate/pulse.
PE.912.C.2.17:	Assess physiological effects of exercise during and after physical activity. **Clarifications:** Some examples are breathing, resting heart rate and blood pressure.
PE.912.C.2.18:	Differentiate between fact and fallacy as it relates to consumer physical fitness products and programs. **Clarifications:** Some examples are weight-loss pills, food labels and exercise equipment.
PE.912.C.2.23:	Apply appropriate technology and analyze data to evaluate, monitor and/or improve performance.
PE.912.C.2.25:	Analyze and evaluate the risks, safety procedures, rules and equipment associated with specific course activities.
PE.912.L.3.2:	Participate in a variety of activities that promote the health-related components of fitness. **Clarifications:** The health-related components of fitness are cardiorespiratory endurance, muscular strength, muscular endurance, flexibility and body composition.
PE.912.L.3.6:	Identify risks and safety factors that may affect physical activity throughout life.
PE.912.L.4.1:	Design a personal fitness program. **Clarifications:** Some examples of things to consider when designing a personal fitness program are timelines and current fitness level.
PE.912.L.4.2:	Identify ways to self-assess and modify a personal fitness program.
PE.912.L.4.3:	Identify strategies for setting goals when developing a personal fitness program.
PE.912.L.4.4:	Use available technology to assess, design and evaluate a personal fitness program.
PE.912.L.4.5:	Apply the principles of training to personal fitness goals. **Clarifications:** Some examples of training principles are overload, specificity and progression.
PE.912.L.4.6:	Identify health-related problems associated with low levels of cardiorespiratory endurance, muscular strength and endurance, flexibility and body composition.
PE.912.L.4.7:	Evaluate how to make changes in an individual wellness plan as lifestyle changes occur.
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.
PE.912.M.1.12:	Select and perform complex movements using a variety of equipment which lead to improved or maintained muscular strength and endurance. **Clarifications:** An example is performing plyometrics.
PE.912.M.1.13:	Perform a student-designed cardiorespiratory enhancing workout.
PE.912.M.1.14:	Utilize technology to assess, enhance and maintain health and skill-related fitness levels. **Clarifications:** Some examples of technology are Excel spreadsheets or web based programs to chart or log activities, heart rate monitors, videotapes or digital cameras.

PE.912.M.1.15:	Select and apply sport/activity specific warm-up and cool-down techniques.
PE.912.M.1.16:	Apply the principles of training and conditioning to accommodate individual needs and strengths. **Clarifications:** Some examples of training principles are overload, specificity and progression.
PE.912.M.1.17:	Demonstrate basic cardiopulmonary resuscitation (CPR) procedures.
PE.912.M.1.19:	Use correct body alignment, strength, flexibility and coordination in the performance of technical movements.
PE.912.M.1.34:	Demonstrate use of the mechanical principles as they apply to specific course activities. **Clarifications:** Some examples are balance, force and leverage.
PE.912.M.1.35:	Select proper equipment and apply all appropriate safety procedures necessary for participation.
PE.912.R.5.2:	Develop strategies for including persons of diverse backgrounds and abilities while participating in a variety of physical activities.
PE.912.R.5.4:	Maintain appropriate personal, social and ethical behavior while participating in a variety of physical activities. **Clarifications:** Some examples are respecting teammates, opponents and officials, and accepting both victory and defeat.
PE.912.R.5.5:	Demonstrate appropriate etiquette, care of equipment, respect for facilities and safe behaviors while participating in a variety of physical activities.
PE.912.R.6.1:	Discuss opportunities for participation in a variety of physical activities outside of the school setting that contribute to personal enjoyment and the attainment or maintenance of a healthy lifestyle.
PE.912.R.6.2:	Analyze physical activities from which benefits can be derived. **Clarifications:** Some examples of potential benefits are physical, mental, emotional and social.
SC.912.L.14.12:	Describe the anatomy and histology of bone tissue.
SC.912.L.14.16:	Describe the anatomy and histology, including ultrastructure, of muscle tissue.
SC.912.L.14.17:	List the steps involved in the sliding filament of muscle contraction.
SC.912.L.14.19:	Explain the physiology of skeletal muscle.
SC.912.L.14.20:	Identify the major muscles of the human on a model or diagram.
SC.912.L.14.24:	Identify the general parts of a synapse and describe the physiology of signal transmission across a synapse.
SC.912.L.14.36:	Describe the factors affecting blood flow through the cardiovascular system.
SC.912.L.14.44:	Describe the physiology of the respiratory system including the mechanisms of ventilation, gas exchange, gas transport and the mechanisms that control the rate of ventilation.
HE.912.B.3.4:	Justify when professional health services or providers may be required. **Clarifications:** Injury, depression, suicide, drug abuse, medical emergency, 911, child abuse, domestic and/or dating violence, and natural or man-made conditions.
HE.912.B.6.2:	Formulate a plan to attain a personal health goal that addresses strengths, needs, and risks. **Clarifications:** Weight management, comprehensive physical fitness, stress management, dating relationships, risky behaviors, and a wellness-program plan.
HE.912.B.6.3:	Implement strategies and monitor progress in achieving a personal health goal. **Clarifications:** Stress management, time out, using of a squeeze ball when frustrated, talking with a friend or professional, pacing yourself, setting realistic expectations, using rewards, getting support, and wellness promotion.
HE.912.C.1.4:	Propose strategies to reduce or prevent injuries and health problems. **Clarifications:** Mandatory passenger-restraint/helmet laws, refusal skills, mandatory immunizations, healthy relationship skills, and improved inspection of food sources.
HE.912.P.8.1:	Demonstrate how to influence and support others in making positive health choices. **Clarifications:** Avoidance of underage drinking, prevention of driving under the influence, suicide prevention, promotion of healthy dating/personal relationships, responsible parenting, disease prevention, and promotion of first-aid training.
LAFS.1112.RST.3.7:	Integrate and evaluate multiple sources of information presented in diverse formats and media (e.g., quantitative data, video, multimedia) in order to address a question or solve a problem.
LAFS.910.L.3.6:	Acquire and use accurately general academic and domain-specific words and phrases, sufficient for reading, writing, speaking, and listening at the college and career readiness level; demonstrate independence in gathering vocabulary knowledge when considering a word or phrase important to comprehension or expression.
LAFS.910.RL.2.4:	Determine the meaning of words and phrases as they are used in the text, including figurative and connotative meanings; analyze the cumulative impact of specific word choices on meaning and tone (e.g., how the language evokes a sense of time and place; how it sets a formal or informal tone).
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.

LAFS.910.WHST.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibly and dynamically.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
MAFS.912.S-MD.2.7:	Analyze decisions and strategies using probability concepts (e.g., product testing, medical testing, pulling a hockey goalie at the end of a game). ★

General Course Information and Notes

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

GENERAL INFORMATION

Course Number: 1501380

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 9 to 12 and Adult Education Courses > **Subject:** Physical Education > **SubSubject:** Fitness >
Abbreviated Title: PERS FIT TRAINER

Number of Credits: One (1) credit

Course Length: Year (Y)

Course Type: Core Academic Course

Course Level: 2

Course Status: Draft - Course Pending Approval

Grade Level(s): 9,10,11,12

Graduation Requirement: Physical Education

Educator Certifications

Physical Education (Elementary and Secondary Grades K-12)

Comprehensive Fitness (#1501390) 2015 - 2022 (current)

Course Standards

Name	Description
PE.912.C.2.15:	Calculate individual target heart-rate zone and analyze how to adjust intensity level to stay within the desired range.
PE.912.C.2.16:	Explain the methods of monitoring levels of intensity during aerobic activity. **Clarifications:** Some examples are a talk test, rate of perceived exertion and checking one's heart rate/pulse.
PE.912.C.2.23:	Apply appropriate technology and analyze data to evaluate, monitor and/or improve performance.
PE.912.C.2.26:	Evaluate skill patterns of self and/or partner by detecting and correcting mechanical errors.
PE.912.C.2.28:	Interpret and apply the rules associated with specific course activities.
PE.912.L.3.1:	Participate in a variety of physical activities to meet the recommended number of minutes of moderate to vigorous physical activity beyond physical education on five or more days of the week.
PE.912.L.3.2:	Participate in a variety of activities that promote the health-related components of fitness. **Clarifications:** The health-related components of fitness are cardiorespiratory endurance, muscular strength, muscular endurance, flexibility and body composition.
PE.912.L.3.3:	Identify a variety of activities that promote effective stress management.
PE.912.L.4.1:	Design a personal fitness program. **Clarifications:** Some examples of things to consider when designing a personal fitness program are timelines and current fitness level.
PE.912.L.4.2:	Identify ways to self-assess and modify a personal fitness program.
PE.912.L.4.3:	Identify strategies for setting goals when developing a personal fitness program.
PE.912.L.4.4:	Use available technology to assess, design and evaluate a personal fitness program.
PE.912.L.4.5:	Apply the principles of training to personal fitness goals. **Clarifications:** Some examples of training principles are overload, specificity and progression.
PE.912.L.4.7:	Evaluate how to make changes in an individual wellness plan as lifestyle changes occur.
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.
PE.912.M.1.12:	Select and perform complex movements using a variety of equipment which lead to improved or maintained muscular strength and endurance. **Clarifications:** An example is performing plyometrics.
PE.912.M.1.13:	Perform a student-designed cardiorespiratory enhancing workout.
PE.912.M.1.14:	Utilize technology to assess, enhance and maintain health and skill-related fitness levels. **Clarifications:** Some examples of technology are Excel spreadsheets or web based programs to chart or log activities, heart rate monitors, videotapes or digital cameras.
PE.912.M.1.15:	Select and apply sport/activity specific warm-up and cool-down techniques.
PE.912.M.1.16:	Apply the principles of training and conditioning to accommodate individual needs and strengths. **Clarifications:** Some examples of training principles are overload, specificity and progression.
PE.912.M.1.33:	Practice complex motor activities in order to improve performance.
PE.912.M.1.34:	Demonstrate use of the mechanical principles as they apply to specific course activities. **Clarifications:** Some examples are balance, force and leverage.
PE.912.M.1.35:	Select proper equipment and apply all appropriate safety procedures necessary for participation.
PE.912.R.5.4:	Maintain appropriate personal, social and ethical behavior while participating in a variety of physical activities. **Clarifications:** Some examples are respecting teammates, opponents and officials, and accepting both victory and defeat.
PE.912.R.5.5:	Demonstrate appropriate etiquette, care of equipment, respect for facilities and safe behaviors while participating in a variety of physical activities.
PE.912.R.6.3:	Analyze the roles of games, sports and/or physical activities in other cultures.
LAFS.1112.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics.
LAFS.910.L.3.4:	Determine or clarify the meaning of unknown and multiple-meaning words and phrases based on *grades 9–10 reading and content*, choosing flexibly from a range of strategies. a. Use context (e.g., the overall meaning of a sentence, paragraph, or text; a word's position or function in a sentence) as a clue to the meaning of a word or phrase. b. Identify and correctly use patterns of word changes that indicate different meanings or parts of speech (e.g., *analyze, analysis, analytical; advocate, advocacy*). c. Consult general and specialized reference materials (e.g., dictionaries, glossaries, thesauruses), both print and digital, to find the pronunciation of a word or determine or clarify its precise meaning, its part of speech, or its etymology.

	d. Verify the preliminary determination of the meaning of a word or phrase (e.g., by checking the inferred meaning in context or in a dictionary).
MAFS.912.S-ID.1.2:	Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★ **Clarifications:** In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.
MAFS.912.S-MD.2.7:	Analyze decisions and strategies using probability concepts (e.g., product testing, medical testing, pulling a hockey goalie at the end of a game). ★
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

Name	Description
PE.912.C.2.3:	Analyze the movement performance of self and others. **Clarifications:** Some examples are video analysis and checklist.
PE.912.C.2.7:	Evaluate the effectiveness of specific warm-up and cool-down activities.
PE.912.C.2.14:	Compare and contrast the skill-related components of fitness used in various physical activities. **Clarifications:** The skill-related components of fitness are speed, coordination, balance, power, agility and reaction time.
PE.912.C.2.17:	Assess physiological effects of exercise during and after physical activity. **Clarifications:** Some examples are breathing, resting heart rate and blood pressure.
PE.912.C.2.23:	Apply appropriate technology and analyze data to evaluate, monitor and/or improve performance.
PE.912.C.2.25:	Analyze and evaluate the risks, safety procedures, rules and equipment associated with specific course activities.
PE.912.C.2.26:	Evaluate skill patterns of self and/or partner by detecting and correcting mechanical errors.
PE.912.L.3.2:	Participate in a variety of activities that promote the health-related components of fitness. **Clarifications:** The health-related components of fitness are cardiorespiratory endurance, muscular strength, muscular endurance, flexibility and body composition.
PE.912.L.3.3:	Identify a variety of activities that promote effective stress management.
PE.912.L.3.6:	Identify risks and safety factors that may affect physical activity throughout life.
PE.912.L.4.2:	Identify ways to self-assess and modify a personal fitness program.
PE.912.L.4.3:	Identify strategies for setting goals when developing a personal fitness program.
PE.912.L.4.4:	Use available technology to assess, design and evaluate a personal fitness program.
PE.912.L.4.5:	Apply the principles of training to personal fitness goals. **Clarifications:** Some examples of training principles are overload, specificity and progression.
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.
PE.912.M.1.12:	Select and perform complex movements using a variety of equipment which lead to improved or maintained muscular strength and endurance. **Clarifications:** An example is performing plyometrics.
PE.912.M.1.16:	Apply the principles of training and conditioning to accommodate individual needs and strengths. **Clarifications:** Some examples of training principles are overload, specificity and progression.
PE.912.M.1.19:	Use correct body alignment, strength, flexibility and coordination in the performance of technical movements.
PE.912.M.1.30:	Combine and apply movement patterns from simple to complex.
PE.912.M.1.34:	Demonstrate use of the mechanical principles as they apply to specific course activities. **Clarifications:** Some examples are balance, force and leverage.
PE.912.M.1.35:	Select proper equipment and apply all appropriate safety procedures necessary for participation.
PE.912.R.5.5:	Demonstrate appropriate etiquette, care of equipment, respect for facilities and safe behaviors while participating in a variety of physical activities.
PE.912.R.6.2:	Analyze physical activities from which benefits can be derived. **Clarifications:** Some examples of potential benefits are physical, mental, emotional and social.
PE.912.R.6.3:	Analyze the roles of games, sports and/or physical activities in other cultures.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

Name	Description
PE.912.C.2.23:	Apply appropriate technology and analyze data to evaluate, monitor and/or improve performance.
PE.912.C.2.26:	Evaluate skill patterns of self and/or partner by detecting and correcting mechanical errors.
PE.912.L.3.6:	Identify risks and safety factors that may affect physical activity throughout life.
PE.912.L.4.5:	Apply the principles of training to personal fitness goals. **Clarifications:** Some examples of training principles are overload, specificity and progression.
PE.912.L.4.7:	Evaluate how to make changes in an individual wellness plan as lifestyle changes occur.
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.
PE.912.M.1.15:	Select and apply sport/activity specific warm-up and cool-down techniques.
PE.912.M.1.16:	Apply the principles of training and conditioning to accommodate individual needs and strengths. **Clarifications:** Some examples of training principles are overload, specificity and progression.
PE.912.M.1.18:	Demonstrate a variety of gymnastics skills with a level of control.
PE.912.M.1.19:	Use correct body alignment, strength, flexibility and coordination in the performance of technical movements.
PE.912.M.1.20:	Perform complex combinations and sequences demonstrating smooth transitions while alone, with a partner or in a small group.
PE.912.M.1.34:	Demonstrate use of the mechanical principles as they apply to specific course activities. **Clarifications:** Some examples are balance, force and leverage.
PE.912.M.1.35:	Select proper equipment and apply all appropriate safety procedures necessary for participation.
PE.912.R.5.1:	Describe ways to act independently of peer pressure during physical activities.
PE.912.R.5.4:	Maintain appropriate personal, social and ethical behavior while participating in a variety of physical activities. **Clarifications:** Some examples are respecting teammates, opponents and officials, and accepting both victory and defeat.
PE.912.R.5.5:	Demonstrate appropriate etiquette, care of equipment, respect for facilities and safe behaviors while participating in a variety of physical activities.
PE.912.R.6.3:	Analyze the roles of games, sports and/or physical activities in other cultures.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Course Standards

Name	Description
PE.912.C.2.7:	Evaluate the effectiveness of specific warm-up and cool-down activities.
PE.912.C.2.19:	Choreograph complex sequences individually, with a partner or in a small group.
PE.912.C.2.23:	Apply appropriate technology and analyze data to evaluate, monitor and/or improve performance.
PE.912.C.2.24:	Analyze the mechanical principles as they apply to specific course activities. **Clarifications:** Some examples are balance, force and leverage.
PE.912.C.2.25:	Analyze and evaluate the risks, safety procedures, rules and equipment associated with specific course activities.
PE.912.C.2.26:	Evaluate skill patterns of self and/or partner by detecting and correcting mechanical errors.
PE.912.L.3.6:	Identify risks and safety factors that may affect physical activity throughout life.
PE.912.L.4.5:	Apply the principles of training to personal fitness goals. **Clarifications:** Some examples of training principles are overload, specificity and progression.
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.
PE.912.M.1.12:	Select and perform complex movements using a variety of equipment which lead to improved or maintained muscular strength and endurance. **Clarifications:** An example is performing plyometrics.
PE.912.M.1.18:	Demonstrate a variety of gymnastics skills with a level of control.
PE.912.M.1.19:	Use correct body alignment, strength, flexibility and coordination in the performance of technical movements.
PE.912.M.1.20:	Perform complex combinations and sequences demonstrating smooth transitions while alone, with a partner or in a small group.
PE.912.M.1.21:	Demonstrate the relationship between complex dance elements and rhythmic movements related to educational gymnastics skills and sequences.
PE.912.M.1.33:	Practice complex motor activities in order to improve performance.
PE.912.M.1.35:	Select proper equipment and apply all appropriate safety procedures necessary for participation.
PE.912.R.5.4:	Maintain appropriate personal, social and ethical behavior while participating in a variety of physical activities. **Clarifications:** Some examples are respecting teammates, opponents and officials, and accepting both victory and defeat.
PE.912.R.5.5:	Demonstrate appropriate etiquette, care of equipment, respect for facilities and safe behaviors while participating in a variety of physical activities.
PE.912.R.6.3:	Analyze the roles of games, sports and/or physical activities in other cultures.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.
MAFS.912.S-ID.1.2:	Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★ **Clarifications:** In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

General Course Information and Notes

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

GENERAL INFORMATION

Course Number: 1502310

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 9 to 12 and Adult Education Courses > **Subject:** Physical Education > **SubSubject:** Individual and Dual >

Abbreviated Title: GYMNASTICS 2

Number of Credits: Half credit (.5)

Course Length: Semester (S)

Course Type: Core Academic Course

Course Level: 2

Course Status: Draft - Course Pending Approval

Grade Level(s): 9,10,11,12

Graduation Requirement: Physical Education

Educator Certifications

Physical Education (Grades 6-12)
Physical Education (Elementary and Secondary Grades K-12)

Paddleball/Racquetball/Handball (#1502400) 2015 - 2022 (current)

Course Standards

Name	Description
PE.912.C.2.21:	Diagram, explain and justify the use of advanced offensive, defensive and transition strategies and tactics.
PE.912.C.2.23:	Apply appropriate technology and analyze data to evaluate, monitor and/or improve performance.
PE.912.C.2.24:	Analyze the mechanical principles as they apply to specific course activities. **Clarifications:** Some examples are balance, force and leverage.
PE.912.C.2.25:	Analyze and evaluate the risks, safety procedures, rules and equipment associated with specific course activities.
PE.912.C.2.26:	Evaluate skill patterns of self and/or partner by detecting and correcting mechanical errors.
PE.912.C.2.27:	Compare and contrast how movement skills from one physical activity can be transferred and used in other physical activities. **Clarifications:** Some examples are volleyball and tennis serve, surfing and skate boarding.
PE.912.C.2.28:	Interpret and apply the rules associated with specific course activities.
PE.912.L.3.4:	Identify the in-school opportunities for participation in a variety of physical activities.
PE.912.L.3.5:	Identify the community opportunities for participation in a variety of physical activities.
PE.912.L.3.6:	Identify risks and safety factors that may affect physical activity throughout life.
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.
PE.912.M.1.10:	Apply sport specific skills in simulation and in real-life applications. **Clarifications:** An example of a simulation is a practice setting or lead up activity. An example of a real-life application is a game or performance setting.
PE.912.M.1.15:	Select and apply sport/activity specific warm-up and cool-down techniques.
PE.912.M.1.22:	Demonstrate proficiency in advanced combinations of motor skills for a variety of individual and dual sports.
PE.912.M.1.23:	Demonstrate proficiency of critical elements when striking with objects, implements or body parts.
PE.912.M.1.24:	Apply a combination of complex movement patterns in a game setting.
PE.912.M.1.25:	Apply appropriate speed and generation of force when distance running, sprinting, throwing, jumping, striking or kicking.
PE.912.M.1.26:	Analyze and apply offensive, defensive and transition strategies and tactics to reflect a higher order of thinking. **Clarifications:** An example is placing a shot in an open area away from opponent.
PE.912.M.1.30:	Combine and apply movement patterns from simple to complex.
PE.912.M.1.31:	Demonstrate advanced offensive, defensive and transition strategies and tactics.
PE.912.M.1.32:	Apply sport specific skills in a variety of game settings.
PE.912.M.1.34:	Demonstrate use of the mechanical principles as they apply to specific course activities. **Clarifications:** Some examples are balance, force and leverage.
PE.912.M.1.35:	Select proper equipment and apply all appropriate safety procedures necessary for participation.
PE.912.R.6.3:	Analyze the roles of games, sports and/or physical activities in other cultures.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.
MAFS.912.S-ID.1.2:	Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★ **Clarifications:** In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

Name	Description
PE.912.C.2.20:	Identify appropriate methods to resolve physical conflict.
PE.912.C.2.23:	Apply appropriate technology and analyze data to evaluate, monitor and/or improve performance.
PE.912.C.2.26:	Evaluate skill patterns of self and/or partner by detecting and correcting mechanical errors.
PE.912.C.2.27:	Compare and contrast how movement skills from one physical activity can be transferred and used in other physical activities. **Clarifications:** Some examples are volleyball and tennis serve, surfing and skate boarding.
PE.912.C.2.28:	Interpret and apply the rules associated with specific course activities.
PE.912.L.3.3:	Identify a variety of activities that promote effective stress management.
PE.912.L.3.6:	Identify risks and safety factors that may affect physical activity throughout life.
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.
PE.912.M.1.10:	Apply sport specific skills in simulation and in real-life applications. **Clarifications:** An example of a simulation is a practice setting or lead up activity. An example of a real-life application is a game or performance setting.
PE.912.M.1.15:	Select and apply sport/activity specific warm-up and cool-down techniques.
PE.912.M.1.25:	Apply appropriate speed and generation of force when distance running, sprinting, throwing, jumping, striking or kicking.
PE.912.M.1.31:	Demonstrate advanced offensive, defensive and transition strategies and tactics.
PE.912.M.1.32:	Apply sport specific skills in a variety of game settings.
PE.912.M.1.33:	Practice complex motor activities in order to improve performance.
PE.912.M.1.35:	Select proper equipment and apply all appropriate safety procedures necessary for participation.
PE.912.R.5.3:	Demonstrate sportsmanship during game situations. **Clarifications:** Some examples are controlling emotions, resolving conflicts, respecting opponents and officials, and accepting both victory and defeat.
PE.912.R.5.4:	Maintain appropriate personal, social and ethical behavior while participating in a variety of physical activities. **Clarifications:** Some examples are respecting teammates, opponents and officials, and accepting both victory and defeat.
PE.912.R.5.5:	Demonstrate appropriate etiquette, care of equipment, respect for facilities and safe behaviors while participating in a variety of physical activities.
PE.912.R.6.1:	Discuss opportunities for participation in a variety of physical activities outside of the school setting that contribute to personal enjoyment and the attainment or maintenance of a healthy lifestyle.
PE.912.R.6.3:	Analyze the roles of games, sports and/or physical activities in other cultures.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Name	Description
PE.912.C.2.7:	Evaluate the effectiveness of specific warm-up and cool-down activities.
PE.912.C.2.9:	Explain the precautions to be taken when exercising in extreme weather and/or environmental conditions. **Clarifications:** Some examples of precautions are hydration and appropriate attire.
PE.912.C.2.20:	Identify appropriate methods to resolve physical conflict.
PE.912.C.2.21:	Diagram, explain and justify the use of advanced offensive, defensive and transition strategies and tactics.
PE.912.C.2.23:	Apply appropriate technology and analyze data to evaluate, monitor and/or improve performance.
PE.912.C.2.24:	Analyze the mechanical principles as they apply to specific course activities. **Clarifications:** Some examples are balance, force and leverage.
PE.912.C.2.25:	Analyze and evaluate the risks, safety procedures, rules and equipment associated with specific course activities.
PE.912.C.2.26:	Evaluate skill patterns of self and/or partner by detecting and correcting mechanical errors.
PE.912.C.2.27:	Compare and contrast how movement skills from one physical activity can be transferred and used in other physical activities. **Clarifications:** Some examples are volleyball and tennis serve, surfing and skate boarding.
PE.912.C.2.28:	Interpret and apply the rules associated with specific course activities.
PE.912.L.3.3:	Identify a variety of activities that promote effective stress management.
PE.912.L.3.6:	Identify risks and safety factors that may affect physical activity throughout life.
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.
PE.912.M.1.10:	Apply sport specific skills in simulation and in real-life applications. **Clarifications:** An example of a simulation is a practice setting or lead up activity. An example of a real-life application is a game or performance setting.
PE.912.M.1.20:	Perform complex combinations and sequences demonstrating smooth transitions while alone, with a partner or in a small group.
PE.912.M.1.22:	Demonstrate proficiency in advanced combinations of motor skills for a variety of individual and dual sports.
PE.912.M.1.23:	Demonstrate proficiency of critical elements when striking with objects, implements or body parts.
PE.912.M.1.24:	Apply a combination of complex movement patterns in a game setting.
PE.912.M.1.25:	Apply appropriate speed and generation of force when distance running, sprinting, throwing, jumping, striking or kicking.
PE.912.M.1.26:	Analyze and apply offensive, defensive and transition strategies and tactics to reflect a higher order of thinking. **Clarifications:** An example is placing a shot in an open area away from opponent.
PE.912.M.1.32:	Apply sport specific skills in a variety of game settings.
PE.912.M.1.33:	Practice complex motor activities in order to improve performance.
PE.912.M.1.35:	Select proper equipment and apply all appropriate safety procedures necessary for participation.
PE.912.R.5.3:	Demonstrate sportsmanship during game situations. **Clarifications:** Some examples are controlling emotions, resolving conflicts, respecting opponents and officials, and accepting both victory and defeat.
PE.912.R.5.4:	Maintain appropriate personal, social and ethical behavior while participating in a variety of physical activities. **Clarifications:** Some examples are respecting teammates, opponents and officials, and accepting both victory and defeat.
PE.912.R.5.5:	Demonstrate appropriate etiquette, care of equipment, respect for facilities and safe behaviors while participating in a variety of physical activities.
PE.912.R.6.1:	Discuss opportunities for participation in a variety of physical activities outside of the school setting that contribute to personal enjoyment and the attainment or maintenance of a healthy lifestyle.
PE.912.R.6.3:	Analyze the roles of games, sports and/or physical activities in other cultures.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.
MAFS.912.S-ID.1.2:	Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★ **Clarifications:**

	In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

Name	Description
PE.912.C.2.20:	Identify appropriate methods to resolve physical conflict.
PE.912.C.2.25:	Analyze and evaluate the risks, safety procedures, rules and equipment associated with specific course activities.
PE.912.L.3.3:	Identify a variety of activities that promote effective stress management.
PE.912.L.3.6:	Identify risks and safety factors that may affect physical activity throughout life.
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.
PE.912.M.1.12:	Select and perform complex movements using a variety of equipment which lead to improved or maintained muscular strength and endurance. **Clarifications:** An example is performing plyometrics.
PE.912.M.1.15:	Select and apply sport/activity specific warm-up and cool-down techniques.
PE.912.M.1.16:	Apply the principles of training and conditioning to accommodate individual needs and strengths. **Clarifications:** Some examples of training principles are overload, specificity and progression.
PE.912.M.1.19:	Use correct body alignment, strength, flexibility and coordination in the performance of technical movements.
PE.912.M.1.20:	Perform complex combinations and sequences demonstrating smooth transitions while alone, with a partner or in a small group.
PE.912.M.1.29:	Demonstrate proficiency in self-defense movement skills.
PE.912.M.1.30:	Combine and apply movement patterns from simple to complex.
PE.912.R.5.1:	Describe ways to act independently of peer pressure during physical activities.
PE.912.R.5.3:	Demonstrate sportsmanship during game situations. **Clarifications:** Some examples are controlling emotions, resolving conflicts, respecting opponents and officials, and accepting both victory and defeat.
PE.912.R.5.4:	Maintain appropriate personal, social and ethical behavior while participating in a variety of physical activities. **Clarifications:** Some examples are respecting teammates, opponents and officials, and accepting both victory and defeat.
PE.912.R.5.5:	Demonstrate appropriate etiquette, care of equipment, respect for facilities and safe behaviors while participating in a variety of physical activities.
PE.912.R.6.2:	Analyze physical activities from which benefits can be derived. **Clarifications:** Some examples of potential benefits are physical, mental, emotional and social.
LAFS.910.L.3.6:	Acquire and use accurately general academic and domain-specific words and phrases, sufficient for reading, writing, speaking, and listening at the college and career readiness level; demonstrate independence in gathering vocabulary knowledge when considering a word or phrase important to comprehension or expression.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
MAFS.912.S-MD.2.7:	Analyze decisions and strategies using probability concepts (e.g., product testing, medical testing, pulling a hockey goalie at the end of a game). ★

General Course Information and Notes

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 9 to 12 and Adult Education Courses > **Subject:** Physical Education > **SubSubject:** Individual and Dual > **Abbreviated Title:** SELF DEFENSE

Number of Credits: Half credit (.5)

Course Length: Semester (S)

Course Type: Core Academic Course

Course Level: 2

Course Status: Draft - Course Pending Approval

Grade Level(s): 9,10,11,12

Graduation Requirement: Physical Education

Educator Certifications

Physical Education (Grades 6-12)
Physical Education (Elementary and Secondary Grades K-12)

Recreational Activities (#1502470) 2015 - 2022 (current)

Course Standards

Name	Description
PE.912.C.2.9:	Explain the precautions to be taken when exercising in extreme weather and/or environmental conditions. **Clarifications:** Some examples of precautions are hydration and appropriate attire.
PE.912.C.2.10:	Analyze long-term benefits of regularly participating in physical activity.
PE.912.C.2.23:	Apply appropriate technology and analyze data to evaluate, monitor and/or improve performance.
PE.912.C.2.25:	Analyze and evaluate the risks, safety procedures, rules and equipment associated with specific course activities.
PE.912.C.2.26:	Evaluate skill patterns of self and/or partner by detecting and correcting mechanical errors.
PE.912.C.2.28:	Interpret and apply the rules associated with specific course activities.
PE.912.L.3.2:	Participate in a variety of activities that promote the health-related components of fitness. **Clarifications:** The health-related components of fitness are cardiorespiratory endurance, muscular strength, muscular endurance, flexibility and body composition.
PE.912.L.3.3:	Identify a variety of activities that promote effective stress management.
PE.912.L.3.4:	Identify the in-school opportunities for participation in a variety of physical activities.
PE.912.L.3.5:	Identify the community opportunities for participation in a variety of physical activities.
PE.912.M.1.1:	Demonstrate critical elements of basic skills relating to aquatics. **Clarifications:** Some examples are use of swim strokes, use of mask and fins and use of emergency safety equipment.
PE.912.M.1.9:	Demonstrate complex skills and advanced rhythmic movements in dance. **Clarifications:** Some examples are line, hip-hop, country and folk.
PE.912.M.1.15:	Select and apply sport/activity specific warm-up and cool-down techniques.
PE.912.M.1.28:	Apply strategies and tactics in a variety of outdoor pursuits.
PE.912.M.1.31:	Demonstrate advanced offensive, defensive and transition strategies and tactics.
PE.912.M.1.32:	Apply sport specific skills in a variety of game settings.
PE.912.R.5.2:	Develop strategies for including persons of diverse backgrounds and abilities while participating in a variety of physical activities.
PE.912.R.5.3:	Demonstrate sportsmanship during game situations. **Clarifications:** Some examples are controlling emotions, resolving conflicts, respecting opponents and officials, and accepting both victory and defeat.
PE.912.R.5.4:	Maintain appropriate personal, social and ethical behavior while participating in a variety of physical activities. **Clarifications:** Some examples are respecting teammates, opponents and officials, and accepting both victory and defeat.
PE.912.R.5.5:	Demonstrate appropriate etiquette, care of equipment, respect for facilities and safe behaviors while participating in a variety of physical activities.
PE.912.R.6.1:	Discuss opportunities for participation in a variety of physical activities outside of the school setting that contribute to personal enjoyment and the attainment or maintenance of a healthy lifestyle.
PE.912.R.6.2:	Analyze physical activities from which benefits can be derived. **Clarifications:** Some examples of potential benefits are physical, mental, emotional and social.
PE.912.R.6.3:	Analyze the roles of games, sports and/or physical activities in other cultures.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Care and Prevention of Athletic Injuries (#1502490) 2015 - 2022 (current)

Course Standards

Name	Description
PE.912.C.2.7:	Evaluate the effectiveness of specific warm-up and cool-down activities.
PE.912.C.2.8:	Differentiate between the three different types of heat illnesses associated with fluid loss. **Clarifications:** The three types of heat illnesses are heat cramps, heat exhaustion and heat stroke.
PE.912.C.2.9:	Explain the precautions to be taken when exercising in extreme weather and/or environmental conditions. **Clarifications:** Some examples of precautions are hydration and appropriate attire.
PE.912.C.2.10:	Analyze long-term benefits of regularly participating in physical activity.
PE.912.C.2.11:	Explain how each of the health-related components of fitness are improved through the application of training principles. **Clarifications:** The health-related components of fitness are cardiorespiratory endurance, muscular strength, muscular endurance, flexibility and body composition.
PE.912.C.2.17:	Assess physiological effects of exercise during and after physical activity. **Clarifications:** Some examples are breathing, resting heart rate and blood pressure.
PE.912.C.2.23:	Apply appropriate technology and analyze data to evaluate, monitor and/or improve performance.
PE.912.C.2.25:	Analyze and evaluate the risks, safety procedures, rules and equipment associated with specific course activities.
PE.912.C.2.26:	Evaluate skill patterns of self and/or partner by detecting and correcting mechanical errors.
PE.912.L.3.6:	Identify risks and safety factors that may affect physical activity throughout life.
PE.912.L.4.6:	Identify health-related problems associated with low levels of cardiorespiratory endurance, muscular strength and endurance, flexibility and body composition.
PE.912.M.1.14:	Utilize technology to assess, enhance and maintain health and skill-related fitness levels. **Clarifications:** Some examples of technology are Excel spreadsheets or web based programs to chart or log activities, heart rate monitors, videotapes or digital cameras.
PE.912.M.1.16:	Apply the principles of training and conditioning to accommodate individual needs and strengths. **Clarifications:** Some examples of training principles are overload, specificity and progression.
PE.912.M.1.17:	Demonstrate basic cardiopulmonary resuscitation (CPR) procedures.
PE.912.M.1.34:	Demonstrate use of the mechanical principles as they apply to specific course activities. **Clarifications:** Some examples are balance, force and leverage.
PE.912.M.1.35:	Select proper equipment and apply all appropriate safety procedures necessary for participation.
PE.912.R.5.4:	Maintain appropriate personal, social and ethical behavior while participating in a variety of physical activities. **Clarifications:** Some examples are respecting teammates, opponents and officials, and accepting both victory and defeat.
PE.912.R.5.5:	Demonstrate appropriate etiquette, care of equipment, respect for facilities and safe behaviors while participating in a variety of physical activities.
PE.912.R.6.3:	Analyze the roles of games, sports and/or physical activities in other cultures.
LAFS.1112.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics.
LAFS.910.L.3.4:	Determine or clarify the meaning of unknown and multiple-meaning words and phrases based on *grades 9–10 reading and content*, choosing flexibly from a range of strategies. a. Use context (e.g., the overall meaning of a sentence, paragraph, or text; a word's position or function in a sentence) as a clue to the meaning of a word or phrase. b. Identify and correctly use patterns of word changes that indicate different meanings or parts of speech (e.g., *analyze, analysis, analytical; advocate, advocacy*). c. Consult general and specialized reference materials (e.g., dictionaries, glossaries, thesauruses), both print and digital, to find the pronunciation of a word or determine or clarify its precise meaning, its part of speech, or its etymology. d. Verify the preliminary determination of the meaning of a word or phrase (e.g., by checking the inferred meaning in context or in a dictionary).
LAFS.910.WHST.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibly and dynamically.
	Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★

MAFS.912.S-ID.1.2:	**Clarifications:** In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.
MAFS.912.S-MD.2.7:	Analyze decisions and strategies using probability concepts (e.g., product testing, medical testing, pulling a hockey goalie at the end of a game). ★
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

Sports Officiating (#1502500) 2015 - 2022 (current)

Course Standards

Name	Description
PE.912.C.2.20:	Identify appropriate methods to resolve physical conflict.
PE.912.C.2.23:	Apply appropriate technology and analyze data to evaluate, monitor and/or improve performance.
PE.912.C.2.25:	Analyze and evaluate the risks, safety procedures, rules and equipment associated with specific course activities.
PE.912.C.2.26:	Evaluate skill patterns of self and/or partner by detecting and correcting mechanical errors.
PE.912.L.3.3:	Identify a variety of activities that promote effective stress management.
PE.912.L.3.4:	Identify the in-school opportunities for participation in a variety of physical activities.
PE.912.L.3.5:	Identify the community opportunities for participation in a variety of physical activities.
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.
PE.912.M.1.10:	Apply sport specific skills in simulation and in real-life applications. **Clarifications:** An example of a simulation is a practice setting or lead up activity. An example of a real-life application is a game or performance setting.
PE.912.M.1.15:	Select and apply sport/activity specific warm-up and cool-down techniques.
PE.912.M.1.35:	Select proper equipment and apply all appropriate safety procedures necessary for participation.
PE.912.R.5.1:	Describe ways to act independently of peer pressure during physical activities.
PE.912.R.5.3:	Demonstrate sportsmanship during game situations. **Clarifications:** Some examples are controlling emotions, resolving conflicts, respecting opponents and officials, and accepting both victory and defeat.
PE.912.R.5.4:	Maintain appropriate personal, social and ethical behavior while participating in a variety of physical activities. **Clarifications:** Some examples are respecting teammates, opponents and officials, and accepting both victory and defeat.
PE.912.R.5.5:	Demonstrate appropriate etiquette, care of equipment, respect for facilities and safe behaviors while participating in a variety of physical activities.
PE.912.R.6.3:	Analyze the roles of games, sports and/or physical activities in other cultures.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.

PE.912.R.6.3:	Analyze the roles of games, sports and/or physical activities in other cultures.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.
MAFS.912.S-ID.1.2:	Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★ **Clarifications:**

	In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

General Course Information and Notes

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

Abbreviated Title: TRACK & FIELD

Number of Credits: Half credit (.5)

Course Length: Semester (S)

Course Type: Core Academic Course

Course Level: 2

Course Status: Draft - Course Pending Approval

Grade Level(s): 9,10,11,12

Graduation Requirement: Physical Education

Educator Certifications

Physical Education (Grades 6-12)
Physical Education (Elementary and Secondary Grades K-12)

Basketball (#1503310) 2015 - 2022 (current)

Course Standards

Name	Description
PE.912.C.2.20:	Identify appropriate methods to resolve physical conflict.
PE.912.C.2.21:	Diagram, explain and justify the use of advanced offensive, defensive and transition strategies and tactics.
PE.912.C.2.22:	Explain the skill-related components of fitness and how they enhance performance levels. **Clarifications:** The skill-related components of fitness are speed, coordination, balance, power, agility and reaction time.
PE.912.C.2.23:	Apply appropriate technology and analyze data to evaluate, monitor and/or improve performance.
PE.912.C.2.24:	Analyze the mechanical principles as they apply to specific course activities. **Clarifications:** Some examples are balance, force and leverage.
PE.912.C.2.25:	Analyze and evaluate the risks, safety procedures, rules and equipment associated with specific course activities.
PE.912.C.2.26:	Evaluate skill patterns of self and/or partner by detecting and correcting mechanical errors.
PE.912.C.2.28:	Interpret and apply the rules associated with specific course activities.
PE.912.L.3.4:	Identify the in-school opportunities for participation in a variety of physical activities.
PE.912.L.3.5:	Identify the community opportunities for participation in a variety of physical activities.
PE.912.L.3.6:	Identify risks and safety factors that may affect physical activity throughout life.
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.
PE.912.M.1.10:	Apply sport specific skills in simulation and in real-life applications. **Clarifications:** An example of a simulation is a practice setting or lead up activity. An example of a real-life application is a game or performance setting.
PE.912.M.1.15:	Select and apply sport/activity specific warm-up and cool-down techniques.
PE.912.M.1.24:	Apply a combination of complex movement patterns in a game setting.
PE.912.M.1.25:	Apply appropriate speed and generation of force when distance running, sprinting, throwing, jumping, striking or kicking.
PE.912.M.1.26:	Analyze and apply offensive, defensive and transition strategies and tactics to reflect a higher order of thinking. **Clarifications:** An example is placing a shot in an open area away from opponent.
PE.912.M.1.30:	Combine and apply movement patterns from simple to complex.
PE.912.M.1.31:	Demonstrate advanced offensive, defensive and transition strategies and tactics.
PE.912.M.1.32:	Apply sport specific skills in a variety of game settings.
PE.912.M.1.33:	Practice complex motor activities in order to improve performance.
PE.912.M.1.34:	Demonstrate use of the mechanical principles as they apply to specific course activities. **Clarifications:** Some examples are balance, force and leverage.
PE.912.M.1.35:	Select proper equipment and apply all appropriate safety procedures necessary for participation.
PE.912.R.5.2:	Develop strategies for including persons of diverse backgrounds and abilities while participating in a variety of physical activities.
PE.912.R.5.3:	Demonstrate sportsmanship during game situations. **Clarifications:** Some examples are controlling emotions, resolving conflicts, respecting opponents and officials, and accepting both victory and defeat.
PE.912.R.5.4:	Maintain appropriate personal, social and ethical behavior while participating in a variety of physical activities. **Clarifications:** Some examples are respecting teammates, opponents and officials, and accepting both victory and defeat.
PE.912.R.5.5:	Demonstrate appropriate etiquette, care of equipment, respect for facilities and safe behaviors while participating in a variety of physical activities.
PE.912.R.6.3:	Analyze the roles of games, sports and/or physical activities in other cultures.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively

incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions.

d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.

General Course Information and Notes

VERSION DESCRIPTION

The purpose of this course is to provide more in-depth instruction of the fundamental skills, tactics, rules and etiquette in basketball. Introduction to systems of play will be included to enhance the student's understanding. Advanced skills and drills which directly affect student's physical and cognitive abilities will be covered. Students will participate in advanced individual and team techniques in relationship to basketball strategy. Participate in course activities will continue to enhance healthy behaviors that influence students to participate in physical activities throughout their life.

Content could include but not be limited to:

- fundamental basketball skills (passing, dribbling, shooting, rebounding, and defense).
- instruction in principles of motion
- basketball history
- rules and terminology
- offensive strategies (motion offense, spacing, screening, pick and roll)
- man-to-man defense (positioning, fighting screens, taking charges, help)
- zone defenses (1-2-2, 2-1-2, 2-3, Box and 1, Diamond and 1)
- using data and statistical analysis to enhance game play

GENERAL NOTES

Fitness concepts, as they relate to basketball, will continue to be taught as part of the overall physical education curriculum. Florida Standards for English/Language Arts and Mathematics standards have been aligned to this course. Literacy standards and mathematical practices will be integrated where appropriate.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

VERSION REQUIREMENTS

Students enrolled in this course should have successfully completed Basketball 1. These requirements include, but are not limited to, the benchmarks that are most relevant to this course. Appropriate ELA and Mathematics standards are also included to ensure a comprehensive educational experience.

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

GENERAL INFORMATION

Course Number: 1503330

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 9 to 12 and Adult Education Courses > **Subject:** Physical Education > **SubSubject:** Team >

Abbreviated Title: SOFTBALL

Number of Credits: Half credit (.5)

Course Length: Semester (S)

Course Type: Core Academic Course

Course Level: 2

Course Status: Draft - Course Pending Approval

Grade Level(s): 9,10,11,12

Graduation Requirement: Physical Education

Educator Certifications

Physical Education (Grades 6-12)
Physical Education (Elementary and Secondary Grades K-12)

Team Sports 1 (#1503350) 2015 - 2022 (current)

Course Standards

Name	Description
PE.912.C.2.9:	Explain the precautions to be taken when exercising in extreme weather and/or environmental conditions. **Clarifications:** Some examples of precautions are hydration and appropriate attire.
PE.912.C.2.20:	Identify appropriate methods to resolve physical conflict.
PE.912.C.2.21:	Diagram, explain and justify the use of advanced offensive, defensive and transition strategies and tactics.
PE.912.C.2.23:	Apply appropriate technology and analyze data to evaluate, monitor and/or improve performance.
PE.912.C.2.25:	Analyze and evaluate the risks, safety procedures, rules and equipment associated with specific course activities.
PE.912.C.2.28:	Interpret and apply the rules associated with specific course activities.
PE.912.L.3.4:	Identify the in-school opportunities for participation in a variety of physical activities.
PE.912.L.3.5:	Identify the community opportunities for participation in a variety of physical activities.
PE.912.L.3.6:	Identify risks and safety factors that may affect physical activity throughout life.
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.
PE.912.M.1.10:	Apply sport specific skills in simulation and in real-life applications. **Clarifications:** An example of a simulation is a practice setting or lead up activity. An example of a real-life application is a game or performance setting.
PE.912.M.1.15:	Select and apply sport/activity specific warm-up and cool-down techniques.
PE.912.M.1.23:	Demonstrate proficiency of critical elements when striking with objects, implements or body parts.
PE.912.M.1.31:	Demonstrate advanced offensive, defensive and transition strategies and tactics.
PE.912.M.1.32:	Apply sport specific skills in a variety of game settings.
PE.912.M.1.33:	Practice complex motor activities in order to improve performance.
PE.912.M.1.35:	Select proper equipment and apply all appropriate safety procedures necessary for participation.
PE.912.R.5.2:	Develop strategies for including persons of diverse backgrounds and abilities while participating in a variety of physical activities.
PE.912.R.5.3:	Demonstrate sportsmanship during game situations. **Clarifications:** Some examples are controlling emotions, resolving conflicts, respecting opponents and officials, and accepting both victory and defeat.
PE.912.R.5.4:	Maintain appropriate personal, social and ethical behavior while participating in a variety of physical activities. **Clarifications:** Some examples are respecting teammates, opponents and officials, and accepting both victory and defeat.
PE.912.R.5.5:	Demonstrate appropriate etiquette, care of equipment, respect for facilities and safe behaviors while participating in a variety of physical activities.
PE.912.R.6.1:	Discuss opportunities for participation in a variety of physical activities outside of the school setting that contribute to personal enjoyment and the attainment or maintenance of a healthy lifestyle.
PE.912.R.6.3:	Analyze the roles of games, sports and/or physical activities in other cultures.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.
MAFS.912.S-ID.1.2:	Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★ **Clarifications:** In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

General Course Information and Notes

VERSION DESCRIPTION

The purpose of this course is to develop the physical skills necessary to be competent in many forms of movement, knowledge of team sports concepts such as offensive and defensive strategies and tactics, and appropriate social behaviors within a team or group setting. The integration of fitness concepts throughout the content is critical to the

success of this course.

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

Aerobics 1 (#1503400) 2015 - 2022 (current)

Course Standards

Name	Description
PE.912.C.2.2:	Apply terminology and etiquette in dance.
PE.912.C.2.5:	Analyze the relationship between music and dance.
PE.912.C.2.15:	Calculate individual target heart-rate zone and analyze how to adjust intensity level to stay within the desired range.
PE.912.C.2.16:	Explain the methods of monitoring levels of intensity during aerobic activity. **Clarifications:** Some examples are a talk test, rate of perceived exertion and checking one's heart rate/pulse.
PE.912.C.2.23:	Apply appropriate technology and analyze data to evaluate, monitor and/or improve performance.
PE.912.L.3.1:	Participate in a variety of physical activities to meet the recommended number of minutes of moderate to vigorous physical activity beyond physical education on five or more days of the week.
PE.912.L.3.2:	Participate in a variety of activities that promote the health-related components of fitness. **Clarifications:** The health-related components of fitness are cardiorespiratory endurance, muscular strength, muscular endurance, flexibility and body composition.
PE.912.L.3.3:	Identify a variety of activities that promote effective stress management.
PE.912.L.3.6:	Identify risks and safety factors that may affect physical activity throughout life.
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.
PE.912.M.1.8:	Design and perform a creative movement sequence while working with a small or large group, with or without equipment/props.
PE.912.M.1.14:	Utilize technology to assess, enhance and maintain health and skill-related fitness levels. **Clarifications:** Some examples of technology are Excel spreadsheets or web based programs to chart or log activities, heart rate monitors, videotapes or digital cameras.
PE.912.M.1.15:	Select and apply sport/activity specific warm-up and cool-down techniques.
PE.912.M.1.35:	Select proper equipment and apply all appropriate safety procedures necessary for participation.
PE.912.R.5.2:	Develop strategies for including persons of diverse backgrounds and abilities while participating in a variety of physical activities.
PE.912.R.5.4:	Maintain appropriate personal, social and ethical behavior while participating in a variety of physical activities. **Clarifications:** Some examples are respecting teammates, opponents and officials, and accepting both victory and defeat.
PE.912.R.5.5:	Demonstrate appropriate etiquette, care of equipment, respect for facilities and safe behaviors while participating in a variety of physical activities.
PE.912.R.6.3:	Analyze the roles of games, sports and/or physical activities in other cultures.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Name	Description
PE.912.C.2.12:	Compare and contrast aerobic versus anaerobic activities.
PE.912.C.2.15:	Calculate individual target heart-rate zone and analyze how to adjust intensity level to stay within the desired range.
PE.912.C.2.16:	Explain the methods of monitoring levels of intensity during aerobic activity. **Clarifications:** Some examples are a talk test, rate of perceived exertion and checking one's heart rate/pulse.
PE.912.C.2.17:	Assess physiological effects of exercise during and after physical activity. **Clarifications:** Some examples are breathing, resting heart rate and blood pressure.
PE.912.C.2.19:	Choreograph complex sequences individually, with a partner or in a small group.
PE.912.C.2.23:	Apply appropriate technology and analyze data to evaluate, monitor and/or improve performance.
PE.912.L.3.1:	Participate in a variety of physical activities to meet the recommended number of minutes of moderate to vigorous physical activity beyond physical education on five or more days of the week.
PE.912.L.3.2:	Participate in a variety of activities that promote the health-related components of fitness. **Clarifications:** The health-related components of fitness are cardiorespiratory endurance, muscular strength, muscular endurance, flexibility and body composition.
PE.912.L.3.3:	Identify a variety of activities that promote effective stress management.
PE.912.L.3.4:	Identify the in-school opportunities for participation in a variety of physical activities.
PE.912.L.3.5:	Identify the community opportunities for participation in a variety of physical activities.
PE.912.L.3.6:	Identify risks and safety factors that may affect physical activity throughout life.
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.
PE.912.M.1.6:	Select appropriate music for dance forms and choreograph dance movements to music.
PE.912.M.1.7:	Perform advanced dance sequences from a variety of dances accurately. **Clarifications:** Some examples of dances are hip-hop, social, step and line.
PE.912.M.1.8:	Design and perform a creative movement sequence while working with a small or large group, with or without equipment/props.
PE.912.M.1.9:	Demonstrate complex skills and advanced rhythmic movements in dance. **Clarifications:** Some examples are line, hip-hop, country and folk.
PE.912.M.1.13:	Perform a student-designed cardiorespiratory enhancing workout.
PE.912.M.1.14:	Utilize technology to assess, enhance and maintain health and skill-related fitness levels. **Clarifications:** Some examples of technology are Excel spreadsheets or web based programs to chart or log activities, heart rate monitors, videotapes or digital cameras.
PE.912.M.1.30:	Combine and apply movement patterns from simple to complex.
PE.912.M.1.35:	Select proper equipment and apply all appropriate safety procedures necessary for participation.
PE.912.R.5.2:	Develop strategies for including persons of diverse backgrounds and abilities while participating in a variety of physical activities.
PE.912.R.5.4:	Maintain appropriate personal, social and ethical behavior while participating in a variety of physical activities. **Clarifications:** Some examples are respecting teammates, opponents and officials, and accepting both victory and defeat.
PE.912.R.5.5:	Demonstrate appropriate etiquette, care of equipment, respect for facilities and safe behaviors while participating in a variety of physical activities.
PE.912.R.6.3:	Analyze the roles of games, sports and/or physical activities in other cultures.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Name	Description
PE.912.C.2.7:	Evaluate the effectiveness of specific warm-up and cool-down activities.
PE.912.C.2.12:	Compare and contrast aerobic versus anaerobic activities.
PE.912.C.2.17:	Assess physiological effects of exercise during and after physical activity. **Clarifications:** Some examples are breathing, resting heart rate and blood pressure.
PE.912.C.2.19:	Choreograph complex sequences individually, with a partner or in a small group.
PE.912.C.2.23:	Apply appropriate technology and analyze data to evaluate, monitor and/or improve performance.
PE.912.C.2.25:	Analyze and evaluate the risks, safety procedures, rules and equipment associated with specific course activities.
PE.912.L.3.1:	Participate in a variety of physical activities to meet the recommended number of minutes of moderate to vigorous physical activity beyond physical education on five or more days of the week.
PE.912.L.3.2:	Participate in a variety of activities that promote the health-related components of fitness. **Clarifications:** The health-related components of fitness are cardiorespiratory endurance, muscular strength, muscular endurance, flexibility and body composition.
PE.912.L.3.3:	Identify a variety of activities that promote effective stress management.
PE.912.L.3.4:	Identify the in-school opportunities for participation in a variety of physical activities.
PE.912.L.3.5:	Identify the community opportunities for participation in a variety of physical activities.
PE.912.L.3.6:	Identify risks and safety factors that may affect physical activity throughout life.
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.
PE.912.M.1.6:	Select appropriate music for dance forms and choreograph dance movements to music.
PE.912.M.1.7:	Perform advanced dance sequences from a variety of dances accurately. **Clarifications:** Some examples of dances are hip-hop, social, step and line.
PE.912.M.1.8:	Design and perform a creative movement sequence while working with a small or large group, with or without equipment/props.
PE.912.M.1.9:	Demonstrate complex skills and advanced rhythmic movements in dance. **Clarifications:** Some examples are line, hip-hop, country and folk.
PE.912.M.1.13:	Perform a student-designed cardiorespiratory enhancing workout.
PE.912.M.1.30:	Combine and apply movement patterns from simple to complex.
PE.912.M.1.35:	Select proper equipment and apply all appropriate safety procedures necessary for participation.
PE.912.R.5.2:	Develop strategies for including persons of diverse backgrounds and abilities while participating in a variety of physical activities.
PE.912.R.5.4:	Maintain appropriate personal, social and ethical behavior while participating in a variety of physical activities. **Clarifications:** Some examples are respecting teammates, opponents and officials, and accepting both victory and defeat.
PE.912.R.5.5:	Demonstrate appropriate etiquette, care of equipment, respect for facilities and safe behaviors while participating in a variety of physical activities.
PE.912.R.6.3:	Analyze the roles of games, sports and/or physical activities in other cultures.
MAFS.912.A-REI.4.10:	Understand that the graph of an equation in two variables is the set of all its solutions plotted in the coordinate plane, often forming a curve (which could be a line).
MAFS.912.S-ID.1.2:	Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★ **Clarifications:** In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.

General Course Information and Notes

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

GENERAL INFORMATION

Course Number: 1503420

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 9 to 12 and Adult Education Courses > **Subject:** Physical Education > **SubSubject:** Fitness >

Abbreviated Title: AEROBICS 3

Number of Credits: Half credit (.5)

Course Length: Semester (S)

Course Type: Core Academic Course

Course Level: 2

Course Status: Draft - Course Pending Approval

Grade Level(s): 9,10,11,12

Graduation Requirement: Physical Education

Educator Certifications

Physical Education (Grades 6-12)
Physical Education (Elementary and Secondary Grades K-12)

Golf 1 (#1504400) 2015 - 2022 (current)

Course Standards

Name	Description
PE.912.C.2.23:	Apply appropriate technology and analyze data to evaluate, monitor and/or improve performance.
PE.912.C.2.24:	Analyze the mechanical principles as they apply to specific course activities. **Clarifications:** Some examples are balance, force and leverage.
PE.912.C.2.26:	Evaluate skill patterns of self and/or partner by detecting and correcting mechanical errors.
PE.912.C.2.28:	Interpret and apply the rules associated with specific course activities.
PE.912.L.3.3:	Identify a variety of activities that promote effective stress management.
PE.912.L.3.4:	Identify the in-school opportunities for participation in a variety of physical activities.
PE.912.L.3.5:	Identify the community opportunities for participation in a variety of physical activities.
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.
PE.912.M.1.10:	Apply sport specific skills in simulation and in real-life applications. **Clarifications:** An example of a simulation is a practice setting or lead up activity. An example of a real-life application is a game or performance setting.
PE.912.M.1.15:	Select and apply sport/activity specific warm-up and cool-down techniques.
PE.912.M.1.23:	Demonstrate proficiency of critical elements when striking with objects, implements or body parts.
PE.912.M.1.25:	Apply appropriate speed and generation of force when distance running, sprinting, throwing, jumping, striking or kicking.
PE.912.M.1.32:	Apply sport specific skills in a variety of game settings.
PE.912.M.1.33:	Practice complex motor activities in order to improve performance.
PE.912.M.1.34:	Demonstrate use of the mechanical principles as they apply to specific course activities. **Clarifications:** Some examples are balance, force and leverage.
PE.912.M.1.35:	Select proper equipment and apply all appropriate safety procedures necessary for participation.
PE.912.R.5.3:	Demonstrate sportsmanship during game situations. **Clarifications:** Some examples are controlling emotions, resolving conflicts, respecting opponents and officials, and accepting both victory and defeat.
PE.912.R.5.4:	Maintain appropriate personal, social and ethical behavior while participating in a variety of physical activities. **Clarifications:** Some examples are respecting teammates, opponents and officials, and accepting both victory and defeat.
PE.912.R.5.5:	Demonstrate appropriate etiquette, care of equipment, respect for facilities and safe behaviors while participating in a variety of physical activities.
PE.912.R.6.3:	Analyze the roles of games, sports and/or physical activities in other cultures.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.
MAFS.912.S-ID.1.2:	Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★ **Clarifications:** In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

Course Standards

Name	Description
PE.912.C.2.9:	Explain the precautions to be taken when exercising in extreme weather and/or environmental conditions. **Clarifications:** Some examples of precautions are hydration and appropriate attire.
PE.912.C.2.23:	Apply appropriate technology and analyze data to evaluate, monitor and/or improve performance.
PE.912.C.2.26:	Evaluate skill patterns of self and/or partner by detecting and correcting mechanical errors.
PE.912.L.3.4:	Identify the in-school opportunities for participation in a variety of physical activities.
PE.912.L.3.5:	Identify the community opportunities for participation in a variety of physical activities.
PE.912.L.3.6:	Identify risks and safety factors that may affect physical activity throughout life.
PE.912.M.1.1:	Demonstrate critical elements of basic skills relating to aquatics. **Clarifications:** Some examples are use of swim strokes, use of mask and fins and use of emergency safety equipment.
PE.912.M.1.2:	Demonstrate proficiency in combination of motor skills related to aquatics. **Clarifications:** Some examples are rhythmic breathing, coordinated movements with arms and legs and body alignment while entering water.
PE.912.M.1.3:	Perform a basic water rescue, with or without equipment, without entering the water.
PE.912.M.1.10:	Apply sport specific skills in simulation and in real-life applications. **Clarifications:** An example of a simulation is a practice setting or lead up activity. An example of a real-life application is a game or performance setting.
PE.912.M.1.15:	Select and apply sport/activity specific warm-up and cool-down techniques.
PE.912.M.1.33:	Practice complex motor activities in order to improve performance.

PE.912.M.1.2:	Demonstrate proficiency in combination of motor skills related to aquatics. **Clarifications:** Some examples are rhythmic breathing, coordinated movements with arms and legs and body alignment while entering water.
PE.912.M.1.3:	Perform a basic water rescue, with or without equipment, without entering the water.
PE.912.M.1.4:	Perform refinement of one or more swim strokes to enhance efficiency, power and cardiorespiratory endurance in a variety of aquatics settings. **Clarifications:** Some examples of aquatic settings are a pool, a lake and open water.
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.
PE.912.M.1.10:	Apply sport specific skills in simulation and in real-life applications. **Clarifications:** An example of a simulation is a practice setting or lead up activity. An example of a real-life application is a game or performance setting.
PE.912.M.1.30:	Combine and apply movement patterns from simple to complex.
PE.912.M.1.33:	Practice complex motor activities in order to improve performance.
PE.912.M.1.34:	Demonstrate use of the mechanical principles as they apply to specific course activities. **Clarifications:** Some examples are balance, force and leverage.
PE.912.M.1.35:	Select proper equipment and apply all appropriate safety procedures necessary for participation.
PE.912.R.5.3:	Demonstrate sportsmanship during game situations. **Clarifications:** Some examples are controlling emotions, resolving conflicts, respecting opponents and officials, and accepting both victory and defeat.
PE.912.R.5.4:	Maintain appropriate personal, social and ethical behavior while participating in a variety of physical activities. **Clarifications:** Some examples are respecting teammates, opponents and officials, and accepting both victory and defeat.
PE.912.R.5.5:	Demonstrate appropriate etiquette, care of equipment, respect for facilities and safe behaviors while participating in a variety of physical activities.
PE.912.R.6.3:	Analyze the roles of games, sports and/or physical activities in other cultures.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Water Safety (#1504490) 2015 - 2022 (current)

Course Standards

Name	Description
PE.912.C.2.7:	Evaluate the effectiveness of specific warm-up and cool-down activities.
PE.912.C.2.8:	Differentiate between the three different types of heat illnesses associated with fluid loss. **Clarifications:** The three types of heat illnesses are heat cramps, heat exhaustion and heat stroke.
PE.912.C.2.9:	Explain the precautions to be taken when exercising in extreme weather and/or environmental conditions. **Clarifications:** Some examples of precautions are hydration and appropriate attire.
PE.912.C.2.20:	Identify appropriate methods to resolve physical conflict.
PE.912.C.2.24:	Analyze the mechanical principles as they apply to specific course activities. **Clarifications:** Some examples are balance, force and leverage.
PE.912.C.2.25:	Analyze and evaluate the risks, safety procedures, rules and equipment associated with specific course activities.
PE.912.C.2.26:	Evaluate skill patterns of self and/or partner by detecting and correcting mechanical errors.
PE.912.L.3.3:	Identify a variety of activities that promote effective stress management.
PE.912.L.3.4:	Identify the in-school opportunities for participation in a variety of physical activities.
PE.912.L.3.5:	Identify the community opportunities for participation in a variety of physical activities.
PE.912.L.3.6:	Identify risks and safety factors that may affect physical activity throughout life.
PE.912.M.1.1:	Demonstrate critical elements of basic skills relating to aquatics. **Clarifications:** Some examples are use of swim strokes, use of mask and fins and use of emergency safety equipment.
PE.912.M.1.2:	Demonstrate proficiency in combination of motor skills related to aquatics. **Clarifications:** Some examples are rhythmic breathing, coordinated movements with arms and legs and body alignment while entering water.
PE.912.M.1.3:	Perform a basic water rescue, with or without equipment, without entering the water.
PE.912.M.1.4:	Perform refinement of one or more swim strokes to enhance efficiency, power and cardiorespiratory endurance in a variety of aquatics settings. **Clarifications:** Some examples of aquatic settings are a pool, a lake and open water.
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.
PE.912.M.1.17:	Demonstrate basic cardiopulmonary resuscitation (CPR) procedures.
PE.912.M.1.33:	Practice complex motor activities in order to improve performance.
PE.912.M.1.34:	Demonstrate use of the mechanical principles as they apply to specific course activities. **Clarifications:** Some examples are balance, force and leverage.
PE.912.M.1.35:	Select proper equipment and apply all appropriate safety procedures necessary for participation.
PE.912.R.5.1:	Describe ways to act independently of peer pressure during physical activities.
PE.912.R.5.4:	Maintain appropriate personal, social and ethical behavior while participating in a variety of physical activities. **Clarifications:** Some examples are respecting teammates, opponents and officials, and accepting both victory and defeat.
PE.912.R.5.5:	Demonstrate appropriate etiquette, care of equipment, respect for facilities and safe behaviors while participating in a variety of physical activities.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.
MAFS.912.S-ID.1.2:	Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★ **Clarifications:** In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

Course Standards

Name	Description
PE.912.C.2.9:	Explain the precautions to be taken when exercising in extreme weather and/or environmental conditions. **Clarifications:** Some examples of precautions are hydration and appropriate attire.
PE.912.C.2.23:	Apply appropriate technology and analyze data to evaluate, monitor and/or improve performance.
PE.912.C.2.26:	Evaluate skill patterns of self and/or partner by detecting and correcting mechanical errors.
PE.912.C.2.28:	Interpret and apply the rules associated with specific course activities.
PE.912.L.3.4:	Identify the in-school opportunities for participation in a variety of physical activities.
PE.912.L.3.5:	Identify the community opportunities for participation in a variety of physical activities.
PE.912.L.3.6:	Identify risks and safety factors that may affect physical activity throughout life.
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.
PE.912.M.1.10:	Apply sport specific skills in simulation and in real-life applications. **Clarifications:** An example of a simulation is a practice setting or lead up activity. An example of a real-life application is a game or performance setting.
PE.912.M.1.22:	Demonstrate proficiency in advanced combinations of motor skills for a variety of individual and dual sports.
PE.912.M.1.23:	Demonstrate proficiency of critical elements when striking with objects, implements or body parts.
PE.912.M.1.24:	Apply a combination of complex movement patterns in a game setting.
PE.912.M.1.25:	Apply appropriate speed and generation of force when distance running, sprinting, throwing, jumping, striking or kicking.
PE.912.M.1.26:	Analyze and apply offensive, defensive and transition strategies and tactics to reflect a higher order of thinking. **Clarifications:** An example is placing a shot in an open area away from opponent.
PE.912.M.1.30:	Combine and apply movement patterns from simple to complex.
PE.912.M.1.31:	Demonstrate advanced offensive, defensive and transition strategies and tactics.
PE.912.M.1.32:	Apply sport specific skills in a variety of game settings.
PE.912.M.1.33:	Practice complex motor activities in order to improve performance.
PE.912.M.1.34:	Demonstrate use of the mechanical principles as they apply to specific course activities. **Clarifications:** Some examples are balance, force and leverage.
PE.912.M.1.35:	Select proper equipment and apply all appropriate safety procedures necessary for participation.
PE.912.R.5.3:	Demonstrate sportsmanship during game situations. **Clarifications:** Some examples are controlling emotions, resolving conflicts, respecting opponents and officials, and accepting both victory and defeat.
PE.912.R.5.4:	Maintain appropriate personal, social and ethical behavior while participating in a variety of physical activities. **Clarifications:** Some examples are respecting teammates, opponents and officials, and accepting both victory and defeat.
PE.912.R.5.5:	Demonstrate appropriate etiquette, care of equipment, respect for facilities and safe behaviors while participating in a variety of physical activities.
PE.912.R.6.3:	Analyze the roles of games, sports and/or physical activities in other cultures.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.
MAFS.912.S-ID.1.2:	Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★ **Clarifications:** In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

General Course Information and Notes

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

PE.912.M.1.10:	Apply sport specific skills in simulation and in real-life applications. **Clarifications:** An example of a simulation is a practice setting or lead up activity. An example of a real-life application is a game or performance setting.
PE.912.M.1.25:	Apply appropriate speed and generation of force when distance running, sprinting, throwing, jumping, striking or kicking.
PE.912.M.1.26:	Analyze and apply offensive, defensive and transition strategies and tactics to reflect a higher order of thinking. **Clarifications:** An example is placing a shot in an open area away from opponent.
PE.912.M.1.30:	Combine and apply movement patterns from simple to complex.
PE.912.M.1.31:	Demonstrate advanced offensive, defensive and transition strategies and tactics.
PE.912.M.1.32:	Apply sport specific skills in a variety of game settings.
PE.912.M.1.33:	Practice complex motor activities in order to improve performance.
PE.912.M.1.34:	Demonstrate use of the mechanical principles as they apply to specific course activities. **Clarifications:** Some examples are balance, force and leverage.
PE.912.M.1.35:	Select proper equipment and apply all appropriate safety procedures necessary for participation.
PE.912.R.5.3:	Demonstrate sportsmanship during game situations. **Clarifications:** Some examples are controlling emotions, resolving conflicts, respecting opponents and officials, and accepting both victory and defeat.
PE.912.R.5.4:	Maintain appropriate personal, social and ethical behavior while participating in a variety of physical activities. **Clarifications:** Some examples are respecting teammates, opponents and officials, and accepting both victory and defeat.
PE.912.R.5.5:	Demonstrate appropriate etiquette, care of equipment, respect for facilities and safe behaviors while participating in a variety of physical activities.
PE.912.R.6.3:	Analyze the roles of games, sports and/or physical activities in other cultures.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.
MAFS.912.S-ID.1.2:	Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★ **Clarifications:** In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

General Course Information and Notes

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 9 to 12 and Adult Education Courses > **Subject:** Physical Education > **SubSubject:** Team >

Abbreviated Title: VOLLEYBALL 2

Number of Credits: Half credit (.5)

Course Length: Semester (S)

Course Type: Core Academic Course

Course Level: 2

Course Status: Draft - Course Pending Approval

Grade Level(s): 9,10,11,12

Graduation Requirement: Physical Education

Educator Certifications

Physical Education (Grades 6-12)
Physical Education (Elementary and Secondary Grades K-12)

Volleyball 3 (#1505520) 2015 - 2022 (current)

Course Standards

Name	Description
PE.912.C.2.9:	Explain the precautions to be taken when exercising in extreme weather and/or environmental conditions. **Clarifications:** Some examples of precautions are hydration and appropriate attire.
PE.912.C.2.21:	Diagram, explain and justify the use of advanced offensive, defensive and transition strategies and tactics.
PE.912.C.2.23:	Apply appropriate technology and analyze data to evaluate, monitor and/or improve performance.
PE.912.C.2.25:	Analyze and evaluate the risks, safety procedures, rules and equipment associated with specific course activities.
PE.912.C.2.26:	Evaluate skill patterns of self and/or partner by detecting and correcting mechanical errors.
PE.912.C.2.28:	Interpret and apply the rules associated with specific course activities.
PE.912.L.3.3:	Identify a variety of activities that promote effective stress management.
PE.912.L.3.4:	Identify the in-school opportunities for participation in a variety of physical activities.
PE.912.L.3.5:	Identify the community opportunities for participation in a variety of physical activities.
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.
PE.912.M.1.10:	Apply sport specific skills in simulation and in real-life applications. **Clarifications:** An example of a simulation is a practice setting or lead up activity. An example of a real-life application is a game or performance setting.
PE.912.M.1.23:	Demonstrate proficiency of critical elements when striking with objects, implements or body parts.
PE.912.M.1.25:	Apply appropriate speed and generation of force when distance running, sprinting, throwing, jumping, striking or kicking.
PE.912.M.1.26:	Analyze and apply offensive, defensive and transition strategies and tactics to reflect a higher order of thinking. **Clarifications:** An example is placing a shot in an open area away from opponent.
PE.912.M.1.30:	Combine and apply movement patterns from simple to complex.
PE.912.M.1.32:	Apply sport specific skills in a variety of game settings.
PE.912.M.1.33:	Practice complex motor activities in order to improve performance.
PE.912.M.1.34:	Demonstrate use of the mechanical principles as they apply to specific course activities. **Clarifications:** Some examples are balance, force and leverage.
PE.912.M.1.35:	Select proper equipment and apply all appropriate safety procedures necessary for participation.
PE.912.R.5.3:	Demonstrate sportsmanship during game situations. **Clarifications:** Some examples are controlling emotions, resolving conflicts, respecting opponents and officials, and accepting both victory and defeat.
PE.912.R.5.4:	Maintain appropriate personal, social and ethical behavior while participating in a variety of physical activities. **Clarifications:** Some examples are respecting teammates, opponents and officials, and accepting both victory and defeat.
PE.912.R.5.5:	Demonstrate appropriate etiquette, care of equipment, respect for facilities and safe behaviors while participating in a variety of physical activities.
PE.912.R.6.3:	Analyze the roles of games, sports and/or physical activities in other cultures.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.
MAFS.912.S-ID.1.2:	Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★ **Clarifications:** In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

Name	Description
PE.912.C.2.24:	Analyze the mechanical principles as they apply to specific course activities. **Clarifications:** Some examples are balance, force and leverage.
PE.912.C.2.28:	Interpret and apply the rules associated with specific course activities.
PE.912.L.3.2:	Participate in a variety of activities that promote the health-related components of fitness. **Clarifications:** The health-related components of fitness are cardiorespiratory endurance, muscular strength, muscular endurance, flexibility and body composition.
PE.912.M.1.5:	Apply strategies for self improvement based on individual strengths and needs.
PE.912.M.1.15:	Select and apply sport/activity specific warm-up and cool-down techniques.
PE.912.M.1.19:	Use correct body alignment, strength, flexibility and coordination in the performance of technical movements.
PE.912.M.1.31:	Demonstrate advanced offensive, defensive and transition strategies and tactics.
PE.912.M.1.32:	Apply sport specific skills in a variety of game settings.
PE.912.M.1.34:	Demonstrate use of the mechanical principles as they apply to specific course activities. **Clarifications:** Some examples are balance, force and leverage.
PE.912.M.1.35:	Select proper equipment and apply all appropriate safety procedures necessary for participation.
PE.912.R.5.3:	Demonstrate sportsmanship during game situations. **Clarifications:** Some examples are controlling emotions, resolving conflicts, respecting opponents and officials, and accepting both victory and defeat.
PE.912.R.5.4:	Maintain appropriate personal, social and ethical behavior while participating in a variety of physical activities. **Clarifications:** Some examples are respecting teammates, opponents and officials, and accepting both victory and defeat.
PE.912.R.5.5:	Demonstrate appropriate etiquette, care of equipment, respect for facilities and safe behaviors while participating in a variety of physical activities.
PE.912.R.6.3:	Analyze the roles of games, sports and/or physical activities in other cultures.

Course Standards

Name	Description
PE.912.C.2.6:	Compare and contrast the health-related benefits of various physical activities.
PE.912.C.2.7:	Evaluate the effectiveness of specific warm-up and cool-down activities.
PE.912.C.2.8:	Differentiate between the three different types of heat illnesses associated with fluid loss. **Clarifications:** The three types of heat illnesses are heat cramps, heat exhaustion and heat stroke.
PE.912.C.2.9:	Explain the precautions to be taken when exercising in extreme weather and/or environmental conditions. **Clarifications:** Some examples of precautions are hydration and appropriate attire.
PE.912.C.2.10:	Analyze long-term benefits of regularly participating in physical activity.
PE.912.C.2.11:	Explain how each of the health-related components of fitness are improved through the application of training principles. **Clarifications:** The health-related components of fitness are cardiorespiratory endurance, muscular strength, muscular endurance, flexibility and body composition.
PE.912.C.2.12:	Compare and contrast aerobic versus anaerobic activities.
PE.912.C.2.13:	Document food intake, calories consumed and energy expended through physical activity and analyze the results.
PE.912.C.2.14:	Compare and contrast the skill-related components of fitness used in various physical activities. **Clarifications:** The skill-related components of fitness are speed, coordination, balance, power, agility and reaction time.
PE.912.C.2.15:	Calculate individual target heart-rate zone and analyze how to adjust intensity level to stay within the desired range.
PE.912.C.2.16:	Explain the methods of monitoring levels of intensity during aerobic activity. **Clarifications:** Some examples are a talk test, rate of perceived exertion and checking one's heart rate/pulse.
PE.912.C.2.17:	Assess physiological effects of exercise during and after physical activity. **Clarifications:** Some examples are breathing, resting heart rate and blood pressure.
PE.912.C.2.18:	Differentiate between fact and fallacy as it relates to consumer physical fitness products and programs. **Clarifications:** Some examples are weight-loss pills, food labels and exercise equipment.
PE.912.C.2.22:	Explain the skill-related components of fitness and how they enhance performance levels. **Clarifications:** The skill-related components of fitness are speed, coordination, balance, power, agility and reaction time.
PE.912.C.2.23:	Apply appropriate technology and analyze data to evaluate, monitor and/or improve performance.
PE.912.C.2.25:	Analyze and evaluate the risks, safety procedures, rules and equipment associated with specific course activities.
PE.912.C.2.27:	Compare and contrast how movement skills from one physical activity can be transferred and used in other physical activities. **Clarifications:** Some examples are volleyball and tennis serve, surfing and skate boarding.
PE.912.L.3.1:	Participate in a variety of physical activities to meet the recommended number of minutes of moderate to vigorous physical activity beyond physical education on five or more days of the week.
PE.912.L.3.2:	Participate in a variety of activities that promote the health-related components of fitness. **Clarifications:** The health-related components of fitness are cardiorespiratory endurance, muscular strength, muscular endurance, flexibility and body composition.
PE.912.L.3.3:	Identify a variety of activities that promote effective stress management.
PE.912.L.3.4:	Identify the in-school opportunities for participation in a variety of physical activities.
PE.912.L.3.5:	Identify the community opportunities for participation in a variety of physical activities.
PE.912.L.3.6:	Identify risks and safety factors that may affect physical activity throughout life.
PE.912.L.4.1:	Design a personal fitness program. **Clarifications:** Some examples of things to consider when designing a personal fitness program are timelines and current fitness level.
PE.912.L.4.2:	Identify ways to self-assess and modify a personal fitness program.
PE.912.L.4.3:	Identify strategies for setting goals when developing a personal fitness program.
PE.912.L.4.4:	Use available technology to assess, design and evaluate a personal fitness program.
PE.912.L.4.5:	Apply the principles of training to personal fitness goals. **Clarifications:** Some examples of training principles are overload, specificity and progression.

PE.912.L.4.6:	Identify health-related problems associated with low levels of cardiorespiratory endurance, muscular strength and endurance, flexibility and body composition.
PE.912.L.4.7:	Evaluate how to make changes in an individual wellness plan as lifestyle changes occur.
PE.912.M.1.12:	Select and perform complex movements using a variety of equipment which lead to improved or maintained muscular strength and endurance. **Clarifications:** An example is performing plyometrics.
PE.912.M.1.13:	Perform a student-designed cardiorespiratory enhancing workout.
PE.912.M.1.14:	Utilize technology to assess, enhance and maintain health and skill-related fitness levels. **Clarifications:** Some examples of technology are Excel spreadsheets or web based programs to chart or log activities, heart rate monitors, videotapes or digital cameras.
PE.912.M.1.15:	Select and apply sport/activity specific warm-up and cool-down techniques.
PE.912.M.1.16:	Apply the principles of training and conditioning to accommodate individual needs and strengths. **Clarifications:** Some examples of training principles are overload, specificity and progression.
PE.912.M.1.19:	Use correct body alignment, strength, flexibility and coordination in the performance of technical movements.
PE.912.M.1.33:	Practice complex motor activities in order to improve performance.
PE.912.M.1.34:	Demonstrate use of the mechanical principles as they apply to specific course activities. **Clarifications:** Some examples are balance, force and leverage.
PE.912.M.1.35:	Select proper equipment and apply all appropriate safety procedures necessary for participation.
PE.912.R.5.2:	Develop strategies for including persons of diverse backgrounds and abilities while participating in a variety of physical activities.
PE.912.R.5.3:	Demonstrate sportsmanship during game situations. **Clarifications:** Some examples are controlling emotions, resolving conflicts, respecting opponents and officials, and accepting both victory and defeat.
PE.912.R.5.4:	Maintain appropriate personal, social and ethical behavior while participating in a variety of physical activities. **Clarifications:** Some examples are respecting teammates, opponents and officials, and accepting both victory and defeat.
PE.912.R.5.5:	Demonstrate appropriate etiquette, care of equipment, respect for facilities and safe behaviors while participating in a variety of physical activities.
PE.912.R.6.1:	Discuss opportunities for participation in a variety of physical activities outside of the school setting that contribute to personal enjoyment and the attainment or maintenance of a healthy lifestyle.
PE.912.R.6.2:	Analyze physical activities from which benefits can be derived. **Clarifications:** Some examples of potential benefits are physical, mental, emotional and social.
PE.912.R.6.3:	Analyze the roles of games, sports and/or physical activities in other cultures.
HE.912.C.1.2:	Interpret the significance of interrelationships in mental/emotional, physical, and social health. **Clarifications:** Substance abuse, eating disorders, sexual behaviors, healthy/unhealthy relationships, self-esteem, stress/anger management, and regular exercise.
HE.912.C.1.4:	Propose strategies to reduce or prevent injuries and health problems. **Clarifications:** Mandatory passenger-restraint/helmet laws, refusal skills, mandatory immunizations, healthy relationship skills, and improved inspection of food sources.
HE.912.C.1.5:	Analyze strategies for prevention, detection, and treatment of communicable and chronic diseases. **Clarifications:** Health prevention, detection, and treatment of: breast and testicular cancer, suicide, obesity, and industrial-related chronic disease.
HE.912.C.1.7:	Analyze how heredity and family history can impact personal health. **Clarifications:** Drug use, family obesity, heart disease, mental health, and non-communicable illness or disease.
HE.912.C.1.8:	Assess the degree of susceptibility to injury, illness, or death if engaging in unhealthy/risky behaviors. **Clarifications:** Risks associated with alcohol abuse, including poison, date rape, and death; cancer and chronic lung disease related to tobacco use; overdose from drug use; child abuse or neglect; and dating violence.
HE.912.C.2.1:	Analyze how the family influences the health of individuals. **Clarifications:** Nutritional management of meals, composition of and relationships within families, and health-insurance status.
HE.912.C.2.2:	Compare how peers influence healthy and unhealthy behaviors. **Clarifications:** Binge drinking and social groups, sexual coercion [pressure, force, or manipulation] by a dating partner, students' recommendations for school vending machines, healthy lifestyle, review trends in current and emerging diseases, and use of helmets and seatbelts.
HE.912.C.2.3:	Assess how the school and community can affect personal health practice and behaviors. **Clarifications:** Healthier foods, required health education, health screenings, and enforcement of "no tolerance" policies related to all forms of violence, and AED availability and training.
	Evaluate how public health policies and government regulations can influence health promotion and disease prevention.

HE.912.C.2.4:	**Clarifications:** Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.
HE.912.C.2.5:	Evaluate the effect of media on personal and family health. **Clarifications:** Compares brand-name/store-brand items in home, analyzes television viewing habits, identifies effective PSAs, consumer skills, advertisements of health-related community resources, participation in risky behaviors, and deconstructs media to identify promotion of unhealthy stereotypes, and normalization of violence.
HE.912.C.2.6:	Evaluate the impact of technology on personal, family, and community health. **Clarifications:** Automated external defibrillator in the community, pedestrian crosswalks with audible directions, type of information requested from local 211/hotlines or websites, consumer websites, Internet safety, and disease prevention and control.
HE.912.C.2.7:	Analyze how culture supports and challenges health beliefs, practices, and behaviors. **Clarifications:** Various cultures' dietary patterns, rites of passage, courtship practices, family roles, personal relationships, ethics, and parenting.
HE.912.C.2.8:	Analyze how the perceptions of norms influence healthy and unhealthy behaviors. **Clarifications:** Driving over the speed limit, teen parenting, binge drinking, relationships, parenting, health information, environmental practices, and media messages.
HE.912.C.2.9:	Evaluate the influence of personal values, attitudes, and beliefs about individual health practices and behaviors. **Clarifications:** Social conformity, self-discipline, and impulse vs. delayed gratification.
HE.912.P.7.1:	Analyze the role of individual responsibility in enhancing health. **Clarifications:** Food choices, media messages, future impact of lifestyle choices, individual responsibility for health protection, and stress management.
HE.912.P.7.2:	Evaluate healthy practices and behaviors that will maintain or improve health and reduce health risks. **Clarifications:** Lifestyle choices: drug use/abuse, healthy diet, controlling modes of transmission of infectious agents, riding with impaired drivers, seeking mental-health services when needed, sexual behavior, and engaging in healthy relationships.
HE.912.P.8.1:	Demonstrate how to influence and support others in making positive health choices. **Clarifications:** Avoidance of underage drinking, prevention of driving under the influence, suicide prevention, promotion of healthy dating/personal relationships, responsible parenting, disease prevention, and promotion of first-aid training.
HE.912.P.8.3:	Work cooperatively as an advocate for improving personal, family, and community health. **Clarifications:** Support local availability of healthy food options; environmentally friendly shopping; victim, drug or teen court advocacy; advocate for peer-led abuse-prevention education programs, community resource information; and home/school safety.
LAFS.910.L.3.6:	Acquire and use accurately general academic and domain-specific words and phrases, sufficient for reading, writing, speaking, and listening at the college and career readiness level; demonstrate independence in gathering vocabulary knowledge when considering a word or phrase important to comprehension or expression.
LAFS.910.RL.2.4:	Determine the meaning of words and phrases as they are used in the text, including figurative and connotative meanings; analyze the cumulative impact of specific word choices on meaning and tone (e.g., how the language evokes a sense of time and place; how it sets a formal or informal tone).
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
MAFS.912.S-ID.1.2:	Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★ **Clarifications:** In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

General Course Information and Notes

VERSION DESCRIPTION

The purpose of this course is to develop and enhance healthy behaviors that influence lifestyle choices and student health and fitness. Students will combine the learning of principles and background information in a classroom setting with physical application of the knowledge. A majority of class time should be spent in physical activity.

In addition to the physical education content represented in the benchmarks below, specific health education topics within this course include, but are not limited to:

Mental/Social Health
Physical Activity
Components of Physical Fitness
Nutrition and Wellness Planning
Diseases and Disorders
Health Advocacy

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

Course Standards

Name	Description
PE.6.C.2.1:	Identify at least two movements or activities which will lead to improvement in each of the health-related components of fitness. **Clarifications:** The health-related components of fitness are cardiorespiratory endurance, muscular strength, muscular endurance, flexibility and body composition.
PE.6.C.2.2:	List safety procedures that should be followed when engaging in activities to improve the health-related components of fitness. **Clarifications:** The health-related components of fitness are cardiorespiratory endurance, muscular strength, muscular endurance, flexibility and body composition.
PE.6.C.2.3:	Describe how each of the health-related components of fitness are improved through the application of training principles. **Clarifications:** The health-related components of fitness are cardiorespiratory endurance, muscular strength, muscular endurance, flexibility and body composition.
PE.6.C.2.4:	Describe the long-term benefits of regular physical activity. **Clarifications:** Some examples of types of long-term benefits are physical, cognitive and emotional.
PE.6.C.2.5:	Describe the training principles of overload, progression and specificity.
PE.6.C.2.6:	Classify activities as aerobic or anaerobic.
PE.6.C.2.7:	Determine personal target heart-rate zone and explain how to adjust intensity level to stay within the desired range.
PE.6.C.2.8:	List methods of monitoring intensity level during aerobic activity. **Clarifications:** Some examples of monitoring intensity levels are a talk test, rate of perceived exertion and taking one's heart rate/pulse.
PE.6.C.2.9:	Explain the effects of physical activity on heart rate during exercise, recovery phase and while the body is at rest.
PE.6.C.2.10:	Recognize the difference between fact and fallacy as it relates to consumer physical fitness products and programs. **Clarifications:** Some examples of these are weight- loss pills, food labels and exercise equipment.
PE.6.C.2.11:	Prepare a log noting the food intake, calories consumed and energy expended through physical activity and describe results.
PE.6.C.2.12:	List the components of skill-related fitness. **Clarifications:** The components of skill-related fitness are speed, coordination, balance, power, agility and reaction time.
PE.6.C.2.13:	List appropriate warm-up and cool-down techniques and the reasons for using them.
PE.6.C.2.22:	List the three different types of heat illnesses associated with fluid loss. **Clarifications:** The three types of heat illnesses are heat cramps, heat exhaustion and heat stroke.
PE.6.L.3.1:	Participate in moderate physical activity on a daily basis.
PE.6.L.3.2:	Participate in vigorous physical activity on a daily basis.
PE.6.L.3.3:	Participate in a variety of fitness, wellness, gymnastics and dance activities that promote the components of health-related fitness. **Clarifications:** The health-related components of fitness are cardiorespiratory endurance, muscular strength, muscular endurance, flexibility and body composition.
PE.6.L.3.6:	Identify a variety of fitness, wellness, gymnastics and dance activities that promote stress management.
PE.6.L.4.1:	Create, implement and assess a personal fitness program in collaboration with a teacher.
PE.6.L.4.2:	Develop goals and strategies for a personal physical fitness program.
PE.6.L.4.3:	Use available technology to assess, design and evaluate a personal physical-activity plan.
PE.6.L.4.4:	Develop a personal fitness program including a variety of physical activities.
PE.6.L.4.5:	Identify health-related problems associated with low levels of cardiorespiratory endurance, muscular strength, muscular endurance, flexibility and body composition.
PE.6.M.1.1:	Demonstrate movements designed to improve and maintain cardiorespiratory endurance, muscular strength and endurance, flexibility and proper body composition.
PE.6.M.1.2:	Perform at least three different activities that achieve target heart rate.
PE.6.M.1.3:	Demonstrate the principles of training (overload, specificity and progression) and conditioning (frequency, intensity, time and type) for specific physical activities.
PE.6.M.1.5:	Perform movements using a variety of equipment which lead to improved or maintained muscular strength and endurance.
PE.6.M.1.11:	Apply proper warm-up and cool-down techniques.
PE.6.M.1.12:	Use proper safety practices. **Clarifications:** Some examples of safety practices are the use of sun screen, hydration, selection of clothing and correct biomechanics.

PE.6.R.5.1:	List ways that peer pressure can be positive and negative.
PE.6.R.5.2:	Demonstrate acceptance and respect for persons of diverse backgrounds and abilities in physical-activity settings.
PE.6.R.5.3:	Demonstrate responsible behaviors during physical activities. **Clarifications:** Some examples of responsible behaviors are controlling emotions, resolving conflicts, respecting opponents and officials and accepting both victory and defeat.
PE.6.R.5.4:	Describe the personal, social and ethical behaviors that apply to specific physical activities.
PE.6.R.5.5:	Demonstrate appropriate etiquette, care of equipment, respect for facilities and safe behaviors while participating in a variety of physical activities.
PE.6.R.6.1:	Identify an opportunity for participation in a physical activity outside of the school setting that contributes to personal enjoyment and the attainment or maintenance of a healthy lifestyle.
PE.6.R.6.2:	Identify the potential benefits of participation in a variety of physical activities. **Clarifications:** Some examples of potential benefits of participation are physical, mental, emotional and social.
HE.6.B.3.1:	Examine the validity of health information, and determine the cost of health products, and services. **Clarifications:** Advertisements, Internet, infomercials, articles, flyers, diet supplements, generic vs. name brand, individual fitness plan vs. gym membership, and private lessons vs. recreational play.
HE.6.B.6.1:	Use various methods to measure personal health status. **Clarifications:** BMI, surveys, heart-rate monitors, pedometer, blood-pressure cuff, and stress-management techniques.
HE.6.P.7.1:	Explain the importance of assuming responsibility for personal-health behaviors. **Clarifications:** Medical/dental checkups, resisting peer pressure, and healthy relationships.
LAFS.6.L.3.6:	Acquire and use accurately grade-appropriate general academic and domain-specific words and phrases; gather vocabulary knowledge when considering a word or phrase important to comprehension or expression.
LAFS.68.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
MAFS.6.RP.1.1:	Understand the concept of a ratio and use ratio language to describe a ratio relationship between two quantities. *For example, "The ratio of wings to beaks in the bird house at the zoo was 2:1, because for every 2 wings there was 1 beak." "For every vote candidate A received, candidate C received nearly three votes."*

General Course Information and Notes

VERSION DESCRIPTION

This fitness course is designed for 6th grade students and intended to be 18 weeks in length. The purpose of this course is to provide students with the knowledge, skills, and values they need to become healthy and physically active for a lifetime. This course addresses both the health and skill-related components of physical fitness which are critical for students' success.

GENERAL NOTES

Instructional Practices

Teaching from a well-written, grade-level textbook enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

- Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
- Making close reading and rereading of texts central to lessons.
- Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
- Requiring students to support answers with evidence from the text.
- Providing extensive text-based research and writing opportunities (claims and evidence).

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

QUALIFICATIONS

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

Any field when certification reflects a bachelor or higher degree.

M/J Education Gymanstics/Educational Dance - Grade 6 (#1508010) 2019 - 2022 (current)

Course Standards

Name	Description
PE.6.C.2.12:	List the components of skill-related fitness. **Clarifications:** The components of skill-related fitness are speed, coordination, balance, power, agility and reaction time.
PE.6.C.2.13:	List appropriate warm-up and cool-down techniques and the reasons for using them.
PE.6.C.2.14:	List terminology and etiquette in educational gymnastics or dance.
PE.6.C.2.15:	Choreograph basic dance or gymnastic sequences alone, with a partner or in a small group.
PE.6.C.2.16:	Evaluate the movement performance of others.
PE.6.C.2.17:	Describe the mechanical principles of balance, force and leverage and how they relate to the performance of skills in gymnastics or dance.
PE.6.C.2.18:	List and describe the risks and safety procedures in gymnastics and dance.
PE.6.C.2.19:	Recognize the relationship between music and dance or gymnastics skills.
PE.6.C.2.20:	Know how improvisation is used to create movements for choreography.
PE.6.C.2.21:	Identify the precautions to be taken when exercising in extreme weather and/or environmental conditions.
PE.6.L.3.3:	Participate in a variety of fitness, wellness, gymnastics and dance activities that promote the components of health-related fitness. **Clarifications:** The health-related components of fitness are cardiorespiratory endurance, muscular strength, muscular endurance, flexibility and body composition.
PE.6.L.3.4:	Identify the in-school opportunities for physical activity that promote fitness, wellness, gymnastics and dance.
PE.6.L.3.5:	Identify the community opportunities for physical activity that promote fitness, wellness, gymnastics and dance.
PE.6.L.3.6:	Identify a variety of fitness, wellness, gymnastics and dance activities that promote stress management.
PE.6.M.1.5:	Perform movements using a variety of equipment which lead to improved or maintained muscular strength and endurance.
PE.6.M.1.6:	Design and perform smooth, flowing sequences of stunts, tumbling and rhythmic patterns that combine traveling, rolling, balancing and transfer of weight.
PE.6.M.1.7:	Design and perform a routine to rhythm, with a partner or a group, while incorporating gymnastic actions and various forms of locomotion on small and/or large apparatus. **Clarifications:** Some examples of gymnastics actions are rolling, balancing and step like actions. Some examples of apparatus are wedge mats, cylinders and balance beams.
PE.6.M.1.8:	Perform complex dance sequences from a variety of dances accurately and with correct technique. **Clarifications:** Some examples of dances are folk, square, step and line.
PE.6.M.1.9:	Create and perform a rhythmic movement sequence while working with a partner or group.
PE.6.M.1.10:	Design and perform different group dance and rhythm sequences that incorporate equipment.
PE.6.M.1.11:	Apply proper warm-up and cool-down techniques.
PE.6.M.1.12:	Use proper safety practices. **Clarifications:** Some examples of safety practices are the use of sun screen, hydration, selection of clothing and correct biomechanics.
PE.6.M.1.13:	Use technology to assess, enhance and maintain motor skill performance. **Clarifications:** Some examples of technology are Excel spreadsheets or web-based programs to chart or log activities, heart rate monitors, videotapes or digital cameras.
PE.6.R.5.1:	List ways that peer pressure can be positive and negative.
PE.6.R.5.2:	Demonstrate acceptance and respect for persons of diverse backgrounds and abilities in physical-activity settings.
PE.6.R.5.3:	Demonstrate responsible behaviors during physical activities. **Clarifications:** Some examples of responsible behaviors are controlling emotions, resolving conflicts, respecting opponents and officials and accepting both victory and defeat.
PE.6.R.5.4:	Describe the personal, social and ethical behaviors that apply to specific physical activities.
PE.6.R.5.5:	Demonstrate appropriate etiquette, care of equipment, respect for facilities and safe behaviors while participating in a variety of physical activities.
PE.6.R.6.1:	Identify an opportunity for participation in a physical activity outside of the school setting that contributes to personal enjoyment and the attainment or maintenance of a healthy lifestyle.
PE.6.R.6.2:	Identify the potential benefits of participation in a variety of physical activities. **Clarifications:** Some examples of potential benefits of participation are physical, mental, emotional and social.
PE.6.R.6.3:	Participate in games, sports and/or physical activities from other cultures.

LAFS.68.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.
LAFS.K12.L.3.6:	Acquire and use accurately a range of general academic and domain-specific words and phrases sufficient for reading, writing, speaking, and listening at the college and career readiness level; demonstrate independence in gathering vocabulary knowledge when encountering an unknown term important to comprehension or expression.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
HE.6.C.2.7:	Investigate cultural changes related to health beliefs and behaviors. **Clarifications:** School breakfast programs, fast- food menus, and nutritional guidelines for snack machines, fitness programs, and school wellness programs.
MAFS.6.RP.1.1:	Understand the concept of a ratio and use ratio language to describe a ratio relationship between two quantities. *For example, "The ratio of wings to beaks in the bird house at the zoo was 2:1, because for every 2 wings there was 1 beak." "For every vote candidate A received, candidate C received nearly three votes."*

General Course Information and Notes

VERSION DESCRIPTION

This course is designed for 6th grade students and intended to be 18 weeks in length. The purpose of this course is to provide students with the knowledge, skills, and values necessary to design and perform educational gymnastics and dance sequences in a variety of settings. "Educational" gymnastics is intended to have an emphasis on body awareness, body management, maximum participation, high success rates, and open-ended responses from students. Integrating fitness throughout the content is critical to the success of the course.

GENERAL NOTES

Special Notes: Instructional Practices

Teaching from a well-written, grade-level textbook enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

M/J Team Sports - Grade 7 (#1508020) 2019 - 2022 (current)

Course Standards

Name	Description
PE.7.C.2.1:	Identify the basic rules for team sports. **Clarifications:** Some examples are setting up to start, violating rules and keeping accurate score.
PE.7.C.2.3:	Explain basic offensive and defensive strategies in modified games or activities and team sports.
PE.7.C.2.6:	Provide feedback on skill patterns of self and partner by detecting and correcting mechanical errors.
PE.7.C.2.7:	Identify the critical elements for successful performance of a variety of sport skills.
PE.7.C.2.8:	List specific safety procedures and equipment necessary for a variety of sport skills and physical activities.
PE.7.C.2.9:	Describe how movement skills learned in one physical activity can be transferred and used in other physical activities. **Clarifications:** An example is slow-pitch softball and volleyball underhand serve.
PE.7.L.3.1:	Participate in moderate physical activity on a daily basis.
PE.7.L.3.2:	Participate in vigorous physical activity on a daily basis.
PE.7.L.3.3:	Participate in a variety of team sports, outdoor pursuits and aquatics activities that promote health-related physical fitness. **Clarifications:** The health-related components of fitness are cardiorespiratory endurance, muscular strength, muscular endurance, flexibility and body composition.
PE.7.L.3.4:	Identify the in-school opportunities for participation in team sports, outdoor pursuits and aquatics activities.
PE.7.L.3.5:	Identify the community opportunities that promote team sports, outdoor pursuits and aquatics activities.
PE.7.L.3.6:	Identify a variety of team sports, outdoor pursuits and aquatics activities that promote stress management.
PE.7.M.1.1:	Participate in modified versions of team sports demonstrating mature patterns while using a variety of manipulative skills. **Clarifications:** Some examples of manipulative skills are throwing, catching, kicking, punting, trapping, dribbling, volleying and striking.
PE.7.M.1.2:	Use basic offensive and defensive strategies while playing modified versions of a variety of sports and activities. **Clarifications:** An example of a modified version of a sport or activity is a small sided game.
PE.7.M.1.3:	Demonstrate appropriate relationships between the body and an opponent in dynamic game situations. **Clarifications:** Some examples are staying between opponent and goal and moving between opponent and the ball.
PE.7.M.1.6:	Demonstrate the critical elements in specialized skills related to a variety of team sports or outdoor pursuits activities. **Clarifications:** Some examples are overhand throw for distance/force, forearm passing in volleyball, steering a canoe, batting and the correct stance in archery.
PE.7.M.1.7:	Utilize proper equipment and implement appropriate safety procedures for participation in a variety of sports or activities.
PE.7.M.1.8:	Apply technology to evaluate, monitor and improve individual skill performance. **Clarifications:** Some examples of technology are Excel spreadsheets or web based programs to chart or log activities, heart rate monitors, videotapes and digital cameras.
PE.7.M.1.9:	Demonstrate principles of biomechanics necessary for safe and successful performance.
PE.7.R.5.1:	Identify situations in which peer pressure could negatively impact one's own behavior choices.
PE.7.R.5.2:	Demonstrate acceptance and respect for persons of diverse backgrounds and abilities in physical-activity settings.
PE.7.R.5.3:	Demonstrate responsible behaviors during physical activities. **Clarifications:** Some examples of responsible behaviors are controlling emotions, resolving conflicts, respecting opponents and officials and accepting both victory and defeat.
PE.7.R.5.4:	List examples of appropriate personal, social and ethical behaviors that apply to specific physical activities.
PE.7.R.5.5:	Demonstrate appropriate etiquette, care of equipment, respect for facilities and safe behaviors while participating in a variety of physical activities.
PE.7.R.6.1:	Identify an opportunity for participation in a physical activity outside of the school setting that contributes to personal enjoyment and the attainment or maintenance of a healthy lifestyle.
PE.7.R.6.2:	Discuss the potential benefits of participation in a variety of physical activities. **Clarifications:** Some examples of potential benefits are physical, mental, emotional and social.
PE.7.R.6.3:	Participate in games, sports and/or physical activities from other cultures.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
HE.7.C.2.6:	Evaluate the influence of technology in locating valid health information. **Clarifications:** Specific health sites to acquire valid health information: CDC, NIH, NIDA, and local health organizations; and Internet and cell phone apps.

LAFS.68.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.
MAFS.7.SP.3.5:	Understand that the probability of a chance event is a number between 0 and 1 that expresses the likelihood of the event occurring. Larger numbers indicate greater likelihood. A probability near 0 indicates an unlikely event, a probability around 1/2 indicates an event that is neither unlikely nor likely, and a probability near 1 indicates a likely event.

General Course Information and Notes

VERSION DESCRIPTION

This course is designed for 7th grade students and is intended to be 18 weeks in length. The purpose of this course is to develop the physical skills necessary to be competent in many forms of movement, knowledge of team sports concepts such as offensive and defensive strategies and tactics, and appropriate social behaviors within a team or group setting. The integration of fitness concepts throughout the content is critical to the success of this course.

GENERAL NOTES

Instructional Practices

Teaching from a well-written, grade-level textbook enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

- Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
- Making close reading and rereading of texts central to lessons.
- Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
- Requiring students to support answers with evidence from the text.
- Providing extensive text-based research and writing opportunities (claims and evidence).

PE.7.C.2.8:	List specific safety procedures and equipment necessary for a variety of sport skills and physical activities.
PE.7.C.2.9:	Describe how movement skills learned in one physical activity can be transferred and used in other physical activities. **Clarifications:** An example is slow-pitch softball and volleyball underhand serve.
PE.7.L.3.1:	Participate in moderate physical activity on a daily basis.
PE.7.L.3.2:	Participate in vigorous physical activity on a daily basis.
PE.7.L.3.3:	Participate in a variety of team sports, outdoor pursuits and aquatics activities that promote health-related physical fitness. **Clarifications:** The health-related components of fitness are cardiorespiratory endurance, muscular strength, muscular endurance, flexibility and body composition.
PE.7.L.3.4:	Identify the in-school opportunities for participation in team sports, outdoor pursuits and aquatics activities.
PE.7.L.3.5:	Identify the community opportunities that promote team sports, outdoor pursuits and aquatics activities.
PE.7.L.3.6:	Identify a variety of team sports, outdoor pursuits and aquatics activities that promote stress management.
PE.7.M.1.2:	Use basic offensive and defensive strategies while playing modified versions of a variety of sports and activities. **Clarifications:** An example of a modified version of a sport or activity is a small sided game.
PE.7.M.1.3:	Demonstrate appropriate relationships between the body and an opponent in dynamic game situations. **Clarifications:** Some examples are staying between opponent and goal and moving between opponent and the ball.
PE.7.M.1.4:	Demonstrate introductory outdoor pursuits skills. **Clarifications:** Some examples of outdoor pursuits are archery, backpacking, orienteering, hiking, canoeing, fishing and ropes courses.
PE.7.M.1.5:	Perform aquatics activities to improve or maintain health-related fitness. **Clarifications:** Some examples of aquatic activities are water aerobics, water polo and survival swimming.
PE.7.M.1.6:	Demonstrate the critical elements in specialized skills related to a variety of team sports or outdoor pursuits activities. **Clarifications:** Some examples are overhand throw for distance/force, forearm passing in volleyball, steering a canoe, batting and the correct stance in archery.
PE.7.M.1.7:	Utilize proper equipment and implement appropriate safety procedures for participation in a variety of sports or activities.
PE.7.M.1.8:	Apply technology to evaluate, monitor and improve individual skill performance. **Clarifications:** Some examples of technology are Excel spreadsheets or web based programs to chart or log activities, heart rate monitors, videotapes and digital cameras.
PE.7.M.1.9:	Demonstrate principles of biomechanics necessary for safe and successful performance.
PE.7.R.5.1:	Identify situations in which peer pressure could negatively impact one's own behavior choices.
PE.7.R.5.2:	Demonstrate acceptance and respect for persons of diverse backgrounds and abilities in physical-activity settings.
PE.7.R.5.3:	Demonstrate responsible behaviors during physical activities. **Clarifications:** Some examples of responsible behaviors are controlling emotions, resolving conflicts, respecting opponents and officials and accepting both victory and defeat.
PE.7.R.5.4:	List examples of appropriate personal, social and ethical behaviors that apply to specific physical activities.
PE.7.R.5.5:	Demonstrate appropriate etiquette, care of equipment, respect for facilities and safe behaviors while participating in a variety of physical activities.
PE.7.R.6.1:	Identify an opportunity for participation in a physical activity outside of the school setting that contributes to personal enjoyment and the attainment or maintenance of a healthy lifestyle.
PE.7.R.6.2:	Discuss the potential benefits of participation in a variety of physical activities. **Clarifications:**

	Some examples of potential benefits are physical, mental, emotional and social.
PE.7.R.6.3:	Participate in games, sports and/or physical activities from other cultures.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
HE.7.C.1.8:	Explain the likelihood of injury or illness if engaging in unhealthy/risky behaviors. **Clarifications:** Abuse of over-the-counter medications, sexually transmitted diseases and sexually transmitted infections from sexual relationships, injury, or death from unsupervised handling of firearms, and physical/emotional injury, or impact from abusive dating partner.
LAFS.68.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.
MAFS.7.SP.3.5:	Understand that the probability of a chance event is a number between 0 and 1 that expresses the likelihood of the event occurring. Larger numbers indicate greater likelihood. A probability near 0 indicates an unlikely event, a probability around 1/2 indicates an event that is neither unlikely nor likely, and a probability near 1 indicates a likely event.

General Course Information and Notes

VERSION DESCRIPTION

This course is designed for 7th grade students and is intended to be 18 weeks in length. The purpose of this course is to provide the skills, knowledge, and motivation necessary for participation in non-traditional forms of physical activity. The integration of fitness concepts throughout the content is critical to student success in this course and in the development of a physically active lifestyle.

GENERAL NOTES

Instructional Practices

Teaching from a well-written, grade-level textbook enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

- Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
- Making close reading and rereading of texts central to lessons.
- Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
- Requiring students to support answers with evidence from the text.
- Providing extensive text-based research and writing opportunities (claims and evidence).

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

QUALIFICATIONS

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

Any field when certification reflects a bachelor or higher degree.

M/J Extreme/Alternative Sports - Grade 8 (#1508040) 2019

- 2022 (current)

Course Standards

Name	Description
PE.8.C.2.2:	Identify basic rules for alternative/extreme sports activities. **Clarifications:** Some examples are setting up to start, violating rules and keeping accurate score.
PE.8.C.2.3:	Explain basic offensive and defensive strategies in individual/dual sports.
PE.8.C.2.5:	Provide feedback on skill patterns of self and partner by detecting and correcting mechanical errors.
PE.8.C.2.6:	Identify the critical elements for successful performance in a variety of sport skills or physical activities.
PE.8.C.2.7:	List specific safety procedures and equipment necessary for a variety of sport skills and physical activities.
PE.8.C.2.8:	Describe how movement skills and strategies learned in one physical activity can be transferred and used in other physical activities. **Clarifications:** Some examples are volleyball and tennis serve and surfing and skate boarding.
PE.8.L.3.1:	Participate in moderate physical activity on a daily basis.
PE.8.L.3.2:	Participate in vigorous physical activity on a daily basis.
PE.8.L.3.3:	Participate in a variety of individual/dual and alternative/extreme sport activities that promote health-related components of fitness. **Clarifications:** The health-related components of fitness are cardiorespiratory endurance, muscular strength, muscular endurance, flexibility and body composition.
PE.8.L.3.4:	Identify the in-school opportunities for participation in individual/dual and alternative/extreme sports.
PE.8.L.3.5:	Identify the community opportunities for participation in individual/dual and alternative/extreme sports.
PE.8.L.3.6:	Identify a variety of individual/dual and alternative/extreme sport activities that promote stress management.
PE.8.L.4.3:	Use available technology to assess, design and evaluate a personal physical fitness program.
PE.8.M.1.1:	Demonstrate competency in motor skills for a variety of individual/dual and extreme/alternative sports.
PE.8.M.1.2:	Demonstrate critical elements when striking with an object or implement.
PE.8.M.1.3:	Demonstrate body management for successful participation in a variety of modified games and activities. **Clarifications:** Some examples of body management are balance and agility.
PE.8.M.1.4:	Apply principles of biomechanics necessary for safe and successful performance.
PE.8.M.1.5:	Demonstrate appropriate speed and generation of force when distance running, sprinting, throwing, jumping, striking or kicking.
PE.8.M.1.6:	Demonstrate offensive, defensive and transition strategies and tactics.
PE.8.M.1.7:	Apply skill-related components of balance, reaction time, agility, coordination, power and speed to enhance performance levels.
PE.8.M.1.8:	Apply technology to evaluate, monitor and improve individual motor skills. **Clarifications:** Some examples of technology are Excel spreadsheets or web based programs to chart or log activities, heart rate monitors, videotapes and digital cameras.
PE.8.M.1.9:	Select and utilize appropriate safety equipment.
PE.8.R.5.1:	List ways to act independently of peer pressure during physical activities.
PE.8.R.5.2:	Develop strategies for including persons of diverse backgrounds and abilities while participating in a variety of physical activities.
PE.8.R.5.3:	Demonstrate sportsmanship during game situations. **Clarifications:** Some examples are controlling emotions, resolving conflicts, respecting opponents and officials and accepting both victory and defeat.
PE.8.R.5.4:	Maintain appropriate personal, social and ethical behavior while participating in a variety of physical activities. **Clarifications:** Some examples are respecting teammates, opponents and officials and accepting both victory and defeat.
PE.8.R.5.5:	Demonstrate appropriate etiquette, care of equipment, respect for facilities and safe behaviors while participating in a variety of physical activities.
PE.8.R.6.1:	Discuss opportunities for participation in a variety of physical activities outside of the school setting that contribute to personal enjoyment and the attainment or maintenance of a healthy lifestyle.
PE.8.R.6.2:	Describe the potential benefits of participation in a variety of physical activities. **Clarifications:** Some examples of potential benefits are physical, mental, emotional and social.
PE.8.R.6.3:	Compare and contrast games, sports and/or physical activities from other cultures.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
HE.8.B.5.5:	Evaluate the outcomes of a health-related decision. **Clarifications:** Addiction from alcohol consumption, brain damage from inhalant use, pregnancy from sexual activity, and weight management from proper

	nutrition.
LAFS.68.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.
MAFS.8.SP.1.4:	Understand that patterns of association can also be seen in bivariate categorical data by displaying frequencies and relative frequencies in a two-way table. Construct and interpret a two-way table summarizing data on two categorical variables collected from the same subjects. Use relative frequencies calculated for rows or columns to describe possible association between the two variables. *For example, collect data from students in your class on whether or not they have a curfew on school nights and whether or not they have assigned chores at home. Is there evidence that those who have a curfew also tend to have chores?*

Course Standards

Name	Description
PE.6.C.2.3:	Describe how each of the health-related components of fitness are improved through the application of training principles. **Clarifications:** The health-related components of fitness are cardiorespiratory endurance, muscular strength, muscular endurance, flexibility and body composition.
PE.6.C.2.4:	Describe the long-term benefits of regular physical activity. **Clarifications:** Some examples of types of long-term benefits are physical, cognitive and emotional.
PE.6.C.2.7:	Determine personal target heart-rate zone and explain how to adjust intensity level to stay within the desired range.
PE.6.C.2.11:	Prepare a log noting the food intake, calories consumed and energy expended through physical activity and describe results.
PE.6.C.2.12:	List the components of skill-related fitness. **Clarifications:** The components of skill-related fitness are speed, coordination, balance, power, agility and reaction time.
PE.6.C.2.13:	List appropriate warm-up and cool-down techniques and the reasons for using them.
PE.6.C.2.21:	Identify the precautions to be taken when exercising in extreme weather and/or environmental conditions.
PE.6.C.2.22:	List the three different types of heat illnesses associated with fluid loss. **Clarifications:** The three types of heat illnesses are heat cramps, heat exhaustion and heat stroke.
PE.6.L.3.1:	Participate in moderate physical activity on a daily basis.
PE.6.L.3.2:	Participate in vigorous physical activity on a daily basis.
PE.6.L.3.3:	Participate in a variety of fitness, wellness, gymnastics and dance activities that promote the components of health-related fitness. **Clarifications:** The health-related components of fitness are cardiorespiratory endurance, muscular strength, muscular endurance, flexibility and body composition.
PE.6.L.3.4:	Identify the in-school opportunities for physical activity that promote fitness, wellness, gymnastics and dance.
PE.6.L.3.5:	Identify the community opportunities for physical activity that promote fitness, wellness, gymnastics and dance.
PE.6.L.3.6:	Identify a variety of fitness, wellness, gymnastics and dance activities that promote stress management.
PE.6.L.4.1:	Create, implement and assess a personal fitness program in collaboration with a teacher.
PE.6.L.4.2:	Develop goals and strategies for a personal physical fitness program.
PE.6.L.4.3:	Use available technology to assess, design and evaluate a personal physical-activity plan.
PE.6.L.4.4:	Develop a personal fitness program including a variety of physical activities.
PE.6.M.1.1:	Demonstrate movements designed to improve and maintain cardiorespiratory endurance, muscular strength and endurance, flexibility and proper body composition.
PE.6.M.1.2:	Perform at least three different activities that achieve target heart rate.
PE.6.M.1.3:	Demonstrate the principles of training (overload, specificity and progression) and conditioning (frequency, intensity, time and type) for specific physical activities.
PE.6.M.1.4:	Perform at least three activities having value for cardiorespiratory fitness.
PE.6.M.1.5:	Perform movements using a variety of equipment which lead to improved or maintained muscular strength and endurance.
PE.6.M.1.6:	Design and perform smooth, flowing sequences of stunts, tumbling and rhythmic patterns that combine traveling, rolling, balancing and transfer of weight.
PE.6.M.1.7:	Design and perform a routine to rhythm, with a partner or a group, while incorporating gymnastic actions and various forms of locomotion on small and/or large apparatus. **Clarifications:** Some examples of gymnastics actions are rolling, balancing and step like actions. Some examples of apparatus are wedge mats, cylinders and balance beams.
PE.6.M.1.9:	Create and perform a rhythmic movement sequence while working with a partner or group.
PE.6.M.1.11:	Apply proper warm-up and cool-down techniques.
PE.6.M.1.12:	Use proper safety practices. **Clarifications:** Some examples of safety practices are the use of sun screen, hydration, selection of clothing and correct biomechanics.
PE.6.M.1.13:	Use technology to assess, enhance and maintain motor skill performance. **Clarifications:** Some examples of technology are Excel spreadsheets or web-based programs to chart or log activities, heart rate monitors, videotapes or digital cameras.
PE.6.R.6.1:	Identify an opportunity for participation in a physical activity outside of the school setting that contributes to personal enjoyment and the attainment or maintenance of a healthy lifestyle.

PE.6.R.6.2:	Identify the potential benefits of participation in a variety of physical activities. **Clarifications:** Some examples of potential benefits of participation are physical, mental, emotional and social.
PE.6.R.6.3:	Participate in games, sports and/or physical activities from other cultures.
PE.7.C.2.1:	Identify the basic rules for team sports. **Clarifications:** Some examples are setting up to start, violating rules and keeping accurate score.
PE.7.C.2.3:	Explain basic offensive and defensive strategies in modified games or activities and team sports.
PE.7.C.2.6:	Provide feedback on skill patterns of self and partner by detecting and correcting mechanical errors.
PE.7.C.2.8:	List specific safety procedures and equipment necessary for a variety of sport skills and physical activities.
PE.7.C.2.9:	Describe how movement skills learned in one physical activity can be transferred and used in other physical activities. **Clarifications:** An example is slow-pitch softball and volleyball underhand serve.
PE.7.M.1.1:	Participate in modified versions of team sports demonstrating mature patterns while using a variety of manipulative skills. **Clarifications:** Some examples of manipulative skills are throwing, catching, kicking, punting, trapping, dribbling, volleying and striking.
PE.7.M.1.2:	Use basic offensive and defensive strategies while playing modified versions of a variety of sports and activities. **Clarifications:** An example of a modified version of a sport or activity is a small sided game.
PE.7.M.1.4:	Demonstrate introductory outdoor pursuits skills. **Clarifications:** Some examples of outdoor pursuits are archery, backpacking, orienteering, hiking, canoeing, fishing and ropes courses.
PE.7.M.1.7:	Utilize proper equipment and implement appropriate safety procedures for participation in a variety of sports or activities.
PE.7.M.1.8:	Apply technology to evaluate, monitor and improve individual skill performance. **Clarifications:** Some examples of technology are Excel spreadsheets or web based programs to chart or log activities, heart rate monitors, videotapes and digital cameras.
PE.7.R.5.1:	Identify situations in which peer pressure could negatively impact one's own behavior choices.
PE.7.R.5.2:	Demonstrate acceptance and respect for persons of diverse backgrounds and abilities in physical-activity settings.
PE.7.R.5.3:	Demonstrate responsible behaviors during physical activities. **Clarifications:** Some examples of responsible behaviors are controlling emotions, resolving conflicts, respecting opponents and officials and accepting both victory and defeat.
HE.7.B.6.3:	Explain strategies and skills needed to assess progress and maintenance of a personal health goal. **Clarifications:** Journaling, daily checklists, calorie counting, use of pedometers, participation in support groups, and rewarding milestones.
HE.7.P.8.2:	Articulate a position on a health-related issue and support it with accurate health information. **Clarifications:** Bullying prevention, Internet safety, and nutritional choices.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
LAFS.68.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.
MAFS.6.RP.1.1:	Understand the concept of a ratio and use ratio language to describe a ratio relationship between two quantities. *For example, "The ratio of wings to beaks in the bird house at the zoo was 2:1, because for every 2 wings there was 1 beak." "For every vote candidate A received, candidate C received nearly three votes."*

General Course Information and Notes

VERSION DESCRIPTION

This course is designed for 6th and 7th grade students and intended to be 18 weeks in length. The purpose of this course is to provide a foundation of knowledge, skills, and values necessary for the development of a physically active lifestyle. The course content provides exposure to a variety of movement opportunities and experiences which includes, but is not limited to: Fitness Activities, Educational Gymnastics and Dance, and Team Sports. The integration of fitness concepts throughout the content is critical to student success in this course and in the development of a healthy and physically active lifestyle.

GENERAL NOTES

Special Notes:
Instructional Practices

Teaching from a well-written, grade-level textbook enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. PE.7.L.3.2:	Participate in vigorous physical activity on a daily basis.
PE.7.M.1.1:	Participate in modified versions of team sports demonstrating mature patterns while using a variety of manipulative skills. **Clarifications:** Some examples of manipulative skills are throwing, catching, kicking, punting, trapping, dribbling, volleying and striking.
PE.7.M.1.2:	Use basic offensive and defensive strategies while playing modified versions of a variety of sports and activities. **Clarifications:** An example of a modified version of a sport or activity is a small sided game.
PE.7.M.1.3:	Demonstrate appropriate relationships between the body and an opponent in dynamic game situations. **Clarifications:** Some examples are staying between opponent and goal and moving between opponent and the ball.
PE.7.M.1.6:	Demonstrate the critical elements in specialized skills related to a variety of team sports or outdoor pursuits activities. **Clarifications:** Some examples are overhand throw for distance/force, forearm passing in volleyball, steering a canoe, batting and the correct stance in archery.
PE.7.M.1.8:	Apply technology to evaluate, monitor and improve individual skill performance. **Clarifications:** Some examples of technology are Excel spreadsheets or web based programs to chart or log activities, heart rate monitors, videotapes and digital cameras.
PE.7.M.1.9:	Demonstrate principles of biomechanics necessary for safe and successful performance.
PE.7.R.5.1:	Identify situations in which peer pressure could negatively impact one's own behavior choices.
PE.7.R.5.2:	Demonstrate acceptance and respect for persons of diverse backgrounds and abilities in physical-activity settings.
PE.7.R.5.3:	Demonstrate responsible behaviors during physical activities. **Clarifications:** Some examples of responsible behaviors are controlling emotions, resolving conflicts, respecting opponents and officials and accepting both victory and defeat.
PE.7.R.5.4:	List examples of appropriate personal, social and ethical behaviors that apply to specific physical activities.
PE.7.R.6.2:	Discuss the potential benefits of participation in a variety of physical activities. **Clarifications:** Some examples of potential benefits are physical, mental, emotional and social.
PE.7.R.6.3:	Participate in games, sports and/or physical activities from other cultures.
PE.8.C.2.3:	Explain basic offensive and defensive strategies in individual/dual sports.
PE.8.C.2.4:	Explain basic offensive and defensive strategies in alternative/extreme sports activities.
PE.8.C.2.5:	Provide feedback on skill patterns of self and partner by detecting and correcting mechanical errors.
PE.8.C.2.6:	Identify the critical elements for successful performance in a variety of sport skills or physical activities.
PE.8.C.2.7:	List specific safety procedures and equipment necessary for a variety of sport skills and physical activities.
PE.8.L.3.1:	Participate in moderate physical activity on a daily basis.
PE.8.L.3.2:	Participate in vigorous physical activity on a daily basis.
PE.8.L.3.3:	Participate in a variety of individual/dual and alternative/extreme sport activities that promote health-related components of fitness. **Clarifications:** The health-related components of fitness are cardiorespiratory endurance, muscular strength, muscular endurance, flexibility and body composition.
PE.8.L.3.4:	Identify the in-school opportunities for participation in individual/dual and alternative/extreme sports.
PE.8.L.3.5:	Identify the community opportunities for participation in individual/dual and alternative/extreme sports.
PE.8.L.3.6:	Identify a variety of individual/dual and alternative/extreme sport activities that promote stress management.
PE.8.L.4.1:	Create, implement and assess a personal fitness program in collaboration with a teacher.
PE.8.L.4.2:	Develop goals and strategies for a personal physical fitness program.
PE.8.L.4.3:	Use available technology to assess, design and evaluate a personal physical fitness program.
PE.8.L.4.4:	Develop a personal fitness program including a variety of physical activities.
PE.8.L.4.5:	Identify health-related problems associated with low levels of cardiorespiratory endurance, muscular strength and endurance, flexibility and body composition.

PE.8.M.1.2:	Demonstrate critical elements when striking with an object or implement.
PE.8.M.1.3:	Demonstrate body management for successful participation in a variety of modified games and activities. **Clarifications:** Some examples of body management are balance and agility.
PE.8.M.1.4:	Apply principles of biomechanics necessary for safe and successful performance.
PE.8.M.1.5:	Demonstrate appropriate speed and generation of force when distance running, sprinting, throwing, jumping, striking or kicking.
PE.8.M.1.6:	Demonstrate offensive, defensive and transition strategies and tactics.
PE.8.R.5.1:	List ways to act independently of peer pressure during physical activities.
PE.8.R.5.2:	Develop strategies for including persons of diverse backgrounds and abilities while participating in a variety of physical activities.
PE.8.R.5.3:	Demonstrate sportsmanship during game situations. **Clarifications:** Some examples are controlling emotions, resolving conflicts, respecting opponents and officials and accepting both victory and defeat.
PE.8.R.5.4:	Maintain appropriate personal, social and ethical behavior while participating in a variety of physical activities. **Clarifications:** Some examples are respecting teammates, opponents and officials and accepting both victory and defeat.
PE.8.R.5.5:	Demonstrate appropriate etiquette, care of equipment, respect for facilities and safe behaviors while participating in a variety of physical activities.
PE.8.R.6.1:	Discuss opportunities for participation in a variety of physical activities outside of the school setting that contribute to personal enjoyment and the attainment or maintenance of a healthy lifestyle.
PE.8.R.6.2:	Describe the potential benefits of participation in a variety of physical activities. **Clarifications:** Some examples of potential benefits are physical, mental, emotional and social.
PE.8.R.6.3:	Compare and contrast games, sports and/or physical activities from other cultures.
HE.8.B.6.4:	Describe how personal health goals can vary with changing abilities, priorities, and responsibilities. **Clarifications:** Weight reduction, cost of healthier food, availability of exercise equipment, and general health.
HE.8.C.1.5:	Identify major chronic diseases that impact human body systems. **Clarifications:** Cancer, hypertension and coronary artery disease, asthma, and diabetes.
LAFS.68.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.
LAFS.7.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 7 topics, texts, and issues, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions, track progress toward specific goals and deadlines, and define individual roles as needed. c. Pose questions that elicit elaboration and respond to others' questions and comments with relevant observations and ideas that bring the discussion back on topic as needed. d. Acknowledge new information expressed by others and, when warranted, modify their own views.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
MAFS.7.SP.3.5:	Understand that the probability of a chance event is a number between 0 and 1 that expresses the likelihood of the event occurring. Larger numbers indicate greater likelihood. A probability near 0 indicates an unlikely event, a probability around 1/2 indicates an event that is neither unlikely nor likely, and a probability near 1 indicates a likely event.

General Course Information and Notes

VERSION DESCRIPTION

This course is designed for 7th and 8th grade students and is intended to be 18 weeks in length. The purpose of this course is to build on previously acquired knowledge, skills, and values necessary for the implementation and maintenance of a physically active lifestyle. The course content provides exposure to a variety of movement opportunities and experiences which include, but is not limited to: Outdoor Pursuits/Aquatics, Individual/Dual Sports and Alternative/Extreme Sports. The integration of fitness concepts throughout the content is critical to student success in this course and in the development of a healthy and physically active lifestyle.

GENERAL NOTES

Special Note:

Instructional Practices

Teaching from a well-written, grade-level textbook enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.

4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

QUALIFICATIONS

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

Any field when certification reflects a bachelor or higher degree.

Course Standards

Name	Description
PE.8.C.2.5:	Provide feedback on skill patterns of self and partner by detecting and correcting mechanical errors.
PE.8.C.2.6:	Identify the critical elements for successful performance in a variety of sport skills or physical activities.
PE.8.C.2.7:	List specific safety procedures and equipment necessary for a variety of sport skills and physical activities.
PE.8.C.2.8:	Describe how movement skills and strategies learned in one physical activity can be transferred and used in other physical activities. **Clarifications:** Some examples are volleyball and tennis serve and surfing and skate boarding.
PE.8.L.3.1:	Participate in moderate physical activity on a daily basis.
PE.8.L.3.2:	Participate in vigorous physical activity on a daily basis.
PE.8.L.3.6:	Identify a variety of individual/dual and alternative/extreme sport activities that promote stress management.
PE.8.L.4.1:	Create, implement and assess a personal fitness program in collaboration with a teacher.
PE.8.L.4.2:	Develop goals and strategies for a personal physical fitness program.
PE.8.L.4.3:	Use available technology to assess, design and evaluate a personal physical fitness program.
PE.8.L.4.4:	Develop a personal fitness program including a variety of physical activities.
PE.8.L.4.5:	Identify health-related problems associated with low levels of cardiorespiratory endurance, muscular strength and endurance, flexibility and body composition.
PE.8.L.4.6:	Define training principles appropriate for enhancing cardiorespiratory endurance, muscular strength and endurance, flexibility and body composition. **Clarifications:** Some examples of training principles are overload and specificity.
PE.8.M.1.3:	Demonstrate body management for successful participation in a variety of modified games and activities. **Clarifications:** Some examples of body management are balance and agility.
PE.8.M.1.4:	Apply principles of biomechanics necessary for safe and successful performance.
PE.8.M.1.7:	Apply skill-related components of balance, reaction time, agility, coordination, power and speed to enhance performance levels.
PE.8.M.1.8:	Apply technology to evaluate, monitor and improve individual motor skills. **Clarifications:** Some examples of technology are Excel spreadsheets or web based programs to chart or log activities, heart rate monitors, videotapes and digital cameras.
PE.8.M.1.9:	Select and utilize appropriate safety equipment.
PE.8.R.5.1:	List ways to act independently of peer pressure during physical activities.
PE.8.R.5.2:	Develop strategies for including persons of diverse backgrounds and abilities while participating in a variety of physical activities.
PE.8.R.5.4:	Maintain appropriate personal, social and ethical behavior while participating in a variety of physical activities. **Clarifications:** Some examples are respecting teammates, opponents and officials and accepting both victory and defeat.
PE.8.R.5.5:	Demonstrate appropriate etiquette, care of equipment, respect for facilities and safe behaviors while participating in a variety of physical activities.
PE.8.R.6.1:	Discuss opportunities for participation in a variety of physical activities outside of the school setting that contribute to personal enjoyment and the attainment or maintenance of a healthy lifestyle.
PE.8.R.6.2:	Describe the potential benefits of participation in a variety of physical activities. **Clarifications:** Some examples of potential benefits are physical, mental, emotional and social.
HE.8.B.4.1:	Illustrate skills necessary for effective communication with family, peers, and others to enhance health. **Clarifications:** Refusal skills, nonverbal communication, asking questions, "I" messages, assertiveness, negotiation, and making requests.
HE.8.B.4.3:	Examine the possible causes of conflict among youth in schools and communities. **Clarifications:** Relationships, territory, jealousy, and gossip/rumors.
HE.8.B.5.2:	Categorize healthy and unhealthy alternatives to health-related issues or problems. **Clarifications:** (Alcohol consumption, sleep requirements, physical activity, and time management.)
HE.8.B.5.3:	Compile the potential outcomes of each option when making a health-related decision. **Clarifications:** Consequences: injury, addiction, and legal, social, sexual, and financial.
HE.8.B.5.5:	Evaluate the outcomes of a health-related decision. **Clarifications:** Addiction from alcohol consumption, brain damage from inhalant use, pregnancy from sexual activity, and weight management from proper nutrition.
	Design an individual goal to adopt, maintain, or improve a personal health practice.

HE.8.B.6.2:	**Clarifications:** Physical activity, eating habits, cyber bullying, social relationships, and sleep habits.
HE.8.B.6.3:	Apply strategies and skills needed to attain a personal health goal. **Clarifications:** Physical activity, nutrition modification, and anger management.
HE.8.B.6.4:	Describe how personal health goals can vary with changing abilities, priorities, and responsibilities. **Clarifications:** Weight reduction, cost of healthier food, availability of exercise equipment, and general health.
HE.8.C.1.2:	Analyze the interrelationship between healthy/unhealthy behaviors and the dimensions of health: physical, mental/emotional, social, and intellectual. **Clarifications:** Sleep/studying for tests, road rage/vehicular crashes, bullying/depression, and healthy relationships/emotional health.
HE.8.C.1.4:	Investigate strategies to reduce or prevent injuries and other adolescent health problems. **Clarifications:** Recognize signs and symptoms of depression, accessing resources, abstinence to reduce sexually transmitted diseases, sexually transmitted infections, and pregnancy; places to avoid; and healthy relationship skills.
HE.8.C.1.8:	Anticipate the likelihood of injury or illness if engaging in unhealthy/risky behaviors. **Clarifications:** Death or injury from car crashes and underage drinking/distracted driving, injuries resulting from fighting and bullying, and respiratory infections from poor hygiene.
HE.8.C.2.2:	Assess how the health beliefs of peers may influence adolescent health. **Clarifications:** Drug-use myths, perception of healthy body composition, and perceived benefits of energy drinks.
HE.8.C.2.3:	Analyze how the school and community may influence adolescent health. **Clarifications:** Drug-abuse education programs, volunteering opportunities, and availability of recreational facilities/programs.
HE.8.C.2.6:	Analyze the influence of technology on personal and family health. **Clarifications:** TV advertisements for unhealthy foods, volume of headphones, websites, and social marketing for health information.
HE.8.C.2.8:	Explain how the perceptions of norms influence healthy and unhealthy behaviors. **Clarifications:** Sexual abstinence, prescription-drug use, marijuana use, and perception that certain abusive-relationship behaviors are "normal."
HE.8.C.2.9:	Analyze the influence of personal values, attitudes, and beliefs about individual health practices and behaviors. **Clarifications:** Social conformity, desires, and impulses.
HE.8.P.7.1:	Assess the importance of assuming responsibility for personal-health behaviors, including sexual behavior. **Clarifications:** Sexual abstinence, skin care, and drug abuse.
HE.8.P.7.2:	Apply healthy practices and behaviors that will maintain or improve personal health and reduce health risks. **Clarifications:** Participate in various physical activities, foster healthy relationships, set healthy goals, make healthy food choices, and practice Internet safety, resist negative peer pressure, get adequate sleep, and engage in respectful equality-based relationships.
HE.8.P.8.1:	Promote positive health choices with the influence and support of others. **Clarifications:** Promotion of oral health, sexual abstinence, no alcohol, tobacco, and other drug abuse.
HE.8.P.8.3:	Work cooperatively to advocate for healthy individuals, peers, families, and schools. **Clarifications:** Promote community initiatives; create media campaigns, peer-led prevention campaigns, and school wellness councils.
LAFS.68.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.
LAFS.8.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 8 topics, texts, and issues, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions and decision-making, track progress toward specific goals and deadlines, and define individual roles as needed. c. Pose questions that connect the ideas of several speakers and respond to others' questions and comments with relevant evidence, observations, and ideas. d. Acknowledge new information expressed by others, and, when warranted, qualify or justify their own views in light of the evidence presented.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
	Make sense of problems and persevere in solving them. Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending

MAFS.K12.MP.1.1:	on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.

General Course Information and Notes

VERSION DESCRIPTION

This semester-long Wellness Education course is designed for 8th grade students, the purpose of which is to further develop the knowledge, skills and values to enhance healthy behaviors that influence lifestyle choices and student health and fitness. Students will realize the full benefit of this course when it is taught with an integral approach.

English Language Development (ELD) Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. Course Standards

Name	Description
PE.912.C.2.6:	Compare and contrast the health-related benefits of various physical activities.
PE.912.C.2.7:	Evaluate the effectiveness of specific warm-up and cool-down activities.
PE.912.C.2.8:	Differentiate between the three different types of heat illnesses associated with fluid loss. **Clarifications:** The three types of heat illnesses are heat cramps, heat exhaustion and heat stroke.
PE.912.C.2.9:	Explain the precautions to be taken when exercising in extreme weather and/or environmental conditions. **Clarifications:** Some examples of precautions are hydration and appropriate attire.
PE.912.C.2.10:	Analyze long-term benefits of regularly participating in physical activity.
PE.912.C.2.11:	Explain how each of the health-related components of fitness are improved through the application of training principles. **Clarifications:** The health-related components of fitness are cardiorespiratory endurance, muscular strength, muscular endurance, flexibility and body composition.
PE.912.C.2.12:	Compare and contrast aerobic versus anaerobic activities.
PE.912.C.2.13:	Document food intake, calories consumed and energy expended through physical activity and analyze the results.
PE.912.C.2.14:	Compare and contrast the skill-related components of fitness used in various physical activities. **Clarifications:** The skill-related components of fitness are speed, coordination, balance, power, agility and reaction time.
PE.912.C.2.15:	Calculate individual target heart-rate zone and analyze how to adjust intensity level to stay within the desired range.
PE.912.C.2.16:	Explain the methods of monitoring levels of intensity during aerobic activity. **Clarifications:** Some examples are a talk test, rate of perceived exertion and checking one's heart rate/pulse.
PE.912.C.2.17:	Assess physiological effects of exercise during and after physical activity. **Clarifications:** Some examples are breathing, resting heart rate and blood pressure.
PE.912.C.2.18:	Differentiate between fact and fallacy as it relates to consumer physical fitness products and programs. **Clarifications:** Some examples are weight-loss pills, food labels and exercise equipment.
PE.912.C.2.22:	Explain the skill-related components of fitness and how they enhance performance levels. **Clarifications:** The skill-related components of fitness are speed, coordination, balance, power, agility and reaction time.
PE.912.C.2.23:	Apply appropriate technology and analyze data to evaluate, monitor and/or improve performance.
PE.912.C.2.25:	Analyze and evaluate the risks, safety procedures, rules and equipment associated with specific course activities.
PE.912.C.2.27:	Compare and contrast how movement skills from one physical activity can be transferred and used in other physical activities. **Clarifications:** Some examples are volleyball and tennis serve, surfing and skate boarding.
PE.912.L.3.1:	Participate in a variety of physical activities to meet the recommended number of minutes of moderate to vigorous physical activity beyond physical education on five or more days of the week.
PE.912.L.3.2:	Participate in a variety of activities that promote the health-related components of fitness. **Clarifications:** The health-related components of fitness are cardiorespiratory endurance, muscular strength, muscular endurance, flexibility and body composition.
PE.912.L.3.3:	Identify a variety of activities that promote effective stress management.
PE.912.L.3.4:	Identify the in-school opportunities for participation in a variety of physical activities.
PE.912.L.3.5:	Identify the community opportunities for participation in a variety of physical activities.
PE.912.L.3.6:	Identify risks and safety factors that may affect physical activity throughout life.
PE.912.L.4.1:	Design a personal fitness program. **Clarifications:** Some examples of things to consider when designing a personal fitness program are timelines and current fitness level.
PE.912.L.4.2:	Identify ways to self-assess and modify a personal fitness program.
PE.912.L.4.3:	Identify strategies for setting goals when developing a personal fitness program.
PE.912.L.4.4:	Use available technology to assess, design and evaluate a personal fitness program.
PE.912.L.4.5:	Apply the principles of training to personal fitness goals. **Clarifications:** Some examples of training principles are overload, specificity and progression.

PE.912.L.4.6:	Identify health-related problems associated with low levels of cardiorespiratory endurance, muscular strength and endurance, flexibility and body composition.
PE.912.L.4.7:	Evaluate how to make changes in an individual wellness plan as lifestyle changes occur.
PE.912.M.1.12:	Select and perform complex movements using a variety of equipment which lead to improved or maintained muscular strength and endurance. **Clarifications:** An example is performing plyometrics.
PE.912.M.1.13:	Perform a student-designed cardiorespiratory enhancing workout.
PE.912.M.1.14:	Utilize technology to assess, enhance and maintain health and skill-related fitness levels. **Clarifications:** Some examples of technology are Excel spreadsheets or web based programs to chart or log activities, heart rate monitors, videotapes or digital cameras.
PE.912.M.1.15:	Select and apply sport/activity specific warm-up and cool-down techniques.
PE.912.M.1.16:	Apply the principles of training and conditioning to accommodate individual needs and strengths. **Clarifications:** Some examples of training principles are overload, specificity and progression.
PE.912.M.1.17:	Demonstrate basic cardiopulmonary resuscitation (CPR) procedures.
PE.912.M.1.19:	Use correct body alignment, strength, flexibility and coordination in the performance of technical movements.
PE.912.M.1.33:	Practice complex motor activities in order to improve performance.
PE.912.M.1.34:	Demonstrate use of the mechanical principles as they apply to specific course activities. **Clarifications:** Some examples are balance, force and leverage.
PE.912.M.1.35:	Select proper equipment and apply all appropriate safety procedures necessary for participation.
PE.912.R.5.2:	Develop strategies for including persons of diverse backgrounds and abilities while participating in a variety of physical activities.
PE.912.R.5.3:	Demonstrate sportsmanship during game situations. **Clarifications:** Some examples are controlling emotions, resolving conflicts, respecting opponents and officials, and accepting both victory and defeat.
PE.912.R.5.4:	Maintain appropriate personal, social and ethical behavior while participating in a variety of physical activities. **Clarifications:** Some examples are respecting teammates, opponents and officials, and accepting both victory and defeat.
PE.912.R.5.5:	Demonstrate appropriate etiquette, care of equipment, respect for facilities and safe behaviors while participating in a variety of physical activities.
PE.912.R.6.1:	Discuss opportunities for participation in a variety of physical activities outside of the school setting that contribute to personal enjoyment and the attainment or maintenance of a healthy lifestyle.
PE.912.R.6.2:	Analyze physical activities from which benefits can be derived. **Clarifications:** Some examples of potential benefits are physical, mental, emotional and social.
PE.912.R.6.3:	Analyze the roles of games, sports and/or physical activities in other cultures.
HE.912.B.4.2:	Assess refusal, negotiation, and collaboration skills to enhance health and avoid or reduce health risks. **Clarifications:** Validate other's opinions, use direct statement, use active statement, and offer alternatives.
HE.912.B.4.3:	Demonstrate strategies to prevent, manage, or resolve interpersonal conflicts without harming self or others. **Clarifications:** Effective verbal and nonverbal communication, compromise, and conflict-resolution.
HE.912.B.4.4:	Analyze the validity of ways to ask for and offer assistance to enhance the health of self and others. **Clarifications:** Verbal and written communication, active listening, and how to seek help for a friend.
HE.912.B.5.1:	Determine the value of applying a thoughtful decision-making process in health-related situations. **Clarifications:** Defining healthy boundaries and relationships, sexual activity, alcohol consumption, organ-donor decisions, child care, protection against infectious agents, wellness promotion, and first-aid-treatment options.
HE.912.B.5.2:	Generate alternatives to health-related issues or problems. **Clarifications:** Health benefits of menu options, refusal-skill options, pre- and post-natal care, natural and man-made conditions, and current trends in disease prevention.
HE.912.B.5.3:	Appraise the potential short-term and long-term outcomes of each alternative on self and others. **Clarifications:** Nutrition plan based on personal needs and preferences, impact of chronic health condition on individual and family, weapons on campus, and use of stress management and coping skills.
HE.912.B.5.4:	Assess whether individual or collaborative decision making is needed to make a healthy decision. **Clarifications:** Planning a post-high school career/education, purchasing the family's groceries for the week, planning the weekly menu, planning appropriate activities for siblings, community planning, Internet safety, and purchasing insurance.
HE.912.B.6.1:	Evaluate personal health practices and overall health status to include all dimensions of health. **Clarifications:** Personal strengths, physical fitness, peer relationships, environmental health, personal hygiene, non-communicable illness or disease, injury prevention, and first-aid responder's safety practices.

HE.912.B.6.2:	Formulate a plan to attain a personal health goal that addresses strengths, needs, and risks. **Clarifications:** Weight management, comprehensive physical fitness, stress management, dating relationships, risky behaviors, and a wellness-program plan.
HE.912.B.6.3:	Implement strategies and monitor progress in achieving a personal health goal. **Clarifications:** Stress management, time out, using of a squeeze ball when frustrated, talking with a friend or professional, pacing yourself, setting realistic expectations, using rewards, getting support, and wellness promotion.
HE.912.B.6.4:	Formulate an effective long-term personal health plan. **Clarifications:** Stress reduction, weight management, healthier eating habits, improved physical fitness, and individual responsibilities for protecting health.
HE.912.C.1.1:	Predict how healthy behaviors can affect health status. **Clarifications:** Making positive choices/avoiding risky behaviors: healthy food, substance abuse, and healthy relationship skills; regular medical and dental screenings; regular physical activity, and workplace safety.
HE.912.C.1.2:	Interpret the significance of interrelationships in mental/emotional, physical, and social health. **Clarifications:** Substance abuse, eating disorders, sexual behaviors, healthy/unhealthy relationships, self-esteem, stress/anger management, and regular exercise.
HE.912.C.1.4:	Propose strategies to reduce or prevent injuries and health problems. **Clarifications:** Mandatory passenger-restraint/helmet laws, refusal skills, mandatory immunizations, healthy relationship skills, and improved inspection of food sources.
HE.912.C.1.5:	Analyze strategies for prevention, detection, and treatment of communicable and chronic diseases. **Clarifications:** Health prevention, detection, and treatment of: breast and testicular cancer, suicide, obesity, and industrial-related chronic disease.
HE.912.C.1.7:	Analyze how heredity and family history can impact personal health. **Clarifications:** Drug use, family obesity, heart disease, mental health, and non-communicable illness or disease.
HE.912.C.1.8:	Assess the degree of susceptibility to injury, illness, or death if engaging in unhealthy/risky behaviors. **Clarifications:** Risks associated with alcohol abuse, including poison, date rape, and death; cancer and chronic lung disease related to tobacco use; overdose from drug use; child abuse or neglect; and dating violence.
HE.912.C.2.1:	Analyze how the family influences the health of individuals. **Clarifications:** Nutritional management of meals, composition of and relationships within families, and health-insurance status.
HE.912.C.2.2:	Compare how peers influence healthy and unhealthy behaviors. **Clarifications:** Binge drinking and social groups, sexual coercion [pressure, force, or manipulation] by a dating partner, students' recommendations for school vending machines, healthy lifestyle, review trends in current and emerging diseases, and use of helmets and seatbelts.
HE.912.C.2.3:	Assess how the school and community can affect personal health practice and behaviors. **Clarifications:** Healthier foods, required health education, health screenings, and enforcement of "no tolerance" policies related to all forms of violence, and AED availability and training.
HE.912.C.2.4:	Evaluate how public health policies and government regulations can influence health promotion and disease prevention. **Clarifications:** Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.
HE.912.C.2.5:	Evaluate the effect of media on personal and family health. **Clarifications:** Compares brand-name/store-brand items in home, analyzes television viewing habits, identifies effective PSAs, consumer skills, advertisements of health-related community resources, participation in risky behaviors, and deconstructs media to identify promotion of unhealthy stereotypes, and normalization of violence.
HE.912.C.2.6:	Evaluate the impact of technology on personal, family, and community health. **Clarifications:** Automated external defibrillator in the community, pedestrian crosswalks with audible directions, type of information requested from local 211/hotlines or websites, consumer websites, Internet safety, and disease prevention and control.
HE.912.C.2.7:	Analyze how culture supports and challenges health beliefs, practices, and behaviors. **Clarifications:** Various cultures' dietary patterns, rites of passage, courtship practices, family roles, personal relationships, ethics, and parenting.
HE.912.C.2.8:	Analyze how the perceptions of norms influence healthy and unhealthy behaviors. **Clarifications:** Driving over the speed limit, teen parenting, binge drinking, relationships, parenting, health information, environmental practices, and media messages.
HE.912.C.2.9:	Evaluate the influence of personal values, attitudes, and beliefs about individual health practices and behaviors. **Clarifications:**

	Social conformity, self-discipline, and impulse vs. delayed gratification.
HE.912.P.7.1:	Analyze the role of individual responsibility in enhancing health. **Clarifications:** Food choices, media messages, future impact of lifestyle choices, individual responsibility for health protection, and stress management.
HE.912.P.7.2:	Evaluate healthy practices and behaviors that will maintain or improve health and reduce health risks. **Clarifications:** Lifestyle choices: drug use/abuse, healthy diet, controlling modes of transmission of infectious agents, riding with impaired drivers, seeking mental-health services when needed, sexual behavior, and engaging in healthy relationships.
HE.912.P.8.1:	Demonstrate how to influence and support others in making positive health choices. **Clarifications:** Avoidance of underage drinking, prevention of driving under the influence, suicide prevention, promotion of healthy dating/personal relationships, responsible parenting, disease prevention, and promotion of first-aid training.
HE.912.P.8.3:	Work cooperatively as an advocate for improving personal, family, and community health. **Clarifications:** Support local availability of healthy food options; environmentally friendly shopping; victim, drug or teen court advocacy; advocate for peer-led abuse-prevention education programs, community resource information; and home/school safety.
LAFS.910.L.3.6:	Acquire and use accurately general academic and domain-specific words and phrases, sufficient for reading, writing, speaking, and listening at the college and career readiness level; demonstrate independence in gathering vocabulary knowledge when considering a word or phrase important to comprehension or expression.
LAFS.910.RL.2.4:	Determine the meaning of words and phrases as they are used in the text, including figurative and connotative meanings; analyze the cumulative impact of specific word choices on meaning and tone (e.g., how the language evokes a sense of time and place; how it sets a formal or informal tone).
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.
LAFS.910.W.3.8:	Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the usefulness of each source in answering the research question; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and following a standard format for citation.
LAFS.910.WHST.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibly and dynamically.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
MAFS.912.S-ID.1.2:	Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★ **Clarifications:** In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

General Course Information and Notes

VERSION DESCRIPTION

The purpose of this course is to develop and enhance healthy behaviors that influence lifestyle choices and student health and fitness. Students will realize the full benefit of this course when it is taught with an integrated approach.

In addition to the physical education content represented in the benchmarks below, specific health education topics within this course include, but are not limited to:

Mental/Social Health
Physical Activity
Components of Physical Fitness
Nutrition and Wellness Planning
Diseases and Disorders
Health Advocacy
First Aid/CPR
Alcohol, Tobacco, and Drug Prevention
Human Sexuality including Abstinence and HIV
Internet Safety

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

Course Standards

Name	Description
PE.K.C.2.1:	Recognize locomotor skills. **Clarifications:** Some examples of locomotor skills are walking, running, skipping, leaping, hopping, jumping and galloping.
PE.K.C.2.2:	Recognize physical activities have safety rules and procedures. **Clarifications:** An example would be to put equipment away when not in use in order to keep the physical activity area safe.
PE.K.C.2.4:	Recognize there are deep and shallow areas of a pool, and identify the dangers of entering a body of water without supervision. **Clarifications:** An example of a danger is entering the water when there is not an adult present.
PE.K.C.2.7:	Identify personal and general space.
PE.K.C.2.8:	Recognize movement concepts. **Clarifications:** Some examples of movement concepts are directions, pathways and levels.
PE.K.L.3.4:	Identify opportunities for involvement in physical activities after the school day.
PE.K.L.3.6:	Identify the benefits of participating in physical activity.
PE.K.L.3.7:	Verbally state the search used before crossing a roadway.
PE.K.L.4.1:	Identify the location of muscles that help the body perform specific physical activities.
PE.K.L.4.2:	Identify that the heart beats faster during more intense physical activity.
PE.K.L.4.3:	Identify activities that increase breathing and heart rate.
PE.K.L.4.5:	Identify a benefit of flexibility.
PE.K.L.4.6:	Differentiate between healthy and unhealthy food choices.
PE.K.M.1.1:	Use a variety of locomotor skills to travel in personal and general space. **Clarifications:** Some examples of locomotor skills are running, galloping and skipping.
PE.K.M.1.3:	Balance a lightweight object on a paddle/racket while moving.
PE.K.M.1.5:	Use two hands to bounce and catch a large playground ball.
PE.K.M.1.7:	Catch a variety of self-tossed objects.
PE.K.M.1.8:	Roll and throw a variety of objects using an underhand motion.
PE.K.M.1.11:	Balance on a variety of body parts.
PE.K.R.5.1:	Identify ways to cooperate with a partner during physical activity.
PE.K.R.5.2:	Use equipment safely and properly.
PE.K.R.5.3:	Identify ways to treat others with respect during physical activity.
PE.K.R.6.1:	Identify physical activities that are enjoyable.
PE.K.R.6.2:	Identify a benefit of willingly trying new movements and motor skills.
PE.K.R.6.3:	Identify the benefits of continuing to participate when not successful on the first try.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
LAFS.K12.L.3.4:	Determine or clarify the meaning of unknown and multiple-meaning words and phrases by using context clues, analyzing meaningful word parts, and consulting general and specialized reference materials, as appropriate.
MAFS.K.G.1.1:	Describe objects in the environment using names of shapes, and describe the relative positions of these objects using terms such as *above, below, beside, in front of, behind, and next to.*

Course Standards

Name	Description
PE.K.C.2.1:	Recognize locomotor skills. **Clarifications:** Some examples of locomotor skills are walking, running, skipping, leaping, hopping, jumping and galloping.
PE.K.C.2.2:	Recognize physical activities have safety rules and procedures. **Clarifications:** An example would be to put equipment away when not in use in order to keep the physical activity area safe.
PE.K.C.2.3:	Recognize technology can be utilized during physical activity. **Clarifications:** Some examples of developmentally-appropriate technology for students to recognize are stop watches, pedometers and scales.
PE.K.C.2.4:	Recognize there are deep and shallow areas of a pool, and identify the dangers of entering a body of water without supervision. **Clarifications:** An example of a danger is entering the water when there is not an adult present.
PE.K.C.2.5:	Recognize the concept of a dominant hand/foot for throwing/striking/kicking patterns. **Clarifications:** A dominant hand/foot is the one selected by the student that feels most natural for throwing/striking/kicking.
PE.K.C.2.6:	Recite cues for a variety of movement patterns and skills. **Clarifications:** Some examples of movement patterns and skills are locomotor, non-locomotor, throwing and catching.
PE.K.C.2.7:	Identify personal and general space.
PE.K.C.2.8:	Recognize movement concepts. **Clarifications:** Some examples of movement concepts are directions, pathways and levels.
PE.K.L.3.1:	Identify a moderate physical activity.
PE.K.L.3.2:	Identify a vigorous physical activity.
PE.K.L.3.3:	Identify opportunities for involvement in physical activities during the school day.
PE.K.L.3.4:	Identify opportunities for involvement in physical activities after the school day.
PE.K.L.3.5:	Describe physical-activity goal-setting.
PE.K.L.3.6:	Identify the benefits of participating in physical activity.
PE.K.L.3.7:	Verbally state the search used before crossing a roadway.
PE.K.L.4.1:	Identify the location of muscles that help the body perform specific physical activities.
PE.K.L.4.2:	Identify that the heart beats faster during more intense physical activity.
PE.K.L.4.3:	Identify activities that increase breathing and heart rate.
PE.K.L.4.4:	Identify a physiological sign of participating in physical activity.
PE.K.L.4.5:	Identify a benefit of flexibility.
PE.K.L.4.6:	Differentiate between healthy and unhealthy food choices.
PE.K.M.1.1:	Use a variety of locomotor skills to travel in personal and general space. **Clarifications:** Some examples of locomotor skills are running, galloping and skipping.
PE.K.M.1.2:	Strike objects using body parts forcefully. **Clarifications:** An example is kicking a soccer ball with your foot.
PE.K.M.1.3:	Balance a lightweight object on a paddle/racket while moving.
PE.K.M.1.4:	Strike an object forcefully using a modified, long-handled implement of various sizes, weights and compositions. **Clarifications:** Some examples of modified, developmentally- appropriate long-handled implements are bats, hockey sticks and golf clubs.
PE.K.M.1.5:	Use two hands to bounce and catch a large playground ball.
PE.K.M.1.6:	Participate in a variety of introductory water skills. **Clarifications:** Some examples of introductory water skills are water entry, putting face in water and supported with feet off the bottom.
PE.K.M.1.7:	Catch a variety of self-tossed objects.
PE.K.M.1.8:	Roll and throw a variety of objects using an underhand motion.

PE.K.M.1.9:	Throw a variety of objects forcefully using an overhand motion.
PE.K.M.1.10:	Perform a creative-movement sequence with a clear beginning balance, at least one movement and a clear ending shape.
PE.K.M.1.11:	Balance on a variety of body parts.
PE.K.M.1.12:	Perform a variety of rolling actions. **Clarifications:** Some examples of rolling actions are pencil roll and forward roll.
PE.K.M.1.13:	Move in a variety of ways in relation to others. **Clarifications:** Some examples of this are chasing, fleeing and dodging.
PE.K.R.5.1:	Identify ways to cooperate with a partner during physical activity.
PE.K.R.5.2:	Use equipment safely and properly.
PE.K.R.5.3:	Identify ways to treat others with respect during physical activity.
PE.K.R.6.1:	Identify physical activities that are enjoyable.
PE.K.R.6.2:	Identify a benefit of willingly trying new movements and motor skills.
PE.K.R.6.3:	Identify the benefits of continuing to participate when not successful on the first try.
HE.K.B.5.1:	Name situations when a health-related decision can be made individually or when assistance is needed. **Clarifications:** Recreational water activities. Some examples of individual decisions may be participating safely in aquatic activities, following school rules, getting dressed, choosing appropriate clothes, and practicing good hygiene.
HE.K.C.1.2:	Recognize the physical dimensions of health. **Clarifications:** Hygiene, exercise, eating habits, and cooperation.
HE.K.P.7.1:	Identify healthy practices and behaviors to maintain or improve personal health. **Clarifications:** Seek a safe environment, seek help, and practice universal precautions.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
LAFS.K12.L.3.4:	Determine or clarify the meaning of unknown and multiple-meaning words and phrases by using context clues, analyzing meaningful word parts, and consulting general and specialized reference materials, as appropriate.
MAFS.K.G.1.1:	Describe objects in the environment using names of shapes, and describe the relative positions of these objects using terms such as *above, below, beside, in front of, behind, and next to.*

Grade Level(s): K

Physical Education - Grade 1 (#5015030) 2015 - 2022 (current)

Course Standards

Name	Description
PE.1.C.2.1:	Identify the critical elements of locomotor skills. **Clarifications:** Some examples of critical elements of locomotor skills are step-hop for skipping and use of one foot for hopping.
PE.1.C.2.2:	Identify safety rules and procedures for teacher-selected physical activities. **Clarifications:** An example of a safety procedure is having students stand a safe distance away from a student swinging a bat during striking activities.
PE.1.C.2.3:	Identify technology that can be utilized to enhance physical activity. **Clarifications:** Some examples of developmentally-appropriate technology for students to identify are stop watches, pedometers and scales.
PE.1.C.2.4:	Identify the rules for safe water activities, and recognize the importance of having a lifeguard near water or in a swimming facility. **Clarifications:** An example of a rule for safe water activity would be the use of a life jacket.
PE.1.C.2.5:	Recognize the importance of practicing to improve performance. **Clarifications:** An example is initially getting two out of five bean bags into a hoop while performing an underhand toss, then improving to four out of five due to practicing.
PE.1.C.2.6:	Use skill cues to improve performance. **Clarifications:** Some examples of skill cues are palm up for an underhand throw and keep ball close to body when dribbling.
PE.1.C.2.7:	Identify dominant hand/foot for use with throwing/dribbling/striking/kicking skills. **Clarifications:** A dominant hand/foot is the one selected by the student that feels most natural for throwing/dribbling/striking/kicking patterns.
PE.1.C.2.8:	Identify movement concepts. **Clarifications:** Some examples of movement concepts are directions, pathways and levels.
PE.1.C.2.9:	Name examples of warm-up and cool-down exercises. **Clarifications:** An example of a warm-up exercise is an activity that gets your blood flowing. An example of a cool-down exercise is one that slows your heart rate.
PE.1.L.3.1:	Identify a moderate physical activity.
PE.1.L.3.2:	Identify a vigorous physical activity.
PE.1.L.3.3:	Identify opportunities for involvement in physical activities during the school day.
PE.1.L.3.4:	Identify opportunities for involvement in physical activities after the school day.
PE.1.L.3.5:	Set physical-activity goals.
PE.1.L.3.6:	Identify the health benefits of physical activity.
PE.1.L.3.7:	Identify edges, pedestrians, vehicles and traffic.
PE.1.L.4.1:	Identify a benefit of strengthening muscles.
PE.1.L.4.2:	Identify the components of health-related physical fitness.
PE.1.L.4.3:	Identify the changes in heart rate before, during and after physical activity.
PE.1.L.4.4:	Identify the difference in the activity of the heart during rest and while physically active.
PE.1.L.4.5:	Discuss the physiological signs of physical activity.
PE.1.L.4.6:	Identify how to properly flex and extend body parts to promote flexibility.
PE.1.L.4.7:	Identify the food groups.
PE.1.M.1.1:	Travel using various locomotor skills while changing directions, pathways and speeds.
PE.1.M.1.2:	Strike an object upward using body parts. **Clarifications:** An example is using different body parts to strike a balloon or beach ball upward.
PE.1.M.1.3:	Strike a lightweight object upward continuously using a paddle/racket.
PE.1.M.1.4:	Strike a stationary object a short distance using a modified, long-handled implement so that the object travels in the intended direction. **Clarifications:** Some examples of modified, developmentally- appropriate, long-handled implements are bats, hockey sticks and golf clubs.
PE.1.M.1.5:	Dribble an object with hands or feet while demonstrating control in general space.
PE.1.M.1.6:	Demonstrate a variety of basic water skills. **Clarifications:** Some examples of basic water skills are prone float and recover, back float with assistance and move forward and backward with assistance.

PE.1.M.1.7:	Move in different directions to catch a variety of self-tossed objects.
PE.1.M.1.8:	Demonstrate an underhand-throwing motion for accuracy using correct technique.
PE.1.M.1.9:	Demonstrate an overhand-throwing motion for distance using correct technique.
PE.1.M.1.10:	Perform a self-designed creative movement/dance sequence with a clear beginning balance, use of one movement and a different and clear ending shape.
PE.1.M.1.11:	Demonstrate a sequence of a balance, a roll and a different balance.
PE.1.M.1.12:	Demonstrate the ability to take weight onto hands. **Clarifications:** Some developmentally appropriate examples are donkey kicks and hand stands.
PE.1.M.1.13:	Chase, flee and dodge to avoid or catch others.
PE.1.M.1.14:	Use a variety of takeoff and landing patterns to jump, hop and leap safely in relation to various types of equipment. **Clarifications:** Some examples of equipment are hoops, stationary ropes and boxes.
PE.1.R.5.1:	List a benefit resulting from cooperation and sharing during physical activity.
PE.1.R.5.2:	Use physical-activity space safely and properly.
PE.1.R.5.3:	Demonstrate consideration of others while participating in physical activity.
PE.1.R.6.1:	Identify physical-activity preferences.
PE.1.R.6.2:	Identify feelings resulting from participation in physical activity.
PE.1.R.6.3:	Identify the benefits of learning new movement skills.
HE.1.B.5.2:	Identify healthy options to health-related issues or problems. **Clarifications:** Wearing bike helmet, using age- appropriate restraints, and reporting danger.
HE.1.C.1.3:	Describe ways to prevent common communicable diseases. **Clarifications:** Washing hands, covering mouth to cough and sneeze, get immunized, and do not share food or utensils.
HE.1.P.8.1:	Encourage others to make positive health choices. **Clarifications:** Use sunscreen, cross the street at marked areas, and select healthy foods.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
LAFS.K12.L.3.4:	Determine or clarify the meaning of unknown and multiple-meaning words and phrases by using context clues, analyzing meaningful word parts, and consulting general and specialized reference materials, as appropriate.
MAFS.1.OA.3.5:	Relate counting to addition and subtraction (e.g., by counting on 2 to add 2).

General Course Information and Notes

Name	Description
PE.2.C.2.1:	Describe the critical elements of locomotor skills. **Clarifications:** An example of a critical element of jumping is beginning and ending on two feet.
PE.2.C.2.2:	Identify safety rules and procedures for selected physical activities. **Clarifications:** An example of a safety procedure is having students stand a safe distance away from a student swinging a bat during striking activities.
PE.2.C.2.3:	Utilize technology to enhance experiences in physical education. **Clarifications:** Some examples of developmentally-appropriate technology are stop watches, pedometers and scales.
PE.2.C.2.4:	Explain the importance of wearing a life jacket (personal flotation device) when on a boat or near water.
PE.2.C.2.5:	Explain how appropriate practice improves the performance of movement skills. **Clarifications:** An example is initially getting two out of five bean bags into a hoop while performing an underhand toss, then improving to four out of five due to practicing.
PE.2.C.2.6:	Apply teacher feedback to effect change in performance. **Clarifications:** An example is a student applying teacher feedback of stepping with the opposite foot when throwing a ball in order to improve performance.
PE.2.C.2.7:	Describe movement concepts. **Clarifications:** Some examples of movement concepts are directions, pathways and levels.
PE.2.C.2.8:	Explain the importance of warm-up and cool-down activities. **Clarifications:** An example of the importance for warm-up activities is the prevention of injuries.
PE.2.C.2.9:	Define offense and defense. **Clarifications:** Offense is when a team is attempting to score and defense is when a team is trying to prevent the other team from scoring.
PE.2.L.3.1:	Identify a moderate physical activity.
PE.2.L.3.2:	Identify a vigorous physical activity.
PE.2.L.3.3:	Identify opportunities for involvement in physical activities during the school day.
PE.2.L.3.4:	Identify opportunities for involvement in physical activities after the school day.
PE.2.L.3.5:	Set and meet physical-activity goals.
PE.2.L.3.6:	Identify how opportunities for participation in physical activities change during the seasons.
PE.2.L.3.7:	Identify healthful benefits that result from regular participation in physical activity.
PE.2.L.3.8:	Identify the proper crossing sequence.
PE.2.L.4.1:	Identify how muscular strength and endurance enhances performance in physical activities.
PE.2.L.4.2:	Discuss the components of health-related physical fitness.
PE.2.L.4.3:	Identify that a stronger heart muscle can pump more blood with each beat.
PE.2.L.4.4:	Identify why sustained physical activity causes an increased heart rate and heavy breathing.
PE.2.L.4.5:	Identify the physiological signs of moderate to vigorous physical activity.
PE.2.L.4.6:	Identify benefits of participation in informal physical fitness assessment.
PE.2.L.4.7:	Identify appropriate stretching exercises.
PE.2.L.4.8:	Categorize food into food groups.
PE.2.M.1.1:	Perform locomotor skills with proficiency in a variety of activity settings to include rhythms/dance.
PE.2.M.1.2:	Strike an object continuously using body parts both upward and downward. **Clarifications:** An example of striking an object downward is dribbling a basketball.
PE.2.M.1.3:	Strike an object continuously using a paddle/racket both upward and downward.
PE.2.M.1.4:	Strike a stationary object a short distance using a long-handled implement so that the object travels in the intended direction. **Clarifications:** Some examples of developmentally-appropriate, long-handled implements are bats, hockey sticks and golf clubs.
PE.2.M.1.5:	Dribble with hands and feet in various pathways, directions and speeds around stationary objects.
PE.2.M.1.6:	Perform a variety of fundamental aquatics skills. **Clarifications:** Some examples of fundamental aquatics skills are prone float with flutter kick and back float recover to a standing position.
PE.2.M.1.7:	Move in different directions to catch a variety of objects softly tossed by a stationary partner.

PE.2.M.1.8:	Demonstrate an overhand-throwing motion for distance demonstrating correct technique and accuracy.
PE.2.M.1.9:	Perform one folk or line dance accurately. **Clarifications:** An example of a line dance is the Electric Slide.
PE.2.M.1.10:	Demonstrate a sequence of a balance, a roll and a different balance with correct technique and smooth transitions.
PE.2.M.1.11:	Perform at least one skill that requires the transfer of weight to hands. **Clarifications:** Some developmentally appropriate examples are hand stands and cartwheels.
PE.2.M.1.12:	Chase, flee and dodge to avoid or catch others while maneuvering around obstacles.
PE.2.R.5.1:	Identify ways to cooperate with others regardless of personal differences during physical activity.
PE.2.R.5.2:	List ways to safely handle physical-activity equipment.
PE.2.R.5.3:	Describe the personal feelings resulting from challenges, successes and failures in physical activity.
PE.2.R.5.4:	Identify ways to successfully resolve conflicts with others.
PE.2.R.6.1:	Identify ways to use physical activity to express feeling.
PE.2.R.6.2:	Discuss the relationship between skill competence and enjoyment.
PE.2.R.6.3:	Identify ways to contribute as a member of a cooperative group.
HE.2.C.1.4:	Describe ways to prevent childhood injuries in the home, school, and community settings. **Clarifications:** Recognizing abusive behaviors, following bus/playground rules, and never playing with matches.
HE.2.C.2.1:	Describe how family rules and practices influence health behaviors. **Clarifications:** Consistent/inconsistent home safety rules and modeling of food- sanitation practices at home.
HE.2.C.2.3:	Describe how the school and community influence health behaviors of children. **Clarifications:** Health and safety fairs, school and community gardens, and recycling.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
LAFS.K12.L.3.4:	Determine or clarify the meaning of unknown and multiple-meaning words and phrases by using context clues, analyzing meaningful word parts, and consulting general and specialized reference materials, as appropriate.
MAFS.2.OA.3.3:	Determine whether a group of objects (up to 20) has an odd or even number of members, e.g., by pairing objects or counting them by 2s; write an equation to express an even number as a sum of two equal addends.

General Course Information and Notes

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

QUALIFICATIONS

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

Any field when certification reflects a bachelor or higher degree.

GENERAL INFORMATION

Course Number: 5015040

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades PreK to 5 Education Courses > **Subject:** Physical Education > **SubSubject:** General > **Abbreviated Title:** PHYSICAL EDUCATION 2 **Course Length:** Year (Y)

Course Status: Draft - Course Pending Approval

Physical Education - Grade 3 (#5015050) 2015 - 2022 (current)

Course Standards

Name	Description
PE.3.C.2.1:	Identify the importance of purposeful movement and its impact on quality of performance. **Clarifications:** Some examples of purposeful movement are timing, flow, rhythm, sequencing and transfer of weight.
PE.3.C.2.2:	Understand the importance of safety rules and procedures in all physical activities. **Clarifications:** An example of a safety procedure is wearing a helmet when riding a bicycle.
PE.3.C.2.3:	Understand that technology can be utilized to gather information about performance. **Clarifications:** Some examples of technology are pedometers, accelerometers, heart-rate monitors, videos, websites and spreadsheets.
PE.3.C.2.4:	Identify and explain different items that can be used for assisting in a water-related emergency. **Clarifications:** Some examples of items that can be used in a water related emergency are poles, towels and flotation devices.
PE.3.C.2.5:	Explain how appropriate practice improves performance of movement skills. **Clarifications:** An example is initially making two out of five free throws in basketball, then improving to four out of five due to practicing.
PE.3.C.2.6:	Analyze peer performance and provide feedback.
PE.3.C.2.7:	Identify the reasons for warm-up and cool-down activities. **Clarifications:** Some examples of reasons for warm-up and cool-down activities are injury prevention and enhancing performance.
PE.3.C.2.8:	Describe basic offensive and defensive tactics. **Clarifications:** An example of an offensive tactic is keeping your body between the ball and defender while dribbling.
PE.3.L.3.1:	Identify a moderate physical activity.
PE.3.L.3.2:	Identify a vigorous physical activity.
PE.3.L.3.3:	Identify opportunities for involvement in physical activities during the school day.
PE.3.L.3.4:	Identify opportunities for involvement in physical activities after the school day.
PE.3.L.3.5:	Use an activity log to maintain a personal record of participation in physical activity during a period of time.
PE.3.L.3.6:	Identify lifestyle changes that can be made to increase the level of physical activity.
PE.3.L.3.7:	Differentiate between the correct and incorrect way to fit a bicycle helmet.
PE.3.L.4.1:	Describe how muscular strength and endurance enhances performance in physical activities.
PE.3.L.4.2:	Describe the relationship between the heart and lungs during physical activity.
PE.3.L.4.3:	Identify appropriate physical activities that result in the development of cardiorespiratory endurance.
PE.3.L.4.4:	Match physical fitness assessment events to the associated fitness component.
PE.3.L.4.5:	Identify formal and informal physical fitness assessments.
PE.3.L.4.6:	Identify ways to safely stretch major muscle groups.
PE.3.L.4.7:	Read food labels for specific nutrition facts.
PE.3.L.4.8:	Identify the principles of physical fitness.
PE.3.L.4.9:	Identify individual strengths and weaknesses based upon results of a formal fitness assessment.
PE.3.L.4.10:	Identify ways that technology can assist in the pursuit of physical fitness.
PE.3.M.1.1:	Apply locomotor skills in a variety of movement settings. **Clarifications:** Some examples of movement settings are sequences, dances and games.
PE.3.M.1.2:	Strike a stationary object from a stationary position using body parts so that the object travels in the intended direction at the desired height. **Clarifications:** Some examples of striking activities are volleying, kicking and punting.
PE.3.M.1.3:	Strike an object using a paddle/racquet demonstrating correct technique of a forehand pattern.
PE.3.M.1.4:	Strike both moving and stationary objects using a long-handled implement. **Clarifications:** Some examples of developmentally-appropriate long-handled implements are bats, hockey sticks and golf clubs.
PE.3.M.1.5:	Maintain control while dribbling with hands or feet against a defender.
PE.3.M.1.6:	Demonstrate a combination of basic swim skills. **Clarifications:** Some examples of basic swim skills are prone and back float with flutter kick, alternating arm movements and treading water.
PE.3.M.1.7:	Move in different directions to catch objects of different sizes and weights thrown by a stationary partner.
PE.3.M.1.8:	Throw balls of various sizes and weights to a stationary partner using a correct overhand motion.

PE.3.M.1.9:	Perform a teacher-designed sequence using manipulatives. **Clarifications:** Some examples of sequences using manipulatives are tinikling poles, lummi sticks and jump ropes.
PE.3.M.1.10:	Perform one dance accurately. **Clarifications:** Some examples of dances are square, contra, step and social.
PE.3.M.1.11:	Perform a self-designed gymnastics sequence consisting of clear beginning and ending balances and two different movement elements with correct technique and smooth transitions. **Clarifications:** Some examples of movement elements are balances, rolling actions, changes in speed/ direction and skills requiring weight on hands.
PE.3.M.1.12:	Continuously jump a self-turned rope.
PE.3.R.5.1:	List ways to work cooperatively with peers of differing skill levels.
PE.3.R.5.2:	List ways to show respect for the views of a peer from a different cultural background.
PE.3.R.5.3:	Identify ways to take responsibility for his/her own behavior.
PE.3.R.6.1:	List personally challenging physical-activity experiences.
PE.3.R.6.2:	Describe ways to appreciate the good physical performance of others.
PE.3.R.6.3:	Identify ways to celebrate one's own physical accomplishments while displaying sportsmanship.
HE.3.B.5.2:	List healthy options to health-related issues or problems. **Clarifications:** Healthy alternatives to unhealthy messages in the media, fear of personal safety, and nutrition options.
HE.3.B.6.1:	Select a personal health goal and track progress toward achievement. **Clarifications:** Working collaboratively with class/small group, tracking daily physical activity, using seat belts and bike helmets, limiting media time, consuming healthy foods daily, understanding the dangers of drugs, practicing refusal and conflict-resolution skills.
HE.3.C.2.1:	Explore how family and friend's traditions and customs may influence health behaviors. **Clarifications:** Family nutritional choices, gatherings, fears, traditions, religious practices, belief in holistic approach, and accepted celebration behaviors demonstrated by others.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
LAFS.K12.L.3.4:	Determine or clarify the meaning of unknown and multiple-meaning words and phrases by using context clues, analyzing meaningful word parts, and consulting general and specialized reference materials, as appropriate.
MAFS.3.MD.1.1:	Tell and write time to the nearest minute and measure time intervals in minutes. Solve word problems involving addition and subtraction of time intervals in minutes, e.g., by representing the problem on a number line diagram.

Name	Description
PE.4.C.2.1:	Understand the importance of purposeful movement in a variety of movement settings. **Clarifications:** Some examples of purposeful movement are timing, flow, rhythm, sequencing and transfer of weight.
PE.4.C.2.2:	Understand the importance of safety rules and procedures in all physical activities, especially those that are high risk. **Clarifications:** An example of a safety procedure is having students stand a safe distance away from a student swinging a golf club during striking activities.
PE.4.C.2.3:	Use technology to gather information about performance. **Clarifications:** Some examples of technology are pedometers, accelerometers, heart-rate monitors, videos, websites and spreadsheets.
PE.4.C.2.4:	Understand the importance of protecting parts of the body from the harmful rays of the sun. **Clarifications:** Some examples are sunscreen and protective clothing.
PE.4.C.2.5:	Detect errors in personal movement patterns. **Clarifications:** An example of a way to detect errors in personal movement patterns is through the use of videotaping.
PE.4.C.2.6:	Compare and discuss skills/sports that use similar movement patterns. **Clarifications:** Some examples are volleyball and tennis serve, surfing and skate boarding.
PE.4.C.2.7:	Identify proper warm-up and cool-down techniques and the reasons for using them. **Clarifications:** An example of a warm-up technique for sprinting is stretching the hamstring muscles in order to prevent injury.
PE.4.C.2.8:	Identify the importance of hydration before, during and after physical activity. **Clarifications:** An example of the importance of hydration is to prevent heat-related illnesses.
PE.4.C.2.9:	Identify basic offensive and defensive tactics for modified invasion and net activities. **Clarifications:** An example of an offensive tactic in tennis is hitting the ball away from the opponent.
PE.4.L.3.1:	Identify a moderate physical activity.
PE.4.L.3.2:	Identify a vigorous physical activity.
PE.4.L.3.3:	Identify opportunities for involvement in physical activities during the school day.
PE.4.L.3.4:	Identify opportunities for involvement in physical activities after the school day.
PE.4.L.3.5:	Implement at least one lifestyle behavior to increase physical activity.
PE.4.L.3.6:	Discuss the importance of wearing a bicycle helmet.
PE.4.L.4.1:	Identify the muscles being strengthened during the performance of specific activities.
PE.4.L.4.2:	Identify several activities related to each component of physical fitness.
PE.4.L.4.3:	Maintain heart rate within the target heart rate zone for a specified length of time during an aerobic activity.
PE.4.L.4.4:	Identify ways to participate in selected physical activities for the purpose of improving physical fitness.
PE.4.L.4.5:	Identify ways to participate in formal and informal physical fitness assessment.
PE.4.L.4.6:	Identify how specific stretches increase flexibility and reduce the chance of injury.
PE.4.L.4.7:	Understand appropriate serving size.
PE.4.L.4.8:	Explain the principles of physical fitness.
PE.4.L.4.9:	Develop short- and long-term fitness goals.
PE.4.L.4.10:	Describe ways that technology can assist in the pursuit of physical fitness.
PE.4.M.1.1:	Apply movement concepts to the performance of locomotor skills in a variety of movement settings. **Clarifications:** Some examples of movement settings are sequences, dances and games. Some examples of movement concepts are directions, effort and relationships.
PE.4.M.1.2:	Strike a moving object using body parts so that the object travels in the intended direction at the desired height. **Clarifications:** Some examples of activities to apply this are volleying, kicking and punting.
PE.4.M.1.3:	Strike an object continuously using a paddle/racquet demonstrating correct technique of a forehand pattern. **Clarifications:** Some examples of ways to strike continuously are against a wall and a partner-fed toss.
PE.4.M.1.4:	Strike moving and/or stationary objects with long-handled implements using correct technique so the objects travel in the intended direction. **Clarifications:**

	Some examples of long-handled implements are golf clubs, bats and hockey sticks.
PE.4.M.1.5:	Dribble and pass to a moving partner.
PE.4.M.1.6:	Perform a variety of swim strokes. **Clarifications:** Some examples of swim strokes are front crawl, backstroke, elementary back stroke and modified breaststroke.
PE.4.M.1.7:	Move in different directions to catch objects of different sizes and weights thrown by a stationary partner from varying distances.
PE.4.M.1.8:	Throw balls of various sizes and weights to a stationary partner from varying distances using a correct overhand motion.
PE.4.M.1.9:	Perform a teacher-designed sequence, with or without manipulatives, while demonstrating balance, coordination, clear shapes, purposeful movements and smooth transitions. **Clarifications:** Some examples of sequences are rhythm, movement and dance. Some examples of manipulatives are tinikling poles, lummi sticks and jump ropes.
PE.4.M.1.10:	Perform two or more dances accurately. **Clarifications:** Some examples of dances are line, square, contra, folk, step and social.
PE.4.M.1.11:	Perform a self-designed gymnastics sequence consisting of clear beginning and ending balances and three different movement elements with correct technique and smooth transitions. **Clarifications:** Some examples of movement elements are balances, rolling actions, changes in speed/ direction and skills requiring weight on hands.
PE.4.M.1.12:	Run and hurdle a succession of low- to medium-level obstacles.
PE.4.R.5.1:	Discuss the influence of individual differences on participation in physical activities.
PE.4.R.5.2:	List ways to encourage others while refraining from insulting/negative statements.
PE.4.R.5.3:	Demonstrate respect and caring for students with disabilities through verbal and non-verbal encouragement and assistance.
PE.4.R.6.1:	Discuss how physical activity can be a positive opportunity for social and group interaction.
PE.4.R.6.2:	Describe the connection between skill competence and enjoyment of physical activity.
PE.4.R.6.3:	Discuss ways to celebrate one's own physical accomplishments while displaying sportsmanship.
HE.4.B.3.3:	Examine resources from home, school and community that provide valid health information. **Clarifications:** Internet; reputable websites, media; television, radio, brochures, books; professional interview;, and hospitals.
HE.4.C.1.2:	Identify examples of mental/emotional, physical, and social health. **Clarifications:** Expressing appropriate feelings, treating others with respect, and participating in a daily physical activity.
HE.4.C.2.6:	Explain how technology influences personal thoughts, feelings, and health behaviors. **Clarifications:** Cyber-bullying, habitual gaming, violent video games, and seat-belt alarm.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
LAFS.K12.L.3.4:	Determine or clarify the meaning of unknown and multiple-meaning words and phrases by using context clues, analyzing meaningful word parts, and consulting general and specialized reference materials, as appropriate.
MAFS.4.G.1.3:	Recognize a line of symmetry for a two-dimensional figure as a line across the figure such that the figure can be folded along the line into matching parts. Identify line-symmetric figures and draw lines of symmetry.

Name	Description
PE.5.C.2.1:	Apply purposeful movement to a variety of movement settings to include designing and performing movement routines. **Clarifications:** Some examples of purposeful movement are timing, flow, rhythm, sequencing and transfer of weight.
PE.5.C.2.2:	Design or modify a game incorporating skills, rules and strategies.
PE.5.C.2.3:	Apply feedback gathered from the use of technology to assess and enhance performance. **Clarifications:** Some examples of technology are pedometers, accelerometers, heart-rate monitors, videos, websites and spreadsheets.
PE.5.C.2.4:	Identify the different types of basic water- rescue techniques, using various types of items. **Clarifications:** An example of a water-rescue technique is to reach out to the victim with a pole and pull him/her to safety.
PE.5.C.2.5:	Detect, analyze and correct errors in personal movement patterns.
PE.5.C.2.6:	Compare and contrast skills/sports that use similar movement patterns and concepts. **Clarifications:** Some examples are volleyball and tennis serve, surfing and skate boarding.
PE.5.C.2.7:	Identify basic practice and conditioning principles that enhance performance. **Clarifications:** An example of a conditioning principle that would enhance performance is running with weight resistance to improve speed.
PE.5.C.2.8:	Categorize basic offensive and defensive tactics for modified invasion and net activities. **Clarifications:** An example of an offensive tactic in basketball is keeping your body between the ball and the defender.
PE.5.L.3.1:	Identify a moderate physical activity.
PE.5.L.3.2:	Identify a vigorous physical activity.
PE.5.L.3.3:	Identify opportunities for involvement in physical activities during the school day.
PE.5.L.3.4:	Identify opportunities for involvement in physical activities after the school day.
PE.5.L.3.5:	Formulate a plan to increase the amount of time spent in physical activity.
PE.5.L.3.6:	Discuss lifestyle behaviors that can be made to increase physical activity.
PE.5.L.3.7:	Use technology to enhance regular participation in physical activities.
PE.5.L.3.8:	Discuss the importance of being visible, being predictable and communicating when cycling.
PE.5.L.4.1:	Differentiate between muscular strength and muscular endurance.
PE.5.L.4.2:	Identify activities that develop and maintain each component of physical fitness.
PE.5.L.4.3:	Identify that an increase in heart rate intensity is necessary to enhance cardiorespiratory endurance.
PE.5.L.4.4:	Analyze one's own physical fitness assessment results and develop strategies to enhance performance.
PE.5.L.4.5:	Select proper stretching exercises to increase flexibility and reduce the chance of injury.
PE.5.L.4.6:	Plan a menu for a balanced meal.
PE.5.L.4.7:	Apply the principles of physical fitness to exercise.
PE.5.L.4.8:	Evaluate progress toward short- and long-term fitness goals.
PE.5.L.4.9:	Explain how technology can assist in the pursuit of physical fitness.
PE.5.M.1.1:	Apply locomotor skills in a variety of movement settings, while applying the appropriate movement concepts as the situation demands. **Clarifications:** Some examples of movement settings are sequences, dances and games. Some examples of movement concepts are directions, effort and relationships.
PE.5.M.1.2:	Approach and strike a moving object with body parts so that the object travels in the intended direction at the desired height using correct technique. **Clarifications:** Some examples of activities to apply this are volleying, kicking and punting.
PE.5.M.1.3:	Strike an object continuously with a partner using a paddle/racquet demonstrating correct technique of a forehand pattern.
PE.5.M.1.4:	Strike moving and/or stationary objects with long-handled implements so the objects travel in the intended direction at the desired height using correct technique. **Clarifications:** Some examples of long-handled implements are golf clubs, bats and hockey sticks.
PE.5.M.1.5:	Apply dribbling skills in modified games, focusing on offensive strategies. **Clarifications:** Some examples of offensive strategies are fakes, stopping and starting, changing directions and changing speeds.
PE.5.M.1.6:	Demonstrate proficiency in one or more swim strokes. **Clarifications:**

	Some examples of swim strokes are front crawl, backstroke, breaststroke, sidestroke and butterfly.
PE.5.M.1.7:	Catch a variety of objects while traveling and being defended.
PE.5.M.1.8:	Throw a leading pass overhand to a moving partner using a variety of objects.
PE.5.M.1.9:	Perform a self-designed sequence, with or without manipulatives, while demonstrating balance, coordination, clear shapes, purposeful movements and smooth transitions. **Clarifications:** Some examples of sequences are rhythm, movement and dance. Some examples of manipulatives are tinikling poles, lummi sticks and jump ropes.
PE.5.M.1.10:	Perform a variety of dances accurately. **Clarifications:** Some examples of dances are line, square, contra, folk, step and social.
PE.5.M.1.11:	Perform a self-designed gymnastics sequence consisting of clear beginning and ending balances and four different movement elements with correct technique and smooth transitions. **Clarifications:** Some examples of movement elements are balances, rolling actions, changes in speed/direction and skills requiring weight on hands.
PE.5.R.5.1:	Describe a benefit of working productively with a partner to improve performance.
PE.5.R.5.2:	Describe ways to utilize equipment safely during physical activities.
PE.5.R.5.3:	Describe the influence of individual differences on participation in physical activities.
PE.5.R.6.1:	Describe how participation in physical activity is a source of self-expression and meaning.
PE.5.R.6.2:	Explain the benefits of physical activity.
PE.5.R.6.3:	Explain ways to celebrate one's own physical accomplishments while displaying sportsmanship.
HE.5.B.5.4:	Select a healthy option when making decisions for yourself and/or others. **Clarifications:** Report bullying, resolve conflicts, and use safety equipment.
HE.5.C.1.3:	Explain ways a safe, healthy home and school environment promote personal health. **Clarifications:** Smoke-free environment, clean/orderly environment, behavior rules, and availability of fresh produce.
HE.5.C.1.6:	Recognize how appropriate health care can promote personal health. **Clarifications:** Having immunizations, using medication appropriately, and seeking grief/loss counseling.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
LAFS.K12.L.3.4:	Determine or clarify the meaning of unknown and multiple-meaning words and phrases by using context clues, analyzing meaningful word parts, and consulting general and specialized reference materials, as appropriate.
MAFS.5.G.2.3:	Understand that attributes belonging to a category of two-dimensional figures also belong to all subcategories of that category. *For example, all rectangles have four right angles and squares are rectangles, so all squares have four right angles.*

General Course Information and Notes

GENERAL NOTES

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

QUALIFICATIONS

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

Any field when certification reflects a bachelor or higher degree.

GENERAL INFORMATION

Course Number: 5015070

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades PreK to 5 Education Courses > **Subject:** Physical Education > **SubSubject:** General >
Abbreviated Title: PHYSICAL EDUCATION 5
Course Length: Year (Y)

Course Status: Draft - Course Pending Approval

Grade Level(s): 5

District Head Start (#5100520) 2016 - 2022 (current)

General Course Information and Notes

QUALIFICATIONS

For Child Development Association (CDA) or CDA equivalencies, see Section 1: PreKindergarten Basic Definitions. If program serves children with disabilities as an inclusion setting, see Section 1: PreKindergarten Exceptional.

GENERAL INFORMATION

Course Number: 5100520

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades PreK to 5 Education Courses > **Subject:** Prekindergarten > **SubSubject:** General >

CARES-funded Rising Kindergarten Program (#5100600) 2020 - And Beyond (current)

General Course Information and Notes

GENERAL NOTES

Services offered by the Rising Summer Program are intended to fill gaps created by the loss of the Voluntary Pre-Kindergarten (VPK) instructional services due to a national health emergency (COVID-19). Instruction is to be based on the Florida Early Learning and Developmental Standards (flbt5.floridaearlylearning.com/docs/OEL-VPK154yo.pdf).

Program delivery is contingent upon a Memorandum of Understanding (MOU) currently being developed by the Office of Early Learning (floridaearlylearning.com). Each participating school district should have a signed MOU with their local early learning coalition in order to qualify for the program and associated CARES funding.

At this time, funding for this course is available for the 2020-2021 school year through the CARES Act. Please note that this course does not qualify for Florida Education Finance Program (FEFP).

Questions can be directed to the Office of Early Learning at 866-447-1159.

QUALIFICATIONS

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

- Child Development Associate (CSA) or CDA equivalent.
- Bachelor degree or higher in any of the following areas (see Section 1, PreK Basic Definition).
- Bachelor degree or higher in elementary education (see Section 1, PreK Basic Definition).
- Associates or higher degree in child development.
- Associates or higher degree in an unrelated field (see Section 1, PreK Basic Definitions).
- If program serves children with disabilities as an inclusive setting, see Section 1, PreK Exceptional.

See floridaearlylearning.com/vpk/vpk-providers/becoming-a-vpk-provider/vpk-instructor-qualifications for additional information on qualifications.

Course Standards

Name	Description
LAFS.6.L.1.1:	Demonstrate command of the conventions of standard English grammar and usage when writing or speaking. a. Ensure that pronouns are in the proper case (subjective, objective, possessive). b. Use intensive pronouns (e.g., *myself, ourselves*). c. Recognize and correct inappropriate shifts in pronoun number and person. d. Recognize and correct vague pronouns (i.e., ones with unclear or ambiguous antecedents). e. Recognize variations from standard English in their own and others' writing and speaking, and identify and use strategies to improve expression in conventional language.
LAFS.6.L.1.2:	Demonstrate command of the conventions of standard English capitalization, punctuation, and spelling when writing. a. Use punctuation (commas, parentheses, dashes) to set off nonrestrictive/parenthetical elements. b. Spell correctly.
LAFS.6.RI.3.8:	Trace and evaluate the argument and specific claims in a text, distinguishing claims that are supported by reasons and evidence from claims that are not.
LAFS.6.RI.3.9:	Compare and contrast one author's presentation of events with that of another (e.g., a memoir written by and a biography on the same person).
LAFS.6.RL.1.1:	Cite textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.
LAFS.6.RL.1.2:	Determine a theme or central idea of a text and how it is conveyed through particular details; provide a summary of the text distinct from personal opinions or judgments.
LAFS.6.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and issues, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions, set specific goals and deadlines, and define individual roles as needed. c. Pose and respond to specific questions with elaboration and detail by making comments that contribute to the topic, text, or issue under discussion. d. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing.
LAFS.6.SL.2.4:	Present claims and findings, sequencing ideas logically and using pertinent descriptions, facts, and details to accentuate main ideas or themes; use appropriate eye contact, adequate volume, and clear pronunciation.
LAFS.6.W.1.1:	Write arguments to support claims with clear reasons and relevant evidence. a. Introduce claim(s) and organize the reasons and evidence clearly. b. Support claim(s) with clear reasons and relevant evidence, using credible sources and demonstrating an understanding of the topic or text. c. Use words, phrases, and clauses to clarify the relationships among claim(s) and reasons. d. Establish and maintain a formal style. e. Provide a concluding statement or section that follows from the argument presented. **Standard Relation to Course: Supporting**
LAFS.6.W.1.2:	Write informative/explanatory texts to examine a topic and convey ideas, concepts, and information through the selection, organization, and analysis of relevant content. a. Introduce a topic; organize ideas, concepts, and information, using strategies such as definition, classification, comparison/contrast, and cause/effect; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension. b. Develop the topic with relevant facts, definitions, concrete details, quotations, or other information and examples. c. Use appropriate transitions to clarify the relationships among ideas and concepts. d. Use precise language and domain-specific vocabulary to inform about or explain the topic. e. Establish and maintain a formal style. f. Provide a concluding statement or section that follows from the information or explanation presented. **Standard Relation to Course: Supporting**
LAFS.6.W.3.8:	Gather relevant information from multiple print and digital sources; assess the credibility of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and providing basic bibliographic information for sources.
LAFS.6.W.3.9:	Draw evidence from literary or informational texts to support analysis, reflection, and research. a. Apply grade 6 Reading standards to literature (e.g., "Compare and contrast texts in different forms or genres [e.g., stories and poems; historical novels and fantasy stories] in terms of their approaches to similar themes and topics"). b. Apply grade 6 Reading standards to literary nonfiction (e.g., "Trace and evaluate the argument and specific claims in a text, distinguishing claims that are supported by reasons and evidence from claims that are not").
LAFS.6.W.4.10:	Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
LAFS.68.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources.
LAFS.68.RST.1.1:	Cite specific textual evidence to support analysis of science and technical texts.
LAFS.68.RST.1.2:	Determine the central ideas or conclusions of a text; provide an accurate summary of the text distinct from prior knowledge or opinions.
	Make sense of problems and persevere in solving them. Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They

MAFS.K12.MP.1.1:	analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.
MAFS.K12.MP.3.1:	**Construct viable arguments and critique the reasoning of others.** Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.
SS.6.W.1.4:	Describe the methods of historical inquiry and how history relates to the other social sciences. **Clarifications:** Examples are archaeology, geography, political science, economics.
SS.6.W.1.5:	Describe the roles of historians and recognize varying historical interpretations (historiography).
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
SC.6.N.1.1:	Define a problem from the sixth grade curriculum, use appropriate reference materials to support scientific understanding, plan and carry out scientific investigation of various types, such as systematic observations or experiments, identify variables, collect and organize data, interpret data in charts, tables, and graphics, analyze information, make predictions, and defend conclusions.

General Course Information and Notes

GENERAL NOTES

The purpose of this course is to enable students to develop basic knowledge and skills in the research process with emphasis on determining and refining research questions.

The content should include, but not be limited to, the following:
-research process
-research topics
-research questions and hypotheses
-definition, analysis, and evaluation of research questions
-review of literature and other resources
-formulation of hypotheses
-report formats, styles, and content
-directed investigations
-critical analysis of research
-a major research project, preferably cross-disciplinary

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

QUALIFICATIONS

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

Any field when certification reflects a bachelor or higher degree.

Course Standards

Name	Description
LAFS.68.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources.
LAFS.68.RST.1.1:	Cite specific textual evidence to support analysis of science and technical texts.
LAFS.68.RST.1.2:	Determine the central ideas or conclusions of a text; provide an accurate summary of the text distinct from prior knowledge or opinions.
LAFS.7.L.1.1:	Demonstrate command of the conventions of standard English grammar and usage when writing or speaking. a. Explain the function of phrases and clauses in general and their function in specific sentences. b. Choose among simple, compound, complex, and compound-complex sentences to signal differing relationships among ideas. c. Place phrases and clauses within a sentence, recognizing and correcting misplaced and dangling modifiers.
LAFS.7.RI.3.8:	Trace and evaluate the argument and specific claims in a text, assessing whether the reasoning is sound and the evidence is relevant and sufficient to support the claims.
LAFS.7.RI.3.9:	Analyze how two or more authors writing about the same topic shape their presentations of key information by emphasizing different evidence or advancing different interpretations of facts.
LAFS.7.RL.1.1:	Cite several pieces of textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.
LAFS.7.RL.1.2:	Determine a theme or central idea of a text and analyze its development over the course of the text; provide an objective summary of the text.
LAFS.7.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 7 topics, texts, and issues, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions, track progress toward specific goals and deadlines, and define individual roles as needed. c. Pose questions that elicit elaboration and respond to others' questions and comments with relevant observations and ideas that bring the discussion back on topic as needed. d. Acknowledge new information expressed by others and, when warranted, modify their own views. **Standard Relation to Course: Supporting**
LAFS.7.SL.2.4:	Present claims and findings, emphasizing salient points in a focused, coherent manner with pertinent descriptions, facts, details, and examples; use appropriate eye contact, adequate volume, and clear pronunciation.
LAFS.7.W.1.2:	Write informative/explanatory texts to examine a topic and convey ideas, concepts, and information through the selection, organization, and analysis of relevant content. a. Introduce a topic clearly, previewing what is to follow; organize ideas, concepts, and information, using strategies such as definition, classification, comparison/contrast, and cause/effect; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension. b. Develop the topic with relevant facts, definitions, concrete details, quotations, or other information and examples. c. Use appropriate transitions to create cohesion and clarify the relationships among ideas and concepts. d. Use precise language and domain-specific vocabulary to inform about or explain the topic. e. Establish and maintain a formal style. f. Provide a concluding statement or section that follows from and supports the information or explanation presented. **Standard Relation to Course: Supporting**
LAFS.7.W.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience. (Grade-specific expectations for writing types are defined in standards 1–3 above.)
LAFS.7.W.2.5:	With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well purpose and audience have been addressed.
LAFS.7.W.2.6:	Use technology, including the Internet, to produce and publish writing and link to and cite sources as well as to interact and collaborate with others, including linking to and citing sources.
LAFS.7.W.3.7:	Conduct short research projects to answer a question, drawing on several sources and generating additional related, focused questions for further research and investigation.
LAFS.7.W.3.8:	Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
LAFS.7.W.3.9:	Draw evidence from literary or informational texts to support analysis, reflection, and research. a. Apply grade 7 Reading standards to literature (e.g., "Compare and contrast a fictional portrayal of a time, place, or character and a historical account of the same period as a means of understanding how authors of fiction use or alter history"). b. Apply grade 7 Reading standards to literary nonfiction (e.g. "Trace and evaluate the argument and specific claims in a text, assessing whether the reasoning is sound and the evidence is relevant and sufficient to support the claims"). **Standard Relation to Course: Supporting**
LAFS.7.W.4.10:	Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
MAFS.K12.MP.1.1:	**Make sense of problems and persevere in solving them.** Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information

	they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.
MAFS.K12.MP.3.1:	**Construct viable arguments and critique the reasoning of others.** Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.

They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

GENERAL NOTES

The purpose of this course is to enable students to develop proficient knowledge and skills in the research process with emphasis on appropriate research design.

The content should include, but not be limited to, the following:

- research process
- experimental, descriptive, and historical research
- legal and ethical issues in research-research questions and hypotheses
- review of literature and other resources-report formats, styles, and content-investigations
- critical analysis of research
- a major research project, preferably cross-disciplinary

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. Course Standards

Name	Description
LAFS.68.RH.1.3:	Identify key steps in a text's description of a process related to history/social studies (e.g., how a bill becomes law, how interest rates are raised or lowered).
LAFS.68.RH.3.7:	Integrate visual information (e.g., in charts, graphs, photographs, videos, or maps) with other information in print and digital texts.
LAFS.68.RH.3.8:	Distinguish among fact, opinion, and reasoned judgment in a text.
LAFS.68.RH.3.9:	Analyze the relationship between a primary and secondary source on the same topic.
LAFS.68.RST.1.1:	Cite specific textual evidence to support analysis of science and technical texts.
LAFS.68.RST.1.2:	Determine the central ideas or conclusions of a text; provide an accurate summary of the text distinct from prior knowledge or opinions.
LAFS.68.RST.1.3:	Follow precisely a multistep procedure when carrying out experiments, taking measurements, or performing technical tasks.
LAFS.68.RST.3.7:	Integrate quantitative or technical information expressed in words in a text with a version of that information expressed visually (e.g., in a flowchart, diagram, model, graph, or table).
LAFS.68.RST.3.8:	Distinguish among facts, reasoned judgment based on research findings, and speculation in a text.
LAFS.68.RST.3.9:	Compare and contrast the information gained from experiments, simulations, video, or multimedia sources with that gained from reading a text on the same topic.
LAFS.68.WHST.1.1:	Write arguments focused on *discipline-specific content.* a. Introduce claim(s) about a topic or issue, acknowledge and distinguish the claim(s) from alternate or opposing claims, and organize the reasons and evidence logically. b. Support claim(s) with logical reasoning and relevant, accurate data and evidence that demonstrate an understanding of the topic or text, using credible sources. c. Use words, phrases, and clauses to create cohesion and clarify the relationships among claim(s), counterclaims, reasons, and evidence. d. Establish and maintain a formal style. e. Provide a concluding statement or section that follows from and supports the argument presented. **Standard Relation to Course: Supporting**
LAFS.8.L.1.1:	Demonstrate command of the conventions of standard English grammar and usage when writing or speaking. a. Explain the function of verbals (gerunds, participles, infinitives) in general and their function in particular sentences. b. Form and use verbs in the active and passive voice. c. Form and use verbs in the indicative, imperative, interrogative, conditional, and subjunctive mood. d. Recognize and correct inappropriate shifts in verb voice and mood. **Standard Relation to Course: Supporting**
LAFS.8.L.1.2:	Demonstrate command of the conventions of standard English capitalization, punctuation, and spelling when writing. a. Use punctuation (comma, ellipsis, dash) to indicate a pause or break. b. Use an ellipsis to indicate an omission. c. Spell correctly. **Standard Relation to Course: Supporting**
LAFS.8.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 8 topics, texts, and issues, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions and decision-making, track progress toward specific goals and deadlines, and define individual roles as needed. c. Pose questions that connect the ideas of several speakers and respond to others' questions and comments with relevant evidence, observations, and ideas. d. Acknowledge new information expressed by others, and, when warranted, qualify or justify their own views in light of the evidence presented. **Standard Relation to Course: Supporting**
LAFS.8.SL.2.4:	Present claims and findings, emphasizing salient points in a focused, coherent manner with relevant evidence, sound valid reasoning, and well-chosen details; use appropriate eye contact, adequate volume, and clear pronunciation.
LAFS.8.SL.2.5:	Integrate multimedia and visual displays into presentations to clarify information, strengthen claims and evidence, and add interest.
LAFS.8.W.1.1:	Write arguments to support claims with clear reasons and relevant evidence. a. Introduce claim(s), acknowledge and distinguish the claim(s) from alternate or opposing claims, and organize the reasons and evidence logically. b. Support claim(s) with logical reasoning and relevant evidence, using accurate, credible sources and demonstrating an understanding of the topic or text. c. Use words, phrases, and clauses to create cohesion and clarify the relationships among claim(s), counterclaims, reasons, and evidence. d. Establish and maintain a formal style. e. Provide a concluding statement or section that follows from and supports the argument presented. **Standard Relation to Course: Supporting**
LAFS.8.W.3.8:	Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
LAFS.8.W.3.9:	Draw evidence from literary or informational texts to support analysis, reflection, and research. a. Apply grade 8 Reading standards to literature (e.g., "Analyze how a modern work of fiction draws on themes, patterns of events, or character types from myths, traditional stories, or religious works such as the Bible, including describing how the material is rendered new").

	b. Apply grade 8 Reading standards to literary nonfiction (e.g., "Delineate and evaluate the argument and specific claims in a text, assessing whether the reasoning is sound and the evidence is relevant and sufficient; recognize when irrelevant evidence is introduced").
LAFS.8.W.4.10:	Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
MAFS.K12.MP.1.1:	**Make sense of problems and persevere in solving them.** Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.
MAFS.K12.MP.3.1:	**Construct viable arguments and critique the reasoning of others.** Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.
SC.8.N.1.1:	Define a problem from the eighth grade curriculum using appropriate reference materials to support scientific understanding, plan and carry out scientific investigations of various types, such as systematic observations or experiments, identify variables, collect and organize data, interpret data in charts, tables, and graphics, analyze information, make predictions, and defend conclusions.
SC.8.N.1.4:	Explain how hypotheses are valuable if they lead to further investigations, even if they turn out not to be supported by the data.
SC.8.N.1.6:	Understand that scientific investigations involve the collection of relevant empirical evidence, the use of logical reasoning, and the application of imagination in devising hypotheses, predictions, explanations and models to make sense of the collected evidence.
SS.8.A.1.1:	Provide supporting details for an answer from text, interview for oral history, check validity of information from research/text, and identify strong vs. weak arguments. **Clarifications:** Students should be encouraged to utilize FINDS (Focus, Investigage, Note, Develop, Score), Florida's research process model accessible at: fldoe.org/bii/Library_Media/pdf/12TotalFINDS.pdf.
SS.8.A.1.4:	Differentiate fact from opinion, utilize appropriate historical research and fiction/nonfiction support materials.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

GENERAL NOTES

The purpose of this course is to enable students to develop advanced knowledge and skills in the research process with emphasis on data collection and analysis.

The content should include, but not be limited to, the following:

- research process
- research questions and hypotheses
- review of literature and other resources
- legal and ethical issues in research
- research design
- data collection, analysis, and statistics
- interpretation of results
- application of findings
- report formats, styles, and content
- investigations
- critical analysis of research
- a major research project, preferably cross-curricular

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

QUALIFICATIONS

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

Any field when certification reflects a bachelor or higher degree.

Course Standards

Name	Description
LAFS.6.RI.1.1:	Cite textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.
LAFS.6.RI.1.2:	Determine a central idea of a text and how it is conveyed through particular details; provide a summary of the text distinct from personal opinions or judgments.
LAFS.6.RI.2.5:	Analyze how a particular sentence, paragraph, chapter, or section fits into the overall structure of a text and contributes to the development of the ideas.
LAFS.6.RI.2.6:	Determine an author's point of view or purpose in a text and explain how it is conveyed in the text.
LAFS.6.RI.3.7:	Integrate information presented in different media or formats (e.g., visually, quantitatively) as well as in words to develop a coherent understanding of a topic or issue.
LAFS.6.RI.3.8:	Trace and evaluate the argument and specific claims in a text, distinguishing claims that are supported by reasons and evidence from claims that are not.
LAFS.6.RI.3.9:	Compare and contrast one author's presentation of events with that of another (e.g., a memoir written by and a biography on the same person).
LAFS.6.SL.1.2:	Interpret information presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how it contributes to a topic, text, or issue under study.
LAFS.6.SL.2.5:	Include multimedia components (e.g., graphics, images, music, sound) and visual displays in presentations to clarify information.
LAFS.6.W.1.1:	Write arguments to support claims with clear reasons and relevant evidence. a. Introduce claim(s) and organize the reasons and evidence clearly. b. Support claim(s) with clear reasons and relevant evidence, using credible sources and demonstrating an understanding of the topic or text. c. Use words, phrases, and clauses to clarify the relationships among claim(s) and reasons. d. Establish and maintain a formal style. e. Provide a concluding statement or section that follows from the argument presented.
LAFS.6.W.1.2:	Write informative/explanatory texts to examine a topic and convey ideas, concepts, and information through the selection, organization, and analysis of relevant content. a. Introduce a topic; organize ideas, concepts, and information, using strategies such as definition, classification, comparison/contrast, and cause/effect; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension. b. Develop the topic with relevant facts, definitions, concrete details, quotations, or other information and examples. c. Use appropriate transitions to clarify the relationships among ideas and concepts. d. Use precise language and domain-specific vocabulary to inform about or explain the topic. e. Establish and maintain a formal style. f. Provide a concluding statement or section that follows from the information or explanation presented.
LAFS.6.W.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience. (Grade-specific expectations for writing types are defined in standards 1–3 above.)
LAFS.6.W.2.6:	Use technology, including the Internet, to produce and publish writing as well as to interact and collaborate with others; demonstrate sufficient command of keyboarding skills to type a minimum of three pages in a single sitting.
LAFS.6.W.3.7:	Conduct short research projects to answer a question, drawing on several sources and refocusing the inquiry when appropriate.
LAFS.6.W.3.8:	Gather relevant information from multiple print and digital sources; assess the credibility of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and providing basic bibliographic information for sources.
LAFS.68.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources.
LAFS.68.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of the source distinct from prior knowledge or opinions.
LAFS.68.RH.2.5:	Describe how a text presents information (e.g., sequentially, comparatively, causally).
LAFS.68.RH.2.6:	Identify aspects of a text that reveal an author's point of view or purpose (e.g., loaded language, inclusion or avoidance of particular facts).
LAFS.68.RH.3.7:	Integrate visual information (e.g., in charts, graphs, photographs, videos, or maps) with other information in print and digital texts.
LAFS.68.RH.3.8:	Distinguish among fact, opinion, and reasoned judgment in a text.
LAFS.68.RH.3.9:	Analyze the relationship between a primary and secondary source on the same topic.
LAFS.68.RST.1.1:	Cite specific textual evidence to support analysis of science and technical texts.
LAFS.68.RST.3.7:	Integrate quantitative or technical information expressed in words in a text with a version of that information expressed visually (e.g., in a flowchart, diagram, model, graph, or table).
LAFS.68.RST.3.8:	Distinguish among facts, reasoned judgment based on research findings, and speculation in a text.
LAFS.68.RST.3.9:	Compare and contrast the information gained from experiments, simulations, video, or multimedia sources with that gained from reading a text on the same topic.
LAFS.68.WHST.1.1:	Write arguments focused on *discipline-specific content*. a. Introduce claim(s) about a topic or issue, acknowledge and distinguish the claim(s) from alternate or opposing claims, and organize the reasons and evidence logically. b. Support claim(s) with logical reasoning and relevant, accurate data and evidence that demonstrate an understanding of the topic or text, using credible sources. c. Use words, phrases, and clauses to create cohesion and clarify the relationships among claim(s), counterclaims, reasons, and evidence. d. Establish and maintain a formal style.

	e. Provide a concluding statement or section that follows from and supports the argument presented.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.68.WHST.2.5:	With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well purpose and audience have been addressed.
LAFS.68.WHST.2.6:	Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas clearly and efficiently.
LAFS.68.WHST.3.7:	Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.
LAFS.68.WHST.3.9:	Draw evidence from informational texts to support analysis reflection, and research.
LAFS.7.RI.1.1:	Cite several pieces of textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.
LAFS.7.RI.1.2:	Determine two or more central ideas in a text and analyze their development over the course of the text; provide an objective summary of the text.
LAFS.7.RI.2.5:	Analyze the structure an author uses to organize a text, including how the major sections contribute to the whole and to the development of the ideas.
LAFS.7.RI.2.6:	Determine an author's point of view or purpose in a text and analyze how the author distinguishes his or her position from that of others.
LAFS.7.RI.3.8:	Trace and evaluate the argument and specific claims in a text, assessing whether the reasoning is sound and the evidence is relevant and sufficient to support the claims.
LAFS.7.RI.3.9:	Analyze how two or more authors writing about the same topic shape their presentations of key information by emphasizing different evidence or advancing different interpretations of facts.
LAFS.7.SL.1.2:	Analyze the main ideas and supporting details presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how the ideas clarify a topic, text, or issue under study.
LAFS.7.SL.2.5:	Include multimedia components and visual displays in presentations to clarify claims and findings and emphasize salient points.
LAFS.7.W.1.1:	Write arguments to support claims with clear reasons and relevant evidence. a. Introduce claim(s), acknowledge alternate or opposing claims, and organize the reasons and evidence logically. b. Support claim(s) with logical reasoning and relevant evidence, using accurate, credible sources and demonstrating an understanding of the topic or text. c. Use words, phrases, and clauses to create cohesion and clarify the relationships among claim(s), reasons, and evidence. d. Establish and maintain a formal style. e. Provide a concluding statement or section that follows from and supports the argument presented.
LAFS.7.W.1.2:	Write informative/explanatory texts to examine a topic and convey ideas, concepts, and information through the selection, organization, and analysis of relevant content. a. Introduce a topic clearly, previewing what is to follow; organize ideas, concepts, and information, using strategies such as definition, classification, comparison/contrast, and cause/effect; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension. b. Develop the topic with relevant facts, definitions, concrete details, quotations, or other information and examples. c. Use appropriate transitions to create cohesion and clarify the relationships among ideas and concepts. d. Use precise language and domain-specific vocabulary to inform about or explain the topic. e. Establish and maintain a formal style. f. Provide a concluding statement or section that follows from and supports the information or explanation presented.
LAFS.7.W.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience. (Grade-specific expectations for writing types are defined in standards 1–3 above.)
LAFS.7.W.2.6:	Use technology, including the Internet, to produce and publish writing and link to and cite sources as well as to interact and collaborate with others, including linking to and citing sources.
LAFS.7.W.3.7:	Conduct short research projects to answer a question, drawing on several sources and generating additional related, focused questions for further research and investigation.
LAFS.7.W.3.8:	Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
LAFS.8.RI.1.1:	Cite the textual evidence that most strongly supports an analysis of what the text says explicitly as well as inferences drawn from the text.
LAFS.8.RI.1.2:	Determine a central idea of a text and analyze its development over the course of the text, including its relationship to supporting ideas; provide an objective summary of the text.
LAFS.8.RI.2.5:	Analyze in detail the structure of a specific paragraph in a text, including the role of particular sentences in developing and refining a key concept.
LAFS.8.RI.2.6:	Determine an author's point of view or purpose in a text and analyze how the author acknowledges and responds to conflicting evidence or viewpoints.
LAFS.8.RI.3.7:	Evaluate the advantages and disadvantages of using different mediums (e.g., print or digital text, video, multimedia) to present a particular topic or idea.
LAFS.8.RI.3.8:	Delineate and evaluate the argument and specific claims in a text, assessing whether the reasoning is sound and the evidence is relevant and sufficient; recognize when irrelevant evidence is introduced.
LAFS.8.RI.3.9:	Analyze a case in which two or more texts provide conflicting information on the same topic and identify where the texts disagree on matters of fact or interpretation.
LAFS.8.SL.1.2:	Analyze the purpose of information presented in diverse media and formats (e.g., visually, quantitatively, orally) and evaluate the motives (e.g., social, commercial, political) behind its presentation.
LAFS.8.SL.2.5:	Integrate multimedia and visual displays into presentations to clarify information, strengthen claims and evidence, and add interest.
LAFS.8.W.1.1:	Write arguments to support claims with clear reasons and relevant evidence. a. Introduce claim(s), acknowledge and distinguish the claim(s) from alternate or opposing claims, and organize the reasons and evidence logically. b. Support claim(s) with logical reasoning and relevant evidence, using accurate, credible sources and demonstrating an understanding of the topic or text. c. Use words, phrases, and clauses to create cohesion and clarify the relationships among claim(s), counterclaims, reasons, and evidence. d. Establish and maintain a formal style. e. Provide a concluding statement or section that follows from and supports the argument presented.
	Write informative/explanatory texts to examine a topic and convey ideas, concepts, and information through the selection, organization, and analysis

LAFS.8.W.1.2:	of relevant content. a. Introduce a topic clearly, previewing what is to follow; organize ideas, concepts, and information into broader categories; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension. b. Develop the topic with relevant, well-chosen facts, definitions, concrete details, quotations, or other information and examples. c. Use appropriate and varied transitions to create cohesion and clarify the relationships among ideas and concepts. d. Use precise language and domain-specific vocabulary to inform about or explain the topic. e. Establish and maintain a formal style. f. Provide a concluding statement or section that follows from and supports the information or explanation presented.
LAFS.8.W.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience. (Grade-specific expectations for writing types are defined in standards 1–3 above.)
LAFS.8.W.2.6:	Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas efficiently as well as to interact and collaborate with others.
LAFS.8.W.3.7:	Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.
LAFS.8.W.3.8:	Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
HE.6.B.4.3:	Demonstrate effective conflict-management and/or resolution strategies. **Clarifications:** Talk to an adult, anger management, and conflict mediation.
HE.6.B.5.2:	Choose healthy alternatives over unhealthy alternatives when making a decision. **Clarifications:** Not smoking, limiting sedentary activity, and practicing good character.
HE.7.B.4.3:	Articulate the possible causes of conflict among youth in schools and communities. **Clarifications:** Ethnic prejudice and diversity, substance use, group dynamics, relationship issues/dating violence, gossip/rumors, and sexual identity.
HE.7.B.5.2:	Select healthy alternatives over unhealthy alternatives when making a decision. **Clarifications:** Proper prescription-drug use, using safety equipment, Internet safety, and managing stress.
HE.8.B.4.3:	Examine the possible causes of conflict among youth in schools and communities. **Clarifications:** Relationships, territory, jealousy, and gossip/rumors.
HE.8.B.5.2:	Categorize healthy and unhealthy alternatives to health-related issues or problems. **Clarifications:** (Alcohol consumption, sleep requirements, physical activity, and time management.)
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

GENERAL NOTES

The purpose of this course is to provide students with the opportunity to gain the knowledge and skills necessary to become health literate and practice responsible behaviors to promote healthy living. This comprehensive course focuses on making wise personal decisions and respecting and promoting the health of others.

The content should include, but is not limited to:

- Mental and emotional health (personal health care, screenings, counseling, negotiation skills, bullying, grief, loss and depression)
- Prevention and control of disease (non-communicable, sexually transmitted diseases, STDs, and HIV/AIDS)
- Consumer health (risk reduction behaviors, policies/laws, medical resources, and conflict resolution)
- Family life (risk reduction behaviors, cultures, daily routines and rules)
- Personal health (adolescence, communication skills, wellness, coping skills, social relationships and reproductive health)
- Nutrition (weight management, fitness plan, eating disorders, and BMI)
- Internet safety (security, threats, media, cyber-bullying parental controls, and monitoring)
- Injury prevention and safety (rules, bullying, water safety, weapons safety, and first aid/CPR/AED)
- Substance use and abuse (harmful effects of alcohol, tobacco, other drugs, and over-the-counter drugs)
- Community health (local health organizations, technology, resources, and services)
- Environmental health (adverse health effects, chemicals toxins and pollutants)
- Consumer health (advertising, media influence, products and services)
- Teen dating violence (dating, abuse and violence)

Instructional Practices: Teaching from a well-written, grade-level textbook enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Any student whose parent makes written request to the school principal shall be exempted from the teaching of reproductive health or any disease, including HIV/AIDS, its symptoms, development, and treatment. A student so exempted may not be penalized by reason of that exemption.

Career and Education Planning – Per section 1003.4156, Florida Statutes, the Career and Education Planning course must result in a completed, personalized academic and career plan for the student, that may be revised as the student progresses through middle and high school; must emphasize the importance of entrepreneurship and employability skills; and must include information from the Department of Economic Opportunity's economic security report as described in Section 445.07, Florida Statutes. The required, personalized academic and career plan must inform students of high school graduation requirements, including diploma designations (Section 1003.4285, Florida Statutes); requirements for a Florida Bright Futures Scholarship; state university and Florida College System institution admission requirements; and, available opportunities to earn college credit in high school utilizing acceleration mechanisms. For additional information on the Middle School Career and Education Planning courses, visit fldoe.org/academics/college-career-planning/educators-toolkit/index.stml.

Career and Education Planning Course Standards – Students will:

1.0 Describe the influences that societal, economic, and technological changes have on employment trends and future training.

2.0 Develop skills to locate, evaluate, and interpret career information.

3.0 Identify and demonstrate processes for making short and long term goals.

4.0 Demonstrate employability skills such as working in a group, problem-solving and organizational skills, and the importance of entrepreneurship.

5.0 Understand the relationship between educational achievement and career choices/postsecondary options.

6.0 Identify a career cluster and related pathways through an interest assessment that match career and education goals.

7.0 Develop a career and education plan that includes short and long-term goals, high school program of study, and postsecondary/career goals.

8.0 Demonstrate knowledge of technology and its application in career fields/clusters.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

QUALIFICATIONS

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

Any field when certification reflects a bachelor or higher degree.

Course Standards

Name	Description
LAFS.68.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources.
LAFS.68.RST.1.1:	Cite specific textual evidence to support analysis of science and technical texts.
LAFS.68.RST.1.2:	Determine the central ideas or conclusions of a text; provide an accurate summary of the text distinct from prior knowledge or opinions.
LAFS.68.RST.1.3:	Follow precisely a multistep procedure when carrying out experiments, taking measurements, or performing technical tasks.
LAFS.7.RI.1.1:	Cite several pieces of textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.
LAFS.7.RI.2.6:	Determine an author's point of view or purpose in a text and analyze how the author distinguishes his or her position from that of others.
LAFS.7.RI.3.7:	Compare and contrast a text to an audio, video, or multimedia version of the text, analyzing each medium's portrayal of the subject (e.g., how the delivery of a speech affects the impact of the words).
LAFS.7.RL.2.4:	Determine the meaning of words and phrases as they are used in a text, including figurative and connotative meanings; analyze the impact of rhymes and other repetitions of sounds (e.g., alliteration) on a specific verse or stanza of a poem or section of a story or drama.
LAFS.7.SL.2.4:	Present claims and findings, emphasizing salient points in a focused, coherent manner with pertinent descriptions, facts, details, and examples; use appropriate eye contact, adequate volume, and clear pronunciation.
LAFS.7.W.1.1:	Write arguments to support claims with clear reasons and relevant evidence. a. Introduce claim(s), acknowledge alternate or opposing claims, and organize the reasons and evidence logically. b. Support claim(s) with logical reasoning and relevant evidence, using accurate, credible sources and demonstrating an understanding of the topic or text. c. Use words, phrases, and clauses to create cohesion and clarify the relationships among claim(s), reasons, and evidence. d. Establish and maintain a formal style. e. Provide a concluding statement or section that follows from and supports the argument presented. **Standard Relation to Course: Supporting**
LAFS.7.W.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience. (Grade-specific expectations for writing types are defined in standards 1–3 above.)
LAFS.7.W.2.5:	With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well purpose and audience have been addressed.
MAFS.K12.MP.1.1:	**Make sense of problems and persevere in solving them.** Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.
MAFS.K12.MP.3.1:	**Construct viable arguments and critique the reasoning of others.** Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.
SC.7.N.1.1:	Define a problem from the seventh grade curriculum, use appropriate reference materials to support scientific understanding, plan and carry out scientific investigation of various types, such as systematic observations or experiments, identify variables, collect and organize data, interpret data in charts, tables, and graphics, analyze information, make predictions, and defend conclusions.
SC.7.N.1.4:	Identify test variables (independent variables) and outcome variables (dependent variables) in an experiment.
SC.7.N.1.7:	Explain that scientific knowledge is the result of a great deal of debate and confirmation within the science community.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

GENERAL NOTES

The purpose of this course is to enable students to develop learning strategies, critical-thinking skills, and problem-solving skills to enhance their performance in academic and nonacademic endeavors.

The content should include, but not be limited to, the following:

- strategies for acquiring, storing, and retrieving information
- strategies for oral and written communication
- critical-thinking operations, processes, and enabling skills
- problem-solving skills and strategies
- strategies for linking new information with prior knowledge

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

QUALIFICATIONS

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

Any academic coverage (any coverage classified as an academic coverage in Rules 6A-4.0101 through 6A-4.0343, Florida Administrative Code).

Course Standards

Name	Description
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Major Concepts/Content: Advancement Via Individual Determination (AVID) is an academic elective course that prepares students for college readiness and success, and it is scheduled during the regular school day as a year-long course. Each week, students receive instruction that utilizes a rigorous college-preparatory curriculum provided by AVID Center, tutor-facilitated study groups, motivational activities, and academic success skills. In AVID, students participate in activities that incorporate strategies focused on writing, inquiry, collaboration, organization, and reading to support their academic growth. Additionally, students engage in activities centered around exploring college and career opportunities and their own agency.

Some students may have previous experience with AVID Elementary, and some students will be experiencing AVID for the first time. The 6th grade AVID elective course is an introduction to the AVID philosophy. Students will develop an awareness of the values accompanying academic goals and success. The course will focus on building students' self-confidence and communication skills in working with peers and adults. Students will be exposed to reading strategies that will assist them in building vocabulary and understanding a variety of texts and will also focus on pre-writing techniques, summary writing, and structural components of note-taking. Students will increase college and career awareness through guest-speaker presentations, field-trip opportunities, and research.

AVID curriculum books used:

AVID College and Careers

AVID Critical Thinking and Engagement

AVID Reading for Disciplinary Literacy

AVID Secondary Implementation Resource

AVID Tutorial Guide

AVID Writing for Disciplinary Literacy

Supplemental materials course include the following:

AVID Weekly®, *Supporting Math in the AVID Elective*, *Write Path* content-area books, focused note-taking resources, and my.avid.org Curriculum Book Webpages

STUDENT OUTCOMES

Student Agency (SA)

- Student Empowerment
- Leadership of Others

Rigorous Academic Preparedness (AP)

- Writing
- Inquiry
- Collaboration
- Organization
- Reading

Opportunity Knowledge (OK)

- Advancing College Preparedness
- Building Career Knowledge

STUDENT AGENCY (6.SA)

Student Empowerment

1. (a) Determine personal interest for extracurricular and community service activities within the school and community
   (b) Gain awareness of extracurricular and community service activities within the school and community
2. Evaluate the impact of decisions on others
3. Explore the importance of healthy, balanced lifestyles, including aspects such as good sleeping, eating, and exercise habits
4. Establish understanding of concepts and content-specific vocabulary related to personal finance
5. (a) Identify the characteristics of positive, health relationships
   (b) Explore individual peer relationships and identify those that are positive and healthy
6. Gain awareness of motivators that positively impact performance
7. Self-monitor to diagnose areas of need (e.g., academic, personal, social-emotional)
8. (a) Gain awareness of skills that increase mental flexibility
   (b) Explore the relationship between grit and perseverance

9. (a) Identify strategies and skills that promote self-awareness
   (b) Identify individual strengths and areas of challenge related to academic skills and performance
10. Determine key points from learning experiences

Leadership of Others

1. Identify traits connected to personal integrity and ethics
2. (a) Identify leadership opportunities and positions in the school and community
   (b) Determine formal and informal leadership opportunities that could be pursued
3. (a) Select tools to analyze a conflict and identify a positive solution
   (b) Classify passive, assertive, and aggressive statements

RIGOROUS ACADEMIC PREPAREDNESS (6.AP)

Writing

1. (a) Develop writing skills related to argumentative and narrative modes of writing
   (b) Plan and structure writing based on the mode (descriptive, narrative, expository, argumentative)
   (c) Draft initial writing
2. Analyze a writing task by identifying key vocabulary and audience
3. Gather and analyze feedback from peers and instructors
4. (a) Edit drafts for grammar, mechanics, and spelling
   (b) Analyze the organizational structure of writing
5. Publish writing to a small group audience within the classroom, such as a formal written paper
6. (a) Take notes with an emphasis on identifying and recording the note-taking objective and /or Essential Question
   (b) Take notes with an emphasis on setting up notes, including all required components
7. Summarize by pulling together the most important information related to the objective and/or Essential Question

Inquiry

1. Create questions based on Costa's Levels of Thinking
2. Identify misunderstood concepts or problems
3. Determine the steps/process that led to a solution
4. Reflect on learning to make connections between new learning and previous learning
5. Reflect on learning strategies that were employed and whether those strategies were effective
6. (a) Identify processes that are used
   (b) Reflect on a process that was used and whether that process was effective
7. Analyze a research prompt
8. (a) Locate sources that are relevant to the topic and support the purpose of the research assignment
   (b) Distinguish between primary and secondary sources
9. Plan and structure the writing based on the research prompt
10. Integrate quotations and references to texts, using proper citations
11. Publish research to a small group audience within the classroom, such as a formal written paper

Collaboration

1. Establish norms and expectations around shared responsibility among group members
2. Establish norms and expectations around appreciating diversity among group members
3. Develop a foundational familiarity and comfort with classmates
4. Identify respectful and disrespectful actions of self and others
5. Check group members' level of understanding
6. Utilize technology to collaborate with classmates
7. (a) Apply basic understanding of effective public speaking
   (b) Incorporate visual aids and/or technology when appropriate
8. Describe the characteristics of effective listening, such as eye contact and mirroring
9. Monitor word choice when speaking
10. Identify formal and informal language registers

Organization

1. (a) Begin implementing organizational tools (e.g., binders/eBinders, portfolios, or digital folders) that support academic success
   (b) Create an activity log or tracking system for community extracurricular activities and hours
2. (a) Explore a variety of organizational formats for calendaring/planning
   (b) Determine how to use time effectively
   (c) Assess complex assignments and break them into smaller tasks
3. Set personal, academic and career goals
4. Monitor progress toward goals
5. Utilize visual frameworks to organize information

Reading

1. Determine the characteristics of a high-quality text in relation to the reading purpose
2. (a) Preview text features
   (b) Identify prior knowledge that may be relevant to the reading
3. Assess knowledge of academic and content-specific vocabulary words
4. (a) Mark the text to accomplish the reading purpose
   (b) Identify the key components of a text related to the reading purpose

5. Extend beyond the text by applying key learning

OPPORTUNITY KNOWLEDGE (6.OK)

Advancing College Preparedness

1. Identify personal interests and skills related to future college aspirations, such as through an interest inventory
2. (a) Know how to determine a GPA
   (b) Develop familiarity with college terminology
   (c) Classify the various types of college
3. Understand scholarships and the role they play in financing college
4. Articulate the importance of long-term academic plans as a part of goal setting an achievement
5. (a) Identify what is meant by match schools, reach schools, and safety schools in order to determine the best academic fit during the selection process
   (b) Understand the different college entrance exams: PSAT, PreACT, SAT, ACT

Building Career Knowledge

1. Identify personal interests and skills related to future career aspirations
2. (a) Increase familiarity with career terminology
   (b) Distinguish between jobs, careers, and career fields
3. (a) Establish initial knowledge around the characteristics that contribute to academic, social, and financial fit
   (b) Explore the net cost of attending college to inform decisions and budget plans
4. Request assistance in selecting career elective courses and pathways that match interest and goals

GENERAL NOTES

Trained AVID Elective teachers may visit avid.org, and log into their MyAVID account using their AVID username and password; then follow my.avid.org/file_sharing/default.aspx?id=24544 to access the AVID Weeks at a Glance curriculum and resources for grades 6-12.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. Career and Education Planning – Per section 1003.4156, Florida Statutes, the Career and Education Planning course must result in a completed, personalized academic and career plan for the student, that may be revised as the student progresses through middle and high school; must emphasize the importance of entrepreneurship and employability skills; and must include information from the Department of Economic Opportunity's economic security report as described in Section 445.07, Florida Statutes. The required, personalized academic and career plan must inform students of high school graduation requirements, including diploma designations (Section 1003.4285, Florida Statutes); requirements for a Florida Bright Futures Scholarship; state university and Florida College System institution admission requirements; and, available opportunities to earn college credit in high school utilizing acceleration mechanisms. For additional information on the Middle School Career and Education Planning courses, visit fldoe.org/academics/college-career-planning/educators-toolkit/index.stml.

Career and Education Planning Course Standards – Students will:

1.0 Describe the influences that societal, economic, and technological changes have on employment trends and future training.

2.0 Develop skills to locate, evaluate, and interpret career information.

3.0 Identify and demonstrate processes for making short and long term goals.

4.0 Demonstrate employability skills such as working in a group, problem-solving and organizational skills, and the importance of entrepreneurship.

5.0 Understand the relationship between educational achievement and career choices/postsecondary options.

6.0 Identify a career cluster and related pathways through an interest assessment that match career and education goals.

7.0 Develop a career and education plan that includes short and long-term goals, high school program of study, and postsecondary/career goals.

8.0 Demonstrate knowledge of technology and its application in career fields/clusters.

Major Concepts/Content: Advancement Via Individual Determination (AVID) is an academic elective course that prepares students for college readiness and success, and it is scheduled during the regular school day as a year-long course. Each week, students receive instruction that utilizes a rigorous college-preparatory curriculum provided by AVID Center, tutor-facilitated study groups, motivational activities, and academic success skills. In AVID, students participate in activities that incorporate strategies focused on writing, inquiry, collaboration, organization, and reading to support their academic growth. Additionally, students engage in activities centered around exploring college and career opportunities and their own agency.

The 7th grade AVID elective course builds upon the foundational components of the AVID philosophy. Students will refine short- and long-term goals and, as a result, being to understand the value in taking charge of their actions. They will start working on intrapersonal and interpersonal skills as well as formal and informal speech. Students will complete self-evaluations and peer evaluations related to reading, writing, organization, and speaking. In broadening their writing practice, students will begin considering audience, purpose, and form in their writing. Students will take an active role in their learning, understanding the roles of all members in assignments and collaborative lessons. They will expand their knowledge base regarding note-taking in relation to studying and test preparation. Students will be exposed to various field trips, guest speakers, and research to increase their knowledge of college and career options.

STUDENT OUTCOMES

Student Agency (SA)

- Student Empowerment
- Leadership of Others

Rigorous Academic Preparedness (AP)

- Writing
- Inquiry
- Collaboration
- Organization
- Reading

Opportunity Knowledge (OK)

- Advancing College Preparedness
- Building Career Knowledge

STUDENT AGENCY (7.SA)

Student Empowerment

1. Explore and experience extracurricular and community service activities within the school and community
2. Evaluate the impact of decisions on the environment
3. (a) Identify activities that assist with self-care and healthy habits
   (b) Identify areas that need attention and develop goals to address those areas
4. Increase awareness and apply basic concepts of budgeting, spending, and making responsible financial decisions
5. Develop a support network that includes peers and adults for academic and future success
6. Explore how individual motivators and self-monitoring of motivation impact academic performance
7. Seek help related to areas of need
8. Determine personal levels of grit and perseverance in relation to growth mindset
9. Establish self-awareness strategies and skills, including SLANT (Sit with proper posture, Lean forward and listen, Ask pertinent questions, Nod your head "yes" or "no," Talk

with your teachers)
10. Make connections between key learning points and new contexts

Leadership of Others

1. Identify traits connected to responsibility, integrity, and ethical interactions with others
2. Pursue leadership opportunities across the school
3. (a) Identify personal conflict-management style
   (b) Transform passive and aggressive statements into constructive, assertive statements

RIGOROUS ACADEMIC PREPAREDNESS (7.AP)

Writing

1. (a) Develop writing skills related to descriptive and expository modes of writing
   (b) Generate multiple ideas that support, explain, or enhance the writing topic or theme
   (c) Compose first drafts using ideas and information gathered during pre-writing
2. Analyze a writing task to determine the purpose, format/style, and audience
3. Write multiple drafts with increasing depth based on feedback and observations
4. Analyze and edit sentence structure to create interest and complexity
5. Publish writing to entire class, such as an oral presentation
6. (a) Take notes with an emphasis on recording main ideas and important information
   (b) Take notes with an emphasis on condensing information by using abbreviations/symbols/paraphrasing
7. Summarize by pulling together the most important information and personal connections related to the objective and/or Essential Question

Inquiry

1. Develop inquiry skills through focused observation and analysis
2. Identify the specific point of confusion related to a misunderstood concept or problem
3. Determine whether similar problems could be solved using the same steps/process
4. Reflect on learning to make connections between new learning and previous experiences
5. Reflect on learning strategies that were employed, whether those strategies were effective, and how methods could be adjusted in the future
6. Reflect on a process that was used, whether that process was effective, and how methods could be adjusted in the future
7. Brainstorm ideas for research topics to address a research prompt
8. Determine the relevance, validity, and reliability of information found in sources
9. Organize information, sources, and data that support the research prompt
10. Integrate quotations to support claims, citing locations and references to texts
11. Publish research to entire class, such as an oral presentation

Collaboration

1. Hold self and peers accountable for following group norms about shared responsibility
2. Summarize points of agreement and disagreement from varying perspectives
3. Deepen relational capacity with classmates through effective conflict management
4. Establish norms and expectations around respectful interactions among group members
5. Ask clarifying questions to group members to facilitate understanding
6. Utilize technology to collaborate with classmates and community members
7. (a) Distinguish between effective and ineffective language during interactions
   (b) Refine usage of nonverbal communication when speaking, including body language and eye contact
8. Demonstrate active listening skills during academic conversations
9. Utilize academic vocabulary when communicating
10. Speak effectively before small groups of peers

Organization

1. (a) Refine usage of organizational tools (e.g., binders/eBinders, portfolios, or digital folders) and systems that support academic success
   (b) Maintain an activity log or tracking system for community extracurricular activities and hours
2. (a) Utilize an organizational tool to record obligations and constraints on time
   (b) Demonstrate the process of backward mapping
3. Identify the steps necessary to accomplish goals
4. Identify reasons for why progress is or isn't being made toward accomplishing goals
5. Apply visual frameworks to organize language and comprehend key concepts

Reading

1. Assess whether a text is appropriate according to the reading purpose
2. (a) Make predictions about the text using text features
   (b) Assess relevant prior knowledge and identify gaps
3. Utilize tools to deepen understanding of vocabulary
4. Mark the text to accomplish the reading purpose through the lens of a content expert
   (b) Identify the key components of a text related to the reading purpose
5. Extend beyond the text by evaluating and synthesizing key learning

OPPORTUNITY KNOWLEDGE (7.OK)

Advancing College Preparedness

1. Define key personal attributes for academic, social, and financial fit related to college selection

2. (a) Explore the significance of GPA at different stages of the academic journey
   (b) Explore college options and terminology
3. Evaluate personal level of readiness for scholarship eligibility
4. (a) Reflect on how academic plans and course completion support progress toward desired major
   (b) Determine which courses or opportunities align with college goals and plans
   (c) Explore campus-, district-, or community-based opportunities to earn college credit in high school (dual credit, online learning, etc.)
5. (a) Explore match schools, reach schools, and safety schools in order to determine the best academic fit during the selection process
   (b) Prepare for college entrance exams

Building Career Knowledge

1. Define key personal attributes for academic, social, and financial fit related to career selection
2. Explore career fields and career pathways, including what resources and opportunities are available locally
3. Investigate best-fit career fields based on academic, social, and financial fit
4. Reflect on how academic plans and course completion support progress toward desired career field

GENERAL NOTES

Special Note: Skills acquired in this course will be implemented by the student across the curriculum. M/J Advancement Via Individual Determination 7 (M/J AVID 7) is a rigorous course offered by AVID Center, and content must be provided as specified by AVID Center. Students who are successful in this course will be on the appropriate pathway to success in M/J AVID 8. Teachers must receive training from AVID Center to teach this course.

Trained AVID Elective teachers may visit avid.org, and log into their MyAVID account using their AVID username and password; then follow my.avid.org/file_sharing/default.aspx?id=24544 to access the AVID Weeks at a Glance curriculum and resources for grades 6-12.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

VERSION REQUIREMENTS

These requirements include, but are not limited to, the Florida Standards that are most relevant to this course. Standards correlated with a specific course requirement may also be addressed by other course requirements as appropriate. Some requirements in this course are not addressed in the Florida Standards. Other subject areas and content may be used to fulfill course requirements. This course includes an agreement related to minimum standards for behavior, attendance, and participation.

QUALIFICATIONS

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

Any field when certification reflects a bachelor or higher degree.

General Course Information and Notes

VERSION DESCRIPTION

Major Concepts/Content: Advancement Via Individual Determination (AVID) is an academic elective course that prepares students for college readiness and success, and it is scheduled during the regular school day as a year-long course. Each week, students receive instruction that utilizes a rigorous college-preparatory curriculum provided by AVID Center, tutor-facilitated study groups, motivational activities, and academic success skills. In AVID, students participate in activities that incorporate strategies focused on writing, inquiry, collaboration, organization, and reading to support their academic growth. Additionally, students engage in activities centered around exploring college and career opportunities and their own agency.

The 7th grade AVID elective course builds upon the foundational components of the AVID philosophy. Students will refine short- and long-term goals and, as a result, being to understand the value in taking charge of their actions. They will start working on intrapersonal and interpersonal skills as well as formal and informal speech. Students will complete self-evaluations and peer evaluations related to reading, writing, organization, and speaking. In broadening their writing practice, students will begin considering audience, purpose, and form in their writing. Students will take an active role in their learning, understanding the roles of all members in assignments and collaborative lessons. They will expand their knowledge base regarding note-taking in relation to studying and test preparation. Students will be exposed to various field trips, guest speakers, and research to increase their knowledge of college and career options.

STUDENT OUTCOMES

Student Agency (SA)

- Student Empowerment
- Leadership of Others

Rigorous Academic Preparedness (AP)

- Writing
- Inquiry
- Collaboration
- Organization
- Reading

Opportunity Knowledge (OK)

- Advancing College Preparedness
- Building Career Knowledge

STUDENT AGENCY (7.SA)

Student Empowerment

1. Explore and experience extracurricular and community service activities within the school and community
2. Evaluate the impact of decisions on the environment
3. (a) Identify activities that assist with self-care and healthy habits
   (b) Identify areas that need attention and develop goals to address those areas
4. Increase awareness and apply basic concepts of budgeting, spending, and making responsible financial decisions
5. Develop a support network that includes peers and adults for academic and future success
6. Explore how individual motivators and self-monitoring of motivation impact academic performance
7. Seek help related to areas of need
8. Determine personal levels of grit and perseverance in relation to growth mindset

9. Establish self-awareness strategies and skills, including SLANT (Sit with proper posture, Lean forward and listen, Ask pertinent questions, Nod your head "yes" or "no," Talk with your teachers)
10. Make connections between key learning points and new contexts

Leadership of Others

1. Identify traits connected to responsibility, integrity, and ethical interactions with others
2. Pursue leadership opportunities across the school
3. (a) Identify personal conflict-management style
   (b) Transform passive and aggressive statements into constructive, assertive statements

RIGOROUS ACADEMIC PREPAREDNESS (7.AP)

Writing

1. (a) Develop writing skills related to descriptive and expository modes of writing
   (b) Generate multiple ideas that support, explain, or enhance the writing topic or theme
   (c) Compose first drafts using ideas and information gathered during pre-writing
2. Analyze a writing task to determine the purpose, format/style, and audience
3. Write multiple drafts with increasing depth based on feedback and observations
4. Analyze and edit sentence structure to create interest and complexity
5. Publish writing to entire class, such as an oral presentation
6. (a) Take notes with an emphasis on recording main ideas and important information
   (b) Take notes with an emphasis on condensing information by using abbreviations/symbols/paraphrasing
7. Summarize by pulling together the most important information and personal connections related to the objective and/or Essential Question

Inquiry

1. Develop inquiry skills through focused observation and analysis
2. Identify the specific point of confusion related to a misunderstood concept or problem
3. Determine whether similar problems could be solved using the same steps/process
4. Reflect on learning to make connections between new learning and previous experiences
5. Reflect on learning strategies that were employed, whether those strategies were effective, and how methods could be adjusted in the future
6. Reflect on a process that was used, whether that process was effective, and how methods could be adjusted in the future
7. Brainstorm ideas for research topics to address a research prompt
8. Determine the relevance, validity, and reliability of information found in sources
9. Organize information, sources, and data that support the research prompt
10. Integrate quotations to support claims, citing locations and references to texts

Career and Education Planning – Per section 1003.4156, Florida Statutes, the Career and Education Planning course must result in a completed, personalized academic and career plan for the student, that may be revised as the student progresses through middle and high school; must emphasize the importance of entrepreneurship and employability skills; and must include information from the Department of Economic Opportunity's economic security report as described in Section 445.07, Florida Statutes. The required, personalized academic and career plan must inform students of high school graduation requirements, including diploma designations (Section 1003.4285, Florida Statutes); requirements for a Florida Bright Futures Scholarship; state university and Florida College System institution admission requirements; and, available opportunities to earn college credit in high school utilizing acceleration mechanisms. For additional information on the Middle School Career and Education Planning courses, visit fldoe.org/academics/college-career-planning/educators-toolkit/index.stml.

Career and Education Planning Course Standards – Students will:

1.0 Describe the influences that societal, economic, and technological changes have on employment trends and future training.

2.0 Develop skills to locate, evaluate, and interpret career information.

3.0 Identify and demonstrate processes for making short and long term goals.

4.0 Demonstrate employability skills such as working in a group, problem-solving and organizational skills, and the importance of entrepreneurship.

5.0 Understand the relationship between educational achievement and career choices/postsecondary options.

6.0 Identify a career cluster and related pathways through an interest assessment that match career and education goals.

7.0 Develop a career and education plan that includes short and long-term goals, high school program of study, and postsecondary/career goals.

8.0 Demonstrate knowledge of technology and its application in career fields/clusters.

In AVID, students participate in activities that incorporate strategies focused on writing, inquiry, collaboration, organization, and reading to support their academic growth. Additionally, students engage in activities centered around exploring college and career opportunities and their own agency.

The 7th grade AVID elective course is the year of preparation for high school. Students will regularly exhibit and utilize the skills and strategies learned in the 6th and 7th grade AVID courses. They will refine previous goals, focusing on their transition to high school as part of a college-preparatory path. Their writing will focus on completing all steps of the writing process and varying style, word choice, vocabulary, structure, and voice. Major writing assignments include persuasive, expository, descriptive, and timed writing. Students will transition from active learners to leaders. Other areas of focus include increasing the use of technology and building upon test-preparation and test-taking knowledge. Students will broaden their experience with analyzing text and utilizing appropriate reading strategies in various settings. They will become more involved in guest-speaker presentations and field trips, particularly as they relate to preparation and prior knowledge. Students will also participate in college-preparatory testing and build connections with the high school they will attend.

STUDENT OUTCOMES

Student Agency (SA)

- Student Empowerment
- Leadership of Others

Rigorous Academic Preparedness (AP)

- Writing
- Inquiry
- Collaboration
- Organization
- Reading

Opportunity Knowledge (OK)

- Advancing College Preparedness
- Building Career Knowledge

STUDENT AGENCY (8.SA)

Student Empowerment

1. Explore and pursue leadership opportunities in extracurricular and community service activities within the school and local and/or global community
2. Evaluate the impact of decisions on the world
3. Effectively manage stress and anxiety levels, including areas such as test preparation and test taking
4. Create a systemic decision-making model for personal financial decisions and circumstances
5. (a) Maintain a strong support network for academic and career success
   (b) Identify mentors to influence, support, and guide future transactions and success
6. Apply strategies to support motivation, especially when lacking intrinsic motivation
7. (a) Strengthen ability to self-advocate related to areas of need

(b) Leverage support network to assist with areas of need

8. (a) Reflect on current status and skills to strengthen mental flexibility now and in the future
   (b) Recognize and overcome obstacles that could hinder future success
9. Apply self-awareness strategies and skills with a variety of academic challenges
10. Employ key learning points in real-world applications

Leadership of Others

1. Assess personal traits connected to integrity and ethical leadership
2. Pursue leadership and/or mentorship opportunities in the school and community
3. Reflect on conflict situations to strengthen ability to deal with the emotions that accompany conflict in leadership roles

RIGOROUS ACADEMIC PREPAREDNESS (8.AP)

Writing

1. (a) Develop writing skills related to timed, argumentative, and descriptive modes of writing
   (b) Gather information related to the writing prompt to generate a bank of resources and information
   (c) Compose first drafts with a focus on establishing a clear purpose for the writing
2. Utilize inquiry strategies to develop additional questions as needed
3. Independently create and execute a plan for the revision process
4. Analyze the language of writing and edit for voice, flow, and clarity
5. Publish writing to an audience outside of the classroom, such as an online forum
6. (a) Take notes with an emphasis on selecting the appropriate format for note-taking based on the note-taking objective
   (b) Take notes with an emphasis on using strategies to organize notes (e.g., indentation, bullets, outlines, skipping lines, color-coding)
7. Reflect on how notes help to meet the learning objective and contribute to academic and personal success

Inquiry

1. Use questioning techniques to think critically about content and concepts
2. Generate questions based on a misunderstood concept or problem
3. Determine modifications to the process that would be needed to solve similar problems
4. Reflect on learning to make connections between new learning and the broader world
5. Reflect throughout learning on progress and continually adjust actions on major tasks or assignments
6. Reflect throughout a process on progress and continually adjust actions
7. Develop research questions/claim statements that effectively address the research prompt
8. Determine the perspective, validity, and reliability of information found within sources with the use of multiple sources (such as books, articles, and websites)
9. Synthesize information, sources, and data that support the research prompt
10. Construct written claims and support them with reasoning and evidence
11. Publish research to an audience outside of the classroom

Collaboration

1. Negotiate roles within a collaborative group through the adoption of effective elements of collaboration
2. Integrate multiple perspectives into group products
3. Deepen relational capacity through the creation of novel ideas and solutions
4. Interact with peers in complex situations (providing feedback, conflict management, academic discourse) while maintaining a focus on respect, trust, and empathy
5. Support all members' understanding of key concepts
6. Utilize technology to connect to the global community and to explore topics from multiple perspectives
7. Adjust ineffective verbal and nonverbal communication into effective communication
8. Demonstrate active listening by asking clarifying questions
9. Demonstrate command of grammar when communicating
10. Speak effectively before the whole class

Organization

1. (a) Develop efficient, individualized routines related to using organizational tools and planning strategies that enhance academic performance
   (b) Reflect on the use of an activity log or tracking system for community extracurricular activities and hours
2. (a) Understand and demonstrate the concepts and practices of backward mapping
   (b) Identify upcoming events to proactively avoid time-management conflicts
3. Create short- and mid-range goals that support achievement of long-term goals
4. Modify goals and actions appropriately based on progress
5. Manage varied visual frameworks to organize language and show relationships between key concepts

Reading

1. Select texts and justify how they meet the reading purpose
2. Build background knowledge related to the text preview
3. Connect vocabulary within texts to broader concepts in the text
4. Create text-dependent questions while reading that align with the reading purpose
5. Extend beyond the text by analyzing how to best apply key learning

OPPORTUNITY KNOWLEDGE (8.OK)

Advancing College Preparedness

1. Refine key personal attributes for academic, social, and financial fit related to college selection
2. (a) Reflect on current GPA and how it relates to choosing a college and career path

(b) Compare various college campus structures, services, and opportunities
3. Research and evaluate scholarship offerings, including FAFSA
4. (a) Produce long-term academic plans that align with goals
(b) Plan for a successful transition to the next step in the academic journey
(c) Gain exposure to pathways offering work opportunities (credentials, certifications, internships, etc.)
5. (a) Engage in information gathering to determine match, reach, and safety schools in order to mitigate "summer melt" and undermatching during the selection process
(b) Determine whether additional test prep and testing is needed to reach scholarship goals

Building Career Knowledge

1. (a) Develop and authentic and personal definition of success
(b) Refine key personal attributes for academic, social, and financial fit related to career selection
2. (a) Gain awareness of how academic performance links to career performance and success
(b) Expand thinking about potential career fields by encouraging discovery of a variety of career fields and the opportunities therein
(c) Develop knowledge and gain exposure to transitional phases related to work life
3. Identify best-fit career fields based on academic, social, and financial fit to develop short- and long-term career pathways
4. Engage in real-world experiences within career fields of interest, such as service-learning projects, job-shadowing opportunities, or internship possibilities

GENERAL NOTES

5. (a) Maintain a strong support network for academic and career success
   (b) Identify mentors to influence, support, and guide future transactions and success
6. Apply strategies to support motivation, especially when lacking intrinsic motivation
7. (a) Strengthen ability to self-advocate related to areas of need

(b) Leverage support network to assist with areas of need
8. (a) Reflect on current status and skills to strengthen mental flexibility now and in the future
(b) Recognize and overcome obstacles that could hinder future success
9. Apply self-awareness strategies and skills with a variety of academic challenges
10. Employ key learning points in real-world applications

Leadership of Others

1. Assess personal traits connected to integrity and ethical leadership
2. Pursue leadership and/or mentorship opportunities in the school and community
3. Reflect on conflict situations to strengthen ability to deal with the emotions that accompany conflict in leadership roles

RIGOROUS ACADEMIC PREPAREDNESS (8.AP)

Writing

1. (a) Develop writing skills related to timed, argumentative, and descriptive modes of writing
(b) Gather information related to the writing prompt to generate a bank of resources and information
(c) Compose first drafts with a focus on establishing a clear purpose for the writing
2. Utilize inquiry strategies to develop additional questions as needed
3. Independently create and execute a plan for the revision process
4. Analyze the language of writing and edit for voice, flow, and clarity
5. Publish writing to an audience outside of the classroom, such as an online forum
6. (a) Take notes with an emphasis on selecting the appropriate format for note-taking based on the note-taking objective
(b) Take notes with an emphasis on using strategies to organize notes (e.g., indentation, bullets, outlines, skipping lines, color-coding)
7. Reflect on how notes help to meet the learning objective and contribute to academic and personal success

Inquiry

1. Use questioning techniques to think critically about content and concepts
2. Generate questions based on a misunderstood concept or problem
3. Determine modifications to the process that would be needed to solve similar problems
4. Reflect on learning to make connections between new learning and the broader world
5. Reflect throughout learning on progress and continually adjust actions on major tasks or assignments
6. Reflect throughout a process on progress and continually adjust actions
7. Develop research questions/claim statements that effectively address the research prompt
8. Determine the perspective, validity, and reliability of information found within sources with the use of multiple sources (such as books, articles, and websites)
9. Synthesize information, sources, and data that support the research prompt
10. Construct written claims and support them with reasoning and evidence
11. Publish research to an audience outside of the classroom

Collaboration

1. Negotiate roles within a collaborative group through the adoption of effective elements of collaboration
2. Integrate multiple perspectives into group products
3. Deepen relational capacity through the creation of novel ideas and solutions
4. Interact with peers in complex situations (providing feedback, conflict management, academic discourse) while maintaining a focus on respect, trust, and empathy
5. Support all members' understanding of key concepts
6. Utilize technology to connect to the global community and to explore topics from multiple perspectives
7. Adjust ineffective verbal and nonverbal communication into effective communication
8. Demonstrate active listening by asking clarifying questions
9. Demonstrate command of grammar when communicating
10. Speak effectively before the whole class

Organization

1. (a) Develop efficient, individualized routines related to using organizational tools and planning strategies that enhance academic performance
(b) Reflect on the use of an activity log or tracking system for community extracurricular activities and hours
2. (a) Understand and demonstrate the concepts and practices of backward mapping
(b) Identify upcoming events to proactively avoid time-management conflicts
3. Create short- and mid-range goals that support achievement of long-term goals
4. Modify goals and actions appropriately based on progress
5. Manage varied visual frameworks to organize language and show relationships between key concepts

Reading

1. Select texts and justify how they meet the reading purpose
2. Build background knowledge related to the text preview
3. Connect vocabulary within texts to broader concepts in the text
4. Create text-dependent questions while reading that align with the reading purpose
5. Extend beyond the text by analyzing how to best apply key learning

OPPORTUNITY KNOWLEDGE (8.OK)

Advancing College Preparedness

1. Refine key personal attributes for academic, social, and financial fit related to college selection
2. (a) Reflect on current GPA and how it relates to choosing a college and career path

(b) Compare various college campus structures, services, and opportunities
3. Research and evaluate scholarship offerings, including FAFSA
4. (a) Produce long-term academic plans that align with goals
(b) Plan for a successful transition to the next step in the academic journey
(c) Gain exposure to pathways offering work opportunities (credentials, certifications, internships, etc.)
5. (a) Engage in information gathering to determine match, reach, and safety schools in order to mitigate "summer melt" and undermatching during the selection process
(b) Determine whether additional test prep and testing is needed to reach scholarship goals

Building Career Knowledge

1. (a) Develop and authentic and personal definition of success
(b) Refine key personal attributes for academic, social, and financial fit related to career selection
2. (a) Gain awareness of how academic performance links to career performance and success
(b) Expand thinking about potential career fields by encouraging discovery of a variety of career fields and the opportunities therein
(c) Develop knowledge and gain exposure to transitional phases related to work life
3. Identify best-fit career fields based on academic, social, and financial fit to develop short- and long-term career pathways
4. Engage in real-world experiences within career fields of interest, such as service-learning projects, job-shadowing opportunities, or internship possibilities

GENERAL NOTES

Special Note: Skills acquired in this course will be implemented by the student across the curriculum. M/J Advancement Via Individual Determination 8 (M/J AVID 8) is a rigorous course offered by AVID Center, and content must be provided as specified by AVID Center. Teachers must receive training from AVID Center to teach this course.

Trained AVID Elective teachers may visit avid.org, and log into their MyAVID account using their AVID username and password; then follow my.avid.org/file_sharing/default.aspx?id=24544 to access the AVID Weeks at a Glance curriculum and resources for grades 6-12.

Career and Education Planning – Per section 1003.4156, Florida Statutes, the Career and Education Planning course must result in a completed, personalized academic and career plan for the student, that may be revised as the student progresses through middle and high school; must emphasize the importance of entrepreneurship and employability skills; and must include information from the Department of Economic Opportunity's economic security report as described in Section 445.07, Florida Statutes. The required, personalized academic and career plan must inform students of high school graduation requirements, including diploma designations (Section 1003.4285, Florida Statutes); requirements for a Florida Bright Futures Scholarship; state university and Florida College System institution admission requirements; and, available opportunities to earn college credit in high school utilizing acceleration mechanisms. For additional information on the Middle School Career and Education Planning courses, visit fldoe.org/academics/college-career-planning/educators-toolkit/index.stml.

Career and Education Planning Course Standards – Students will:

1.0 Describe the influences that societal, economic, and technological changes have on employment trends and future training.

2.0 Develop skills to locate, evaluate, and interpret career information.

3.0 Identify and demonstrate processes for making short and long term goals.

4.0 Demonstrate employability skills such as working in a group, problem-solving and organizational skills, and the importance of entrepreneurship.

5.0 Understand the relationship between educational achievement and career choices/postsecondary options.

6.0 Identify a career cluster and related pathways through an interest assessment that match career and education goals.

7.0 Develop a career and education plan that includes short and long-term goals, high school program of study, and postsecondary/career goals.

8.0 Demonstrate knowledge of technology and its application in career fields/clusters.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

VERSION REQUIREMENTS

These requirements include, but are not limited to, the Florida Standards that are most relevant to this course. Standards correlated with a specific course requirement may also be addressed by other course requirements as appropriate. Some requirements in this course are not addressed in the Florida Standards. Other subject areas and content may be used to fulfill course requirements. This course includes an agreement related to minimum standards for behavior, attendance, and participation.

QUALIFICATIONS

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

Any field when certification reflects a bachelor or higher degree.

Research 1 (#1700300) 2015 - 2022 (current)

Course Standards

Name	Description
LAFS.910.L.1.1:	Demonstrate command of the conventions of standard English grammar and usage when writing or speaking. a. Use parallel structure. b. Use various types of phrases (noun, verb, adjectival, adverbial, participial, prepositional, absolute) and clauses (independent, dependent; noun, relative, adverbial) to convey specific meanings and add variety and interest to writing or presentations. **Standard Relation to Course: Supporting**
LAFS.910.RI.1.1:	Cite strong and thorough textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.
LAFS.910.RI.3.8:	Delineate and evaluate the argument and specific claims in a text, assessing whether the reasoning is valid and the evidence is relevant and sufficient; identify false statements and fallacious reasoning.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented. **Standard Relation to Course: Supporting**
LAFS.910.SL.1.2:	Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.
LAFS.910.SL.2.4:	Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.
LAFS.910.SL.2.5:	Make strategic use of digital media (e.g., textual, graphical, audio, visual, and interactive elements) in presentations to enhance understanding of findings, reasoning, and evidence and to add interest.
LAFS.910.W.1.2:	Write informative/explanatory texts to examine and convey complex ideas, concepts, and information clearly and accurately through the effective selection, organization, and analysis of content. a. Introduce a topic; organize complex ideas, concepts, and information to make important connections and distinctions; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension. b. Develop the topic with well-chosen, relevant, and sufficient facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic. c. Use appropriate and varied transitions to link the major sections of the text, create cohesion, and clarify the relationships among complex ideas and concepts. d. Use precise language and domain-specific vocabulary to manage the complexity of the topic. e. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. f. Provide a concluding statement or section that follows from and supports the information or explanation presented (e.g., articulating implications or the significance of the topic). **Standard Relation to Course: Supporting**
LAFS.910.W.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience. (Grade-specific expectations for writing types are defined in standards 1–3 above.)
LAFS.910.W.4.10:	Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of tasks, purposes, and audiences.
LAFS.910.WHST.2.5:	Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.
LAFS.910.WHST.3.8:	Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the usefulness of each source in answering the research question; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and following a standard format for citation.
MAFS.K12.MP.1.1:	**Make sense of problems and persevere in solving them.** Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.
	Construct viable arguments and critique the reasoning of others.

MAFS.K12.MP.3.1:	Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.
SC.912.N.1.1:	Define a problem based on a specific body of knowledge, for example: biology, chemistry, physics, and earth/space science, and do the following: 1. **Pose questions about the natural world,** (Articulate the purpose of the investigation and identify the relevant scientific concepts). 2. **Conduct systematic observations,** (Write procedures that are clear and replicable. Identify observables and examine relationships between test (independent) variable and outcome (dependent) variable. Employ appropriate methods for accurate and consistent observations; conduct and record measurements at appropriate levels of precision. Follow safety guidelines). 3. **Examine books and other sources of information to see what is already known,** 4. **Review what is known in light of empirical evidence,** (Examine whether available empirical evidence can be interpreted in terms of existing knowledge and models, and if not, modify or develop new models). 5. **Plan investigations,** (Design and evaluate a scientific investigation). 6. **Use tools to gather, analyze, and interpret data (this includes the use of measurement in metric and other systems, and also the generation and interpretation of graphical representations of data, including data tables and graphs),** (Collect data or evidence in an organized way. Properly use instruments, equipment, and materials (e.g., scales, probeware, meter sticks, microscopes, computers) including set-up, calibration, technique, maintenance, and storage). 7. **Pose answers, explanations, or descriptions of events,** 8. **Generate explanations that explicate or describe natural phenomena (inferences),** 9. **Use appropriate evidence and reasoning to justify these explanations to others,** 10. **Communicate results of scientific investigations, and** 11. **Evaluate the merits of the explanations produced by others.**
SC.912.N.1.4:	Identify sources of information and assess their reliability according to the strict standards of scientific investigation.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
SS.912.P.12.1:	Define cognitive processes involved in understanding information. **Clarifications:** Examples may include, but are not limited to, encoding, storage, and retrieval.

General Course Information and Notes

GENERAL NOTES

The purpose of this course is to enable students to develop fundamental knowledge of the steps in the research process.

The content should include, but not be limited to, the following:

- nature and purpose of research
- research questions and hypotheses
- research methods and procedures
- review of literature and other resources
- primary and secondary sources
- directed investigations
- organization of information
- report formats, styles, and content
- critical analysis of research
- submission of a major independent research project

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

QUALIFICATIONS

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

Any field when certification reflects a bachelor or higher degree.

Course Standards

Name	Description
LAFS.910.L.1.1:	Demonstrate command of the conventions of standard English grammar and usage when writing or speaking. a. Use parallel structure. b. Use various types of phrases (noun, verb, adjectival, adverbial, participial, prepositional, absolute) and clauses (independent, dependent; noun, relative, adverbial) to convey specific meanings and add variety and interest to writing or presentations. **Standard Relation to Course: Supporting**
LAFS.910.L.1.2:	Demonstrate command of the conventions of standard English capitalization, punctuation, and spelling when writing. a. Use a semicolon, with or without a conjunctive adverb, to link two or more closely related independent clauses. b. Use a colon to introduce a list or quotation. c. Spell correctly. **Standard Relation to Course: Supporting**
LAFS.910.RI.1.1:	Cite strong and thorough textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.
LAFS.910.RI.2.6:	Determine an author's point of view or purpose in a text and analyze how an author uses rhetoric to advance that point of view or purpose.
LAFS.910.RI.3.7:	Analyze various accounts of a subject told in different mediums (e.g., a person's life story in both print and multimedia), determining which details are emphasized in each account.
LAFS.910.RI.3.8:	Delineate and evaluate the argument and specific claims in a text, assessing whether the reasoning is valid and the evidence is relevant and sufficient; identify false statements and fallacious reasoning.
LAFS.910.RST.3.7:	Translate quantitative or technical information expressed in words in a text into visual form (e.g., a table or chart) and translate information expressed visually or mathematically (e.g., in an equation) into words.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented. **Standard Relation to Course: Supporting**
LAFS.910.SL.1.2:	Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.
LAFS.910.SL.2.4:	Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.
LAFS.910.SL.2.5:	Make strategic use of digital media (e.g., textual, graphical, audio, visual, and interactive elements) in presentations to enhance understanding of findings, reasoning, and evidence and to add interest.
LAFS.910.W.1.1:	Write arguments to support claims in an analysis of substantive topics or texts, using valid reasoning and relevant and sufficient evidence. a. Introduce precise claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that establishes clear relationships among claim(s), counterclaims, reasons, and evidence. b. Develop claim(s) and counterclaims fairly, supplying evidence for each while pointing out the strengths and limitations of both in a manner that anticipates the audience's knowledge level and concerns. c. Use words, phrases, and clauses to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims. d. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. e. Provide a concluding statement or section that follows from and supports the argument presented. **Standard Relation to Course: Supporting**
LAFS.910.W.1.2:	Write informative/explanatory texts to examine and convey complex ideas, concepts, and information clearly and accurately through the effective selection, organization, and analysis of content. a. Introduce a topic; organize complex ideas, concepts, and information to make important connections and distinctions; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension. b. Develop the topic with well-chosen, relevant, and sufficient facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic. c. Use appropriate and varied transitions to link the major sections of the text, create cohesion, and clarify the relationships among complex ideas and concepts. d. Use precise language and domain-specific vocabulary to manage the complexity of the topic. e. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. f. Provide a concluding statement or section that follows from and supports the information or explanation presented (e.g., articulating implications or the significance of the topic). **Standard Relation to Course: Supporting**

LAFS.910.W.1.3:	Write narratives to develop real or imagined experiences or events using effective technique, well-chosen details, and well-structured event sequences. a. Engage and orient the reader by setting out a problem, situation, or observation, establishing one or multiple point(s) of view, and introducing a narrator and/or characters; create a smooth progression of experiences or events. b. Use narrative techniques, such as dialogue, pacing, description, reflection, and multiple plot lines, to develop experiences, events, and/or characters. c. Use a variety of techniques to sequence events so that they build on one another to create a coherent whole. d. Use precise words and phrases, telling details, and sensory language to convey a vivid picture of the experiences, events, setting, and/or characters. e. Provide a conclusion that follows from and reflects on what is experienced, observed, or resolved over the course of the narrative. **Standard Relation to Course: Supporting**
LAFS.910.W.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience. (Grade-specific expectations for writing types are defined in standards 1–3 above.)
LAFS.910.W.2.5:	Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.
LAFS.910.W.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibly and dynamically.
LAFS.910.W.3.8:	Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the usefulness of each source in answering the research question; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and following a standard format for citation.
LAFS.910.W.3.9:	Draw evidence from literary or informational texts to support analysis, reflection, and research. a. Apply grades 9–10 Reading standards to literature (e.g., "Analyze how an author draws on and transforms source material in a specific work [e.g., how Shakespeare treats a theme or topic from Ovid or the Bible or how a later author draws on a play by Shakespeare]"). b. Apply grades 9–10 Reading standards to literary nonfiction (e.g., "Delineate and evaluate the argument and specific claims in a text, assessing whether the reasoning is valid and the evidence is relevant and sufficient; identify false statements and fallacious reasoning"). **Standard Relation to Course: Supporting**
LAFS.910.WHST.2.5:	Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.
LAFS.910.WHST.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.910.WHST.3.8:	Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the usefulness of each source in answering the research question; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and following a standard format for citation.
SC.912.N.1.1:	Define a problem based on a specific body of knowledge, for example: biology, chemistry, physics, and earth/space science, and do the following: 1. **Pose questions about the natural world,** (Articulate the purpose of the investigation and identify the relevant scientific concepts). 2. **Conduct systematic observations,** (Write procedures that are clear and replicable. Identify observables and examine relationships between test (independent) variable and outcome (dependent) variable. Employ appropriate methods for accurate and consistent observations; conduct and record measurements at appropriate levels of precision. Follow safety guidelines). 3. **Examine books and other sources of information to see what is already known,** 4. **Review what is known in light of empirical evidence,** (Examine whether available empirical evidence can be interpreted in terms of existing knowledge and models, and if not, modify or develop new models). 5. **Plan investigations,** (Design and evaluate a scientific investigation). 6. **Use tools to gather, analyze, and interpret data (this includes the use of measurement in metric and other systems, and also the generation and interpretation of graphical representations of data, including data tables and graphs),** (Collect data or evidence in an organized way. Properly use instruments, equipment, and materials (e.g., scales, probeware, meter sticks, microscopes, computers) including set-up, calibration, technique, maintenance, and storage). 7. **Pose answers, explanations, or descriptions of events,** 8. **Generate explanations that explicate or describe natural phenomena (inferences),** 9. **Use appropriate evidence and reasoning to justify these explanations to others,** 10. **Communicate results of scientific investigations, and** 11. **Evaluate the merits of the explanations produced by others.**
SC.912.N.1.4:	Identify sources of information and assess their reliability according to the strict standards of scientific investigation.
SC.912.N.1.5:	Describe and provide examples of how similar investigations conducted in many parts of the world result in the same outcome.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
SS.912.P.12.1:	Define cognitive processes involved in understanding information. **Clarifications:** Examples may include, but are not limited to, encoding, storage, and retrieval.

General Course Information and Notes

GENERAL NOTES

The purpose of this course is to enable students to develop basic knowledge and skills in the research process with emphasis on determining and refining research questions.

The content should include, but not be limited to, the following:

- research process

- research topics
- research questions and hypotheses
- definition, analysis, and evaluation of research questions
- review of literature and other resources
- primary and secondary sources
- formulation of hypotheses
- organization of information
- report formats, styles, and content
- directed investigations -critical analysis of research

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

QUALIFICATIONS

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

Any field when certification reflects a bachelor or higher degree.

Research 3 (#1700320) 2015 - 2022 (current)

Course Standards

Name	Description
LAFS.1112.L.1.1:	Demonstrate command of the conventions of standard English grammar and usage when writing or speaking. a. Apply the understanding that usage is a matter of convention, can change over time, and is sometimes contested. b. Resolve issues of complex or contested usage, consulting references (e.g., *Merriam-Webster's Dictionary of English Usage, Garner's Modern American Usage*) as needed. **Standard Relation to Course: Supporting**
LAFS.1112.L.1.2:	Demonstrate command of the conventions of standard English capitalization, punctuation, and spelling when writing. a. Observe hyphenation conventions. b. Spell correctly. **Standard Relation to Course: Supporting**
LAFS.1112.RH.3.7:	Integrate and evaluate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, as well as in words) in order to address a question or solve a problem.
LAFS.1112.RI.1.1:	Cite strong and thorough textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text, including determining where the text leaves matters uncertain.
LAFS.1112.RI.1.2:	Determine two or more central ideas of a text and analyze their development over the course of the text, including how they interact and build on one another to provide a complex analysis; provide an objective summary of the text.
LAFS.1112.RI.2.6:	Determine an author's point of view or purpose in a text in which the rhetoric is particularly effective, analyzing how style and content contribute to the power, persuasiveness or beauty of the text.
LAFS.1112.RI.3.7:	Integrate and evaluate multiple sources of information presented in different media or formats (e.g., visually, quantitatively) as well as in words in order to address a question or solve a problem.
LAFS.1112.RI.3.8:	Delineate and evaluate the reasoning in seminal U.S. texts, including the application of constitutional principles and use of legal reasoning (e.g., in U.S. Supreme Court majority opinions and dissents) and the premises, purposes, and arguments in works of public advocacy (e.g., The Federalist, presidential addresses).
LAFS.1112.RST.2.6:	Analyze the author's purpose in providing an explanation, describing a procedure, or discussing an experiment in a text, identifying important issues that remain unresolved.
LAFS.1112.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed. c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives. d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task. **Standard Relation to Course: Supporting**
LAFS.1112.SL.1.2:	Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.
LAFS.1112.SL.2.4:	Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.
LAFS.1112.SL.2.5:	Make strategic use of digital media (e.g., textual, graphical, audio, visual, and interactive elements) in presentations to enhance understanding of findings, reasoning, and evidence and to add interest.
LAFS.1112.W.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience. (Grade-specific expectations for writing types are defined in standards 1–3 above.)
LAFS.1112.W.2.5:	Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.
LAFS.1112.W.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products in response to ongoing feedback, including new arguments or information.
LAFS.1112.W.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.1112.W.3.8:	Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the strengths and limitations of each source in terms of the task, purpose, and audience; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and overreliance on any one source and following a standard format for citation.
LAFS.1112.W.3.9:	Draw evidence from literary or informational texts to support analysis, reflection, and research. a. Apply grades 11–12 Reading standards to literature (e.g., "Demonstrate knowledge of eighteenth-, nineteenth- and early-twentieth-century foundational works of American literature, including how two or more texts from the same period treat similar themes or topics"). b. Apply grades 11–12 Reading standards to literary nonfiction (e.g., "Delineate and evaluate the reasoning in seminal U.S. texts, including the application of constitutional principles and use of legal reasoning [e.g., in U.S. Supreme Court Case majority opinions and dissents] and the premises, purposes, and arguments in works of public advocacy [e.g., The Federalist, presidential addresses]"). **Standard Relation to Course: Supporting**

LAFS.1112.WHST.1.1:	Write arguments focused on *discipline-specific content.* a. Introduce precise, knowledgeable claim(s), establish the significance of the claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that logically sequences the claim(s), counterclaims, reasons, and evidence. b. Develop claim(s) and counterclaims fairly and thoroughly, supplying the most relevant data and evidence for each while pointing out the strengths and limitations of both claim(s) and counterclaims in a discipline-appropriate form that anticipates the audience's knowledge level, concerns, values, and possible biases. c. Use words, phrases, and clauses as well as varied syntax to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims. d. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. e. Provide a concluding statement or section that follows from or supports the argument presented. **Standard Relation to Course: Supporting**
LAFS.1112.WHST.1.2:	Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes. a. Introduce a topic and organize complex ideas, concepts, and information so that each new element builds on that which precedes it to create a unified whole; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension. b. Develop the topic thoroughly by selecting the most significant and relevant facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic. c. Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among complex ideas and concepts. d. Use precise language, domain-specific vocabulary and techniques such as metaphor, simile, and analogy to manage the complexity of the topic; convey a knowledgeable stance in a style that responds to the discipline and context as well as to the expertise of likely readers. e. Provide a concluding statement or section that follows from and supports the information or explanation provided (e.g., articulating implications or the significance of the topic). **Standard Relation to Course: Supporting**
LAFS.1112.WHST.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products in response to ongoing feedback, including new arguments or information.
MAFS.K12.MP.1.1:	**Make sense of problems and persevere in solving them.** Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches. **Standard Relation to Course: Supporting**
MAFS.K12.MP.2.1:	**Reason abstractly and quantitatively**. Mathematically proficient students make sense of quantities and their relationships in problem situations. They bring two complementary abilities to bear on problems involving quantitative relationships: the ability to decontextualize—to abstract a given situation and represent it symbolically and manipulate the representing symbols as if they have a life of their own, without necessarily attending to their referents—and the ability to contextualize, to pause as needed during the manipulation process in order to probe into the referents for the symbols involved. Quantitative reasoning entails habits of creating a coherent representation of the problem at hand; considering the units involved; attending to the meaning of quantities, not just how to compute them; and knowing and flexibly using different properties of operations and objects. **Standard Relation to Course: Supporting**
MAFS.K12.MP.3.1:	**Construct viable arguments and critique the reasoning of others.** Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments. **Standard Relation to Course: Supporting**
MAFS.K12.MP.4.1:	**Model with mathematics.** Mathematically proficient students can apply the mathematics they know to solve problems arising in everyday life, society, and the workplace. In early grades, this might be as simple as writing an addition equation to describe a situation. In middle grades, a student might apply proportional reasoning to plan a school event or analyze a problem in the community. By high school, a student might use geometry to solve a design problem or use a function to describe how one quantity of interest depends on another. Mathematically proficient students who can apply what they know are comfortable making assumptions and approximations to simplify a complicated situation, realizing that these may need revision later. They are able to identify important quantities in a practical situation and map their relationships using such tools as diagrams, two-way tables, graphs, flowcharts and formulas. They can analyze those relationships mathematically to draw conclusions. They routinely interpret their mathematical results in the context of the situation and reflect on whether the results make sense, possibly improving the model if it has not served its purpose. **Standard Relation to Course: Supporting**
	Use appropriate tools strategically. Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper,

MAFS.K12.MP.5.1:	concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 – 3(x – y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
MAFS.K12.MP.8.1:	**Look for and express regularity in repeated reasoning.** Mathematically proficient students notice if calculations are repeated, and look both for general methods and for shortcuts. Upper elementary students might notice when dividing 25 by 11 that they are repeating the same calculations over and over again, and conclude they have a repeating decimal. By paying attention to the calculation of slope as they repeatedly check whether points are on the line through (1, 2) with slope 3, middle school students might abstract the equation $(y – 2)/(x – 1) = 3$. Noticing the regularity in the way terms cancel when expanding $(x – 1)(x + 1)$, $(x – 1)(x^2 + x + 1)$, and $(x – 1)(x^3 + x^2 + x + 1)$ might lead them to the general formula for the sum of a geometric series. As they work to solve a problem, mathematically proficient students maintain oversight of the process, while attending to the details. They continually evaluate the reasonableness of their intermediate results. **Standard Relation to Course: Supporting**
SC.912.N.1.1:	Define a problem based on a specific body of knowledge, for example: biology, chemistry, physics, and earth/space science, and do the following: 1. **Pose questions about the natural world,** (Articulate the purpose of the investigation and identify the relevant scientific concepts). 2. **Conduct systematic observations,** (Write procedures that are clear and replicable. Identify observables and examine relationships between test (independent) variable and outcome (dependent) variable. Employ appropriate methods for accurate and consistent observations; conduct and record measurements at appropriate levels of precision. Follow safety guidelines). 3. **Examine books and other sources of information to see what is already known,** 4. **Review what is known in light of empirical evidence,** (Examine whether available empirical evidence can be interpreted in terms of existing knowledge and models, and if not, modify or develop new models). 5. **Plan investigations,** (Design and evaluate a scientific investigation). 6. **Use tools to gather, analyze, and interpret data (this includes the use of measurement in metric and other systems, and also the generation and interpretation of graphical representations of data, including data tables and graphs),** (Collect data or evidence in an organized way. Properly use instruments, equipment, and materials (e.g., scales, probeware, meter sticks, microscopes, computers) including set-up, calibration, technique, maintenance, and storage). 7. **Pose answers, explanations, or descriptions of events,** 8. **Generate explanations that explicate or describe natural phenomena (inferences),** 9. **Use appropriate evidence and reasoning to justify these explanations to others,** 10. **Communicate results of scientific investigations, and** 11. **Evaluate the merits of the explanations produced by others.**
SC.912.N.1.7:	Recognize the role of creativity in constructing scientific questions, methods and explanations.
SC.912.N.2.2:	Identify which questions can be answered through science and which questions are outside the boundaries of scientific investigation, such as questions addressed by other ways of knowing, such as art, philosophy, and religion.
SC.912.N.2.3:	Identify examples of pseudoscience (such as astrology, phrenology) in society.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
SS.912.P.12.1:	Define cognitive processes involved in understanding information. **Clarifications:** Examples may include, but are not limited to, encoding, storage, and retrieval.

General Course Information and Notes

GENERAL NOTES

The purpose of this course is to enable students to develop proficient knowledge and skills in the research process with emphasis on appropriate research design.

The content should include, but not be limited to, the following:

- research process
- experimental, descriptive, and historical research
- research design and methodology
- legal and ethical issues in research
- research questions and hypotheses
- review of literature and other resources
- data collection, analysis, and statistics
- report formats, styles, and content
- investigations
- critical analysis of research

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

QUALIFICATIONS

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

Any field when certification reflects a bachelor or higher degree.

Course Standards

Name	Description
LAFS.910.RH.3.7:	Integrate quantitative or technical analysis (e.g., charts, research data) with qualitative analysis in print or digital text.
LAFS.910.RH.3.8:	Assess the extent to which the reasoning and evidence in a text support the author's claims.
LAFS.910.RH.3.9:	Compare and contrast treatments of the same topic in several primary and secondary sources.
LAFS.910.RI.1.1:	Cite strong and thorough textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.
LAFS.910.RI.1.2:	Determine a central idea of a text and analyze its development over the course of the text, including how it emerges and is shaped and refined by specific details; provide an objective summary of the text.
LAFS.910.RI.2.6:	Determine an author's point of view or purpose in a text and analyze how an author uses rhetoric to advance that point of view or purpose.
LAFS.910.RI.3.7:	Analyze various accounts of a subject told in different mediums (e.g., a person's life story in both print and multimedia), determining which details are emphasized in each account.
LAFS.910.RI.3.8:	Delineate and evaluate the argument and specific claims in a text, assessing whether the reasoning is valid and the evidence is relevant and sufficient; identify false statements and fallacious reasoning.
LAFS.910.RST.2.6:	Analyze the author's purpose in providing an explanation, describing a procedure, or discussing an experiment in a text, defining the question the author seeks to address.
LAFS.910.SL.1.2:	Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.
LAFS.910.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.
LAFS.910.W.1.1:	Write arguments to support claims in an analysis of substantive topics or texts, using valid reasoning and relevant and sufficient evidence. a. Introduce precise claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that establishes clear relationships among claim(s), counterclaims, reasons, and evidence. b. Develop claim(s) and counterclaims fairly, supplying evidence for each while pointing out the strengths and limitations of both in a manner that anticipates the audience's knowledge level and concerns. c. Use words, phrases, and clauses to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims. d. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. e. Provide a concluding statement or section that follows from and supports the argument presented.
LAFS.910.W.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience. (Grade-specific expectations for writing types are defined in standards 1–3 above.)
LAFS.910.W.2.5:	Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.
LAFS.910.W.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibly and dynamically.
LAFS.910.W.3.8:	Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the usefulness of each source in answering the research question; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and following a standard format for citation.
LAFS.910.W.3.9:	Draw evidence from literary or informational texts to support analysis, reflection, and research. a. Apply grades 9–10 Reading standards to literature (e.g., "Analyze how an author draws on and transforms source material in a specific work [e.g., how Shakespeare treats a theme or topic from Ovid or the Bible or how a later author draws on a play by Shakespeare]"). b. Apply grades 9–10 Reading standards to literary nonfiction (e.g., "Delineate and evaluate the argument and specific claims in a text, assessing whether the reasoning is valid and the evidence is relevant and sufficient; identify false statements and fallacious reasoning").
LAFS.910.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.910.WHST.2.5:	Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.
LAFS.910.WHST.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.910.WHST.3.8:	Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the usefulness of each source in answering the research question; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and following a standard format for citation.
MAFS.K12.MP.1.1:	**Make sense of problems and persevere in solving them.** Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems

	and identify correspondences between different approaches. **Standard Relation to Course: Supporting**
MAFS.K12.MP.2.1:	**Reason abstractly and quantitatively**. Mathematically proficient students make sense of quantities and their relationships in problem situations. They bring two complementary abilities to bear on problems involving quantitative relationships: the ability to decontextualize—to abstract a given situation and represent it symbolically and manipulate the representing symbols as if they have a life of their own, without necessarily attending to their referents—and the ability to contextualize, to pause as needed during the manipulation process in order to probe into the referents for the symbols involved. Quantitative reasoning entails habits of creating a coherent representation of the problem at hand; considering the units involved; attending to the meaning of quantities, not just how to compute them; and knowing and flexibly using different properties of operations and objects. **Standard Relation to Course: Supporting**
MAFS.K12.MP.3.1:	**Construct viable arguments and critique the reasoning of others.** Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments. **Standard Relation to Course: Supporting**
MAFS.K12.MP.4.1:	**Model with mathematics.** Mathematically proficient students can apply the mathematics they know to solve problems arising in everyday life, society, and the workplace. In early grades, this might be as simple as writing an addition equation to describe a situation. In middle grades, a student might apply proportional reasoning to plan a school event or analyze a problem in the community. By high school, a student might use geometry to solve a design problem or use a function to describe how one quantity of interest depends on another. Mathematically proficient students who can apply what they know are comfortable making assumptions and approximations to simplify a complicated situation, realizing that these may need revision later. They are able to identify important quantities in a practical situation and map their relationships using such tools as diagrams, two-way tables, graphs, flowcharts and formulas. They can analyze those relationships mathematically to draw conclusions. They routinely interpret their mathematical results in the context of the situation and reflect on whether the results make sense, possibly improving the model if it has not served its purpose. **Standard Relation to Course: Supporting**
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 – 3(x – y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
MAFS.K12.MP.8.1:	**Look for and express regularity in repeated reasoning.** Mathematically proficient students notice if calculations are repeated, and look both for general methods and for shortcuts. Upper elementary students might notice when dividing 25 by 11 that they are repeating the same calculations over and over again, and conclude they have a repeating decimal. By paying attention to the calculation of slope as they repeatedly check whether points are on the line through (1, 2) with slope 3, middle school students might abstract the equation $(y – 2)/(x – 1) = 3$. Noticing the regularity in the way terms cancel when expanding $(x – 1)(x + 1)$, $(x – 1)(x^2 + x + 1)$, and $(x – 1)(x^3 + x^2 + x + 1)$ might lead them to the general formula for the sum of a geometric series. As they work to solve a problem, mathematically proficient students maintain oversight of the process, while attending to the details. They continually evaluate the reasonableness of their intermediate results. **Standard Relation to Course: Supporting**
SS.912.P.11.3:	Discuss strategies for improving the encoding of memory.

SS.912.P.11.7:	Discuss strategies for improving the storage of memories.
SS.912.P.11.12:	Discuss strategies for improving the retrieval of memories.
SS.912.P.12.1:	Define cognitive processes involved in understanding information. **Clarifications:** Examples may include, but are not limited to, encoding, storage, and retrieval.
SS.912.P.12.2:	Define processes involved in problem solving and decision making. **Clarifications:** Examples may include, but are not limited to, identification, analysis, solution generation, plan, implement, and evaluate.
SS.912.P.12.5:	Describe obstacles to decision making. **Clarifications:** Examples may include, but are not limited to, confirmation bias, counterproductive heuristics, and overconfidence.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
SC.912.N.4.2:	Weigh the merits of alternative strategies for solving a specific societal problem by comparing a number of different costs and benefits, such as human, economic, and environmental.

General Course Information and Notes

GENERAL NOTES

Special Note. *Pre-IB courses have been created by individual schools or school districts since before the MYP started. These courses mapped backwards the Diploma Programme (DP) to prepare students as early as age 14. The IB was never involved in creating or approving these courses. The IB acknowledges that it is important for students to receive preparation for taking part in the DP, and that preparation is the MYP. The IB designed the MYP to address the whole child, which, as a result, has a very different philosophical approach that aims at educating all students aged 11-16. Pre-IB courses usually deal with content, with less emphasis upon the needs of the whole child or the affective domain than the MYP. A school can have a course that it calls "pre-IB" as long as it makes it clear that the course and any supporting material have been developed independently of the IB. For this reason, the school must name the course along the lines of, for example, the "Any School pre-IB course".*

The IB does not recognize pre-IB courses or courses labeled IB by different school districts which are not an official part of the IBDP or IBCC curriculum. Typically, students enrolled in grade 9 or 10 are not in the IBDP or IBCC programmes.
ibanswers.ibo.org/app/answers/detail/a_id/5414/kw/pre-ib. **Florida's Pre-IB courses should only be used in schools where MYP is not offered in order to prepare students to enter the IBDP. Teachers of Florida's Pre-IB courses should have undergone IB training in order to ensure seamless articulation for students within the subject area.**
Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

QUALIFICATIONS

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

Any academic coverage (any coverage classified as an academic coverage in Rules 6A-4.0101 through 6A-4.0343, Florida Administrative Code).

Critical Thinking and Study Skills (#1700370) 2015 - 2022 (current)

Course Standards

Name	Description
LAFS.910.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources, attending to such features as the date and origin of the information.
LAFS.910.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of how key events or ideas develop over the course of the text.
LAFS.910.RH.2.5:	Analyze how a text uses structure to emphasize key points or advance an explanation or analysis.
LAFS.910.RH.3.8:	Assess the extent to which the reasoning and evidence in a text support the author's claims.
LAFS.910.RI.1.1:	Cite strong and thorough textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.
LAFS.910.RI.2.4:	Determine the meaning of words and phrases as they are used in a text, including figurative, connotative, and technical meanings; analyze the cumulative impact of specific word choices on meaning and tone (e.g., how the language of a court opinion differs from that of a newspaper).
LAFS.910.RI.2.6:	Determine an author's point of view or purpose in a text and analyze how an author uses rhetoric to advance that point of view or purpose.
LAFS.910.RI.3.7:	Analyze various accounts of a subject told in different mediums (e.g., a person's life story in both print and multimedia), determining which details are emphasized in each account.
LAFS.910.RI.3.8:	Delineate and evaluate the argument and specific claims in a text, assessing whether the reasoning is valid and the evidence is relevant and sufficient; identify false statements and fallacious reasoning.
LAFS.910.RST.1.1:	Cite specific textual evidence to support analysis of science and technical texts, attending to the precise details of explanations or descriptions.
LAFS.910.RST.1.2:	Determine the central ideas or conclusions of a text; trace the text's explanation or depiction of a complex process, phenomenon, or concept; provide an accurate summary of the text.
LAFS.910.RST.2.6:	Analyze the author's purpose in providing an explanation, describing a procedure, or discussing an experiment in a text, defining the question the author seeks to address.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented. **Standard Relation to Course: Supporting**
LAFS.910.SL.1.2:	Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.
LAFS.910.SL.2.4:	Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.
LAFS.910.W.1.1:	Write arguments to support claims in an analysis of substantive topics or texts, using valid reasoning and relevant and sufficient evidence. a. Introduce precise claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that establishes clear relationships among claim(s), counterclaims, reasons, and evidence. b. Develop claim(s) and counterclaims fairly, supplying evidence for each while pointing out the strengths and limitations of both in a manner that anticipates the audience's knowledge level and concerns. c. Use words, phrases, and clauses to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims. d. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. e. Provide a concluding statement or section that follows from and supports the argument presented. **Standard Relation to Course: Supporting**
LAFS.910.W.1.2:	Write informative/explanatory texts to examine and convey complex ideas, concepts, and information clearly and accurately through the effective selection, organization, and analysis of content. a. Introduce a topic; organize complex ideas, concepts, and information to make important connections and distinctions; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension. b. Develop the topic with well-chosen, relevant, and sufficient facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic. c. Use appropriate and varied transitions to link the major sections of the text, create cohesion, and clarify the relationships among complex ideas and concepts. d. Use precise language and domain-specific vocabulary to manage the complexity of the topic. e. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. f. Provide a concluding statement or section that follows from and supports the information or explanation presented (e.g., articulating implications or the significance of the topic). **Standard Relation to Course: Supporting**
LAFS.910.W.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience. (Grade-specific expectations for writing types are defined in standards 1–3 above.)

LAFS.910.W.2.5:	Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.
LAFS.910.W.3.8:	Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the usefulness of each source in answering the research question; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and following a standard format for citation.
SS.912.P.11.3:	Discuss strategies for improving the encoding of memory.
SS.912.P.11.7:	Discuss strategies for improving the storage of memories.
SS.912.P.11.12:	Discuss strategies for improving the retrieval of memories.
SS.912.P.12.2:	Define processes involved in problem solving and decision making. **Clarifications:** Examples may include, but are not limited to, identification, analysis, solution generation, plan, implement, and evaluate.
MAFS.K12.MP.1.1:	**Make sense of problems and persevere in solving them.** Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.
MAFS.K12.MP.3.1:	**Construct viable arguments and critique the reasoning of others.** Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

GENERAL NOTES

This course is designed to develop skills related to critical thinking, learning and problem solving, enabling students to enhance their performance in both academic and non-academic areas. Strategies for acquiring, storing and retrieving information, time management and organizational skills, critical thinking operations and processes, strategies for oral and written communication, and problem solving skills including test taking skills are an integral part of this course.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. Course Standards

Name	Description
LAFS.910.L.1.1:	Demonstrate command of the conventions of standard English grammar and usage when writing or speaking. a. Use parallel structure. b. Use various types of phrases (noun, verb, adjectival, adverbial, participial, prepositional, absolute) and clauses (independent, dependent; noun, relative, adverbial) to convey specific meanings and add variety and interest to writing or presentations. **Standard Relation to Course: Supporting**
LAFS.910.L.1.2:	Demonstrate command of the conventions of standard English capitalization, punctuation, and spelling when writing. a. Use a semicolon, with or without a conjunctive adverb, to link two or more closely related independent clauses. b. Use a colon to introduce a list or quotation. c. Spell correctly.
LAFS.910.RI.1.1:	Cite strong and thorough textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.
LAFS.910.RI.2.4:	Determine the meaning of words and phrases as they are used in a text, including figurative, connotative, and technical meanings; analyze the cumulative impact of specific word choices on meaning and tone (e.g., how the language of a court opinion differs from that of a newspaper).
LAFS.910.RI.2.6:	Determine an author's point of view or purpose in a text and analyze how an author uses rhetoric to advance that point of view or purpose.
LAFS.910.RI.3.7:	Analyze various accounts of a subject told in different mediums (e.g., a person's life story in both print and multimedia), determining which details are emphasized in each account.
LAFS.910.RI.3.8:	Delineate and evaluate the argument and specific claims in a text, assessing whether the reasoning is valid and the evidence is relevant and sufficient; identify false statements and fallacious reasoning.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented. **Standard Relation to Course: Supporting**
LAFS.910.SL.1.2:	Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.
LAFS.910.SL.2.4:	Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.
LAFS.910.SL.2.5:	Make strategic use of digital media (e.g., textual, graphical, audio, visual, and interactive elements) in presentations to enhance understanding of findings, reasoning, and evidence and to add interest.
LAFS.910.SL.2.6:	Adapt speech to a variety of contexts and tasks, demonstrating command of formal English when indicated or appropriate.
LAFS.910.W.1.1:	Write arguments to support claims in an analysis of substantive topics or texts, using valid reasoning and relevant and sufficient evidence. a. Introduce precise claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that establishes clear relationships among claim(s), counterclaims, reasons, and evidence. b. Develop claim(s) and counterclaims fairly, supplying evidence for each while pointing out the strengths and limitations of both in a manner that anticipates the audience's knowledge level and concerns. c. Use words, phrases, and clauses to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims. d. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. e. Provide a concluding statement or section that follows from and supports the argument presented. **Standard Relation to Course: Supporting**
LAFS.910.W.1.2:	Write informative/explanatory texts to examine and convey complex ideas, concepts, and information clearly and accurately through the effective selection, organization, and analysis of content. a. Introduce a topic; organize complex ideas, concepts, and information to make important connections and distinctions; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension. b. Develop the topic with well-chosen, relevant, and sufficient facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic. c. Use appropriate and varied transitions to link the major sections of the text, create cohesion, and clarify the relationships among complex ideas and concepts. d. Use precise language and domain-specific vocabulary to manage the complexity of the topic. e. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing.

	f. Provide a concluding statement or section that follows from and supports the information or explanation presented (e.g., articulating implications or the significance of the topic).
	Standard Relation to Course: Supporting
LAFS.910.W.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience. (Grade-specific expectations for writing types are defined in standards 1–3 above.)
LAFS.910.W.2.5:	Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.
LAFS.910.W.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibly and dynamically.
LAFS.910.W.3.8:	Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the usefulness of each source in answering the research question; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and following a standard format for citation.
SS.912.E.1.5:	Compare different forms of business organizations. **Clarifications:** Examples are sole proprietorship, partnership, corporation, limited liability corporation.
SS.912.E.1.13:	Explain the basic functions and characteristics of money, and describe the composition of the money supply in the United States.
SS.912.E.1.14:	Compare credit, savings, and investment services available to the consumer from financial institutions.
SS.912.E.1.15:	Describe the risk and return profiles of various investment vehicles and the importance of diversification. **Clarifications:** Examples are savings accounts, certificates of deposit, stocks, bonds, mutual funds, Individual Retirement Accounts.
SS.912.E.1.16:	Construct a one-year budget plan for a specific career path including expenses and construction of a credit plan for purchasing a major item. **Clarifications:** Examples of a career path are university student, trade school student, food service employee, retail employee, laborer, armed forces enlisted personnel. Examples of a budget plan are housing expenses, furnishing, utilities, food costs, transportation, and personal expenses - medical, clothing, grooming, entertainment and recreation, and gifts and contributions. Examples of a credit plan are interest rates, credit scores, payment plan.
SS.912.E.2.1:	Identify and explain broad economic goals. **Clarifications:** Examples are freedom, efficiency, equity, security, growth, price stability, full employment.
SS.912.E.2.8:	Differentiate between direct and indirect taxes, and describe the progressivity of taxes (progressive, proportional, regressive). **Clarifications:** Examples are income, sales, social security.
SS.912.P.12.2:	Define processes involved in problem solving and decision making. **Clarifications:** Examples may include, but are not limited to, identification, analysis, solution generation, plan, implement, and evaluate.
SS.912.P.12.4:	Describe obstacles to problem solving. **Clarifications:** Examples may include, but are not limited to, fixation and functional fixedness.
SS.912.P.12.5:	Describe obstacles to decision making. **Clarifications:** Examples may include, but are not limited to, confirmation bias, counterproductive heuristics, and overconfidence.
HE.912.B.4.3:	Demonstrate strategies to prevent, manage, or resolve interpersonal conflicts without harming self or others. **Clarifications:** Effective verbal and nonverbal communication, compromise, and conflict-resolution.
HE.912.B.5.4:	Assess whether individual or collaborative decision making is needed to make a healthy decision. **Clarifications:** Planning a post-high school career/education, purchasing the family's groceries for the week, planning the weekly menu, planning appropriate activities for siblings, community planning, Internet safety, and purchasing insurance.
HE.912.C.2.2:	Compare how peers influence healthy and unhealthy behaviors. **Clarifications:** Binge drinking and social groups, sexual coercion [pressure, force, or manipulation] by a dating partner, students' recommendations for school vending machines, healthy lifestyle, review trends in current and emerging diseases, and use of helmets and seatbelts.
HE.912.C.2.3:	Assess how the school and community can affect personal health practice and behaviors. **Clarifications:** Healthier foods, required health education, health screenings, and enforcement of "no tolerance" policies related to all forms of violence, and AED availability and training.
MAFS.K12.MP.1.1:	**Make sense of problems and persevere in solving them.** Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete

	objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.
MAFS.K12.MP.3.1:	**Construct viable arguments and critique the reasoning of others.** Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

GENERAL NOTES

The purpose of this course is to develop career planning competencies, enabling students to make informed career choices and develop the skills needed to successfully plan and apply for college or a job.

The content should include, but not be limited to, the following:

- goal-setting and decision-making processes
- self-assessment
- sources of career information
- occupational fields and educational requirements -postsecondary education and training opportunities -writing, listening, viewing, and speaking skills for applications and interviews
- financial planning and sources of educational financial assistance
- career planning

After successfully completing this course, the student will:

1. Identify and demonstrate use of the steps of systematic goal-setting and decision-making processes.
2. Demonstrate use of techniques for self-assessment (e.g., inventories, journals, surveys, interviews) to determine personal career interests and capabilities.
3. Demonstrate use of strategies for identifying personal strengths and weaknesses and making improvements.
4. Demonstrate use of career resources to identify preferred occupational fields, career opportunities within each field, employment prospects, and education or training requirements.
5. Demonstrate appropriate writing, listening, viewing, and speaking skills needed to successfully apply for postsecondary education or work (e.g., writing a letter of application, résumé, or essay; compiling a portfolio; filling out an application; participating in an interview).
6. Understand the importance of financial planning and demonstrate knowledge of varied types and sources of financial aid to obtain assistance for postsecondary education.
7. Develop a personal education and career plan.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

VERSION REQUIREMENTS

These requirements include, but are not limited to, the benchmarks from the Next Generation Sunshine State Standards and Florida Standards that are most relevant to this course. Benchmarks correlated with a specific course requirement may also be addressed by other course requirements as appropriate. Some requirements in this course are not addressed in the Sunshine State Standards. Other subject areas and content may be used to fulfill course requirements.

QUALIFICATIONS

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

Any field when certification reflects a bachelor or higher degree.

GENERAL INFORMATION

Course Number: 1700380

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 9 to 12 and Adult Education Courses > **Subject:** Research and Critical Thinking > **SubSubject:** General >

Abbreviated Title: CAR RESA & DECI MAK

Number of Credits: Half credit (.5)

Course Length: Semester (S)

Course Type: Elective Course

Course Level: 2

Course Status: Draft - Course Pending Approval

Grade Level(s): 9,10,11,12

Name	Description
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Major Concepts/Content: Advancement Via Individual Determination (AVID) is an academic elective course that prepares students for college readiness and success, and it is scheduled during the regular school day as a year-long course. Each week, students receive instruction that utilizes a rigorous college-preparatory curriculum provided by AVID Center, tutor-facilitated study groups, motivational activities, and academic success skills. In AVID, students participate in activities that incorporate strategies focused on writing, inquiry, collaboration, organization, and reading to support their academic growth. Additionally, students engage in activities centered around exploring college and career opportunities and their own agency.

Some students will have previous experience with AVID in the middle school grades, and some students will be experiencing AVID for the first time. Either way, the 9th grade AVID elective course will service as a review of the AVID philosophy and strategies. Students will work on academic and personal goals and communication, adjusting to the high school setting. Students will increase their awareness of their personal contributions to their learning as well as their involvement in their school and community. There is an emphasis on analytical writing, focusing on personal goals and thesis writing. Students will work in collaborative settings, learning how to participate in collegial discussions and use sources to support their ideas and opinions. Students will prepare for and participate in college entrance and placement exams while refining study skills and test-taking, note-taking, and research techniques. They will take an active role in field trips and guest-speaker preparations and presentations. Their college research will include financial topics and building their knowledge of colleges and careers of interest.

AVID curriculum books used:

AVID College and Careers

AVID Critical Thinking and Engagement

AVID Reading for Disciplinary Literacy

AVID Secondary Implementation Resource

AVID Tutorial Guide

AVID Writing for Disciplinary Literacy

Preparing for College

Supplemental materials course include the following:

AVID Weekly®, *Supporting Math in the AVID Elective*, *Write Path* content-area books, focused note-taking resources, and my.avid.org Curriculum Book Webpages

STUDENT OUTCOMES

Student Agency (SA)

- Student Empowerment
- Leadership of Others

Rigorous Academic Preparedness (AP)

- Writing
- Inquiry
- Collaboration
- Organization
- Reading

Opportunity Knowledge (OK)

- Advancing College Preparedness
- Building Career Knowledge

STUDENT AGENCY (9.SA)

Student Empowerment

1. (a) Determine personal interest for extracurricular and community service activities within the school and community
   (b) Gain awareness of extracurricular and community service activities within the school and community
2. Evaluate the impact of decisions on others
3. Explore the importance of healthy, balanced lifestyles, including aspects such as good sleeping, eating, and exercise habits
4. Establish understanding of concepts and content-specific vocabulary related to personal finance

5. (a) Identify characteristics of positive, healthy relationships
   (b) Explore individual peer relationships and identify those that are positive and healthy
6. Gain awareness of motivators that positively impact performance
7. Self-monitor to diagnose areas of need (e.g., academic, personal, social-emotional)
8. (a) Gain awareness of skills that increase mental flexibility
   (b) Explore the relationship between grit and perseverance
9. (a) Identify strategies and skills that promote self-awareness
   (b) Identify individual strengths and areas of challenge related to academic skills and performance
10. Determine key points ifrom learning experiences

Leadership of Others

1. Identify traits connected to personal integrity and ethics
2. (a) Identify leadership opportunities and positions in the school and community
   (b) Determine formal and informal leadership opportunities that could be pursued
3. (a) Select tools to analyze a conflict and identify a positive solution
   (b) Classify passive, assertive, and aggressive statements

RIGOROUS ACADEMIC PREPAREDNESS (9.AP)

Writing

1. (a) Develop writing skills related to expository, timed, and descriptive modes of writing
   (b) Plan and structure writing based on the mode (descriptive, narrative, expository, argumentative)
   (c) Draft initial writing
2. Analyze a writing task by identifying key vocabulary and audience
3. Gather and analyze feedback from peers and instructors
4. (a) Edit drafts for grammar, mechanics, and spelling
   (b) Analyze the organizational structure of writing
5. Publish writing to a small group audience within the classroom, such as a formal written paper
6. (a) Take notes with an emphasis on identifying and recording the note-taking objective and/or Essential Question
   (b) Take notes with an emphasis on setting up notes, including all required components
7. Summarize by pulling together the most important information related to the objective and/or Essential Question

Inquiry

1. Create questions based on Costa's Levels of Thinking
2. Identify misunderstood concepts or problems
3. Determine the steps/process that led to a solution
4. Reflect on learning to make connections between new learning and previous learning
5. Reflect on learning strategies that were employed and whether those strategies were effective
6. (a) Identify processes that are used
   (b) Reflect on a process that was used and whether that process was effective
7. Analyze a research prompt
8. (a) Locate sources that are relevant to the topic and support the purpose of the research assignment
   (b) Distinguish between primary and secondary sources
9. Plan and structure the writing based on the research prompt
10. Integrate quotations and references to texts, using proper citations
11. Publish research to a small group audience within the classroom, such as a formal, written paper

Collaboration

1. Establish norms and expectations around shared responsibility among group members
2. Establish norms and expectations around appreciating diversity among group members
3. Develop a foundational familiarity and comfort with classmates
4. Identify respectful and disrespectful actions of self and others
5. Check group members' level of understanding
6. Utilize technology to collaborate with classmates
7. (a) Apply basic understanding of effective public speaking
   (b) Incorporate visual aids and/or technology when appropriate
8. Describe the characteristics of effective listening, such as eye contact and mirroring
9. Monitor word choice when speaking
10. Identify formal and informal language registers

Organization

1. (a) Begin implementing organizational tools (e.g., binders/eBinders, portfolios, or digital folders) that support academic success
   (b) Create an activity log or tracking system for community extracurricular activities and hours
2. (a) Explore a variety of organizational formats for calendaring/planning
   (b) Determine how to use time effectively
   (c) Assess complex assignments and break them into smaller tasks
3. Set personal, academic, and career goals
4. Monitor progress toward goals
5. Utilize visual frameworks to organize information

Reading

1. Determine the characteristics of a high-quality text in relation to the reading purpose
2. (a) Preview text features
   (b) Identify prior knowledge that may be relevant to the reading
3. Assess knowledge of academic and content-specific vocabulary words
4. (a) Mark the text to accomplish the reading purpose
   (b) Identify the key components of a text related to the reading purpose
5. Extend beyond the text by applying key learning

OPPORTUNITY KNOWLEDGE (9.OK)

Advancing College Preparedness

1. Identify personal interests and skills related to future college aspirations, such as through an interest inventory
2. (a) Know how to determine GPA
   (b) Develop familiarity with college terminology
   (c) Classify the various types of colleges
3. Understand scholarship and the role they play in college financing
4. Articulate the importance of long-term academic plans as a part of goal setting and achievement
5. (a) Identify what is meant by match schools, reach schools, and safety schools in order to determine the best academic fit during the selection process
   (b) Understand the different college entrance exams: PSAT, PreACT, SAT, ACT

Building Career Knowledge

1. Identify personal interests and skills related to future career aspirations
2. (a) Increase familiarity with career terminology
   (b) Distinguish between jobs, careers, and career fields
3. (a) Establish initial knowledge around the characteristics that contribute to academic, social, and financial fit
   (b) Explore the net cost of attending college to inform decisions and budget plans
4. Request assistance in selecting career elective courses and pathways that match interests and goals

GENERAL NOTES

Special Note: Skills acquired in this course will be implemented by the student across the curriculum. Advancement Via Individual Determination 1 (AVID 1) is a rigorous course offered by AVID Center, and content must be provided as specified by AVID Center. Students who are successful in this course will be on the appropriate pathway to success in AVID 2, 3 and 4. Teachers must receive training from AVID Center to teach this course.

Trained AVID Elective teachers may visit avid.org, and log into their MyAVID account using their AVID username and password; then follow my.avid.org/file_sharing/default.aspx?id=24544 to access the AVID Weeks at a Glance curriculum and resources for grades 6-12.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. VERSION DESCRIPTION

Major Concepts/Content: Advancement Via Individual Determination (AVID) is an academic elective course that prepares students for college readiness and success, and it is scheduled during the regular school day as a year-long course. Each week, students receive instruction that utilizes a rigorous college-preparatory curriculum provided by AVID Center, tutor-facilitated study groups, motivational activities, and academic success skills. In AVID, students participate in activities that incorporate strategies focused on writing, inquiry, collaboration, organization, and reading to support their academic growth. Additionally, students engage in activities centered around exploring college and career opportunities and their own agency.

During the 10th grade AVID elective course, students will refine the AVID strategies to meet their independent needs and learning styles. Students will continue to refine and adjust their academic learning plans and goals, increasing awareness of their actions and behaviors. As students increase their rigorous course load and school/community involvement, they will refine their time-management and study skills accordingly. Students will expand their writing portfolio to include analyzing prompts, supporting arguments and claims, character analysis, and detailed reflections. Students will also analyze various documents in order to participate in collaborative discussions and develop leadership skills in those settings. Students will expand their vocabulary use, continuing to prepare for college entrance exams. Text analysis will focus on specific strategies to understand complex texts. Lastly, students will narrow down their colleges and careers of interest based on their personal interests and goals.

STUDENT OUTCOMES

Student Agency (SA)

- Student Empowerment
- Leadership of Others

Rigorous Academic Preparedness (AP)

- Writing
- Inquiry
- Collaboration
- Organization
- Reading

Opportunity Knowledge (OK)

- Advancing College Preparedness
- Building Career Knowledge

STUDENT AGENCY (10.SA)

Student Empowerment

1. Explore and experience extracurricular and community service activities within the school and community
2. Evaluate the impact of decisions on the environment
3. (a) Identify activities that assist with self-care and healthy habits
   (b) Identify areas that need attention and develop goals to address those areas
4. Increase awareness and apply basic concepts of budgeting, spending, and making responsible financial decisions
5. Develop a support network that includes peers and adults for academic and future success

6. Explore how individual motivators and self-monitoring of motivation impact academic performance
7. Seek help related to areas of need
8. Determine personal levels of grit and perseverance in relation to growth mindset
9. Establish self-awareness strategies and skills, including SLANT (Sit with proper posture, Lean forward and listen, Ask pertinent questions, Nod your head "yes" or "no," Talk to your teachers)
10. Make connections between key learning points and new contexts

Leadership of Others

1. Identify traits connected to responsibility, integrity and ethical interactions with others
2. Pursue leadership opportunities across the school
3. (a) Identify personal conflict-management style
   (b) Transform passive and aggressive statements into constructive, assertive statements

RIGOROUS ACADEMIC PREPAREDNESS (10.AP)

Writing

1. (a) Develop writing skills related to the argumentative mode of writing
   (b) Generate multiple ideas that support, explain, or enhance the writing topic or theme
   (c) Compose first drafts using ideas and information gathered during pre-writing
2. Analyze a writing task to determine the purpose, format/style, and audience
3. Write multiple drafts with increasing depth based on feedback and observations
4. Analyze and edit sentence structure to create interest and complexity
5. Publish writing to entire class, such as an oral presentation
6. (a) Take notes with an emphasis on recording main ideas and important information
   (b) Take notes with an emphasis on condensing information by using abbreviations/symbols/paraphrasing
7. Summarize by pulling together the most important information and personal connections related to the objective and/or Essential Question

Inquiry

1. Develop inquiry skills through focused observations and analyses
2. Identify the specific point of confusion related to a misunderstood concept or problem
3. Determine whether similar problems could be solved using the same steps/process
4. Reflect on learning to make connections between new learning and previous experience
5. Reflect on learning strategies that were employed, and whether those learning strategies were effective, and how methods could be adjusted in the future
6. Reflect on a process that was used, whether that process was effective, and how methods could be adjusted in the future
7. Brainstorm ideas for research topics to address a research prompt
8. Determine the relevance, validity, and reliability of information found within sources
9. Organize information, sources, and data that support the research prompt
10. Integrate quotations to support claims, citing locations and referenced for texts
11. Publish research to entire class, such as an oral presentation

Collaboration

1. Hold self and peers accountable for following group norms about shared responsibility
2. Summarize points of agreement and disagreement from varying perspectives
3. Deepen relational capacity with classmates through effective conflict management
4. Establish norms and expectations around respectful interactions among group members
5. Ask clarifying questions to group members to facilitate understanding
6. Utilize technology to collaborate with classmates and community members
7. (a) Distinguish between effective and ineffective language during interactions
   (b) Refine usage of nonverbal communication when speaking, including body language and eye contact
8. Demonstrate active listening skills during academic conversations
9. Utilize academic vocabulary when communicating
10. Speak effectively before small groups of peers

Organization

1. (a) Refine usage of organizational tools (e.g., binders/eBinders, portfolios, or digital folders) and systems that support academic success
   (b) Maintain an activity log or tracking system for community extracurricular activities and hours
2. (a) Utilize an organizational tool to record obligations and constraints on time
   (b) Demonstrate the process of backward mapping
3. Identify the steps necessary to accomplish goals
4. Identify reasons for why progress is or isn't being made toward accomplishing goals
5. Apply visual frameworks to organize language and comprehend key concepts

Reading

1. Assess whether a text is appropriate according to the reading purpose
2. (a) Make predictions about the text using text features
   (b) Assess relevant prior knowledge and identify gaps
3. Utilize tools to deepen understanding of vocabulary
4. Mark the text to accomplish the reading purpose through the lens of a content expert
5. Extend beyond the text by evaluating and synthesizing key learning

OPPORTUNITY KNOWLEDGE (10.OK)

Advancing College Preparedness

1. Define key personal attributes for academic, social, and financial fit related to college selection
2. (a) Explore the significance of GPA at different stages of the academic journey
   (b) Explore college options and terminology
   (c) Classify the various types of colleges
3. Evaluate personal level of readiness for scholarship eligibility
4. (a) Reflect on how academic plans and course completion support progress toward desired major
   (b) Determine which courses or opportunities align with college goals and plans
   (c) Explore campus-, district-, or community-based opportunities to earn college credit in high school (dual credit, online learning, etc.)
5. (a) Explore match schools, reach schools, and safety schools in order to determine the best academic fit during the selection process
   (b) Prepare for college entrance exams

Building Career Knowledge

1. Define key personal attributes for academic, social, and financial fit related to career selection
2. Explore career fields and career pathways, including what resources and opportunities are available locally
3. Investigate best-fit career fields based on academic, social, and financial fit
4. Reflect on how academic plans and course completion support progress toward desired career field

GENERAL NOTES

Special Note: Skills acquired in this course will be implemented by the student across the curriculum. Advancement Via Individual Determination 2 (AVID 2) is a rigorous course offered by AVID Center, and content must be provided as specified by AVID Center. Students who are successful in this course will be on the appropriate pathway to success in AVID 3 and 4. Teachers must receive training from AVID Center to teach this course.

Trained AVID Elective teachers may visit avid.org, and log into their MyAVID account using their AVID username and password; then follow my.avid.org/file_sharing/default.aspx?id=24544 to access the AVID Weeks at a Glance curriculum and resources for grades 6-12.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf

VERSION REQUIREMENTS

These requirements include, but are not limited to, the Florida Standards that are most relevant to this course. Standards correlated with a specific course requirement may also be addressed by other course requirements as appropriate. Some requirements in this course are not addressed in the Florida Standards. Other subject areas and content may be used to fulfill course requirements. This course includes an agreement related to minimum standards for behavior, attendance, and participation.

QUALIFICATIONS

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

Any field when certification reflects a bachelor or higher degree.

GENERAL INFORMATION

Course Number: 1700400

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 9 to 12 and Adult Education Courses > **Subject:** Research and Critical Thinking > **SubSubject:** General >

Abbreviated Title: AVID 2

Number of Credits: One (1) credit

Course Length: Year (Y)

Course Type: Elective Course

Course Level: 2

Course Status: Course Approved

Grade Level(s): 10

Advancement Via Individual Determination 3 (#1700410) 2020 - 2022 (current)

Course Standards

Name	Description
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

VERSION DESCRIPTION

Major Concepts/Content: Advancement Via Individual Determination (AVID) is an academic elective course that prepares students for college readiness and success, and it is scheduled during the regular school day as a year-long course. Each week, students receive instruction that utilizes a rigorous college-preparatory curriculum provided by AVID Center, tutor-facilitated study groups, motivational activities, and academic success skills. In AVID, students participate in activities that incorporate strategies focused on writing, inquiry, collaboration, organization, and reading to support their academic growth. Additionally, students engage in activities centered around exploring college and career opportunities and their own agency.

The 11th grade AVID elective course is the first part in a junior/senior seminar course that focuses on writing and critical thinking expected of first- and second-year college students. In addition to the academic focus of the AVID seminar, there are college-bound activities, methodologies, and tasks that should be undertaken during the junior year to support students when they apply to four-year universities and confirm their postsecondary plans.

AVID curriculum books used:

AVID College and Careers

AVID College Readiness: Working with Sources

AVID Critical Thinking and Engagement

AVID Reading for Disciplinary Literacy

AVID Secondary Implementation Resource

AVID Tutorial Guide

AVID Writing for Disciplinary Literacy

Preparing for College

Supplemental materials course include the following:

AVID Weekly®, *Supporting Math in the AVID Elective*, *Write Path* content-area books, focused note-taking resources, and my.avid.org Curriculum Book Webpages

STUDENT OUTCOMES

Student Agency (SA)

- Student Empowerment
- Leadership of Others

Rigorous Academic Preparedness (AP)

- Writing
- Inquiry
- Collaboration
- Organization
- Reading

Opportunity Knowledge (OK)

- Advancing College Preparedness
- Building Career Knowledge

STUDENT AGENCY (11.SA)

Student Empowerment

1. Explore and pursue leadership opportunities in extracurricular and community service activities within the school and local and/or global community
2. Evaluate the impact of decisions on the world
3. Effectively manage stress and anxiety levels, including areas such as test preparation and test-taking
4. Create a systematic decision-making model for personal financial decisions and circumstances
5. (a) Maintain a strong support network for academic and future success
   (b) Identify mentors to influence, support, and guide future transitions and success
6. Apply strategies to support motivation, especially when lacking intrinsic motivation

7. (a) Strengthen ability to self-advocate related to areas of need
   (b) Leverage support network to assist with areas of need
8. (a) Reflect on current status and skills to strengthen mental flexibility now and in the future
   (b) Recognize and overcome obstacles that could hinder future success
9. Apply self-awareness strategies and skills with a variety of academic challenges
10. Employ key learning points in real-world applications

Leadership of Others

1. Assess personal traits connected to integrity and ethical leadership
2. Pursue leadership and/or mentorship opportunities in the school and community
3. Reflect on conflict situations to strengthen ability to deal with the emotions that accompany conflict in leadership roles

RIGOROUS ACADEMIC PREPAREDNESS (11.AP)

Writing

1. (a) Develop writing skills related to expository writing, incorporating MLA or APA format
   (b) Gather information related to the writing prompt to generate a bank of resources and information
   (c) Compose first drafts with a focus on establishing a clear purpose for the writing
2. Utilize inquiry strategies to develop additional questions as needed
3. Independently create and execute a plan for the revision process
4. Analyze the language of the writing and edit for voice, flow, and clarity
5. Publish writing to an audience outside of the classroom, such as an online forum
6. (a) Take notes with an emphasis on selecting the appropriate format for note-taking based on the note-taking objective
   (b) Take notes with an emphasis on using strategies to organize notes (e.g., indentation, bullets, outlines, skipping lines, color-coding)
7. Reflect on how notes help to meet the learning objective and contribute to academic and personal success

Inquiry

1. Use questioning techniques to think critically about content and concepts
2. Generate questions based on a misunderstood concept or problem
3. Determine modifications to the process that would be needed to solve similar problems
4. Reflect on learning to make connections between new learning and the broader world
5. Reflect throughout learning on progress and continually adjust actions on major tasks or assignments
6. Reflect throughout a process on progress and continually adjust actions
7. Develop research questions/claim statements that effectively address the research prompt
8. Determine the perspective, validity, and reliability of information found within sources with the use of multiple sources (such as books, articles, and websites)
9. Synthesize information, sources, and data that support the research prompt
10. Construct written claims and support them with reasoning and evidence
11. Publish research to an audience outside of the classroom

Collaboration

1. Negotiate roles within a collaborative group through the adoption of effective elements of collaboration
2. Integrate multiple perspectives into group projects
3. Deepen relational capacity through the creation of novel ideas and solutions
4. Interact with peers in complex situations (providing feedback, conflict management, academic discourse) while maintaining a focus on respect, trust, and empathy
5. Support all group members' understanding of key concepts
6. Utilize technology to connect to the global community and to explore topics from multiple perspectives
7. Adjust ineffective verbal and nonverbal communication into effective communication
8. Demonstrate active listening skills by asking clarifying questions
9. Demonstrate command of grammar when communicating
10. Speak effectively before the whole class

Organization

1. (a) Develop efficient, individualized routines related to using organizational tools and planning strategies to enhance academic performance
   (b) Reflect on the use of an activity log or tracking system for community extracurricular activities and hours
2. (a) Understand and demonstrate the concepts and practices of backward mapping
   (b) Identify upcoming events to proactively avoid time-management conflicts
3. Create short- and mid-range goals that support achievement of long-term goals
4. Modify goals and actions appropriately based on progress
5. Manage varied visual frameworks to organize language and show relationships between key concepts

Reading

1. Select texts and justify how they meet the reading purpose
2. Build background knowledge related to the text preview
3. Connect vocabulary within texts to broader concepts in the text
4. Create text-dependent questions while reading that align with the reading purpose
5. Extend beyond the text by analyzing how to best apply key learning

OPPORTUNITY KNOWLEDGE (11.OK)

Advancing College Preparedness

1. Refine key personal attributes for academic, social, and financial fit related to college selection

2. (a) Reflect on current GPA and how it relates to choosing a college and career path
   (b) Compare various college campus structures, services, and opportunities
3. Research and evaluate scholarship offerings, including FAFSA
4. (a) Produce long-term academic plans that align with goals
   (b) Plan for a successful transition to the next step in the academic journey
   (c) Gain exposure to pathways offering work opportunities (credentials, certifications, internships, etc.)
5. (a) Engage in information gathering to determine match, reach, and safety schools in order to mitigate "summer melt" and undermatching during the selection process
   (b) Determine whether additional test prep and testing is needed to reach scholarship goals

Building Career Knowledge

1. (a) Develop an authentic and personal definition of success
   (b) Refine key personal attributes for academic, social, and financial fit related to career selection
2. (a) Gain awareness of how academic performance links to career performance and success
   (b) Expand thinking about potential career fields by encouraging discovery of a variety of career fields and the opportunities therein
   (c) Develop knowledge and gain exposure to transitional phases related to work life
3. Identify best-fit career fields based on academic, social, and financial fit to develop short- and long-term career pathways
4. Engage in real-world experiences within career fields of interest, such as service-learning projects, job-shadowing opportunities, or internship possibilities

GENERAL NOTES

Special Note: Skills acquired in this course will be implemented by the student across the curriculum. Advancement Via Individual Determination 3 (AVID 3) is a rigorous course offered by AVID Center, and content must be provided as specified by AVID Center. Students who are successful in this course will be on the appropriate pathway to success in AVID 4. Teachers must receive training from AVID Center to teach this course.

Trained AVID Elective teachers may visit avid.org, and log into their MyAVID account using their AVID username and password; then follow my.avid.org/file_sharing/default.aspx?id=24544 to access the AVID Weeks at a Glance curriculum and resources for grades 6-12.

STUDENT OUTCOMES

Student Agency (SA)

- Student Empowerment
- Leadership of Others

Rigorous Academic Preparedness (AP)

- Writing
- Inquiry
- Collaboration
- Organization
- Reading

Opportunity Knowledge (OK)

- Advancing College Preparedness
- Building Career Knowledge

STUDENT AGENCY (12.SA)

Student Empowerment

1. Act as a globally and digitally aware, responsible, and contributing citizen
2. Evaluate the impact of decisions on others and the world
3. Attend to personal health, safety, and balance (including digital security)
4. Make appropriate personal financial choices
5. Generate and maintain a network of support for current and future success

6. Develop, demonstrate, and maintain motivation
7. Self-monitor and seek help when necessary
8. Demonstrate persistence, flexibility, and adaptability
9. Demonstrate self-awareness strategies and skills
10. Apply learning to demonstrate knowledge and achieve success

Leadership of Others

1. Demonstrate integrity and ethical leadership, including online
2. Pursue leadership opportunities and hold leadership positions
3. Manage and resolve conflict with others

RIGOROUS ACADEMIC PREPAREDNESS (12.AP)

Writing

1. Compose a variety of text types
2. Analyze a writing task
3. Revise writing to improve clarity and accomplish the writing purpose
4. Polish writing through editing and proofreading
5. Publish writing by distributing it to varied audiences
6. Take notes to meet the note-taking objective
7. Summarize and reflect to synthesize learning and identify next steps

Inquiry

1. Use questioning techniques to engage in discussions and think critically about content and concepts
2. Identify specific questions based on a misunderstood concept or problem
3. Upon arriving at a solution, identify generalized steps/processes that could be used to solve similar problems
4. Make connections between new learning and previous learning, experiences, self, and/or the world
5. Continuously reflect and modify actions to promote learning and academic success
6. Reflect on and modify actions related to successful utilization of a process
7. Identify topics/questions to be investigated and include source material on opposing sides of the topic
8. Evaluate the validity and reliability of both digital and print sources
9. Synthesize and organize information effectively, including usage of digital tools
10. Cite evidence and support claims
11. Present research findings, customizing the presentation for the intended audience

Collaboration

1. Share responsibility among group members
2. Work productively and effectively in diverse teams with diverse perspectives
3. Establish and maintain relational capacity with others
4. Respect individual contributions
5. Support group members in clarifying confusion and checking for understanding
6. Utilize technology as a tool for collaboration both synchronously and asynchronously
7. Clearly communicate verbally and nonverbally, including appropriate usage of technology
8. Listen effective to decipher meaning
9. Demonstrate a command of language and grammar usage when communicating
10. Adapt speech to a variety of contexts and communicative tasks

Organization

1. Routinely utilize organizational systems to access and archive materials efficiently
2. Organize and allocate time based on priorities and task completion
3. Identify and plan for the steps necessary to accomplish various types of goals
4. Monitor progress toward goals and revise appropriately, leveraging technology
5. Organize information, indicating relationships between ideas

Reading

1. Select a text according to the reading purpose
2. Preview text to connect or build background knowledge
3. Examine key academic and content-related vocabulary to deepen comprehension of texts
4. Interact with the text to process information as it is read
5. Extend beyond the text by using academic thinking skills (applying, analyzing, evaluating, and/or synthesizing key learning)

OPPORTUNITY KNOWLEDGE (12.OK)

Advancing College Preparedness

1. Develop an awareness of personal abilities, skills, and interests related to college selection
2. Expand understanding around key college information
3. understand scholarships and the role they play in financing college
4. Plan a path for education and college aligned to personal goals
5. Complete college admission requirements, including testing and application

Building Career Knowledge

1. Develop an awareness of personal abilities, skills and interests related to career and career selection
2. Expand understanding around key career-related information
3. Develop skills and attitudes related to career readiness
4. Plan a path for education and career aligned to personal goals

GENERAL NOTES

Special Note: Skills acquired in this course will be implemented by the student across the curriculum. Advancement Via Individual Determination 4 (AVID 4) is a rigorous course offered by AVID Center, and content must be provided as specified by AVID Center. Teachers must receive training from AVID Center to teach this course.

Trained AVID Elective teachers may visit avid.org, and log into their MyAVID account using their AVID username and password; then follow my.avid.org/file_sharing/default.aspx?id=24544 to access the AVID Weeks at a Glance curriculum and resources for grades 6-12.

GEAR Up 1 (#1700600) 2020 - 2022 (current)

Course Standards

The following standards are also included in this course to support students' understanding of the course objectives.

- Evaluate the impact of decisions on others.
- Establish understanding of concepts and content-specific vocabulary related to personal finance.
- Identify the characteristics of positive, healthy relationships.
- Explore individual peer relationships and identify those that are positive and healthy.
- Demonstrate an understanding of positive self-worth and recognize limits in the emotional capacity of individuals.
- Identify personal attributes as areas of strength or weakness; Differentiate between individual strengths and weaknesses as motivators and/or limiters.
- Celebrate self-advocacy as a personal strength.
- Accept weaknesses as an opportunity for change.
- Select tools to analyze a conflict and identify a positive solution.
- Classify passive, assertive, and aggressive statements.
- Establish norms and expectations around shared responsibility among group members.
- Distinguish between effective and ineffective language during interactions.
- Refine usage of non-verbal communication when speaking, including body language and eye contact.

Name	Description
MAFS.K12.MP.1.1:	**Make sense of problems and persevere in solving them.** Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.
MAFS.K12.MP.2.1:	**Reason abstractly and quantitatively**. Mathematically proficient students make sense of quantities and their relationships in problem situations. They bring two complementary abilities to bear on problems involving quantitative relationships: the ability to decontextualize—to abstract a given situation and represent it symbolically and manipulate the representing symbols as if they have a life of their own, without necessarily attending to their referents—and the ability to contextualize, to pause as needed during the manipulation process in order to probe into the referents for the symbols involved. Quantitative reasoning entails habits of creating a coherent representation of the problem at hand; considering the units involved; attending to the meaning of quantities, not just how to compute them; and knowing and flexibly using different properties of operations and objects.
MAFS.K12.MP.3.1:	**Construct viable arguments and critique the reasoning of others.** Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.
MAFS.K12.MP.4.1:	**Model with mathematics.** Mathematically proficient students can apply the mathematics they know to solve problems arising in everyday life, society, and the workplace. In early grades, this might be as simple as writing an addition equation to describe a situation. In middle grades, a student might apply proportional reasoning to plan a school event or analyze a problem in the community. By high school, a student might use geometry to solve a design problem or use a function to describe how one quantity of interest depends on another. Mathematically proficient students who can apply what they know are comfortable making assumptions and approximations to simplify a complicated situation, realizing that these may need revision later. They are able to identify important quantities in a practical situation and map their relationships using such tools as diagrams, two-way tables, graphs, flowcharts and formulas. They can analyze those relationships mathematically to draw conclusions. They routinely interpret their mathematical results in the context of the situation and reflect on whether the results make sense, possibly improving the model if it has not served its purpose.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other

	mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 – 3(x – y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.
MAFS.K12.MP.8.1:	**Look for and express regularity in repeated reasoning.** Mathematically proficient students notice if calculations are repeated, and look both for general methods and for shortcuts. Upper elementary students might notice when dividing 25 by 11 that they are repeating the same calculations over and over again, and conclude they have a repeating decimal. By paying attention to the calculation of slope as they repeatedly check whether points are on the line through (1, 2) with slope 3, middle school students might abstract the equation $(y – 2)/(x – 1) = 3$. Noticing the regularity in the way terms cancel when expanding $(x – 1)(x + 1)$, $(x – 1)(x^2 + x + 1)$, and $(x – 1)(x^3 + x^2 + x + 1)$ might lead them to the general formula for the sum of a geometric series. As they work to solve a problem, mathematically proficient students maintain oversight of the process, while attending to the details. They continually evaluate the reasonableness of their intermediate results.
LAFS.910.SL.2.4:	Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.
LAFS.910.W.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience. (Grade-specific expectations for writing types are defined in standards 1–3 above.)
LAFS.910.W.2.5:	Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.
LAFS.910.W.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibly and dynamically.
LAFS.910.W.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.910.W.3.8:	Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the usefulness of each source in answering the research question; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and following a standard format for citation.
LAFS.K.SL.1.1:	Participate in collaborative conversations with diverse partners about *kindergarten topics* and texts with peers and adults in small and larger groups. a. Follow agreed-upon rules for discussions (e.g., listening to others and taking turns speaking about the topics and texts under discussion). b. Continue a conversation through multiple exchanges.
SS.912.E.1.13:	Explain the basic functions and characteristics of money, and describe the composition of the money supply in the United States.
SS.912.P.12.2:	Define processes involved in problem solving and decision making. **Clarifications:** Examples may include, but are not limited to, identification, analysis, solution generation, plan, implement, and evaluate.
SS.912.P.12.4:	Describe obstacles to problem solving. **Clarifications:** Examples may include, but are not limited to, fixation and functional fixedness.
SS.912.P.12.5:	Describe obstacles to decision making. **Clarifications:** Examples may include, but are not limited to, confirmation bias, counterproductive heuristics, and overconfidence.
HE.912.B.4.3:	Demonstrate strategies to prevent, manage, or resolve interpersonal conflicts without harming self or others. **Clarifications:** Effective verbal and nonverbal communication, compromise, and conflict-resolution.
HE.912.B.5.4:	Assess whether individual or collaborative decision making is needed to make a healthy decision. **Clarifications:** Planning a post-high school career/education, purchasing the family's groceries for the week, planning the weekly menu, planning appropriate activities for siblings, community planning, Internet safety, and purchasing insurance.
HE.912.B.5.5:	Examine barriers that can hinder healthy decision making. **Clarifications:** Interpersonal, financial, environmental factors, and accessibility of health information.
PE.912.C.2.20:	Identify appropriate methods to resolve physical conflict.
PE.912.L.3.3:	Identify a variety of activities that promote effective stress management.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

GENERAL NOTES

Gaining Early Awareness and Readiness for Undergraduate Programs (GEAR UP) is a program designed to increase students' aspirations toward high school and beyond and ultimately increase the number of students who are prepared to enter and succeed in postsecondary education.

The purpose of this course is to prepare students for college readiness and success. Students will receive instruction, supported by state standards, in areas that include:

- **Student Agency** - activities that focus on student initiative, problem solving, decision making, leadership, and community involvement;
- **Rigorous Academic Preparedness -** academic success skills with activities that focus on writing, mathematics, collaboration, public speaking, and organization; and
- **College and Careers** - activities related to college preparation and building career knowledge.

This course will target students in the academic middle with the desire to attend college and the willingness to work hard. Through participation in this course, students will be well equipped to access and complete rigorous courses with the end goal being matriculation into and completion of postsecondary educational programs.

Eligibility for this course could be be determined by the student's grade 8 FSA scores and Lexile levels. Students scoring at FSA Levels 2/3 and with a Lexile level = 680 could be given priority for this course.

English Language Development (ELD) Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf.

QUALIFICATIONS

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

Any field when certification reflects a bachelor or higher degree.

GENERAL INFORMATION

Course Number: 1700600

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 9 to 12 and Adult Education Courses > **Subject:** Research and Critical Thinking > **SubSubject:** General >

Abbreviated Title: GEAR UP 1

Number of Credits: One (1) credit

Course Length: Year (Y)

Course Type: Elective Course

Course Level: 2

Course Status: Draft - Course Pending Approval

GEAR Up 2 (#1700610) 2020 - 2022 (current)

Course Standards

The following standards are also included in this course to support students' understanding of the course objectives.

- Evaluate the impact of decisions on others.
- Increase awareness and apply basic concepts of budgeting, spending, and making responsible financial decisions.
- Develop a support network, including peers and adults, for academic and future success.
- Demonstrate an understanding of positive self-worth and recognize limits in the emotional capacity of individuals.
- Identify personal attributes as areas of strength or weakness; Differentiate between individual strengths and weaknesses as motivators and/or limiters.
- Celebrate self-advocacy as a personal strength.
- Accept weaknesses as an opportunity for change.
- Identify personal conflict management style.
- Transform passive and aggressive statements into constructive, assertive statements.
- Hold self and peers accountable for following group norms about shared responsibility.
- Distinguish between effective and ineffective language during interactions.
- Refine usage of non-verbal communication when speaking, including body language and eye contact.

Name	Description
MAFS.K12.MP.1.1:	**Make sense of problems and persevere in solving them.** Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.
MAFS.K12.MP.2.1:	**Reason abstractly and quantitatively**. Mathematically proficient students make sense of quantities and their relationships in problem situations. They bring two complementary abilities to bear on problems involving quantitative relationships: the ability to decontextualize—to abstract a given situation and represent it symbolically and manipulate the representing symbols as if they have a life of their own, without necessarily attending to their referents—and the ability to contextualize, to pause as needed during the manipulation process in order to probe into the referents for the symbols involved. Quantitative reasoning entails habits of creating a coherent representation of the problem at hand; considering the units involved; attending to the meaning of quantities, not just how to compute them; and knowing and flexibly using different properties of operations and objects.
MAFS.K12.MP.3.1:	**Construct viable arguments and critique the reasoning of others.** Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.
MAFS.K12.MP.4.1:	**Model with mathematics.** Mathematically proficient students can apply the mathematics they know to solve problems arising in everyday life, society, and the workplace. In early grades, this might be as simple as writing an addition equation to describe a situation. In middle grades, a student might apply proportional reasoning to plan a school event or analyze a problem in the community. By high school, a student might use geometry to solve a design problem or use a function to describe how one quantity of interest depends on another. Mathematically proficient students who can apply what they know are comfortable making assumptions and approximations to simplify a complicated situation, realizing that these may need revision later. They are able to identify important quantities in a practical situation and map their relationships using such tools as diagrams, two-way tables, graphs, flowcharts and formulas. They can analyze those relationships mathematically to draw conclusions. They routinely interpret their mathematical results in the context of the situation and reflect on whether the results make sense, possibly improving the model if it has not served its purpose.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify

	relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.
MAFS.K12.MP.8.1:	**Look for and express regularity in repeated reasoning.** Mathematically proficient students notice if calculations are repeated, and look both for general methods and for shortcuts. Upper elementary students might notice when dividing 25 by 11 that they are repeating the same calculations over and over again, and conclude they have a repeating decimal. By paying attention to the calculation of slope as they repeatedly check whether points are on the line through (1, 2) with slope 3, middle school students might abstract the equation $(y - 2)/(x - 1) = 3$. Noticing the regularity in the way terms cancel when expanding $(x - 1)(x + 1)$, $(x - 1)(x^2 + x + 1)$, and $(x - 1)(x^3 + x^2 + x + 1)$ might lead them to the general formula for the sum of a geometric series. As they work to solve a problem, mathematically proficient students maintain oversight of the process, while attending to the details. They continually evaluate the reasonableness of their intermediate results.
LAFS.910.SL.2.4:	Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.
LAFS.910.W.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience. (Grade-specific expectations for writing types are defined in standards 1–3 above.)
LAFS.910.W.2.5:	Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.
LAFS.910.W.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibly and dynamically.
LAFS.910.W.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.910.W.3.8:	Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the usefulness of each source in answering the research question; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and following a standard format for citation.
LAFS.K12.SL.1.1:	Prepare for and participate effectively in a range of conversations and collaborations with diverse partners, building on others' ideas and expressing their own clearly and persuasively.
SS.912.E.1.13:	Explain the basic functions and characteristics of money, and describe the composition of the money supply in the United States.
SS.912.P.12.2:	Define processes involved in problem solving and decision making. **Clarifications:** Examples may include, but are not limited to, identification, analysis, solution generation, plan, implement, and evaluate.
SS.912.P.12.4:	Describe obstacles to problem solving. **Clarifications:** Examples may include, but are not limited to, fixation and functional fixedness.
SS.912.P.12.5:	Describe obstacles to decision making. **Clarifications:** Examples may include, but are not limited to, confirmation bias, counterproductive heuristics, and overconfidence.
HE.912.B.4.3:	Demonstrate strategies to prevent, manage, or resolve interpersonal conflicts without harming self or others. **Clarifications:** Effective verbal and nonverbal communication, compromise, and conflict-resolution.
HE.912.B.5.4:	Assess whether individual or collaborative decision making is needed to make a healthy decision. **Clarifications:** Planning a post-high school career/education, purchasing the family's groceries for the week, planning the weekly menu, planning appropriate activities for siblings, community planning, Internet safety, and purchasing insurance.
HE.912.B.5.5:	Examine barriers that can hinder healthy decision making. **Clarifications:** Interpersonal, financial, environmental factors, and accessibility of health information.
PE.912.C.2.20:	Identify appropriate methods to resolve physical conflict.
PE.912.L.3.3:	Identify a variety of activities that promote effective stress management.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

GENERAL NOTES

Gaining Early Awareness and Readiness for Undergraduate Programs (GEAR UP) is a program designed to increase students' aspirations toward high school and beyond and ultimately increase the number of students who are prepared to enter and succeed in postsecondary education.

The purpose of this course is to prepare students for college readiness and success. Students will receive instruction, supported by state standards, in areas that include:

- **Student Agency** - activities that focus on student initiative, problem solving, decision making, leadership, and community involvement;
- **Rigorous Academic Preparedness -** academic success skills with activities that focus on writing, mathematics, collaboration, public speaking, and organization; and
- **College and Careers** - activities related to college preparation and building career knowledge.

This course will target students in the academic middle with the desire to attend college and the willingness to work hard. Through participation in this course, students will be well equipped to access and complete rigorous courses with the end goal being matriculation into and completion of postsecondary educational programs.

Eligibility for this course could be be determined by the student's grade 9 FSA scores and Lexile levels. Students scoring at FSA Levels 2/3 and with a Lexile level = 680 could be given priority for this course.

English Language Development (ELD) Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf.

QUALIFICATIONS

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

Any field when certification reflects a bachelor or higher degree.

Course Standards

The following standards are also included in this course to support students' understanding of the course objectives.

- Evaluate the impact of decisions on others.
- Create a systematic decision-making model for personal financial decisions and circumstances.
- Maintain a strong support network for academic and career success.
- Identify mentors who influence, support, and guide future transitions and success.
- Demonstrate an understanding of positive self-worth and recognize limits in the emotional capacity of individuals.
- Identify personal attributes as areas of strength or weakness.
- Differentiate between individual strengths and weaknesses as motivators and/or limiters.
- Celebrate self-advocacy as a personal strength.
- Accept weaknesses as an opportunity for change.
- Reflect on conflict situations to strengthen ability to deal with the emotions that accompany conflict in leadership roles.
- Negotiate roles within a collaborative group through the adoption of effective elements of collaboration.
- Adjust ineffective verbal and non-verbal communication into effective communication.
- Speak effectively before whole class.

Name	Description
LAFS.1112.W.1.1:	Write arguments to support claims in an analysis of substantive topics or texts, using valid reasoning and relevant and sufficient evidence. a. Introduce precise, knowledgeable claim(s), establish the significance of the claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that logically sequences claim(s), counterclaims, reasons, and evidence. b. Develop claim(s) and counterclaims fairly and thoroughly, supplying the most relevant evidence for each while pointing out the strengths and limitations of both in a manner that anticipates the audience's knowledge level, concerns, values, and possible biases. c. Use words, phrases, and clauses as well as varied syntax to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims. d. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. e. Provide a concluding statement or section that follows from and supports the argument presented.
LAFS.1112.W.1.2:	Write informative/explanatory texts to examine and convey complex ideas, concepts, and information clearly and accurately through the effective selection, organization, and analysis of content. a. Introduce a topic; organize complex ideas, concepts, and information so that each new element builds on that which precedes it to create a unified whole; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension. b. Develop the topic thoroughly by selecting the most significant and relevant facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic. c. Use appropriate and varied transitions and syntax to link the major sections of the text, create cohesion, and clarify the relationships among complex ideas and concepts. d. Use precise language, domain-specific vocabulary, and techniques such as metaphor, simile, and analogy to manage the complexity of the topic. e. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. f. Provide a concluding statement or section that follows from and supports the information or explanation presented (e.g., articulating implications or the significance of the topic).
LAFS.1112.W.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience. (Grade-specific expectations for writing types are defined in standards 1–3 above.)
LAFS.1112.W.2.5:	Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.
LAFS.1112.W.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products in response to ongoing feedback, including new arguments or information.
LAFS.1112.W.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.1112.W.3.8:	Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the strengths and limitations of each source in terms of the task, purpose, and audience; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and overreliance on any one source and following a standard format for citation.
LAFS.1112.WHST.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.K12.SL.1.1:	Prepare for and participate effectively in a range of conversations and collaborations with diverse partners, building on others' ideas and expressing their own clearly and persuasively.
MAFS.K12.MP.1.1:	**Make sense of problems and persevere in solving them.** Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different

	method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.
MAFS.K12.MP.2.1:	**Reason abstractly and quantitatively**. Mathematically proficient students make sense of quantities and their relationships in problem situations. They bring two complementary abilities to bear on problems involving quantitative relationships: the ability to decontextualize—to abstract a given situation and represent it symbolically and manipulate the representing symbols as if they have a life of their own, without necessarily attending to their referents—and the ability to contextualize, to pause as needed during the manipulation process in order to probe into the referents for the symbols involved. Quantitative reasoning entails habits of creating a coherent representation of the problem at hand; considering the units involved; attending to the meaning of quantities, not just how to compute them; and knowing and flexibly using different properties of operations and objects.
MAFS.K12.MP.3.1:	**Construct viable arguments and critique the reasoning of others.** Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.
MAFS.K12.MP.4.1:	**Model with mathematics.** Mathematically proficient students can apply the mathematics they know to solve problems arising in everyday life, society, and the workplace. In early grades, this might be as simple as writing an addition equation to describe a situation. In middle grades, a student might apply proportional reasoning to plan a school event or analyze a problem in the community. By high school, a student might use geometry to solve a design problem or use a function to describe how one quantity of interest depends on another. Mathematically proficient students who can apply what they know are comfortable making assumptions and approximations to simplify a complicated situation, realizing that these may need revision later. They are able to identify important quantities in a practical situation and map their relationships using such tools as diagrams, two-way tables, graphs, flowcharts and formulas. They can analyze those relationships mathematically to draw conclusions. They routinely interpret their mathematical results in the context of the situation and reflect on whether the results make sense, possibly improving the model if it has not served its purpose.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.
MAFS.K12.MP.8.1:	**Look for and express regularity in repeated reasoning.** Mathematically proficient students notice if calculations are repeated, and look both for general methods and for shortcuts. Upper elementary students might notice when dividing 25 by 11 that they are repeating the same calculations over and over again, and conclude they have a repeating decimal. By paying attention to the calculation of slope as they repeatedly check whether points are on the line through (1, 2) with slope 3, middle school students might abstract the equation $(y - 2)/(x - 1) = 3$. Noticing the regularity in the way terms cancel when expanding $(x - 1)(x + 1)$, $(x - 1)(x^2 + x + 1)$, and $(x - 1)(x^3 + x^2 + x + 1)$ might lead them to the general formula for the sum of a geometric series. As they work to solve a problem, mathematically proficient students maintain oversight of the process, while attending to the details. They continually evaluate the reasonableness of their intermediate results.
SS.912.E.1.13:	Explain the basic functions and characteristics of money, and describe the composition of the money supply in the United States.
SS.912.P.12.2:	Define processes involved in problem solving and decision making. **Clarifications:** Examples may include, but are not limited to, identification, analysis, solution generation, plan, implement, and evaluate.
SS.912.P.12.4:	Describe obstacles to problem solving. **Clarifications:** Examples may include, but are not limited to, fixation and functional fixedness.

SS.912.P.12.5:	Describe obstacles to decision making. **Clarifications:** Examples may include, but are not limited to, confirmation bias, counterproductive heuristics, and overconfidence.
HE.912.B.4.3:	Demonstrate strategies to prevent, manage, or resolve interpersonal conflicts without harming self or others. **Clarifications:** Effective verbal and nonverbal communication, compromise, and conflict-resolution.
HE.912.B.5.4:	Assess whether individual or collaborative decision making is needed to make a healthy decision. **Clarifications:** Planning a post-high school career/education, purchasing the family's groceries for the week, planning the weekly menu, planning appropriate activities for siblings, community planning, Internet safety, and purchasing insurance.
HE.912.B.5.5:	Examine barriers that can hinder healthy decision making. **Clarifications:** Interpersonal, financial, environmental factors, and accessibility of health information.
PE.912.C.2.20:	Identify appropriate methods to resolve physical conflict.
PE.912.L.3.3:	Identify a variety of activities that promote effective stress management.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

GENERAL NOTES

Gaining Early Awareness and Readiness for Undergraduate Programs (GEAR UP) is a program designed to increase students' aspirations toward high school and beyond and ultimately increase the number of students who are prepared to enter and succeed in postsecondary education.

The purpose of this course is to prepare students for college readiness and success. Students will receive instruction, supported by state standards, in areas that include:

- **Student Agency** - activities that focus on student initiative, problem solving, decision making, leadership, and community involvement;
- **Rigorous Academic Preparedness -** academic success skills with activities that focus on writing, mathematics, collaboration, public speaking, and organization; and
- **College and Careers** - activities related to college preparation and building career knowledge.

This course will target students in the academic middle with the desire to attend college and the willingness to work hard. Through participation in this course, students will be well equipped to access and complete rigorous courses with the end goal being matriculation into and completion of postsecondary educational programs.

Eligibility for this course could be be determined by the student's grade 10 FSA scores and Lexile levels. Students scoring at FSA Levels 2/3 and with a Lexile level = 680 could be given priority for this course.

English Language Development (ELD) Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SI.pdf.

QUALIFICATIONS

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

Any field when certification reflects a bachelor or higher degree.

GEAR Up 4 (#1700630) 2020 - 2022 (current)

Course Standards

The following standards are also included in this course to support students' understanding of the course objectives.

- Evaluate the impact of decisions on others.
- Make appropriate personal financial choices.
- Generate and maintain a network of support for current and future success.
- Demonstrate an understanding of positive self-worth and recognize limits in the emotional capacity of individuals.
- Identify personal attributes as areas of strength or weakness.
- Differentiate between individual strengths and weaknesses as motivators and/or limiters.
- Celebrate self-advocacy as a personal strength.
- Accept weaknesses as an opportunity for change.
- Manage and resolve conflicts with others.
- Share responsibility among group members.
- Clearly communicate verbally and non-verbally, including appropriate usage of technology.
- Demonstrate command of language and grammar usage when communicating.
- Adapt speech to a variety of contexts and communicative tasks.

Name	Description
LAFS.1112.W.1.1:	Write arguments to support claims in an analysis of substantive topics or texts, using valid reasoning and relevant and sufficient evidence. a. Introduce precise, knowledgeable claim(s), establish the significance of the claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that logically sequences claim(s), counterclaims, reasons, and evidence. b. Develop claim(s) and counterclaims fairly and thoroughly, supplying the most relevant evidence for each while pointing out the strengths and limitations of both in a manner that anticipates the audience's knowledge level, concerns, values, and possible biases. c. Use words, phrases, and clauses as well as varied syntax to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims. d. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. e. Provide a concluding statement or section that follows from and supports the argument presented.
LAFS.1112.W.1.2:	Write informative/explanatory texts to examine and convey complex ideas, concepts, and information clearly and accurately through the effective selection, organization, and analysis of content. a. Introduce a topic; organize complex ideas, concepts, and information so that each new element builds on that which precedes it to create a unified whole; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension. b. Develop the topic thoroughly by selecting the most significant and relevant facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic. c. Use appropriate and varied transitions and syntax to link the major sections of the text, create cohesion, and clarify the relationships among complex ideas and concepts. d. Use precise language, domain-specific vocabulary, and techniques such as metaphor, simile, and analogy to manage the complexity of the topic. e. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. f. Provide a concluding statement or section that follows from and supports the information or explanation presented (e.g., articulating implications or the significance of the topic).
LAFS.1112.W.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience. (Grade-specific expectations for writing types are defined in standards 1–3 above.)
LAFS.1112.W.2.5:	Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.
LAFS.1112.W.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products in response to ongoing feedback, including new arguments or information.
LAFS.1112.W.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.1112.W.3.8:	Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the strengths and limitations of each source in terms of the task, purpose, and audience; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and overreliance on any one source and following a standard format for citation.
LAFS.1112.WHST.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.K12.SL.1.1:	Prepare for and participate effectively in a range of conversations and collaborations with diverse partners, building on others' ideas and expressing their own clearly and persuasively.
MAFS.K12.MP.1.1:	**Make sense of problems and persevere in solving them.** Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different

	method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.
MAFS.K12.MP.2.1:	**Reason abstractly and quantitatively**. Mathematically proficient students make sense of quantities and their relationships in problem situations. They bring two complementary abilities to bear on problems involving quantitative relationships: the ability to decontextualize—to abstract a given situation and represent it symbolically and manipulate the representing symbols as if they have a life of their own, without necessarily attending to their referents—and the ability to contextualize, to pause as needed during the manipulation process in order to probe into the referents for the symbols involved. Quantitative reasoning entails habits of creating a coherent representation of the problem at hand; considering the units involved; attending to the meaning of quantities, not just how to compute them; and knowing and flexibly using different properties of operations and objects.
MAFS.K12.MP.3.1:	**Construct viable arguments and critique the reasoning of others.** Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.
MAFS.K12.MP.4.1:	**Model with mathematics.** Mathematically proficient students can apply the mathematics they know to solve problems arising in everyday life, society, and the workplace. In early grades, this might be as simple as writing an addition equation to describe a situation. In middle grades, a student might apply proportional reasoning to plan a school event or analyze a problem in the community. By high school, a student might use geometry to solve a design problem or use a function to describe how one quantity of interest depends on another. Mathematically proficient students who can apply what they know are comfortable making assumptions and approximations to simplify a complicated situation, realizing that these may need revision later. They are able to identify important quantities in a practical situation and map their relationships using such tools as diagrams, two-way tables, graphs, flowcharts and formulas. They can analyze those relationships mathematically to draw conclusions. They routinely interpret their mathematical results in the context of the situation and reflect on whether the results make sense, possibly improving the model if it has not served its purpose.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.
MAFS.K12.MP.8.1:	**Look for and express regularity in repeated reasoning.** Mathematically proficient students notice if calculations are repeated, and look both for general methods and for shortcuts. Upper elementary students might notice when dividing 25 by 11 that they are repeating the same calculations over and over again, and conclude they have a repeating decimal. By paying attention to the calculation of slope as they repeatedly check whether points are on the line through (1, 2) with slope 3, middle school students might abstract the equation $(y - 2)/(x - 1) = 3$. Noticing the regularity in the way terms cancel when expanding $(x - 1)(x + 1)$, $(x - 1)(x^2 + x + 1)$, and $(x - 1)(x^3 + x^2 + x + 1)$ might lead them to the general formula for the sum of a geometric series. As they work to solve a problem, mathematically proficient students maintain oversight of the process, while attending to the details. They continually evaluate the reasonableness of their intermediate results.
SS.912.E.1.13:	Explain the basic functions and characteristics of money, and describe the composition of the money supply in the United States.
SS.912.P.12.2:	Define processes involved in problem solving and decision making. **Clarifications:** Examples may include, but are not limited to, identification, analysis, solution generation, plan, implement, and evaluate.
SS.912.P.12.4:	Describe obstacles to problem solving. **Clarifications:** Examples may include, but are not limited to, fixation and functional fixedness.

SS.912.P.12.5:	Describe obstacles to decision making. **Clarifications:** Examples may include, but are not limited to, confirmation bias, counterproductive heuristics, and overconfidence.
HE.912.B.4.3:	Demonstrate strategies to prevent, manage, or resolve interpersonal conflicts without harming self or others. **Clarifications:** Effective verbal and nonverbal communication, compromise, and conflict-resolution.
HE.912.B.5.4:	Assess whether individual or collaborative decision making is needed to make a healthy decision. **Clarifications:** Planning a post-high school career/education, purchasing the family's groceries for the week, planning the weekly menu, planning appropriate activities for siblings, community planning, Internet safety, and purchasing insurance.
HE.912.B.5.5:	Examine barriers that can hinder healthy decision making. **Clarifications:** Interpersonal, financial, environmental factors, and accessibility of health information.
PE.912.C.2.20:	Identify appropriate methods to resolve physical conflict.
PE.912.L.3.3:	Identify a variety of activities that promote effective stress management.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

Course Standards

Use grade appropriate Nature of Science benchmarks (i.e. if this course is offered to sixth grade students, then the SC.6.N benchmarks should be integrated into the sixth grade course, and SC.7.N and SC.8.N benchmarks should be omitted from the sixth grade course).

Name	Description
SC.6.L.14.1:	Describe and identify patterns in the hierarchical organization of organisms from atoms to molecules and cells to tissues to organs to organ systems to organisms.
SC.6.L.14.2:	Investigate and explain the components of the scientific theory of cells (cell theory): all organisms are composed of cells (single-celled or multi-cellular), all cells come from pre-existing cells, and cells are the basic unit of life.
SC.6.L.14.3:	Recognize and explore how cells of all organisms undergo similar processes to maintain homeostasis, including extracting energy from food, getting rid of waste, and reproducing.
SC.6.L.14.4:	Compare and contrast the structure and function of major organelles of plant and animal cells, including cell wall, cell membrane, nucleus, cytoplasm, chloroplasts, mitochondria, and vacuoles.
SC.6.L.14.5:	Identify and investigate the general functions of the major systems of the human body (digestive, respiratory, circulatory, reproductive, excretory, immune, nervous, and musculoskeletal) and describe ways these systems interact with each other to maintain homeostasis.
SC.6.L.14.6:	Compare and contrast types of infectious agents that may infect the human body, including viruses, bacteria, fungi, and parasites.
SC.6.L.15.1:	Analyze and describe how and why organisms are classified according to shared characteristics with emphasis on the Linnaean system combined with the concept of Domains.
SC.6.N.1.1:	Define a problem from the sixth grade curriculum, use appropriate reference materials to support scientific understanding, plan and carry out scientific investigation of various types, such as systematic observations or experiments, identify variables, collect and organize data, interpret data in charts, tables, and graphics, analyze information, make predictions, and defend conclusions.
SC.6.N.1.2:	Explain why scientific investigations should be replicable.
SC.6.N.1.3:	Explain the difference between an experiment and other types of scientific investigation, and explain the relative benefits and limitations of each.
SC.6.N.1.4:	Discuss, compare, and negotiate methods used, results obtained, and explanations among groups of students conducting the same investigation.
SC.6.N.1.5:	Recognize that science involves creativity, not just in designing experiments, but also in creating explanations that fit evidence.
SC.6.N.2.1:	Distinguish science from other activities involving thought.
SC.6.N.2.2:	Explain that scientific knowledge is durable because it is open to change as new evidence or interpretations are encountered.
SC.6.N.2.3:	Recognize that scientists who make contributions to scientific knowledge come from all kinds of backgrounds and possess varied talents, interests, and goals.
SC.6.N.3.1:	Recognize and explain that a scientific theory is a well-supported and widely accepted explanation of nature and is not simply a claim posed by an individual. Thus, the use of the term theory in science is very different than how it is used in everyday life.
SC.6.N.3.2:	Recognize and explain that a scientific law is a description of a specific relationship under given conditions in the natural world. Thus, scientific laws are different from societal laws.
SC.6.N.3.3:	Give several examples of scientific laws.
SC.6.N.3.4:	Identify the role of models in the context of the sixth grade science benchmarks.
SC.7.L.15.1:	Recognize that fossil evidence is consistent with the scientific theory of evolution that living things evolved from earlier species.
SC.7.L.15.2:	Explore the scientific theory of evolution by recognizing and explaining ways in which genetic variation and environmental factors contribute to evolution by natural selection and diversity of organisms.
SC.7.L.15.3:	Explore the scientific theory of evolution by relating how the inability of a species to adapt within a changing environment may contribute to the extinction of that species.
SC.7.L.16.1:	Understand and explain that every organism requires a set of instructions that specifies its traits, that this hereditary information (DNA) contains genes located in the chromosomes of each cell, and that heredity is the passage of these instructions from one generation to another.
SC.7.L.16.2:	Determine the probabilities for genotype and phenotype combinations using Punnett Squares and pedigrees.
SC.7.L.16.3:	Compare and contrast the general processes of sexual reproduction requiring meiosis and asexual reproduction requiring mitosis.
SC.7.L.16.4:	Recognize and explore the impact of biotechnology (cloning, genetic engineering, artificial selection) on the individual, society and the environment.
SC.7.L.17.1:	Explain and illustrate the roles of and relationships among producers, consumers, and decomposers in the process of energy transfer in a food web.
SC.7.L.17.2:	Compare and contrast the relationships among organisms such as mutualism, predation, parasitism, competition, and commensalism.
SC.7.L.17.3:	Describe and investigate various limiting factors in the local ecosystem and their impact on native populations, including food, shelter, water, space, disease, parasitism, predation, and nesting sites.
SC.7.N.1.1:	Define a problem from the seventh grade curriculum, use appropriate reference materials to support scientific understanding, plan and carry out scientific investigation of various types, such as systematic observations or experiments, identify variables, collect and organize data, interpret data in charts, tables, and graphics, analyze information, make predictions, and defend conclusions.
SC.7.N.1.2:	Differentiate replication (by others) from repetition (multiple trials).
SC.7.N.1.3:	Distinguish between an experiment (which must involve the identification and control of variables) and other forms of scientific investigation and explain that not all scientific knowledge is derived from experimentation.
SC.7.N.1.4:	Identify test variables (independent variables) and outcome variables (dependent variables) in an experiment.
SC.7.N.1.5:	Describe the methods used in the pursuit of a scientific explanation as seen in different fields of science such as biology, geology, and physics.
SC.7.N.1.6:	Explain that empirical evidence is the cumulative body of observations of a natural phenomenon on which scientific explanations are based.
SC.7.N.1.7:	Explain that scientific knowledge is the result of a great deal of debate and confirmation within the science community.
SC.7.N.2.1:	Identify an instance from the history of science in which scientific knowledge has changed when new evidence or new interpretations are encountered.
SC.7.N.3.1:	Recognize and explain the difference between theories and laws and give several examples of scientific theories and the evidence that supports them.
SC.7.N.3.2:	Identify the benefits and limitations of the use of scientific models.

SC.8.L.18.1:	Describe and investigate the process of photosynthesis, such as the roles of light, carbon dioxide, water and chlorophyll; production of food; release of oxygen.
SC.8.L.18.2:	Describe and investigate how cellular respiration breaks down food to provide energy and releases carbon dioxide.
SC.8.L.18.3:	Construct a scientific model of the carbon cycle to show how matter and energy are continuously transferred within and between organisms and their physical environment.
SC.8.L.18.4:	Cite evidence that living systems follow the Laws of Conservation of Mass and Energy.
SC.8.N.1.1:	Define a problem from the eighth grade curriculum using appropriate reference materials to support scientific understanding, plan and carry out scientific investigations of various types, such as systematic observations or experiments, identify variables, collect and organize data, interpret data in charts, tables, and graphics, analyze information, make predictions, and defend conclusions.
SC.8.N.1.2:	Design and conduct a study using repeated trials and replication.
SC.8.N.1.3:	Use phrases such as "results support" or "fail to support" in science, understanding that science does not offer conclusive 'proof' of a knowledge claim.
SC.8.N.1.4:	Explain how hypotheses are valuable if they lead to further investigations, even if they turn out not to be supported by the data.
SC.8.N.1.5:	Analyze the methods used to develop a scientific explanation as seen in different fields of science.
SC.8.N.1.6:	Understand that scientific investigations involve the collection of relevant empirical evidence, the use of logical reasoning, and the application of imagination in devising hypotheses, predictions, explanations and models to make sense of the collected evidence.
SC.8.N.2.1:	Distinguish between scientific and pseudoscientific ideas.
SC.8.N.2.2:	Discuss what characterizes science and its methods.
SC.8.N.3.1:	Select models useful in relating the results of their own investigations.
SC.8.N.3.2:	Explain why theories may be modified but are rarely discarded.
SC.8.N.4.1:	Explain that science is one of the processes that can be used to inform decision making at the community, state, national, and international levels.
SC.8.N.4.2:	Explain how political, social, and economic concerns can affect science, and vice versa.
LAFS.6.SL.1.2:	Interpret information presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how it contributes to a topic, text, or issue under study.
LAFS.6.SL.1.3:	Delineate a speaker's argument and specific claims, distinguishing claims that are supported by reasons and evidence from claims that are not.
LAFS.6.SL.2.4:	Present claims and findings, sequencing ideas logically and using pertinent descriptions, facts, and details to accentuate main ideas or themes; use appropriate eye contact, adequate volume, and clear pronunciation.
LAFS.6.SL.2.5:	Include multimedia components (e.g., graphics, images, music, sound) and visual displays in presentations to clarify information.
LAFS.68.RST.1.1:	Cite specific textual evidence to support analysis of science and technical texts.
LAFS.68.RST.1.2:	Determine the central ideas or conclusions of a text; provide an accurate summary of the text distinct from prior knowledge or opinions.
LAFS.68.RST.1.3:	Follow precisely a multistep procedure when carrying out experiments, taking measurements, or performing technical tasks.
LAFS.68.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.
LAFS.68.RST.2.5:	Analyze the structure an author uses to organize a text, including how the major sections contribute to the whole and to an understanding of the topic.
LAFS.68.RST.2.6:	Analyze the author's purpose in providing an explanation, describing a procedure, or discussing an experiment in a text.
LAFS.68.RST.3.7:	Integrate quantitative or technical information expressed in words in a text with a version of that information expressed visually (e.g., in a flowchart, diagram, model, graph, or table).
LAFS.68.RST.3.8:	Distinguish among facts, reasoned judgment based on research findings, and speculation in a text.
LAFS.68.RST.3.9:	Compare and contrast the information gained from experiments, simulations, video, or multimedia sources with that gained from reading a text on the same topic.
LAFS.68.WHST.1.1:	Write arguments focused on *discipline-specific content.* a. Introduce claim(s) about a topic or issue, acknowledge and distinguish the claim(s) from alternate or opposing claims, and organize the reasons and evidence logically. b. Support claim(s) with logical reasoning and relevant, accurate data and evidence that demonstrate an understanding of the topic or text, using credible sources. c. Use words, phrases, and clauses to create cohesion and clarify the relationships among claim(s), counterclaims, reasons, and evidence. d. Establish and maintain a formal style. e. Provide a concluding statement or section that follows from and supports the argument presented.
LAFS.68.WHST.1.2:	Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes. a. Introduce a topic clearly, previewing what is to follow; organize ideas, concepts, and information into broader categories as appropriate to achieving purpose; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension. b. Develop the topic with relevant, well-chosen facts, definitions, concrete details, quotations, or other information and examples. c. Use appropriate and varied transitions to create cohesion and clarify the relationships among ideas and concepts. d. Use precise language and domain-specific vocabulary to inform about or explain the topic. e. Establish and maintain a formal style and objective tone. f. Provide a concluding statement or section that follows from and supports the information or explanation presented.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.68.WHST.2.5:	With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well purpose and audience have been addressed.
LAFS.68.WHST.2.6:	Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas clearly and efficiently.
LAFS.68.WHST.3.7:	Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.
LAFS.68.WHST.3.8:	Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
LAFS.68.WHST.3.9:	Draw evidence from informational texts to support analysis reflection, and research.
LAFS.68.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
	Use variables to represent two quantities in a real-world problem that change in relationship to one another; write an equation to express one quantity, thought of as the dependent variable, in terms of the other quantity, thought of as the independent variable. Analyze the relationship

MAFS.6.EE.3.9:	between the dependent and independent variables using graphs and tables, and relate these to the equation. *For example, in a problem involving motion at constant speed, list and graph ordered pairs of distances and times, and write the equation d = 65t to represent the relationship between distance and time.*
MAFS.6.SP.2.4:	Display numerical data in plots on a number line, including dot plots, histograms, and box plots.
MAFS.6.SP.2.5:	Summarize numerical data sets in relation to their context, such as by: a. Reporting the number of observations. b. Describing the nature of the attribute under investigation, including how it was measured and its units of measurement. c. Giving quantitative measures of center (median and/or mean) and variability (interquartile range and/or mean absolute deviation), as well as describing any overall pattern and any striking deviations from the overall pattern with reference to the context in which the data were gathered. d. Relating the choice of measures of center and variability to the shape of the data distribution and the context in which the data were gathered.
MAFS.K12.MP.1.1:	**Make sense of problems and persevere in solving them.** Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches. **Standard Relation to Course: Supporting**
MAFS.K12.MP.2.1:	**Reason abstractly and quantitatively**. Mathematically proficient students make sense of quantities and their relationships in problem situations. They bring two complementary abilities to bear on problems involving quantitative relationships: the ability to decontextualize—to abstract a given situation and represent it symbolically and manipulate the representing symbols as if they have a life of their own, without necessarily attending to their referents—and the ability to contextualize, to pause as needed during the manipulation process in order to probe into the referents for the symbols involved. Quantitative reasoning entails habits of creating a coherent representation of the problem at hand; considering the units involved; attending to the meaning of quantities, not just how to compute them; and knowing and flexibly using different properties of operations and objects. **Standard Relation to Course: Supporting**
MAFS.K12.MP.3.1:	**Construct viable arguments and critique the reasoning of others.** Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments. **Standard Relation to Course: Supporting**
MAFS.K12.MP.4.1:	**Model with mathematics.** Mathematically proficient students can apply the mathematics they know to solve problems arising in everyday life, society, and the workplace. In early grades, this might be as simple as writing an addition equation to describe a situation. In middle grades, a student might apply proportional reasoning to plan a school event or analyze a problem in the community. By high school, a student might use geometry to solve a design problem or use a function to describe how one quantity of interest depends on another. Mathematically proficient students who can apply what they know are comfortable making assumptions and approximations to simplify a complicated situation, realizing that these may need revision later. They are able to identify important quantities in a practical situation and map their relationships using such tools as diagrams, two-way tables, graphs, flowcharts and formulas. They can analyze those relationships mathematically to draw conclusions. They routinely interpret their mathematical results in the context of the situation and reflect on whether the results make sense, possibly improving the model if it has not served its purpose. **Standard Relation to Course: Supporting**
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**

MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 – 3(x – y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
MAFS.K12.MP.8.1:	**Look for and express regularity in repeated reasoning.** Mathematically proficient students notice if calculations are repeated, and look both for general methods and for shortcuts. Upper elementary students might notice when dividing 25 by 11 that they are repeating the same calculations over and over again, and conclude they have a repeating decimal. By paying attention to the calculation of slope as they repeatedly check whether points are on the line through (1, 2) with slope 3, middle school students might abstract the equation $(y – 2)/(x – 1) = 3$. Noticing the regularity in the way terms cancel when expanding $(x – 1)(x + 1)$, $(x – 1)(x^2 + x + 1)$, and $(x – 1)(x^3 + x^2 + x + 1)$ might lead them to the general formula for the sum of a geometric series. As they work to solve a problem, mathematically proficient students maintain oversight of the process, while attending to the details. They continually evaluate the reasonableness of their intermediate results. **Standard Relation to Course: Supporting**
HE.6.C.1.8:	Examine the likelihood of injury or illness if engaging in unhealthy/risky behaviors. **Clarifications:** Obesity related to poor nutrition and inactivity, cancer and chronic lung disease related to tobacco use, injuries caused from failure to use seat restraint, and sexually transmitted diseases caused by sexual activity.
HE.7.C.1.3:	Analyze how environmental factors affect personal health. **Clarifications:** Food refrigeration, appropriate home heating and cooling, air/water quality, and garbage/trash collection.
HE.7.C.1.7:	Describe how heredity can affect personal health. **Clarifications:** Sickle-cell anemia, diabetes, and acne.
ELD.K12.ELL.SC.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Science.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

GENERAL NOTES

Laboratory investigations that include the use of scientific inquiry, research, measurement, problem solving, laboratory apparatus and technologies, experimental procedures, and safety procedures are an integral part of this course. The National Science Teachers Association (NSTA) recommends that at the middle school level, all students should have multiple opportunities every week to explore science laboratory investigations (labs). School laboratory investigations are defined by the National Research Council (NRC) as an experience in the laboratory, classroom, or the field that provides students with opportunities to interact directly with natural phenomena or with data collected by others using tools, materials, data collection techniques, and models (NRC, 2006, p. 3). Laboratory investigations in the middle school classroom should help all students develop a growing understanding of the complexity and ambiguity of empirical work, as well as the skills to calibrate and troubleshoot equipment used to make observations. Learners should understand measurement error; and have the skills to aggregate, interpret, and present the resulting data (NRC 2006, p. 77; NSTA, 2007).

Special Notes:

Instructional Practices
Teaching from a range of complex text is optimized when teachers in all subject areas implement the following strategies on a routine basis:

1. Ensuring wide reading from complex text that varies in length.
2. Making close reading and rereading of texts central to lessons.
3. Emphasizing text-specific complex questions, and cognitively complex tasks, reinforce focus on the text and cultivate independence.
4. Emphasizing students supporting answers based upon evidence from the text.
5. Providing extensive research and writing opportunities (claims and evidence).

Science and Engineering Practices (NRC *Framework for K-12 Science Education, 2010*)

- Asking questions (for science) and defining problems (for engineering).
- Developing and using models.
- Planning and carrying out investigations.
- Analyzing and interpreting data.
- Using mathematics, information and computer technology, and computational thinking.
- Constructing explanations (for science) and designing solutions (for engineering).
- Engaging in argument from evidence.
- Obtaining, evaluating, and communicating information.

Literacy Standards in Science
Secondary science courses include reading standards for literacy in science and technical subjects 6-12 and writing standards for literacy in history/social studies, science, and technical subjects 6-12. The courses also include speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Science. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SC.pdf

Additional Instructional Resources:

A.V.E. for Success Collection is provided by the Florida Association of School Administrators: fasa.net/4DCGI/cms/review.html?Action=CMS_Document&DocID=139. Please be aware that these resources have not been reviewed by CPALMS and there may be a charge for the use of some of them in this collection.

GENERAL INFORMATION

Course Number: 2000010

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 6 to 8 Education Courses > **Subject:** Science > **SubSubject:** Biological Sciences >

Abbreviated Title: M/J LIF SCI

Course Length: Year (Y)

Course Attributes:

- Class Size Core Required

Course Level: 2

Course Status: Draft - Course Pending Approval

Grade Level(s): 6,7,8

Educator Certifications

Science (Secondary Grades 7-12)
Middle Grades Integrated Curriculum (Middle Grades 5-9)
Middle Grades General Science (Middle Grades 5-9)
Biology (Grades 6-12)

M/J Life Science, Advanced (#2000020) 2015 - 2022 (current)

Course Standards

Use grade appropriate Nature of Science benchmarks (i.e. if this course is offered to seventh grade students, then the SC.7.N benchmarks should be integrated into the seventh grade course, and SC.6.N and SC.8.N benchmarks should be omitted from the seventh grade course).

Name	Description
SC.6.L.14.1:	Describe and identify patterns in the hierarchical organization of organisms from atoms to molecules and cells to tissues to organs to organ systems to organisms.
SC.6.L.14.2:	Investigate and explain the components of the scientific theory of cells (cell theory): all organisms are composed of cells (single-celled or multi-cellular), all cells come from pre-existing cells, and cells are the basic unit of life.
SC.6.L.14.3:	Recognize and explore how cells of all organisms undergo similar processes to maintain homeostasis, including extracting energy from food, getting rid of waste, and reproducing.
SC.6.L.14.4:	Compare and contrast the structure and function of major organelles of plant and animal cells, including cell wall, cell membrane, nucleus, cytoplasm, chloroplasts, mitochondria, and vacuoles.
SC.6.L.14.5:	Identify and investigate the general functions of the major systems of the human body (digestive, respiratory, circulatory, reproductive, excretory, immune, nervous, and musculoskeletal) and describe ways these systems interact with each other to maintain homeostasis.
SC.6.L.14.6:	Compare and contrast types of infectious agents that may infect the human body, including viruses, bacteria, fungi, and parasites.
SC.6.L.15.1:	Analyze and describe how and why organisms are classified according to shared characteristics with emphasis on the Linnaean system combined with the concept of Domains.
SC.6.N.1.1:	Define a problem from the sixth grade curriculum, use appropriate reference materials to support scientific understanding, plan and carry out scientific investigation of various types, such as systematic observations or experiments, identify variables, collect and organize data, interpret data in charts, tables, and graphics, analyze information, make predictions, and defend conclusions.
SC.6.N.1.2:	Explain why scientific investigations should be replicable.
SC.6.N.1.3:	Explain the difference between an experiment and other types of scientific investigation, and explain the relative benefits and limitations of each.
SC.6.N.1.4:	Discuss, compare, and negotiate methods used, results obtained, and explanations among groups of students conducting the same investigation.
SC.6.N.1.5:	Recognize that science involves creativity, not just in designing experiments, but also in creating explanations that fit evidence.
SC.6.N.2.1:	Distinguish science from other activities involving thought.
SC.6.N.2.2:	Explain that scientific knowledge is durable because it is open to change as new evidence or interpretations are encountered.
SC.6.N.2.3:	Recognize that scientists who make contributions to scientific knowledge come from all kinds of backgrounds and possess varied talents, interests, and goals.
SC.6.N.3.1:	Recognize and explain that a scientific theory is a well-supported and widely accepted explanation of nature and is not simply a claim posed by an individual. Thus, the use of the term theory in science is very different than how it is used in everyday life.
SC.6.N.3.2:	Recognize and explain that a scientific law is a description of a specific relationship under given conditions in the natural world. Thus, scientific laws are different from societal laws.
SC.6.N.3.3:	Give several examples of scientific laws.
SC.6.N.3.4:	Identify the role of models in the context of the sixth grade science benchmarks.
SC.7.L.15.1:	Recognize that fossil evidence is consistent with the scientific theory of evolution that living things evolved from earlier species.
SC.7.L.15.2:	Explore the scientific theory of evolution by recognizing and explaining ways in which genetic variation and environmental factors contribute to evolution by natural selection and diversity of organisms.
SC.7.L.15.3:	Explore the scientific theory of evolution by relating how the inability of a species to adapt within a changing environment may contribute to the extinction of that species.
SC.7.L.16.1:	Understand and explain that every organism requires a set of instructions that specifies its traits, that this hereditary information (DNA) contains genes located in the chromosomes of each cell, and that heredity is the passage of these instructions from one generation to another.
SC.7.L.16.2:	Determine the probabilities for genotype and phenotype combinations using Punnett Squares and pedigrees.
SC.7.L.16.3:	Compare and contrast the general processes of sexual reproduction requiring meiosis and asexual reproduction requiring mitosis.
SC.7.L.16.4:	Recognize and explore the impact of biotechnology (cloning, genetic engineering, artificial selection) on the individual, society and the environment.
SC.7.L.17.1:	Explain and illustrate the roles of and relationships among producers, consumers, and decomposers in the process of energy transfer in a food web.
SC.7.L.17.2:	Compare and contrast the relationships among organisms such as mutualism, predation, parasitism, competition, and commensalism.
SC.7.L.17.3:	Describe and investigate various limiting factors in the local ecosystem and their impact on native populations, including food, shelter, water, space, disease, parasitism, predation, and nesting sites.
SC.7.N.1.1:	Define a problem from the seventh grade curriculum, use appropriate reference materials to support scientific understanding, plan and carry out scientific investigation of various types, such as systematic observations or experiments, identify variables, collect and organize data, interpret data in charts, tables, and graphics, analyze information, make predictions, and defend conclusions.
SC.7.N.1.2:	Differentiate replication (by others) from repetition (multiple trials).
SC.7.N.1.3:	Distinguish between an experiment (which must involve the identification and control of variables) and other forms of scientific investigation and explain that not all scientific knowledge is derived from experimentation.
SC.7.N.1.4:	Identify test variables (independent variables) and outcome variables (dependent variables) in an experiment.
SC.7.N.1.5:	Describe the methods used in the pursuit of a scientific explanation as seen in different fields of science such as biology, geology, and physics.
SC.7.N.1.6:	Explain that empirical evidence is the cumulative body of observations of a natural phenomenon on which scientific explanations are based.
SC.7.N.1.7:	Explain that scientific knowledge is the result of a great deal of debate and confirmation within the science community.
SC.7.N.2.1:	Identify an instance from the history of science in which scientific knowledge has changed when new evidence or new interpretations are encountered.
SC.7.N.3.1:	Recognize and explain the difference between theories and laws and give several examples of scientific theories and the evidence that supports them.
SC.7.N.3.2:	Identify the benefits and limitations of the use of scientific models.

SC.8.L.18.1:	Describe and investigate the process of photosynthesis, such as the roles of light, carbon dioxide, water and chlorophyll; production of food; release of oxygen.
SC.8.L.18.2:	Describe and investigate how cellular respiration breaks down food to provide energy and releases carbon dioxide.
SC.8.L.18.3:	Construct a scientific model of the carbon cycle to show how matter and energy are continuously transferred within and between organisms and their physical environment.
SC.8.L.18.4:	Cite evidence that living systems follow the Laws of Conservation of Mass and Energy.
SC.8.N.1.1:	Define a problem from the eighth grade curriculum using appropriate reference materials to support scientific understanding, plan and carry out scientific investigations of various types, such as systematic observations or experiments, identify variables, collect and organize data, interpret data in charts, tables, and graphics, analyze information, make predictions, and defend conclusions.
SC.8.N.1.2:	Design and conduct a study using repeated trials and replication.
SC.8.N.1.3:	Use phrases such as "results support" or "fail to support" in science, understanding that science does not offer conclusive 'proof' of a knowledge claim.
SC.8.N.1.4:	Explain how hypotheses are valuable if they lead to further investigations, even if they turn out not to be supported by the data.
SC.8.N.1.5:	Analyze the methods used to develop a scientific explanation as seen in different fields of science.
SC.8.N.1.6:	Understand that scientific investigations involve the collection of relevant empirical evidence, the use of logical reasoning, and the application of imagination in devising hypotheses, predictions, explanations and models to make sense of the collected evidence.
SC.8.N.2.1:	Distinguish between scientific and pseudoscientific ideas.
SC.8.N.2.2:	Discuss what characterizes science and its methods.
SC.8.N.3.1:	Select models useful in relating the results of their own investigations.
SC.8.N.3.2:	Explain why theories may be modified but are rarely discarded.
SC.8.N.4.1:	Explain that science is one of the processes that can be used to inform decision making at the community, state, national, and international levels.
SC.8.N.4.2:	Explain how political, social, and economic concerns can affect science, and vice versa.
SC.912.L.14.2:	Relate structure to function for the components of plant and animal cells. Explain the role of cell membranes as a highly selective barrier (passive and active transport).
SC.912.L.14.3:	Compare and contrast the general structures of plant and animal cells. Compare and contrast the general structures of prokaryotic and eukaryotic cells.
SC.912.L.15.6:	Discuss distinguishing characteristics of the domains and kingdoms of living organisms.
SC.912.L.15.13:	Describe the conditions required for natural selection, including: overproduction of offspring, inherited variation, and the struggle to survive, which result in differential reproductive success.
SC.912.L.16.2:	Discuss observed inheritance patterns caused by various modes of inheritance, including dominant, recessive, codominant, sex-linked, polygenic, and multiple alleles.
SC.912.L.16.14:	Describe the cell cycle, including the process of mitosis. Explain the role of mitosis in the formation of new cells and its importance in maintaining chromosome number during asexual reproduction.
SC.912.L.16.16:	Describe the process of meiosis, including independent assortment and crossing over. Explain how reduction division results in the formation of haploid gametes or spores.
SC.912.L.17.6:	Compare and contrast the relationships among organisms, including predation, parasitism, competition, commensalism, and mutualism.
SC.912.L.17.9:	Use a food web to identify and distinguish producers, consumers, and decomposers. Explain the pathway of energy transfer through trophic levels and the reduction of available energy at successive trophic levels.
SC.912.L.18.7:	Identify the reactants, products, and basic functions of photosynthesis.
SC.912.L.18.8:	Identify the reactants, products, and basic functions of aerobic and anaerobic cellular respiration.
SC.912.L.18.9:	Explain the interrelated nature of photosynthesis and cellular respiration.
LAFS.68.RST.1.1:	Cite specific textual evidence to support analysis of science and technical texts.
LAFS.68.RST.1.2:	Determine the central ideas or conclusions of a text; provide an accurate summary of the text distinct from prior knowledge or opinions.
LAFS.68.RST.1.3:	Follow precisely a multistep procedure when carrying out experiments, taking measurements, or performing technical tasks.
LAFS.68.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.
LAFS.68.RST.2.5:	Analyze the structure an author uses to organize a text, including how the major sections contribute to the whole and to an understanding of the topic.
LAFS.68.RST.2.6:	Analyze the author's purpose in providing an explanation, describing a procedure, or discussing an experiment in a text.
LAFS.68.RST.3.7:	Integrate quantitative or technical information expressed in words in a text with a version of that information expressed visually (e.g., in a flowchart, diagram, model, graph, or table).
LAFS.68.RST.3.8:	Distinguish among facts, reasoned judgment based on research findings, and speculation in a text.
LAFS.68.RST.3.9:	Compare and contrast the information gained from experiments, simulations, video, or multimedia sources with that gained from reading a text on the same topic.
LAFS.68.WHST.1.1:	Write arguments focused on *discipline-specific content.* a. Introduce claim(s) about a topic or issue, acknowledge and distinguish the claim(s) from alternate or opposing claims, and organize the reasons and evidence logically. b. Support claim(s) with logical reasoning and relevant, accurate data and evidence that demonstrate an understanding of the topic or text, using credible sources. c. Use words, phrases, and clauses to create cohesion and clarify the relationships among claim(s), counterclaims, reasons, and evidence. d. Establish and maintain a formal style. e. Provide a concluding statement or section that follows from and supports the argument presented.
LAFS.68.WHST.1.2:	Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes. a. Introduce a topic clearly, previewing what is to follow; organize ideas, concepts, and information into broader categories as appropriate to achieving purpose; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension. b. Develop the topic with relevant, well-chosen facts, definitions, concrete details, quotations, or other information and examples. c. Use appropriate and varied transitions to create cohesion and clarify the relationships among ideas and concepts. d. Use precise language and domain-specific vocabulary to inform about or explain the topic. e. Establish and maintain a formal style and objective tone. f. Provide a concluding statement or section that follows from and supports the information or explanation presented.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.

LAFS.68.WHST.2.5:	With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well purpose and audience have been addressed.
LAFS.68.WHST.2.6:	Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas clearly and efficiently.
LAFS.68.WHST.3.7:	Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.
LAFS.68.WHST.3.8:	Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
LAFS.68.WHST.3.9:	Draw evidence from informational texts to support analysis reflection, and research.
LAFS.68.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
LAFS.7.SL.1.2:	Analyze the main ideas and supporting details presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how the ideas clarify a topic, text, or issue under study.
LAFS.7.SL.1.3:	Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and the relevance and sufficiency of the evidence.
LAFS.7.SL.2.4:	Present claims and findings, emphasizing salient points in a focused, coherent manner with pertinent descriptions, facts, details, and examples; use appropriate eye contact, adequate volume, and clear pronunciation.
LAFS.7.SL.2.5:	Include multimedia components and visual displays in presentations to clarify claims and findings and emphasize salient points.
MAFS.6.EE.3.9:	Use variables to represent two quantities in a real-world problem that change in relationship to one another; write an equation to express one quantity, thought of as the dependent variable, in terms of the other quantity, thought of as the independent variable. Analyze the relationship between the dependent and independent variables using graphs and tables, and relate these to the equation. *For example, in a problem involving motion at constant speed, list and graph ordered pairs of distances and times, and write the equation d = 65t to represent the relationship between distance and time.*
MAFS.6.SP.2.4:	Display numerical data in plots on a number line, including dot plots, histograms, and box plots.
MAFS.6.SP.2.5:	Summarize numerical data sets in relation to their context, such as by: a. Reporting the number of observations. b. Describing the nature of the attribute under investigation, including how it was measured and its units of measurement. c. Giving quantitative measures of center (median and/or mean) and variability (interquartile range and/or mean absolute deviation), as well as describing any overall pattern and any striking deviations from the overall pattern with reference to the context in which the data were gathered. d. Relating the choice of measures of center and variability to the shape of the data distribution and the context in which the data were gathered.
MAFS.7.SP.2.4:	Use measures of center and measures of variability for numerical data from random samples to draw informal comparative inferences about two populations. *For example, decide whether the words in a chapter of a seventh-grade science book are generally longer than the words in a chapter of a fourth-grade science book.*
MAFS.7.SP.3.5:	Understand that the probability of a chance event is a number between 0 and 1 that expresses the likelihood of the event occurring. Larger numbers indicate greater likelihood. A probability near 0 indicates an unlikely event, a probability around 1/2 indicates an event that is neither unlikely nor likely, and a probability near 1 indicates a likely event.
MAFS.K12.MP.1.1:	**Make sense of problems and persevere in solving them.** Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches. **Standard Relation to Course: Supporting**
MAFS.K12.MP.2.1:	**Reason abstractly and quantitatively**. Mathematically proficient students make sense of quantities and their relationships in problem situations. They bring two complementary abilities to bear on problems involving quantitative relationships: the ability to decontextualize—to abstract a given situation and represent it symbolically and manipulate the representing symbols as if they have a life of their own, without necessarily attending to their referents—and the ability to contextualize, to pause as needed during the manipulation process in order to probe into the referents for the symbols involved. Quantitative reasoning entails habits of creating a coherent representation of the problem at hand; considering the units involved; attending to the meaning of quantities, not just how to compute them; and knowing and flexibly using different properties of operations and objects. **Standard Relation to Course: Supporting**
MAFS.K12.MP.3.1:	**Construct viable arguments and critique the reasoning of others.** Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments. **Standard Relation to Course: Supporting**
	Model with mathematics. Mathematically proficient students can apply the mathematics they know to solve problems arising in everyday life, society, and the workplace. In early grades, this might be as simple as writing an addition equation to describe a situation. In middle grades, a student might apply proportional reasoning to plan a school event or analyze a problem in the community. By high school, a student might use geometry to solve a design problem or

MAFS.K12.MP.4.1:	use a function to describe how one quantity of interest depends on another. Mathematically proficient students who can apply what they know are comfortable making assumptions and approximations to simplify a complicated situation, realizing that these may need revision later. They are able to identify important quantities in a practical situation and map their relationships using such tools as diagrams, two-way tables, graphs, flowcharts and formulas. They can analyze those relationships mathematically to draw conclusions. They routinely interpret their mathematical results in the context of the situation and reflect on whether the results make sense, possibly improving the model if it has not served its purpose. **Standard Relation to Course: Supporting**
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
MAFS.K12.MP.8.1:	**Look for and express regularity in repeated reasoning.** Mathematically proficient students notice if calculations are repeated, and look both for general methods and for shortcuts. Upper elementary students might notice when dividing 25 by 11 that they are repeating the same calculations over and over again, and conclude they have a repeating decimal. By paying attention to the calculation of slope as they repeatedly check whether points are on the line through (1, 2) with slope 3, middle school students might abstract the equation $(y - 2)/(x - 1) = 3$. Noticing the regularity in the way terms cancel when expanding $(x - 1)(x + 1)$, $(x - 1)(x^2 + x + 1)$, and $(x - 1)(x^3 + x^2 + x + 1)$ might lead them to the general formula for the sum of a geometric series. As they work to solve a problem, mathematically proficient students maintain oversight of the process, while attending to the details. They continually evaluate the reasonableness of their intermediate results. **Standard Relation to Course: Supporting**
HE.6.C.1.8:	Examine the likelihood of injury or illness if engaging in unhealthy/risky behaviors. **Clarifications:** Obesity related to poor nutrition and inactivity, cancer and chronic lung disease related to tobacco use, injuries caused from failure to use seat restraint, and sexually transmitted diseases caused by sexual activity.
HE.7.C.1.3:	Analyze how environmental factors affect personal health. **Clarifications:** Food refrigeration, appropriate home heating and cooling, air/water quality, and garbage/trash collection.
HE.7.C.1.7:	Describe how heredity can affect personal health. **Clarifications:** Sickle-cell anemia, diabetes, and acne.
ELD.K12.ELL.SC.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Science.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

GENERAL NOTES

Laboratory investigations that include the use of scientific inquiry, research, measurement, problem solving, laboratory apparatus and technologies, experimental procedures, and safety procedures are an integral part of this course. The National Science Teachers Association (NSTA) recommends that at the middle school level, all students should have multiple opportunities every week to explore science laboratory investigations (labs). School laboratory investigations are defined by the National Research Council (NRC) as an experience in the laboratory, classroom, or the field that provides students with opportunities to interact directly with natural phenomena or with data collected by others using tools, materials, data collection techniques, and models (NRC, 2006, p. 3). Laboratory investigations in the middle school classroom should help all students develop a growing understanding of the complexity and ambiguity of empirical work, as well as the skills to calibrate and troubleshoot equipment used to make observations. Learners should understand measurement error; and have the skills to aggregate, interpret, and present the resulting data (NRC 2006, p. 77; NSTA, 2007).

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Special Notes:

Instructional Practices
Teaching from a range of complex text is optimized when teachers in all subject areas implement the following strategies on a routine basis:

1. Ensuring wide reading from complex text that varies in length.
2. Making close reading and rereading of texts central to lessons.
3. Emphasizing text-specific complex questions, and cognitively complex tasks, reinforce focus on the text and cultivate independence.
4. Emphasizing students supporting answers based upon evidence from the text.
5. Providing extensive research and writing opportunities (claims and evidence).

Science and Engineering Practices (NRC *Framework for K-12 Science Education, 2010*)

- Asking questions (for science) and defining problems (for engineering).
- Developing and using models.
- Planning and carrying out investigations.
- Analyzing and interpreting data.
- Using mathematics, information and computer technology, and computational thinking.
- Constructing explanations (for science) and designing solutions (for engineering).
- Engaging in argument from evidence.
- Obtaining, evaluating, and communicating information.

Literacy Standards in Science
Secondary science courses include reading standards for literacy in science and technical subjects 6-12 and writing standards for literacy in history/social studies, science, and technical subjects 6-12. The courses also include speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Science. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SC.pdf

Additional Instructional Resources:
A.V.E. for Success Collection is provided by the Florida Association of School Administrators: fasa.net/4DCGI/cms/review.html?Action=CMS_Document&DocID=139. Please be aware that these resources have not been reviewed by CPALMS and there may be a charge for the use of some of them in this collection.

GENERAL INFORMATION

Course Number: 2000020

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 6 to 8 Education Courses > **Subject:** Science > **SubSubject:** Biological Sciences >
Abbreviated Title: M/J LIF SCI ADV
Course Length: Year (Y)
Course Attributes:
- Class Size Core Required

Course Level: 3

Course Status: Draft - Course Pending Approval
Grade Level(s): 6,7,8

Educator Certifications

Science (Secondary Grades 7-12)
Middle Grades Integrated Curriculum (Middle Grades 5-9)
Middle Grades General Science (Middle Grades 5-9)
Biology (Grades 6-12)

M/J STEM Life Science (#2000025) 2015 - 2022 (current)

Course Standards

Name	Description
SC.6.N.1.2:	Explain why scientific investigations should be replicable.
SC.6.N.1.3:	Explain the difference between an experiment and other types of scientific investigation, and explain the relative benefits and limitations of each.
SC.6.N.1.4:	Discuss, compare, and negotiate methods used, results obtained, and explanations among groups of students conducting the same investigation.
SC.6.N.1.5:	Recognize that science involves creativity, not just in designing experiments, but also in creating explanations that fit evidence.
SC.6.N.2.1:	Distinguish science from other activities involving thought.
SC.6.N.2.2:	Explain that scientific knowledge is durable because it is open to change as new evidence or interpretations are encountered.
SC.6.N.2.3:	Recognize that scientists who make contributions to scientific knowledge come from all kinds of backgrounds and possess varied talents, interests, and goals.
SC.6.N.3.1:	Recognize and explain that a scientific theory is a well-supported and widely accepted explanation of nature and is not simply a claim posed by an individual. Thus, the use of the term theory in science is very different than how it is used in everyday life.
SC.6.N.3.2:	Recognize and explain that a scientific law is a description of a specific relationship under given conditions in the natural world. Thus, scientific laws are different from societal laws.
SC.6.N.3.3:	Give several examples of scientific laws.
SC.6.N.3.4:	Identify the role of models in the context of the sixth grade science benchmarks.
SC.7.L.15.1:	Recognize that fossil evidence is consistent with the scientific theory of evolution that living things evolved from earlier species.
SC.7.L.15.2:	Explore the scientific theory of evolution by recognizing and explaining ways in which genetic variation and environmental factors contribute to evolution by natural selection and diversity of organisms.
SC.7.L.15.3:	Explore the scientific theory of evolution by relating how the inability of a species to adapt within a changing environment may contribute to the extinction of that species.
SC.7.L.16.1:	Understand and explain that every organism requires a set of instructions that specifies its traits, that this hereditary information (DNA) contains genes located in the chromosomes of each cell, and that heredity is the passage of these instructions from one generation to another.
SC.7.N.1.2:	Differentiate replication (by others) from repetition (multiple trials).
SC.7.N.1.3:	Distinguish between an experiment (which must involve the identification and control of variables) and other forms of scientific investigation and explain that not all scientific knowledge is derived from experimentation.
SC.7.N.1.4:	Identify test variables (independent variables) and outcome variables (dependent variables) in an experiment.
SC.7.N.1.5:	Describe the methods used in the pursuit of a scientific explanation as seen in different fields of science such as biology, geology, and physics.
SC.7.N.1.6:	Explain that empirical evidence is the cumulative body of observations of a natural phenomenon on which scientific explanations are based.
SC.7.N.1.7:	Explain that scientific knowledge is the result of a great deal of debate and confirmation within the science community.
SC.7.N.2.1:	Identify an instance from the history of science in which scientific knowledge has changed when new evidence or new interpretations are encountered.
SC.7.N.3.1:	Recognize and explain the difference between theories and laws and give several examples of scientific theories and the evidence that supports them.
SC.7.N.3.2:	Identify the benefits and limitations of the use of scientific models.
SC.8.L.18.2:	Describe and investigate how cellular respiration breaks down food to provide energy and releases carbon dioxide.
SC.8.L.18.3:	Construct a scientific model of the carbon cycle to show how matter and energy are continuously transferred within and between organisms and their physical environment.
SC.8.L.18.4:	Cite evidence that living systems follow the Laws of Conservation of Mass and Energy.
SC.8.N.1.2:	Design and conduct a study using repeated trials and replication.
SC.8.N.1.3:	Use phrases such as "results support" or "fail to support" in science, understanding that science does not offer conclusive 'proof' of a knowledge claim.
SC.8.N.1.4:	Explain how hypotheses are valuable if they lead to further investigations, even if they turn out not to be supported by the data.
SC.8.N.1.5:	Analyze the methods used to develop a scientific explanation as seen in different fields of science.
SC.8.N.1.6:	Understand that scientific investigations involve the collection of relevant empirical evidence, the use of logical reasoning, and the application of imagination in devising hypotheses, predictions, explanations and models to make sense of the collected evidence.
SC.8.N.2.1:	Distinguish between scientific and pseudoscientific ideas.
SC.8.N.2.2:	Discuss what characterizes science and its methods.
SC.8.N.3.1:	Select models useful in relating the results of their own investigations.
SC.8.N.3.2:	Explain why theories may be modified but are rarely discarded.
SC.8.N.4.1:	Explain that science is one of the processes that can be used to inform decision making at the community, state, national, and international levels.
MAFS.6.SP.1.1:	Recognize a statistical question as one that anticipates variability in the data related to the question and accounts for it in the answers. *For example, "How old am I?" is not a statistical question, but "How old are the students in my school?" is a statistical question because one anticipates variability in students' ages.*
MAFS.6.SP.1.2:	Understand that a set of data collected to answer a statistical question has a distribution which can be described by its center, spread, and overall shape.
MAFS.6.SP.1.3:	Recognize that a measure of center for a numerical data set summarizes all of its values with a single number, while a measure of variation describes how its values vary with a single number.
MAFS.6.SP.2.4:	Display numerical data in plots on a number line, including dot plots, histograms, and box plots.
MAFS.6.SP.2.5:	Summarize numerical data sets in relation to their context, such as by: a. Reporting the number of observations. b. Describing the nature of the attribute under investigation, including how it was measured and its units of measurement. c. Giving quantitative measures of center (median and/or mean) and variability (interquartile range and/or mean absolute deviation), as well as describing any overall pattern and any striking deviations from the overall pattern with reference to the context in which the data were gathered. d. Relating the choice of measures of center and variability to the shape of the data distribution and the context in which the data were gathered.

MAFS.8.SP.1.2:	Know that straight lines are widely used to model relationships between two quantitative variables. For scatter plots that suggest a linear association, informally fit a straight line, and informally assess the model fit by judging the closeness of the data points to the line.
MAFS.K12.MP.1.1:	**Make sense of problems and persevere in solving them.** Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.
MAFS.K12.MP.2.1:	**Reason abstractly and quantitatively**. Mathematically proficient students make sense of quantities and their relationships in problem situations. They bring two complementary abilities to bear on problems involving quantitative relationships: the ability to decontextualize—to abstract a given situation and represent it symbolically and manipulate the representing symbols as if they have a life of their own, without necessarily attending to their referents—and the ability to contextualize, to pause as needed during the manipulation process in order to probe into the referents for the symbols involved. Quantitative reasoning entails habits of creating a coherent representation of the problem at hand; considering the units involved; attending to the meaning of quantities, not just how to compute them; and knowing and flexibly using different properties of operations and objects.
MAFS.K12.MP.3.1:	**Construct viable arguments and critique the reasoning of others.** Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.
MAFS.K12.MP.4.1:	**Model with mathematics.** Mathematically proficient students can apply the mathematics they know to solve problems arising in everyday life, society, and the workplace. In early grades, this might be as simple as writing an addition equation to describe a situation. In middle grades, a student might apply proportional reasoning to plan a school event or analyze a problem in the community. By high school, a student might use geometry to solve a design problem or use a function to describe how one quantity of interest depends on another. Mathematically proficient students who can apply what they know are comfortable making assumptions and approximations to simplify a complicated situation, realizing that these may need revision later. They are able to identify important quantities in a practical situation and map their relationships using such tools as diagrams, two-way tables, graphs, flowcharts and formulas. They can analyze those relationships mathematically to draw conclusions. They routinely interpret their mathematical results in the context of the situation and reflect on whether the results make sense, possibly improving the model if it has not served its purpose.
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 – 3(x – y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.
MAFS.K12.MP.8.1:	**Look for and express regularity in repeated reasoning.** Mathematically proficient students notice if calculations are repeated, and look both for general methods and for shortcuts. Upper elementary students might notice when dividing 25 by 11 that they are repeating the same calculations over and over again, and conclude they have a repeating decimal. By paying attention to the calculation of slope as they repeatedly check whether points are on the line through (1, 2) with slope 3, middle school students might abstract the equation $(y – 2)/(x – 1) = 3$. Noticing the regularity in the way terms cancel when expanding $(x – 1)(x$

	+ 1), $(x - 1)(x^2 + x + 1)$, and $(x - 1)(x^3 + x^2 + x + 1)$ might lead them to the general formula for the sum of a geometric series. As they work to solve a problem, mathematically proficient students maintain oversight of the process, while attending to the details. They continually evaluate the reasonableness of their intermediate results.
LAFS.68.WHST.1.1:	Write arguments focused on *discipline-specific content.* a. Introduce claim(s) about a topic or issue, acknowledge and distinguish the claim(s) from alternate or opposing claims, and organize the reasons and evidence logically. b. Support claim(s) with logical reasoning and relevant, accurate data and evidence that demonstrate an understanding of the topic or text, using credible sources. c. Use words, phrases, and clauses to create cohesion and clarify the relationships among claim(s), counterclaims, reasons, and evidence. d. Establish and maintain a formal style. e. Provide a concluding statement or section that follows from and supports the argument presented.
LAFS.68.WHST.1.2:	Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes. a. Introduce a topic clearly, previewing what is to follow; organize ideas, concepts, and information into broader categories as appropriate to achieving purpose; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension. b. Develop the topic with relevant, well-chosen facts, definitions, concrete details, quotations, or other information and examples. c. Use appropriate and varied transitions to create cohesion and clarify the relationships among ideas and concepts. d. Use precise language and domain-specific vocabulary to inform about or explain the topic. e. Establish and maintain a formal style and objective tone. f. Provide a concluding statement or section that follows from and supports the information or explanation presented.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.68.WHST.2.5:	With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well purpose and audience have been addressed.
LAFS.68.WHST.2.6:	Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas clearly and efficiently.
LAFS.68.WHST.3.7:	Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.
LAFS.68.WHST.3.8:	Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
LAFS.68.WHST.3.9:	Draw evidence from informational texts to support analysis reflection, and research.
LAFS.68.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
HE.6.C.1.8:	Examine the likelihood of injury or illness if engaging in unhealthy/risky behaviors. **Clarifications:** Obesity related to poor nutrition and inactivity, cancer and chronic lung disease related to tobacco use, injuries caused from failure to use seat restraint, and sexually transmitted diseases caused by sexual activity.
HE.7.C.1.3:	Analyze how environmental factors affect personal health. **Clarifications:** Food refrigeration, appropriate home heating and cooling, air/water quality, and garbage/trash collection.
HE.7.C.1.7:	Describe how heredity can affect personal health. **Clarifications:** Sickle-cell anemia, diabetes, and acne.
ELD.K12.ELL.SC.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Science.

General Course Information and Notes

GENERAL NOTES

If this course is to be used in a STEM sequence in place of either the comprehensive or subject specific course sequences, teachers should refer to the test item specifications for the 8th grade SSA for information on tested standards which can be found at: fldoe.org/core/fileparse.php/5663/urlt/swsatisG8.pdf.

This course is an integrated Science, Technology, Engineering and Mathematics (STEM) course for middle school students. M/J STEM Life Science includes an integration of standards from science, mathematics, and english language arts (ELA) through the application to STEM problem solving using life science knowledge and science and engineering practices. Life science through applications such as biotechnology and biomedical engineering, are emphasized in this course. Laboratory investigations that include the use of scientific inquiry, research, measurement, problem solving, laboratory apparatus and technologies, experimental procedures, and safety procedures are an integral part of this course. The National Science Teachers Association (NSTA) recommends that at the middle school level, all students should have multiple opportunities every week to explore science laboratory investigations (labs). School laboratory investigations are defined by the National Research Council (NRC) as an experience in the laboratory, classroom, or the field that provides students with opportunities to interact directly with natural phenomena or with data collected by others using tools, materials, data collection techniques, and models (NRC, 2006, p. 3). Laboratory investigations in the middle school classroom should help all students develop a growing understanding of the complexity and ambiguity of empirical work, as well as the skills to calibrate and troubleshoot equipment used to make observations. Learners should understand measurement error; and have the skills to aggregate, interpret, and present the resulting data (NRC 2006, p. 77; NSTA, 2007).

Special Notes:

Instructional Practices
Teaching from a range of complex text is optimized when teachers in all subject areas implement the following strategies on a routine basis:

1. Ensuring wide reading from complex text that varies in length.
2. Making close reading and rereading of texts central to lessons.
3. Emphasizing text-specific complex questions, and cognitively complex tasks, reinforce focus on the text and cultivate independence.
4. Emphasizing students supporting answers based upon evidence from the text.
5. Providing extensive research and writing opportunities (claims and evidence).

Science and Engineering Practices (NRC *Framework for K-12 Science Education, 2010*)

- Asking questions (for science) and defining problems (for engineering).
- Developing and using models.
- Planning and carrying out investigations.
- Analyzing and interpreting data.
- Using mathematics, information and computer technology, and computational thinking.
- Constructing explanations (for science) and designing solutions (for engineering).
- Engaging in argument from evidence.
- Obtaining, evaluating, and communicating information.

ISTE Standards (iste.org/docs/pdfs/20-14_ISTE_Standards-S_PDF.pdf) should be incorporated in many contexts throughout the course.

Engineering Practices are emphasized in the course
nextgenscience.org/sites/ngss/files/Appendix%20F%20%20Science%20and%20Engineering%20Practices%20in%20the%20NGSS%20-%20FINAL%20060513.pdf

Course Standards

NOTE: Use grade appropriate Nature of Science and mathematics content benchmarks (i.e. if this course is offered to seventh grade students, then the SC.7.N benchmarks should be integrated into the course content, and SC.6.N and SC.8.N benchmarks should be omitted from the seventh grade course).

Literacy Standards in Science
Secondary science courses include reading standards for literacy in science and technical subjects 6-12 and writing standards for literacy in history/social studies, science, and technical subjects 6-12. The courses also include speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Science. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SC.pdf.

GENERAL INFORMATION

Course Number: 2000025

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 6 to 8 Education Courses > **Subject:** Science > **SubSubject:** Biological Sciences >
Abbreviated Title: M/J STEM LIFE SCI
Course Length: Year (Y)
Course Attributes:
- Class Size Core Required

Course Type: Core Academic Course
Course Level: 2
Course Status: Draft - Course Pending Approval
Grade Level(s): 6,7,8

Educator Certifications

Earth/Space Science (Grades 6-12)
Chemistry (Grades 6-12)
Physics (Grades 6-12)
Middle Grades General Science (Middle Grades 5-9)
Biology (Grades 6-12)
Middle Grades Integrated Curriculum (Middle Grades 5-9)

Course Standards

Name	Description
ELD.K12.ELL.SC.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Science.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

GENERAL NOTES

SUBJECT AREA TRANSFER NUMBERS

Each course transferred into a Florida public school by an out-of-state or non-public school student should be matched with a course title and number when such course provides substantially the same content. However, a few transfer courses may not be close enough in content to be matched. For those courses a subject area transfer number is provided.

Course Standards

Name	Description
SC.912.E.7.1:	Analyze the movement of matter and energy through the different biogeochemical cycles, including water and carbon.
SC.912.L.14.1:	Describe the scientific theory of cells (cell theory) and relate the history of its discovery to the process of science.
SC.912.L.14.2:	Relate structure to function for the components of plant and animal cells. Explain the role of cell membranes as a highly selective barrier (passive and active transport).
SC.912.L.14.3:	Compare and contrast the general structures of plant and animal cells. Compare and contrast the general structures of prokaryotic and eukaryotic cells.
SC.912.L.14.4:	Compare and contrast structure and function of various types of microscopes.
SC.912.L.14.6:	Explain the significance of genetic factors, environmental factors, and pathogenic agents to health from the perspectives of both individual and public health.
SC.912.L.14.7:	Relate the structure of each of the major plant organs and tissues to physiological processes.
SC.912.L.14.26:	Identify the major parts of the brain on diagrams or models.
SC.912.L.14.36:	Describe the factors affecting blood flow through the cardiovascular system.
SC.912.L.14.52:	Explain the basic functions of the human immune system, including specific and nonspecific immune response, vaccines, and antibiotics.
SC.912.L.15.1:	Explain how the scientific theory of evolution is supported by the fossil record, comparative anatomy, comparative embryology, biogeography, molecular biology, and observed evolutionary change.
SC.912.L.15.4:	Describe how and why organisms are hierarchically classified and based on evolutionary relationships.
SC.912.L.15.5:	Explain the reasons for changes in how organisms are classified.
SC.912.L.15.6:	Discuss distinguishing characteristics of the domains and kingdoms of living organisms.
SC.912.L.15.8:	Describe the scientific explanations of the origin of life on Earth.
SC.912.L.15.10:	Identify basic trends in hominid evolution from early ancestors six million years ago to modern humans, including brain size, jaw size, language, and manufacture of tools.
SC.912.L.15.13:	Describe the conditions required for natural selection, including: overproduction of offspring, inherited variation, and the struggle to survive, which result in differential reproductive success.
SC.912.L.15.14:	Discuss mechanisms of evolutionary change other than natural selection such as genetic drift and gene flow.
SC.912.L.15.15:	Describe how mutation and genetic recombination increase genetic variation.
SC.912.L.16.1:	Use Mendel's laws of segregation and independent assortment to analyze patterns of inheritance.
SC.912.L.16.2:	Discuss observed inheritance patterns caused by various modes of inheritance, including dominant, recessive, codominant, sex-linked, polygenic, and multiple alleles.
SC.912.L.16.3:	Describe the basic process of DNA replication and how it relates to the transmission and conservation of the genetic information.
SC.912.L.16.4:	Explain how mutations in the DNA sequence may or may not result in phenotypic change. Explain how mutations in gametes may result in phenotypic changes in offspring.
SC.912.L.16.5:	Explain the basic processes of transcription and translation, and how they result in the expression of genes.
SC.912.L.16.8:	Explain the relationship between mutation, cell cycle, and uncontrolled cell growth potentially resulting in cancer.
SC.912.L.16.9:	Explain how and why the genetic code is universal and is common to almost all organisms.
SC.912.L.16.10:	Evaluate the impact of biotechnology on the individual, society and the environment, including medical and ethical issues.
SC.912.L.16.13:	Describe the basic anatomy and physiology of the human reproductive system. Describe the process of human development from fertilization to birth and major changes that occur in each trimester of pregnancy.
SC.912.L.16.14:	Describe the cell cycle, including the process of mitosis. Explain the role of mitosis in the formation of new cells and its importance in maintaining chromosome number during asexual reproduction.
SC.912.L.16.16:	Describe the process of meiosis, including independent assortment and crossing over. Explain how reduction division results in the formation of haploid gametes or spores.
SC.912.L.16.17:	Compare and contrast mitosis and meiosis and relate to the processes of sexual and asexual reproduction and their consequences for genetic variation.
SC.912.L.17.2:	Explain the general distribution of life in aquatic systems as a function of chemistry, geography, light, depth, salinity, and temperature.
SC.912.L.17.4:	Describe changes in ecosystems resulting from seasonal variations, climate change and succession.
SC.912.L.17.5:	Analyze how population size is determined by births, deaths, immigration, emigration, and limiting factors (biotic and abiotic) that determine carrying capacity.
SC.912.L.17.8:	Recognize the consequences of the losses of biodiversity due to catastrophic events, climate changes, human activity, and the introduction of invasive, non-native species.
SC.912.L.17.9:	Use a food web to identify and distinguish producers, consumers, and decomposers. Explain the pathway of energy transfer through trophic levels and the reduction of available energy at successive trophic levels.
SC.912.L.17.11:	Evaluate the costs and benefits of renewable and nonrenewable resources, such as water, energy, fossil fuels, wildlife, and forests.
SC.912.L.17.13:	Discuss the need for adequate monitoring of environmental parameters when making policy decisions.
SC.912.L.17.20:	Predict the impact of individuals on environmental systems and examine how human lifestyles affect sustainability.
SC.912.L.18.1:	Describe the basic molecular structures and primary functions of the four major categories of biological macromolecules.
SC.912.L.18.7:	Identify the reactants, products, and basic functions of photosynthesis.
SC.912.L.18.8:	Identify the reactants, products, and basic functions of aerobic and anaerobic cellular respiration.
SC.912.L.18.9:	Explain the interrelated nature of photosynthesis and cellular respiration.
SC.912.L.18.10:	Connect the role of adenosine triphosphate (ATP) to energy transfers within a cell.
SC.912.L.18.11:	Explain the role of enzymes as catalysts that lower the activation energy of biochemical reactions. Identify factors, such as pH and temperature, and their effect on enzyme activity.
SC.912.L.18.12:	Discuss the special properties of water that contribute to Earth's suitability as an environment for life: cohesive behavior, ability to moderate temperature, expansion upon freezing, and versatility as a solvent.

SC.912.N.1.1:	Define a problem based on a specific body of knowledge, for example: biology, chemistry, physics, and earth/space science, and do the following: 1. **Pose questions about the natural world,** (Articulate the purpose of the investigation and identify the relevant scientific concepts). 2. **Conduct systematic observations,** (Write procedures that are clear and replicable. Identify observables and examine relationships between test (independent) variable and outcome (dependent) variable. Employ appropriate methods for accurate and consistent observations; conduct and record measurements at appropriate levels of precision. Follow safety guidelines). 3. **Examine books and other sources of information to see what is already known,** 4. **Review what is known in light of empirical evidence,** (Examine whether available empirical evidence can be interpreted in terms of existing knowledge and models, and if not, modify or develop new models). 5. **Plan investigations,** (Design and evaluate a scientific investigation). 6. **Use tools to gather, analyze, and interpret data (this includes the use of measurement in metric and other systems, and also the generation and interpretation of graphical representations of data, including data tables and graphs),** (Collect data or evidence in an organized way. Properly use instruments, equipment, and materials (e.g., scales, probeware, meter sticks, microscopes, computers) including set-up, calibration, technique, maintenance, and storage). 7. **Pose answers, explanations, or descriptions of events,** 8. **Generate explanations that explicate or describe natural phenomena (inferences),** 9. **Use appropriate evidence and reasoning to justify these explanations to others,** 10. **Communicate results of scientific investigations, and** 11. **Evaluate the merits of the explanations produced by others.**
SC.912.N.1.3:	Recognize that the strength or usefulness of a scientific claim is evaluated through scientific argumentation, which depends on critical and logical thinking, and the active consideration of alternative scientific explanations to explain the data presented.
SC.912.N.1.4:	Identify sources of information and assess their reliability according to the strict standards of scientific investigation.
SC.912.N.1.6:	Describe how scientific inferences are drawn from scientific observations and provide examples from the content being studied.
SC.912.N.2.1:	Identify what is science, what clearly is not science, and what superficially resembles science (but fails to meet the criteria for science).
SC.912.N.2.2:	Identify which questions can be answered through science and which questions are outside the boundaries of scientific investigation, such as questions addressed by other ways of knowing, such as art, philosophy, and religion.
SC.912.N.3.1:	Explain that a scientific theory is the culmination of many scientific investigations drawing together all the current evidence concerning a substantial range of phenomena; thus, a scientific theory represents the most powerful explanation scientists have to offer.
SC.912.N.3.4:	Recognize that theories do not become laws, nor do laws become theories; theories are well supported explanations and laws are well supported descriptions.
LAFS.910.RST.1.1:	Cite specific textual evidence to support analysis of science and technical texts, attending to the precise details of explanations or descriptions.
LAFS.910.RST.1.2:	Determine the central ideas or conclusions of a text; trace the text's explanation or depiction of a complex process, phenomenon, or concept; provide an accurate summary of the text.
LAFS.910.RST.1.3:	Follow precisely a complex multistep procedure when carrying out experiments, taking measurements, or performing technical tasks, attending to special cases or exceptions defined in the text.
LAFS.910.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 9–10 texts and topics.
LAFS.910.RST.2.5:	Analyze the structure of the relationships among concepts in a text, including relationships among key terms (e.g., force, friction, reaction force, energy).
LAFS.910.RST.2.6:	Analyze the author's purpose in providing an explanation, describing a procedure, or discussing an experiment in a text, defining the question the author seeks to address.
LAFS.910.RST.3.7:	Translate quantitative or technical information expressed in words in a text into visual form (e.g., a table or chart) and translate information expressed visually or mathematically (e.g., in an equation) into words.
LAFS.910.RST.3.8:	Assess the extent to which the reasoning and evidence in a text support the author's claim or a recommendation for solving a scientific or technical problem.
LAFS.910.RST.3.9:	Compare and contrast findings presented in a text to those from other sources (including their own experiments), noting when the findings support or contradict previous explanations or accounts.
LAFS.910.RST.4.10:	By the end of grade 10, read and comprehend science/technical texts in the grades 9–10 text complexity band independently and proficiently.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.
LAFS.910.SL.1.2:	Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.
LAFS.910.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.
LAFS.910.SL.2.4:	Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.
LAFS.910.SL.2.5:	Make strategic use of digital media (e.g., textual, graphical, audio, visual, and interactive elements) in presentations to enhance understanding of findings, reasoning, and evidence and to add interest.
LAFS.910.WHST.1.1:	Write arguments focused on *discipline-specific content*. a. Introduce precise claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that establishes clear relationships among the claim(s), counterclaims, reasons, and evidence. b. Develop claim(s) and counterclaims fairly, supplying data and evidence for each while pointing out the strengths and limitations of both claim(s) and counterclaims in a discipline-appropriate form and in a manner that anticipates the audience's knowledge level and concerns.

	c. Use words, phrases, and clauses to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims. d. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. e. Provide a concluding statement or section that follows from or supports the argument presented.
LAFS.910.WHST.1.2:	Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes. a. Introduce a topic and organize ideas, concepts, and information to make important connections and distinctions; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension. b. Develop the topic with well-chosen, relevant, and sufficient facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic. c. Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among ideas and concepts. d. Use precise language and domain-specific vocabulary to manage the complexity of the topic and convey a style appropriate to the discipline and context as well as to the expertise of likely readers. e. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. f. Provide a concluding statement or section that follows from and supports the information or explanation presented (e.g., articulating implications or the significance of the topic).
LAFS.910.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.910.WHST.2.5:	Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.
LAFS.910.WHST.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibly and dynamically.
LAFS.910.WHST.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.910.WHST.3.8:	Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the usefulness of each source in answering the research question; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and following a standard format for citation.
LAFS.910.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.910.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
MAFS.912.N-Q.1.1:	Use units as a way to understand problems and to guide the solution of multi-step problems; choose and interpret units consistently in formulas; choose and interpret the scale and the origin in graphs and data displays. ★
MAFS.912.N-Q.1.3:	Choose a level of accuracy appropriate to limitations on measurement when reporting quantities. ★
MAFS.K12.MP.1.1:	**Make sense of problems and persevere in solving them.** Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches. **Standard Relation to Course: Supporting**
MAFS.K12.MP.2.1:	**Reason abstractly and quantitatively**. Mathematically proficient students make sense of quantities and their relationships in problem situations. They bring two complementary abilities to bear on problems involving quantitative relationships: the ability to decontextualize—to abstract a given situation and represent it symbolically and manipulate the representing symbols as if they have a life of their own, without necessarily attending to their referents—and the ability to contextualize, to pause as needed during the manipulation process in order to probe into the referents for the symbols involved. Quantitative reasoning entails habits of creating a coherent representation of the problem at hand; considering the units involved; attending to the meaning of quantities, not just how to compute them; and knowing and flexibly using different properties of operations and objects. **Standard Relation to Course: Supporting**
MAFS.K12.MP.3.1:	**Construct viable arguments and critique the reasoning of others.** Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments. **Standard Relation to Course: Supporting**
MAFS.K12.MP.4.1:	**Model with mathematics.** Mathematically proficient students can apply the mathematics they know to solve problems arising in everyday life, society, and the workplace. In early grades, this might be as simple as writing an addition equation to describe a situation. In middle grades, a student might apply proportional reasoning to plan a school event or analyze a problem in the community. By high school, a student might use geometry to solve a design problem or use a function to describe how one quantity of interest depends on another. Mathematically proficient students who can apply what they know are comfortable making assumptions and approximations to simplify a complicated situation, realizing that these may need revision later. They are able to

	identify important quantities in a practical situation and map their relationships using such tools as diagrams, two-way tables, graphs, flowcharts and formulas. They can analyze those relationships mathematically to draw conclusions. They routinely interpret their mathematical results in the context of the situation and reflect on whether the results make sense, possibly improving the model if it has not served its purpose. **Standard Relation to Course: Supporting**
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 – 3(x – y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
MAFS.K12.MP.8.1:	**Look for and express regularity in repeated reasoning.** Mathematically proficient students notice if calculations are repeated, and look both for general methods and for shortcuts. Upper elementary students might notice when dividing 25 by 11 that they are repeating the same calculations over and over again, and conclude they have a repeating decimal. By paying attention to the calculation of slope as they repeatedly check whether points are on the line through (1, 2) with slope 3, middle school students might abstract the equation $(y – 2)/(x – 1) = 3$. Noticing the regularity in the way terms cancel when expanding $(x – 1)(x + 1)$, $(x – 1)(x^2 + x + 1)$, and $(x – 1)(x^3 + x^2 + x + 1)$ might lead them to the general formula for the sum of a geometric series. As they work to solve a problem, mathematically proficient students maintain oversight of the process, while attending to the details. They continually evaluate the reasonableness of their intermediate results. **Standard Relation to Course: Supporting**
HE.912.C.1.3:	Evaluate how environment and personal health are interrelated. **Clarifications:** Food options within a community; prenatal-care services; availability of recreational facilities; air quality; weather-safety awareness; and weather, air, and water conditions.
HE.912.C.1.5:	Analyze strategies for prevention, detection, and treatment of communicable and chronic diseases. **Clarifications:** Health prevention, detection, and treatment of: breast and testicular cancer, suicide, obesity, and industrial-related chronic disease.
HE.912.C.1.7:	Analyze how heredity and family history can impact personal health. **Clarifications:** Drug use, family obesity, heart disease, mental health, and non-communicable illness or disease.
ELD.K12.ELL.SC.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Science.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

GENERAL NOTES

Laboratory investigations that include the use of scientific inquiry, research, measurement, problem solving, laboratory apparatus and technologies, experimental procedures, and safety procedures are an integral part of this course. The National Science Teachers Association (NSTA) recommends that at the high school level, all students should be in the science lab or field, collecting data every week. School laboratory investigations (labs) are defined by the National Research Council (NRC) as an experience in the laboratory, classroom, or the field that provides students with opportunities to interact directly with natural phenomena or with data collected by others using tools, materials, data collection techniques, and models (NRC, 2006, p. 3). Laboratory investigations in the high school classroom should help all students develop a growing understanding of the complexity and ambiguity of empirical work, as well as the skills to calibrate and troubleshoot equipment used to make observations. Learners should understand measurement error; and have the skills to aggregate, interpret, and present the resulting data (National Research Council, 2006, p.77; NSTA, 2007).

Special Notes:

Instructional Practices
Teaching from a range of complex text is optimized when teachers in all subject areas implement the following strategies on a routine basis:

1. Ensuring wide reading from complex text that varies in length.
2. Making close reading and rereading of texts central to lessons.
3. Emphasizing text-specific complex questions, and cognitively complex tasks, reinforce focus on the text and cultivate independence.
4. Emphasizing students supporting answers based upon evidence from the text.
5. Providing extensive research and writing opportunities (claims and evidence).

Science and Engineering Practices (NRC *Framework for K-12 Science Education, 2010*)

- Asking questions (for science) and defining problems (for engineering).
- Developing and using models.
- Planning and carrying out investigations.
- Analyzing and interpreting data.
- Using mathematics, information and computer technology, and computational thinking.
- Constructing explanations (for science) and designing solutions (for engineering).
- Engaging in argument from evidence.
- Obtaining, evaluating, and communicating information.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Science. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SC.pdf

Additional Instructional Resources:
A.V.E. for Success Collection is provided by the Florida Association of School Administrators: fasa.net/4DCGI/cms/review.html?Action=CMS_Document&DocID=139. Please be aware that these resources have not been reviewed by CPALMS and there may be a charge for the use of some of them in this collection.

GENERAL INFORMATION

Course Number: 2000310

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 9 to 12 and Adult Education Courses > **Subject:** Science > **SubSubject:** Biological Sciences >
Abbreviated Title: BIO 1

Number of Credits: One (1) credit

Course Length: Year (Y)

Course Attributes:
- Class Size Core Required

Course Type: Core Academic Course

Course Level: 2

Course Status: Draft - Course Pending Approval

Grade Level(s): 9,10,11,12

Graduation Requirement: Biology

Educator Certifications

Science (Secondary Grades 7-12)
Biology (Grades 6-12)
Middle Grades General Science (Middle Grades 5-9)

Equivalent Courses

2000320-Biology 1 Honors
2000430-Biology Technology
2000322-Cambridge Pre-AICE Biology IGCSE Level
2000800-Florida's Preinternational Baccalaureate Biology 1

Biology 1 for Credit Recovery (#2000315) 2015 - 2022 (current)

Course Standards

Name	Description
SC.912.E.7.1:	Analyze the movement of matter and energy through the different biogeochemical cycles, including water and carbon.
SC.912.L.14.1:	Describe the scientific theory of cells (cell theory) and relate the history of its discovery to the process of science.
SC.912.L.14.2:	Relate structure to function for the components of plant and animal cells. Explain the role of cell membranes as a highly selective barrier (passive and active transport).
SC.912.L.14.3:	Compare and contrast the general structures of plant and animal cells. Compare and contrast the general structures of prokaryotic and eukaryotic cells.
SC.912.L.14.4:	Compare and contrast structure and function of various types of microscopes.
SC.912.L.14.6:	Explain the significance of genetic factors, environmental factors, and pathogenic agents to health from the perspectives of both individual and public health.
SC.912.L.14.7:	Relate the structure of each of the major plant organs and tissues to physiological processes.
SC.912.L.14.26:	Identify the major parts of the brain on diagrams or models.
SC.912.L.14.36:	Describe the factors affecting blood flow through the cardiovascular system.
SC.912.L.14.52:	Explain the basic functions of the human immune system, including specific and nonspecific immune response, vaccines, and antibiotics.
SC.912.L.15.1:	Explain how the scientific theory of evolution is supported by the fossil record, comparative anatomy, comparative embryology, biogeography, molecular biology, and observed evolutionary change.
SC.912.L.15.4:	Describe how and why organisms are hierarchically classified and based on evolutionary relationships.
SC.912.L.15.5:	Explain the reasons for changes in how organisms are classified.
SC.912.L.15.6:	Discuss distinguishing characteristics of the domains and kingdoms of living organisms.
SC.912.L.15.8:	Describe the scientific explanations of the origin of life on Earth.
SC.912.L.15.10:	Identify basic trends in hominid evolution from early ancestors six million years ago to modern humans, including brain size, jaw size, language, and manufacture of tools.
SC.912.L.15.13:	Describe the conditions required for natural selection, including: overproduction of offspring, inherited variation, and the struggle to survive, which result in differential reproductive success.
SC.912.L.15.14:	Discuss mechanisms of evolutionary change other than natural selection such as genetic drift and gene flow.
SC.912.L.15.15:	Describe how mutation and genetic recombination increase genetic variation.
SC.912.L.16.1:	Use Mendel's laws of segregation and independent assortment to analyze patterns of inheritance.
SC.912.L.16.2:	Discuss observed inheritance patterns caused by various modes of inheritance, including dominant, recessive, codominant, sex-linked, polygenic, and multiple alleles.
SC.912.L.16.3:	Describe the basic process of DNA replication and how it relates to the transmission and conservation of the genetic information.
SC.912.L.16.4:	Explain how mutations in the DNA sequence may or may not result in phenotypic change. Explain how mutations in gametes may result in phenotypic changes in offspring.
SC.912.L.16.5:	Explain the basic processes of transcription and translation, and how they result in the expression of genes.
SC.912.L.16.8:	Explain the relationship between mutation, cell cycle, and uncontrolled cell growth potentially resulting in cancer.
SC.912.L.16.9:	Explain how and why the genetic code is universal and is common to almost all organisms.
SC.912.L.16.10:	Evaluate the impact of biotechnology on the individual, society and the environment, including medical and ethical issues.
SC.912.L.16.13:	Describe the basic anatomy and physiology of the human reproductive system. Describe the process of human development from fertilization to birth and major changes that occur in each trimester of pregnancy.
SC.912.L.16.14:	Describe the cell cycle, including the process of mitosis. Explain the role of mitosis in the formation of new cells and its importance in maintaining chromosome number during asexual reproduction.
SC.912.L.16.16:	Describe the process of meiosis, including independent assortment and crossing over. Explain how reduction division results in the formation of haploid gametes or spores.
SC.912.L.16.17:	Compare and contrast mitosis and meiosis and relate to the processes of sexual and asexual reproduction and their consequences for genetic variation.
SC.912.L.17.2:	Explain the general distribution of life in aquatic systems as a function of chemistry, geography, light, depth, salinity, and temperature.
SC.912.L.17.4:	Describe changes in ecosystems resulting from seasonal variations, climate change and succession.
SC.912.L.17.5:	Analyze how population size is determined by births, deaths, immigration, emigration, and limiting factors (biotic and abiotic) that determine carrying capacity.
SC.912.L.17.8:	Recognize the consequences of the losses of biodiversity due to catastrophic events, climate changes, human activity, and the introduction of invasive, non-native species.
SC.912.L.17.9:	Use a food web to identify and distinguish producers, consumers, and decomposers. Explain the pathway of energy transfer through trophic levels and the reduction of available energy at successive trophic levels.
SC.912.L.17.11:	Evaluate the costs and benefits of renewable and nonrenewable resources, such as water, energy, fossil fuels, wildlife, and forests.
SC.912.L.17.13:	Discuss the need for adequate monitoring of environmental parameters when making policy decisions.
SC.912.L.17.20:	Predict the impact of individuals on environmental systems and examine how human lifestyles affect sustainability.
SC.912.L.18.1:	Describe the basic molecular structures and primary functions of the four major categories of biological macromolecules.
SC.912.L.18.7:	Identify the reactants, products, and basic functions of photosynthesis.
SC.912.L.18.8:	Identify the reactants, products, and basic functions of aerobic and anaerobic cellular respiration.
SC.912.L.18.9:	Explain the interrelated nature of photosynthesis and cellular respiration.
SC.912.L.18.10:	Connect the role of adenosine triphosphate (ATP) to energy transfers within a cell.
SC.912.L.18.11:	Explain the role of enzymes as catalysts that lower the activation energy of biochemical reactions. Identify factors, such as pH and temperature, and their effect on enzyme activity.
SC.912.L.18.12:	Discuss the special properties of water that contribute to Earth's suitability as an environment for life: cohesive behavior, ability to moderate temperature, expansion upon freezing, and versatility as a solvent.

SC.912.N.1.1:	Define a problem based on a specific body of knowledge, for example: biology, chemistry, physics, and earth/space science, and do the following: 1. **Pose questions about the natural world,** (Articulate the purpose of the investigation and identify the relevant scientific concepts). 2. **Conduct systematic observations,** (Write procedures that are clear and replicable. Identify observables and examine relationships between test (independent) variable and outcome (dependent) variable. Employ appropriate methods for accurate and consistent observations; conduct and record measurements at appropriate levels of precision. Follow safety guidelines). 3. **Examine books and other sources of information to see what is already known,** 4. **Review what is known in light of empirical evidence,** (Examine whether available empirical evidence can be interpreted in terms of existing knowledge and models, and if not, modify or develop new models). 5. **Plan investigations,** (Design and evaluate a scientific investigation). 6. **Use tools to gather, analyze, and interpret data (this includes the use of measurement in metric and other systems, and also the generation and interpretation of graphical representations of data, including data tables and graphs),** (Collect data or evidence in an organized way. Properly use instruments, equipment, and materials (e.g., scales, probeware, meter sticks, microscopes, computers) including set-up, calibration, technique, maintenance, and storage). 7. **Pose answers, explanations, or descriptions of events,** 8. **Generate explanations that explicate or describe natural phenomena (inferences),** 9. **Use appropriate evidence and reasoning to justify these explanations to others,** 10. **Communicate results of scientific investigations, and** 11. **Evaluate the merits of the explanations produced by others.**
SC.912.N.1.3:	Recognize that the strength or usefulness of a scientific claim is evaluated through scientific argumentation, which depends on critical and logical thinking, and the active consideration of alternative scientific explanations to explain the data presented.
SC.912.N.1.4:	Identify sources of information and assess their reliability according to the strict standards of scientific investigation.
SC.912.N.1.6:	Describe how scientific inferences are drawn from scientific observations and provide examples from the content being studied.
SC.912.N.2.1:	Identify what is science, what clearly is not science, and what superficially resembles science (but fails to meet the criteria for science).
SC.912.N.2.2:	Identify which questions can be answered through science and which questions are outside the boundaries of scientific investigation, such as questions addressed by other ways of knowing, such as art, philosophy, and religion.
SC.912.N.3.1:	Explain that a scientific theory is the culmination of many scientific investigations drawing together all the current evidence concerning a substantial range of phenomena; thus, a scientific theory represents the most powerful explanation scientists have to offer.
SC.912.N.3.4:	Recognize that theories do not become laws, nor do laws become theories; theories are well supported explanations and laws are well supported descriptions.
LAFS.910.RST.1.1:	Cite specific textual evidence to support analysis of science and technical texts, attending to the precise details of explanations or descriptions.
LAFS.910.RST.1.2:	Determine the central ideas or conclusions of a text; trace the text's explanation or depiction of a complex process, phenomenon, or concept; provide an accurate summary of the text.
LAFS.910.RST.1.3:	Follow precisely a complex multistep procedure when carrying out experiments, taking measurements, or performing technical tasks, attending to special cases or exceptions defined in the text.
LAFS.910.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 9–10 texts and topics.
LAFS.910.RST.2.5:	Analyze the structure of the relationships among concepts in a text, including relationships among key terms (e.g., force, friction, reaction force, energy).
LAFS.910.RST.2.6:	Analyze the author's purpose in providing an explanation, describing a procedure, or discussing an experiment in a text, defining the question the author seeks to address.
LAFS.910.RST.3.7:	Translate quantitative or technical information expressed in words in a text into visual form (e.g., a table or chart) and translate information expressed visually or mathematically (e.g., in an equation) into words.
LAFS.910.RST.3.8:	Assess the extent to which the reasoning and evidence in a text support the author's claim or a recommendation for solving a scientific or technical problem.
LAFS.910.RST.3.9:	Compare and contrast findings presented in a text to those from other sources (including their own experiments), noting when the findings support or contradict previous explanations or accounts.
LAFS.910.RST.4.10:	By the end of grade 10, read and comprehend science/technical texts in the grades 9–10 text complexity band independently and proficiently.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.
LAFS.910.SL.1.2:	Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.
LAFS.910.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.
LAFS.910.SL.2.4:	Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.
LAFS.910.SL.2.5:	Make strategic use of digital media (e.g., textual, graphical, audio, visual, and interactive elements) in presentations to enhance understanding of findings, reasoning, and evidence and to add interest.
LAFS.910.WHST.1.1:	Write arguments focused on *discipline-specific content*. a. Introduce precise claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that establishes clear relationships among the claim(s), counterclaims, reasons, and evidence. b. Develop claim(s) and counterclaims fairly, supplying data and evidence for each while pointing out the strengths and limitations of both claim(s) and counterclaims in a discipline-appropriate form and in a manner that anticipates the audience's knowledge level and concerns.

	c. Use words, phrases, and clauses to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims. d. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. e. Provide a concluding statement or section that follows from or supports the argument presented.
LAFS.910.WHST.1.2:	Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes. a. Introduce a topic and organize ideas, concepts, and information to make important connections and distinctions; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension. b. Develop the topic with well-chosen, relevant, and sufficient facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic. c. Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among ideas and concepts. d. Use precise language and domain-specific vocabulary to manage the complexity of the topic and convey a style appropriate to the discipline and context as well as to the expertise of likely readers. e. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. f. Provide a concluding statement or section that follows from and supports the information or explanation presented (e.g., articulating implications or the significance of the topic).
LAFS.910.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.910.WHST.2.5:	Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.
LAFS.910.WHST.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibly and dynamically.
LAFS.910.WHST.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.910.WHST.3.8:	Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the usefulness of each source in answering the research question; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and following a standard format for citation.
LAFS.910.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.910.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
MAFS.912.N-Q.1.1:	Use units as a way to understand problems and to guide the solution of multi-step problems; choose and interpret units consistently in formulas; choose and interpret the scale and the origin in graphs and data displays. ★
MAFS.912.N-Q.1.3:	Choose a level of accuracy appropriate to limitations on measurement when reporting quantities. ★
MAFS.K12.MP.1.1:	**Make sense of problems and persevere in solving them.** Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches. **Standard Relation to Course: Supporting**
MAFS.K12.MP.2.1:	**Reason abstractly and quantitatively**. Mathematically proficient students make sense of quantities and their relationships in problem situations. They bring two complementary abilities to bear on problems involving quantitative relationships: the ability to decontextualize—to abstract a given situation and represent it symbolically and manipulate the representing symbols as if they have a life of their own, without necessarily attending to their referents—and the ability to contextualize, to pause as needed during the manipulation process in order to probe into the referents for the symbols involved. Quantitative reasoning entails habits of creating a coherent representation of the problem at hand; considering the units involved; attending to the meaning of quantities, not just how to compute them; and knowing and flexibly using different properties of operations and objects. **Standard Relation to Course: Supporting**
MAFS.K12.MP.3.1:	**Construct viable arguments and critique the reasoning of others.** Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments. **Standard Relation to Course: Supporting**
MAFS.K12.MP.4.1:	**Model with mathematics.** Mathematically proficient students can apply the mathematics they know to solve problems arising in everyday life, society, and the workplace. In early grades, this might be as simple as writing an addition equation to describe a situation. In middle grades, a student might apply proportional reasoning to plan a school event or analyze a problem in the community. By high school, a student might use geometry to solve a design problem or use a function to describe how one quantity of interest depends on another. Mathematically proficient students who can apply what they know are comfortable making assumptions and approximations to simplify a complicated situation, realizing that these may need revision later. They are able to

	identify important quantities in a practical situation and map their relationships using such tools as diagrams, two-way tables, graphs, flowcharts and formulas. They can analyze those relationships mathematically to draw conclusions. They routinely interpret their mathematical results in the context of the situation and reflect on whether the results make sense, possibly improving the model if it has not served its purpose. **Standard Relation to Course: Supporting**
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 – 3(x – y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
MAFS.K12.MP.8.1:	**Look for and express regularity in repeated reasoning.** Mathematically proficient students notice if calculations are repeated, and look both for general methods and for shortcuts. Upper elementary students might notice when dividing 25 by 11 that they are repeating the same calculations over and over again, and conclude they have a repeating decimal. By paying attention to the calculation of slope as they repeatedly check whether points are on the line through (1, 2) with slope 3, middle school students might abstract the equation $(y – 2)/(x – 1) = 3$. Noticing the regularity in the way terms cancel when expanding $(x – 1)(x + 1)$, $(x – 1)(x^2 + x + 1)$, and $(x – 1)(x^3 + x^2 + x + 1)$ might lead them to the general formula for the sum of a geometric series. As they work to solve a problem, mathematically proficient students maintain oversight of the process, while attending to the details. They continually evaluate the reasonableness of their intermediate results. **Standard Relation to Course: Supporting**
HE.912.C.1.3:	Evaluate how environment and personal health are interrelated. **Clarifications:** Food options within a community; prenatal-care services; availability of recreational facilities; air quality; weather-safety awareness; and weather, air, and water conditions.
HE.912.C.1.5:	Analyze strategies for prevention, detection, and treatment of communicable and chronic diseases. **Clarifications:** Health prevention, detection, and treatment of: breast and testicular cancer, suicide, obesity, and industrial-related chronic disease.
HE.912.C.1.7:	Analyze how heredity and family history can impact personal health. **Clarifications:** Drug use, family obesity, heart disease, mental health, and non-communicable illness or disease.
ELD.K12.ELL.SC.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Science.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

GENERAL NOTES

Special Notes: Credit Recovery courses are credit bearing courses with specific content requirements defined by Next Generation Sunshine State Standards and/or Florida Standards. Students enrolled in a Credit Recovery course must have previously attempted the corresponding course (and/or End-of-Course assessment) since the course requirements for the Credit Recovery course are exactly the same as the previously attempted corresponding course. For example, Geometry (1206310) and Geometry for Credit Recovery (1206315) have identical content requirements. It is important to note that Credit Recovery courses are not bound by Section 1003.436(1)(a), Florida Statutes, requiring a minimum of 135 hours of bona fide instruction (120 hours in a school/district implementing block scheduling) in a designed course of study that contains student performance standards, since the students have previously attempted successful completion of the corresponding course. Additionally, Credit Recovery courses should ONLY be used for credit recovery, grade forgiveness, or remediation for students needing to prepare for an End-of-Course assessment retake.

Special Notes:

Instructional Practices
Teaching from a range of complex text is optimized when teachers in all subject areas implement the following strategies on a routine basis:

1. Ensuring wide reading from complex text that varies in length.
2. Making close reading and rereading of texts central to lessons.
3. Emphasizing text-specific complex questions, and cognitively complex tasks, reinforce focus on the text and cultivate independence.
4. Emphasizing students supporting answers based upon evidence from the text.
5. Providing extensive research and writing opportunities (claims and evidence).

Science and Engineering Practices (NRC *Framework for K-12 Science Education, 2010*)

- Asking questions (for science) and defining problems (for engineering).
- Developing and using models.
- Planning and carrying out investigations.
- Analyzing and interpreting data.
- Using mathematics, information and computer technology, and computational thinking.
- Constructing explanations (for science) and designing solutions (for engineering).
- Engaging in argument from evidence.
- Obtaining, evaluating, and communicating information.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Science. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SC.pdf

GENERAL INFORMATION

Course Number: 2000315

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 9 to 12 and Adult Education Courses > **Subject:** Science > **SubSubject:** Biological Sciences >

Abbreviated Title: BIO 1 CR

Number of Credits: One (1) credit

Course Length: Credit Recovery (R)

Course Type: Elective Course

Course Level: 2

Course Status: Draft - Course Pending Approval

Grade Level(s): 9,10,11,12

Educator Certifications

Science (Secondary Grades 7-12)
Biology (Grades 6-12)
Middle Grades General Science (Middle Grades 5-9)

Biology 1 Honors (#2000320) 2015 - 2022 (current)

Course Standards

Name	Description
SC.912.E.7.1:	Analyze the movement of matter and energy through the different biogeochemical cycles, including water and carbon.
SC.912.L.14.1:	Describe the scientific theory of cells (cell theory) and relate the history of its discovery to the process of science.
SC.912.L.14.2:	Relate structure to function for the components of plant and animal cells. Explain the role of cell membranes as a highly selective barrier (passive and active transport).
SC.912.L.14.3:	Compare and contrast the general structures of plant and animal cells. Compare and contrast the general structures of prokaryotic and eukaryotic cells.
SC.912.L.14.4:	Compare and contrast structure and function of various types of microscopes.
SC.912.L.14.5:	Explain the evidence supporting the scientific theory of the origin of eukaryotic cells (endosymbiosis).
SC.912.L.14.6:	Explain the significance of genetic factors, environmental factors, and pathogenic agents to health from the perspectives of both individual and public health.
SC.912.L.14.7:	Relate the structure of each of the major plant organs and tissues to physiological processes.
SC.912.L.14.26:	Identify the major parts of the brain on diagrams or models.
SC.912.L.14.27:	Identify the functions of the major parts of the brain, including the meninges, medulla, pons, midbrain, hypothalamus, thalamus, cerebellum and cerebrum.
SC.912.L.14.36:	Describe the factors affecting blood flow through the cardiovascular system.
SC.912.L.14.52:	Explain the basic functions of the human immune system, including specific and nonspecific immune response, vaccines, and antibiotics.
SC.912.L.15.1:	Explain how the scientific theory of evolution is supported by the fossil record, comparative anatomy, comparative embryology, biogeography, molecular biology, and observed evolutionary change.
SC.912.L.15.2:	Discuss the use of molecular clocks to estimate how long ago various groups of organisms diverged evolutionarily from one another.
SC.912.L.15.3:	Describe how biological diversity is increased by the origin of new species and how it is decreased by the natural process of extinction.
SC.912.L.15.4:	Describe how and why organisms are hierarchically classified and based on evolutionary relationships.
SC.912.L.15.5:	Explain the reasons for changes in how organisms are classified.
SC.912.L.15.6:	Discuss distinguishing characteristics of the domains and kingdoms of living organisms.
SC.912.L.15.8:	Describe the scientific explanations of the origin of life on Earth.
SC.912.L.15.10:	Identify basic trends in hominid evolution from early ancestors six million years ago to modern humans, including brain size, jaw size, language, and manufacture of tools.
SC.912.L.15.13:	Describe the conditions required for natural selection, including: overproduction of offspring, inherited variation, and the struggle to survive, which result in differential reproductive success.
SC.912.L.15.14:	Discuss mechanisms of evolutionary change other than natural selection such as genetic drift and gene flow.
SC.912.L.15.15:	Describe how mutation and genetic recombination increase genetic variation.
SC.912.L.16.1:	Use Mendel's laws of segregation and independent assortment to analyze patterns of inheritance.
SC.912.L.16.2:	Discuss observed inheritance patterns caused by various modes of inheritance, including dominant, recessive, codominant, sex-linked, polygenic, and multiple alleles.
SC.912.L.16.3:	Describe the basic process of DNA replication and how it relates to the transmission and conservation of the genetic information.
SC.912.L.16.4:	Explain how mutations in the DNA sequence may or may not result in phenotypic change. Explain how mutations in gametes may result in phenotypic changes in offspring.
SC.912.L.16.5:	Explain the basic processes of transcription and translation, and how they result in the expression of genes.
SC.912.L.16.8:	Explain the relationship between mutation, cell cycle, and uncontrolled cell growth potentially resulting in cancer.
SC.912.L.16.9:	Explain how and why the genetic code is universal and is common to almost all organisms.
SC.912.L.16.10:	Evaluate the impact of biotechnology on the individual, society and the environment, including medical and ethical issues.
SC.912.L.16.12:	Describe how basic DNA technology (restriction digestion by endonucleases, gel electrophoresis, polymerase chain reaction, ligation, and transformation) is used to construct recombinant DNA molecules (DNA cloning).
SC.912.L.16.13:	Describe the basic anatomy and physiology of the human reproductive system. Describe the process of human development from fertilization to birth and major changes that occur in each trimester of pregnancy.
SC.912.L.16.14:	Describe the cell cycle, including the process of mitosis. Explain the role of mitosis in the formation of new cells and its importance in maintaining chromosome number during asexual reproduction.
SC.912.L.16.15:	Compare and contrast binary fission and mitotic cell division.
SC.912.L.16.16:	Describe the process of meiosis, including independent assortment and crossing over. Explain how reduction division results in the formation of haploid gametes or spores.
SC.912.L.16.17:	Compare and contrast mitosis and meiosis and relate to the processes of sexual and asexual reproduction and their consequences for genetic variation.
SC.912.L.17.2:	Explain the general distribution of life in aquatic systems as a function of chemistry, geography, light, depth, salinity, and temperature.
SC.912.L.17.4:	Describe changes in ecosystems resulting from seasonal variations, climate change and succession.
SC.912.L.17.5:	Analyze how population size is determined by births, deaths, immigration, emigration, and limiting factors (biotic and abiotic) that determine carrying capacity.
SC.912.L.17.8:	Recognize the consequences of the losses of biodiversity due to catastrophic events, climate changes, human activity, and the introduction of invasive, non-native species.
SC.912.L.17.9:	Use a food web to identify and distinguish producers, consumers, and decomposers. Explain the pathway of energy transfer through trophic levels and the reduction of available energy at successive trophic levels.
SC.912.L.17.11:	Evaluate the costs and benefits of renewable and nonrenewable resources, such as water, energy, fossil fuels, wildlife, and forests.
SC.912.L.17.16:	Discuss the large-scale environmental impacts resulting from human activity, including waste spills, oil spills, runoff, greenhouse gases, ozone depletion, and surface and groundwater pollution.
SC.912.L.17.20:	Predict the impact of individuals on environmental systems and examine how human lifestyles affect sustainability.

SC.912.L.18.1:	Describe the basic molecular structures and primary functions of the four major categories of biological macromolecules.
SC.912.L.18.2:	Describe the important structural characteristics of monosaccharides, disaccharides, and polysaccharides and explain the functions of carbohydrates in living things.
SC.912.L.18.3:	Describe the structures of fatty acids, triglycerides, phospholipids, and steroids. Explain the functions of lipids in living organisms. Identify some reactions that fatty acids undergo. Relate the structure and function of cell membranes.
SC.912.L.18.4:	Describe the structures of proteins and amino acids. Explain the functions of proteins in living organisms. Identify some reactions that amino acids undergo. Relate the structure and function of enzymes.
SC.912.L.18.7:	Identify the reactants, products, and basic functions of photosynthesis.
SC.912.L.18.8:	Identify the reactants, products, and basic functions of aerobic and anaerobic cellular respiration.
SC.912.L.18.9:	Explain the interrelated nature of photosynthesis and cellular respiration.
SC.912.L.18.10:	Connect the role of adenosine triphosphate (ATP) to energy transfers within a cell.
SC.912.L.18.11:	Explain the role of enzymes as catalysts that lower the activation energy of biochemical reactions. Identify factors, such as pH and temperature, and their effect on enzyme activity.
SC.912.L.18.12:	Discuss the special properties of water that contribute to Earth's suitability as an environment for life: cohesive behavior, ability to moderate temperature, expansion upon freezing, and versatility as a solvent.
SC.912.N.1.1:	Define a problem based on a specific body of knowledge, for example: biology, chemistry, physics, and earth/space science, and do the following: 1. **Pose questions about the natural world,** (Articulate the purpose of the investigation and identify the relevant scientific concepts). 2. **Conduct systematic observations,** (Write procedures that are clear and replicable. Identify observables and examine relationships between test (independent) variable and outcome (dependent) variable. Employ appropriate methods for accurate and consistent observations; conduct and record measurements at appropriate levels of precision. Follow safety guidelines). 3. **Examine books and other sources of information to see what is already known,** 4. **Review what is known in light of empirical evidence,** (Examine whether available empirical evidence can be interpreted in terms of existing knowledge and models, and if not, modify or develop new models). 5. **Plan investigations,** (Design and evaluate a scientific investigation). 6. **Use tools to gather, analyze, and interpret data (this includes the use of measurement in metric and other systems, and also the generation and interpretation of graphical representations of data, including data tables and graphs),** (Collect data or evidence in an organized way. Properly use instruments, equipment, and materials (e.g., scales, probeware, meter sticks, microscopes, computers) including set-up, calibration, technique, maintenance, and storage). 7. **Pose answers, explanations, or descriptions of events,** 8. **Generate explanations that explicate or describe natural phenomena (inferences),** 9. **Use appropriate evidence and reasoning to justify these explanations to others,** 10. **Communicate results of scientific investigations, and** 11. **Evaluate the merits of the explanations produced by others.**
SC.912.N.1.3:	Recognize that the strength or usefulness of a scientific claim is evaluated through scientific argumentation, which depends on critical and logical thinking, and the active consideration of alternative scientific explanations to explain the data presented.
SC.912.N.1.4:	Identify sources of information and assess their reliability according to the strict standards of scientific investigation.
SC.912.N.1.6:	Describe how scientific inferences are drawn from scientific observations and provide examples from the content being studied.
SC.912.N.2.1:	Identify what is science, what clearly is not science, and what superficially resembles science (but fails to meet the criteria for science).
SC.912.N.2.2:	Identify which questions can be answered through science and which questions are outside the boundaries of scientific investigation, such as questions addressed by other ways of knowing, such as art, philosophy, and religion.
SC.912.N.2.4:	Explain that scientific knowledge is both durable and robust and open to change. Scientific knowledge can change because it is often examined and re-examined by new investigations and scientific argumentation. Because of these frequent examinations, scientific knowledge becomes stronger, leading to its durability.
SC.912.N.3.1:	Explain that a scientific theory is the culmination of many scientific investigations drawing together all the current evidence concerning a substantial range of phenomena; thus, a scientific theory represents the most powerful explanation scientists have to offer.
SC.912.N.3.4:	Recognize that theories do not become laws, nor do laws become theories; theories are well supported explanations and laws are well supported descriptions.
SC.912.P.8.7:	Interpret formula representations of molecules and compounds in terms of composition and structure.
SC.912.P.10.1:	Differentiate among the various forms of energy and recognize that they can be transformed from one form to others.
LAFS.910.RST.1.1:	Cite specific textual evidence to support analysis of science and technical texts, attending to the precise details of explanations or descriptions.
LAFS.910.RST.1.2:	Determine the central ideas or conclusions of a text; trace the text's explanation or depiction of a complex process, phenomenon, or concept; provide an accurate summary of the text.
LAFS.910.RST.1.3:	Follow precisely a complex multistep procedure when carrying out experiments, taking measurements, or performing technical tasks, attending to special cases or exceptions defined in the text.
LAFS.910.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 9–10 texts and topics.
LAFS.910.RST.2.5:	Analyze the structure of the relationships among concepts in a text, including relationships among key terms (e.g., force, friction, reaction force, energy).
LAFS.910.RST.2.6:	Analyze the author's purpose in providing an explanation, describing a procedure, or discussing an experiment in a text, defining the question the author seeks to address.
LAFS.910.RST.3.7:	Translate quantitative or technical information expressed in words in a text into visual form (e.g., a table or chart) and translate information expressed visually or mathematically (e.g., in an equation) into words.
LAFS.910.RST.3.8:	Assess the extent to which the reasoning and evidence in a text support the author's claim or a recommendation for solving a scientific or technical problem.
LAFS.910.RST.3.9:	Compare and contrast findings presented in a text to those from other sources (including their own experiments), noting when the findings support or contradict previous explanations or accounts.
LAFS.910.RST.4.10:	By the end of grade 10, read and comprehend science/technical texts in the grades 9–10 text complexity band independently and proficiently.
	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.

LAFS.910.SL.1.1:	b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.
LAFS.910.SL.1.2:	Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.
LAFS.910.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.
LAFS.910.SL.2.4:	Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.
LAFS.910.SL.2.5:	Make strategic use of digital media (e.g., textual, graphical, audio, visual, and interactive elements) in presentations to enhance understanding of findings, reasoning, and evidence and to add interest.
LAFS.910.WHST.1.1:	Write arguments focused on *discipline-specific content.* a. Introduce precise claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that establishes clear relationships among the claim(s), counterclaims, reasons, and evidence. b. Develop claim(s) and counterclaims fairly, supplying data and evidence for each while pointing out the strengths and limitations of both claim(s) and counterclaims in a discipline-appropriate form and in a manner that anticipates the audience's knowledge level and concerns. c. Use words, phrases, and clauses to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims. d. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. e. Provide a concluding statement or section that follows from or supports the argument presented.
LAFS.910.WHST.1.2:	Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes. a. Introduce a topic and organize ideas, concepts, and information to make important connections and distinctions; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension. b. Develop the topic with well-chosen, relevant, and sufficient facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic. c. Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among ideas and concepts. d. Use precise language and domain-specific vocabulary to manage the complexity of the topic and convey a style appropriate to the discipline and context as well as to the expertise of likely readers. e. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. f. Provide a concluding statement or section that follows from and supports the information or explanation presented (e.g., articulating implications or the significance of the topic).
LAFS.910.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.910.WHST.2.5:	Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.
LAFS.910.WHST.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibly and dynamically.
LAFS.910.WHST.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.910.WHST.3.8:	Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the usefulness of each source in answering the research question; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and following a standard format for citation.
LAFS.910.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.910.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
MAFS.912.F-IF.2.4:	For a function that models a relationship between two quantities, interpret key features of graphs and tables in terms of the quantities, and sketch graphs showing key features given a verbal description of the relationship. *Key features include: intercepts; intervals where the function is increasing, decreasing, positive, or negative; relative maximums and minimums; symmetries; end behavior; and periodicity.* ★
MAFS.912.F-IF.3.7:	Graph functions expressed symbolically and show key features of the graph, by hand in simple cases and using technology for more complicated cases. ★ a. Graph linear and quadratic functions and show intercepts, maxima, and minima. b. Graph square root, cube root, and piecewise-defined functions, including step functions and absolute value functions. c. Graph polynomial functions, identifying zeros when suitable factorizations are available, and showing end behavior. d. Graph rational functions, identifying zeros and asymptotes when suitable factorizations are available, and showing end behavior. e. Graph exponential and logarithmic functions, showing intercepts and end behavior, and trigonometric functions, showing period, midline, and amplitude, and using phase shift.
MAFS.912.G-MG.1.2:	Apply concepts of density based on area and volume in modeling situations (e.g., persons per square mile, BTUs per cubic foot). ★
MAFS.912.N-Q.1.1:	Use units as a way to understand problems and to guide the solution of multi-step problems; choose and interpret units consistently in formulas; choose and interpret the scale and the origin in graphs and data displays. ★
MAFS.912.N-Q.1.3:	Choose a level of accuracy appropriate to limitations on measurement when reporting quantities. ★
MAFS.912.S-IC.2.6:	Evaluate reports based on data. ★
MAFS.912.S-ID.1.1:	Represent data with plots on the real number line (dot plots, histograms, and box plots). ★ **Clarifications:** In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

MAFS.912.S-ID.1.2:	Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★ **Clarifications:** In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.
MAFS.912.S-ID.1.3:	Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers). ★ **Clarifications:** In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.
MAFS.912.S-ID.1.4:	Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve. ★
MAFS.912.S-ID.2.5:	Summarize categorical data for two categories in two-way frequency tables. Interpret relative frequencies in the context of the data (including joint, marginal, and conditional relative frequencies). Recognize possible associations and trends in the data. ★
MAFS.K12.MP.1.1:	**Make sense of problems and persevere in solving them.** Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches. **Standard Relation to Course: Supporting**
MAFS.K12.MP.2.1:	**Reason abstractly and quantitatively**. Mathematically proficient students make sense of quantities and their relationships in problem situations. They bring two complementary abilities to bear on problems involving quantitative relationships: the ability to decontextualize—to abstract a given situation and represent it symbolically and manipulate the representing symbols as if they have a life of their own, without necessarily attending to their referents—and the ability to contextualize, to pause as needed during the manipulation process in order to probe into the referents for the symbols involved. Quantitative reasoning entails habits of creating a coherent representation of the problem at hand; considering the units involved; attending to the meaning of quantities, not just how to compute them; and knowing and flexibly using different properties of operations and objects. **Standard Relation to Course: Supporting**
MAFS.K12.MP.3.1:	**Construct viable arguments and critique the reasoning of others.** Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments. **Standard Relation to Course: Supporting**
MAFS.K12.MP.4.1:	**Model with mathematics.** Mathematically proficient students can apply the mathematics they know to solve problems arising in everyday life, society, and the workplace. In early grades, this might be as simple as writing an addition equation to describe a situation. In middle grades, a student might apply proportional reasoning to plan a school event or analyze a problem in the community. By high school, a student might use geometry to solve a design problem or use a function to describe how one quantity of interest depends on another. Mathematically proficient students who can apply what they know are comfortable making assumptions and approximations to simplify a complicated situation, realizing that these may need revision later. They are able to identify important quantities in a practical situation and map their relationships using such tools as diagrams, two-way tables, graphs, flowcharts and formulas. They can analyze those relationships mathematically to draw conclusions. They routinely interpret their mathematical results in the context of the situation and reflect on whether the results make sense, possibly improving the model if it has not served its purpose. **Standard Relation to Course: Supporting**
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently,

	express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 – 3(x – y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
MAFS.K12.MP.8.1:	**Look for and express regularity in repeated reasoning.** Mathematically proficient students notice if calculations are repeated, and look both for general methods and for shortcuts. Upper elementary students might notice when dividing 25 by 11 that they are repeating the same calculations over and over again, and conclude they have a repeating decimal. By paying attention to the calculation of slope as they repeatedly check whether points are on the line through (1, 2) with slope 3, middle school students might abstract the equation $(y – 2)/(x – 1) = 3$. Noticing the regularity in the way terms cancel when expanding $(x – 1)(x + 1)$, $(x – 1)(x^2 + x + 1)$, and $(x – 1)(x^3 + x^2 + x + 1)$ might lead them to the general formula for the sum of a geometric series. As they work to solve a problem, mathematically proficient students maintain oversight of the process, while attending to the details. They continually evaluate the reasonableness of their intermediate results. **Standard Relation to Course: Supporting**
HE.912.C.1.3:	Evaluate how environment and personal health are interrelated. **Clarifications:** Food options within a community; prenatal-care services; availability of recreational facilities; air quality; weather-safety awareness; and weather, air, and water conditions.
HE.912.C.1.5:	Analyze strategies for prevention, detection, and treatment of communicable and chronic diseases. **Clarifications:** Health prevention, detection, and treatment of: breast and testicular cancer, suicide, obesity, and industrial-related chronic disease.
HE.912.C.1.7:	Analyze how heredity and family history can impact personal health. **Clarifications:** Drug use, family obesity, heart disease, mental health, and non-communicable illness or disease.
HE.912.C.1.8:	Assess the degree of susceptibility to injury, illness, or death if engaging in unhealthy/risky behaviors. **Clarifications:** Risks associated with alcohol abuse, including poison, date rape, and death; cancer and chronic lung disease related to tobacco use; overdose from drug use; child abuse or neglect; and dating violence.
ELD.K12.ELL.SC.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Science.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

GENERAL NOTES

While the content focus of this course is consistent with the Biology I course, students will explore these concepts in greater depth. In general, the academic pace and rigor will be greatly increased for honors level course work. Laboratory investigations that include the use of scientific inquiry, research, measurement, problem solving, laboratory apparatus and technologies, experimental procedures, and safety procedures are an integral part of this course. The National Science Teachers Association (NSTA) recommends that at the high school level, all students should be in the science lab or field, collecting data every week. School laboratory investigations (labs) are defined by the National Research Council (NRC) as an experience in the laboratory, classroom, or the field that provides students with opportunities to interact directly with natural phenomena or with data collected by others using tools, materials, data collection techniques, and models (NRC, 2006, p. 3). Laboratory investigations in the high school classroom should help all students develop a growing understanding of the complexity and ambiguity of empirical work, as well as the skills to calibrate and troubleshoot equipment used to make observations. Learners should understand measurement error; and have the skills to aggregate, interpret, and present the resulting data (National Research Council, 2006, p.77; NSTA, 2007).

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Special Notes:

Instructional Practices
Teaching from a range of complex text is optimized when teachers in all subject areas implement the following strategies on a routine basis:

1. Ensuring wide reading from complex text that varies in length.
2. Making close reading and rereading of texts central to lessons.
3. Emphasizing text-specific complex questions, and cognitively complex tasks, reinforce focus on the text and cultivate independence.
4. Emphasizing students supporting answers based upon evidence from the text.
5. Providing extensive research and writing opportunities (claims and evidence).

Science and Engineering Practices (NRC *Framework for K-12 Science Education, 2010*)

- Asking questions (for science) and defining problems (for engineering).
- Developing and using models.
- Planning and carrying out investigations.
- Analyzing and interpreting data.
- Using mathematics, information and computer technology, and computational thinking.
- Constructing explanations (for science) and designing solutions (for engineering).
- Engaging in argument from evidence.
- Obtaining, evaluating, and communicating information.

Literacy Standards in Science

Secondary science courses include reading standards for literacy in science and technical subjects 6-12 and writing standards for literacy in history/social studies, science, and technical subjects 6-12. The courses also include speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Science. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SC.pdf

Additional Instructional Resources:

A.V.E. for Success Collection is provided by the Florida Association of School Administrators: fasa.net/4DCGI/cms/review.html?Action=CMS_Document&DocID=139. Please be aware that these resources have not been reviewed by CPALMS and there may be a charge for the use of some of them in this collection.

GENERAL INFORMATION

Course Number: 2000320

Number of Credits: One (1) credit

Course Type: Core Academic Course

Course Status: Draft - Course Pending Approval

Grade Level(s): 9,10,11,12

Graduation Requirement: Biology

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 9 to 12 and Adult Education Courses > **Subject:** Science > **SubSubject:** Biological Sciences >

Abbreviated Title: BIO 1 HON

Course Length: Year (Y)

Course Attributes:

- Honors
- Class Size Core Required

Course Level: 3

Educator Certifications

Science (Secondary Grades 7-12)
Biology (Grades 6-12)
Middle Grades General Science (Middle Grades 5-9)

Equivalent Courses

2000310-Biology 1

Cambridge AICE Biology 1 AS Level (#2000321) 2018 - And Beyond

(current)

Course Standards

Name	Description
SC.912.L.14.6:	Explain the significance of genetic factors, environmental factors, and pathogenic agents to health from the perspectives of both individual and public health.
SC.912.L.14.8:	Explain alternation of generations in plants.
SC.912.L.14.9:	Relate the major structure of fungi to their functions.
SC.912.L.14.50:	Describe the structure of vertebrate sensory organs. Relate structure to function in vertebrate sensory systems.
SC.912.L.14.53:	Discuss basic classification and characteristics of plants. Identify bryophytes, pteridophytes, gymnosperms, and angiosperms.
SC.912.L.15.1:	Explain how the scientific theory of evolution is supported by the fossil record, comparative anatomy, comparative embryology, biogeography, molecular biology, and observed evolutionary change.
SC.912.L.15.4:	Describe how and why organisms are hierarchically classified and based on evolutionary relationships.
SC.912.L.15.5:	Explain the reasons for changes in how organisms are classified.
SC.912.L.15.7:	Discuss distinguishing characteristics of vertebrate and representative invertebrate phyla, and chordate classes using typical examples.
SC.912.L.15.8:	Describe the scientific explanations of the origin of life on Earth.
SC.912.L.15.9:	Explain the role of reproductive isolation in the process of speciation.
SC.912.L.15.11:	Discuss specific fossil hominids and what they show about human evolution.
SC.912.L.16.6:	Discuss the mechanisms for regulation of gene expression in prokaryotes and eukaryotes at transcription and translation level.
SC.912.L.16.7:	Describe how viruses and bacteria transfer genetic material between cells and the role of this process in biotechnology.
SC.912.L.16.11:	Discuss the technologies associated with forensic medicine and DNA identification, including restriction fragment length polymorphism (RFLP) analysis.
SC.912.L.16.12:	Describe how basic DNA technology (restriction digestion by endonucleases, gel electrophoresis, polymerase chain reaction, ligation, and transformation) is used to construct recombinant DNA molecules (DNA cloning).
SC.912.L.16.15:	Compare and contrast binary fission and mitotic cell division.
SC.912.L.17.1:	Discuss the characteristics of populations, such as number of individuals, age structure, density, and pattern of distribution.
SC.912.L.17.3:	Discuss how various oceanic and freshwater processes, such as currents, tides, and waves, affect the abundance of aquatic organisms.
SC.912.L.17.6:	Compare and contrast the relationships among organisms, including predation, parasitism, competition, commensalism, and mutualism.
SC.912.L.17.7:	Characterize the biotic and abiotic components that define freshwater systems, marine systems and terrestrial systems.
SC.912.L.17.8:	Recognize the consequences of the losses of biodiversity due to catastrophic events, climate changes, human activity, and the introduction of invasive, non-native species.
SC.912.L.17.9:	Use a food web to identify and distinguish producers, consumers, and decomposers. Explain the pathway of energy transfer through trophic levels and the reduction of available energy at successive trophic levels.
SC.912.L.17.10:	Diagram and explain the biogeochemical cycles of an ecosystem, including water, carbon, and nitrogen cycle.
SC.912.L.17.11:	Evaluate the costs and benefits of renewable and nonrenewable resources, such as water, energy, fossil fuels, wildlife, and forests.
SC.912.L.17.12:	Discuss the political, social, and environmental consequences of sustainable use of land.
SC.912.L.17.13:	Discuss the need for adequate monitoring of environmental parameters when making policy decisions.
SC.912.L.17.14:	Assess the need for adequate waste management strategies.
SC.912.L.17.15:	Discuss the effects of technology on environmental quality.
SC.912.L.17.16:	Discuss the large-scale environmental impacts resulting from human activity, including waste spills, oil spills, runoff, greenhouse gases, ozone depletion, and surface and groundwater pollution.
SC.912.L.17.17:	Assess the effectiveness of innovative methods of protecting the environment.
SC.912.L.17.18:	Describe how human population size and resource use relate to environmental quality.
SC.912.L.17.19:	Describe how different natural resources are produced and how their rates of use and renewal limit availability.
SC.912.L.17.20:	Predict the impact of individuals on environmental systems and examine how human lifestyles affect sustainability.
SC.912.L.18.1:	Describe the basic molecular structures and primary functions of the four major categories of biological macromolecules.
SC.912.L.18.5:	Discuss the use of chemiosmotic gradients for ATP production in chloroplasts and mitochondria.
SC.912.L.18.7:	Identify the reactants, products, and basic functions of photosynthesis.
SC.912.L.18.8:	Identify the reactants, products, and basic functions of aerobic and anaerobic cellular respiration.
SC.912.L.18.9:	Explain the interrelated nature of photosynthesis and cellular respiration.
SC.912.L.18.10:	Connect the role of adenosine triphosphate (ATP) to energy transfers within a cell.
SC.912.L.18.11:	Explain the role of enzymes as catalysts that lower the activation energy of biochemical reactions. Identify factors, such as pH and temperature, and their effect on enzyme activity.
SC.912.L.18.12:	Discuss the special properties of water that contribute to Earth's suitability as an environment for life: cohesive behavior, ability to moderate temperature, expansion upon freezing, and versatility as a solvent.
SC.912.N.1.1:	Define a problem based on a specific body of knowledge, for example: biology, chemistry, physics, and earth/space science, and do the following: 1. **Pose questions about the natural world,** (Articulate the purpose of the investigation and identify the relevant scientific concepts). 2. **Conduct systematic observations,** (Write procedures that are clear and replicable. Identify observables and examine relationships between test (independent) variable and outcome (dependent) variable. Employ appropriate methods for accurate and consistent observations; conduct and record measurements at appropriate levels of precision. Follow safety guidelines). 3. **Examine books and other sources of information to see what is already known,** 4. **Review what is known in light of empirical evidence,** (Examine whether available empirical evidence can be interpreted in terms of existing knowledge and models, and if not, modify or develop new models). 5. **Plan investigations,** (Design and evaluate a scientific investigation). 6. **Use tools to gather, analyze, and interpret data (this includes the use of measurement in metric and other systems, and also the generation and interpretation of graphical representations of data, including data tables and graphs),** (Collect data or evidence in an

	organized way. Properly use instruments, equipment, and materials (e.g., scales, probeware, meter sticks, microscopes, computers) including set-up, calibration, technique, maintenance, and storage). 7. **Pose answers, explanations, or descriptions of events,** 8. **Generate explanations that explicate or describe natural phenomena (inferences),** 9. **Use appropriate evidence and reasoning to justify these explanations to others,** 10. **Communicate results of scientific investigations, and** 11. **Evaluate the merits of the explanations produced by others.**
SC.912.N.1.4:	Identify sources of information and assess their reliability according to the strict standards of scientific investigation.
SC.912.N.1.5:	Describe and provide examples of how similar investigations conducted in many parts of the world result in the same outcome.
SC.912.N.1.7:	Recognize the role of creativity in constructing scientific questions, methods and explanations.
SC.912.N.2.1:	Identify what is science, what clearly is not science, and what superficially resembles science (but fails to meet the criteria for science).
SC.912.N.2.2:	Identify which questions can be answered through science and which questions are outside the boundaries of scientific investigation, such as questions addressed by other ways of knowing, such as art, philosophy, and religion.
SC.912.N.2.4:	Explain that scientific knowledge is both durable and robust and open to change. Scientific knowledge can change because it is often examined and re-examined by new investigations and scientific argumentation. Because of these frequent examinations, scientific knowledge becomes stronger, leading to its durability.
SC.912.N.2.5:	Describe instances in which scientists' varied backgrounds, talents, interests, and goals influence the inferences and thus the explanations that they make about observations of natural phenomena and describe that competing interpretations (explanations) of scientists are a strength of science as they are a source of new, testable ideas that have the potential to add new evidence to support one or another of the explanations.
SC.912.N.3.1:	Explain that a scientific theory is the culmination of many scientific investigations drawing together all the current evidence concerning a substantial range of phenomena; thus, a scientific theory represents the most powerful explanation scientists have to offer.
SC.912.N.3.2:	Describe the role consensus plays in the historical development of a theory in any one of the disciplines of science.
SC.912.N.4.2:	Weigh the merits of alternative strategies for solving a specific societal problem by comparing a number of different costs and benefits, such as human, economic, and environmental.
SC.912.P.8.10:	Describe oxidation-reduction reactions in living and non-living systems.
SC.912.P.10.1:	Differentiate among the various forms of energy and recognize that they can be transformed from one form to others.
LAFS.1112.RST.1.1:	Cite specific textual evidence to support analysis of science and technical texts, attending to important distinctions the author makes and to any gaps or inconsistencies in the account.
LAFS.1112.RST.1.2:	Determine the central ideas or conclusions of a text; summarize complex concepts, processes, or information presented in a text by paraphrasing them in simpler but still accurate terms.
LAFS.1112.RST.1.3:	Follow precisely a complex multistep procedure when carrying out experiments, taking measurements, or performing technical tasks; analyze the specific results based on explanations in the text.
LAFS.1112.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics.
LAFS.1112.RST.2.5:	Analyze how the text structures information or ideas into categories or hierarchies, demonstrating understanding of the information or ideas.
LAFS.1112.RST.2.6:	Analyze the author's purpose in providing an explanation, describing a procedure, or discussing an experiment in a text, identifying important issues that remain unresolved.
LAFS.1112.RST.3.7:	Integrate and evaluate multiple sources of information presented in diverse formats and media (e.g., quantitative data, video, multimedia) in order to address a question or solve a problem.
LAFS.1112.RST.3.8:	Evaluate the hypotheses, data, analysis, and conclusions in a science or technical text, verifying the data when possible and corroborating or challenging conclusions with other sources of information.
LAFS.1112.RST.3.9:	Synthesize information from a range of sources (e.g., texts, experiments, simulations) into a coherent understanding of a process, phenomenon, or concept, resolving conflicting information when possible.
LAFS.1112.RST.4.10:	By the end of grade 12, read and comprehend science/technical texts in the grades 11–12 text complexity band independently and proficiently.
LAFS.1112.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed. c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives. d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task.
LAFS.1112.SL.1.2:	Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.
LAFS.1112.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.
LAFS.1112.SL.2.4:	Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.
LAFS.1112.SL.2.5:	Make strategic use of digital media (e.g., textual, graphical, audio, visual, and interactive elements) in presentations to enhance understanding of findings, reasoning, and evidence and to add interest.
LAFS.1112.WHST.1.1:	Write arguments focused on *discipline-specific content.* a. Introduce precise, knowledgeable claim(s), establish the significance of the claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that logically sequences the claim(s), counterclaims, reasons, and evidence. b. Develop claim(s) and counterclaims fairly and thoroughly, supplying the most relevant data and evidence for each while pointing out the strengths and limitations of both claim(s) and counterclaims in a discipline-appropriate form that anticipates the audience's knowledge level, concerns, values, and possible biases. c. Use words, phrases, and clauses as well as varied syntax to link the major sections of the text, create cohesion, and clarify the relationships

	between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims. d. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. e. Provide a concluding statement or section that follows from or supports the argument presented.
LAFS.1112.WHST.1.2:	Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes. a. Introduce a topic and organize complex ideas, concepts, and information so that each new element builds on that which precedes it to create a unified whole; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension. b. Develop the topic thoroughly by selecting the most significant and relevant facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic. c. Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among complex ideas and concepts. d. Use precise language, domain-specific vocabulary and techniques such as metaphor, simile, and analogy to manage the complexity of the topic; convey a knowledgeable stance in a style that responds to the discipline and context as well as to the expertise of likely readers. e. Provide a concluding statement or section that follows from and supports the information or explanation provided (e.g., articulating implications or the significance of the topic).
LAFS.1112.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.1112.WHST.2.5:	Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.
LAFS.1112.WHST.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products in response to ongoing feedback, including new arguments or information.
LAFS.1112.WHST.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.1112.WHST.3.8:	Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the strengths and limitations of each source in terms of the specific task, purpose, and audience; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and overreliance on any one source and following a standard format for citation.
LAFS.1112.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.1112.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
MAFS.912.F-IF.2.4:	For a function that models a relationship between two quantities, interpret key features of graphs and tables in terms of the quantities, and sketch graphs showing key features given a verbal description of the relationship. *Key features include: intercepts; intervals where the function is increasing, decreasing, positive, or negative; relative maximums and minimums; symmetries; end behavior; and periodicity.* ★
MAFS.912.F-IF.3.7:	Graph functions expressed symbolically and show key features of the graph, by hand in simple cases and using technology for more complicated cases. ★ a. Graph linear and quadratic functions and show intercepts, maxima, and minima. b. Graph square root, cube root, and piecewise-defined functions, including step functions and absolute value functions. c. Graph polynomial functions, identifying zeros when suitable factorizations are available, and showing end behavior. d. Graph rational functions, identifying zeros and asymptotes when suitable factorizations are available, and showing end behavior. e. Graph exponential and logarithmic functions, showing intercepts and end behavior, and trigonometric functions, showing period, midline, and amplitude, and using phase shift.
MAFS.912.G-MG.1.2:	Apply concepts of density based on area and volume in modeling situations (e.g., persons per square mile, BTUs per cubic foot). ★
MAFS.912.N-Q.1.1:	Use units as a way to understand problems and to guide the solution of multi-step problems; choose and interpret units consistently in formulas; choose and interpret the scale and the origin in graphs and data displays. ★
MAFS.912.N-Q.1.3:	Choose a level of accuracy appropriate to limitations on measurement when reporting quantities. ★
MAFS.912.S-IC.2.6:	Evaluate reports based on data. ★
MAFS.912.S-ID.1.1:	Represent data with plots on the real number line (dot plots, histograms, and box plots). ★ **Clarifications:** In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.
MAFS.912.S-ID.1.2:	Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★ **Clarifications:** In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.
MAFS.912.S-ID.1.3:	Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers). ★ **Clarifications:** In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.
MAFS.912.S-ID.1.4:	Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve. ★
MAFS.912.S-ID.2.5:	Summarize categorical data for two categories in two-way frequency tables. Interpret relative frequencies in the context of the data (including joint, marginal, and conditional relative frequencies). Recognize possible associations and trends in the data. ★
MAFS.912.S-ID.2.6:	Represent data on two quantitative variables on a scatter plot, and describe how the variables are related. ★ a. Fit a function to the data; use functions fitted to data to solve problems in the context of the data. *Use given functions or choose a function suggested by the context. Emphasize linear, and exponential models.* b. Informally assess the fit of a function by plotting and analyzing residuals. c. Fit a linear function for a scatter plot that suggests a linear association. **Clarifications:**

	Students take a more sophisticated look at using a linear function to model the relationship between two numerical variables. In addition to fitting a line to data, students assess how well the model fits by analyzing residuals.
MAFS.K12.MP.1.1:	**Make sense of problems and persevere in solving them.** Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches. **Standard Relation to Course: Supporting**
MAFS.K12.MP.2.1:	**Reason abstractly and quantitatively**. Mathematically proficient students make sense of quantities and their relationships in problem situations. They bring two complementary abilities to bear on problems involving quantitative relationships: the ability to decontextualize—to abstract a given situation and represent it symbolically and manipulate the representing symbols as if they have a life of their own, without necessarily attending to their referents—and the ability to contextualize, to pause as needed during the manipulation process in order to probe into the referents for the symbols involved. Quantitative reasoning entails habits of creating a coherent representation of the problem at hand; considering the units involved; attending to the meaning of quantities, not just how to compute them; and knowing and flexibly using different properties of operations and objects. **Standard Relation to Course: Supporting**
MAFS.K12.MP.3.1:	**Construct viable arguments and critique the reasoning of others.** Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments. **Standard Relation to Course: Supporting**
MAFS.K12.MP.4.1:	**Model with mathematics.** Mathematically proficient students can apply the mathematics they know to solve problems arising in everyday life, society, and the workplace. In early grades, this might be as simple as writing an addition equation to describe a situation. In middle grades, a student might apply proportional reasoning to plan a school event or analyze a problem in the community. By high school, a student might use geometry to solve a design problem or use a function to describe how one quantity of interest depends on another. Mathematically proficient students who can apply what they know are comfortable making assumptions and approximations to simplify a complicated situation, realizing that these may need revision later. They are able to identify important quantities in a practical situation and map their relationships using such tools as diagrams, two-way tables, graphs, flowcharts and formulas. They can analyze those relationships mathematically to draw conclusions. They routinely interpret their mathematical results in the context of the situation and reflect on whether the results make sense, possibly improving the model if it has not served its purpose. **Standard Relation to Course: Supporting**
MAFS.K12.MP.5.1:	**Use appropriate tools strategically.** Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts. **Standard Relation to Course: Supporting**
MAFS.K12.MP.6.1:	**Attend to precision.** Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions. **Standard Relation to Course: Supporting**
MAFS.K12.MP.7.1:	**Look for and make use of structure.** Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x^2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x$

	– y)² as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y. **Standard Relation to Course: Supporting**
MAFS.K12.MP.8.1:	**Look for and express regularity in repeated reasoning.** Mathematically proficient students notice if calculations are repeated, and look both for general methods and for shortcuts. Upper elementary students might notice when dividing 25 by 11 that they are repeating the same calculations over and over again, and conclude they have a repeating decimal. By paying attention to the calculation of slope as they repeatedly check whether points are on the line through (1, 2) with slope 3, middle school students might abstract the equation $(y – 2)/(x – 1) = 3$. Noticing the regularity in the way terms cancel when expanding $(x – 1)(x + 1)$, $(x – 1)(x^2 + x + 1)$, and $(x – 1)(x^3 + x^2 + x + 1)$ might lead them to the general formula for the sum of a geometric series. As they work to solve a problem, mathematically proficient students maintain oversight of the process, while attending to the details. They continually evaluate the reasonableness of their intermediate results. **Standard Relation to Course: Supporting**
HE.912.C.1.3:	Evaluate how environment and personal health are interrelated. **Clarifications:** Food options within a community; prenatal-care services; availability of recreational facilities; air quality; weather-safety awareness; and weather, air, and water conditions.
HE.912.C.1.5:	Analyze strategies for prevention, detection, and treatment of communicable and chronic diseases. **Clarifications:** Health prevention, detection, and treatment of: breast and testicular cancer, suicide, obesity, and industrial-related chronic disease.
HE.912.C.1.7:	Analyze how heredity and family history can impact personal health. **Clarifications:** Drug use, family obesity, heart disease, mental health, and non-communicable illness or disease.
ELD.K12.ELL.SC.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Science.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

GENERAL NOTES

Laboratory investigations that include the use of scientific inquiry, research, measurement, problem solving, laboratory apparatus and technologies, experimental procedures, and safety procedures are an integral part of this course. The National Science Teachers Association (NSTA) recommends that at the high school level, all students should be in the science lab or field, collecting data every week. School laboratory investigations (labs) are defined by the National Research Council (NRC) as an experience in the laboratory, classroom, or the field that provides students with opportunities to interact directly with natural phenomena or with data collected by others using tools, materials, data collection techniques, and models (NRC, 2006, p. 3). Laboratory investigations in the high school classroom should help all students develop a growing understanding of the complexity and ambiguity of empirical work, as well as the skills to calibrate and troubleshoot equipment used to make observations. Learners should understand measurement error; and have the skills to aggregate, interpret, and present the resulting data (National Research Council, 2006, p.77; NSTA, 2007).

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Special Notes:
Instructional Practices
Teaching from a range of complex text is optimized when teachers in all subject areas implement the following strategies on a routine basis:

1. Ensuring wide reading from complex text that varies in length.
2. Making close reading and rereading of texts central to lessons.
3. Emphasizing text-specific complex questions, and cognitively complex tasks, reinforce focus on the text and cultivate independence.
4. Emphasizing students supporting answers based upon evidence from the text.
5. Providing extensive research and writing opportunities (claims and evidence).

Science and Engineering Practices (NRC *Framework for K-12 Science Education, 2010*)

- Asking questions (for science) and defining problems (for engineering).
- Developing and using models.
- Planning and carrying out investigations.
- Analyzing and interpreting data.
- Using mathematics, information and computer technology, and computational thinking.
- Constructing explanations (for science) and designing solutions (for engineering).
- Engaging in argument from evidence.
- Obtaining, evaluating, and communicating information.

Literacy Standards in Science
Secondary science courses include reading standards for literacy in science and technical subjects 6-12 and writing standards for literacy in history/social studies, science, and technical subjects 6-12. The courses also include speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:
Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Science. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success The ELD standard should specify a

relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: cpalms.org/uploads/docs/standards/eld/SC.pdf

GENERAL INFORMATION

Course Number: 2000330

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 9 to 12 and Adult Education Courses > **Subject:** Science > **SubSubject:** Biological Sciences >

Abbreviated Title: BIO 2 HON

Number of Credits: One (1) credit

Course Length: Year (Y)

Course Attributes:

- Honors

Course Type: Core Academic Course

Course Level: 3

Course Status: Draft - Course Pending Approval

Grade Level(s): 9,10,11,12

Graduation Requirement: District-Determined

Educator Certifications

Science (Secondary Grades 7-12)
Biology (Grades 6-12)

Pre-Advanced Placement Biology (#2000335) 2018 - And Beyond (current)

General Course Information and Notes

VERSION DESCRIPTION

The course description for this Pre-Advanced Placement (Pre-AP) course is located on the College Board site at pre-ap.collegeboard.org/courses.

GENERAL INFORMATION

Course Number: 2000335

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 9 to 12 and Adult Education Courses > **Subject:** Science > **SubSubject:** Biological Sciences > **Abbreviated Title:** PRE-AP BIOLOGY

Number of Credits: One (1) credit

Course Length: Year (Y)

Course Attributes:

- Honors

Course Type: Elective Course

Course Level: 3

Course Status: Course Approved

Grade Level(s): 9

Educator Certifications

Biology (Grades 6-12)
Middle Grades General Science (Middle Grades 5-9)

Anatomy and Physiology (#2000350) 2015 - 2022 (current)

Course Standards

Name	Description
SC.912.L.14.11:	Classify and state the defining characteristics of epithelial tissue, connective tissue, muscle tissue, and nervous tissue.
SC.912.L.14.12:	Describe the anatomy and histology of bone tissue.
SC.912.L.14.13:	Distinguish between bones of the axial skeleton and the appendicular skeleton.
SC.912.L.14.14:	Identify the major bones of the axial and appendicular skeleton.
SC.912.L.14.16:	Describe the anatomy and histology, including ultrastructure, of muscle tissue.
SC.912.L.14.17:	List the steps involved in the sliding filament of muscle contraction.
SC.912.L.14.18:	Describe signal transmission across a myoneural junction.
SC.912.L.14.20:	Identify the major muscles of the human on a model or diagram.
SC.912.L.14.21:	Describe the anatomy, histology, and physiology of the central and peripheral nervous systems and name the major divisions of the nervous system.
SC.912.L.14.23:	Identify the parts of a reflex arc.
SC.912.L.14.24:	Identify the general parts of a synapse and describe the physiology of signal transmission across a synapse.
SC.912.L.14.25:	Identify the major parts of a cross section through the spinal cord.
SC.912.L.14.26:	Identify the major parts of the brain on diagrams or models.
SC.912.L.14.28:	Identify the major functions of the spinal cord.
SC.912.L.14.29:	Define the terms endocrine and exocrine.
SC.912.L.14.30:	Compare endocrine and neural controls of physiology.
SC.912.L.14.32:	Describe the anatomy and physiology of the endocrine system.
SC.912.L.14.33:	Describe the basic anatomy and physiology of the reproductive system.
SC.912.L.14.34:	Describe the composition and physiology of blood, including that of the plasma and the formed elements.
SC.912.L.14.35:	Describe the steps in hemostasis, including the mechanism of coagulation. Include the basis for blood typing and transfusion reactions.
SC.912.L.14.36:	Describe the factors affecting blood flow through the cardiovascular system.
SC.912.L.14.38:	Describe normal heart sounds and what they mean.
SC.912.L.14.39:	Describe hypertension and some of the factors that produce it.
SC.912.L.14.41:	Describe fetal circulation and changes that occur to the circulatory system at birth.
SC.912.L.14.42:	Describe the anatomy and the physiology of the lymph system.
SC.912.L.14.44:	Describe the physiology of the respiratory system including the mechanisms of ventilation, gas exchange, gas transport and the mechanisms that control the rate of ventilation.
SC.912.L.14.46:	Describe the physiology of the digestive system, including mechanical digestion, chemical digestion, absorption and the neural and hormonal mechanisms of control.
SC.912.L.14.47:	Describe the physiology of urine formation by the kidney.
SC.912.L.14.49:	Identify the major functions associated with the sympathetic and parasympathetic nervous systems.
SC.912.L.14.50:	Describe the structure of vertebrate sensory organs. Relate structure to function in vertebrate sensory systems.
SC.912.L.14.51:	Describe the function of the vertebrate integumentary system.
SC.912.L.14.52:	Explain the basic functions of the human immune system, including specific and nonspecific immune response, vaccines, and antibiotics.
SC.912.L.16.8:	Explain the relationship between mutation, cell cycle, and uncontrolled cell growth potentially resulting in cancer.
SC.912.L.18.1:	Describe the basic molecular structures and primary functions of the four major categories of biological macromolecules.
SC.912.L.18.11:	Explain the role of enzymes as catalysts that lower the activation energy of biochemical reactions. Identify factors, such as pH and temperature, and their effect on enzyme activity.
SC.912.N.1.1:	Define a problem based on a specific body of knowledge, for example: biology, chemistry, physics, and earth/space science, and do the following: 1. **Pose questions about the natural world,** (Articulate the purpose of the investigation and identify the relevant scientific concepts). 2. **Conduct systematic observations,** (Write procedures that are clear and replicable. Identify observables and examine relationships between test (independent) variable and outcome (dependent) variable. Employ appropriate methods for accurate and consistent observations; conduct and record measurements at appropriate levels of precision. Follow safety guidelines). 3. **Examine books and other sources of information to see what is already known,** 4. **Review what is known in light of empirical evidence,** (Examine whether available empirical evidence can be interpreted in terms of existing knowledge and models, and if not, modify or develop new models). 5. **Plan investigations,** (Design and evaluate a scientific investigation). 6. **Use tools to gather, analyze, and interpret data (this includes the use of measurement in metric and other systems, and also the generation and interpretation of graphical representations of data, including data tables and graphs),** (Collect data or evidence in an organized way. Properly use instruments, equipment, and materials (e.g., scales, probeware, meter sticks, microscopes, computers) including set-up, calibration, technique, maintenance, and storage). 7. **Pose answers, explanations, or descriptions of events,** 8. **Generate explanations that explicate or describe natural phenomena (inferences),** 9. **Use appropriate evidence and reasoning to justify these explanations to others,** 10. **Communicate results of scientific investigations, and** 11. **Evaluate the merits of the explanations produced by others.**
SC.912.N.1.2:	Describe and explain what characterizes science and its methods.
LAFS.1112.RST.1.1:	Cite specific textual evidence to support analysis of science and technical texts, attending to important distinctions the author makes and to any gaps or inconsistencies in the account.

LAFS.1112.RST.1.2:	Determine the central ideas or conclusions of a text; summarize complex concepts, processes, or information presented in a text by paraphrasing them in simpler but still accurate terms.
LAFS.1112.RST.1.3:	Follow precisely a complex multistep procedure when carrying out experiments, taking measurements, or performing technical tasks; analyze the specific results based on explanations in the text.
LAFS.1112.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 11–12 texts and topics.
LAFS.1112.RST.2.5:	Analyze how the text structures information or ideas into categories or hierarchies, demonstrating understanding of the information or ideas.
LAFS.1112.RST.2.6:	Analyze the author's purpose in providing an explanation, describing a procedure, or discussing an experiment in a text, identifying important issues that remain unresolved.
LAFS.1112.RST.3.7:	Integrate and evaluate multiple sources of information presented in diverse formats and media (e.g., quantitative data, video, multimedia) in order to address a question or solve a problem.
LAFS.1112.RST.3.8:	Evaluate the hypotheses, data, analysis, and conclusions in a science or technical text, verifying the data when possible and corroborating or challenging conclusions with other sources of information.
