

2011 - 2012

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Funeral Services  
**Career Cluster:** Health Science

	AS	AAS
CIP Number	1312030100	0312030100
Program Type	College Credit	College Credit
Standard Length	72 credit hours	72 credit hours
CTSO	HOSA	HOSA
SOC Codes (all applicable)	31-9099, 11-9061	31-9099, 11-9061
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>	
Perkins Technical Skill Attainment Inventory	<a href="http://www.fldoe.org/workforce/perkins/perkins_resources.asp">http://www.fldoe.org/workforce/perkins/perkins_resources.asp</a>	

### Purpose

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

This program is designed to prepare students for employment as embalmers, funeral attendants, or funeral directors and morticians (SOC Code 119061 Funeral Directors and Morticians) or to provide supplemental training for persons previously or currently employed in these occupations. The program must be accredited by the American Board of Funeral Service Educators and once completed a student may apply to the Division of Funeral, Cemetery and Consumer Services for their internship and to take the Florida Laws and Rules Exam to practice as a licensed embalmer or funeral director, according to Chapter 497 FS.

The content includes but is not limited to techniques of embalming and restorative art, mortuary administration, funeral law, public health and sanitation, human anatomy and physiology, microbiology, pathology, mortuary social science, stress management, employability skills, leadership and human relations skills, and health and safety, including CPR.

### Program Structure

This program is a planned sequence of instruction consisting of 72 credit hours.

## **Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

## **Special Notes**

This program meets the Department of Health HIV/AIDS Domestic Violence and Prevention of Medical Errors education requirements. Upon completion of this program, the instructor will provide a certificate to the student verifying that these requirements have been met.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635 F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

The intended outcomes are the same as the adopted curricular objectives of the American Board of Funeral Service Education which must be endorsed by accredited programs as curricular standards.

Upon completion of the associate in science in funeral service, graduates are qualified to write the National Funeral Service Board Examination. The program must be accredited by the American Board of Funeral Services Education, Inc., 14 Crestwood Road, Cumberland, Maine 04021 (207/829-5715) 497.000 F.S. ; 69K-15.002(1) F.A.C.

One year of internship is required in the State of Florida for the embalmer or the funeral director license. These internships may be served concurrently. Upon completion of the internship, students are eligible to write the Florida state examination for the embalmer and funeral director license.

Outcomes 01-11 are referred to as the Health Careers Core and do not have to be completed if the student has previously completed the Core in another health science program. The CORE should be taken first or concurrently with the first course in the program. Following the successful completion of the core, the student is eligible to take the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

## **Career and Technical Student Organization (CTSO)**

Health Occupations Students of America, Inc. (HOSA) is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

## **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's

accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

### **Articulation**

This program has no statewide articulation agreement approved by the Articulation Coordinating Committee. However, this does not preclude the awarding of credits by any college through local agreements.

For details on statewide articulation agreements which correlate to programs and industry certifications, refer to [http://www.fldoe.org/workforce/dwdframe/artic\\_frame.asp](http://www.fldoe.org/workforce/dwdframe/artic_frame.asp).

### **Program Length**

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. The standard length of this program is 72 credit hours according to Rule 6A-14.030, F.A.C.

### **Certificate Programs**

A College Credit Certificate consists of a program of instruction of less than sixty (60) credits of college-level courses, which is part of an AS or AAS degree program and prepares students for entry into employment (Rule 6A-14.030, F.A.C.). This AS/AAS degree program includes the following College Credit Certificates:

Embalming (0312030101) - 31 credit hours

Standards for the above certificate programs are contained in separate curriculum frameworks.

### **Standards**

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.

- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.
- 12.0 Satisfactorily perform the basic techniques of embalming, restorative art, and cosmetology.
- 13.0 Give evidence of an understanding of the sociological, psychological, spiritual, physical, and legal needs of the family and community, and how to meet those needs in the treatment, handling, and disposition of the dead human body.
- 14.0 Explain the concepts of death, disinfection, preservation, and restoration of a dead human body.
- 15.0 Identify fundamental principles of personal and public health protection measures, and define the embalmer's obligation to this function.
- 16.0 Identify, define, and employ the necessary technical terminology to facilitate communication and cooperation with members of allied professions and the public.
- 17.0 Give evidence of personal manifestations of continued professional growth through education and research.
- 18.0 Identify those common conditions surrounding death which may prove of potential concern to the forensic pathologist.
- 19.0 Take care of the dead in a manner which recognizes the inherent dignity of man.
- 20.0 Identify the privileges of and be able to, through professional practices, fulfill the responsibilities of licensure.
- 21.0 Interpret and communicate the purposes, procedures, and values of funeral service.
- 22.0 Counsel people regarding funeralization.
- 23.0 Plan, implement, and direct a funeral according to the sociological, psychological, and theological needs of the person being served.
- 24.0 Identify and comply with the laws pertaining to funeral service practice and public health.
- 25.0 Manage personnel, facilities, and other resources.
- 26.0 Apply business principles and practices to funeral service.
- 27.0 Recognize the importance of inter-professional and intra-professional relationship and responsibilities.
- 28.0 Recognize the procedures for becoming an active member of the community and participating in community affairs.
- 29.0 Demonstrate an understanding of entrepreneurship.

2011 - 2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Funeral Services  
**CIP Numbers:** 1312.030100 AS, 0312.030100 AAS  
**Program Length:** 72 credit hours  
**SOC Code(s):** 31-9099, 11-9061

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. At the completion of this program, the student will be able to:

Outcomes 01-11 are referred to as the Health Career Core and do not have to be completed if the student has previously completed the Core in another health occupations program. After successfully completing this program, the student will be able to:

**Health Careers Core**

01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:

- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
- 01.02 Identify common methods of payment for healthcare services.
- 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
- 01.04 Describe the composition and functions of a healthcare team.
- 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
- 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
- 01.07 Identify characteristics of effective teams.
- 01.08 Recognize methods for building positive team relationships.
- 01.09 Analyze attributes and attitudes of an effective leader.
- 01.10 Recognize factors and situations that may lead to conflict.
- 01.11 Demonstrate effective techniques for managing team conflict.
- 01.12 Describe factors that influence the current delivery system of healthcare.
- 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.

02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:

- 02.01 Develop basic speaking and active listening skills.
- 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
- 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.

- 02.04 Respond to verbal and non-verbal cues.
- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.
- 02.06 Use appropriate medical terminology and abbreviations.
- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
- 02.08 Recognize the importance of patient/client educations regarding healthcare.
- 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
- 02.10 Analyze elements of communication using a sender-receiver model.
- 02.11 Distinguish between and report subjective and objective information.
- 02.12 Report relevant information in order of occurrence.

03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:

- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
- 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
- 03.03 Demonstrate procedures for accurate documentation and record keeping.
- 03.04 Interpret healthcare facility policy and procedures.
- 03.05 Explain the “Patient’s Bill of Rights”.
- 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
- 03.07 Describe advance directives.
- 03.08 Describe informed consent.
- 03.09 Explain the laws governing harassment, labor and employment.
- 03.10 Differentiate between legal and ethical issues in healthcare.
- 03.11 Describe a code of ethics consistent with the healthcare occupation.
- 03.12 Identify and compare personal, professional, and organizational ethics.
- 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
- 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
- 03.15 Recognize and report abuse including domestic violence and neglect.
- 03.16 Distinguish among the five schedules of controlled substances.

04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:

- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
- 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
- 04.03 Identify psychological reactions to illness including defense mechanisms.
- 04.04 Identify complementary and alternative health practices.
- 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
- 04.06 Explain the basic concepts of positive self image, wellness and stress.
- 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.

- 04.08 Explain the nutrition pyramid.
- 04.09 Recognize the steps in the grief process.
  
- 05.0 Recognize and practice safety and security procedures. – The student will be able to:
  - 05.01 Recognize safe and unsafe working conditions and report safety hazards.
  - 05.02 Demonstrate the safe use of medical equipment.
  - 05.03 Explain and apply the theory of root- cause analysis
  - 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
  - 05.05 Identify and practice security procedures for medical supplies and equipment.
  - 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions.
  - 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
  - 05.08 Demonstrate proper body mechanics and ergonomics.
  - 05.09 Demonstrate the procedure for properly identifying patients.
  - 05.10 Demonstrate procedures for the safe transport and transfer of patients.
  - 05.11 Describe fire, safety, disaster and evacuations procedures.
  - 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )
  
- 06.0 Recognize and respond to emergency situations. – The student will be able to:
  - 06.01 Monitor and record vital signs.
  - 06.02 Describe legal parameters relating to the administration of emergency care.
  - 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
  - 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.
  
- 07.0 Recognize and practice infection control procedures. – The student will be able to:
  - 07.01 Define principles of infection control including standard and transmission based precautions.
  - 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
  - 07.03 Demonstrate knowledge of surgical asepsis.
  - 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.
  
- 08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:
  - 08.01 Describe technology applications in healthcare.
  - 08.02 Define terms and demonstrate basic computer skills.
  - 08.03 Recognize technology applications in healthcare.
  - 08.04 Interpret information from electronic medical documents.
  - 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.

09.0 Demonstrate employability skills. – The student will be able to:

- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.
- 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
- 09.03 Identify documents that may be required when applying for a job.
- 09.04 Write an appropriate resume.
- 09.05 Conduct a job search.
- 09.06 Complete a job application form correctly.
- 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
- 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
- 09.09 Identify acceptable work habits.
- 09.10 Recognize appropriate affective/professional behavior.
- 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).

10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:

- 10.01 Recognize emerging diseases and disorders
- 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
- 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
- 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
- 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
- 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.

11.0 Apply basic math and science skills. – The student will be able to:

- 11.01 Draw, read, and report on graphs, charts and tables.
- 11.02 Measure time, temperature, distance, capacity, and mass/weight.
- 11.03 Make, use and convert using both traditional and metric units.
- 11.04 Make estimations and approximations and judge the reasonableness of the result.
- 11.05 Convert from regular to 24 hour time.
- 11.06 Demonstrate ability to evaluate and draw conclusions.
- 11.07 Organize and communicate the results obtained by observation and experimentation.
- 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.

## 11.09 Calculate ratios

## Funeral Services

- 12.0 Satisfactorily perform the basic techniques of embalming and restorative art and cosmetology. – The student will be able to:
- 12.01 Demonstrate a knowledge of the body systems, with special emphasis on the circulatory system, to the degree needed to give a working basis for studies in such related subjects as Embalming, Pathology, Public Health, and Restorative Art.
  - 12.02 Specify representative chemicals in embalming fluids (arterial, cavity and accessory) and give their respective functions.
  - 12.03 Describe the basic theories and laws of chemistry and relate their importance to both the living and deceased.
  - 12.04 Identify and demonstrate the use of standard embalming instruments, machines and accessories.
  - 12.05 Describe prior to, and during the procedure of embalming, the problems presented by disease processes and etiological factors.
  - 12.06 Identify potentially harmful chemicals used in the preparation room, and the precautions to be taken with each.
  - 12.07 Relate specified types of restoration to the correct embalming procedures.
  - 12.08 Select, from a specified cosmetic medium, the correct colorants (compounds) to achieve a natural appearance under various conditions.
  - 12.09 Exhibit a skill in modeling which reflects his ability to restore a problem case.
  - 12.10 Interpret a photograph by evaluating the highlights and shadows, equal and unequal facial proportions, the specific form of the head, and the chief characteristics of each feature.
  - 12.11 Identify and describe the norms of the head and face (direct and profile views), and each of the four facial features - identify four variations of these norms.
  - 12.12 Classify and explain the principles of pigmentary (color) mixtures, and relate their application to cosmetic compounds and the influence of adjacent colors on one another in the funeral setting.
  - 12.13 Name and locate three external body structures of the skull and explain how each influences surface form.
  - 12.14 Identify and describe the use of various cosmetic and restorative materials and equipment.
- 13.0 Give evidence of an understanding of the sociological, psychological, spiritual, physical, and legal needs of the family and community, and how to meet those needs in the treatment, handling, and disposition of the dead human body. – The student will be able to:
- 13.01 Describe the varieties of funeralization seen in major religious and ethnic sub-cultures and in fraternal and military groups in America.
  - 13.02 Relate contemporary sociological, theological, and philosophical thought to the matter of death, dying, bereavement and mourning in America.
  - 13.03 Discuss and illustrate the interplay in society of custom and contemporary funeralization practices.
  - 13.04 Distinguish among taboos, mores, folkways, customs, habits, laws, rites, rituals and ceremonies as sociological terms applied to American funerals.

- 13.05 State significant changes in funeralization and embalming methods during the last half century.
- 13.06 Describe the nature and meaning of death in different civilizations and cultures.
- 14.0 Explain the concepts of death, disinfection, preservation and restoration of a dead human body. – The student will be able to:
  - 14.01 Explain the common types of death.
  - 14.02 Identify the physical states of matter and differentiate between physical and chemical changes.
  - 14.03 Identify essential characteristics of autolysis, hydrolysis fermentation, and putrefaction in the area of the chemistry of decomposition.
  - 14.04 Identify the essential characteristics of carbohydrates, lipids, and proteins in the area of basic biochemistry.
  - 14.05 Define organic chemistry and describe the characteristic features of aliphatic and cyclic compounds, hydrocarbons, alcohols, aldehydes, ketones, acids, esters, ethers, and amines.
  - 14.06 Identify and describe the prerequisites for specified restorative and cosmetic treatments.
- 15.0 Identify fundamental principles of personal and public health protection measures, and define the embalmer's obligation to this function. – The student will be able to:
  - 15.01 Explain the embalming-disinfection process as a public health procedure.
  - 15.02 Describe infectious processes and explain the methods of transmission and control of common infectious diseases, with special emphasis upon their applications to the environment of the embalmer, the funeral director, and the public.
  - 15.03 Identify and explain special treatments for cases involving common infections, traumatic and pathological conditions.
  - 15.04 Recognize the pathological conditions which require special procedures in the removal, handling, preparation and disposition of human remains.
  - 15.05 Apply infection control techniques according to Center for Disease Control (CDC) guidelines.
  - 15.06 Document the relationship between his understanding of normal structure and functions of the human body and his development of healthful living habits.
  - 15.07 Describe and demonstrate personal and environmental disinfection and decontamination procedures; explain proper use of major chemical disinfectants.
- 16.0 Identify, define, and employ the necessary technical terminology to facilitate communication and cooperation with members of allied professions and the public. – The student will be able to:
  - 16.01 Demonstrate his acquisition and understanding of anatomical terminology at a level that will enable him to communicate effectively with members of allied professions and the lay public.
  - 16.02 Identify common laboratory procedures and the common units of scientific measurement.
  - 16.03 Identify the characteristic features of solutions, suspensions, and emulsions, and the processes of diffusion including osmosis, dialysis and hydrolysis.

- 16.04 Identify a list of elements and their valences, radicals, ions, compounds and reactions related to problems faced by the embalmer and funeral director, and give their symbols, formulas, and equations.
- 16.05 Differentiate between the beneficial micro-organisms and the actual pathogens and opportunists commonly associated with both the living human host and dead human remains.
- 16.06 Demonstrate an understanding of host parasite relations and interactions, and the requirements for successful parasitism.
- 16.07 Identify host defense mechanisms and demonstrate general knowledge of innate, natural and active immunologic responses.
- 16.08 Identify basic bacterial and fungal morphology and physiology.
- 16.09 Advise the layman of the medical benefits of post-mortem examination.
  
- 17.0 Give evidence of personal manifestations of continued professional growth through education and research. – The student will be able to:
  - 17.01 Identify the reasons one should cooperate in community programs for controlling disease and promoting medical research.
  - 17.02 Give evidence of his appreciation of, and interest in, the human body as a subject for independent study and continuing intellectual growth.
  
- 18.0 Identify those common conditions surrounding death which may prove of potential concern to the forensic pathologist. – The student will be able to:
  - 18.01 Identify and explain those special conditions attending a death whereby notification of the death is required to be given to the proper official (such as Coroner, Public Health Officer, Veterans Administration, etc.).
  - 18.02 Identify the technical manifestations of death which may be of medico-legal significance.
  
- 19.0 Take care of the dead in a manner which recognizes the inherent dignity of man. – The student will be able to:
  - 19.01 Give evidence of respect for human remains.
  - 19.02 Demonstrate acceptance of racial and cultural diversity.
  
- 20.0 Identify the privileges of and be able to, through professional practices, fulfill the responsibilities of licensure. – The student will be able to:
  - 20.01 Identify the privileges and their limitations accorded the licensee with regard to caring for the dead, and serving the living.
  - 20.02 Identify the responsibilities of the funeral director to those who have called him with regard to:
    - 20.02.01 Providing services and merchandise as selected.
    - 20.02.02 Explaining the financial aspects of the funeral, and pricing method used.
    - 20.02.03 Explaining death benefits and/or burial allowances.
    - 20.02.04 Notifying the clergy of the death, if appropriate.
    - 20.02.05 Coordinating with the clergy on religious aspects of the funeral.
    - 20.02.06 Explaining merchandise and related representations regarding final description.

- 20.02.07 Preparing a financial memorandum pertaining to services, selected merchandise, supplemental items and cash advances.
- 20.02.08 Explaining applicable laws, rules and regulations.
- 20.02.09 Referring for professional counseling where family needs so indicate.
- 20.03 Identify the responsibilities of the funeral director to his profession with regard to:
  - 20.03.01 Costs and procedures instituted where the services of two funeral directors are required.
  - 20.03.02 Public education regarding funeralization.
- 20.04 Identify the responsibilities of the funeral director to the clergy in the matter of the policies, rules and regulations of churches.
- 20.05 Perform the following tasks applicable to the state in which he intends to gain a license:
  - 20.05.01 State the limitations placed upon the practice of the funeral director/embalmer.
  - 20.05.02 Summarize the law, rules and regulations pertaining to:
    - 20.05.02.01 The transportation of the dead.
    - 20.05.02.02 Requirements and specifications of the funeral home, including the preparation room.
    - 20.05.02.03 Define terms specified in the license laws, rules and regulations.
    - 20.05.02.04 Identify the qualifications required of applicants for funeral director/mortician license.
    - 20.05.02.05 Identify the grounds for issuance, revocation, suspension or refusal to renew or issue licenses.
    - 20.05.02.06 Identify requirements for the conducting of funerals.
    - 20.05.02.07 Identify the procedures for filing a complaint concerning a violation of the licensing law.
    - 20.05.02.08 Identify provisions regarding reciprocity/courtesy cards.
- 21.0 Interpret and communicate the purposes, procedures, and values of funeral services. – The student will be able to:
  - 21.01 Identify the purposes which the funeral serves for the family, friends, church, occupational associates, and community of the deceased.
  - 21.02 Identify the values of the funeral.
  - 21.03 Define common terms used in funeral services.
  - 21.04 Identify the psychological purposes and values of the funeral.
  - 21.05 Identify the sociological purposes and values of the funeral.
  - 21.06 Organize and be prepared to deliver a speech on the purposes and values of the funeral.
  - 21.07 Identify the philosophical purposes and values of funeral service.
- 22.0 Counsel people regarding funeralization. – The student will be able to:
  - 22.01 Identify the major financial considerations that confront a bereaved family.
  - 22.02 Identify the times or situations during which a funeral director will make use of counseling.
  - 22.03 State the areas of counseling normally covered during funeralizations.
  - 22.04 Describe the process of funeralization.
  - 22.05 Describe contemporary opinions regarding psychology of death, grief, and bereavement.

- 22.06 Describe how the manner and cause of death affects the psychological needs of the bereaved.
  - 22.07 List the information of importance to obtain during each type of counseling situation.
  - 22.08 Identify and appraise the basic personal and personality problems that may appear during counseling situations.
  - 22.09 Classify and analyze the various forms of funeral rites.
  - 22.10 Describe contemporary opinions regarding sociology of death, grief, and bereavement.
  - 22.11 Describe three or more types of counseling techniques applicable to funeral services and give reasons for the use of each in individual circumstances.
  - 22.12 Describe recent developments pertaining to the theologies of death, grief and bereavement.
  - 22.13 Describe the effects of the Uniform Anatomical Gift Act on funeralization.
  - 22.14 Identify and describe stages of dying.
- 23.0 Plan, implement, and direct a funeral according to the sociological, psychological and theological needs of the person being served. – The student will be able to:
- 23.01 Develop a warm, friendly and tactful attitude towards the family at the first meeting.
  - 23.02 Identify the items of information which are necessary to complete the following forms:
    - 23.02.01 Obituary
    - 23.02.02 Death certificate
    - 23.02.03 Social Security forms (SSA, 719, SSA 721)
    - 23.02.04 Veteran's forms (Marker, Flag, Burial Allowance)
    - 23.02.05 Burial/Transportation permits
    - 23.02.06 Release/Authorization forms
  - 23.03 Identify the person(s) who are qualified to give permission for release of the deceased from a hospital, or to sign the hospital death record, if required.
  - 23.04 Identify the information to be secured from, and given to, the family upon initial family contact.
  - 23.05 Describe the multiple steps required between initial notification of death and removal of the deceased.
  - 23.06 Identify person(s) who qualify to authorize autopsy and embalming, and to approve the purpose and disclosure statement.
  - 23.07 Identify the items and considerations usually included in the arrangement conference.
  - 23.08 Identify the purpose of the death certificate.
  - 23.09 Identify the appropriate times usually considered necessary to meet the funeral needs of those being served.
  - 23.10 Identify the consideration normally involved in setting the order for the processional and recessional of a funeral service including casket, casket bearer, children, clergy, friends, fraternal orders, funeral directors, honorary bearers, next of kin, relatives and service organization.
  - 23.11 Describe the multiple steps required between initial notification of death and removal of the deceased when the bereaved are not present at the time of death, regardless of the place or manner of death - including, but not limited to, the funeral director's determination of the need for a personal conference and/or counseling of the bereaved prior to the funeral arrangement conference.

- 23.12 Identify the items of clothing ordinarily required for the deceased.
  - 23.13 Describe the proper techniques and equipment employed in the dignified removal of remains under diverse conditions.
  - 23.14 Identify the reasons which require a discussion involving the family, the officiating clergyman, and the funeral director regarding visitation hours, time of funeral, and other aspects of the service.
  - 23.15 Identify the purpose of the Burial-Transit Permit.
  - 23.16 Write obituary and death notices.
  - 23.17 Identify the purpose and content of preselection counseling.
  - 23.18 Identify the participants functioning in funeral service and explain their duties.
  - 23.19 Describe considerations involved in the dignified movement of casketed remains.
  - 23.20 State considerations for determining the order of the funeral procession.
  - 23.21 Coordinate a variety of committal rites when these are a part of one funeral.
  - 23.22 Identify the psychological and sociological value of the funeral arrangement conference.
  - 23.23 Identify methods of dealing with inter-personal conflicts among family members.
  - 23.24 Discuss dismissal procedures for leaving the grave site.
  - 23.25 Explain the problems involved in harmonizing the colors of caskets in the funeral setting.
  - 23.26 Describe the various types of floral arrangements and the considerations involved in their placement.
  - 23.27 Identify requirement/procedure pertaining to cremation, calcination and burial at sea.
- 24.0 Identify and comply with the laws pertaining to funeral service practice and public health.  
– The student will be able to:
- 24.01 Identify legally:
    - 24.01.01 The nature of the right of the funeral director to take custody of a dead body, and the length of time such custody may be exercised.
    - 24.01.02 The procedures for recovering the body.
    - 24.01.03 The theory governing the right to recover for mutilation of a body, and the reasons for recovery of damages when mutilation results from negligence.
    - 24.01.04 The duty of the funeral director regarding the personal effects of a decedent.
    - 24.01.05 The basis of a funeral director's liability for the negligence of a volunteer driver in a funeral procession.
    - 24.01.06 The legal duty of a funeral director regarding permits required by law.
    - 24.01.07 The reasons for legal limitation on a funeral bill charged against an estate where creditor's claims exceed the assets of the estate.
    - 24.01.08 How a testator may provide in his will for the payment of funeral expenses.
    - 24.01.09 The duty of the funeral director for compliance with the Federal Trade Commission Funeral Rules.
    - 24.01.10 The duty of the funeral director for compliance with the Magnuson-Moss Warranty Act (1975).
    - 24.01.11 The duty of the funeral director for compliance with the provisions of Federal Wage and Hour Laws.
  - 24.02 Describe status of a funeral bill as a charge against the estate.
  - 24.03 Identify:

- 24.03.01 The conditions under which a funeral director must have permission before permitting an autopsy in his establishment, and state whether that permission may be qualified, restricted or revoked.
- 24.03.02 The liability of an embalmer for shaving a beard, cutting hair or otherwise altering the appearance of a body.
- 24.03.03 The legal duty of the funeral director regarding the personal effects of a decedent.
- 24.03.04 The extent of control a funeral director has over a funeral, and his legal duties to those attending a funeral or viewing a body at his funeral home.
- 24.03.05 The general rule in the determination of the validity of funeral expenses.
- 24.03.06 Which items are allowable in a funeral bill and which items are not allowable.
- 24.03.07 The legal basis for the modifications of the common law rule imposing liability upon the husband for the wife's funeral expenses.
- 24.03.08 Under what legal basis a widow may be required to pay the funeral expense of her deceased indigent husband.
- 24.04 Identify:
  - 24.04.01 The liability of a volunteer who individually contracts to pay a funeral bill.
  - 24.04.02 The liability of an executor or administrator for funeral expenses.
  - 24.04.03 Why a funeral director should be familiar with the law of disinterment.
  - 24.04.04 The circumstances under which exhumation is permitted in criminal cases, and in civil cases.
  - 24.04.05 The usual procedure for obtaining a disinterment authorization, and the legal principles under which disinterment statutes are upheld.
  - 24.04.06 Who has the primary right to disinter a body, and the nature of the crime of disinterment without proper authorization.
  - 24.04.07 The grounds upon which a funeral home can be prohibited from further operation in a residential district.
  - 24.04.08 Whether a funeral home may be excluded from a sub-division by agreement of the property owners.
  - 24.04.09 The conditions under which a funeral home or cemetery may be considered a nuisance per se.
  - 24.04.10 Why the power of eminent domain may be invoked to acquire land for a public cemetery.
  - 24.04.11 The power under which cemeteries may be regulated by the state, and what specific action must be taken to convert land to cemetery use.
  - 24.04.12 The authority under which a private cemetery may enforce rules which control burial in it.
  - 24.04.13 Why the owner of a cemetery lot may not use it for purposes other than burial, and whether or not he has the right to decorate and mark the grave.
  - 24.04.14 Under what authority cemeteries are required to provide admittance to graves.
  - 24.04.15 What kind of offense the grave desecration is.
- 24.05 Identify:
  - 24.05.01 The essentials of a valid contract.
  - 24.05.02 The reasons for maintaining death certificates.

- 24.05.03 How the remains may be transported by common carrier.
- 24.05.04 The legal consideration where persons die without medical attention.
- 24.05.05 The general order of nearest of kin including all relatives.
- 24.05.06 The legal implications of the concept of a "Decent Christian Burial."
- 24.05.07 Two reasons for filing an embalming report for each body prepared by the funeral home.
- 24.05.08 The function of a court of equity.
- 24.05.09 Two classes of bodies legally available for dissection.
- 24.05.10 The legal doctrine regarding the photographing of a dead body.
- 24.05.11 The privileges and limitations of one holding the power of attorney.
- 24.05.12 The liability of the funeral director for the custody of the remains.
- 24.06 Describe the legal basis for funeral service licensure stating the legal obligation of funeral and its purpose.
- 24.07 Identify:
  - 24.07.01 The doctrine of Stare Decesis.
  - 24.07.02 Whether a person may dispose of his body by will, whether a dead body may be insured, and whether it may be bought and sold.
  - 24.07.03 Whether a dead body may be the subject of an action of replevin.
  - 24.07.04 The authority of a ship over dead bodies.
  - 24.07.05 The restrictions on burials of those dying of a communicable disease.
  - 24.07.06 The conditions under which a dead body must be embalmed.
  - 24.07.07 The effect of the decedent's wishes with respect to exercising the right and duty of disposition.
  - 24.07.08 The proper position the funeral director should take when survivors of a decedent disputes the exercise of the right of disposition.
- 24.08 Define cremation and list the circumstances under which it is illegal.
- 24.09 Describe the rights of a party in controlling a funeral, and the rights of a party to attend a funeral.
- 24.10 Define "funeral contract", and state the legality of funeral contracts made by a decedent prior to death.
- 24.11 Describe the rights of the decedent in pre-arranging his own funeral.
- 24.12 Describe the legal limitation imposed in pre-arrangement agreements.
- 24.13 Describe the legal status of a dead body.
- 24.14 Identify the legal theory governing the right to recover from mutilation of a body, and the reasons for recovery of damages when mutilation results from negligence.
- 24.15 Identify the circumstances under which the state or one of its subdivisions is liable for funeral expenses.
- 24.16 Define and give the purpose of a Coroner's/Medical investigator's inquest and inquiry.
- 24.17 Identify the rules and regulations governing burial in a National Cemetery.
- 24.18 Distinguish between the property and no-property theories of dead human bodies.
- 24.19 Identify two sources from which the rights and duties of a funeral director are derived.
- 24.20 Identify those steps a funeral director should take before building or purchasing a funeral home.
- 24.21 Distinguish between a cooperation, a partnership, and a proprietorship, and state the advantages and disadvantages of each.
- 24.22 Identify two forms of legally binding sales contracts.
- 24.23 Identify the conditions under which a note would be considered void.

- 24.24 Identify the preferred persons in the granting of letters of administration.
- 24.25 Distinguish between a stock and a bond.
- 25.0 Manage personnel, facilities, and other resources. – The student will be able to:
  - 25.01 Answer the telephone properly.
  - 25.02 Receive initial contact information accurately and appropriately.
  - 25.03 Identify importance of:
    - 25.03.01 The appearance and cleanliness of the funeral home, preparation room, funeral coach, limousine, and parking lot.
    - 25.03.02 The need for confidentiality of funeral home records, family records and financial data.
    - 25.03.03 Maintaining staff communications.
  - 25.04 Identify the procedure for filing the death certificate at the proper agency and obtaining related permits if required.
  - 25.05 Identify equipment necessary for the removal of an adult, child or infant from a hospital, residence or other place of death.
  - 25.06 Identify all equipment appropriate for any funeral service.
  - 25.07 Identify the procedure for properly receiving those who make a visitation to the funeral home.
  - 25.08 Identify the procedures for dressing and casketing the remains.
  - 25.09 Identify the procedures for placing the deceased in a visitation room.
  - 25.10 Identify equipment needed to accomplish interment, inurement, and entombment.
  - 25.11 Identify the procedures for the completion of insurance forms.
  - 25.12 Complete the recording of information in a register book.
- 26.0 Apply business principles and practices to funeral service. – The student will be able to:
  - 26.01 Prepare a financial memorandum pertaining to services provided, merchandise selected, cash advances, and supplemental items.
  - 26.02 Define and properly use the terminology associated with funeral merchandise, merchandise display, and funeral supplies.
  - 26.03 Identify, define, and describe the various types of outer enclosures.
  - 26.04 Differentiate between Functional, Unit, B-Unit and Itemization methods of quoting the price(s) of funeral service.
  - 26.05 Apply basic accounting principles in keeping mortuary records.
  - 26.06 Identify the major items of income and expenses which should be included in the budget of a funeral home.
  - 26.07 Define basic accounting terms.
  - 26.08 Analyze financial data, make financial decisions, and recognize the effects of economies on existing funeral services.
  - 26.09 Identify the dual role of the funeral director, and list the major responsibilities of each role.
  - 26.10 Distinguish between the direct and indirect approaches in helping clients to select merchandise, and list the advantages and disadvantages of each method.
  - 26.11 Identify the insurance needs of a funeral director, and funeral service practice.
  - 26.12 Identify the application of the Federal Truth in Lending Act to funeral service.
  - 26.13 Identify the importance of purchase disclosures.
  - 26.14 Identify the applications of the Federal Wage and Hour Act to funeral service.
  - 26.15 Distinguish a cognovit from a promissory note.

- 27.0 Recognize the importance of inter-professional and intra-professional relationship and responsibilities. – The student will be able to:
- 27.01 Identify common interest areas existing between funeral directors, florists, cemeterians, monument dealers, news media, the legal profession, the judiciary, hospital administrators, governmental agencies and local police.
  - 27.02 Identify the aims and purposes of a funeral director-clergy relations committee.
  - 27.03 Identify common concerns inherent in physician-funeral director relationships.
  - 27.04 Name the major funeral director associations.
  - 27.05 Identify the aims and purposes of a funeral director-pathologist autopsy committee.
  - 27.06 Describe the structure and function of the Conference of Funeral Service Examining Boards, Inc.
  - 27.07 Describe the structure of "multi-unit" funeral home organizations (public stock corporations).
  - 27.08 Describe the structure and function of the Commission of Schools of the American Board of Funeral Service Education.
  - 27.09 Describe the structure and function of the American Board of Funeral Service Education.
  - 27.10 Describe the membership structure of the National Funeral Directors Association and other professional associations in the industry.
- 28.0 Recognize the procedures for becoming an active member of the community and participating in community affairs. – The student will be able to:
- 28.01 Identify the necessary items to be considered in establishing a funeral home-public relations program.
  - 28.02 Distinguish between institutional and funeral home advertising and state the primary purpose of each.
- 29.0 Demonstrate and understanding of entrepreneurship. –The student will be able to:
- 29.01 Define entrepreneurship.
  - 29.02 Describe the importance of entrepreneurship to the American economy.
  - 29.03 List the advantages and disadvantages of business ownership.
  - 29.04 Identify the risks involved in ownership of a business.
  - 29.05 Identify the necessary personal characteristics of a successful entrepreneur.
  - 29.06 Identify the business skills needed to operate a business efficiently and effectively.

2011 - 2012

**Florida Department of Education  
Curriculum Framework**

**Program Title:**       **Embalming**  
**Career Cluster:**     **Health Science**

<b>CCC</b>	
CIP Number	0312030101
Program Type	College Credit Certificate (CCC)
Program Length	31 credit hours
CTSO	HOSA
SOC Codes (all applicable)	31-9099, 39-4011
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>

### **Purpose**

This certificate program is part of the Funeral Services AS/AAS degree program (1312.030100).

A College Credit Certificate consists of a program of instruction of less than sixty (60) credits of college-level courses, which is part of an AS or AAS degree program and prepares students for entry into employment (Rule 6A-14.030, F.A.C.).

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

The program is designed to prepare students for employment as embalmers SOC Code 39-4011 Embalmers or to provide supplemental training for persons previously or currently employed in this occupation. The Embalming Certificate holder may take the Florida Laws and Rules Exam to practice as a licensed embalmer according to Chapter 497 as approved by the Florida Department of Financial Services, Division of Funeral, Cemetery and Consumer Services.

The intended outcomes are the same as the adopted curricular objectives of the American Board of Funeral Service Education. The certificate program is not accredited by the American Board of Funeral Service Education and is valid for the state of Florida only.

The content includes but is not limited to techniques of embalming and restorative art, funeral law, public health and sanitation, human anatomy, chemistry, microbiology and pathology microbiology and pathology.

## **Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

## **Special Notes**

This program meets the Department of Health HIV/AIDS Domestic Violence and Prevention of Medical Errors education requirements. Upon completion of this program, the instructor will provide a certificate to the student verifying that these requirements have been met.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635 F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

Upon completion of the Embalming Certificate program, certificate holders are qualified to write the Florida Department of Financial Services, Division of Funeral, Cemetery and Consumer Services for approval to take the state licensing exam. The program is approved by the Florida Department of Financial Services, Division of Funeral, Cemetery and Consumer Services according to 69K-16.001.

One year of internship is required in the State of Florida for the embalmer license. Upon completion of the internship, students are eligible to write the Florida state examination for the embalmer license.

Outcomes 01-11 are referred to as the Health Careers Core and do not have to be completed if the student has previously completed the Core in another health science program. The Core should be taken first or concurrently with the first course in the program. Following the successful completion of the core, the student is eligible to take the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

## **Career and Technical Student Organization (CTSO)**

Health Occupation Students of America, Inc (HOSA) is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

## **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education.

Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

## **Standards**

After successfully completing this course the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.
- 12.0 Perform the basic techniques of embalming, restorative art, and cosmetology.
- 13.0 Explain the concepts of death, disinfection, preservation, and restoration of a dead human body.
- 14.0 Identify fundamental principles of personal and public health protection measures, and define the embalmer's obligation to this function.
- 15.0 Identify, define, and employ the necessary technical terminology to facilitate communication and cooperation with members of allied professions and the public.
- 16.0 Give of personal manifestation of continued professional growth through education and research.
- 17.0 Identify those common conditions surrounding death, which may prove of potential concern to the forensic pathologist.
- 18.0 Take care of the dead in a manner, which recognizes the inherent dignity of man.
- 19.0 Identify the privileges of and be able to, through professional practices, fulfill the responsibilities of licensure.
- 20.0 Identify and comply with the laws pertaining to funeral service practice and public health.
- 21.0 Recognize the importance of inter-professional and intra-professional relationship and responsibilities.

2011 - 2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:**           **Embalming**  
**CIP Number:**           **0312.030101**  
**Program Length:**       **31 credit hours**  
**SOC Code(s):**           **31-9099, 39-4011**

This certificate program is part of the Funeral Services AS/AAS degree program (1312.030100). At the completion of this program, the student will be able to:

**Health Careers Core: The Health Careers Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Careers Core or any other health occupations program do not have to repeat the intended outcomes 01-11.**

01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:

- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
- 01.02 Identify common methods of payment for healthcare services.
- 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
- 01.04 Describe the composition and functions of a healthcare team.
- 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
- 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
- 01.07 Identify characteristics of effective teams.
- 01.08 Recognize methods for building positive team relationships.
- 01.09 Analyze attributes and attitudes of an effective leader.
- 01.10 Recognize factors and situations that may lead to conflict.
- 01.11 Demonstrate effective techniques for managing team conflict.
- 01.12 Describe factors that influence the current delivery system of healthcare.
- 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.

02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:

- 02.01 Develop basic speaking and active listening skills.
- 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
- 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
- 02.04 Respond to verbal and non-verbal cues.
- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.
- 02.06 Use appropriate medical terminology and abbreviations.

- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
  - 02.08 Recognize the importance of patient/client educations regarding healthcare.
  - 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
  - 02.10 Analyze elements of communication using a sender-receiver model.
  - 02.11 Distinguish between and report subjective and objective information.
  - 02.12 Report relevant information in order of occurrence.
- 03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:
- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
  - 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
  - 03.03 Demonstrate procedures for accurate documentation and record keeping.
  - 03.04 Interpret healthcare facility policy and procedures.
  - 03.05 Explain the “Patient’s Bill of Rights”.
  - 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
  - 03.07 Describe advance directives.
  - 03.08 Describe informed consent.
  - 03.09 Explain the laws governing harassment, labor and employment.
  - 03.10 Differentiate between legal and ethical issues in healthcare.
  - 03.11 Describe a code of ethics consistent with the healthcare occupation.
  - 03.12 Identify and compare personal, professional, and organizational ethics.
  - 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
  - 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
  - 03.15 Recognize and report abuse including domestic violence and neglect.
  - 03.16 Distinguish among the five schedules of controlled substances.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:
- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
  - 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
  - 04.03 Identify psychological reactions to illness including defense mechanisms.
  - 04.04 Identify complementary and alternative health practices.
  - 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
  - 04.06 Explain the basic concepts of positive self image, wellness and stress.
  - 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
  - 04.08 Explain the nutrition pyramid.
  - 04.09 Recognize the steps in the grief process.
- 05.0 Recognize and practice safety and security procedures. – The student will be able to:

- 05.01 Recognize safe and unsafe working conditions and report safety hazards.
  - 05.02 Demonstrate the safe use of medical equipment.
  - 05.03 Explain and apply the theory of root- cause analysis
  - 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
  - 05.05 Identify and practice security procedures for medical supplies and equipment.
  - 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions.
  - 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
  - 05.08 Demonstrate proper body mechanics and ergonomics.
  - 05.09 Demonstrate the procedure for properly identifying patients.
  - 05.10 Demonstrate procedures for the safe transport and transfer of patients.
  - 05.11 Describe fire, safety, disaster and evacuations procedures.
  - 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )
- 06.0 Recognize and respond to emergency situations. – The student will be able to:
- 06.01 Monitor and record vital signs.
  - 06.02 Describe legal parameters relating to the administration of emergency care.
  - 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
  - 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.
- 07.0 Recognize and practice infection control procedures. – The student will be able to:
- 07.01 Define principles of infection control including standard and transmission based precautions.
  - 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
  - 07.03 Demonstrate knowledge of surgical asepsis.
  - 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.
- 08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:
- 08.01 Describe technology applications in healthcare.
  - 08.02 Define terms and demonstrate basic computer skills.
  - 08.03 Recognize technology applications in healthcare.
  - 08.04 Interpret information from electronic medical documents.
  - 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.
- 09.0 Demonstrate employability skills. – The student will be able to:
- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.

- 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
  - 09.03 Identify documents that may be required when applying for a job.
  - 09.04 Write an appropriate resume.
  - 09.05 Conduct a job search.
  - 09.06 Complete a job application form correctly.
  - 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
  - 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
  - 09.09 Identify acceptable work habits.
  - 09.10 Recognize appropriate affective/professional behavior.
  - 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:
- 10.01 Recognize emerging diseases and disorders
  - 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
  - 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
  - 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
  - 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
  - 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.
- 11.0 Apply basic math and science skills. – The student will be able to:
- 11.01 Draw, read, and report on graphs, charts and tables.
  - 11.02 Measure time, temperature, distance, capacity, and mass/weight.
  - 11.03 Make, use and convert using both traditional and metric units.
  - 11.04 Make estimations and approximations and judge the reasonableness of the result.
  - 11.05 Convert from regular to 24 hour time.
  - 11.06 Demonstrate ability to evaluate and draw conclusions.
  - 11.07 Organize and communicate the results obtained by observation and experimentation.
  - 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
  - 11.09 Calculate ratios

**Embalmer: (12-21)**

- 12.0 Perform the basic techniques of embalming and restorative art and cosmetology. – The student will be able to:
- 12.01 Demonstrate a knowledge of the body systems, with special emphasis on the circulatory system, to the degree needed to give him a working basis for studies in such related subjects as Embalming, Pathology, Public Health, and Restorative Art
  - 12.02 Specify representative chemicals in embalming fluids (arterial, cavity and accessory) and give their respective functions.
  - 12.03 Describe the basic theories and laws of chemistry and relate their importance to both the living and deceased.
  - 12.04 Identify and demonstrate the use of standard embalming instruments, machines and accessories.
  - 12.05 Describe prior to, and during the procedure of embalming, the problems presented by disease processes and etiological factors.
  - 12.06 Identify potentially harmful chemicals used in the preparation room, and the precautions to be taken with each.
  - 12.07 Elate specified types of restoration to the correct embalming procedures.
  - 12.08 Select, from a specified cosmetic medium, the correct colorants (compounds) to achieve a natural appearance under various conditions.
  - 12.09 Exhibit a skill in modeling which reflects his ability to restore a problem case.
  - 12.10 Interpret a photograph by evaluating the highlights and shadows, equal and unequal facial proportions, the specific form of the head, and the chief characteristics of each feature.
  - 12.11 Identify and describe the norms of the head and face (direct and profile views), and each of the four facial features – identify four variations of these norms.
  - 12.12 Classify and explain the principles of pigmentary (color) mixtures, and relate their application to cosmetic compounds and the influence of adjacent colors on one another in the funeral setting.
  - 12.13 Name and locate three external body structures of the skull and explain how each influences surface form.
  - 12.14 Identify and describe the use of various cosmetic and restorative materials and equipment.
- 13.0 Explain the concepts of death, disinfection, preservation and restoration of a dead human body. – The student will be able to:
- 13.01 Explain the common types of death.
  - 13.02 Identify the physical states of matter and differentiate between physical and chemical changes.
  - 13.03 Identify essential characteristics of autolysis, hydrolysis fermentation, and putrefaction in the area of the chemistry of decomposition.
  - 13.04 Identify the essential characteristics of carbohydrates, lipids, and proteins in the area of basic biochemistry.
  - 13.05 Define organic chemistry and describe characteristic features of aliphatic and cyclic compounds, hydrocarbons, alcohols, aldehydes, ketones, acids, esters, ethers, and amines.

- 13.06 Identify and describe the prerequisites for specified restorative and cosmetic treatments.
- 14.0 Identify fundamental principles of the personal and public health protection measures, and define the embalmer's obligation to this function. – The student will be able to:
- 14.01 Explain the embalming-disinfection process as a public health procedure.
  - 14.02 Describe infections processes and explain the methods of transmission and control of common infectious diseases, with special emphasis upon their applications to the environment of the embalmer, the funeral director, and the public.
  - 14.03 Identify and explain special treatments for cases involving common infections, traumatic and pathological conditions
  - 14.04 Recognize the pathological conditions which require special procedures in the removal, handling, preparation and disposition of human remain.
  - 14.05 Apply infection control techniques according to Center for Disease Control (CDC) guidelines.
  - 14.06 Document the relationship between his understanding of normal structure and functions of the human body and his development of healthful living habits.
  - 14.07 Describe and demonstrate personal and environmental disinfection and decontamination procedures; explain proper use of major chemical disinfectants.
- 15.0 Identify, define and employ necessary technical terminology to facilitate communication and cooperation with members of allied professions and the public. – The student will be able to:
- 15.01 Demonstrate his acquisition and understanding of anatomical terminology at a level that will enable him to communicate effectively with members of allied professions and the lay public.
  - 15.02 Identify common laboratory procedures and the common units of scientific measurement.
  - 15.03 Identify the characteristic features of solution, suspensions, and emulsions, and the processes of diffusion including osmosis, dialysis and hydrolysis.
  - 15.04 Identify a list of elements and their valences, radicals, ions, compounds and reactions related to problems faced by the embalmer and funeral director, and give their symbols, formulas, and equations.
  - 15.05 Differentiate between the beneficial micro-organisms and the actual pathogens and opportunists commonly associated with both the living human host dead human remains.
  - 15.06 Demonstrate an understanding of host parasite relations and interactions, and the requirements for successful parasitism.
  - 15.07 Identify host defense mechanisms and demonstrate general knowledge of innate, natural and active immunologic responses.
- 16.0 Give evidence of personal manifestation of continued professional growth through education and research. – The student will be able to:
- 16.01 Identify the reasons one should cooperate in community programs for controlling disease and promoting medical research.
  - 16.02 Give evidence of his appreciation of, and interest in, the human body as a subject for independent study and continuing intellectual growth.

- 17.0 Identify those common conditions surrounding death which may prove of potential concern to the forensic pathologist. – The student will be able to:
- 17.01 Identify and explain those special conditions attending a death whereby notification of the death is required to be given to the proper official (such as Coroner, Public Health Officer, Veterans Administration, etc.).
  - 17.02 Identify the technical manifestations of death, which may be of medico-legal significance.
- 18.0 Take care of the dead in a manner which recognizes the inherent dignity of man. – The student will be able to:
- 18.01 Give evidence of respect for human remains.
  - 18.02 Ensure that such respect is communicated to all internal and external contacts.
- 19.0 Identify and comply with the laws pertaining to funeral service practice and public health. – The student will be able to:
- 19.01 Explain the nature of the right of the funeral director to take custody of a dead body, and the length of time such custody may be exercised.
  - 19.02 Explain the legal procedures for recovering the body.
  - 19.03 Explain the theory governing the right to recover for mutilation of a body, and the reasons for recovery of damages when mutilation results from negligence.
  - 19.04 Explain the duty of the funeral director/embalmer regarding the personal effects of a decedent.
  - 19.05 Explain the duty of the funeral director/embalmer for compliance with the Federal Trade Commission Funeral Rules.
  - 19.06 Explain how the remains may be transported by common carrier.
  - 19.07 Explain the legal consideration where persons die without medical attention.
  - 19.08 Explain the general order of nearest of kin including all relatives
  - 19.09 Explain/discuss two reasons for filing an embalming report for each body prepared by the funeral home.
  - 19.10 Discuss two classes of bodies legally available for dissection.
  - 19.11 Explain the legal doctrine regarding the photographing of dead body.
  - 19.12 Describe the legal basis for funeral service licensure stating the legal obligation of funeral and its purpose.
  - 19.13 Discuss whether a dead body may be the subject of an action of replevin.
  - 19.14 Explain the authority of a ship over dead bodies.
  - 19.15 Discuss the restrictions on burials of those dying of a communicable disease.
  - 19.16 Discuss the conditions under which a dead body must be embalmed.
  - 19.17 Explain the effect of the decedent's wishes with respect to exercising the right and duty of disposition.
  - 19.18 Define cremation and list the circumstances under which it is illegal.
  - 19.19 Define and give the purpose of a Coroner's/Medical investigator's inquest and inquiry.
  - 19.20 Distinguish between the property and no-property theories of dead human bodies.
- 20.0 Manage personnel, facilities, and other resources. –The student will be able to:

- 20.01 Recognize the need for confidentiality of funeral home records, family records and financial data.
  - 20.02 Maintain staff communications.
  - 20.03 Identify equipment necessary for the removal of an adult, child or infant from hospital, residence or other place of death.
  - 20.04 Identify the procedures for dressing and casketing the remains.
  - 20.05 Identify the procedures for placing the deceased in a visitation room.
  - 20.06 Identify equipment needed to accomplish interment, inurement, and entombment.
- 21.0 Recognize the importance of inter-professional and intra-professional relationship and responsibilities. – The student will be able to:
- 21.01 Identify common interest areas existing between funeral directors and news media, the legal profession, and hospital administrators.
  - 21.02 Describe the structure and function of the Conference of Funeral Service Examining Boards, Inc.

2011 - 2012

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Dental Assisting Technology and Management  
**Career Cluster:** Health Science

	<b>AS</b>	<b>AAS</b>
CIP Number	1317010104	0317010104
Program Type	College Credit	College Credit
Standard Length	70 credit hours	70 credit hours
CTSO	HOSA	HOSA
SOC Codes (all applicable)	31-9099; 31-9091	31-9099; 31-9091
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>	
Perkins Technical Skill Attainment Inventory	<a href="http://www.fldoe.org/workforce/perkins/perkins_resources.asp">http://www.fldoe.org/workforce/perkins/perkins_resources.asp</a>	

**Purpose**

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

The program is designed to prepare students for employment as dental assistants 66002 (SOC code 31-9091), dental auxiliaries as practice managers, educational managers for dental companies, and dental assisting educators. The program will prepare students for the Dental Assisting National Board Examination as well as state requirements. The program should meet the requirements of the Commission on Dental Accreditation of the American Dental Association and standards recommended by the Florida Board of Dentistry.

Dental assisting programs accredited by the American Dental Association Council on Dental Accreditation are required to implement enrollment and admissions criteria that include a high school diploma, its equivalent, or an advanced degree.

The content includes, but is not limited to dental and general anatomy, dental terminology, nutrition, microbiology, dental pharmacology and anesthesia, chairside assisting, expanded functions, dental office emergencies/CPR, dental radiography, maintenance and asepsis of dental operatory and instruments, dental instrument and equipment utilization, dental specialty procedures, basic dental laboratory procedures, dental materials, preventive dentistry, employability skills, leadership and human relations skills, ethics and jurisprudence, dental office

and patient management, general studies, physical sciences, business principles, educational leadership, and communication skills.

This program focuses on broad, transferable skills and stresses understanding and demonstration of the following elements of the health care industry: planning, management, finance, technical and production skills, underlying principles of technology, labor issues, community issues and health, safety, environmental issues, and educational methodology and strategies.

### **Program Structure**

This program is a planned sequence of instruction consisting of 70 hours.

### **Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

Field Internship Activities: Clinical experiences are integrated with the didactic portion of this program. Clinical experience assisting a dentist must be an integral part of the educational program designed to perfect students' competence in performing dental assisting functions, rather than to provide basic instruction. The major portion of the students' time in clinical assignments must be spent assisting with or participating in patient care. Prior to clinical assignments, students demonstrate minimum competence in performing the procedures which they will be expected to perform in their clinical experience.

### **Special Notes**

This program meets the Department of Health HIV/AIDS Domestic Violence and Prevention of Medical Errors education requirements. Upon completion of this program, the instructor will provide a certificate to the student verifying that these requirements have been met.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635 F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

This program should meet the ADA accreditation standards for dental assisting education programs (c.1998). For further information, contact: American Dental Association Commission on Dental Accreditation, 211 East Chicago Avenue, Chicago, Illinois 60611.

For Florida information contact the Florida Agency for Health Care Administration (AHCA), Division of Health Quality Assurance, Board of Dentistry, 4052 Bald Cypress Way, Tallahassee, FL 32399, 850/245-4161.

Outcomes 01-11 are referred to as the Health Careers Core and do not have to be completed if the student has previously completed the Core in another health science program. The Core should be taken first or concurrently with the first course in the program. Following the successful completion of the core, the student is eligible to take the National Health Care

Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

### **Career and Technical Student Organization (CTSO)**

Health Occupations Students of America, Inc., is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

### **Articulation**

To be transferable statewide between institutions, this program must have been reviewed, and a "transfer value" assigned the curriculum content by the appropriate Statewide Course Numbering System discipline committee. This does not preclude institutions from developing specific articulation agreements with each other.

The following ATD programs articulate credit into this degree program. This statewide articulation agreement has been approved by the Articulation Coordinating Committee.

Dental Assisting and Technology Management-ATD (to be Deleted in 2011/2012) – Being determined by the Accreditation Coordinating Committee.

Dental Assisting and Technology Management NEW-ATD (created in 2010/2011) - Being determined by the Accreditation Coordinating Committee.

Standards for the above ATD programs are contained in separate curriculum frameworks.

For details on existing articulation agreements, refer to [http://www.fldoe.org/workforce/dwdframe/artic\\_frame.asp](http://www.fldoe.org/workforce/dwdframe/artic_frame.asp).

### **Program Length**

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2),

F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. The standard length of this program is 70 credit hours according to Rule 6A-14.030, F.A.C.

### **Standards**

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.
- 12.0 Use dental terminology
- 13.0 Describe the legal and ethical responsibilities of the dental health care worker.
- 14.0 Identify structures and explain functions and pathologies of dental and head and neck anatomy.
- 15.0 Identify principles of microbiology and disease prevention and perform infection control procedures
- 16.0 Identify, describe, maintain and utilize dental instruments and equipment
- 17.0 Record patient assessment and treatment data
- 18.0 Describe principles and perform techniques of preventive dentistry.
- 19.0 Identify the functions of pharmacology and anesthesia as they relate to dentistry.
- 20.0 Identify properties and uses, and manipulate dental materials.
- 21.0 Identify and perform standard dental film, digital and carpal radiographic procedures.
- 22.0 Describe functions of the dental business office and perform dental business office procedures.
- 23.0 Perform chairside assisting for general dentistry and specialty procedures.
- 24.0 Demonstrate skills necessary for educational methodologies and strategies.
- 25.0 Demonstrate skills necessary for marketing, sales, and educational programs for dental products.
- 26.0 Demonstrate knowledge of dental practice set-up and management procedures.

2011 - 2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Dental Assisting Technology and Management  
**CIP Numbers:** 1317010104 AS; 0317010104 AAS  
**Program Length:** 70 credit hours  
**SOC Code(s):** 31-9099; 31-9091

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS.

**Health Science Core: The Health Science Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Science Core in any other health occupations program do not have to repeat intended outcomes 01-11**

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:
- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
  - 01.02 Identify common methods of payment for healthcare services.
  - 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
  - 01.04 Describe the composition and functions of a healthcare team.
  - 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
  - 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
  - 01.07 Identify characteristics of effective teams.
  - 01.08 Recognize methods for building positive team relationships.
  - 01.09 Analyze attributes and attitudes of an effective leader.
  - 01.10 Recognize factors and situations that may lead to conflict.
  - 01.11 Demonstrate effective techniques for managing team conflict.
  - 01.12 Describe factors that influence the current delivery system of healthcare.
  - 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:
- 02.01 Develop basic speaking and active listening skills.
  - 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
  - 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
  - 02.04 Respond to verbal and non-verbal cues.

- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.
- 02.06 Use appropriate medical terminology and abbreviations.
- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
- 02.08 Recognize the importance of patient/client educations regarding healthcare.
- 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
- 02.10 Analyze elements of communication using a sender-receiver model.
- 02.11 Distinguish between and report subjective and objective information.
- 02.12 Report relevant information in order of occurrence.

03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:

- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
- 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
- 03.03 Demonstrate procedures for accurate documentation and record keeping.
- 03.04 Interpret healthcare facility policy and procedures.
- 03.05 Explain the “Patient’s Bill of Rights”.
- 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
- 03.07 Describe advance directives.
- 03.08 Describe informed consent.
- 03.09 Explain the laws governing harassment, labor and employment.
- 03.10 Differentiate between legal and ethical issues in healthcare.
- 03.11 Describe a code of ethics consistent with the healthcare occupation.
- 03.12 Identify and compare personal, professional, and organizational ethics.
- 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
- 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
- 03.15 Recognize and report abuse including domestic violence and neglect.
- 03.16 Distinguish among the five schedules of controlled substances.

04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:

- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
- 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
- 04.03 Identify psychological reactions to illness including defense mechanisms.
- 04.04 Identify complementary and alternative health practices.
- 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
- 04.06 Explain the basic concepts of positive self image, wellness and stress.
- 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
- 04.08 Explain the nutrition pyramid.

- 04.09 Recognize the steps in the grief process.
- 05.0 Recognize and practice safety and security procedures. – The student will be able to:
  - 05.01 Recognize safe and unsafe working conditions and report safety hazards.
  - 05.02 Demonstrate the safe use of medical equipment.
  - 05.03 Explain and apply the theory of root- cause analysis
  - 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
  - 05.05 Identify and practice security procedures for medical supplies and equipment.
  - 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions.
  - 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
  - 05.08 Demonstrate proper body mechanics and ergonomics.
  - 05.09 Demonstrate the procedure for properly identifying patients.
  - 05.10 Demonstrate procedures for the safe transport and transfer of patients.
  - 05.11 Describe fire, safety, disaster and evacuations procedures.
  - 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )
- 06.0 Recognize and respond to emergency situations. – The student will be able to:
  - 06.01 Monitor and record vital signs.
  - 06.02 Describe legal parameters relating to the administration of emergency care.
  - 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
  - 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.
- 07.0 Recognize and practice infection control procedures. – The student will be able to:
  - 07.01 Define principles of infection control including standard and transmission based precautions.
  - 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
  - 07.03 Demonstrate knowledge of surgical asepsis.
  - 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.
- 08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:
  - 08.01 Describe technology applications in healthcare.
  - 08.02 Define terms and demonstrate basic computer skills.
  - 08.03 Recognize technology applications in healthcare.
  - 08.04 Interpret information from electronic medical documents.
  - 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.

09.0 Demonstrate employability skills. – The student will be able to:

- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.
- 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
- 09.03 Identify documents that may be required when applying for a job.
- 09.04 Write an appropriate resume.
- 09.05 Conduct a job search.
- 09.06 Complete a job application form correctly.
- 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
- 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
- 09.09 Identify acceptable work habits.
- 09.10 Recognize appropriate affective/professional behavior.
- 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).

10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:

- 10.01 Recognize emerging diseases and disorders
- 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
- 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
- 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
- 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
- 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.

11.0 Apply basic math and science skills. – The student will be able to:

- 11.01 Draw, read, and report on graphs, charts and tables.
- 11.02 Measure time, temperature, distance, capacity, and mass/weight.
- 11.03 Make, use and convert using both traditional and metric units.
- 11.04 Make estimations and approximations and judge the reasonableness of the result.
- 11.05 Convert from regular to 24 hour time.
- 11.06 Demonstrate ability to evaluate and draw conclusions.
- 11.07 Organize and communicate the results obtained by observation and experimentation.
- 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
- 11.09 Calculate ratios

**Students completing the following intended outcomes (12-23) meet the requirements of the Dental Assisting Technology and Management-ATD program 66002(SOC code 31-9099 and 31-9091)**

- 12.0 Use dental terminology. --The student will be able to:
  - 12.01 Identify and define common dental terms.
  - 12.02 Demonstrate the use of proper dental terminology in the dental environment.
  
- 13.0 Describe the legal and ethical responsibilities of the dental health care worker. --The student will be able to:
  - 13.01 Define commonly used legal vocabulary relating to dentistry.
  - 13.02 Describe ethical considerations/obligations in the dental team-patient relationship.
  - 13.03 Explain risk management.
  - 13.04 Identify areas of Florida Statute 466 and Rule 64B5-16 FAC applicable to practice by the dental health workers.
  - 13.05 Implement appropriate Joint Commission patient safety goals.
  
- 14.0 Identify structures and explain functions and pathologies of dental and general head and neck anatomy. --The student will be able to:
  - 14.01 Identify structures and functions of head and neck anatomy including bones, muscles, sinuses, salivary glands, nerves and blood vessels.
  - 14.02 Identify embryonic development of head, oral cavity, and teeth.
  - 14.03 Identify teeth and their landmarks.
  - 14.04 Describe the histological components of the head, oral cavity, and elements of the teeth and supporting structures.
  - 14.05 Recognize and describe oral pathological conditions.
  
- 15.0 Identify principles of microbiology and disease prevention and perform infection control procedures.--The student will be able to:
  - 15.01 Differentiate between pathogenic and non-pathogenic microorganisms.
  - 15.02 Describe pathogens and modes of disease transmission.
  - 15.03 Differentiate between aseptic and non-aseptic environments.
  - 15.04 Perform aseptic handwashing technique.
  - 15.05 Describe and apply methods of cleaning, disinfection and sterilization.
  - 15.06 Identify chemicals and their uses for controlling the spread of disease in the dental environment
  - 15.07 Identify and practice the current CDC guidelines for infection control in dental healthcare settings.
  - 15.08 Describe the duties of the dental office safety coordinator
  - 15.09 Identify areas of the OSHA Bloodborne Pathogens Standard (29CFR-1910.1030) applicable to the dental office environment

- 16.0 Identify, describe, maintain and utilize dental instruments and equipment.--The student will be able to:
- 16.01 Identify various types, functions and operations of dental operator and laboratory equipment.
  - 16.02 Identify types and functions of operative, restorative, surgical, *prosthodontic*, orthodontic and endodontic dental instruments.
  - 16.03 Maintain dental operator equipment and instruments.
  - 16.04 Identify types and functions of specific dental hygiene instruments with emphasis on category rather than individual instruments.
- 17.0 Record patient assessment and treatment data.--The student will be able to:
- 17.01 Take and record medical-dental histories.
  - 17.02 Record assessment of existing oral conditions.
  - 17.03 Record conditions diagnosed by the dentist.
  - 17.04 Record treatment-related data on the patient's clinical record
  - 17.05 Record treatment plan and treatment in patient's chart
- 18.0 Describe principles and perform techniques of preventive dentistry.--The student will be able to:
- 18.01 Identify and instruct patients on applicable methods of preventive dentistry.
  - 18.02 Prepare, set up for oral prophylaxis, and apply anticariogenic treatments.
  - 18.03 Identify the elements of nutrition, basic food groups, and acceptable diets.
  - 18.04 Identify dietary deficiencies and dietary practices that contribute to the manifestation of symptoms in the oral cavity.
- 19.0 Identify the functions of pharmacology and anesthesia as they relate to dentistry.--The student will be able to:
- 19.01 Identify drug requirements, agencies, and regulations.
  - 19.02 Record a drug prescription in a patient's chart.
  - 19.03 Identify drug actions, side effects, indications and contraindications; verify with Physician's Desk Reference or its equivalent.
  - 19.04 Identify common drugs used in dentistry.
  - 19.05 Prepare and apply topical anesthetic agent.
  - 19.06 Identify properties of anesthetics.
  - 19.07 Prepare syringes for the administration of local anesthetics.
  - 19.08 Monitor and identify precautions in the use of nitrous oxide-oxygen conscious sedation.
  - 19.09 Identify drugs and agents used for treating dental-related infection
  - 19.10 Describe dental office emergencies and their prevention and treatment.
- 20.0 Identify properties and uses, and manipulate dental materials.--The student will be able to:
- 20.01 Identify properties and uses and manipulate gypsum.
  - 20.02 Identify properties and uses and manipulate restorative materials.
  - 20.03 Identify properties and uses and manipulate dental cements.
  - 20.04 Identify properties and uses and manipulate impression materials.

- 20.05 Identify properties and uses and manipulate acrylics and/or thermoplastics.
  - 20.06 Identify properties and uses and manipulate waxes.
  - 20.07 Perform dental laboratory procedures to include the fabrication of casts, custom trays and/or temporary crowns and bridges.
  - 20.08 Clean and polish removable dental appliances.
  - 20.09 Identify properties and uses of abrasive agents used to polish coronal surfaces and appliances.
  - 20.10 Identify and manage hazardous dental materials and wastes in accordance with the OSHA Hazard Communications Standard and Environmental Protection Agency regulations.
- 21.0 Identify and perform dental and carpal radiographic procedures.--The student will be able to:
- 21.01 Describe history, physics and biological effects of ionizing radiation.
  - 21.02 Identify parts of the X-ray machine including accessories.
  - 21.03 Demonstrate radiologic health protection techniques.
  - 21.04 Perform dark room/processing procedures, mix solutions.
  - 21.05 Describe the proper disposal of hazardous radiographic waste
  - 21.06 Place and expose dental radiographic films and digital sensors.
  - 21.07 Perform carpal radiography as required for dental diagnostic procedures
  - 21.08 Identify radiographic anatomical landmarks and pathologies.
  - 21.09 Mount radiographic surveys.
  - 21.10 Maintain unexposed film inventory and storage.
  - 21.11 Maintain digitally acquired radiographic images
- 22.0 Perform general dental business office procedures.--The student will be able to:
- 22.01 Maintain appointment control.
  - 22.02 Maintain an active recall system.
  - 22.03 Prepare and maintain accurate patient records.
  - 22.04 Prepare and maintain patient financial records, collect fees.
  - 22.05 Prepare and maintain office financial records.
  - 22.06 Prepare and maintain dental office inventory control and purchasing.
  - 22.07 Demonstrate public relations responsibilities of the secretary/receptionist.
  - 22.08 Demonstrate skills on office equipment.
  - 22.09 Maintain the dental business office environment.
  - 22.10 Receive and dismiss patients and visitors.
  - 22.11 Identify psychological considerations influencing behaviors of dental patients
- 23.0 Perform chairside assisting for general dentistry and specialty procedures.--The student will be able to:
- 23.01 Prepare and maintain aseptic working area and sterile instruments for intraoral procedures.
  - 23.02 Apply principles of four handed dentistry
  - 23.03 Evacuate and maintain the operating field.
  - 23.04 Perform expanded functions as permitted by the Florida statute/law pertaining to dentistry.
  - 23.05 Assemble instruments and assist in general and specialty dental procedures.
  - 23.06 Prepare tray set-ups for specific specialty procedures.

- 23.07 Select, prepare, mix, and manipulate correct dental materials for general and specialty procedures.
- 23.08 Perform a visual assessment of existing oral conditions.
- 23.09 Demonstrate appropriate patient management skills.

### **Specialty Option 1: Education**

- 24.0 Demonstrate skills for educational methodologies and strategies.--The student will be able to:
  - 24.01 Develop and implement policies and operational procedures that meet the American Dental Association accreditation standards for Allied Dental Programs.
  - 24.02 Identify and describe educational theory and methodology as they relate to Allied Dental Education.
  - 24.03 Establish liaison with appropriate accrediting organizations, community partners, and educational institutions.

### **Specialty Option 2: Product Marketing, Sales, and Educational Programs**

- 25.0 Demonstrate skills necessary for marketing, sales, and educational programs for dental products.--The student will be able to:
  - 25.01 Establish educational programs relating the value and effectiveness of various dental products.
  - 25.02 Apply economic principles for product marketing, distribution and sales.
  - 25.03 Demonstrate effective product evaluation and comparison.
  - 25.04 Identify appropriate consumer populations.

### **Specialty Option 3: Dental Practice Management**

- 26.0 Demonstrate knowledge of dental practice set up and management procedures.--The student will be able to:
  - 26.01 Establish policies and procedures for dental practice operations.
  - 26.02 Identify roles and responsibilities of all employees.
  - 26.03 Implement policies and procedures for establishing effective management of a dental practice.

2011 - 2012

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Dental Assisting Technology and Management – ATD  
**Program Type:** ATD (Applied Technology Diploma)  
**Career Cluster:** Health Science

	<b>CC</b>	<b>PSAV</b>
Program Number	N/A	H170105
CIP Number	0317010108	0317010109
Grade Level	Applied Technology Diploma (ATD)	Applied Technology Diploma (ATD)
Standard Length	50 credit hours	1230 hours
CTSO	HOSA	HOSA
SOC Codes (all applicable)	31-9099; 31-9091	31-9099; 31-9091
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>	
Basic Skills Level	Mathematics: 10 Language: 10 Reading: 10	

### **Purpose**

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

The program is designed to prepare students for employment as dental assistants 66002(SOC code 31-9091), educational managers for dental companies, and dental assisting educators. The program will prepare students for the Dental Assisting National Board Examination as well as state requirements. The program should meet the requirements of the Commission on Dental Accreditation of the American Dental Association and standards recommended by the Florida Board of Dentistry.

Dental assisting programs accredited by the American Dental Association Council on Dental Accreditation are required to implement enrollment and admissions criteria that include a high school diploma, its equivalent, or an advanced degree.

The content includes, but is not limited to, dental office and patient management, basic dental laboratory procedures, dental and general anatomy, dental terminology, nutrition, dental instrument and equipment utilization, microbiology, dental pharmacology and anesthesia,

chairside assisting and expanded functions, dental office emergencies/CPR, dental radiography, maintenance and asepsis of dental operatory and instrumentation, dental specialty procedures, employability skills, leadership and human relations skills, ethics and jurisprudence, dental materials and preventive dentistry.

This program focuses on broad, transferable skills and stresses understanding and demonstration of the following elements of the health care industry; planning, management, finance, technical and production skills, underlying principles of technology, labor issues, community issues and health, safety, and environmental issues.

### **Program Structure**

This program is an Applied Technology Diploma program that is part of a technical degree program, is less than 60 credit hours, and leads to employment in a specific occupation. An applied technology diploma program may consist of either technical credit or college credit. A public school district may offer an applied technology diploma program only as technical credit, with college credit awarded to a student upon articulation to a community college.

### **PSAV Program**

When offered at the district level, this program is a planned sequence of instruction consisting of 2 occupational completion points and the courses as shown below.

OCP	Course Number	Course Title	Course Length	SOC Code
A	HSC0003	Basic Healthcare Worker	90 hours	31-9099
B	DEA0720	Dental Sterile Technician	160 hours	31-9099
C	DEA0721	Dental Assistant 1	215 hours	31-9091
	DEA0722	Dental Assistant 2	315 hours	31-9091
	DEA0723	Dental Assistant 3	450 hours	31-9091

### **Community College**

When offered at the community college level, this ATD program is part of the Dental Assisting technology and Management AS/AAS program (1317010104) and has a program length of 50 credits.

### **Laboratory and Clinical Activities**

Laboratory activities are an integral part of this program and are integrated with the didactic portion of the program. These activities include instruction in the use of safety procedures, instruments, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

Field Internship Activities: Clinical experiences are integrated with the didactic portion of this program. Clinical experience assisting a dentist must be an integral part of the educational

program designed to perfect students' competence in performing dental assisting functions, rather than to provide basic instruction. The major portion of the students' time in clinical assignments must be spent assisting with or participating in patient care. Prior to clinical assignments, students demonstrate minimum competence in performing the procedures which they will be expected to perform in their clinical experience.

### **Special Notes**

Either a community college or school district may offer the Applied Technology Diploma program. A community college may offer as either college credit or vocational credit. A vocational technical center may offer as vocational credit only. Students completing an ATD at a vocational technical center will be awarded the guaranteed college credit upon enrollment at the community college.

Minimum entrance requirements for this program includes a high school diploma or GED. Students must meet the minimum basic skills to complete this program.

Faculty teaching this program must have a minimum of a bachelor's degree or an associate degree and demonstrated competencies in the specialty area .

No fees will be charged for the transfer of credit from a technical center to a community college. The established statewide fee structure will be adhered to by both delivery systems.

This program meets the Department of Health HIV/AIDS Domestic Violence and Prevention of Medical Errors education requirements. Upon completion of this program, the instructor will provide a certificate to the student verifying that these requirements have been met.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635 F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

This program should meet the most current edition of the American Dental Association Accreditation Standards for Dental Assisting Education Programs (c.1992). For further information, contact: American Dental Association Commission on Dental Accreditation, 211 East Chicago Avenue, Chicago, Illinois 60611.  
<http://www.ada.org/prof/ed/accred/standards/index.asp>

For Florida information contact the Florida Agency for Health Care Administration (AHCA), Division of Health Quality Assurance, Board of Dentistry, 4052 Bald Cypress Way, Tallahassee, FL 32399, 850/245-4161.

Outcomes 01-11 are referred to as the Health Careers Core and do not have to be completed if the student has previously completed the Core in another health science program. The Core should be taken first or concurrently with the first course in the program. Following the successful completion of the core, the student is eligible to take the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

## **Career and Technical Student Organization (CTSO)**

Health Occupations Students of America, Inc., is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

## **Basic Skills**

In PSAV programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C. the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Mathematics 10, Language 10, and Reading 10. These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination. Students may be exempt from meeting the Basic Skills requirements by earning an eligible industry certification. See the Basic Skills Exemption List document for a list of eligible industry certifications (<http://www.fldoe.org/workforce/dwdframe/rtf/basic-skills.rtf>).

Adult students with disabilities, as defined in Section 1004.02(7), Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01(3)(a), F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91(3), F.S.

Students who possess a college degree at the Associate of Applied Science level or higher; who have completed or are exempt from the college entry-level examination pursuant to Section 1008.29, F.S.; or who have passed a state, national, or industry licensure exam are exempt from meeting the Basic Skills requirement (Rule 6A-10.040, F.A.C.)

## **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Some secondary students with disabilities (ESE) may need additional time (i.e., longer than the regular school year), to master the student performance standards associated with a regular occupational completion point (OCP) or a modified occupational completion point (MOCP). If needed, a student may enroll in the same career and technical course more than once. Documentation should be included in the IEP that clearly indicates that it is anticipated that the student may need an additional year to complete an OCP/MOCP. The student should work on different competencies and new applications of competencies each year toward completion of

the OCP(s)/MOCP. After achieving the competencies identified for the year, the student earns credit for the course. It is important to ensure that credits earned by students are reported accurately. The district's information system must be designed to accept multiple credits for the same course number (for eligible students with disabilities). For further information, see Rule 6A-6.0312, F.A.C., Course Modifications for Exceptional Students, and the latest pertinent Technical Assistance Paper (<http://www.fldoe.org/ese/tap-home.asp>).

### **Articulation**

The information related to the guaranteed transfer of credit between an applied technology diploma program and AS/AAS degree must be documented and maintained by the Articulation Coordinating Committee (ACC). The transfer of the applied technology diploma to an AS/AAS degree is guaranteed for a period of three (3) years following the date of the award of the applied technology diploma.

### **Program Length**

In accordance with Rule 6A-10.024, F.A.C. an Applied Technology Diploma program consists of a course of study that is part of an AS/AAS degree program, is less than 60 credit hours, is approximately 50% of the technical component (non-general education), and leads to employment in a specific occupation. An applied technology diploma program may consist of either technical credit or college credit.

Students must have a high school diploma, a GED, or a certificate of completion to be admitted to an applied technology diploma program. Within six weeks of entry, students in ATD programs of 450 or more hours must be tested pursuant to Rule 6A-10.040, F.A.C. and if below minimum standards for completion from the program, must receive remedial instruction. The minimum standards must be at least the equivalent of a score of ten (10) on all sections of basic skills test approved in Rule 6A-10.040, F.A.C. Students must successfully complete all remedial instruction before completing the Applied Technology Diploma.

Community Colleges may offer either college or career credit toward the applied technology diploma. A Career Center in a public school district may offer an applied technology diploma program only as technical credit, with college credit awarded to a student upon articulation to a community college (Section 1004.02, F.S.)

When offered at a community college the standard length of this program is 50 credits. When offered at a technical center the standard length of this program is 1230 clock hours.

In accordance with Rule 6A-10.024, F.A.C. all faculty providing instruction must have at least a baccalaureate degree or an associate degree with demonstrated competencies in the specific instructional program as defined by the Southern Association of Colleges and Schools.

### **Standards**

After successfully completing this program the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.

- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.
- 12.0 Use Dental Terminology
- 13.0 Describe the legal and ethical responsibilities of the dental health care worker.
- 14.0 Identify structures and explain functions and pathologies of dental and head and neck anatomy.
- 15.0 Identify principles of microbiology and disease prevention and perform infection control procedures
- 16.0 Identify, describe, maintain and utilize dental instruments and equipment
- 17.0 Record patient assessment and treatment data
- 18.0 Describe principles and perform techniques of preventive dentistry.
- 19.0 Identify the functions of pharmacology and anesthesia as they relate to dentistry.
- 20.0 Identify properties and uses, and manipulate dental materials.
- 21.0 Identify and perform standard dental film, digital and carpal radiographic procedures.
- 22.0 Describe functions of the dental business office and perform dental business office procedures.
- 23.0 Perform chairside assisting for general dentistry and specialty procedures.

2011 - 2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Dental Assisting technology and Management – ATD  
**PSAV Number:** H170100

**PSAV Course Number:** HSC0003  
**Occupational Completion Point:** A  
**Healthcare Support Worker – 90 Hours – SOC Code 31-9099**

When this program is offered at the PSAV level, the following organization of courses, standards, and benchmarks apply.

**Health Science Core:** The Health Science Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Science Core in any other health occupations program do not have to repeat intended outcomes 01-11

At the completion of this program, the student will be able to:

01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:

- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
- 01.02 Identify common methods of payment for healthcare services.
- 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
- 01.04 Describe the composition and functions of a healthcare team.
- 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
- 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
- 01.07 Identify characteristics of effective teams.
- 01.08 Recognize methods for building positive team relationships.
- 01.09 Analyze attributes and attitudes of an effective leader.
- 01.10 Recognize factors and situations that may lead to conflict.
- 01.11 Demonstrate effective techniques for managing team conflict.
- 01.12 Describe factors that influence the current delivery system of healthcare.
- 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.

02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:

- 02.01 Develop basic speaking and active listening skills.
- 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
- 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
- 02.04 Respond to verbal and non-verbal cues.

- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.
- 02.06 Use appropriate medical terminology and abbreviations.
- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
- 02.08 Recognize the importance of patient/client educations regarding healthcare.
- 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
- 02.10 Analyze elements of communication using a sender-receiver model.
- 02.11 Distinguish between and report subjective and objective information.
- 02.12 Report relevant information in order of occurrence.

03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:

- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
- 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
- 03.03 Demonstrate procedures for accurate documentation and record keeping.
- 03.04 Interpret healthcare facility policy and procedures.
- 03.05 Explain the “Patient’s Bill of Rights”.
- 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
- 03.07 Describe advance directives.
- 03.08 Describe informed consent.
- 03.09 Explain the laws governing harassment, labor and employment.
- 03.10 Differentiate between legal and ethical issues in healthcare.
- 03.11 Describe a code of ethics consistent with the healthcare occupation.
- 03.12 Identify and compare personal, professional, and organizational ethics.
- 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
- 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
- 03.15 Recognize and report abuse including domestic violence and neglect.
- 03.16 Distinguish among the five schedules of controlled substances.

04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:

- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
- 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
- 04.03 Identify psychological reactions to illness including defense mechanisms.
- 04.04 Identify complementary and alternative health practices.
- 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
- 04.06 Explain the basic concepts of positive self image, wellness and stress.
- 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
- 04.08 Explain the nutrition pyramid.

- 04.09 Recognize the steps in the grief process.
- 05.0 Recognize and practice safety and security procedures. – The student will be able to:
  - 05.01 Recognize safe and unsafe working conditions and report safety hazards.
  - 05.02 Demonstrate the safe use of medical equipment.
  - 05.03 Explain and apply the theory of root- cause analysis
  - 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
  - 05.05 Identify and practice security procedures for medical supplies and equipment.
  - 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions.
  - 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
  - 05.08 Demonstrate proper body mechanics and ergonomics.
  - 05.09 Demonstrate the procedure for properly identifying patients.
  - 05.10 Demonstrate procedures for the safe transport and transfer of patients.
  - 05.11 Describe fire, safety, disaster and evacuations procedures.
  - 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )
- 06.0 Recognize and respond to emergency situations. – The student will be able to:
  - 06.01 Monitor and record vital signs.
  - 06.02 Describe legal parameters relating to the administration of emergency care.
  - 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
  - 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.
- 07.0 Recognize and practice infection control procedures. – The student will be able to:
  - 07.01 Define principles of infection control including standard and transmission based precautions.
  - 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
  - 07.03 Demonstrate knowledge of surgical asepsis.
  - 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.
- 08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:
  - 08.01 Describe technology applications in healthcare.
  - 08.02 Define terms and demonstrate basic computer skills.
  - 08.03 Recognize technology applications in healthcare.
  - 08.04 Interpret information from electronic medical documents.
  - 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.

09.0 Demonstrate employability skills. – The student will be able to:

- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.
- 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
- 09.03 Identify documents that may be required when applying for a job.
- 09.04 Write an appropriate resume.
- 09.05 Conduct a job search.
- 09.06 Complete a job application form correctly.
- 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
- 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
- 09.09 Identify acceptable work habits.
- 09.10 Recognize appropriate affective/professional behavior.
- 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).

10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:

- 10.01 Recognize emerging diseases and disorders
- 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
- 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
- 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
- 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
- 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.

11.0 Apply basic math and science skills. – The student will be able to:

- 11.01 Draw, read, and report on graphs, charts and tables.
- 11.02 Measure time, temperature, distance, capacity, and mass/weight.
- 11.03 Make, use and convert using both traditional and metric units.
- 11.04 Make estimations and approximations and judge the reasonableness of the result.
- 11.05 Convert from regular to 24 hour time.
- 11.06 Demonstrate ability to evaluate and draw conclusions.
- 11.07 Organize and communicate the results obtained by observation and experimentation.
- 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
- 11.09 Calculate ratios

**Course Number: DEA0720**  
**Occupational Completion Point: B (17-20)**  
**Dental Sterile Technician – 160 Hours – SOC Code 31-9099**

- 12.0 Use dental terminology.--The student will be able to:
- 12.01 Identify and define common dental terms.
  - 12.02 Demonstrate the use of proper dental terminology in the dental environment.
- 13.0 Describe the legal and ethical responsibilities of the dental health care worker.--The student will be able to:
- 13.01 Define commonly used legal vocabulary relating to dentistry.
  - 13.02 Describe ethical considerations/obligations in the dental team-patient relationship.
  - 13.03 Explain risk management.
  - 13.04 Identify areas of Florida Statute 466 and Rule 64B5-16 FAC applicable to practice by the dental health workers.
  - 13.05 Implement appropriate Joint Commission patient safety goals.
- 14.0 Identify structures and explain functions and pathologies of dental and general head and neck anatomy.--The student will be able to:
- 14.01 Identify structures and functions of head and neck anatomy including bones, muscles, sinuses, salivary glands, nerves and blood vessels.
  - 14.02 Identify embryonic development of head, oral cavity, and teeth.
  - 14.03 Identify teeth and their landmarks.
  - 14.04 Describe the histological components of the head, oral cavity, and elements of the teeth and supporting structures.
  - 14.05 Recognize and describe oral pathological conditions.
- 15.0 Identify principles of microbiology and disease prevention and perform infection control procedures.--The student will be able to:
- 15.01 Differentiate between pathogenic and non-pathogenic microorganisms.
  - 15.02 Describe pathogens and modes of disease transmission.
  - 15.03 Differentiate between aseptic and non-aseptic environments.
  - 15.04 Perform aseptic handwashing technique.
  - 15.05 Describe and apply methods of cleaning, disinfection and sterilization.
  - 15.06 Identify chemicals and their uses for controlling the spread of disease in the dental environment
  - 15.07 Identify and practice the current CDC guidelines for infection control in dental healthcare settings.
  - 15.08 Describe the duties of the dental office safety coordinator
  - 15.09 Identify areas of the OSHA Bloodborne Pathogens Standard (29CFR-1910.1030) applicable to the dental office environment

- 16.0 Identify, describe, maintain and utilize dental instruments and equipment.--The student will be able to:
- 16.01 Identify various types, functions and operations of dental operator and laboratory equipment.
  - 16.02 Identify types and functions of operative, restorative, surgical, *prosthodontic*, orthodontic and endodontic dental instruments.
  - 16.03 Maintain dental operator equipment and instruments.
  - 16.04 Identify types and functions of specific dental hygiene instruments with emphasis on category rather than individual instruments.

**Course Number: DEA0721**  
**Occupational Completion Point: C (21-23)**  
**Dental Assistant 1– 215 Hours – SOC Code 31-9091**

- 17.0 Record patient assessment and treatment data.--The student will be able to:
- 17.01 Take and record medical-dental histories.
  - 17.02 Record assessment of existing oral conditions.
  - 17.03 Record conditions diagnosed by the dentist.
  - 17.04 Record treatment-related data on the patient's clinical record
  - 17.05 Record treatment plan and treatment in patient's chart
- 18.0 Describe principles and perform techniques of preventive dentistry.--The student will be able to:
- 18.01 Identify and instruct patients on applicable methods of preventive dentistry.
  - 18.02 Prepare, set up for oral prophylaxis, and apply anticariogenic treatments.
  - 18.03 Identify the elements of nutrition, basic food groups, and acceptable diets.
  - 18.04 Identify dietary deficiencies and dietary practices that contribute to the manifestation of symptoms in the oral cavity.
- 19.0 Identify the functions of pharmacology and anesthesia as they relate to dentistry.--The student will be able to:
- 19.01 Identify drug requirements, agencies, and regulations.
  - 19.02 Record a drug prescription in a patient's chart.
  - 19.03 Identify drug actions, side effects, indications and contraindications; verify with Physician's Desk Reference or its equivalent.
  - 19.04 Identify common drugs used in dentistry.
  - 19.05 Prepare and apply topical anesthetic agent.
  - 19.06 Identify properties of anesthetics.
  - 19.07 Prepare syringes for the administration of local anesthetics.
  - 19.08 Monitor and identify precautions in the use of nitrous oxide-oxygen conscious sedation.
  - 19.09 Identify drugs and agents used for treating dental-related infection
  - 19.10 Describe dental office emergencies and their prevention

**Course Number: DEA0722**  
**Occupational Completion Point: C (24-26)**  
**Dental Assistant 2– 315 Hours – SOC Code 31-9091**

20.0 Identify properties and uses, and manipulate dental materials.--The student will be able to:

- 20.01 Identify properties and uses and manipulate gypsum.
- 20.02 Identify properties and uses and manipulate restorative materials.
- 20.03 Identify properties and uses and manipulate dental cements.
- 20.04 Identify properties and uses and manipulate impression materials.
- 20.05 Identify properties and uses and manipulate acrylics and/or thermoplastics.
- 20.06 Identify properties and uses and manipulate waxes.
- 20.07 Perform dental laboratory procedures to include the fabrication of casts, custom trays and/or temporary crowns and bridges.
- 20.08 Clean and polish removable dental appliances.
- 20.09 Identify properties and uses of abrasive agents used to polish coronal surfaces and appliances.
- 20.10 Identify and manage hazardous dental materials and wastes in accordance with the OSHA Hazard Communications Standard and Environmental Protection Agency regulations.

21.0 Identify and perform dental and carpal radiographic procedures.--The student will be able to:

- 21.01 Describe history, physics and biological effects of ionizing radiation.
- 21.02 Identify parts of the X-ray machine including accessories.
- 21.03 Demonstrate radiologic health protection techniques.
- 21.04 Perform dark room/processing procedures, mix solutions.
- 21.05 Describe the proper disposal of hazardous radiographic waste
- 21.06 Place and expose dental radiographic films and digital sensors.
- 21.07 Perform carpal radiography as required for dental diagnostic procedures
- 21.08 Identify radiographic anatomical landmarks and pathologies.
- 21.09 Mount radiographic surveys.
- 21.10 Maintain unexposed film inventory and storage.
- 21.11 Maintain digitally acquired radiographic images

22.0 Perform general dental business office procedures.--The student will be able to:

- 22.01 Maintain appointment control.
- 22.02 Maintain an active recall system.
- 22.03 Prepare and maintain accurate patient records.
- 22.04 Prepare and maintain patient financial records, collect fees.
- 22.05 Prepare and maintain office financial records.
- 22.06 Prepare and maintain dental office inventory control and purchasing.
- 22.07 Demonstrate public relations responsibilities of the secretary/receptionist.
- 22.08 Demonstrate skills on office equipment.
- 22.09 Maintain the dental business office environment.
- 22.10 Receive and dismiss patients and visitors.
- 22.11 Identify psychological considerations influencing behaviors of dental patients

**Course Number: DEA0723**  
**Occupational Completion Point: C (27)**  
**Dental Assistant 3– 450 Hours – SOC Code 31-9091**

23.0 Perform chairside assisting for general dentistry and specialty procedures.--The student will be able to:

- 23.01 Prepare and maintain aseptic working area and sterile instruments for intraoral procedures.
- 23.02 Apply principles of four handed dentistry
- 23.03 Evacuate and maintain the operating field.
- 23.04 Perform expanded functions as permitted by the Florida statute/law pertaining to dentistry.
- 23.05 Assemble instruments and assist in general and specialty dental procedures.
- 23.06 Prepare tray set-ups for specific specialty procedures.
- 23.07 Select, prepare, mix, and manipulate correct dental materials for general and specialty procedures.
- 23.08 Perform a visual assessment of existing oral conditions.
- 23.09 Demonstrate appropriate patient management skills.

2011 - 2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Dental Assisting Technology and Management  
**ATD CIP Number:** 0317010106 and 0317010105  
**SOC Code(s):** 31-9099; 31-9091

When this program is offered by a community or state college, the following standards, and benchmarks apply.

**Health Science Core:** The Health Science Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Science Core in any other health occupations program do not have to repeat intended outcomes 01-11

01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:

- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
- 01.02 Identify common methods of payment for healthcare services.
- 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
- 01.04 Describe the composition and functions of a healthcare team.
- 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
- 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
- 01.07 Identify characteristics of effective teams.
- 01.08 Recognize methods for building positive team relationships.
- 01.09 Analyze attributes and attitudes of an effective leader.
- 01.10 Recognize factors and situations that may lead to conflict.
- 01.11 Demonstrate effective techniques for managing team conflict.
- 01.12 Describe factors that influence the current delivery system of healthcare.
- 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.

02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:

- 02.01 Develop basic speaking and active listening skills.
- 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
- 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
- 02.04 Respond to verbal and non-verbal cues.
- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.
- 02.06 Use appropriate medical terminology and abbreviations.

- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
  - 02.08 Recognize the importance of patient/client educations regarding healthcare.
  - 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
  - 02.10 Analyze elements of communication using a sender-receiver model.
  - 02.11 Distinguish between and report subjective and objective information.
  - 02.12 Report relevant information in order of occurrence.
- 03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:
- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
  - 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
  - 03.03 Demonstrate procedures for accurate documentation and record keeping.
  - 03.04 Interpret healthcare facility policy and procedures.
  - 03.05 Explain the “Patient’s Bill of Rights”.
  - 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
  - 03.07 Describe advance directives.
  - 03.08 Describe informed consent.
  - 03.09 Explain the laws governing harassment, labor and employment.
  - 03.10 Differentiate between legal and ethical issues in healthcare.
  - 03.11 Describe a code of ethics consistent with the healthcare occupation.
  - 03.12 Identify and compare personal, professional, and organizational ethics.
  - 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
  - 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
  - 03.15 Recognize and report abuse including domestic violence and neglect.
  - 03.16 Distinguish among the five schedules of controlled substances.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:
- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
  - 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
  - 04.03 Identify psychological reactions to illness including defense mechanisms.
  - 04.04 Identify complementary and alternative health practices.
  - 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
  - 04.06 Explain the basic concepts of positive self image, wellness and stress.
  - 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
  - 04.08 Explain the nutrition pyramid.
  - 04.09 Recognize the steps in the grief process.
- 05.0 Recognize and practice safety and security procedures. – The student will be able to:

- 05.01 Recognize safe and unsafe working conditions and report safety hazards.
  - 05.02 Demonstrate the safe use of medical equipment.
  - 05.03 Explain and apply the theory of root- cause analysis
  - 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
  - 05.05 Identify and practice security procedures for medical supplies and equipment.
  - 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions).
  - 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
  - 05.08 Demonstrate proper body mechanics and ergonomics.
  - 05.09 Demonstrate the procedure for properly identifying patients.
  - 05.10 Demonstrate procedures for the safe transport and transfer of patients.
  - 05.11 Describe fire, safety, disaster and evacuations procedures.
  - 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )
- 06.0 Recognize and respond to emergency situations. – The student will be able to:
- 06.01 Monitor and record vital signs.
  - 06.02 Describe legal parameters relating to the administration of emergency care.
  - 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
  - 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.
- 07.0 Recognize and practice infection control procedures. – The student will be able to:
- 07.01 Define principles of infection control including standard and transmission based precautions.
  - 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
  - 07.03 Demonstrate knowledge of surgical asepsis.
  - 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.
- 08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:
- 08.01 Describe technology applications in healthcare.
  - 08.02 Define terms and demonstrate basic computer skills.
  - 08.03 Recognize technology applications in healthcare.
  - 08.04 Interpret information from electronic medical documents.
  - 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.
- 09.0 Demonstrate employability skills. – The student will be able to:
- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.

- 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
  - 09.03 Identify documents that may be required when applying for a job.
  - 09.04 Write an appropriate resume.
  - 09.05 Conduct a job search.
  - 09.06 Complete a job application form correctly.
  - 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
  - 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
  - 09.09 Identify acceptable work habits.
  - 09.10 Recognize appropriate affective/professional behavior.
  - 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:
- 10.01 Recognize emerging diseases and disorders
  - 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
  - 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
  - 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
  - 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
  - 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.
- 11.0 Apply basic math and science skills. – The student will be able to:
- 11.01 Draw, read, and report on graphs, charts and tables.
  - 11.02 Measure time, temperature, distance, capacity, and mass/weight.
  - 11.03 Make, use and convert using both traditional and metric units.
  - 11.04 Make estimations and approximations and judge the reasonableness of the result.
  - 11.05 Convert from regular to 24 hour time.
  - 11.06 Demonstrate ability to evaluate and draw conclusions.
  - 11.07 Organize and communicate the results obtained by observation and experimentation.
  - 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
  - 11.09 Calculate ratios

**Students completing the following intended outcomes (12-23) meet the requirements of the Dental Assisting Technology and Management-ATD program 66002(SOC code 31-9099 and 31-9091)**

- 12.0 Use dental terminology.--The student will be able to:
  - 12.01 Identify and define common dental terms.
  - 12.02 Demonstrate the use of proper dental terminology in the dental environment.
  
- 13.0 Describe the legal and ethical responsibilities of the dental health care worker.--The student will be able to:
  - 13.01 Define commonly used legal vocabulary relating to dentistry.
  - 13.02 Describe ethical considerations/obligations in the dental team-patient relationship.
  - 13.03 Explain risk management.
  - 13.04 Identify areas of Florida Statute 466 and Rule 64B5-16 FAC applicable to practice by the dental health workers.
  - 13.05 Implement appropriate JCAHO patient safety goals.
  
- 14.0 Identify structures and explain functions and pathologies of dental and general head and neck anatomy.--The student will be able to:
  - 14.01 Identify structures and functions of head and neck anatomy including bones, muscles, sinuses, salivary glands, nerves and blood vessels.
  - 14.02 Identify embryonic development of head, oral cavity, and teeth.
  - 14.03 Identify teeth and their landmarks.
  - 14.04 Describe the histological components of the head, oral cavity, and elements of the teeth and supporting structures.
  - 14.05 Recognize and describe oral pathological conditions.
  
- 15.0 Identify principles of microbiology and disease prevention and perform infection control procedures.--The student will be able to:
  - 15.01 Differentiate between pathogenic and non-pathogenic microorganisms.
  - 15.02 Describe pathogens and modes of disease transmission.
  - 15.03 Differentiate between aseptic and non-aseptic environments.
  - 15.04 Perform aseptic handwashing technique.
  - 15.05 Describe and apply methods of cleaning, disinfection and sterilization.
  - 15.06 Identify chemicals and their uses for controlling the spread of disease in the dental environment
  - 15.07 Identify and practice the current CDC guidelines for infection control in dental healthcare settings.
  - 15.08 Describe the duties of the dental office safety coordinator
  - 15.09 Identify areas of the OSHA Bloodborne Pathogens Standard (29CFR-1910.1030) applicable to the dental office environment
  
- 16.0 Identify, describe, maintain and utilize dental instruments and equipment.--The student will be able to:

- 16.01 Identify various types, functions and operations of dental operator and laboratory equipment.
  - 16.02 Identify types and functions of operative, restorative, surgical, *prosthodontic*, orthodontic and endodontic dental instruments.
  - 16.03 Maintain dental operator equipment and instruments.
  - 16.04 Identify types and functions of specific dental hygiene instruments with emphasis on category rather than individual instruments.
- 17.0 Record patient assessment and treatment data.--The student will be able to:
- 17.01 Take and record medical-dental histories.
  - 17.02 Record assessment of existing oral conditions.
  - 17.03 Record conditions diagnosed by the dentist.
  - 17.04 Record treatment-related data on the patient's clinical record
  - 17.05 Record treatment plan and treatment in patient's chart
- 18.0 Describe principles and perform techniques of preventive dentistry.--The student will be able to:
- 18.01 Identify and instruct patients on applicable methods of preventive dentistry.
  - 18.02 Prepare, set up for oral prophylaxis, and apply anticariogenic treatments.
  - 18.03 Identify the elements of nutrition, basic food groups, and acceptable diets.
  - 18.04 Identify dietary deficiencies and dietary practices that contribute to the manifestation of symptoms in the oral cavity.
- 19.0 Identify the functions of pharmacology and anesthesia as they relate to dentistry.--The student will be able to:
- 19.01 Identify drug requirements, agencies, and regulations.
  - 19.02 Record a drug prescription in a patient's chart.
  - 19.03 Identify drug actions, side effects, indications and contraindications; verify with Physician's Desk Reference or its equivalent.
  - 19.04 Identify common drugs used in dentistry.
  - 19.05 Prepare and apply topical anesthetic agent.
  - 19.06 Identify properties of anesthetics.
  - 19.07 Prepare syringes for the administration of local anesthetics.
  - 19.08 Monitor and identify precautions in the use of nitrous oxide-oxygen conscious sedation.
  - 19.09 Identify drugs and agents used for treating dental-related infection
  - 19.10 Describe dental office emergencies and their prevention and treatment.
- 20.0 Identify properties and uses, and manipulate dental materials.--The student will be able to:
- 20.01 Identify properties and uses and manipulate gypsum.
  - 20.02 Identify properties and uses and manipulate restorative materials.
  - 20.03 Identify properties and uses and manipulate dental cements.
  - 20.04 Identify properties and uses and manipulate impression materials.
  - 20.05 Identify properties and uses and manipulate acrylics and/or thermoplastics.
  - 20.06 Identify properties and uses and manipulate waxes.

- 20.07 Perform dental laboratory procedures to include the fabrication of casts, custom trays and/or temporary crowns and bridges.
  - 20.08 Clean and polish removable dental appliances.
  - 20.09 Identify properties and uses of abrasive agents used to polish coronal surfaces and appliances.
  - 20.10 Identify and manage hazardous dental materials and wastes in accordance with the OSHA Hazard Communications Standard and Environmental Protection Agency regulations.
- 21.0 Identify and perform dental and carpal radiographic procedures.--The student will be able to:
- 21.01 Describe history, physics and biological effects of ionizing radiation.
  - 21.02 Identify parts of the X-ray machine including accessories.
  - 21.03 Demonstrate radiologic health protection techniques.
  - 21.04 Perform dark room/processing procedures, mix solutions.
  - 21.05 Describe the proper disposal of hazardous radiographic waste
  - 21.06 Place and expose dental radiographic films and digital sensors.
  - 21.07 Perform carpal radiography as required for dental diagnostic procedures
  - 21.08 Identify radiographic anatomical landmarks and pathologies.
  - 21.09 Mount radiographic surveys.
  - 21.10 Maintain unexposed film inventory and storage.
  - 21.11 Maintain digitally acquired radiographic images
- 22.0 Perform general dental business office procedures.--The student will be able to:
- 22.01 Maintain appointment control.
  - 22.02 Maintain an active recall system.
  - 22.03 Prepare and maintain accurate patient records.
  - 22.04 Prepare and maintain patient financial records, collect fees.
  - 22.05 Prepare and maintain office financial records.
  - 22.06 Prepare and maintain dental office inventory control and purchasing.
  - 22.07 Demonstrate public relations responsibilities of the secretary/receptionist.
  - 22.08 Demonstrate skills on office equipment.
  - 22.09 Maintain the dental business office environment.
  - 22.10 Receive and dismiss patients and visitors.
  - 22.11 Identify psychological considerations influencing behaviors of dental patients
- 23.0 Perform chairside assisting for general dentistry and specialty procedures.--The student will be able to:
- 23.01 Prepare and maintain aseptic working area and sterile instruments for intraoral procedures.
  - 23.02 Apply principles of four handed dentistry
  - 23.03 Evacuate and maintain the operating field.
  - 23.04 Perform expanded functions as permitted by the Florida statute/law pertaining to dentistry.
  - 23.05 Assemble instruments and assist in general and specialty dental procedures.
  - 23.06 Prepare tray set-ups for specific specialty procedures.
  - 23.07 Select, prepare, mix, and manipulate correct dental materials for general and specialty procedures.

- 23.08 Perform a visual assessment of existing oral conditions.
- 23.09 Demonstrate appropriate patient management skills.

Perkins Technical Skill Attainment Inventory	<a href="http://www.fldoe.org/workforce/perkins/perkins_resources.asp">http://www.fldoe.org/workforce/perkins/perkins_resources.asp</a>	

**Purpose**

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

This program is designed to prepare students for employment as dental hygienists SOC Code-29-2021 Dental Hygienist or to provide supplemental training for persons previously or currently employed in this occupation.

The content includes, but is not limited to, patient assessment, dental hygiene instrumentation and direct patient care services (scaling/root planing/curettage/radiographs/oral hygiene-instruction/expanded functions), community dental health, dental office emergencies, infection control, special needs dental care, office management, employability skills, ethics and jurisprudence.

General education content must include oral and written communications, Psychology and Sociology.

Biomedical science content must include content in anatomy, physiology, chemistry, biochemistry, microbiology, immunology, general pathology and/or pathophysiology, nutrition and pharmacology.

Dental sciences content must include tooth morphology, head, neck and oral anatomy, oral embryology and histology, oral pathology, radiography, periodontology, pain management, and dental materials.

Graduates must be competent in providing the dental hygiene process of care which includes: Assessment, Planning, Implementation, and Evaluation.

Students are prepared to take the Dental Hygiene National Board and state licensure examinations. Dental Hygiene Programs accredited by the American Dental Association Commission on Dental Accreditation are required to implement clinical experiences outlined in these program standards.

### **Program Structure**

This program is a planned sequence of instruction consisting of 88 hours.

### **Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students. In depth clinical information and requirements can be found in the Commission on Dental Accreditation Dental Hygiene Standards.

### **Special Notes**

This program meets the Department of Health HIV/AIDS, domestic violence education and prevention of medical errors requirements.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635 F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

Outcomes 01-11 are referred to as the Health Careers Core and do not have to be completed if the student has previously completed the Core in another health science program. The Core should be taken first or concurrently with the first course in the program. Following the successful completion of the core, the student is eligible to take the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

### **Career and Technical Student Organization (CTSO)**

The Health Occupations Students of America, Inc. (HOSA) is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

### **Articulation**

Currently there is no state wide articulation agreement for this program, but local articulation agreements may exist.

For details on existing articulation agreements, refer to [http://www.fldoe.org/workforce/dwdframe/artic\\_frame.asp](http://www.fldoe.org/workforce/dwdframe/artic_frame.asp).

### **Program Length**

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. The standard length of this program is 88 credit hours according to Rule 6A-14.030, F.A.C.

### **Standards**

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.
- 12.0 Perform expanded functions for the dental hygienist.
- 13.0 Perform dental office procedures.
- 14.0 Identify, describe, maintain and utilize dental instruments and equipment.
- 15.0 Identify and perform dental and carpal radiographic procedures.
- 16.0 Identify properties and uses, and manipulate dental materials.
- 17.0 Describe the legal and ethical responsibilities of the hygienist.
- 18.0 Identify and explain the formation and function of the head, neck, dental structures and tissues including pathological conditions of the human body in relation to the oral cavity.

- 19.0 Identify and explain principles of microbiology, disease transmission, disease prevention and perform principles of infection control procedures relating to dental care.
- 20.0 Identify and explain usage, administration, indications, contraindications, adverse reactions and precautions of pharmaceutical and anesthetic agents used in the treatment of dental disease and of those agents which may influence patient care while receiving dental treatment.
- 21.0 Describe principles and perform techniques of preventive dentistry.
- 22.0 Perform patient assessment.
- 23.0 Perform direct patient services.
- 24.0 Implement and evaluate community health interventions and research activities.

2011 - 2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Dental Hygiene  
**CIP Numbers:** 0317010200 AS, 1317010200 AAS  
**Program Length:** 88 Credit Hours  
**SOC Code(s):** 29-2021

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS.

**Health Careers Core: The Health Careers Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Careers Core or any other health occupations program do not have to repeat intended outcomes 01-11.**

At the completion of this program, the student will be able to:

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:
- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
  - 01.02 Identify common methods of payment for healthcare services.
  - 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
  - 01.04 Describe the composition and functions of a healthcare team.
  - 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
  - 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
  - 01.07 Identify characteristics of effective teams.
  - 01.08 Recognize methods for building positive team relationships.
  - 01.09 Analyze attributes and attitudes of an effective leader.
  - 01.10 Recognize factors and situations that may lead to conflict.
  - 01.11 Demonstrate effective techniques for managing team conflict.
  - 01.12 Describe factors that influence the current delivery system of healthcare.
  - 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:
- 02.01 Develop basic speaking and active listening skills.
  - 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
  - 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.

- 02.04 Respond to verbal and non-verbal cues.
- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.
- 02.06 Use appropriate medical terminology and abbreviations.
- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
- 02.08 Recognize the importance of patient/client educations regarding healthcare.
- 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
- 02.10 Analyze elements of communication using a sender-receiver model.
- 02.11 Distinguish between and report subjective and objective information.
- 02.12 Report relevant information in order of occurrence.

03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:

- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
- 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
- 03.03 Demonstrate procedures for accurate documentation and record keeping.
- 03.04 Interpret healthcare facility policy and procedures.
- 03.05 Explain the “Patient’s Bill of Rights”.
- 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
- 03.07 Describe advance directives.
- 03.08 Describe informed consent.
- 03.09 Explain the laws governing harassment, labor and employment.
- 03.10 Differentiate between legal and ethical issues in healthcare.
- 03.11 Describe a code of ethics consistent with the healthcare occupation.
- 03.12 Identify and compare personal, professional, and organizational ethics.
- 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
- 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
- 03.15 Recognize and report abuse including domestic violence and neglect.
- 03.16 Distinguish among the five schedules of controlled substances.

04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:

- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
- 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
- 04.03 Identify psychological reactions to illness including defense mechanisms.
- 04.04 Identify complementary and alternative health practices.
- 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
- 04.06 Explain the basic concepts of positive self image, wellness and stress.
- 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.

- 04.08 Explain the nutrition pyramid.
- 04.09 Recognize the steps in the grief process.
- 05.0 Recognize and practice safety and security procedures. – The student will be able to:
  - 05.01 Recognize safe and unsafe working conditions and report safety hazards.
  - 05.02 Demonstrate the safe use of medical equipment.
  - 05.03 Explain and apply the theory of root- cause analysis
  - 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
  - 05.05 Identify and practice security procedures for medical supplies and equipment.
  - 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions.
  - 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
  - 05.08 Demonstrate proper body mechanics and ergonomics.
  - 05.09 Demonstrate the procedure for properly identifying patients.
  - 05.10 Demonstrate procedures for the safe transport and transfer of patients.
  - 05.11 Describe fire, safety, disaster and evacuations procedures.
  - 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )
- 06.0 Recognize and respond to emergency situations. – The student will be able to:
  - 06.01 Monitor and record vital signs.
  - 06.02 Describe legal parameters relating to the administration of emergency care.
  - 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
  - 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.
- 07.0 Recognize and practice infection control procedures. – The student will be able to:
  - 07.01 Define principles of infection control including standard and transmission based precautions.
  - 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
  - 07.03 Demonstrate knowledge of surgical asepsis.
  - 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.
- 08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:
  - 08.01 Describe technology applications in healthcare.
  - 08.02 Define terms and demonstrate basic computer skills.
  - 08.03 Recognize technology applications in healthcare.
  - 08.04 Interpret information from electronic medical documents.
  - 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.

09.0 Demonstrate employability skills. – The student will be able to:

- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.
- 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
- 09.03 Identify documents that may be required when applying for a job.
- 09.04 Write an appropriate resume.
- 09.05 Conduct a job search.
- 09.06 Complete a job application form correctly.
- 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
- 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
- 09.09 Identify acceptable work habits.
- 09.10 Recognize appropriate affective/professional behavior.
- 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).

10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:

- 10.01 Recognize emerging diseases and disorders
- 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
- 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
- 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
- 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
- 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.

11.0 Apply basic math and science skills. – The student will be able to:

- 11.01 Draw, read, and report on graphs, charts and tables.
- 11.02 Measure time, temperature, distance, capacity, and mass/weight.
- 11.03 Make, use and convert using both traditional and metric units.
- 11.04 Make estimations and approximations and judge the reasonableness of the result.
- 11.05 Convert from regular to 24 hour time.
- 11.06 Demonstrate ability to evaluate and draw conclusions.
- 11.07 Organize and communicate the results obtained by observation and experimentation.
- 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.

11.09 Calculate ratios

**Dental Hygiene Students completing the following intended outcomes (12-24) have met the requirements of the Dental Hygiene Program and qualify to make application for the Dental Hygiene National Board and state licensure examinations.**

- 12.0 Perform expanded functions for the dental hygienist as permitted by Florida Statutes/Law.--The student will be able to:
  - 12.01 Demonstrate instrument transfer, evacuation, and the principles of four-handed dentistry.
  - 12.02 Perform expanded functions as permitted by the Florida Statutes/Law pertaining to the practice of dental hygiene.
  
- 13.0 Perform dental office procedures.--The student will be able to:
  - 13.01 Maintain appointment control with effective time management skills.
  - 13.02 Assess, create, modify, and maintain an active recare system.
  - 13.03 Prepare and maintain accurate patient records.
  - 13.04 Prepare and maintain patient financial records, collect fees.
  - 13.05 Prepare and maintain office financial records.
  - 13.06 Prepare and maintain dental office inventory control and purchasing.
  - 13.07 Demonstrate public relations responsibilities of the secretary/receptionist.
  - 13.08 Demonstrate skills on office equipment to include computers and dental office management systems.
  - 13.09 Maintain a positive office environment.
  - 13.10 Receive and dismiss patients and visitors.
  - 13.11 Demonstrate reporting and recording of adverse events.
  
- 14.0 Identify, describe, maintain and utilize dental instruments and equipment.--The student will be able to:
  - 14.01 Identify various types, functions and operations of dental operator and laboratory equipment.
  - 14.02 Maintain dental operator equipment and instruments including proper sharpening techniques.
  - 14.03 Identify types and functions of dental hygiene instruments
  
- 15.0 Identify and perform dental and carpal radiographic procedures.--The student will be able to:
  - 15.01 Describe history, physics and biological effects of ionizing radiation.
  - 15.02 Identify parts of the imaging machine including accessories.
  - 15.03 Demonstrate radiologic health protection techniques.
  - 15.04 Perform various forms of processing procedures that include application and care.
  - 15.05 Place and expose dental and carpal radiographs that should include chemical emulsion, digital and phosphor plates, and understand the relevance of exposure settings, times and patient record keeping.
  - 15.06 Identify radiographic anatomical landmarks.
  - 15.07 Mount radiographic surveys and/or save and store digital files.

- 15.08 Maintain unexposed film inventory and storage.
- 16.0 Identify properties and uses, and manipulate dental materials.--The student will be able to:
- 16.01 Identify properties and uses and manipulate gypsum.
  - 16.02 Identify properties and uses and manipulate restorative materials.
  - 16.03 Identify properties and uses and manipulate dental cements.
  - 16.04 Identify properties and uses and manipulate impression materials.
  - 16.05 Identify properties and uses and manipulate acrylics and/or thermoplastics.
  - 16.06 Identify properties and uses and manipulate waxes.
  - 16.07 Perform dental laboratory procedures to include the fabrication of casts, custom trays and/or temporary crowns and bridges.
  - 16.08 Clean and polish removable dental appliances.
- 17.0 Describe the legal and ethical responsibilities of the dental hygienist.--The student will be able to:
- 17.01 Define commonly used legal vocabulary relating to dentistry.
  - 17.02 Describe ethical considerations/obligations in the dental team-patient relationship.
  - 17.03 Explain risk management and root cause analysis.
  - 17.04 Identify areas of Florida Statute 466 and Rule chapter 64B5 applicable to practicing dental health workers.
  - 17.05 Apply self assessment skills to prepare for life-long learning.
  - 17.06 Apply ethical principles, legal and regulatory concepts to resolve ethical dilemmas.
- 18.0 Identify and explain the formation and function of the head, neck, dental structures and tissues including pathological conditions of the human body in relation to the oral cavity.-  
-The student will be able to:
- 18.01 Identify structures and functions of head and neck anatomy including bones, muscles, sinuses, salivary glands, lymph nodes, nerves and blood vessels.
  - 18.02 Identify embryonic development of head, oral cavity, and teeth.
  - 18.03 Describe the histological components of the head, oral cavity, and elements of the teeth and supporting structures.
  - 18.04 Describe and differentiate between normal and malocclusion.
  - 18.05 Identify the elements of the chemical basis of life, cellular metabolism and the structure of the major tissue types of the human body.
  - 18.06 Describe the metabolism of nutrient foods, vitamins and minerals by the human body and pathological conditions related to nutrient deficiencies.
  - 18.07 Identify anatomical structures and physiological function of the principle systems of the human body including the skeletal, muscular, integumentary, circulatory, lymphatic, endocrine, digestive, reproductive, respiratory, urinary, and nervous systems.
  - 18.08 Recognize and describe oral pathological conditions related to the teeth and their supporting structures.
  - 18.09 Identify teeth and their landmarks, and the morphological characteristics of each individual tooth.

- 18.10 Recognize and describe developmental anomalies related to the teeth, face, and oral structures.
- 19.0 Identify and explain principles of microbiology, disease transmission, disease prevention, and perform infection control procedures. --The student will be able to:
- 19.01 Differentiate between pathogenic and non-pathogenic microorganisms.
  - 19.02 Describe pathogens and modes of disease transmission.
  - 19.03 Differentiate between aseptic and non-aseptic environments.
  - 19.04 Perform aseptic handwashing technique.
  - 19.05 Describe ,apply and differentiate methods of cleaning, disinfection and sterilization
  - 19.06 Demonstrate the use of the microscope.
  - 19.07 Collect and prepare slides for examination for pathology.
  - 19.08 Recognize the need for and proper precautions for the prevention of disease transmission during all dental related procedures.
  - 19.09 Identify the role of prokaryotic cells, eukaryotic cells, viruses, and bacteria in the infections and mechanisms of diseases.
  - 19.10 Identify the genetics of microbes including replication of DNA and protein synthesis, mutation and gene transfer.
- 20.0 Identify and explain usage, administration, indications, contraindications, adverse reactions and precautions of pharmaceutical and anesthetic agents used in the treatment of dental disease and of those agents which may influence patient care while receiving dental treatment.--The student will be able to:
- 20.01 Identify drug requirements, agencies, and regulations.
  - 20.02 Record a drug prescription on a patient's chart.
  - 20.03 Identify drug actions, side effects, indications and contraindications; verify with Physician's Desk Reference or its equivalent.
  - 20.04 Identify common drugs used in dentistry.
  - 20.05 Prepare and apply a topical anesthetic agent.
  - 20.06 Identify properties of anesthetics.
  - 20.07 Prepare syringes for the administration of local anesthetics.
  - 20.08 Monitor and identify precautions in the use of nitrous oxide-oxygen conscious sedation.
  - 20.09 Identify drugs and chemicals used for infection control in the dental office.
  - 20.10 Recognize specific conditions in the oral cavity caused by pharmaceutical agents accordingly.
  - 20.11 Describe methods of administering local and topical anesthetics.
  - 20.12 Identify the tissues innervated by each of the nerves associated with dental local and topical anesthesia.
  - 20.13 Describe properties and mode of action of the ideal local and topical anesthetic.
  - 20.14 List medical considerations in choosing a local and topical anesthetic.
  - 20.15 Describe the process of drug metabolism.
- 21.0 Describe principles and perform techniques of preventive dentistry.--The student will be able to:
- 21.01 Identify, communicate, and instruct patients on applicable methods of preventive dentistry that utilize risk assessment, evidence based learning, individualized

- preventive care plans, counseling regarding health status and rationale for preventive care plan, and training to perform necessary oral hygiene skills.
- 21.02 Perform oral prophylaxis and anticariogenic treatments.
- 21.03 Identify and describe deficiencies that manifest symptoms in the oral cavity and communicate applicable therapies.
- 21.04 Formulate and present diets to address specific dental needs and provide nutritional counseling.

22.0 Perform patient assessment.--The student will be able to:

- 22.01 Take, record, and correlate medical/dental history with dental hygiene treatment plan and services to be performed.
- 22.02 Use appropriate armamentarium to assess and chart suspected findings of the oral cavity.
- 22.03 Take, record, and correlate vital sign observations with dental hygiene treatment plan and services to be performed.
- 22.04 Assess vital signs in order to prevent patient complications.
- 22.05 Perform record and correlate extraoral and intraoral examination findings with dental hygiene treatment plan and patient services to be performed.
- 22.06 Conduct complete periodontal examination including probing, radiographic interpretation, mobility, furcation assessment and tissue description.
- 22.07 Consult with dentist and physicians to verify dental and medical information and develop the treatment plan to be implemented.
- 22.08 Observe and record existing restorations, conditions, and suspected pathologies.
- 22.09 Interpret and correlate dental radiographs and dental charting with dental hygiene treatment plan.
- 22.10 Perform soft tissue reassessment and evaluate the effects of initial dental hygiene therapy and make appropriate therapy modifications or referrals.
- 22.11 Recognize systemic diseases from oral manifestations.
- 22.12 Record diagnosis made by dentist.
- 22.13 Recognize and react appropriately to contraindications to dental treatment found in medical and dental history.
- 22.14 Identify and assess dental office emergencies and follow the appropriate protocol for treatment.

23.0 Perform direct patient services.--The student will competently provide dental hygiene process of care for the child, adolescent, adult and geriatric patient as well as the special needs patient and be able to:

- 23.01 Detect calculus for removal and differentiate between deposits and other causes of tooth surface roughness.
- 23.02 Scale and root plane the teeth, performing periodontal debridement using appropriate armamentarium and instrumentation technique.
- 23.03 Apply appropriate chemo-therapeutic agents.
- 23.04 Manipulate mechanical instruments for deposit removal, i.e. ultrasonic and prophyljet and/or slowspeed handpiece.
- 23.05 Perform soft tissue curettage with appropriate instruments.
- 23.06 Apply desensitizing agents where applicable.
- 23.07 Clean and polish removable appliances.
- 23.08 Communicate to patients all home therapies intended to restore and maintain soft tissue health for long term care.

- 23.09 Provide and communicate dietary counseling for health maintenance and specific healing needs.
  - 23.10 Provide and communicate recommendations for patient use of caries prevention agents.
  - 23.11 Provide a comprehensive collection of patient data to identify the physical and oral health status.
  - 23.12 Provide analysis of assessment findings and use of critical thinking in order to address the patient's dental hygiene treatment needs.
  - 23.13 Establish a dental hygiene care plan that reflects the realistic goals and treatment strategies to facilitate optimal oral health.
  - 23.14 Provide patient-centered treatment and evidence-based care in a manner minimizing risk and optimizing oral health.
  - 23.15 Measure the extent to which goals identified in the dental hygiene care plan are achieved.
  - 23.16 Complete an accurate recording of all documentation relevant to patient care.
- 24.0 Implement and evaluate community health interventions and research activities.--The student will be able to:
- 24.01 Demonstrate competence in assessment, planning, implementation and evaluation of community health interventions.
  - 24.02 Formulate and analyze research methodologies for community health interventions.
  - 24.03 Interpret research findings in scientific literature.
  - 24.04 Apply research findings to dental hygiene care delivery.
  - 24.05 Apply statistical analysis and evidence based research to health trends and community interventions.
  - 24.06 Collaborate and perform a needs assessment with community partners.
  - 24.07 Differentiate scientific value of literature found in both electronic and traditional mediums.

2011 - 2012

**Purpose**

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

The program is designed to prepare students for entry level employment as dental laboratory technicians, dental laboratory managers, dental laboratory owners, marketing/sales personnel of dental products or SOC Code 11-9111 (Medical and Health Services Managers) or to provide supplemental training for persons previously or currently employed in this occupation. The Health Careers Core must be taken by all students (secondary, postsecondary adult and postsecondary vocational) planning to complete any Health Occupations program. Once successfully completed, the core does not need to be repeated at any instructional level.

The content of the program includes, but is not limited to, general studies, physical sciences, dental sciences, dental laboratory techniques, dental laboratory management and business principles, computer applications in the dental laboratory, leadership and communications skills.

Reinforcement of basic skills in English, mathematics and science appropriate for the job preparatory programs occurs through college level instruction, applied laboratory procedures or practice, clinical observation and involvement in the dental health care delivery team concept.

The program will include theoretical aspects of subjects as well as the practical applications. The theoretical aspects of the curriculum will provide content necessary for students to make judgments regarding the procedures they are expected to perform.

### **Program Structure**

This program is a planned sequence of instruction consisting of 68 hours.

### **Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

Laboratory activities are integrated with the didactic portion of this program. Students perform representative tasks in the manufacture of custom made dental devices and become involved in the dental health team through first hand observation in clinical procedures as they relate to laboratory techniques.

### **Special Notes**

This program meets the Department of Health HIV/AIDS Domestic Violence and Prevention of Medical Errors education requirements. Upon completion of this program, the instructor will provide a certificate to the student verifying that these requirements have been met.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635 F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

The program should meet the requirements of the Commission on Dental Accreditation of the American Dental Association. Students should be prepared to take the recognized graduate examination offered by the National Board for Certification in Dental Laboratory technology, Inc.

Outcomes 01-11 are referred to as the Health Careers Core and do not have to be completed if the student has previously completed the Core in another health science program. The Core should be taken first or concurrently with the first course in the program. Following the successful completion of the core, the student is eligible to take the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

### **Career and Technical Student Organization (CTSO)**

The Health Occupations Students of America, Inc. (HOSA) is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

### **Articulation**

Currently there is no state wide articulation agreement for this program, but local articulation agreements may exist.

For details on existing articulation agreements, refer to [http://www.fldoe.org/workforce/dwdframe/artic\\_frame.asp](http://www.fldoe.org/workforce/dwdframe/artic_frame.asp).

### **Program Length**

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. The standard length of this program is 68 credit hours according to Rule 6A-14.030, F.A.C.

### **Standards**

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.
- 12.0 Identify the anatomic structure and function of body systems in relation to prosthetic services performed by the dental laboratory technician.
- 13.0 Practice quality assurance, safety and infection control.
- 14.0 Adhere to legal and ethical principles related to the practice of dental laboratory technology.
- 15.0 Demonstrate knowledge of effective business management techniques.
- 16.0 Demonstrate knowledge of dental sciences.

- 17.0 Perform basic dental laboratory techniques consistent with current dental laboratory practice.
- 18.0 Demonstrate knowledge, principles and methods of disease transmission and prevention.
- 19.0 Demonstrate skills necessary for marketing and sales of dental products.
- 20.0 Demonstrate knowledge of dental laboratory set up and management procedures.

2011 - 2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Dental Laboratory Technology and Management  
**CIP Numbers:** 0317010301 AAS; 1317010301 AS  
**Program Length:** 68 credit hours  
**SOC Code(s):** 31-9099; 51-9081; 11-9111

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS.

**Health Careers Core: The Health Careers Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Careers Core or any other health occupations program do not have to repeat intended outcomes 01-11.**

At the completion of this program, the student will be able to:

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:
- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
  - 01.02 Identify common methods of payment for healthcare services.
  - 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
  - 01.04 Describe the composition and functions of a healthcare team.
  - 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
  - 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
  - 01.07 Identify characteristics of effective teams.
  - 01.08 Recognize methods for building positive team relationships.
  - 01.09 Analyze attributes and attitudes of an effective leader.
  - 01.10 Recognize factors and situations that may lead to conflict.
  - 01.11 Demonstrate effective techniques for managing team conflict.
  - 01.12 Describe factors that influence the current delivery system of healthcare.
  - 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:
- 02.01 Develop basic speaking and active listening skills.
  - 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
  - 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.

- 02.04 Respond to verbal and non-verbal cues.
- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.
- 02.06 Use appropriate medical terminology and abbreviations.
- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
- 02.08 Recognize the importance of patient/client educations regarding healthcare.
- 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
- 02.10 Analyze elements of communication using a sender-receiver model.
- 02.11 Distinguish between and report subjective and objective information.
- 02.12 Report relevant information in order of occurrence.

03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:

- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
- 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
- 03.03 Demonstrate procedures for accurate documentation and record keeping.
- 03.04 Interpret healthcare facility policy and procedures.
- 03.05 Explain the “Patient’s Bill of Rights”.
- 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
- 03.07 Describe advance directives.
- 03.08 Describe informed consent.
- 03.09 Explain the laws governing harassment, labor and employment.
- 03.10 Differentiate between legal and ethical issues in healthcare.
- 03.11 Describe a code of ethics consistent with the healthcare occupation.
- 03.12 Identify and compare personal, professional, and organizational ethics.
- 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
- 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
- 03.15 Recognize and report abuse including domestic violence and neglect.
- 03.16 Distinguish among the five schedules of controlled substances.

04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:

- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
- 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
- 04.03 Identify psychological reactions to illness including defense mechanisms.
- 04.04 Identify complementary and alternative health practices.
- 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
- 04.06 Explain the basic concepts of positive self image, wellness and stress.
- 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.

- 04.08 Explain the nutrition pyramid.
- 04.09 Recognize the steps in the grief process.
- 05.0 Recognize and practice safety and security procedures. – The student will be able to:
  - 05.01 Recognize safe and unsafe working conditions and report safety hazards.
  - 05.02 Demonstrate the safe use of medical equipment.
  - 05.03 Explain and apply the theory of root- cause analysis
  - 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
  - 05.05 Identify and practice security procedures for medical supplies and equipment.
  - 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions.
  - 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
  - 05.08 Demonstrate proper body mechanics and ergonomics.
  - 05.09 Demonstrate the procedure for properly identifying patients.
  - 05.10 Demonstrate procedures for the safe transport and transfer of patients.
  - 05.11 Describe fire, safety, disaster and evacuations procedures.
  - 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )
- 06.0 Recognize and respond to emergency situations. – The student will be able to:
  - 06.01 Monitor and record vital signs.
  - 06.02 Describe legal parameters relating to the administration of emergency care.
  - 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
  - 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.
- 07.0 Recognize and practice infection control procedures. – The student will be able to:
  - 07.01 Define principles of infection control including standard and transmission based precautions.
  - 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
  - 07.03 Demonstrate knowledge of surgical asepsis.
  - 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.
- 08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:
  - 08.01 Describe technology applications in healthcare.
  - 08.02 Define terms and demonstrate basic computer skills.
  - 08.03 Recognize technology applications in healthcare.
  - 08.04 Interpret information from electronic medical documents.
  - 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.

09.0 Demonstrate employability skills. – The student will be able to:

- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.
- 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
- 09.03 Identify documents that may be required when applying for a job.
- 09.04 Write an appropriate resume.
- 09.05 Conduct a job search.
- 09.06 Complete a job application form correctly.
- 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
- 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
- 09.09 Identify acceptable work habits.
- 09.10 Recognize appropriate affective/professional behavior.
- 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).

10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:

- 10.01 Recognize emerging diseases and disorders
- 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
- 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
- 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
- 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
- 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.

11.0 Apply basic math and science skills. – The student will be able to:

- 11.01 Draw, read, and report on graphs, charts and tables.
- 11.02 Measure time, temperature, distance, capacity, and mass/weight.
- 11.03 Make, use and convert using both traditional and metric units.
- 11.04 Make estimations and approximations and judge the reasonableness of the result.
- 11.05 Convert from regular to 24 hour time.
- 11.06 Demonstrate ability to evaluate and draw conclusions.
- 11.07 Organize and communicate the results obtained by observation and experimentation.
- 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.

11.09 Calculate ratios

### **Dental Laboratory Technology (12-17)**

12.0 Identify the anatomic structure and function of body systems in relation to prosthetic services performed by the dental laboratory technician.--The student will be able to:

- 12.01 Identify structures and functions of head and neck anatomy.
- 12.02 Identify embryonic development of head, oral cavity and individual teeth.
- 12.03 Identify each tooth and its landmarks.

13.0 Practice quality assurance, safety and infection control.--The student will be able to:

- 13.01 Practice safety in accordance with institutional policy.
- 13.02 Identify documentation procedures necessary to comply with state laws.
- 13.03 Demonstrate knowledge of the dental laboratory technician's role in providing quality assurance in laboratory procedures, reporting, and use and maintenance of equipment.
- 13.04 Use appropriate dental terminology and abbreviations.
- 13.05 Demonstrate knowledge, principles, and methods of disease transmission and prevention as related to dental prostheses.
- 13.06 Demonstrate knowledge of infection control in dental laboratories in accordance with Center for Disease Control (CDC)/OSHA guidelines.
- 13.07 Implement appropriate Joint Commission patient safety goals.

14.0 Adhere to legal and ethical principles related to the practice of dental laboratory technology.--The student will be able to:

- 14.01 Demonstrate knowledge of the importance of observing the doctor/technician relationship.
- 14.02 Demonstrate knowledge of state law governing the practice of Dental Laboratory Technology.

15.0 Demonstrate knowledge of effective business management techniques.--The student will be able to:

- 15.01 Demonstrate knowledge and use of an office/laboratory procedure manual.
- 15.02 Demonstrate knowledge of business finance and operating expenses.
- 15.03 Demonstrate knowledge of a pay scale and benefit program for employees and a bookkeeping system.
- 15.04 Demonstrate knowledge of tax forms, payroll records, insurance needs and inventory needs.
- 15.05 Demonstrate knowledge of employee hiring orientation.
- 15.06 Demonstrate knowledge of computer applications in the dental laboratory.

16.0 Demonstrate knowledge of dental sciences.--The student will be able to:

- 16.01 Demonstrate knowledge of physical properties, use and manipulation of dental materials.
- 16.02 Demonstrate knowledge of the dynamics of occlusion.
- 16.03 Demonstrate problem solving skills as related to dental materials.

17.0 Perform basic dental laboratory techniques consistent with current dental laboratory practice.--The student will be able to:

- 17.01 Manufacture complete denture prosthodontics.
- 17.02 Manufacture removable partial denture prosthodontics.
- 17.03 Manufacture fixed prosthodontics using metals, porcelain and composites.
- 17.04 Manufacture finish, and polish pedodontic, orthodontic and preventive appliances.
- 17.05 Manufacture special prostheses.

## **Dental Laboratory Management (18-20)**

- 18.0 Demonstrate knowledge, principles, and methods of disease transmission and prevention.--The student will be able to:
  - 18.01 Establish infection control in dental laboratories in accordance with Centers for Disease Control/OSHA guidelines.
  - 18.02 Establish an infection control procedures policy for the dental laboratory.
  
- 19.0 Demonstrate skills necessary for marketing and sales of dental products.--The student will be able to:
  - 19.01 Demonstrate effective product evaluation and comparison.
  - 19.02 Identify appropriate consumer populations.
  - 19.03 Discuss dental product application and effectiveness.
  - 19.04 Demonstrate business management skills for record keeping related to marketing.
  - 19.05 Apply economic principles for product distribution and sales.
  
- 20.0 Demonstrate knowledge of dental laboratory set up and management procedures. -- The student will be able to:
  - 20.01 Design a dental laboratory and identify appropriate equipment.
  - 20.02 Establish quality control procedures.
  - 20.03 Set up and maintain business correspondence system.
  - 20.04 Establish a dental laboratory policy for maintenance of equipment.
  - 20.05 Set up a pay scale and benefit program for employees and a bookkeeping system.
  - 20.06 Develop an office/laboratory procedure manual.

2011 - 2012

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Cardiovascular/Cardiopulmonary Technology  
**Career Cluster:** Health Science

	<b>AS</b>	<b>AAS</b>
CIP Number	1317020100	0317020100
Program Type	College Credit	College Credit
Standard Length	Cardiovascular Program/77 credit hours Cardiopulmonary Program/83 credit hours	Cardiovascular Program/77 credit hours Cardiopulmonary Program/83 credit hours
CTSO	HOSA	HOSA
SOC Codes (all applicable)	31-9099, 29-2031	31-9099, 29-2031
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>	
Perkins Technical Skill Attainment Inventory	<a href="http://www.fldoe.org/workforce/perkins/perkins_resources.asp">http://www.fldoe.org/workforce/perkins/perkins_resources.asp</a>	

### **Purpose**

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

The program is designed to prepare students for employment as cardiovascular technologists, SOC Code 29-2031 (Cardiovascular Technologists and Technicians). Cardiovascular/cardiopulmonary technology educational programs will address one or more of the three basic sub-specialties: invasive cardiology, noninvasive cardiology, or noninvasive vascular study. Cardiopulmonary technology should include the additional component of pulmonary function testing. The Cardiovascular/Cardiopulmonary Technology Program may award an Associate of Applied Science (AAS) and/or Associate of Science (AS) degree within the program length guidelines. When the cardiovascular program competencies are offered, the program cannot exceed 77 credit hours. When the cardiopulmonary competencies are offered, the program cannot exceed 83 credit hours. The Health Careers Core must be taken by all students (secondary, post-secondary adult and post-secondary vocational) planning to complete any Health Occupations program. Once successfully completed, the core does not need to be repeated at any instructional level.

The content includes but is not limited to instruction in performing examinations leading to diagnosis and treatment of patients with cardiac and vascular disease. A clinical component is a necessary element to a program. Reinforcement of basic skills in English, mathematics and science occurs through classroom instruction and applied laboratory practice.

This program focuses on broad, transferable skills and stresses understanding and demonstration of the following elements of the health care industry; planning, management, finance, technical and production skills, underlying principles of technology, labor issues, community issues and health, safety, and environmental issues.

### **Program Structure**

This program is a planned sequence of instruction consisting of 160 credit hours.

### **Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

### **Special Notes**

Basic preparation in English, Mathematics, and the sciences are recommended prior to entering the Cardiovascular/Cardiopulmonary professional component of the curriculum. The following courses with an (\*) marking those thought to be essential. (Prerequisite courses required to complete the program must be included in the listed program length credits.

- \_ English - Composition\*
- \_ Communications - Speech
- \_ Electronic
- \_ OralBiology
- \_ Anatomy & Physiology - General\*
- \_ Math - Algebra \*
- \_ Chemistry\*
- \_ Physics\*
- \_ Microbiology
- \_ Psychology - Social Skills
- \_ Computers (health informatics)
- \_ Keyboarding
- \_ Word processing
- \_ Hardware & systems
- \_ Software
- \_ Humanities - as required for graduation

This program meets the Department of Health HIV/AIDS and domestic violence education requirements . Upon completion of this program the instructor will provide a certificate to the student verifying that the HIV/AIDS and domestic violence requirements have been met.

The program should meet the requirements of the American Medical Association Commission on Accreditation of Allied Health Education Programs (CAAHEP), 35 East Wacker Drive, Suite 1970, Chicago, Illinois 60601-2208, 312/553-9355, email- [caahep@mcs.net](mailto:caahep@mcs.net). Graduates should be prepared to take the appropriate registry and/or state licensure examinations.

Outcomes 01-11 are referred to as the Health Careers Core and do not have to be completed if the student has previously completed the Core in another health science program. The Core should be taken first or concurrently with the first course in the program. Following the successful completion of the core, the student is eligible to take the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

### **Career and Technical Student Organization (CTSO)**

Health Occupations Students of America, (HOSA) Inc., is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

### **Articulation**

This program has no statewide articulation agreement approved by the Articulation Coordinating Committee. However, this does not preclude the awarding of credits by any college through local agreements.

For details on statewide articulation agreements which correlate to programs and industry certifications, refer to [http://www.fldoe.org/workforce/dwdframe/artic\\_frame.asp](http://www.fldoe.org/workforce/dwdframe/artic_frame.asp).

### **Program Length**

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. The standard length of this program is 160 credit hours according to Rule 6A-14.030, F.A.C.

## Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.
- 12.0 Explore career opportunities in invasive cardiology, cardiac ultrasound, vascular ultrasound, and pulmonary function testing.
- 13.0 Identify the anatomic structure and function of body systems in relation to cardiovascular disease and studies.
- 14.0 Practice safety and quality assurance.
- 15.0 Follow professional principles related to the practice of cardiovascular technology.
- 16.0 Use basic medical electronics and medical instrumentation.
- 17.0 Describe the role of the cardiovascular technologist in catastrophic event management.
- 18.0 Discuss the pharmacological aspects of cardiovascular drugs.
- 19.0 Perform patient care, record patient history and practice effective patient communication.
- 20.0 Assist in all aspects of invasive cardiovascular techniques with emphasis on cardiac catheterization.
- 21.0 Obtain arterial and/or venous blood samples and interpret blood gas results.
- 22.0 Perform noninvasive cardiovascular techniques with an emphasis on echocardiography.
- 23.0 Perform noninvasive peripheral vascular studies.
- 24.0 Demonstrate knowledge of pulmonary anatomy, physiology, and pathophysiology.
- 25.0 Perform and interpret blood gas analyses.
- 26.0 Perform pulmonary function testing.

2011 - 2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Cardiovascular/Cardiopulmonary Technology  
**CIP Numbers:** 1317.020100 AS, 0317.020100 AAS  
**Program Length:** 160 credit hours  
**SOC Code(s):** 31-9099, 29-2031

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. At the completion of this program, the student will be able to:

Health Careers Core: The Health Careers Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Careers Core or any other health occupations program do not have to repeat intended outcomes 01-11.

01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:

- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
- 01.02 Identify common methods of payment for healthcare services.
- 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
- 01.04 Describe the composition and functions of a healthcare team.
- 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
- 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
- 01.07 Identify characteristics of effective teams.
- 01.08 Recognize methods for building positive team relationships.
- 01.09 Analyze attributes and attitudes of an effective leader.
- 01.10 Recognize factors and situations that may lead to conflict.
- 01.11 Demonstrate effective techniques for managing team conflict.
- 01.12 Describe factors that influence the current delivery system of healthcare.
- 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.

02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:

- 02.01 Develop basic speaking and active listening skills.
- 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
- 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
- 02.04 Respond to verbal and non-verbal cues.

- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.
- 02.06 Use appropriate medical terminology and abbreviations.
- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
- 02.08 Recognize the importance of patient/client educations regarding healthcare.
- 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
- 02.10 Analyze elements of communication using a sender-receiver model.
- 02.11 Distinguish between and report subjective and objective information.
- 02.12 Report relevant information in order of occurrence.

03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:

- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
- 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
- 03.03 Demonstrate procedures for accurate documentation and record keeping.
- 03.04 Interpret healthcare facility policy and procedures.
- 03.05 Explain the “Patient’s Bill of Rights”.
- 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
- 03.07 Describe advance directives.
- 03.08 Describe informed consent.
- 03.09 Explain the laws governing harassment, labor and employment.
- 03.10 Differentiate between legal and ethical issues in healthcare.
- 03.11 Describe a code of ethics consistent with the healthcare occupation.
- 03.12 Identify and compare personal, professional, and organizational ethics.
- 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
- 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
- 03.15 Recognize and report abuse including domestic violence and neglect.
- 03.16 Distinguish among the five schedules of controlled substances.

04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:

- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
- 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
- 04.03 Identify psychological reactions to illness including defense mechanisms.
- 04.04 Identify complementary and alternative health practices.
- 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
- 04.06 Explain the basic concepts of positive self image, wellness and stress.
- 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
- 04.08 Explain the nutrition pyramid.

- 04.09 Recognize the steps in the grief process.
- 05.0 Recognize and practice safety and security procedures. – The student will be able to:
  - 05.01 Recognize safe and unsafe working conditions and report safety hazards.
  - 05.02 Demonstrate the safe use of medical equipment.
  - 05.03 Explain and apply the theory of root- cause analysis
  - 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
  - 05.05 Identify and practice security procedures for medical supplies and equipment.
  - 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions.
  - 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
  - 05.08 Demonstrate proper body mechanics and ergonomics.
  - 05.09 Demonstrate the procedure for properly identifying patients.
  - 05.10 Demonstrate procedures for the safe transport and transfer of patients.
  - 05.11 Describe fire, safety, disaster and evacuations procedures.
  - 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )
- 06.0 Recognize and respond to emergency situations. – The student will be able to:
  - 06.01 Monitor and record vital signs.
  - 06.02 Describe legal parameters relating to the administration of emergency care.
  - 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
  - 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.
- 07.0 Recognize and practice infection control procedures. – The student will be able to:
  - 07.01 Define principles of infection control including standard and transmission based precautions.
  - 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
  - 07.03 Demonstrate knowledge of surgical asepsis.
  - 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.
- 08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:
  - 08.01 Describe technology applications in healthcare.
  - 08.02 Define terms and demonstrate basic computer skills.
  - 08.03 Recognize technology applications in healthcare.
  - 08.04 Interpret information from electronic medical documents.
  - 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.

09.0 Demonstrate employability skills. – The student will be able to:

- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.
- 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
- 09.03 Identify documents that may be required when applying for a job.
- 09.04 Write an appropriate resume.
- 09.05 Conduct a job search.
- 09.06 Complete a job application form correctly.
- 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
- 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
- 09.09 Identify acceptable work habits.
- 09.10 Recognize appropriate affective/professional behavior.
- 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).

10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:

- 10.01 Recognize emerging diseases and disorders
- 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
- 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
- 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
- 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
- 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.

11.0 Apply basic math and science skills. – The student will be able to:

- 11.01 Draw, read, and report on graphs, charts and tables.
- 11.02 Measure time, temperature, distance, capacity, and mass/weight.
- 11.03 Make, use and convert using both traditional and metric units.
- 11.04 Make estimations and approximations and judge the reasonableness of the result.
- 11.05 Convert from regular to 24 hour time.
- 11.06 Demonstrate ability to evaluate and draw conclusions.
- 11.07 Organize and communicate the results obtained by observation and experimentation.
- 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
- 11.09 Calculate ratios.

## **Cardiovascular Technology – (12-19)**

- 12.0 Explore career opportunities in invasive cardiology (cardiac catheterization, non-invasive cardiac sonography (echocardiography), non-invasive vascular sonography, and pulmonary functions testing. – The student will be able to:
- 12.01 Describe the CVT/CPT profession, including but not limited to, history, accreditation, education, job conditions, salaries, critical thinking and team building.
  - 12.02 Identify the cardiovascular professional organizations and discuss their roles (SDMS, ASE, ACO, SVT, SICP)
  - 12.03 Discuss certification, licensure, and registration for the Cardiovascular/Cardiopulmonary Technologist.
  - 12.04 Describe the sub-specialty of Invasive cardiology (Cardiac Catheterization) and identify the duties of the Cardiovascular Technologist>
  - 12.05 Describe the sub-specialty of Non-invasive Cardiac Sonography (Echocardiography) and identify the duties of the Cardiovascular Technologist.
  - 12.06 Describe the sub-specialty of Non-invasive Vascular Sonography and identify the duties of the Cardiovascular Technologist.
  - 12.07 Describe the sub-specialty of Pulmonary Functions Testing and identify the duties of the Cardiopulmonary Technologist.
- 13.0 Identify the anatomic structure and function of body systems in relation to cardiovascular disease and studies. – The student will be able to:
- 13.01 Describe human anatomy and physiology with emphasis on the cardiovascular and pulmonary systems.
  - 13.02 Discuss principles and methods of disease transmission and prevention.
  - 13.03 Identify normal and abnormal data obtained from medical tests.
  - 13.04 Describe basic pathological conditions of the cardiovascular and pulmonary systems.
- 14.0 Practice safety and quality assurance. – The student will be able to:
- 14.01 Observe acceptable safety practices in cardiovascular instrumentation.
  - 14.02 Demonstrate knowledge of radiation safety procedures.
  - 14.03 Demonstrate knowledge of quality assurance as it relates to imaging equipment, film quality, etc.
  - 14.04 Implement appropriate Joint Commission patient safety goals.
- 15.0 Follow professional principles related to the practice of cardiovascular technology. – The student will be able to:
- 15.01 Carry out all responsibilities in the best interest of the patient in an excellent manner.
  - 15.02 Carry out assigned tasks conscientiously, honestly, enthusiastically, and accept responsibility for the task and the results.
  - 15.03 Function effectively as part of a team-adaptable to change and willing to teach others.
  - 15.04 Abide by the rules and procedures of the work site..

- 15.05 Maintain a hygienic, professional appearance.
- 15.06 Demonstrate pride and loyalty to the profession.
- 16.0 Use basic medical electronics and medical instrumentation. – The student will be able to:
  - 16.01 Identify the duties related to electronic monitoring and diagnostic testing of patient.
  - 16.02 Demonstrate computer literacy skills as applied to cardiovascular practice.
  - 16.03 Operate equipment used in diagnostic testing and physiological monitoring of patients.
  - 16.04 Set up, calibrate and operate selected equipment in the cardiovascular laboratory.
- 17.0 Describe the role of the cardiovascular technologist in catastrophic event management. – The student will be able to:
  - 17.01 Follow institutional catastrophic event protocol.
  - 17.02 Respond to simulated emergency care situations encountered in a cardiovascular department.
  - 17.03 Identify the components of the defibrillator.
  - 17.04 Cite the indications for cardiac defibrillation and cardioversion.
- 18.0 Discuss the pharmacological aspects of cardiovascular drugs. – The student will be able to:
  - 18.01 State the mechanism of action of selected cardiovascular drugs.
  - 18.02 Identify and describe uses of pharmacological agents on an emergency "crash" cart.
  - 18.03 Calculate drug dosages and mixtures.
  - 18.04 Use needles and syringes in preparing medications for administration in simulated practice.
  - 18.05 Describe intravenous fluid therapy maintenance.
- 19.0 Perform patient care, record patient history and practice effective communication. – The student will be able to:
  - 19.01 Perform patient identification procedures.
  - 19.02 Examine patient chart and locate pertinent information.
  - 19.03 Perform a patient history pertinent to the cardiovascular exam.
  - 19.04 Practice patient care with emphasis on patient privacy, body mechanics, patient positions and patient transportation.
  - 19.05 Measure vital signs and differentiate between normal and abnormal values.
  - 19.06 Cite the indications for and name the methods of oxygen administration.
  - 19.07 Perform the attachment of a regulator to and regulate the flow of oxygen from a tank or central system.
  - 19.08 Perform suctioning technique in a simulated laboratory setting.
  - 19.09 Recognize human behaviors indicative of anxiety.
  - 19.10 Identify and develop effective communication and interpersonal relations skills.
  - 19.11 Discuss approaches used in dealing with a variety of hospitalized persons.
  - 19.12 Describe socio-cultural traits which may effect a person's hospital care.

**One of the following sub-specialties must be added to the intended outcomes for both cardiovascular and cardiopulmonary. Additional sub-specialties may be included, as desired.**

**For those programs which include the **INVASIVE CARDIOLOGY SUB-SPECIALTY**, the following student performance standards are necessary.**

- 20.0 Assist in all aspects of invasive cardiovascular techniques with emphasis on cardiac catheterization. – The student will be able to:
- 20.01 Describe the history of invasive procedures, including pioneers in the field.
  - 20.02 Practice sterile technique as it applies to the cardiac catheterization set up and protocol.
  - 20.03 Describe routine left heart and right heart catheterization set up and protocols.
  - 20.04 Describe interventional procedures in the cardiac cath lab including, but not limited to, angioplasty, electrophysiology studies, valvuloplasty, biopsy and pericardiocentesis.
  - 20.05 Describe catheter insertion techniques and assist physician with manipulation of catheterization instruments during the procedure.
  - 20.06 Recognize cardiac anatomy through angiography and assess cardiac status from the data.
  - 20.07 Recognize cardiac hemodynamic parameters and record and measure left and right heart pressures.
  - 20.08 Determine cardiac output by Fick equation, thermodilution technique or green dye studies and perform Hemodynamic calculations.
  - 20.09 Perform calculations which include, but are not limited to, ejection fraction by planimetry, valve area using Gorlin formula and resistances.
  - 20.10 Recognize presence of shunts by oximetry and/or dye curves and perform shunt calculations.
  - 20.11 Discuss permanent and temporary pacemaker protocols.
  - 20.12 Correlate and calculate necessary data from right and left heart catheterization and assess the cardiac status from this information.
  - 20.13 Demonstrate acceptable post-cath care of the catheterization site.
  - 20.14 Identify complications which occur during cardiac catheterization.
  - 20.15 Describe and perform venipuncture to initiate intravenous fluid therapy on a venipuncture model.
  - 20.16 Maintain and troubleshoot existing intravenous/intra-arterial lines.
  - 20.17 Demonstrate knowledge of basic x-ray history, theory, production and protection.
  - 20.18 Demonstrate knowledge of patient assessment and practice patient care of the invasive Cardiovascular patient, including but not limited to basic assessment, history and physical, vital signs, CNS assessment, CVS assessment, peripheral vascular assessment etc.
  - 20.19 Demonstrate clinical skills, including but not limited to Pre and post cath patient care, monitoring and recording, manipulation of imaging equipment, film processing and quality control, scrubbing, and circulating.
- 21.0 Obtain arterial and/or venous blood samples and interpret blood gas results. – The student will be able to:
- 21.01 Discuss blood gas and acid-base physiology.

- 21.02 Identify normal and abnormal blood gas values.
- 21.03 Interpret blood gas and acid-base data.
- 21.04 Describe quality control techniques in blood gas analyses.
- 21.05 Outline the steps in collecting arterial blood samples.

**\*For those programs which include the NONINVASIVE CARDIOLOGY SUBSPECIALITY, these student performance standards are necessary.**

22.0 Perform noninvasive cardiovascular techniques with an emphasis on echocardiography.

– The student will be able to:

- 22.01 Auscultate normal and abnormal heart sounds and relate abnormal findings to specific cardiac pathology.
- 22.02 Assist in performance of stress electrocardiography and explain indications, contraindications, positive and negative test results.
- 22.03 Assist in performance of ambulatory electrocardiography and explain indications and test results.
- 22.04 Describe the physics of ultrasound as it applies to echocardiography and cardiac Doppler.
- 22.05 Demonstrate function and use of noninvasive cardiology equipment.
- 22.06 Perform, measure and analyze M-Mode and Two-Dimensional echocardiograms.
- 22.07 Perform, measure and analyze Color Flow Doppler exams.
- 22.08 Perform, measure and analyze interventional spectral Doppler echocardiography.
- 22.09 Demonstrate knowledge of pathophysiology of cardiovascular diseases as seen on echocardiography.
- 22.10 Perform and demonstrate knowledge of information derived from echocardiography, including but not limited to measurements, normal parameters and equations.
- 22.11 Demonstrate knowledge of patient assessment, and practice patient care of the cardiac patient.
- 22.12 Perform and demonstrate knowledge of non-invasive modalities and advance techniques, including but not limited to stress echo, effects of medication, normal/abnormal findings, holter monitoring, stress testing, transesophageal echocardiogram, contrast agents and provocation maneuvers.

**\*For those programs which include the NONINVASIVE VASCULAR SONOGRAPHY SUBSPECIALITY, the following student performance standards are necessary.**

23.0 The student will be able to:

- 23.01 Discuss the physics of ultrasound as it applies to echocardiography and cardiac Doppler, including but not limited to definition of sound, propagation of sound in tissue, Transducers and ultrasound imaging (A,B, & M mode).
- 23.02 Discuss the physical principles and instrumentation as it applies to tissue perfusion, including but not limited to general physics and laws of hemodynamics, tissue mechanics and pressure transmission, & plethysomography.
- 23.03 Discuss normal vascular anatomy.
- 23.04 Interpret normal vascular ultrasonic anatomy.
- 23.05 Describe patient positioning with respect to vascular modalities.
- 23.06 Demonstrate knowledge of assessment and care of the cardiovascular patient.

- 23.07 Discuss circulatory hemodynamics as it applies to arterial, venous and cerebral hemodynamics.
- 23.08 Perform arterial patient physical assessment
- 23.09 Perform venous patient physical assessment.
- 23.10 Perform cerebrovascular patient physical assessment.
- 23.11 Perform noninvasive peripheral vascular evaluations, including venous, arterial, and cerebral vascular studies.
- 23.12 Discuss therapeutic intervention as it relates to arterial, venous, and cerebrovascular studies.
- 23.13 Describe test validation and measurements as they relate to vascular studies.
- 23.14 Demonstrate a knowledge of the pathophysiology and etiology of diseases of the circulatory system, including venous, arterial, and cerebrovascular diseases.
- 23.15 Discuss appropriate action based on data interpretation.

**\* For those programs which include the additional PULMONARY Function Testing Sub-specialty, this COMPONENT MUST be added with the following student performance standards.**

24.0 Perform pulmonary function testing. – The student will be able to:

- 24.01 Discuss the uses of pulmonary function tests.
- 24.02 Perform spirometric measurements and procedures
- 24.03 Perform lung volume measurements.
- 24.04 Perform diffusion studies.
- 24.05 Recognize the function and use of pulmonary function equipment, including but not limited to spirometers, pneumotachs, gas analyzers, plethysmographs, and computers.
- 24.06 Perform calibration of pulmonary function equipment.
- 24.07 Describe quality control procedures.
- 24.08 Discuss the methodology and use of bronchial challenges.
- 24.09 Perform bronchoscopic assisting.
- 24.10 Perform or assist in pulmonary exercise-metabolic testing.
- 24.11 Discuss the theory of exercise physiology.
- 24.12 Describe the equipment used in exercise testing.
- 24.13 Discuss the indications and use of exercise testing.

25.0 Perform and interpret blood gas analyses. – The student will be able to:

- 25.01 Describe the uses of arterial blood gases.
- 25.02 Discuss the history of blood gas analysis.
- 25.03 Identify common terms used in blood gas analysis.
- 25.04 Describe the equipment used in blood gas analysis, including but not limited to electrochemical electrodes, co-oximeter, pulse oximeter, transcutaneous electrodes, indwelling arterial systems, and capnographs.
- 25.05 Describe and perform the techniques of arterial blood gas sampling.
- 25.06 Perform a blood gas sample analysis.
- 25.07 Discuss the physiology of respiration.
- 25.08 Discuss the transport of oxygen, including but not limited to hemoglobin, oxyhemoglobin dissociation curve and blood oxygen content.
- 25.09 Describe the types and use of oxygen therapy.
- 25.10 Describe the transport of carbon dioxide.

- 25.11 Discuss acid base balance, including but not limited to Henderson Hasselbach equation, buffer systems and acid base disturbances.
- 25.12 Discuss the interpretation of blood gas values.
- 26.0 Demonstrate knowledge of pulmonary anatomy, physiology, and pathophysiology. – The student will be able to:
  - 26.01 Demonstrate an understanding of lung development and design.
  - 26.02 Discuss the measurements of lung physiology.
  - 26.03 Discuss the mechanics of breathing.
  - 26.04 Describe the anatomic, physiology, and clinical changes in lung diseases, including but not limited to asthma, emphysema, chronic bronchitis, interstitial disease, cystic fibrosis, fungal diseases, lung neoplasms, sarcoidosis, pneumocystis carini, silo fillers disease, pneumonia, aspiration etc.

**\* These are the student performance standards necessary for each sub-specialty and pulmonary component.**

**2011-2012**

**Florida Department of Education  
Curriculum Framework**

**Program Title:**           **Emergency Medical Technician (Basic)**  
**Career Cluster:**       **Health Science**

<b>CCC</b>	
CIP Number	0317020500
Program Type	College Credit Certificate (CCC)
Program Length	11 credits
CTSO	HOSA
SOC Codes (all applicable)	31-9099; 29-2041
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>

### **Purpose**

This certificate program is part of the Emergency Medical Services AS/AAS degree program (1317020601/0317020601).

A College Credit Certificate consists of a program of instruction of less than sixty (60) credits of college-level courses, which is part of an AS or AAS degree program and prepares students for entry into employment (Rule 6A-14.030, F.A.C.).

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

This is an instructional program that prepares students for employment as emergency medical technicians SOC Code 29-2041 (Emergency Medical Technicians and Paramedics) to function at the basic pre-hospital emergency medical technician (basic) level and treat various medical/trauma conditions using appropriate equipment and materials. The program prepares students for certification as EMT's in accordance with Chapter 64J of the Florida Administrative Code. The program must be approved by the Department of Health, Bureau of Emergency Medical Services and the curriculum must adhere to the U S Department of Transportation (DOT) 2009 National Emergency Medical Services Education Standards: Emergency Medical Technician Instructional Guidelines. This is the initial level for a career in emergency medical services and the primary prerequisite for paramedic training and certification.

The content includes but is not limited to patient assessment, airway management, cardiac arrest, external and internal bleeding and shock, traumatic injuries, fractures, dislocations, sprains, poisoning, heart attack, stroke, diabetes, acute abdomen, communicable diseases,

patients with abnormal behavior, alcohol and drug abuse, the unconscious state, emergency childbirth, burns, environmental hazards, communications, reporting, extrication and transportation of patient. The student must be proficient in patient assessment and evaluation, the use of suctioning devices, oral and nasal airways, resuscitation devices, oxygen equipment, sphygmomanometer and stethoscope, splints of all types, pneumatic antishock garments, extrication tools, dressings and bandages, stretchers and patient carrying devices.

### **Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

Florida Statute 401.2701 requires that the instructor-student ratio should not exceed 1:6. Hospital activity shall include a minimum of 20 hours of supervised clinical supervision, including 10 hrs in a hospital emergency department. Clinical activity shall include appropriate patient assessment skills, intervention and documentation relevant to each clinical rotation.

Field Internship Activities: Field internship shall include a competency based program to assure appropriate pre-hospital assessment and management of medical and trauma patients, as well as associated manual skills. The field internship activity shall include a minimum of 5 emergency runs resulting in patient care and transport appropriate for the EMT. In addition, the patient care components should include minimum competencies in patient assessment, airway management and ventilation, trauma and medical emergencies.

### **Special Notes**

- Entry Level students must be certified in the following:
  - Hazardous Waste Operations and Emergency Response (HAZWOPER) standard, 29 CFR 1910.120 (q)(6)(i) –First Responder Awareness Level
  - ICS 100 or equivalent (offered free online from FEMA <http://training.fema.gov/EMIWeb/IS/IS100a.asp> )
  - ICS-700 or equivalent (offered free online from FEMA <http://training.fema.gov/EMIWeb/IS/is700.asp> )

This program meets the Department of Health HIV/AIDS education requirements and the instructor will provide a certificate to the student verifying that this requirement has been met. Programs may also teach domestic violence and prevention of medical errors education and may choose to provide a certificate to the student verifying that this education has been completed.

Please refer to chapter 401 F.S. for more information on disqualification for the EMT license through the Bureau of Emergency Medical Services, Department of Health.

An EMT-B program must be taught by an instructor meeting the qualifications as set forth in 64J-1.201 FAC.

An American Heart Association or Red Cross certification or equivalent in "professional" BLS is required of all candidates for entrance into an EMT-B program.

The standard length of this program is 250 clock hours or 11 credit hours. This includes the Health Careers Core (90 clock hours).

The Student Performance Standards for Emergency Medical Technology-EMT-B were adapted and condensed from the U S Department of Transportation 2009 National Emergency Medical Services Education Standards: Emergency Medical Technician Instructional Guidelines Administrators and instructors should refer to these materials for additional detail.

The standard length of the program is 11 credit hours or 250 clock hours, which includes 90 hours for the core.

Minimum entrance requirements for this program include a high school diploma or GED unless high school students are dual enrolled. If dual enrolled, students must have the HS diploma or GED and meet the requirements to sit for the national certification examination.

Once the students have successfully completed the EMT Basic Program, They may be given a certificate stating that they have met all First Responder requirements.

Outcomes 01-11 are referred to as the Health Careers Core and do not have to be completed if the student has previously completed the Core in another health science program. The Core should be taken first or concurrently with the first course in the program. Following the successful completion of the core, the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

### **Career and Technical Student Organization (CTSO)**

Health Occupation Students of America, Inc (HOSA) - is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

## Standards

After successfully completing this course the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.
- 12.0 Apply fundamental knowledge of the anatomy and physiology of all human body systems to the practice of EMS.
- 13.0 Apply fundamental knowledge of life span development to patient assessment and management.
- 14.0 Describe the history and evolution of the EMS system.
- 15.0 Discuss and explain the roles, responsibilities & professionalism of EMS Personnel
- 16.0 Discuss the significance of using the correct safety precautions to ensure the safety of the patient, the EMT and the EMS team.
- 17.0 Discuss stress management techniques useful for both the EMT and the patient.
- 18.0 Discuss the procedures to safely lift and move patients of various age groups and situations (emergency, Urgent and non-urgent moves).
- 19.0 Discuss and apply knowledge of disease transmission to the overall safety and wellness of the EMS team(taught to the level described in FS 401.2701)
- 20.0 Describe the principles of medical documentation and report writing.
- 21.0 Describe the components of the EMS Communication system.
- 22.0 Describe the significance of communication techniques for the EMT.
- 23.0 Discuss the medical, legal and ethical issues to the provision of emergency care.
- 24.0 Discuss the principles of pharmacology as they are related to emergency care.
- 25.0 Discuss and demonstrate scene size up and management in an emergency situation.
- 26.0 Discuss and demonstrate primary patient assessment procedures for all patient age levels.
- 27.0 Discuss and demonstrate the procedures for taking the history of a patient.
- 28.0 Discuss and demonstrate secondary patient assessment procedures for all patient age levels.
- 29.0 Describe the significance of monitoring devices in patient assessment.
- 30.0 Discuss the components and factors of reassessment and its significance in patient assessment.
- 31.0 Demonstrate an understanding and proficiency in Airway Management techniques
- 32.0 Demonstrate an understanding and proficiency in Respiration techniques.
- 33.0 Demonstrate an understanding and proficiency in Artificial Ventilation techniques.

- 34.0 Apply a fundamental knowledge of the causes, pathophysiology and management of shock and the components of resuscitation
- 35.0 Apply knowledge to provide care for patients with a neurological emergency.
- 36.0 Apply knowledge to provide care for patients with an Abdominal/Gastrointestinal emergency.
- 37.0 Apply knowledge to provide care for patients with an Immunologic emergency.
- 38.0 Apply knowledge to provide care for a patient experiencing an infectious disease.
- 39.0 Apply knowledge to provide care for a patient with an endocrine disorder.
- 40.0 Apply knowledge to provide care for a patient with a psychiatric emergency.
- 41.0 Apply knowledge to provide care for patients with a cardiovascular emergency.
- 42.0 Apply Knowledge of toxicology to provide care for a patient with a poisoning or overdose emergency.
- 43.0 Apply knowledge to provide care for a patient with a respiratory emergency.
- 44.0 Apply knowledge of Hematology to provide care for patients with a clotting disorder or are experiencing a sickle cell disease crisis.
- 45.0 Apply knowledge to provide care for a patient with a genitourinary/renal emergency.
- 46.0 Apply knowledge to provide care for a patient with a gynecologic emergency.
- 47.0 Apply knowledge to provide care for a patient with a Non-Traumatic Musculoskeletal emergency.
- 48.0 Describe an overview of the identification, categorization, pathophysiology and assessment of a trauma patient.
- 49.0 Demonstrate an understanding and the skills required for the management of a patient with traumatic bleeding.
- 50.0 Demonstrate an understanding and the skills required for the management of a patient with a chest trauma.
- 51.0 Demonstrate an understanding and the skills required for the management of a patient with an abdominal/genitourinary trauma.
- 52.0 Demonstrate an understanding and the skills required for the management of a patient with an orthopedic trauma.
- 53.0 Demonstrate an understanding and the skills required for the management of a patient with a soft tissue trauma.
- 54.0 Demonstrate an understanding and the skills required for the management of a patient with a head, facial, or neck (non-spinal) trauma.
- 55.0 Demonstrate an understanding and the skills required for the management of a patient with a nervous system trauma.
- 56.0 Demonstrate an understanding of the special considerations for the management of a patient experiencing a trauma during pregnancy.
- 57.0 Demonstrate an understanding of the special considerations for the management of the pediatric patient experiencing a trauma.
- 58.0 Demonstrate an understanding of the special considerations for the management of the geriatric patient experiencing a trauma.
- 59.0 Demonstrate an understanding of the special considerations for the management of the cognitively impaired patient experiencing a trauma.

- 60.0 Discuss and demonstrate how to assess and manage environmental trauma emergencies.
- 61.0 Define and articulate the kinematics of trauma.
- 62.0 Describe the components and procedures of a multi-system trauma.
- 63.0 Apply knowledge of growth development, aging and assessment to the obstetric and neonatal populations.
- 64.0 Apply knowledge of growth development, aging and assessment to the pediatric population.
- 65.0 Apply knowledge of growth development, aging and assessment to the geriatric population.
- 66.0 Apply knowledge of growth development, aging and assessment to patients with special challenges.
- 67.0 Discuss and demonstrate the principles of safely operating a ground ambulance.
- 68.0 Discuss an overview of EMS operations during a multiples casualty incident.
- 69.0 Demonstrate knowledge and procedures involved in safely operating in and around an air medical operations landing zone.
- 70.0 Discuss correct procedures of extrication to ensure EMS personnel and patient safety during extrication operations.
- 71.0 Discuss the risks and responsibilities of operating during a terrorism event or during a natural or man-made disaster.

2011-2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Emergency Medical technician (Basic)  
**CIP Number:** 0317.020500  
**Program Length:** 11 credit hours  
**SOC Code(s):** 31-9099; 29-2041

This certificate program is part of the Emergency Medical Services AS/AAS degree program (1317020601/0317020601).

**Health Careers Core: The Health Careers Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Careers Core or any other health occupations program do not have to repeat intended outcomes 01-11.**

01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:

- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
- 01.02 Identify common methods of payment for healthcare services.
- 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
- 01.04 Describe the composition and functions of a healthcare team.
- 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
- 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
- 01.07 Identify characteristics of effective teams.
- 01.08 Recognize methods for building positive team relationships.
- 01.09 Analyze attributes and attitudes of an effective leader.
- 01.10 Recognize factors and situations that may lead to conflict.
- 01.11 Demonstrate effective techniques for managing team conflict.
- 01.12 Describe factors that influence the current delivery system of healthcare.
- 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.

02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:

- 02.01 Develop basic speaking and active listening skills.
- 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
- 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
- 02.04 Respond to verbal and non-verbal cues.
- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.

- 02.06 Use appropriate medical terminology and abbreviations.
- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
- 02.08 Recognize the importance of patient/client educations regarding healthcare.
- 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
- 02.10 Analyze elements of communication using a sender-receiver model.
- 02.11 Distinguish between and report subjective and objective information.
- 02.12 Report relevant information in order of occurrence.

03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:

- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
- 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
- 03.03 Demonstrate procedures for accurate documentation and record keeping.
- 03.04 Interpret healthcare facility policy and procedures.
- 03.05 Explain the “Patient’s Bill of Rights”.
- 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
- 03.07 Describe advance directives.
- 03.08 Describe informed consent.
- 03.09 Explain the laws governing harassment, labor and employment.
- 03.10 Differentiate between legal and ethical issues in healthcare.
- 03.11 Describe a code of ethics consistent with the healthcare occupation.
- 03.12 Identify and compare personal, professional, and organizational ethics.
- 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
- 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
- 03.15 Recognize and report abuse including domestic violence and neglect.
- 03.16 Distinguish among the five schedules of controlled substances.

04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:

- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
- 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
- 04.03 Identify psychological reactions to illness including defense mechanisms.
- 04.04 Identify complementary and alternative health practices.
- 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
- 04.06 Explain the basic concepts of positive self image, wellness and stress.
- 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
- 04.08 Explain the nutrition pyramid.
- 04.09 Recognize the steps in the grief process.

05.0 Recognize and practice safety and security procedures. – The student will be able to:

- 05.01 Recognize safe and unsafe working conditions and report safety hazards.
- 05.02 Demonstrate the safe use of medical equipment.
- 05.03 Explain and apply the theory of root- cause analysis
- 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
- 05.05 Identify and practice security procedures for medical supplies and equipment.
- 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions).
- 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
- 05.08 Demonstrate proper body mechanics and ergonomics.
- 05.09 Demonstrate the procedure for properly identifying patients.
- 05.10 Demonstrate procedures for the safe transport and transfer of patients.
- 05.11 Describe fire, safety, disaster and evacuations procedures.
- 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )

06.0 Recognize and respond to emergency situations. – The student will be able to:

- 06.01 Monitor and record vital signs.
- 06.02 Describe legal parameters relating to the administration of emergency care.
- 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
- 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.

07.0 Recognize and practice infection control procedures. – The student will be able to:

- 07.01 Define principles of infection control including standard and transmission based precautions.
- 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
- 07.03 Demonstrate knowledge of surgical asepsis.
- 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.

08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:

- 08.01 Describe technology applications in healthcare.
- 08.02 Define terms and demonstrate basic computer skills.
- 08.03 Recognize technology applications in healthcare.
- 08.04 Interpret information from electronic medical documents.
- 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.

09.0 Demonstrate employability skills. – The student will be able to:

- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.
  - 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
  - 09.03 Identify documents that may be required when applying for a job.
  - 09.04 Write an appropriate resume.
  - 09.05 Conduct a job search.
  - 09.06 Complete a job application form correctly.
  - 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
  - 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
  - 09.09 Identify acceptable work habits.
  - 09.10 Recognize appropriate affective/professional behavior.
  - 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:
- 10.01 Recognize emerging diseases and disorders
  - 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
  - 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
  - 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
  - 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
  - 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.
- 11.0 Apply basic math and science skills. – The student will be able to:
- 11.01 Draw, read, and report on graphs, charts and tables.
  - 11.02 Measure time, temperature, distance, capacity, and mass/weight.
  - 11.03 Make, use and convert using both traditional and metric units.
  - 11.04 Make estimations and approximations and judge the reasonableness of the result.
  - 11.05 Convert from regular to 24 hour time.
  - 11.06 Demonstrate ability to evaluate and draw conclusions.
  - 11.07 Organize and communicate the results obtained by observation and experimentation.
  - 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
  - 11.09 Calculate ratios

**Emergency Medical Technician (Basic): Intended outcomes 12-71 complete the occupational exit of EMT-B. The outcomes may be taught as one or more modules at the postsecondary level. OCP-B SOC Code 29-2041 Emergency Medical Technicians and Paramedics**

The Student Performance Standards for Emergency Medical Technology-EMT-B were adapted and condensed from the U S Department of Transportation 2009 National Emergency Medical Services Education Standards: Emergency Medical Technician Instructional Guidelines Administrators and instructors should refer and use these materials for additional detail.

- 12.0 Apply fundamental knowledge of the anatomy and physiology of all human body systems to the practice of EMS – The students will be able to:
- 12.01 Label the following topographic terms: Medial, lateral, proximal, distal, superior, inferior, anterior, posterior, midline, right and left, mid-clavicular, bilateral, mid-axillary.
  - 12.02 Describe & identify the anatomy and function of the following major body systems: Respiratory, circulatory, musculoskeletal, nervous, integumentary, digestive, urinary, genital and endocrine.
  - 12.03 Define the medical terminology & medical terms associated with the EMT level.
  - 12.04 Define Pathophysiology.
  - 12.05 Chart the life support chain, aerobic metabolism and anaerobic metabolism.
- 13.0 Apply fundamental knowledge of life span development to patient assessment and management. – The students will be able to:
- 13.01 Understand the terms used to designate the following stages of life: infants, toddlers, preschoolers, school-age children, adolescents (teenagers), early adults, middle adults & late adults.
  - 13.02 Describe the major physiologic & psychosocial characteristics of:
    - 13.02.01 An infant's life
    - 13.02.02 A toddler and preschooler's life
    - 13.02.03 A school age child's life
    - 13.02.04 An adolescent's life
    - 13.02.05 An early adults life
    - 13.02.06 A middle adult's life
    - 13.02.07 A late adult's life
- 14.0 Describe the history and evolution of the EMS system. – The students will be able to:
- 14.01 Define Emergency Medical Services (EMS) systems.
  - 14.02 Discuss the historical background of the development of the EMS system.

- 14.03 Identify the four levels of national EMS providers (EMR, EMT, AEMT & PM) as well as the three levels in the State of Florida.
- 14.04 State the specific statutes and regulations regarding the EMS system in Florida.
- 15.0 Discuss and explain the roles, responsibilities & professionalism of EMS Personnel – The students will be able to:
  - 15.01 Discuss vehicle & equipment readiness
  - 15.02 Characterize the EMS system's role in prevention and public education.
  - 15.03 Discuss the roles and responsibilities of the EMT related to personal safety of the crew, patient and bystanders.
  - 15.04 Discuss the roles and responsibilities of the EMT to operate emergency vehicles, provide scene leadership and perform patient assessment and administer emergency care.
  - 15.05 Discuss the maintenance of certification & licensure for the EMT in the State of Florida and NREMT.
  - 15.06 Define quality improvement and discuss the EMT's role in the process.
  - 15.07 Discuss EMS research & evidence based decision making.
- 16.0 Discuss the significance of using the correct safety precautions to ensure the safety of the patient, the EMT and the EMS team. – The students will be able to:
  - 16.01 Explain the need to determine scene safety.
  - 16.02 Discuss the importance of body substance isolation (BSI).
  - 16.03 Describe the steps the EMT-Basic should take for personal protection from airborne and bloodborne pathogens as well as communicable disease.
  - 16.04 List the personal protective equipment necessary to protect oneself in common emergency situations.
- 17.0 Discuss stress management techniques useful for both the EMT and the patient. – The students will be able to:
  - 17.01 List possible emotional reactions that an individual (EMT and EMT family, Patient and Patient family) may experience when faced with trauma, illness, death and dying.
  - 17.02 State the steps the EMT should take when approaching a family confronted with death and dying.
  - 17.03 Recognize the warning signs of personal stress and discuss the strategies EMTs can apply to manage it.
- 18.0 Discuss the procedures to safely lift and move patients of various age groups and situations (emergency, Urgent and non-urgent moves). – The students will be able to:

- 18.01 Demonstrate good body mechanics while using a stretcher and other patient moving devices.
  - 18.02 Discuss the guidelines and safety precautions that need to be followed when lifting a patient.
  - 18.03 Describe the guidelines and safety precautions for carrying patients and/or equipment.
  - 18.04 State the guidelines for reaching and their application.
  - 18.05 State the guidelines for pushing and pulling.
  - 18.06 Discuss patient positioning in common emergency situations.
  - 18.07 Discuss situation that may require the use of medical restraints on the patient & explain guidelines and safety consideration for their use.
- 19.0 Discuss and apply knowledge of disease transmission to the overall safety and wellness of the EMS team(taught to the level described in FS 401.2701) – The students will be able to:
- 19.01 Define “infectious disease” and “communicable disease.”
  - 19.02 Describe the routes of transmission for infectious disease.
  - 19.03 Explain the mode of transmission and the steps to prevent/deal with an exposure of hepatitis, meningitis, tuberculosis & HIV.
  - 19.04 Explain how immunity to infectious diseases is acquired.
  - 19.05 Explain post exposure management of exposure to patient blood or body fluids, including completing a post exposure report.
  - 19.06 Describe the components of physical fitness & mental wellbeing
- 20.0 Describe the principles of medical documentation and report writing. – The students will be able to:
- 20.01 Describe the use of written communication and documentation.
  - 20.02 Explain the legal implication of the patient care report.
  - 20.03 Identify the minimum dataset reference patient information and administrative information on the patient care report.
  - 20.04 Understand how to document refusal of care, including legal implications.
- 21.0 Describe the components of the EMS Communication system. – The students will be able to:
- 21.01 Understand the basic principles of the various types of communications equipment used in EMS
  - 21.02 Describe the use of radio communication and correct radio procedures, including the proper methods of initiating and terminating the radio call/transmission
  - 21.03 State the proper procedures and sequence for delivery of patient information to other healthcare professionals.

- 21.04 Identify the essential components of the verbal report and legal aspects that need to be considered.
- 22.0 Describe the significance of communication techniques for the EMT. – The students will be able to:
- 22.01 Describe principles of therapeutic and effective communication with patients in a manner that achieves a positive relationship.
  - 22.02 Discuss adjusting communication strategies to effectively communicate to differing age groups, developmental stages, patients with special needs, and differing cultures, including language barriers.
  - 22.03 Discuss the communication techniques that should be used to interact with the patient, patient family, bystanders, and individuals from other agencies including verbal diffusion and interview techniques.
- 23.0 Discuss the medical, legal and ethical issues to the provision of emergency care. – The students will be able to:
- 23.01 Differentiate between expressed, implied and involuntary consent
  - 23.02 Discuss the methods of obtaining consent and procedures for minors.
  - 23.03 Discuss the issues of abandonment, negligence, false imprisonment and battery and their implications to the EMT.
  - 23.04 Discuss the implications for the EMT in patient refusal of care and/or transport.
  - 23.05 Explain the importance, necessity and legality of patient confidentiality.
  - 23.06 Discuss the importance of Do Not Resuscitate [DNR] (advance directives) and local or Florida provisions regarding EMS application.
  - 23.07 Discuss State of Florida & Federal special reporting situations such as abuse, sexual assault, gunshots & knife wounds, communicable disease, etc
  - 23.08 Differentiate between civil tort & criminal actions
  - 23.09 List the elements of negligence and defenses/protections from liability.
  - 23.10 Discuss the role of the EMT at crime scenes and preservation of evidence.
  - 23.11 Define ethics & morality and discuss their implication for the EMT.
- 24.0 Discuss the principles of pharmacology as they are related to emergency care. – The students will be able to:
- 24.01 Explain the “six rights” of medication administration and describe how each one related to EMS.
  - 24.02 Discuss the forms in which the medications may be found and provide examples of each and discuss how the form of a medication dictates its route of administration.
  - 24.03 Describe the difference between a generic medication name and trade name, and provide an example of each.

- 24.04 Discuss the components and elements of a drug profile including, actions, contraindications, side effects, dose and route.
  - 24.05 Describe the role of medical direction in medication administration and explain the difference between direct orders (online) and standing orders (off-line).
  - 24.06 Give the generic and trade names, actions, indication, contraindications, routes of administration, side effects, interactions & doses of medications that may be administered by and EMT in an emergency as dictated by the State of Florida & local medical direction.
  - 24.07 Demonstrate how to administer medication in the following routes; oral, sublingual and auto-injector.
- 25.0 Discuss and demonstrate scene size up and management in an emergency situation. – The students will be able to:
- 25.01 Recognize and describe hazards/potential hazards at the scene.
  - 25.02 Determine if the scene is safe to enter.
  - 25.03 Discuss common mechanisms of injury/nature of illness.
  - 25.04 Discuss the procedures for multiple-patient situations.
  - 25.05 Explain why it is important for the EMT to determine the need for additional or specialized resources.
  - 25.06 List the minimum standard precautions that should be followed and PPE that should be worn at the emergency scene.
- 26.0 Discuss and demonstrate primary patient assessment procedures for all patient age levels. – The students will be able to:
- 26.01 Summarize the elements of a general impression of the patient.
  - 26.02 Discuss & demonstrate methods of assessing altered mental status using assess for level of consciousness (AVPU).
  - 26.03 Discuss & demonstrate methods of assessing the airway and providing airway care.
  - 26.04 Describe& demonstrate methods used for assessing if a patient is breathing
  - 26.05 Differentiate between a patient with adequate and inadequate breathing.
  - 26.06 Distinguish between methods of assessing breathing.
  - 26.07 Describe& demonstrate the methods used to obtain a pulse.
  - 26.08 Discuss & demonstrate the need for assessing the patient for external bleeding.
  - 26.09 Describe & demonstrate normal and abnormal findings when assessing skin color, temperature, moisture & capillary refill in adult, child & infant.
  - 26.10 Explain the reason for & demonstrate prioritizing a patient for care and transport.
- 27.0 Discuss and demonstrate the procedures for taking the history of a patient. – The students will be able to:

- 27.01 Discuss the process of taking a history, its key components and its relationship to the primary assessment process.
  - 27.02 Explain the importance of obtaining a SAMPLE & OPQRST history.
  - 27.03 Recognize and respond to the feelings patients experience during assessment.
  - 27.04 Describe examples of different techniques the EMT may use to obtain information from patients, family or bystanders during the history taking process.
- 28.0 Discuss and demonstrate secondary patient assessment procedures for all patient age levels. – The students will be able to:
- 28.01 Describe the unique needs & demonstrate assessing an individual with a specific chief complaint with no known prior history.
  - 28.02 Discuss the components of the physical exam and skills involved.
  - 28.03 Differentiate between the history and physical exam that are performed for responsive patients with no known prior history, responsive patients with a known prior history and unresponsive patients.
- 29.0 Describe the significance of monitoring devices in patient assessment. – The students will be able to:
- 29.01 Explain and demonstrate the use and interpretation of pulse oximetry device readings.
  - 29.02 List normal blood pressure ranges for adults, children & infants.
  - 29.03 Demonstrate how to measure a blood pressure by palpation, auscultation and electronic devices while in the field.
- 30.0 Discuss the components and factors of reassessment and its significance in patient assessment. – The students will be able to:
- 30.01 Describe the components of the reassessment and demonstrate the skills involved.
  - 30.02 Discuss the reasons for repeating the initial assessment as part of the reassessment.
  - 30.03 Explain trending assessment components and its value to other health professionals who assume care of the patient.
- 31.0 Demonstrate an understanding and proficiency in Airway Management techniques – The students will be able to:
- 31.01 Name & label the structures of the respiratory system
  - 31.02 State what care should be provided for a patient with or without adequate breathing.
  - 31.03 Describe & demonstrate the steps in performing the head-tilt chin-lift.
  - 31.04 Relate mechanism of injury to opening the airway.

- 31.05 Describe & demonstrate the steps in performing the jaw thrust.
- 31.06 Describe & demonstrate the techniques of suctioning and its importance.
- 32.0 Demonstrate an understanding and proficiency in Respiration techniques. – The students will be able to:
  - 32.01 Describe the pulmonary ventilation process to include mechanics of ventilation & alveolar ventilation (tidal volumes, dead space, etc)
  - 32.02 Describe the oxygenation process
  - 32.03 Explain both external & internal respiration process
  - 32.04 Discuss the various pathophysiologies of the respiratory system.
  - 32.05 Describe how to assess for adequate and inadequate respiration, including the use of pulse oximetry.
  - 32.06 List the components, purpose, indications, contraindications, complications and procedures for oxygen delivery devices.
  - 32.07 Demonstrate oxygen administration for the pediatric and geriatric patient.
  - 32.08 Describe and demonstrate the steps in performing the skill of assisting ventilations in the conscious patient in respiratory distress using a bag-valve-mask (BVM), and continuous positive airway pressure (CPAP).
- 33.0 Demonstrate an understanding and proficiency in Artificial Ventilation techniques. – The students will be able to:
  - 33.01 Demonstrate how to insert both an oropharyngeal (oral) and a nasopharyngeal (nasal) airway.
  - 33.02 Describe & demonstrate how to artificially ventilate a patient with a pocket mask.
  - 33.03 Describe & demonstrate the steps in performing the skill of artificially ventilating a patient with a BVM for one or two rescuers.
  - 33.04 Describe & demonstrate the signs of adequate & inadequate artificial ventilation using the BVM.
  - 33.05 Describe & demonstrate the steps in artificially ventilating a patient with a manually triggered ventilation device.
  - 33.06 Demonstrate how to artificially ventilate the pediatric and geriatric patient.
  - 33.07 Describe & demonstrate how to perform the Sellick maneuver (cricoid pressure).
  - 33.08 Recognize the differences between normal and positive pressure ventilation.
- 34.0 Apply a fundamental knowledge of the causes, pathophysiology and management of shock and the components of resuscitation – The students will be able to:
  - 34.01 Discuss withholding resuscitation if irreversible death is obvious or if a “DO Not Resuscitate” (DNR) is present.
  - 34.02 Review the anatomy & physiology of the respiratory & cardiovascular systems
  - 34.03 Discuss, identify pathophysiologies & medical care for respiratory failure as well as respiratory and cardiac arrest.

- 34.04 Explain the system components of CPR, the four links in the AHA chain of survival & how each one relates to maximizing the survival of the patient.
  - 34.05 Show Provider (AHA guidelines) certification required prior to EMT program competition as per FS 401.27.
  - 34.06 Understand shock, including the pathophysiology, causes, and its signs and symptoms associated with the various types of shock.
  - 34.07 Discuss patient assessment and steps to the emergency care of the patient with signs & symptoms of shock.
  - 34.08 Discuss and distinguish the variations & causes between the emergency medical care of the infant, child, adult and geriatric patient experiencing shock.
- 35.0 Apply knowledge to provide care for patients with a neurological emergency. – The students will be able to:
- 35.01 Discuss & review the anatomy, physiology & pathophysiology of the brain & spinal cord
  - 35.02 Discuss & identify the causes of ischemic strokes, hemorrhagic strokes & transient ischemic attacks and their similarities & differences.
  - 35.03 Discuss & demonstrate how to use the stroke assessment tool accepted by the State of Florida to identify a stroke patient rapidly.
  - 35.04 Define and differentiate generalize seizure, partial seizure & status epilepticus and list their possible causes.
  - 35.05 Describe & demonstrate the assessment & medical care of the infant, child, adult and geriatric patient with neurological emergencies.
- 36.0 Apply knowledge to provide care for patients with an Abdominal/Gastrointestinal emergency. – The students will be able to:
- 36.01 Discuss and review the basic anatomy physiology & pathophysiology of the gastrointestinal, genital & urinary systems.
  - 36.02 Define the term, "acute abdomen."
  - 36.03 Identify the signs & symptoms, and common causes of an acute abdomen.
  - 36.04 Describe & demonstrate the assessment & medical care of the infant, child, adult and geriatric patient with gastrointestinal emergencies.
- 37.0 Apply knowledge to provide care for patients with an Immunologic emergency. – The students will be able to:
- 37.01 Understand and define the terms allergic reaction and anaphylaxis
  - 37.02 Describe & demonstrate the emergency medical care of the infant, child, adult and geriatric patient experiencing an allergic reaction.
  - 37.03 State the generic and trade names, medication forms, dose, administration, action, and contraindications for the epinephrine auto-injector.
  - 37.04 Demonstrate the use of epinephrine auto-injector

- 38.0 Apply knowledge to provide care for a patient experiencing an infectious disease. – The students will be able to:
- 38.01 List the causes of infectious diseases
  - 38.02 Describe & demonstrate the emergency medical care of the infant, child, adult and geriatric patient experiencing an infectious disease.
  - 38.03 Discuss mandatory notification to State or Federal agencies of various diseases.
- 39.0 Apply knowledge to provide care for a patient with an endocrine disorder. – The students will be able to:
- 39.01 Review the anatomy, physiology & pathophysiology of the endocrine system and its main function in the body.
  - 39.02 Define diabetes (type I & II), Hypoglycemia, Hyperglycemia & diabetic ketoacidosis.
  - 39.03 Identify & demonstrate the steps in the emergency medical care of the patient taking diabetic medicine with an altered mental status and a history of diabetes.
  - 39.04 State the generic and trade names, medication forms, dose, administration, action, and contraindications for oral glucose.
  - 39.05 Demonstrate the steps of using a glucometer device and administering oral glucose.
  - 39.06 Distinguish between the emergency medical care of the infant, child, adult and geriatric patient experiencing a diabetic emergency.
- 40.0 Apply knowledge to provide care for a patient with a psychiatric emergency. – The students will be able to:
- 40.01 Define behavior, psychiatric disorders & behavioral emergencies.
  - 40.02 Discuss the general factors that may cause an alteration in a patient's behavior.
  - 40.03 Discuss the risk factors/signs or symptoms of various psychiatric emergencies.
  - 40.04 Discuss special medical/legal considerations for managing behavioral emergencies to include Florida statutes:
    - 40.04.01 Baker Act (FS 394.451)
    - 40.04.02 Marchman Act (FS 397.601 & FS 397.675)
    - 40.04.03 Emergency examination & treatment of incapacitated (FS401.445)
  - 40.05 Distinguish between the emergency medical care of the infant, child, adult and geriatric patient experiencing a behavioral or psychiatric emergency.
  - 40.06 Demonstrate various techniques to safely restrain a patient with a behavioral problem.
- 41.0 Apply knowledge to provide care for patients with a cardiovascular emergency. – The students will be able to:

- 41.01 Review the basic anatomy, physiology and pathophysiology of the cardiovascular system.
  - 41.02 Describe the anatomy, physiology, pathophysiology and demonstrate the assessment & management of :
    - 41.02.01 Angina pectoris
    - 41.02.02 Thromboembolism
    - 41.02.03 Myocardial infarction
    - 41.02.04 Hypertensive emergencies
    - 41.02.05 Aortic aneurysm/dissection
    - 41.02.06 Heart Failure
  - 41.03 Demonstrate the ability to assess and treat a patient with signs and symptoms of cardiac issues, including airway, medication administration, position of comfort and life span considerations.
  - 41.04 List the indications & contraindications for automated external defibrillation (AED).
  - 41.05 Explain the impact of age and weight on defibrillation.
  - 41.06 Discuss the position of comfort for patients with various cardiac emergencies.
  - 41.07 Explain the rationale for early defibrillation.
  - 41.08 Explain that not all chest pain patients result in cardiac arrest and do not need to be attached to an automated external defibrillator.
  - 41.09 Discuss the various types of automated external defibrillators.
  - 41.10 Differentiate between the fully automated and the semi-automated defibrillator.
  - 41.11 Understand the importance of maintenance and operators check list for AED's.
  - 41.12 Demonstrate the ability to use an AED according to the latest American Heart Association (AHA) guidelines.
  - 41.13 Explain the role medical direction plays in the use of automated external defibrillation.
- 42.0 Apply knowledge of toxicology to provide care for a patient with a poisoning or overdose emergency. – The students will be able to:
- 42.01 Define toxicology, poisoning & overdose.
  - 42.02 List various ways that poisons enter the body.
  - 42.03 List signs/symptoms associated with poisoning.
  - 42.04 Discuss & demonstrate the emergency medical care for the infant, child, adult and geriatric patient with poisoning or overdose.
  - 42.05 State the generic and trade names, indications, contraindications, medication form, dose, administration, actions, side effects and re-assessment strategies for activated charcoal.
  - 42.06 Perform the necessary steps required to provide a patient with activated charcoal.

- 43.0 Apply knowledge to provide care for a patient with a respiratory emergency. – The students will be able to:
- 43.01 List the structure, function and pathophysiology of the respiratory system.
  - 43.02 List signs of adequate air exchange.
  - 43.03 State the signs and symptoms of a patient with respiratory distress.
  - 43.04 Describe & demonstrate the assessment & medical care of the infant, child, adult and geriatric patient with a respiratory emergency.
  - 43.05 State the generic name, medication forms, dose, administration, action, indications and contraindications for the metered-dose inhaler.
  - 43.06 Demonstrate the steps in facilitating the use of an inhaler.
  - 43.07 Differentiate between upper airway obstruction and lower airway disease in the pediatric and geriatric patient.
- 44.0 Apply knowledge of Hematology to provide care for patients with a clotting disorder or are experiencing a sickle cell disease crisis. – The students will be able to:
- 44.01 List the composition, physiology & pathophysiology of blood.
  - 44.02 State the signs and symptoms of a patient with a Sickle Cell crisis or a clotting disorder.
  - 44.03 Describe & demonstrate the emergency medical care of the patient with Sickle cell distress or clotting disorder.
- 45.0 Apply knowledge to provide care for a patient with a genitourinary/renal emergency. – The students will be able to:
- 45.01 List the anatomy, physiology & pathophysiology of the renal system.
  - 45.02 Understand the principles of kidney dialysis.
  - 45.03 State the signs and symptoms of a patient with a dialysis emergency.
  - 45.04 Describe & demonstrate the emergency medical care of the patient with a dialysis emergency.
- 46.0 Apply knowledge to provide care for a patient with a gynecologic emergency. – The students will be able to:
- 46.01 Describe the basic anatomy, physiology and pathophysiology of the female reproductive system.
  - 46.02 Distinguish between the emergency medical care of the infant, child, adult and geriatric patient experiencing a female reproductive system emergency.
  - 46.03 Explain the general management of a gynecologic emergency in relation to patient privacy and communication.
  - 46.04 Discuss the special consideration and precautions an EMT must observe when arriving at the scene of a suspected case of sexual assault or rape.

- 47.0 Apply knowledge to provide care for a patient with a Non-Traumatic Musculoskeletal emergency. – The students will be able to:
- 47.01 Describe the basic anatomy, physiology and pathophysiology of the skeletal system (i.e. cancer or osteoporosis).
  - 47.02 Describe & demonstrate the emergency medical care of the patient with a non-traumatic musculoskeletal emergency.
- 48.0 Describe an overview of the identification, categorization, pathophysiology and assessment of a trauma patient. – The students will be able to:
- 48.01 Discuss and define pathophysiology of the trauma patient
  - 48.02 Discuss and demonstrate assessment and management of the trauma patient.
  - 48.03 Discuss and describe significant & non-significant Mechanism of Injury (MOI) & provide examples of each.
  - 48.04 Discuss and describe State of Florida's trauma scorecard methodologies as required in FS 401.2701 & 64J-2.004 & 2.005.
  - 48.05 Discuss the National Trauma Triage Protocol of injured Patients (<http://cdc.gov/fieldtriage/> )
- 49.0 Demonstrate an understanding and the skills required for the management of a patient with traumatic bleeding. – The students will be able to:
- 49.01 Review the anatomy & physiology of the circulatory system
  - 49.02 Differentiate between:
    - 49.02.01 Internal and external bleeding.
    - 49.02.02 Arterial, venous and capillary bleeding.
  - 49.03 Explain and demonstrate emergency medical care of the patient with external & internal bleeding.
  - 49.04 List signs and symptoms of shock (hypo-perfusion).
- 50.0 Demonstrate an understanding and the skills required for the management of a patient with a chest trauma. – The students will be able to:
- 50.01 Discuss MOI for chest injury (blunt & penetrating, energy & injury).
  - 50.02 List the anatomy, physiology & pathophysiology of the thoracic/chest cavity & respiratory system.
  - 50.03 Differentiate between a pneumothorax (open, simple & tension) & hemothorax.
  - 50.04 Describe and demonstrate the assessment & management of a patient with a suspected chest (open and closed) injury.
- 51.0 Demonstrate an understanding and the skills required for the management of a patient with an abdominal/genitourinary trauma. – The students will be able to:

- 51.01 Discuss MOI for abdominal injury (blunt & penetrating, energy & injury).
  - 51.02 List the anatomy, physiology & pathophysiology of the abdominal cavity & genitourinary (both male & female) system.
  - 51.03 Describe the abdominal quadrants
  - 51.04 Describe the differences between hollow & solid organs.
  - 51.05 Describe and demonstrate the assessment & management of a patient with a suspected abdominal (penetrating or blunt) or genitourinary injury.
  - 51.06 Explain special consideration related to a patient who has experienced an injury by sexual assault/abuse.
- 52.0 Demonstrate an understanding and the skills required for the management of a patient with an orthopedic trauma. – The students will be able to:
- 52.01 Discuss MOI for orthopedic injury (blunt & penetrating, energy & injury).
  - 52.02 Review the anatomy, physiology & pathophysiology of the musculoskeletal system.
  - 52.03 Describe the different types of musculoskeletal injuries including fractures, amputations, sprains, & strains.
  - 52.04 Differentiate between an open and a closed painful, swollen, deformed extremity.
  - 52.05 Describe and demonstrate the assessment & management of a patient with a suspected orthopedic injury.
- 53.0 Demonstrate an understanding and the skills required for the management of a patient with a soft tissue trauma. – The students will be able to:
- 53.01 Discuss & list the anatomy and physiology, to include the layers, of the skin.
  - 53.02 Discuss and list the types of open & closed soft tissue injury.
  - 53.03 Define and list characteristics of superficial, partial-thickness and full-thickness burns.
  - 53.04 Explain how the seriousness of a burn is related to its depth and extent (percent of body surface area (BSA) involved or rule of 9s) for adult & pediatric patient.
  - 53.05 Describe and demonstrate the assessment & management of a patient with a soft tissue injury.
- 54.0 Demonstrate an understanding and the skills required for the management of a patient with a head, facial, or neck (non-spinal) trauma. – The students will be able to:
- 54.01 List the anatomy, physiology & pathophysiology of the head, face, & neck.
  - 54.02 Discuss MOI for head, face, & neck (non-spinal) (blunt & penetrating, energy & injury).
  - 54.03 Describe and demonstrate the assessment & management of a patient with an injury to the head, face & neck (non-spinal).
- 55.0 Demonstrate an understanding and the skills required for the management of a patient with a nervous system trauma. – The students will be able to:

- 55.01 Review the anatomy, physiology & pathophysiology of the nervous system.
  - 55.02 Explain functions of the somatic & autonomic nervous system
  - 55.03 Discuss MOI for head (brain) & spinal (blunt & penetrating, energy & injury).
  - 55.04 Discuss the different types of brain injuries and their corresponding signs and symptoms, including increased intracranial pressure (ICP), concussion, contusion & injuries caused by medical conditions.
  - 55.05 Describe and demonstrate the assessment & management of a patient with a head (brain) and spinal injury.
- 56.0 Demonstrate an understanding of the special considerations for the management of a patient experiencing a trauma during pregnancy. – The students will be able to:
- 56.01 Discuss Anatomy, physiology & pathophysiology of the pregnant trauma patient.
  - 56.02 Discuss MOI and fetal considerations for the pregnant trauma patient.
  - 56.03 Discuss & demonstrate unique injuries and conditions along with assessment & management for the pregnant patient involved in trauma.
- 57.0 Demonstrate an understanding of the special considerations for the management of the pediatric patient experiencing a trauma. – The students will be able to:
- 57.01 Discuss Anatomy, physiology & pathophysiology of the pediatric trauma patient.
  - 57.02 Discuss & demonstrate unique assessment & management considerations for the pediatric trauma patient.
- 58.0 Demonstrate an understanding of the special considerations for the management of the geriatric patient experiencing a trauma. – The students will be able to:
- 58.01 Discuss Anatomy, physiology & pathophysiology of the elderly trauma patient.
  - 58.02 Discuss & demonstrate unique assessment & management considerations for the elderly trauma patient.
- 59.0 Demonstrate an understanding of the special considerations for the management of the cognitively impaired patient experiencing a trauma. – The students will be able to:
- 59.01 Discuss anatomy, physiology & pathophysiology of the cognitively impaired trauma patient.
  - 59.02 Discuss & demonstrate unique assessment & management considerations for the cognitively impaired trauma patient.
- 60.0 Discuss and demonstrate how to assess and manage environmental trauma emergencies. – The students will be able to:
- 60.01 Define drowning and discuss its incidence, risk factors & prevention.

- 60.02 List pathophysiologies of water related incidents
  - 60.03 Describe submersion in salt and fresh water
  - 60.04 Discuss & demonstrate assessment & management considerations for a patient of a submersion incident.
  - 60.05 Describe the different types of diving emergencies and how they may occur.
  - 60.06 List pathophysiologies of dysbarism incidents to include high altitudes and diving incidents.
  - 60.07 Discuss & demonstrate assessment & management considerations for a patient of a dysbarism incident.
  - 60.08 Discuss & demonstrate assessment & management considerations for a patient of a lightning incident
  - 60.09 Explain the five ways a body can lose heat
  - 60.10 List pathophysiologies of temperature related incidents to include both cold and heat related illness.
  - 60.11 Discuss & demonstrate assessment & management considerations for a patient of a temperature related illness
  - 60.12 Identify the species of insects, spiders & snakes in the US that may cause life threatening injuries.
  - 60.13 Discuss & demonstrate assessment & management considerations for a patient of a bite or envenomation incident.
- 61.0 Define and articulate the kinematics of trauma. – The students will be able to:
- 61.01 Explain the relationship between mechanism of injury and potential energy, kinetic energy and work.
  - 61.02 Define term blunt & penetrating trauma and provide examples of the mechanism of injury (MOI) that would cause each to occur and include:
    - 61.02.01 Affects of high, medium & low velocity penetrating trauma
    - 61.02.02 Primary, secondary, tertiary and miscellaneous blast injuries
    - 61.02.03 Factors to consider of a patient injured in a fall
    - 61.02.04 Consider age (pediatric & geriatrics)
- 62.0 Describe the components and procedures of a multi-system trauma. – The students will be able to:
- 62.01 Describe and provide a general overview of multisystem trauma patient management.
  - 62.02 Discuss the golden principle of out-of-hospital trauma care
  - 62.03 Discuss & demonstrate assessment & management considerations for a patient of multi system injuries.
- 63.0 Apply knowledge of growth development, aging and assessment to the obstetric and neonatal populations. – The students will be able to:

- 63.01 Review the anatomy, physiology & pathophysiology of the female reproductive system.
  - 63.02 Explain the normal changes that occur during pregnancy.
  - 63.03 Differentiate between the stages of labor and delivery.
  - 63.04 Discuss & demonstrate assessment & management considerations of a pregnancy
  - 63.05 Discuss assessment & management considerations of complications of pregnancy.
  - 63.06 Discuss & demonstrate assessment & management considerations of a neonate.
- 64.0 Apply knowledge of growth development, aging and assessment to the pediatric population. – The students will be able to:
- 64.01 List the anatomy, physiology & pathophysiology of the pediatric patient.
  - 64.02 Describe the differences in anatomy when compared to the adult patient to
  - 64.03 Discuss & demonstrate assessment & management considerations of a pediatric emergency.
  - 64.04 The most common causes of the following conditions in the pediatric patient.
    - 64.04.01 Shock
    - 64.04.02 Altered mental status and seizures
    - 64.04.03 Gastrointestinal emergencies
    - 64.04.04 Poisonings
    - 64.04.05 Drowning
    - 64.04.06 Trauma
  - 64.05 Discuss & demonstrate assessment & management considerations for Sudden Infant Death Syndrome (SIDS).
- 65.0 Apply knowledge of growth development, aging and assessment to the geriatric population. – The students will be able to:
- 65.01 Define and discuss the term “geriatrics.”
  - 65.02 List the anatomy, physiology & pathophysiology of the Geriatric patient.
  - 65.03 Discuss & demonstrate assessment & management considerations of a geriatric emergency.
- 66.0 Apply knowledge of growth development, aging and assessment to patients with special challenges. – The students will be able to:
- 66.01 Define and discuss child and elder abuse and neglect and possible indicators of each.
  - 66.02 Discuss assessment & management considerations of a patient with special needs to include child and elder abuse and neglect, homelessness/poverty, etc.

67.0 Discuss and demonstrate the principles of safely operating a ground ambulance. – The students will be able to:

67.01 Discuss the importance of performing regular vehicle & equipment inspection.

67.02 Describe the general provisions of Florida laws relating to the operation of the ambulance and privileges.

67.03 Discuss "Due Regard for Safety of All Others" while operating an emergency vehicle.

67.04 Provide examples of some high risk situations and hazards that may affect the safety of the ambulance and its passengers during both pre-transport & transport.

68.0 Discuss an overview of EMS operations during a multiples casualty incident. – The students will be able to:

68.01 Describe the specific condition that would define a mass-casualty incident (MCI) and give examples.

68.02 Describe primary and secondary triage, how the four triage categories are assigned and how destination decisions are made.

68.03 Describe how the techniques of triage are performed.

68.04 Demonstrate how to perform a triage based scenario that involves an MCI.

69.0 Demonstrate knowledge and procedures involved in safely operating in and around an air medical operations landing zone. – The students will be able to:

69.01 Discuss safe air medical operations

69.02 Describe key scene safety considerations when preparing for a helicopter medivac, including establishing a landing zone and approaching the aircraft.

69.03 Discuss the criteria for utilizing an air medical response

70.0 Discuss correct procedures of extrication to ensure EMS personnel and patient safety during extrication operations. – The students will be able to:

70.01 Describe the role of the EMT in patient rescue & vehicle extrication

70.02 Describe personal and patient safety during vehicle extrication.

70.03 Discuss the factors related to ensuring situational safety at the site of a vehicle extrication

70.04 Explain the difference between simple access and complex access in vehicle extrication

70.05 Discuss patient care consideration related to assisting with rapid extrication, providing emergency care to the trapped patient and removing and transferring a patient.

71.0 Discuss the risks and responsibilities of operating during a terrorism event or during a natural or man-made disaster. – The students will be able to:

71.01 Describe the role of the EMT on the scene of a natural or man-made disaster

71.02 Define the term international terrorism & domestic terrorism and provide examples of incidents of each.

71.03 Describe personal & patient safety during a natural or man-made disaster.

71.04 Describe the factors related to ensuring situational safety at the site of a disaster and the procedures required.

2011-2012

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Emergency Medical Technician (Basic)-ATD  
**Program Type:** ATD (Applied Technology Diploma)  
**Career Cluster:** Health Science

	<b>CC</b>	<b>PSAV</b>
Program Number	N/A	W170208
CIP Number	0317020503	0317020504
Grade Level	Applied Technology Diploma (ATD)	Applied Technology Diploma (ATD)
Standard Length	11 credit hours	250 hours
CTSO	HOSA	HOSA
SOC Codes (all applicable)	31-9099, 29-2041	31-9099, 29-2041
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>	
Basic Skills Level	n/a	

### **Purpose**

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

This is an instructional program that prepares students for employment as emergency medical technicians SOC Code 29-2041 (Emergency Medical Technicians and Paramedics) to function at the basic pre-hospital emergency medical technician (basic) level and treat various medical/trauma conditions using appropriate equipment and materials. The program prepares students for certification as EMT's in accordance with Chapter 64J of the Florida Administrative Code. The program must be approved by the Department of Health, Bureau of Emergency Medical Services and the curriculum must adhere to the U S Department of Transportation (DOT) 2009 National Emergency Medical Services Education Standards: Emergency Medical Technician Instructional Guidelines. This is the initial level for a career in emergency medical services and the primary prerequisite for paramedic training and certification.

The content includes but is not limited to : patient assessment, airway management, cardiac arrest, external and internal bleeding and shock, traumatic injuries, fractures, dislocations, sprains, poisoning, heart attack, stroke, diabetes, acute abdomen, communicable diseases, patients with abnormal behavior, alcohol and drug abuse, the unconscious state, emergency childbirth, burns, environmental hazards, communications, reporting, extrication and transportation of patient. The student must be proficient in patient assessment and evaluation,

the use of suctioning devices, oral and nasal airways, resuscitation devices, oxygen equipment, sphygmomanometer and stethoscope, splints of all types, pneumatic anti-shock garments, extrication tools, dressings and bandages, stretchers and patient carrying devices.

**Program Structure**

This program is an Applied Technology Diploma program that is part of a technical degree program, is less than 60 credit hours, and leads to employment in a specific occupation. An applied technology diploma program may consist of either technical credit or college credit. A public school district may offer an applied technology diploma program only as technical credit, with college credit awarded to a student upon articulation to a community college.

**PSAV Program**

When offered at the district level, this program is a planned sequence of instruction consisting of two occupational completion points and the courses as shown below.

OCP	Course Number	Course Title	Length	SOC Code
A	HSC0003	Basic Healthcare Worker	90 hours	31-9099
B	EMS0159	Emergency Medical Technician	160 hours	29-2041

**Community College**

When offered at the community college level, this ATD program is part of the Emergency Medical Services (1317.020601) and has a program length of 11 credits.

**Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

Florida Statute 401.2701 requires that the instructor-student ratio should not exceed 1:6. Hospital activity shall include a minimum of 20 hours of supervised clinical supervision, including 10 hrs in a hospital emergency department. Clinical activity shall include appropriate patient assessment skills, intervention and documentation relevant to each clinical rotation.

Field internship shall include a competency based program to assure appropriate pre-hospital assessment and management of medical and trauma patients, as well as associated manual skills. The field internship activity shall include a minimum of 5 emergency runs resulting in patient care and transport appropriate for the EMT. In addition, the patient care component should include minimum competencies in patient assessment, airway management and ventilation, trauma and medical emergencies.

**Special Notes**

- Entry Level students must be certified in the following:

- Hazardous Waste Operations and Emergency Response (HAZWOPER) standard, 29 CFR 1910.120 (q)(6)(i) –First Responder Awareness Level
- ICS 100 or equivalent (offered free online from FEMA <http://training.fema.gov/EMIWeb/IS/IS100a.asp> )
- ICS-700 or equivalent (offered free online from FEMA <http://training.fema.gov/EMIWeb/IS/is700.asp> )

This program meets the Department of Health HIV/AIDS education requirements and the instructor will provide a certificate to the student verifying that this requirement has been met. Programs may also teach domestic violence and prevention of medical errors education and may choose to provide a certificate to the student verifying that this education has been completed.

Please refer to chapter 401 F.S. for more information on disqualification for the EMT license through the Bureau of Emergency Medical Services, Department of Health.

An EMT-B program must be taught by an instructor meeting the qualifications as set forth in 64J-1.201 FAC.

Students must complete this program, or demonstrate the mastery of skills standards contained in this program, before advancing in either of the other programs in this cluster. Completion of this program should prepare the student for the certification examination approved for the state of Florida.

An American Heart Association or Red Cross certification or equivalent in "professional" BLS is required of all candidates for entrance into an EMT-B program.

The Student Performance Standards for Emergency Medical Technology-EMT-B were adapted and condensed from the U S Department of Transportation 2009 National Emergency Medical Services Education Standards: Emergency Medical Technician Instructional Guidelines Administrators and instructors should refer to these materials for additional detail.

Once students have successfully completed the EMT Basic Program, they may be given a certificate stating they have met all First Responder competency requirements.

Outcomes 01-11 are referred to as the Health Careers Core and do not have to be completed if the student has previously completed the Core in another health science program. The Core should be taken first or concurrently with the first course in the program. Following the successful completion of the core, the student is eligible to take the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio

### **Career and Technical Student Organization (CTSO)**

Health Occupations Students of America, Inc. (HOSA) is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

## **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Some secondary students with disabilities (ESE) may need additional time (i.e., longer than the regular school year), to master the student performance standards associated with a regular occupational completion point (OCP) or a modified occupational completion point (MOCP). If needed, a student may enroll in the same career and technical course more than once. Documentation should be included in the IEP that clearly indicates that it is anticipated that the student may need an additional year to complete an OCP/MOCP. The student should work on different competencies and new applications of competencies each year toward completion of the OCP(s)/MOCP. After achieving the competencies identified for the year, the student earns credit for the course. It is important to ensure that credits earned by students are reported accurately. The district's information system must be designed to accept multiple credits for the same course number (for eligible students with disabilities). For further information, see Rule 6A-6.0312, F.A.C., Course Modifications for Exceptional Students, and the latest pertinent Technical Assistance Paper (<http://www.fldoe.org/ease/tap-home.asp>).

## **Articulation**

The information related to the guaranteed transfer of credit between an applied technology diploma program and AS/AAS degree must be documented and maintained by the Articulation Coordinating Committee (ACC). The transfer of the applied technology diploma to an AS/AAS degree is guaranteed for a period of three (3) years following the date of the award of the applied technology diploma.

## **Program Length**

In accordance with Rule 6A-10.024, F.A.C. an Applied Technology Diploma program consists of a course of study that is part of an AS/AAS degree program, is less than 60 credit hours, is approximately 50% of the technical component (non-general education), and leads to employment in a specific occupation. An applied technology diploma program may consist of either technical credit or college credit.

Students must have a high school diploma, a GED, or a certificate of completion to be admitted to an applied technology diploma program. Within six weeks of entry, students in ATD programs of 450 or more hours must be tested pursuant to Rule 6A-10.040, F.A.C. and if below minimum standards for completion from the program, must receive remedial instruction. Due to the fact that this program is not 450 hours or more, the basic skills requirements do not apply.

Community Colleges may offer either college or career credit toward the applied technology diploma. A Career Center in a public school district may offer an applied technology diploma program only as technical credit, with college credit awarded to a student upon articulation to a community college (Section 1004.02, F.S.)

When offered at a community college the standard length of this program is 11 credits. When offered at a technical center the standard length of this program is 250 clock hours.

In accordance with Rule 6A-10.024, F.A.C. all faculty providing instruction must have at least a baccalaureate degree or an associate degree with demonstrated competencies in the specific instructional program as defined by the Southern Association of Colleges and Schools.

## **Standards**

After successfully completing this program the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.
- 12.0 Apply fundamental knowledge of the anatomy and physiology of all human body systems to the practice of EMS.
- 13.0 Apply fundamental knowledge of life span development to patient assessment and management.
- 14.0 Describe the history and evolution of the EMS system.
- 15.0 Discuss and explain the roles, responsibilities & professionalism of EMS Personnel
- 16.0 Discuss the significance of using the correct safety precautions to ensure the safety of the patient, the EMT and the EMS team.
- 17.0 Discuss stress management techniques useful for both the EMT and the patient.
- 18.0 Discuss the procedures to safely lift and move patients of various age groups and situations (emergency, Urgent and non-urgent moves).
- 19.0 Discuss and apply knowledge of disease transmission to the overall safety and wellness of the EMS team(taught to the level described in FS 401.2701)
- 20.0 Describe the principles of medical documentation and report writing.
- 21.0 Describe the components of the EMS Communication system.
- 22.0 Describe the significance of communication techniques for the EMT.
- 23.0 Discuss the medical, legal and ethical issues to the provision of emergency care.
- 24.0 Discuss the principles of pharmacology as they are related to emergency care.
- 25.0 Discuss and demonstrate scene size up and management in an emergency situation.

- 26.0 Discuss and demonstrate primary patient assessment procedures for all patient age levels.
- 27.0 Discuss and demonstrate the procedures for taking the history of a patient.
- 28.0 Discuss and demonstrate secondary patient assessment procedures for all patient age levels.
- 29.0 Describe the significance of monitoring devices in patient assessment.
- 30.0 Discuss the components and factors of reassessment and its significance in patient assessment.
- 31.0 Demonstrate an understanding and proficiency in Airway Management techniques
- 32.0 Demonstrate an understanding and proficiency in Respiration techniques.
- 33.0 Demonstrate an understanding and proficiency in Artificial Ventilation techniques.
- 34.0 Apply a fundamental knowledge of the causes, pathophysiology and management of shock and the components of resuscitation
- 35.0 Apply knowledge to provide care for patients with a neurological emergency.
- 36.0 Apply knowledge to provide care for patients with an Abdominal/Gastrointestinal emergency.
- 37.0 Apply knowledge to provide care for patients with an Immunologic emergency.
- 38.0 Apply knowledge to provide care for a patient experiencing an infectious disease.
- 39.0 Apply knowledge to provide care for a patient with an endocrine disorder.
- 40.0 Apply knowledge to provide care for a patient with a psychiatric emergency.
- 41.0 Apply knowledge to provide care for patients with a cardiovascular emergency.
- 42.0 Apply Knowledge of toxicology to provide care for a patient with a poisoning or overdose emergency.
- 43.0 Apply knowledge to provide care for a patient with a respiratory emergency.
- 44.0 Apply knowledge of Hematology to provide care for patients with a clotting disorder or are experiencing a sickle cell disease crisis.
- 45.0 Apply knowledge to provide care for a patient with a genitourinary/renal emergency.
- 46.0 Apply knowledge to provide care for a patient with a gynecologic emergency.
- 47.0 Apply knowledge to provide care for a patient with a Non-Traumatic Musculoskeletal emergency.
- 48.0 Describe an overview of the identification, categorization, pathophysiology and assessment of a trauma patient.
- 49.0 Demonstrate an understanding and the skills required for the management of a patient with traumatic bleeding.
- 50.0 Demonstrate an understanding and the skills required for the management of a patient with a chest trauma.
- 51.0 Demonstrate an understanding and the skills required for the management of a patient with an abdominal/genitourinary trauma.
- 52.0 Demonstrate an understanding and the skills required for the management of a patient with an orthopedic trauma.
- 53.0 Demonstrate an understanding and the skills required for the management of a patient with a soft tissue trauma.
- 54.0 Demonstrate an understanding and the skills required for the management of a patient with a head, facial, or neck (non-spinal) trauma.

- 55.0 Demonstrate an understanding and the skills required for the management of a patient with a nervous system trauma.
- 56.0 Demonstrate an understanding of the special considerations for the management of a patient experiencing a trauma during pregnancy.
- 57.0 Demonstrate an understanding of the special considerations for the management of the pediatric patient experiencing a trauma.
- 58.0 Demonstrate an understanding of the special considerations for the management of the geriatric patient experiencing a trauma.
- 59.0 Demonstrate an understanding of the special considerations for the management of the cognitively impaired patient experiencing a trauma.
- 60.0 Discuss and demonstrate how to assess and manage environmental trauma emergencies.
- 61.0 Define and articulate the kinematics of trauma.
- 62.0 Describe the components and procedures of a multi-system trauma.
- 63.0 Apply knowledge of growth development, aging and assessment to the obstetric and neonatal populations.
- 64.0 Apply knowledge of growth development, aging and assessment to the pediatric population.
- 65.0 Apply knowledge of growth development, aging and assessment to the geriatric population.
- 66.0 Apply knowledge of growth development, aging and assessment to patients with special challenges.
- 67.0 Discuss and demonstrate the principles of safely operating a ground ambulance.
- 68.0 Discuss an overview of EMS operations during a multiples casualty incident.
- 69.0 Demonstrate knowledge and procedures involved in safely operating in and around an air medical operations landing zone.
- 70.0 Discuss correct procedures of extrication to ensure EMS personnel and patient safety during extrication operations.
- 71.0 Discuss the risks and responsibilities of operating during a terrorism event or during a natural or man-made disaster.

2011-2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:           Emergency Medical Technician (Basic)**  
**PSAV Number:           W170208**

When this program is offered at the PSAV level, the following organization of courses, standards, and benchmarks apply.

**PSAV Course Number: HSC0003**  
**Occupational Completion Point: A**  
**Basic Healthcare Worker – 90 Hours – SOC Code 31-9099**

**Health Careers Core:** The Health Careers Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Careers Core or any other health occupations program do not have to repeat intended outcomes 01-11.

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:
- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
  - 01.02 Identify common methods of payment for healthcare services.
  - 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
  - 01.04 Describe the composition and functions of a healthcare team.
  - 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
  - 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
  - 01.07 Identify characteristics of effective teams.
  - 01.08 Recognize methods for building positive team relationships.
  - 01.09 Analyze attributes and attitudes of an effective leader.
  - 01.10 Recognize factors and situations that may lead to conflict.
  - 01.11 Demonstrate effective techniques for managing team conflict.
  - 01.12 Describe factors that influence the current delivery system of healthcare.
  - 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:
- 02.01 Develop basic speaking and active listening skills.
  - 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
  - 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
  - 02.04 Respond to verbal and non-verbal cues.

- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.
- 02.06 Use appropriate medical terminology and abbreviations.
- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
- 02.08 Recognize the importance of patient/client educations regarding healthcare.
- 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
- 02.10 Analyze elements of communication using a sender-receiver model.
- 02.11 Distinguish between and report subjective and objective information.
- 02.12 Report relevant information in order of occurrence.

03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:

- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
- 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
- 03.03 Demonstrate procedures for accurate documentation and record keeping.
- 03.04 Interpret healthcare facility policy and procedures.
- 03.05 Explain the “Patient’s Bill of Rights”.
- 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
- 03.07 Describe advance directives.
- 03.08 Describe informed consent.
- 03.09 Explain the laws governing harassment, labor and employment.
- 03.10 Differentiate between legal and ethical issues in healthcare.
- 03.11 Describe a code of ethics consistent with the healthcare occupation.
- 03.12 Identify and compare personal, professional, and organizational ethics.
- 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
- 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
- 03.15 Recognize and report abuse including domestic violence and neglect.
- 03.16 Distinguish among the five schedules of controlled substances.

04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:

- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
- 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
- 04.03 Identify psychological reactions to illness including defense mechanisms.
- 04.04 Identify complementary and alternative health practices.
- 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
- 04.06 Explain the basic concepts of positive self image, wellness and stress.
- 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
- 04.08 Explain the nutrition pyramid.

- 04.09 Recognize the steps in the grief process.
- 05.0 Recognize and practice safety and security procedures. – The student will be able to:
  - 05.01 Recognize safe and unsafe working conditions and report safety hazards.
  - 05.02 Demonstrate the safe use of medical equipment.
  - 05.03 Explain and apply the theory of root- cause analysis
  - 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
  - 05.05 Identify and practice security procedures for medical supplies and equipment.
  - 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions.
  - 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
  - 05.08 Demonstrate proper body mechanics and ergonomics.
  - 05.09 Demonstrate the procedure for properly identifying patients.
  - 05.10 Demonstrate procedures for the safe transport and transfer of patients.
  - 05.11 Describe fire, safety, disaster and evacuations procedures.
  - 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )
- 06.0 Recognize and respond to emergency situations. – The student will be able to:
  - 06.01 Monitor and record vital signs.
  - 06.02 Describe legal parameters relating to the administration of emergency care.
  - 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
  - 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.
- 07.0 Recognize and practice infection control procedures. – The student will be able to:
  - 07.01 Define principles of infection control including standard and transmission based precautions.
  - 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
  - 07.03 Demonstrate knowledge of surgical asepsis.
  - 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.
- 08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:
  - 08.01 Describe technology applications in healthcare.
  - 08.02 Define terms and demonstrate basic computer skills.
  - 08.03 Recognize technology applications in healthcare.
  - 08.04 Interpret information from electronic medical documents.
  - 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.

09.0 Demonstrate employability skills. – The student will be able to:

- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.
- 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
- 09.03 Identify documents that may be required when applying for a job.
- 09.04 Write an appropriate resume.
- 09.05 Conduct a job search.
- 09.06 Complete a job application form correctly.
- 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
- 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
- 09.09 Identify acceptable work habits.
- 09.10 Recognize appropriate affective/professional behavior.
- 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).

10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:

- 10.01 Recognize emerging diseases and disorders
- 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
- 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
- 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
- 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
- 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.

11.0 Apply basic math and science skills. – The student will be able to:

- 11.01 Draw, read, and report on graphs, charts and tables.
- 11.02 Measure time, temperature, distance, capacity, and mass/weight.
- 11.03 Make, use and convert using both traditional and metric units.
- 11.04 Make estimations and approximations and judge the reasonableness of the result.
- 11.05 Convert from regular to 24 hour time.
- 11.06 Demonstrate ability to evaluate and draw conclusions.
- 11.07 Organize and communicate the results obtained by observation and experimentation.
- 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
- 11.09 Calculate ratios.

**PSAV Course Number: EMS0159**  
**Occupational Completion Point: B**  
**Emergency Medical Technician – 160 Hours – SOC Code 29-2041**

The Student Performance Standards for Emergency Medical Technology-EMT-B were adapted and condensed from the U S Department of Transportation 2009 National Emergency Medical Services Education Standards: Emergency Medical Technician Instructional Guidelines Administrators and instructors should refer and use these materials for additional detail.

- 12.0 Apply fundamental knowledge of the anatomy and physiology of all human body systems to the practice of EMS – The students will be able to:
- 12.01 Label the following topographic terms: Medial, lateral, proximal, distal, superior, inferior, anterior, posterior, midline, right and left, mid-clavicular, bilateral, mid-axillary.
  - 12.02 Describe & identify the anatomy and function of the following major body systems: Respiratory, circulatory, musculoskeletal, nervous, integumentary, digestive, urinary, genital and endocrine.
  - 12.03 Define the medical terminology & medical terms associated with the EMT level.
  - 12.04 Define Pathophysiology.
  - 12.05 Chart the life support chain, aerobic metabolism and anaerobic metabolism.
- 13.0 Apply fundamental knowledge of life span development to patient assessment and management. – The students will be able to:
- 13.01 Understand the terms used to designate the following stages of life: infants, toddlers, preschoolers, school-age children, adolescents (teenagers), early adults, middle adults & late adults.
  - 13.02 Describe the major physiologic & psychosocial characteristics of:
    - 13.02.01 An infant's life
    - 13.02.02 A toddler and preschooler's life
    - 13.02.03 A school age child's life
    - 13.02.04 An adolescent's life
    - 13.02.05 An early adults life
    - 13.02.06 A middle adult's life
    - 13.02.07 A late adult's life
- 14.0 Describe the history and evolution of the EMS system. – The students will be able to:
- 14.01 Define Emergency Medical Services (EMS) systems.
  - 14.02 Discuss the historical background of the development of the EMS system.
  - 14.03 Identify the four levels of national EMS providers (EMR, EMT, AEMT & PM) as well as the three levels in the State of Florida.
  - 14.04 State the specific statutes and regulations regarding the EMS system in Florida.

- 15.0 Discuss and explain the roles, responsibilities & professionalism of EMS Personnel –  
The students will be able to:
- 15.01 Discuss vehicle & equipment readiness
  - 15.02 Characterize the EMS system's role in prevention and public education.
  - 15.03 Discuss the roles and responsibilities of the EMT related to personal safety of the crew, patient and by standers.
  - 15.04 Discuss the roles and responsibilities of the EMT to operate emergency vehicles, provide scene leadership and perform patient assessment and administer emergency care.
  - 15.05 Discuss the maintenance of certification & licensure for the EMT in the State of Florida and NREMT.
  - 15.06 Define quality improvement and discuss the EMT's role in the process.
  - 15.07 Discuss EMS research & evidence based decision making.
- 16.0 Discuss the significance of using the correct safety precautions to ensure the safety of the patient, the EMT and the EMS team. – The students will be able to:
- 16.01 Explain the need to determine scene safety.
  - 16.02 Discuss the importance of body substance isolation (BSI).
  - 16.03 Describe the steps the EMT-Basic should take for personal protection from airborne and bloodborne pathogens as well as communicable disease.
  - 16.04 List the personal protective equipment necessary to protect oneself in common emergency situations.
- 17.0 Discuss stress management techniques useful for both the EMT and the patient. – The students will be able to:
- 17.01 List possible emotional reactions that an individual (EMT and EMT family, Patient and Patient family) may experience when faced with trauma, illness, death and dying.
  - 17.02 State the steps the EMT should take when approaching a family confronted with death and dying.
  - 17.03 Recognize the warning signs of personal stress and discuss the strategies EMTs can apply to manage it.
- 18.0 Discuss the procedures to safely lift and move patients of various age groups and situations (emergency, Urgent and non-urgent moves). – The students will be able to:
- 18.01 Demonstrate good body mechanics while using a stretcher and other patient moving devices.
  - 18.02 Discuss the guidelines and safety precautions that need to be followed when lifting a patient.

- 18.03 Describe the guidelines and safety precautions for carrying patients and/or equipment.
  - 18.04 State the guidelines for reaching and their application.
  - 18.05 State the guidelines for pushing and pulling.
  - 18.06 Discuss patient positioning in common emergency situations.
  - 18.07 Discuss situation that may require the use of medical restraints on the patient & explain guidelines and safety consideration for their use.
- 19.0 Discuss and apply knowledge of disease transmission to the overall safety and wellness of the EMS team(taught to the level described in FS 401.2701) – The students will be able to:
- 19.01 Define “infectious disease” and “communicable disease.”
  - 19.02 Describe the routes of transmission for infectious disease.
  - 19.03 Explain the mode of transmission and the steps to prevent/deal with an exposure of hepatitis, meningitis, tuberculosis & HIV.
  - 19.04 Explain how immunity to infectious diseases is acquired.
  - 19.05 Explain post exposure management of exposure to patient blood or body fluids, including completing a post exposure report.
  - 19.06 Describe the components of physical fitness & mental wellbeing
- 20.0 Describe the principles of medical documentation and report writing. – The students will be able to:
- 20.01 Describe the use of written communication and documentation.
  - 20.02 Explain the legal implication of the patient care report.
  - 20.03 Identify the minimum dataset reference patient information and administrative information on the patient care report.
  - 20.04 Understand how to document refusal of care, including legal implications.
- 21.0 Describe the components of the EMS Communication system. – The students will be able to:
- 21.01 Understand the basic principles of the various types of communications equipment used in EMS
  - 21.02 Describe the use of radio communication and correct radio procedures, including the proper methods of initiating and terminating the radio call/transmission
  - 21.03 State the proper procedures and sequence for delivery of patient information to other healthcare professionals.
  - 21.04 Identify the essential components of the verbal report and legal aspects that need to be considered.
- 22.0 Describe the significance of communication techniques for the EMT. – The students will be able to:

- 22.01 Describe principles of therapeutic and effective communication with patients in a manner that achieves a positive relationship.
  - 22.02 Discuss adjusting communication strategies to effectively communicate to differing age groups, developmental stages, patients with special needs, and differing cultures, including language barriers.
  - 22.03 Discuss the communication techniques that should be used to interact with the patient, patient family, bystanders, and individuals from other agencies including verbal diffusion and interview techniques.
- 23.0 Discuss the medical, legal and ethical issues to the provision of emergency care. – The students will be able to:
- 23.01 Differentiate between expressed, implied and involuntary consent
  - 23.02 Discuss the methods of obtaining consent and procedures for minors.
  - 23.03 Discuss the issues of abandonment, negligence, false imprisonment and battery and their implications to the EMT.
  - 23.04 Discuss the implications for the EMT in patient refusal of care and/or transport.
  - 23.05 Explain the importance, necessity and legality of patient confidentiality.
  - 23.06 Discuss the importance of Do Not Resuscitate [DNR] (advance directives) and local or Florida provisions regarding EMS application.
  - 23.07 Discuss State of Florida & Federal special reporting situations such as abuse, sexual assault, gunshots & knife wounds, communicable disease, etc
  - 23.08 Differentiate between civil tort & criminal actions
  - 23.09 List the elements of negligence and defenses/protections from liability.
  - 23.10 Discuss the role of the EMT at crime scenes and preservation of evidence.
  - 23.11 Define ethics & morality and discuss their implication for the EMT.
- 24.0 Discuss the principles of pharmacology as they are related to emergency care. – The students will be able to:
- 24.01 Explain the “six rights” of medication administration and describe how each one related to EMS.
  - 24.02 Discuss the forms in which the medications may be found and provide examples of each and discuss how the form of a medication dictates its route of administration.
  - 24.03 Describe the difference between a generic medication name and trade name, and provide an example of each.
  - 24.04 Discuss the components and elements of a drug profile including, actions, contraindications, side effects, dose and route.
  - 24.05 Describe the role of medical direction in medication administration and explain the difference between direct orders (online) and standing orders (off-line).
  - 24.06 Give the generic and trade names, actions, indication, contraindications, routes of administration, side effects, interactions & doses of medications that may be

administered by and EMT in an emergency as dictated by the State of Florida & local medical direction.

- 24.07 Demonstrate how to administer medication in the following routes; oral, sublingual and auto-injector.
- 25.0 Discuss and demonstrate scene size up and management in an emergency situation. – The students will be able to:
- 25.01 Recognize and describe hazards/potential hazards at the scene.
  - 25.02 Determine if the scene is safe to enter.
  - 25.03 Discuss common mechanisms of injury/nature of illness.
  - 25.04 Discuss the procedures for multiple-patient situations.
  - 25.05 Explain why it is important for the EMT to determine the need for additional or specialized resources.
  - 25.06 List the minimum standard precautions that should be followed and PPE that should be worn at the emergency scene.
- 26.0 Discuss and demonstrate primary patient assessment procedures for all patient age levels. – The students will be able to:
- 26.01 Summarize the elements of a general impression of the patient.
  - 26.02 Discuss & demonstrate methods of assessing altered mental status using assess for level of consciousness (AVPU).
  - 26.03 Discuss & demonstrate methods of assessing the airway and providing airway care.
  - 26.04 Describe& demonstrate methods used for assessing if a patient is breathing
  - 26.05 Differentiate between a patient with adequate and inadequate breathing.
  - 26.06 Distinguish between methods of assessing breathing.
  - 26.07 Describe& demonstrate the methods used to obtain a pulse.
  - 26.08 Discuss & demonstrate the need for assessing the patient for external bleeding.
  - 26.09 Describe & demonstrate normal and abnormal findings when assessing skin color, temperature, moisture & capillary refill in adult, child & infant.
  - 26.10 Explain the reason for & demonstrate prioritizing a patient for care and transport.
- 27.0 Discuss and demonstrate the procedures for taking the history of a patient. – The students will be able to:
- 27.01 Discuss the process of taking a history, its key components and its relationship to the primary assessment process.
  - 27.02 Explain the importance of obtaining a SAMPLE & OPQRST history.
  - 27.03 Recognize and respond to the feelings patients experience during assessment.
  - 27.04 Describe examples of different techniques the EMT may use to obtain information from patients, family or bystanders during the history taking process.

- 28.0 Discuss and demonstrate secondary patient assessment procedures for all patient age levels. – The students will be able to:
- 28.01 Describe the unique needs & demonstrate assessing an individual with a specific chief complaint with no known prior history.
  - 28.02 Discuss the components of the physical exam and skills involved.
  - 28.03 Differentiate between the history and physical exam that are performed for responsive patients with no known prior history, responsive patients with a known prior history and unresponsive patients.
- 29.0 Describe the significance of monitoring devices in patient assessment. – The students will be able to:
- 29.01 Explain and demonstrate the use and interpretation of pulse oximetry device readings.
  - 29.02 List normal blood pressure ranges for adults, children & infants.
  - 29.03 Demonstrate how to measure a blood pressure by palpation, auscultation and electronic devices while in the field.
- 30.0 Discuss the components and factors of reassessment and its significance in patient assessment. – The students will be able to:
- 30.01 Describe the components of the reassessment and demonstrate the skills involved.
  - 30.02 Discuss the reasons for repeating the initial assessment as part of the reassessment.
  - 30.03 Explain trending assessment components and its value to other health professionals who assume care of the patient.
- 31.0 Demonstrate an understanding and proficiency in Airway Management techniques – The students will be able to:
- 31.01 Name & label the structures of the respiratory system
  - 31.02 State what care should be provided for a patient with or without adequate breathing.
  - 31.03 Describe & demonstrate the steps in performing the head-tilt chin-lift.
  - 31.04 Relate mechanism of injury to opening the airway.
  - 31.05 Describe & demonstrate the steps in performing the jaw thrust.
  - 31.06 Describe& demonstrate the techniques of suctioning and its importance.
- 32.0 Demonstrate an understanding and proficiency in Respiration techniques. – The students will be able to:

- 32.01 Describe the pulmonary ventilation process to include mechanics of ventilation & alveolar ventilation (tidal volumes, dead space, etc)
  - 32.02 Describe the oxygenation process
  - 32.03 Explain both external & internal respiration process
  - 32.04 Discuss the various pathophysiologies of the respiratory system.
  - 32.05 Describe how to assess for adequate and inadequate respiration, including the use of pulse oximetry.
  - 32.06 List the components, purpose, indications, contraindications, complications and procedures for oxygen delivery devices.
  - 32.07 Demonstrate oxygen administration for the pediatric and geriatric patient.
  - 32.08 Describe and demonstrate the steps in performing the skill of assisting ventilations in the conscious patient in respiratory distress using a bag-valve-mask (BVM), and continuous positive airway pressure (CPAP).
- 33.0 Demonstrate an understanding and proficiency in Artificial Ventilation techniques. – The students will be able to:
- 33.01 Demonstrate how to insert both an oropharyngeal (oral) and a nasopharyngeal (nasal) airway.
  - 33.02 Describe & demonstrate how to artificially ventilate a patient with a pocket mask.
  - 33.03 Describe & demonstrate the steps in performing the skill of artificially ventilating a patient with a BVM for one or two rescuers.
  - 33.04 Describe & demonstrate the signs of adequate & inadequate artificial ventilation using the BVM.
  - 33.05 Describe & demonstrate the steps in artificially ventilating a patient with a manually triggered ventilation device.
  - 33.06 Demonstrate how to artificially ventilate the pediatric and geriatric patient.
  - 33.07 Describe & demonstrate how to perform the Sellick maneuver (cricoid pressure).
  - 33.08 Recognize the differences between normal and positive pressure ventilation.
- 34.0 Apply a fundamental knowledge of the causes, pathophysiology and management of shock and the components of resuscitation – The students will be able to:
- 34.01 Discuss withholding resuscitation if irreversible death is obvious or if a “DO Not Resuscitate” (DNR) is present.
  - 34.02 Review the anatomy & physiology of the respiratory & cardiovascular systems
  - 34.03 Discuss, identify pathophysiologies & medical care for respiratory failure as well as respiratory and cardiac arrest.
  - 34.04 Explain the system components of CPR, the four links in the AHA chain of survival & how each one relates to maximizing the survival of the patient.
  - 34.05 Show Provider (AHA guidelines) certification required prior to EMT program competition as per FS 401.27.
  - 34.06 Understand shock, including the pathophysiology, causes, and its signs and symptoms associated with the various types of shock.

- 34.07 Discuss patient assessment and steps to the emergency care of the patient with signs & symptoms of shock.
  - 34.08 Discuss and distinguish the variations & causes between the emergency medical care of the infant, child, adult and geriatric patient experiencing shock.
- 35.0 Apply knowledge to provide care for patients with a neurological emergency. – The students will be able to:
- 35.01 Discuss & review the anatomy, physiology & pathophysiology of the brain & spinal cord
  - 35.02 Discuss & identify the causes of ischemic strokes, hemorrhagic strokes & transient ischemic attacks and their similarities & differences.
  - 35.03 Discuss & demonstrate how to use the stroke assessment tool accepted by the State of Florida to identify a stroke patient rapidly.
  - 35.04 Define and differentiate generalize seizure, partial seizure & status epilepticus and list their possible causes.
  - 35.05 Describe & demonstrate the assessment & medical care of the infant, child, adult and geriatric patient with neurological emergencies.
- 36.0 Apply knowledge to provide care for patients with an Abdominal/Gastrointestinal emergency. – The students will be able to:
- 36.01 Discuss and review the basic anatomy physiology & pathophysiology of the gastrointestinal, genital & urinary systems.
  - 36.02 Define the term, "acute abdomen."
  - 36.03 Identify the signs & symptoms, and common causes of an acute abdomen.
  - 36.04 Describe & demonstrate the assessment & medical care of the infant, child, adult and geriatric patient with gastrointestinal emergencies.
- 37.0 Apply knowledge to provide care for patients with an Immunologic emergency. – The students will be able to:
- 37.01 Understand and define the terms allergic reaction and anaphylaxis
  - 37.02 Describe & demonstrate the emergency medical care of the infant, child, adult and geriatric patient experiencing an allergic reaction.
  - 37.03 State the generic and trade names, medication forms, dose, administration, action, and contraindications for the epinephrine auto-injector.
  - 37.04 Demonstrate the use of epinephrine auto-injector
- 38.0 Apply knowledge to provide care for a patient experiencing an infectious disease. – The students will be able to:
- 38.01 List the causes of infectious diseases

- 38.02 Describe & demonstrate the emergency medical care of the infant, child, adult and geriatric patient experiencing an infectious disease.
- 38.03 Discuss mandatory notification to State or Federal agencies of various diseases.
- 39.0 Apply knowledge to provide care for a patient with an endocrine disorder. – The students will be able to:
  - 39.01 Review the anatomy, physiology & pathophysiology of the endocrine system and its main function in the body.
  - 39.02 Define diabetes (type I & II), Hypoglycemia, Hyperglycemia & diabetic ketoacidosis.
  - 39.03 Identify & demonstrate the steps in the emergency medical care of the patient taking diabetic medicine with an altered mental status and a history of diabetes.
  - 39.04 State the generic and trade names, medication forms, dose, administration, action, and contraindications for oral glucose.
  - 39.05 Demonstrate the steps of using a glucometer device and administering oral glucose.
  - 39.06 Distinguish between the emergency medical care of the infant, child, adult and geriatric patient experiencing a diabetic emergency.
- 40.0 Apply knowledge to provide care for a patient with a psychiatric emergency. – The students will be able to:
  - 40.01 Define behavior, psychiatric disorders & behavioral emergencies.
  - 40.02 Discuss the general factors that may cause an alteration in a patient's behavior.
  - 40.03 Discuss the risk factors/signs or symptoms of various psychiatric emergencies.
  - 40.04 Discuss special medical/legal considerations for managing behavioral emergencies to include Florida statutes:
    - 40.04.01 Baker Act (FS 394.451)
    - 40.04.02 Marchman Act (FS 397.601 & FS 397.675)
    - 40.04.03 Emergency examination & treatment of incapacitated (FS401.445)
  - 40.05 Distinguish between the emergency medical care of the infant, child, adult and geriatric patient experiencing a behavioral or psychiatric emergency.
  - 40.06 Demonstrate various techniques to safely restrain a patient with a behavioral problem.
- 41.0 Apply knowledge to provide care for patients with a cardiovascular emergency. – The students will be able to:
  - 41.01 Review the basic anatomy, physiology and pathophysiology of the cardiovascular system.
  - 41.02 Describe the anatomy, physiology, pathophysiology and demonstrate the assessment & management of :

- 41.02.01 Angina pectoris
  - 41.02.02 Thromboembolism
  - 41.02.03 Myocardial infarction
  - 41.02.04 Hypertensive emergencies
  - 41.02.05 Aortic aneurysm/dissection
  - 41.02.06 Heart Failure
  - 41.03 Demonstrate the ability to assess and treat a patient with signs and symptoms of cardiac issues, including airway, medication administration, position of comfort and life span considerations.
  - 41.04 List the indications & contraindications for automated external defibrillation (AED).
  - 41.05 Explain the impact of age and weight on defibrillation.
  - 41.06 Discuss the position of comfort for patients with various cardiac emergencies.
  - 41.07 Explain the rationale for early defibrillation.
  - 41.08 Explain that not all chest pain patients result in cardiac arrest and do not need to be attached to an automated external defibrillator.
  - 41.09 Discuss the various types of automated external defibrillators.
  - 41.10 Differentiate between the fully automated and the semi-automated defibrillator.
  - 41.11 Understand the importance of maintenance and operators check list for AED's.
  - 41.12 Demonstrate the ability to use an AED according to the latest American Heart Association (AHA) guidelines.
  - 41.13 Explain the role medical direction plays in the use of automated external defibrillation.
- 42.0 Apply knowledge of toxicology to provide care for a patient with a poisoning or overdose emergency. – The students will be able to:
- 42.01 Define toxicology, poisoning & overdose.
  - 42.02 List various ways that poisons enter the body.
  - 42.03 List signs/symptoms associated with poisoning.
  - 42.04 Discuss & demonstrate the emergency medical care for the infant, child, adult and geriatric patient with poisoning or overdose.
  - 42.05 State the generic and trade names, indications, contraindications, medication form, dose, administration, actions, side effects and re-assessment strategies for activated charcoal.
  - 42.06 Perform the necessary steps required to provide a patient with activated charcoal.
- 43.0 Apply knowledge to provide care for a patient with a respiratory emergency. – The students will be able to:
- 43.01 List the structure, function and pathophysiology of the respiratory system.
  - 43.02 List signs of adequate air exchange.
  - 43.03 State the signs and symptoms of a patient with respiratory distress.

- 43.04 Describe & demonstrate the assessment & medical care of the infant, child, adult and geriatric patient with a respiratory emergency.
  - 43.05 State the generic name, medication forms, dose, administration, action, indications and contraindications for the metered-dose inhaler.
  - 43.06 Demonstrate the steps in facilitating the use of an inhaler.
  - 43.07 Differentiate between upper airway obstruction and lower airway disease in the pediatric and geriatric patient.
- 44.0 Apply knowledge of Hematology to provide care for patients with a clotting disorder or are experiencing a sickle cell disease crisis. – The students will be able to:
- 44.01 List the composition, physiology & pathophysiology of blood.
  - 44.02 State the signs and symptoms of a patient with a Sickle Cell crisis or a clotting disorder.
  - 44.03 Describe & demonstrate the emergency medical care of the patient with Sickle cell distress or clotting disorder.
- 45.0 Apply knowledge to provide care for a patient with a genitourinary/renal emergency. – The students will be able to:
- 45.01 List the anatomy, physiology & pathophysiology of the renal system.
  - 45.02 Understand the principles of kidney dialysis.
  - 45.03 State the signs and symptoms of a patient with a dialysis emergency.
  - 45.04 Describe & demonstrate the emergency medical care of the patient with a dialysis emergency.
- 46.0 Apply knowledge to provide care for a patient with a gynecologic emergency. – The students will be able to:
- 46.01 Describe the basic anatomy, physiology and pathophysiology of the female reproductive system.
  - 46.02 Distinguish between the emergency medical care of the infant, child, adult and geriatric patient experiencing a female reproductive system emergency.
  - 46.03 Explain the general management of a gynecologic emergency in relation to patient privacy and communication.
  - 46.04 Discuss the special consideration and precautions an EMT must observe when arriving at the scene of a suspected case of sexual assault or rape.
- 47.0 Apply knowledge to provide care for a patient with a Non-Traumatic Musculoskeletal emergency. – The students will be able to:
- 47.01 Describe the basic anatomy, physiology and pathophysiology of the skeletal system (i.e. cancer or osteoporosis).

- 47.02 Describe & demonstrate the emergency medical care of the patient with a non-traumatic musculoskeletal emergency.
- 48.0 Describe an overview of the identification, categorization, pathophysiology and assessment of a trauma patient. – The students will be able to:
- 48.01 Discuss and define pathophysiology of the trauma patient
  - 48.02 Discuss and demonstrate assessment and management of the trauma patient.
  - 48.03 Discuss and describe significant & non-significant Mechanism of Injury (MOI) & provide examples of each.
  - 48.04 Discuss and describe State of Florida's trauma scorecard methodologies as required in FS 401.2701 & 64J-2.004 & 2.005.
  - 48.05 Discuss the National Trauma Triage Protocol of injured Patients (<http://cdc.gov/fieldtriage/> )
- 49.0 Demonstrate an understanding and the skills required for the management of a patient with traumatic bleeding. – The students will be able to:
- 49.01 Review the anatomy & physiology of the circulatory system
  - 49.02 Differentiate between:
    - 49.02.01 Internal and external bleeding.
    - 49.02.02 Arterial, venous and capillary bleeding.
  - 49.03 Explain and demonstrate emergency medical care of the patient with external & internal bleeding.
  - 49.04 List signs and symptoms of shock (hypo-perfusion).
- 50.0 Demonstrate an understanding and the skills required for the management of a patient with a chest trauma. – The students will be able to:
- 50.01 Discuss MOI for chest injury (blunt & penetrating, energy & injury).
  - 50.02 List the anatomy, physiology & pathophysiology of the thoracic/chest cavity & respiratory system.
  - 50.03 Differentiate between a pneumothorax (open, simple & tension) & hemothorax.
  - 50.04 Describe and demonstrate the assessment & management of a patient with a suspected chest (open and closed) injury.
- 51.0 Demonstrate an understanding and the skills required for the management of a patient with an abdominal/genitourinary trauma. – The students will be able to:
- 51.01 Discuss MOI for abdominal injury (blunt & penetrating, energy & injury).
  - 51.02 List the anatomy, physiology & pathophysiology of the abdominal cavity & genitourinary (both male & female) system.
  - 51.03 Describe the abdominal quadrants
  - 51.04 Describe the differences between hollow & solid organs.

- 51.05 Describe and demonstrate the assessment & management of a patient with a suspected abdominal (penetrating or blunt) or genitourinary injury.
- 51.06 Explain special consideration related to a patient who has experienced an injury by sexual assault/abuse.
  
- 52.0 Demonstrate an understanding and the skills required for the management of a patient with an orthopedic trauma. – The students will be able to:
  - 52.01 Discuss MOI for orthopedic injury (blunt & penetrating, energy & injury).
  - 52.02 Review the anatomy, physiology & pathophysiology of the musculoskeletal system.
  - 52.03 Describe the different types of musculoskeletal injuries including fractures, amputations, sprains, & strains.
  - 52.04 Differentiate between an open and a closed painful, swollen, deformed extremity.
  - 52.05 Describe and demonstrate the assessment & management of a patient with a suspected orthopedic injury.
  
- 53.0 Demonstrate an understanding and the skills required for the management of a patient with a soft tissue trauma. – The students will be able to:
  - 53.01 Discuss & list the anatomy and physiology, to include the layers, of the skin.
  - 53.02 Discuss and list the types of open & closed soft tissue injury.
  - 53.03 Define and list characteristics of superficial, partial-thickness and full-thickness burns.
  - 53.04 Explain how the seriousness of a burn is related to its depth and extent (percent of body surface area (BSA) involved or rule of 9s) for adult & pediatric patient.
  - 53.05 Describe and demonstrate the assessment & management of a patient with a soft tissue injury.
  
- 54.0 Demonstrate an understanding and the skills required for the management of a patient with a head, facial, or neck (non-spinal) trauma. – The students will be able to:
  - 54.01 List the anatomy, physiology & pathophysiology of the head, face, & neck.
  - 54.02 Discuss MOI for head, face, & neck (non-spinal) (blunt & penetrating, energy & injury).
  - 54.03 Describe and demonstrate the assessment & management of a patient with an injury to the head, face & neck (non-spinal).
  
- 55.0 Demonstrate an understanding and the skills required for the management of a patient with a nervous system trauma. – The students will be able to:
  - 55.01 Review the anatomy, physiology & pathophysiology of the nervous system.
  - 55.02 Explain functions of the somatic & autonomic nervous system
  - 55.03 Discuss MOI for head (brain) & spinal (blunt & penetrating, energy & injury).

- 55.04 Discuss the different types of brain injuries and their corresponding signs and symptoms, including increased intracranial pressure (ICP), concussion, contusion & injuries caused by medical conditions.
- 55.05 Describe and demonstrate the assessment & management of a patient with a head (brain) and spinal injury.
  
- 56.0 Demonstrate an understanding of the special considerations for the management of a patient experiencing a trauma during pregnancy. – The students will be able to:
  - 56.01 Discuss Anatomy, physiology & pathophysiology of the pregnant trauma patient.
  - 56.02 Discuss MOI and fetal considerations for the pregnant trauma patient.
  - 56.03 Discuss & demonstrate unique injuries and conditions along with assessment & management for the pregnant patient involved in trauma.
  
- 57.0 Demonstrate an understanding of the special considerations for the management of the pediatric patient experiencing a trauma. – The students will be able to:
  - 57.01 Discuss Anatomy, physiology & pathophysiology of the pediatric trauma patient.
  - 57.02 Discuss & demonstrate unique assessment & management considerations for the pediatric trauma patient.
  
- 58.0 Demonstrate an understanding of the special considerations for the management of the geriatric patient experiencing a trauma. – The students will be able to:
  - 58.01 Discuss Anatomy, physiology & pathophysiology of the elderly trauma patient.
  - 58.02 Discuss & demonstrate unique assessment & management considerations for the elderly trauma patient.
  
- 59.0 Demonstrate an understanding of the special considerations for the management of the cognitively impaired patient experiencing a trauma. – The students will be able to:
  - 59.01 Discuss anatomy, physiology & pathophysiology of the cognitively impaired trauma patient.
  - 59.02 Discuss & demonstrate unique assessment & management considerations for the cognitively impaired trauma patient.
  
- 60.0 Discuss and demonstrate how to assess and manage environmental trauma emergencies. – The students will be able to:
  - 60.01 Define drowning and discuss its incidence, risk factors & prevention.
  - 60.02 List pathophysiologies of water related incidents
  - 60.03 Describe submersion in salt and fresh water
  - 60.04 Discuss & demonstrate assessment & management considerations for a patient of a submersion incident.

- 60.05 Describe the different types of diving emergencies and how they may occur.
  - 60.06 List pathophysiologies of dysbarism incidents to include high altitudes and diving incidents.
  - 60.07 Discuss & demonstrate assessment & management considerations for a patient of a dysbarism incident.
  - 60.08 Discuss & demonstrate assessment & management considerations for a patient of a lightning incident
  - 60.09 Explain the five ways a body can lose heat
  - 60.10 List pathophysiologies of temperature related incidents to include both cold and heat related illness.
  - 60.11 Discuss & demonstrate assessment & management considerations for a patient of a temperature related illness
  - 60.12 Identify the species of insects, spiders & snakes in the US that may cause life threatening injuries.
  - 60.13 Discuss & demonstrate assessment & management considerations for a patient of a bite or envenomation incident.
- 61.0 Define and articulate the kinematics of trauma. – The students will be able to:
- 61.01 Explain the relationship between mechanism of injury and potential energy, kinetic energy and work.
  - 61.02 Define term blunt & penetrating trauma and provide examples of the mechanism of injury (MOI) that would cause each to occur and include:
    - 61.02.01 Affects of high, medium & low velocity penetrating trauma
    - 61.02.02 Primary, secondary, tertiary and miscellaneous blast injuries
    - 61.02.03 Factors to consider of a patient injured in a fall
    - 61.02.04 Consider age (pediatric & geriatrics)
- 62.0 Describe the components and procedures of a multi-system trauma. – The students will be able to:
- 62.01 Describe and provide a general overview of multisystem trauma patient management.
  - 62.02 Discuss the golden principle of out-of-hospital trauma care
  - 62.03 Discuss & demonstrate assessment & management considerations for a patient of multi system injuries.
- 63.0 Apply knowledge of growth development, aging and assessment to the obstetric and neonatal populations. – The students will be able to:
- 63.01 Review the anatomy, physiology & pathophysiology of the female reproductive system.
  - 63.02 Explain the normal changes that occur during pregnancy.
  - 63.03 Differentiate between the stages of labor and delivery.

- 63.04 Discuss & demonstrate assessment & management considerations of a pregnancy
- 63.05 Discuss assessment & management considerations of complications of pregnancy.
- 63.06 Discuss & demonstrate assessment & management considerations of a neonate.
  
- 64.0 Apply knowledge of growth development, aging and assessment to the pediatric population. – The students will be able to:
  - 64.01 List the anatomy, physiology & pathophysiology of the pediatric patient.
  - 64.02 Describe the differences in anatomy when compared to the adult patient to
  - 64.03 Discuss & demonstrate assessment & management considerations of a pediatric emergency.
  - 64.04 The most common causes of the following conditions in the pediatric patient.
    - 64.04.01 Shock
    - 64.04.02 Altered mental status and seizures
    - 64.04.03 Gastrointestinal emergencies
    - 64.04.04 Poisonings
    - 64.04.05 Drowning
    - 64.04.06 Trauma
  - 64.05 Discuss & demonstrate assessment & management considerations for Sudden Infant Death Syndrome (SIDS).
  
- 65.0 Apply knowledge of growth development, aging and assessment to the geriatric population. – The students will be able to:
  - 65.01 Define and discuss the term “geriatrics.”
  - 65.02 List the anatomy, physiology & pathophysiology of the Geriatric patient.
  - 65.03 Discuss & demonstrate assessment & management considerations of a geriatric emergency.
  
- 66.0 Apply knowledge of growth development, aging and assessment to patients with special challenges. – The students will be able to:
  - 66.01 Define and discuss child and elder abuse and neglect and possible indicators of each.
  - 66.02 Discuss assessment & management considerations of a patient with special needs to include child and elder abuse and neglect, homelessness/poverty, etc.
  
- 67.0 Discuss and demonstrate the principles of safely operating a ground ambulance. – The students will be able to:
  - 67.01 Discuss the importance of performing regular vehicle & equipment inspection.

- 67.02 Describe the general provisions of Florida laws relating to the operation of the ambulance and privileges.
  - 67.03 Discuss "Due Regard for Safety of All Others" while operating an emergency vehicle.
  - 67.04 Provide examples of some high risk situations and hazards that may affect the safety of the ambulance and its passengers during both pre-transport & transport.
- 68.0 Discuss an overview of EMS operations during a multiples casualty incident. – The students will be able to:
- 68.01 Describe the specific condition that would define a mass-casualty incident (MCI) and give examples.
  - 68.02 Describe primary and secondary triage, how the four triage categories are assigned and how destination decisions are made.
  - 68.03 Describe how the techniques of triage are performed.
  - 68.04 Demonstrate how to perform a triage based scenario that involves an MCI.
- 69.0 Demonstrate knowledge and procedures involved in safely operating in and around an air medical operations landing zone. – The students will be able to:
- 69.01 Discuss safe air medical operations
  - 69.02 Describe key scene safety considerations when preparing for a helicopter medivac, including establishing a landing zone and approaching the aircraft.
  - 69.03 Discuss the criteria for utilizing an air medial response
- 70.0 Discuss correct procedures of extrication to ensure EMS personnel and patient safety during extrication operations. – The students will be able to:
- 70.01 Describe the role of the EMT in patient rescue & vehicle extrication
  - 70.02 Describe personal and patient safety during vehicle extrication.
  - 70.03 Discuss the factors related to ensuring situational safety at the site of a vehicle extrication
  - 70.04 Explain the difference between simple access and complex access in vehicle extrication
  - 70.05 Discuss patient care consideration related to assisting with rapid extrication, providing emergency care to the trapped patient and removing and transferring a patient.
- 71.0 Discuss the risks and responsibilities of operating during a terrorism event or during a natural or man-made disaster. – The students will be able to:
- 71.01 Describe the role of the EMT on the scene of a natural or man-made disaster

- 71.02 Define the term international terrorism & domestic terrorism and provide examples of incidents of each.
- 71.03 Describe personal & patient safety during a natural or man-made disaster.
- 71.04 Describe the factors related to ensuring situational safety at the site of a disaster and the procedures required.

2011 - 2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Emergency Medical Technician (Basic) -ATD  
**ATD CIP Number:** 0317020503  
**SOC Code(s):** 31-9099, 29-2041

When this program is offered by a community or state college, the following standards, and benchmarks apply.

**Health Careers Core: The Health Careers Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Careers Core or any other health occupations program do not have to repeat intended outcomes 01-11.**

01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:

- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
- 01.02 Identify common methods of payment for healthcare services.
- 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
- 01.04 Describe the composition and functions of a healthcare team.
- 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
- 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
- 01.07 Identify characteristics of effective teams.
- 01.08 Recognize methods for building positive team relationships.
- 01.09 Analyze attributes and attitudes of an effective leader.
- 01.10 Recognize factors and situations that may lead to conflict.
- 01.11 Demonstrate effective techniques for managing team conflict.
- 01.12 Describe factors that influence the current delivery system of healthcare.
- 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.

02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:

- 02.01 Develop basic speaking and active listening skills.
- 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
- 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
- 02.04 Respond to verbal and non-verbal cues.
- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.
- 02.06 Use appropriate medical terminology and abbreviations.

- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
  - 02.08 Recognize the importance of patient/client educations regarding healthcare.
  - 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
  - 02.10 Analyze elements of communication using a sender-receiver model.
  - 02.11 Distinguish between and report subjective and objective information.
  - 02.12 Report relevant information in order of occurrence.
- 03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:
- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
  - 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
  - 03.03 Demonstrate procedures for accurate documentation and record keeping.
  - 03.04 Interpret healthcare facility policy and procedures.
  - 03.05 Explain the “Patient’s Bill of Rights”.
  - 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
  - 03.07 Describe advance directives.
  - 03.08 Describe informed consent.
  - 03.09 Explain the laws governing harassment, labor and employment.
  - 03.10 Differentiate between legal and ethical issues in healthcare.
  - 03.11 Describe a code of ethics consistent with the healthcare occupation.
  - 03.12 Identify and compare personal, professional, and organizational ethics.
  - 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
  - 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
  - 03.15 Recognize and report abuse including domestic violence and neglect.
  - 03.16 Distinguish among the five schedules of controlled substances.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:
- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
  - 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
  - 04.03 Identify psychological reactions to illness including defense mechanisms.
  - 04.04 Identify complementary and alternative health practices.
  - 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
  - 04.06 Explain the basic concepts of positive self image, wellness and stress.
  - 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
  - 04.08 Explain the nutrition pyramid.
  - 04.09 Recognize the steps in the grief process.
- 05.0 Recognize and practice safety and security procedures. – The student will be able to:

- 05.01 Recognize safe and unsafe working conditions and report safety hazards.
  - 05.02 Demonstrate the safe use of medical equipment.
  - 05.03 Explain and apply the theory of root- cause analysis
  - 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
  - 05.05 Identify and practice security procedures for medical supplies and equipment.
  - 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions.
  - 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
  - 05.08 Demonstrate proper body mechanics and ergonomics.
  - 05.09 Demonstrate the procedure for properly identifying patients.
  - 05.10 Demonstrate procedures for the safe transport and transfer of patients.
  - 05.11 Describe fire, safety, disaster and evacuations procedures.
  - 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )
- 06.0 Recognize and respond to emergency situations. – The student will be able to:
- 06.01 Monitor and record vital signs.
  - 06.02 Describe legal parameters relating to the administration of emergency care.
  - 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
  - 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.
- 07.0 Recognize and practice infection control procedures. – The student will be able to:
- 07.01 Define principles of infection control including standard and transmission based precautions.
  - 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
  - 07.03 Demonstrate knowledge of surgical asepsis.
  - 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.
- 08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:
- 08.01 Describe technology applications in healthcare.
  - 08.02 Define terms and demonstrate basic computer skills.
  - 08.03 Recognize technology applications in healthcare.
  - 08.04 Interpret information from electronic medical documents.
  - 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.
- 09.0 Demonstrate employability skills. – The student will be able to:
- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.

- 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
  - 09.03 Identify documents that may be required when applying for a job.
  - 09.04 Write an appropriate resume.
  - 09.05 Conduct a job search.
  - 09.06 Complete a job application form correctly.
  - 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
  - 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
  - 09.09 Identify acceptable work habits.
  - 09.10 Recognize appropriate affective/professional behavior.
  - 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:
- 10.01 Recognize emerging diseases and disorders
  - 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
  - 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
  - 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
  - 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
  - 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.
- 11.0 Apply basic math and science skills. – The student will be able to:
- 11.01 Draw, read, and report on graphs, charts and tables.
  - 11.02 Measure time, temperature, distance, capacity, and mass/weight.
  - 11.03 Make, use and convert using both traditional and metric units.
  - 11.04 Make estimations and approximations and judge the reasonableness of the result.
  - 11.05 Convert from regular to 24 hour time.
  - 11.06 Demonstrate ability to evaluate and draw conclusions.
  - 11.07 Organize and communicate the results obtained by observation and experimentation.
  - 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
  - 11.09 Calculate ratios

**Emergency Medical Technician (Basic): Intended outcomes 12-71 complete the occupational exit of EMT-B. The outcomes may be taught as one or more modules at the postsecondary level. OCP-B SOC Code 29-2041 Emergency Medical Technicians and Paramedics**

The Student Performance Standards for Emergency Medical Technology-EMT-B were adapted and condensed from the U S Department of Transportation 2009 National Emergency Medical Services Education Standards: Emergency Medical Technician Instructional Guidelines Administrators and instructors should refer and use these materials for additional detail.

- 12.0 Apply fundamental knowledge of the anatomy and physiology of all human body systems to the practice of EMS – The students will be able to:
- 12.01 Label the following topographic terms: Medial, lateral, proximal, distal, superior, inferior, anterior, posterior, midline, right and left, mid-clavicular, bilateral, mid-axillary.
  - 12.02 Describe & identify the anatomy and function of the following major body systems: Respiratory, circulatory, musculoskeletal, nervous, integumentary, digestive, urinary, genital and endocrine.
  - 12.03 Define the medical terminology & medical terms associated with the EMT level.
  - 12.04 Define Pathophysiology.
  - 12.05 Chart the life support chain, aerobic metabolism and anaerobic metabolism.
- 13.0 Apply fundamental knowledge of life span development to patient assessment and management. – The students will be able to:
- 13.01 Understand the terms used to designate the following stages of life: infants, toddlers, preschoolers, school-age children, adolescents (teenagers), early adults, middle adults & late adults.
  - 13.02 Describe the major physiologic & psychosocial characteristics of:
    - 13.02.01 An infant's life
    - 13.02.02 A toddler and preschooler's life
    - 13.02.03 A school age child's life
    - 13.02.04 An adolescent's life
    - 13.02.05 An early adults life
    - 13.02.06 A middle adult's life
    - 13.02.07 A late adult's life
- 14.0 Describe the history and evolution of the EMS system. – The students will be able to:
- 14.01 Define Emergency Medical Services (EMS) systems.
  - 14.02 Discuss the historical background of the development of the EMS system.

- 14.03 Identify the four levels of national EMS providers (EMR, EMT, AEMT & PM) as well as the three levels in the State of Florida.
- 14.04 State the specific statutes and regulations regarding the EMS system in Florida.
- 15.0 Discuss and explain the roles, responsibilities & professionalism of EMS Personnel – The students will be able to:
  - 15.01 Discuss vehicle & equipment readiness
  - 15.02 Characterize the EMS system's role in prevention and public education.
  - 15.03 Discuss the roles and responsibilities of the EMT related to personal safety of the crew, patient and bystanders.
  - 15.04 Discuss the roles and responsibilities of the EMT to operate emergency vehicles, provide scene leadership and perform patient assessment and administer emergency care.
  - 15.05 Discuss the maintenance of certification & licensure for the EMT in the State of Florida and NREMT.
  - 15.06 Define quality improvement and discuss the EMT's role in the process.
  - 15.07 Discuss EMS research & evidence based decision making.
- 16.0 Discuss the significance of using the correct safety precautions to ensure the safety of the patient, the EMT and the EMS team. – The students will be able to:
  - 16.01 Explain the need to determine scene safety.
  - 16.02 Discuss the importance of body substance isolation (BSI).
  - 16.03 Describe the steps the EMT-Basic should take for personal protection from airborne and bloodborne pathogens as well as communicable disease.
  - 16.04 List the personal protective equipment necessary to protect oneself in common emergency situations.
- 17.0 Discuss stress management techniques useful for both the EMT and the patient. – The students will be able to:
  - 17.01 List possible emotional reactions that an individual (EMT and EMT family, Patient and Patient family) may experience when faced with trauma, illness, death and dying.
  - 17.02 State the steps the EMT should take when approaching a family confronted with death and dying.
  - 17.03 Recognize the warning signs of personal stress and discuss the strategies EMTs can apply to manage it.
- 18.0 Discuss the procedures to safely lift and move patients of various age groups and situations (emergency, Urgent and non-urgent moves). – The students will be able to:

- 18.01 Demonstrate good body mechanics while using a stretcher and other patient moving devices.
  - 18.02 Discuss the guidelines and safety precautions that need to be followed when lifting a patient.
  - 18.03 Describe the guidelines and safety precautions for carrying patients and/or equipment.
  - 18.04 State the guidelines for reaching and their application.
  - 18.05 State the guidelines for pushing and pulling.
  - 18.06 Discuss patient positioning in common emergency situations.
  - 18.07 Discuss situation that may require the use of medical restraints on the patient & explain guidelines and safety consideration for their use.
- 19.0 Discuss and apply knowledge of disease transmission to the overall safety and wellness of the EMS team(taught to the level described in FS 401.2701) – The students will be able to:
- 19.01 Define “infectious disease” and “communicable disease.”
  - 19.02 Describe the routes of transmission for infectious disease.
  - 19.03 Explain the mode of transmission and the steps to prevent/deal with an exposure of hepatitis, meningitis, tuberculosis & HIV.
  - 19.04 Explain how immunity to infectious diseases is acquired.
  - 19.05 Explain post exposure management of exposure to patient blood or body fluids, including completing a post exposure report.
  - 19.06 Describe the components of physical fitness & mental wellbeing
- 20.0 Describe the principles of medical documentation and report writing. – The students will be able to:
- 20.01 Describe the use of written communication and documentation.
  - 20.02 Explain the legal implication of the patient care report.
  - 20.03 Identify the minimum dataset reference patient information and administrative information on the patient care report.
  - 20.04 Understand how to document refusal of care, including legal implications.
- 21.0 Describe the components of the EMS Communication system. – The students will be able to:
- 21.01 Understand the basic principles of the various types of communications equipment used in EMS
  - 21.02 Describe the use of radio communication and correct radio procedures, including the proper methods of initiating and terminating the radio call/transmission
  - 21.03 State the proper procedures and sequence for delivery of patient information to other healthcare professionals.

- 21.04 Identify the essential components of the verbal report and legal aspects that need to be considered.
- 22.0 Describe the significance of communication techniques for the EMT. – The students will be able to:
- 22.01 Describe principles of therapeutic and effective communication with patients in a manner that achieves a positive relationship.
  - 22.02 Discuss adjusting communication strategies to effectively communicate to differing age groups, developmental stages, patients with special needs, and differing cultures, including language barriers.
  - 22.03 Discuss the communication techniques that should be used to interact with the patient, patient family, bystanders, and individuals from other agencies including verbal diffusion and interview techniques.
- 23.0 Discuss the medical, legal and ethical issues to the provision of emergency care. – The students will be able to:
- 23.01 Differentiate between expressed, implied and involuntary consent
  - 23.02 Discuss the methods of obtaining consent and procedures for minors.
  - 23.03 Discuss the issues of abandonment, negligence, false imprisonment and battery and their implications to the EMT.
  - 23.04 Discuss the implications for the EMT in patient refusal of care and/or transport.
  - 23.05 Explain the importance, necessity and legality of patient confidentiality.
  - 23.06 Discuss the importance of Do Not Resuscitate [DNR] (advance directives) and local or Florida provisions regarding EMS application.
  - 23.07 Discuss State of Florida & Federal special reporting situations such as abuse, sexual assault, gunshots & knife wounds, communicable disease, etc
  - 23.08 Differentiate between civil tort & criminal actions
  - 23.09 List the elements of negligence and defenses/protections from liability.
  - 23.10 Discuss the role of the EMT at crime scenes and preservation of evidence.
  - 23.11 Define ethics & morality and discuss their implication for the EMT.
- 24.0 Discuss the principles of pharmacology as they are related to emergency care. – The students will be able to:
- 24.01 Explain the “six rights” of medication administration and describe how each one related to EMS.
  - 24.02 Discuss the forms in which the medications may be found and provide examples of each and discuss how the form of a medication dictates its route of administration.
  - 24.03 Describe the difference between a generic medication name and trade name, and provide an example of each.

- 24.04 Discuss the components and elements of a drug profile including, actions, contraindications, side effects, dose and route.
  - 24.05 Describe the role of medical direction in medication administration and explain the difference between direct orders (online) and standing orders (off-line).
  - 24.06 Give the generic and trade names, actions, indication, contraindications, routes of administration, side effects, interactions & doses of medications that may be administered by and EMT in an emergency as dictated by the State of Florida & local medical direction.
  - 24.07 Demonstrate how to administer medication in the following routes; oral, sublingual and auto-injector.
- 25.0 Discuss and demonstrate scene size up and management in an emergency situation. – The students will be able to:
- 25.01 Recognize and describe hazards/potential hazards at the scene.
  - 25.02 Determine if the scene is safe to enter.
  - 25.03 Discuss common mechanisms of injury/nature of illness.
  - 25.04 Discuss the procedures for multiple-patient situations.
  - 25.05 Explain why it is important for the EMT to determine the need for additional or specialized resources.
  - 25.06 List the minimum standard precautions that should be followed and PPE that should be worn at the emergency scene.
- 26.0 Discuss and demonstrate primary patient assessment procedures for all patient age levels. – The students will be able to:
- 26.01 Summarize the elements of a general impression of the patient.
  - 26.02 Discuss & demonstrate methods of assessing altered mental status using assess for level of consciousness (AVPU).
  - 26.03 Discuss & demonstrate methods of assessing the airway and providing airway care.
  - 26.04 Describe& demonstrate methods used for assessing if a patient is breathing
  - 26.05 Differentiate between a patient with adequate and inadequate breathing.
  - 26.06 Distinguish between methods of assessing breathing.
  - 26.07 Describe& demonstrate the methods used to obtain a pulse.
  - 26.08 Discuss & demonstrate the need for assessing the patient for external bleeding.
  - 26.09 Describe & demonstrate normal and abnormal findings when assessing skin color, temperature, moisture & capillary refill in adult, child & infant.
  - 26.10 Explain the reason for & demonstrate prioritizing a patient for care and transport.
- 27.0 Discuss and demonstrate the procedures for taking the history of a patient. – The students will be able to:

- 27.01 Discuss the process of taking a history, its key components and its relationship to the primary assessment process.
  - 27.02 Explain the importance of obtaining a SAMPLE & OPQRST history.
  - 27.03 Recognize and respond to the feelings patients experience during assessment.
  - 27.04 Describe examples of different techniques the EMT may use to obtain information from patients, family or bystanders during the history taking process.
- 28.0 Discuss and demonstrate secondary patient assessment procedures for all patient age levels. – The students will be able to:
- 28.01 Describe the unique needs & demonstrate assessing an individual with a specific chief complaint with no known prior history.
  - 28.02 Discuss the components of the physical exam and skills involved.
  - 28.03 Differentiate between the history and physical exam that are performed for responsive patients with no known prior history, responsive patients with a known prior history and unresponsive patients.
- 29.0 Describe the significance of monitoring devices in patient assessment. – The students will be able to:
- 29.01 Explain and demonstrate the use and interpretation of pulse oximetry device readings.
  - 29.02 List normal blood pressure ranges for adults, children & infants.
  - 29.03 Demonstrate how to measure a blood pressure by palpation, auscultation and electronic devices while in the field.
- 30.0 Discuss the components and factors of reassessment and its significance in patient assessment. – The students will be able to:
- 30.01 Describe the components of the reassessment and demonstrate the skills involved.
  - 30.02 Discuss the reasons for repeating the initial assessment as part of the reassessment.
  - 30.03 Explain trending assessment components and its value to other health professionals who assume care of the patient.
- 31.0 Demonstrate an understanding and proficiency in Airway Management techniques – The students will be able to:
- 31.01 Name & label the structures of the respiratory system
  - 31.02 State what care should be provided for a patient with or without adequate breathing.
  - 31.03 Describe & demonstrate the steps in performing the head-tilt chin-lift.
  - 31.04 Relate mechanism of injury to opening the airway.

- 31.05 Describe & demonstrate the steps in performing the jaw thrust.
- 31.06 Describe & demonstrate the techniques of suctioning and its importance.
- 32.0 Demonstrate an understanding and proficiency in Respiration techniques. – The students will be able to:
  - 32.01 Describe the pulmonary ventilation process to include mechanics of ventilation & alveolar ventilation (tidal volumes, dead space, etc)
  - 32.02 Describe the oxygenation process
  - 32.03 Explain both external & internal respiration process
  - 32.04 Discuss the various pathophysiologies of the respiratory system.
  - 32.05 Describe how to assess for adequate and inadequate respiration, including the use of pulse oximetry.
  - 32.06 List the components, purpose, indications, contraindications, complications and procedures for oxygen delivery devices.
  - 32.07 Demonstrate oxygen administration for the pediatric and geriatric patient.
  - 32.08 Describe and demonstrate the steps in performing the skill of assisting ventilations in the conscious patient in respiratory distress using a bag-valve-mask (BVM), and continuous positive airway pressure (CPAP).
- 33.0 Demonstrate an understanding and proficiency in Artificial Ventilation techniques. – The students will be able to:
  - 33.01 Demonstrate how to insert both an oropharyngeal (oral) and a nasopharyngeal (nasal) airway.
  - 33.02 Describe & demonstrate how to artificially ventilate a patient with a pocket mask.
  - 33.03 Describe & demonstrate the steps in performing the skill of artificially ventilating a patient with a BVM for one or two rescuers.
  - 33.04 Describe & demonstrate the signs of adequate & inadequate artificial ventilation using the BVM.
  - 33.05 Describe & demonstrate the steps in artificially ventilating a patient with a manually triggered ventilation device.
  - 33.06 Demonstrate how to artificially ventilate the pediatric and geriatric patient.
  - 33.07 Describe & demonstrate how to perform the Sellick maneuver (cricoid pressure).
  - 33.08 Recognize the differences between normal and positive pressure ventilation.
- 34.0 Apply a fundamental knowledge of the causes, pathophysiology and management of shock and the components of resuscitation – The students will be able to:
  - 34.01 Discuss withholding resuscitation if irreversible death is obvious or if a “DO Not Resuscitate” (DNR) is present.
  - 34.02 Review the anatomy & physiology of the respiratory & cardiovascular systems
  - 34.03 Discuss, identify pathophysiologies & medical care for respiratory failure as well as respiratory and cardiac arrest.

- 34.04 Explain the system components of CPR, the four links in the AHA chain of survival & how each one relates to maximizing the survival of the patient.
  - 34.05 Show Provider (AHA guidelines) certification required prior to EMT program competition as per FS 401.27.
  - 34.06 Understand shock, including the pathophysiology, causes, and its signs and symptoms associated with the various types of shock.
  - 34.07 Discuss patient assessment and steps to the emergency care of the patient with signs & symptoms of shock.
  - 34.08 Discuss and distinguish the variations & causes between the emergency medical care of the infant, child, adult and geriatric patient experiencing shock.
- 35.0 Apply knowledge to provide care for patients with a neurological emergency. – The students will be able to:
- 35.01 Discuss & review the anatomy, physiology & pathophysiology of the brain & spinal cord
  - 35.02 Discuss & identify the causes of ischemic strokes, hemorrhagic strokes & transient ischemic attacks and their similarities & differences.
  - 35.03 Discuss & demonstrate how to use the stroke assessment tool accepted by the State of Florida to identify a stroke patient rapidly.
  - 35.04 Define and differentiate generalize seizure, partial seizure & status epilepticus and list their possible causes.
  - 35.05 Describe & demonstrate the assessment & medical care of the infant, child, adult and geriatric patient with neurological emergencies.
- 36.0 Apply knowledge to provide care for patients with an Abdominal/Gastrointestinal emergency. – The students will be able to:
- 36.01 Discuss and review the basic anatomy physiology & pathophysiology of the gastrointestinal, genital & urinary systems.
  - 36.02 Define the term, "acute abdomen."
  - 36.03 Identify the signs & symptoms, and common causes of an acute abdomen.
  - 36.04 Describe & demonstrate the assessment & medical care of the infant, child, adult and geriatric patient with gastrointestinal emergencies.
- 37.0 Apply knowledge to provide care for patients with an Immunologic emergency. – The students will be able to:
- 37.01 Understand and define the terms allergic reaction and anaphylaxis
  - 37.02 Describe & demonstrate the emergency medical care of the infant, child, adult and geriatric patient experiencing an allergic reaction.
  - 37.03 State the generic and trade names, medication forms, dose, administration, action, and contraindications for the epinephrine auto-injector.
  - 37.04 Demonstrate the use of epinephrine auto-injector

- 38.0 Apply knowledge to provide care for a patient experiencing an infectious disease. – The students will be able to:
- 38.01 List the causes of infectious diseases
  - 38.02 Describe & demonstrate the emergency medical care of the infant, child, adult and geriatric patient experiencing an infectious disease.
  - 38.03 Discuss mandatory notification to State or Federal agencies of various diseases.
- 39.0 Apply knowledge to provide care for a patient with an endocrine disorder. – The students will be able to:
- 39.01 Review the anatomy, physiology & pathophysiology of the endocrine system and its main function in the body.
  - 39.02 Define diabetes (type I & II), Hypoglycemia, Hyperglycemia & diabetic ketoacidosis.
  - 39.03 Identify & demonstrate the steps in the emergency medical care of the patient taking diabetic medicine with an altered mental status and a history of diabetes.
  - 39.04 State the generic and trade names, medication forms, dose, administration, action, and contraindications for oral glucose.
  - 39.05 Demonstrate the steps of using a glucometer device and administering oral glucose.
  - 39.06 Distinguish between the emergency medical care of the infant, child, adult and geriatric patient experiencing a diabetic emergency.
- 40.0 Apply knowledge to provide care for a patient with a psychiatric emergency. – The students will be able to:
- 40.01 Define behavior, psychiatric disorders & behavioral emergencies.
  - 40.02 Discuss the general factors that may cause an alteration in a patient's behavior.
  - 40.03 Discuss the risk factors/signs or symptoms of various psychiatric emergencies.
  - 40.04 Discuss special medical/legal considerations for managing behavioral emergencies to include Florida statutes:
    - 40.04.01 Baker Act (FS 394.451)
    - 40.04.02 Marchman Act (FS 397.601 & FS 397.675)
    - 40.04.03 Emergency examination & treatment of incapacitated (FS401.445)
  - 40.05 Distinguish between the emergency medical care of the infant, child, adult and geriatric patient experiencing a behavioral or psychiatric emergency.
  - 40.06 Demonstrate various techniques to safely restrain a patient with a behavioral problem.
- 41.0 Apply knowledge to provide care for patients with a cardiovascular emergency. – The students will be able to:

- 41.01 Review the basic anatomy, physiology and pathophysiology of the cardiovascular system.
  - 41.02 Describe the anatomy, physiology, pathophysiology and demonstrate the assessment & management of :
    - 41.02.01 Angina pectoris
    - 41.02.02 Thromboembolism
    - 41.02.03 Myocardial infarction
    - 41.02.04 Hypertensive emergencies
    - 41.02.05 Aortic aneurysm/dissection
    - 41.02.06 Heart Failure
  - 41.03 Demonstrate the ability to assess and treat a patient with signs and symptoms of cardiac issues, including airway, medication administration, position of comfort and life span considerations.
  - 41.04 List the indications & contraindications for automated external defibrillation (AED).
  - 41.05 Explain the impact of age and weight on defibrillation.
  - 41.06 Discuss the position of comfort for patients with various cardiac emergencies.
  - 41.07 Explain the rationale for early defibrillation.
  - 41.08 Explain that not all chest pain patients result in cardiac arrest and do not need to be attached to an automated external defibrillator.
  - 41.09 Discuss the various types of automated external defibrillators.
  - 41.10 Differentiate between the fully automated and the semi-automated defibrillator.
  - 41.11 Understand the importance of maintenance and operators check list for AED's.
  - 41.12 Demonstrate the ability to use an AED according to the latest American Heart Association (AHA) guidelines.
  - 41.13 Explain the role medical direction plays in the use of automated external defibrillation.
- 42.0 Apply knowledge of toxicology to provide care for a patient with a poisoning or overdose emergency. – The students will be able to:
- 42.01 Define toxicology, poisoning & overdose.
  - 42.02 List various ways that poisons enter the body.
  - 42.03 List signs/symptoms associated with poisoning.
  - 42.04 Discuss & demonstrate the emergency medical care for the infant, child, adult and geriatric patient with poisoning or overdose.
  - 42.05 State the generic and trade names, indications, contraindications, medication form, dose, administration, actions, side effects and re-assessment strategies for activated charcoal.
  - 42.06 Perform the necessary steps required to provide a patient with activated charcoal.

- 43.0 Apply knowledge to provide care for a patient with a respiratory emergency. – The students will be able to:
- 43.01 List the structure, function and pathophysiology of the respiratory system.
  - 43.02 List signs of adequate air exchange.
  - 43.03 State the signs and symptoms of a patient with respiratory distress.
  - 43.04 Describe & demonstrate the assessment & medical care of the infant, child, adult and geriatric patient with a respiratory emergency.
  - 43.05 State the generic name, medication forms, dose, administration, action, indications and contraindications for the metered-dose inhaler.
  - 43.06 Demonstrate the steps in facilitating the use of an inhaler.
  - 43.07 Differentiate between upper airway obstruction and lower airway disease in the pediatric and geriatric patient.
- 44.0 Apply knowledge of Hematology to provide care for patients with a clotting disorder or are experiencing a sickle cell disease crisis. – The students will be able to:
- 44.01 List the composition, physiology & pathophysiology of blood.
  - 44.02 State the signs and symptoms of a patient with a Sickle Cell crisis or a clotting disorder.
  - 44.03 Describe & demonstrate the emergency medical care of the patient with Sickle cell distress or clotting disorder.
- 45.0 Apply knowledge to provide care for a patient with a genitourinary/renal emergency. – The students will be able to:
- 45.01 List the anatomy, physiology & pathophysiology of the renal system.
  - 45.02 Understand the principles of kidney dialysis.
  - 45.03 State the signs and symptoms of a patient with a dialysis emergency.
  - 45.04 Describe & demonstrate the emergency medical care of the patient with a dialysis emergency.
- 46.0 Apply knowledge to provide care for a patient with a gynecologic emergency. – The students will be able to:
- 46.01 Describe the basic anatomy, physiology and pathophysiology of the female reproductive system.
  - 46.02 Distinguish between the emergency medical care of the infant, child, adult and geriatric patient experiencing a female reproductive system emergency.
  - 46.03 Explain the general management of a gynecologic emergency in relation to patient privacy and communication.
  - 46.04 Discuss the special consideration and precautions an EMT must observe when arriving at the scene of a suspected case of sexual assault or rape.

- 47.0 Apply knowledge to provide care for a patient with a Non-Traumatic Musculoskeletal emergency. – The students will be able to:
- 47.01 Describe the basic anatomy, physiology and pathophysiology of the skeletal system (i.e. cancer or osteoporosis).
  - 47.02 Describe & demonstrate the emergency medical care of the patient with a non-traumatic musculoskeletal emergency.
- 48.0 Describe an overview of the identification, categorization, pathophysiology and assessment of a trauma patient. – The students will be able to:
- 48.01 Discuss and define pathophysiology of the trauma patient
  - 48.02 Discuss and demonstrate assessment and management of the trauma patient.
  - 48.03 Discuss and describe significant & non-significant Mechanism of Injury (MOI) & provide examples of each.
  - 48.04 Discuss and describe State of Florida's trauma scorecard methodologies as required in FS 401.2701 & 64J-2.004 & 2.005.
  - 48.05 Discuss the National Trauma Triage Protocol of injured Patients (<http://cdc.gov/fieldtriage/> )
- 49.0 Demonstrate an understanding and the skills required for the management of a patient with traumatic bleeding. – The students will be able to:
- 49.01 Review the anatomy & physiology of the circulatory system
  - 49.02 Differentiate between:
    - 49.02.01 Internal and external bleeding.
    - 49.02.02 Arterial, venous and capillary bleeding.
  - 49.03 Explain and demonstrate emergency medical care of the patient with external & internal bleeding.
  - 49.04 List signs and symptoms of shock (hypo-perfusion).
- 50.0 Demonstrate an understanding and the skills required for the management of a patient with a chest trauma. – The students will be able to:
- 50.01 Discuss MOI for chest injury (blunt & penetrating, energy & injury).
  - 50.02 List the anatomy, physiology & pathophysiology of the thoracic/chest cavity & respiratory system.
  - 50.03 Differentiate between a pneumothorax (open, simple & tension) & hemothorax.
  - 50.04 Describe and demonstrate the assessment & management of a patient with a suspected chest (open and closed) injury.
- 51.0 Demonstrate an understanding and the skills required for the management of a patient with an abdominal/genitourinary trauma. – The students will be able to:

- 51.01 Discuss MOI for abdominal injury (blunt & penetrating, energy & injury).
  - 51.02 List the anatomy, physiology & pathophysiology of the abdominal cavity & genitourinary (both male & female) system.
  - 51.03 Describe the abdominal quadrants
  - 51.04 Describe the differences between hollow & solid organs.
  - 51.05 Describe and demonstrate the assessment & management of a patient with a suspected abdominal (penetrating or blunt) or genitourinary injury.
  - 51.06 Explain special consideration related to a patient who has experienced an injury by sexual assault/abuse.
- 52.0 Demonstrate an understanding and the skills required for the management of a patient with an orthopedic trauma. – The students will be able to:
- 52.01 Discuss MOI for orthopedic injury (blunt & penetrating, energy & injury).
  - 52.02 Review the anatomy, physiology & pathophysiology of the musculoskeletal system.
  - 52.03 Describe the different types of musculoskeletal injuries including fractures, amputations, sprains, & strains.
  - 52.04 Differentiate between an open and a closed painful, swollen, deformed extremity.
  - 52.05 Describe and demonstrate the assessment & management of a patient with a suspected orthopedic injury.
- 53.0 Demonstrate an understanding and the skills required for the management of a patient with a soft tissue trauma. – The students will be able to:
- 53.01 Discuss & list the anatomy and physiology, to include the layers, of the skin.
  - 53.02 Discuss and list the types of open & closed soft tissue injury.
  - 53.03 Define and list characteristics of superficial, partial-thickness and full-thickness burns.
  - 53.04 Explain how the seriousness of a burn is related to its depth and extent (percent of body surface area (BSA) involved or rule of 9s) for adult & pediatric patient.
  - 53.05 Describe and demonstrate the assessment & management of a patient with a soft tissue injury.
- 54.0 Demonstrate an understanding and the skills required for the management of a patient with a head, facial, or neck (non-spinal) trauma. – The students will be able to:
- 54.01 List the anatomy, physiology & pathophysiology of the head, face, & neck.
  - 54.02 Discuss MOI for head, face, & neck (non-spinal) (blunt & penetrating, energy & injury).
  - 54.03 Describe and demonstrate the assessment & management of a patient with an injury to the head, face & neck (non-spinal).
- 55.0 Demonstrate an understanding and the skills required for the management of a patient with a nervous system trauma. – The students will be able to:

- 55.01 Review the anatomy, physiology & pathophysiology of the nervous system.
  - 55.02 Explain functions of the somatic & autonomic nervous system
  - 55.03 Discuss MOI for head (brain) & spinal (blunt & penetrating, energy & injury).
  - 55.04 Discuss the different types of brain injuries and their corresponding signs and symptoms, including increased intracranial pressure (ICP), concussion, contusion & injuries caused by medical conditions.
  - 55.05 Describe and demonstrate the assessment & management of a patient with a head (brain) and spinal injury.
- 56.0 Demonstrate an understanding of the special considerations for the management of a patient experiencing a trauma during pregnancy. – The students will be able to:
- 56.01 Discuss Anatomy, physiology & pathophysiology of the pregnant trauma patient.
  - 56.02 Discuss MOI and fetal considerations for the pregnant trauma patient.
  - 56.03 Discuss & demonstrate unique injuries and conditions along with assessment & management for the pregnant patient involved in trauma.
- 57.0 Demonstrate an understanding of the special considerations for the management of the pediatric patient experiencing a trauma. – The students will be able to:
- 57.01 Discuss Anatomy, physiology & pathophysiology of the pediatric trauma patient.
  - 57.02 Discuss & demonstrate unique assessment & management considerations for the pediatric trauma patient.
- 58.0 Demonstrate an understanding of the special considerations for the management of the geriatric patient experiencing a trauma. – The students will be able to:
- 58.01 Discuss Anatomy, physiology & pathophysiology of the elderly trauma patient.
  - 58.02 Discuss & demonstrate unique assessment & management considerations for the elderly trauma patient.
- 59.0 Demonstrate an understanding of the special considerations for the management of the cognitively impaired patient experiencing a trauma. – The students will be able to:
- 59.01 Discuss anatomy, physiology & pathophysiology of the cognitively impaired trauma patient.
  - 59.02 Discuss & demonstrate unique assessment & management considerations for the cognitively impaired trauma patient.
- 60.0 Discuss and demonstrate how to assess and manage environmental trauma emergencies. – The students will be able to:
- 60.01 Define drowning and discuss its incidence, risk factors & prevention.

- 60.02 List pathophysiologies of water related incidents
  - 60.03 Describe submersion in salt and fresh water
  - 60.04 Discuss & demonstrate assessment & management considerations for a patient of a submersion incident.
  - 60.05 Describe the different types of diving emergencies and how they may occur.
  - 60.06 List pathophysiologies of dysbarism incidents to include high altitudes and diving incidents.
  - 60.07 Discuss & demonstrate assessment & management considerations for a patient of a dysbarism incident.
  - 60.08 Discuss & demonstrate assessment & management considerations for a patient of a lightning incident
  - 60.09 Explain the five ways a body can lose heat
  - 60.10 List pathophysiologies of temperature related incidents to include both cold and heat related illness.
  - 60.11 Discuss & demonstrate assessment & management considerations for a patient of a temperature related illness
  - 60.12 Identify the species of insects, spiders & snakes in the US that may cause life threatening injuries.
  - 60.13 Discuss & demonstrate assessment & management considerations for a patient of a bite or envenomation incident.
- 61.0 Define and articulate the kinematics of trauma. – The students will be able to:
- 61.01 Explain the relationship between mechanism of injury and potential energy, kinetic energy and work.
  - 61.02 Define term blunt & penetrating trauma and provide examples of the mechanism of injury (MOI) that would cause each to occur and include:
    - 61.02.01 Affects of high, medium & low velocity penetrating trauma
    - 61.02.02 Primary, secondary, tertiary and miscellaneous blast injuries
    - 61.02.03 Factors to consider of a patient injured in a fall
    - 61.02.04 Consider age (pediatric & geriatrics)
- 62.0 Describe the components and procedures of a multi-system trauma. – The students will be able to:
- 62.01 Describe and provide a general overview of multisystem trauma patient management.
  - 62.02 Discuss the golden principle of out-of-hospital trauma care
  - 62.03 Discuss & demonstrate assessment & management considerations for a patient of multi system injuries.
- 63.0 Apply knowledge of growth development, aging and assessment to the obstetric and neonatal populations. – The students will be able to:

- 63.01 Review the anatomy, physiology & pathophysiology of the female reproductive system.
  - 63.02 Explain the normal changes that occur during pregnancy.
  - 63.03 Differentiate between the stages of labor and delivery.
  - 63.04 Discuss & demonstrate assessment & management considerations of a pregnancy
  - 63.05 Discuss assessment & management considerations of complications of pregnancy.
  - 63.06 Discuss & demonstrate assessment & management considerations of a neonate.
- 64.0 Apply knowledge of growth development, aging and assessment to the pediatric population. – The students will be able to:
- 64.01 List the anatomy, physiology & pathophysiology of the pediatric patient.
  - 64.02 Describe the differences in anatomy when compared to the adult patient to
  - 64.03 Discuss & demonstrate assessment & management considerations of a pediatric emergency.
  - 64.04 The most common causes of the following conditions in the pediatric patient.
    - 64.04.01 Shock
    - 64.04.02 Altered mental status and seizures
    - 64.04.03 Gastrointestinal emergencies
    - 64.04.04 Poisonings
    - 64.04.05 Drowning
    - 64.04.06 Trauma
  - 64.05 Discuss & demonstrate assessment & management considerations for Sudden Infant Death Syndrome (SIDS).
- 65.0 Apply knowledge of growth development, aging and assessment to the geriatric population. – The students will be able to:
- 65.01 Define and discuss the term “geriatrics.”
  - 65.02 List the anatomy, physiology & pathophysiology of the Geriatric patient.
  - 65.03 Discuss & demonstrate assessment & management considerations of a geriatric emergency.
- 66.0 Apply knowledge of growth development, aging and assessment to patients with special challenges. – The students will be able to:
- 66.01 Define and discuss child and elder abuse and neglect and possible indicators of each.
  - 66.02 Discuss assessment & management considerations of a patient with special needs to include child and elder abuse and neglect, homelessness/poverty, etc.

- 67.0 Discuss and demonstrate the principles of safely operating a ground ambulance. – The students will be able to:
- 67.01 Discuss the importance of performing regular vehicle & equipment inspection.
  - 67.02 Describe the general provisions of Florida laws relating to the operation of the ambulance and privileges.
  - 67.03 Discuss "Due Regard for Safety of All Others" while operating an emergency vehicle.
  - 67.04 Provide examples of some high risk situations and hazards that may affect the safety of the ambulance and its passengers during both pre-transport & transport.
- 68.0 Discuss an overview of EMS operations during a multiples casualty incident. – The students will be able to:
- 68.01 Describe the specific condition that would define a mass-casualty incident (MCI) and give examples.
  - 68.02 Describe primary and secondary triage, how the four triage categories are assigned and how destination decisions are made.
  - 68.03 Describe how the techniques of triage are performed.
  - 68.04 Demonstrate how to perform a triage based scenario that involves an MCI.
- 69.0 Demonstrate knowledge and procedures involved in safely operating in and around an air medical operations landing zone. – The students will be able to:
- 69.01 Discuss safe air medical operations
  - 69.02 Describe key scene safety considerations when preparing for a helicopter medivac, including establishing a landing zone and approaching the aircraft.
  - 69.03 Discuss the criteria for utilizing an air medial response
- 70.0 Discuss correct procedures of extrication to ensure EMS personnel and patient safety during extrication operations. – The students will be able to:
- 70.01 Describe the role of the EMT in patient rescue & vehicle extrication
  - 70.02 Describe personal and patient safety during vehicle extrication.
  - 70.03 Discuss the factors related to ensuring situational safety at the site of a vehicle extrication
  - 70.04 Explain the difference between simple access and complex access in vehicle extrication
  - 70.05 Discuss patient care consideration related to assisting with rapid extrication, providing emergency care to the trapped patient and removing and transferring a patient.

71.0 Discuss the risks and responsibilities of operating during a terrorism event or during a natural or man-made disaster. – The students will be able to:

71.01 Describe the role of the EMT on the scene of a natural or man-made disaster

71.02 Define the term international terrorism & domestic terrorism and provide examples of incidents of each.

71.03 Describe personal & patient safety during a natural or man-made disaster.

71.04 Describe the factors related to ensuring situational safety at the site of a disaster and the procedures required.

2011 - 2012

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Paramedic  
**Career Cluster:** Health Science

<b>CCC</b>	
CIP Number	0317020600
Program Type	College Credit Certificate (CCC)
Program Length	42 credit hours or 1100 hours
CTSO	HOSA
SOC Codes (all applicable)	31-9099, 29-2041
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>

### **Purpose**

This certificate program is part of the Emergency Medical Services AS/AAS degree program (1317.020601).

A College Credit Certificate consists of a program of instruction of less than sixty (60) credits of college-level courses, which is part of an AS or AAS degree program and prepares students for entry into employment (Rule 6A-14.030, F.A.C.).

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

This is an instructional program that prepares students for employment as paramedics SOC 29-2041 (Emergency Medical Technicians & Paramedics) to function at the basic pre-hospital emergency medical technician - paramedic level and treat various medical/trauma conditions, using appropriate equipment and materials. The program prepares students for certification as paramedics in accordance with Chapter 64E-2 of the Florida Administrative Code. The program must be approved by the Department of Health, Office of Emergency Medical Services, and the curriculum must adhere to the US Department of Transportation (DOT) 1998 Emergency Medical Technician- Paramedic National Standards Curriculum. This is the second level for a career in emergency medical services.

The content includes but is not limited to: patient assessment, advanced airway management, cardiovascular emergencies, external and internal bleeding and shock, traumatic injuries, fractures, dislocations, sprains, poisoning, heart attack, stroke, diabetes, pharmacology, medication administration, respiratory emergencies, endocrine emergencies, acute abdomen,

communicable diseases, patients with abnormal behavior, substance abuse, the unconscious state, emergency childbirth, pediatric and geriatric emergencies, burns, environmental hazards, communications, documentation, extrication, mass casualty incident, incident command system, and transportation of patient.

### **Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

### **Special Notes**

This program meets the Department of Health HIV/AIDS Domestic Violence and Prevention of Medical Errors education requirements. Upon completion of this program, the instructor will provide a certificate to the student verifying that these requirements have been met.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635 F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

The student must be proficient in patient assessment and evaluation, the use of suctioning devices, oral and nasal airways, resuscitation devices, oxygen equipment, sphygmomanometer and stethoscope, splints of all types, pneumatic antishock garments, medication administration techniques including intravenous, intramuscular, subcutaneous, inhalation, intraosseous, endotracheal administration, extrication tools, dressings and bandages, stretchers and patient carrying devices. Students must complete this program, or demonstrate the mastery of skills standards contained in this program, before advancing to the final program in this cluster: Emergency Medical Services Associate Degree.

A Paramedic program must be taught by a Florida certified paramedic with two years experience meeting the qualifications as set forth in 64E-2 F. A. C.

Field internship shall include a competency-based program to assure appropriate pre-hospital assessment and management of medical and trauma patients, as well as associated manual skills. The field internship activity shall include supervised experience in the field setting with a certified ALS transport ambulance agency or ALS fire department. The field internship activity shall include a minimum of 50 emergency runs resulting in patient care and/or transport appropriate for the Paramedic. In addition, the patient care component should include minimum competencies in patient assessment, airway management and ventilation, IV therapy, medication administration, cardiovascular, pediatric, trauma and medical emergencies.

An American Heart Association or Red Cross certification or in "professional" BLS or an equivalent is required of all candidates for entrance into a Paramedic program. A student physical requirement must be met in accordance with HRS guidelines.

Outcomes 01-11 are referred to as the Health Careers Core and do not have to be completed if the student has previously completed the Core in another health science program. The Core should be taken first or concurrently with the first course in the program. Following the

successful completion of the core, the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

### **Career and Technical Student Organization (CTSO)**

Health Occupations Students of America, Inc. (HOSA) is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

### **Standards**

After successfully completing this course the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.
- 12.0 Demonstrate knowledge of the Paramedic's roles and responsibilities.
- 13.0 Describe wellness in EMS.
- 14.0 Describe primary injury prevention.
- 15.0 Describe medical/legal considerations.
- 16.0 Describe emergency medical services ethics.
- 17.0 Apply the general concepts of pathophysiology.
- 18.0 Demonstrate the knowledge of pharmacology and administer medications.
- 19.0 Demonstrate the knowledge of the venous circulation and safely administer medications.
- 20.0 Demonstrate effective therapeutic communications.
- 21.0 Demonstrate the knowledge of human development and assessment communication strategies.

- 22.0 Establish and/or maintain a patent airway and ventilation.
- 23.0 Demonstrate general patient assessment and initial management.
- 24.0 Demonstrate the technique of a physical exam to perform a patient assessment.
- 25.0 Demonstrate the ability to apply a process of clinical decision making.
- 26.0 Describe and demonstrate EMS communication systems.
- 27.0 Demonstrate proper patient documentation.
- 28.0 Integrate the principles of kinematics to enhance the patient assessment.
- 29.0 Implement the proper treatment plan for a patient with shock or hemorrhage.
- 30.0 Implement the proper treatment plan for a patient with soft tissue trauma.
- 31.0 Implement the proper treatment plan for a patient with burn injuries.
- 32.0 Implement the proper treatment plan for a trauma patient with a head injury.
- 33.0 Implement the proper treatment plan for a patient with suspected spinal injury.
- 34.0 Implement the proper treatment plan for a patient with suspected thoracic injury.
- 35.0 Implement the proper treatment plan for a patient with suspected abdominal trauma.
- 36.0 Implement the proper treatment plan for a patient with suspected musculoskeletal injury.
- 37.0 Implement the proper treatment plan for a patient with suspected respiratory problems.
- 38.0 Implement the proper treatment plan for a patient with suspected cardiovascular disease.
- 39.0 Implement the proper treatment plan for a patient with a suspected neurologic problem.
- 40.0 Implement the proper treatment plan for a patient with suspected endocrine problem.
- 41.0 Implement the proper treatment plan for a patient with a suspected allergic or anaphylactic reaction.
- 42.0 Implement the proper treatment plan for a patient with a suspected gastroenterologic problem.
- 43.0 Implement the proper treatment plan for a patient with a suspected renal or urologic problem.
- 44.0 Implement the proper treatment plan for a patient with suspected toxic exposure.
- 45.0 Implement the proper treatment plan for a hematopoietic patient.
- 46.0 Implement the proper treatment plan for a patient with suspected environmental problems.
- 47.0 Implement the proper treatment plan for a patient with suspected infectious or communicable disease.
- 48.0 Implement the proper treatment plan for a patient with a suspected behavioral emergency.
- 49.0 Implement the proper treatment plan for a patient with a suspected gynecological emergency.
- 50.0 Implement the proper treatment plan for a patient with a suspected obstetrical emergency.
- 51.0 Implement the proper treatment plan for a neonatal emergency.
- 52.0 Implement the proper treatment plan for a pediatric patient.
- 53.0 Implement the proper treatment plan for a geriatric patient.
- 54.0 Implement the proper treatment plan for a patient who has sustained abuse or assault.
- 55.0 Implement the proper treatment plan for a variety of diverse patients with a suspected emergency.
- 56.0 Implement the proper treatment plan for the chronic care patient.
- 57.0 Implement the proper treatment plan for patients with common complaints.
- 58.0 Demonstrate the proper procedures to ensure safe and effective ground and air transportation.
- 59.0 Integrate the principles of general incident management and multiple casualty incident management.
- 60.0 Integrate the principles of rescue awareness management.

- 61.0 Integrate the principles of human hazard awareness.
- 62.0 Integrate the principles of general incident management of hazardous materials emergencies.

2011 - 2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Paramedic  
**CIP Number:** 0317020600  
**Program Length:** 42 credit hours  
**SOC Code(s):** 31-9099, 29-2041

This certificate program is part of the Emergency Medical Services AS/AAS degree program (1317.020601). At the completion of this program, the student will be able to:

**Health Science Core: The Health Science Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Science Core in any other health occupations program do not have to repeat intended outcomes 01-11.**

01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:

- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
- 01.02 Identify common methods of payment for healthcare services.
- 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
- 01.04 Describe the composition and functions of a healthcare team.
- 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
- 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
- 01.07 Identify characteristics of effective teams.
- 01.08 Recognize methods for building positive team relationships.
- 01.09 Analyze attributes and attitudes of an effective leader.
- 01.10 Recognize factors and situations that may lead to conflict.
- 01.11 Demonstrate effective techniques for managing team conflict.
- 01.12 Describe factors that influence the current delivery system of healthcare.
- 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.

02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:

- 02.01 Develop basic speaking and active listening skills.
- 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
- 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
- 02.04 Respond to verbal and non-verbal cues.
- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.

- 02.06 Use appropriate medical terminology and abbreviations.
- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
- 02.08 Recognize the importance of patient/client educations regarding healthcare.
- 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
- 02.10 Analyze elements of communication using a sender-receiver model.
- 02.11 Distinguish between and report subjective and objective information.
- 02.12 Report relevant information in order of occurrence.

03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:

- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
- 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
- 03.03 Demonstrate procedures for accurate documentation and record keeping.
- 03.04 Interpret healthcare facility policy and procedures.
- 03.05 Explain the “Patient’s Bill of Rights”.
- 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
- 03.07 Describe advance directives.
- 03.08 Describe informed consent.
- 03.09 Explain the laws governing harassment, labor and employment.
- 03.10 Differentiate between legal and ethical issues in healthcare.
- 03.11 Describe a code of ethics consistent with the healthcare occupation.
- 03.12 Identify and compare personal, professional, and organizational ethics.
- 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
- 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
- 03.15 Recognize and report abuse including domestic violence and neglect.
- 03.16 Distinguish among the five schedules of controlled substances.

04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:

- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
- 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
- 04.03 Identify psychological reactions to illness including defense mechanisms.
- 04.04 Identify complementary and alternative health practices.
- 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
- 04.06 Explain the basic concepts of positive self image, wellness and stress.
- 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
- 04.08 Explain the nutrition pyramid.
- 04.09 Recognize the steps in the grief process.

05.0 Recognize and practice safety and security procedures. – The student will be able to:

- 05.01 Recognize safe and unsafe working conditions and report safety hazards.
- 05.02 Demonstrate the safe use of medical equipment.
- 05.03 Explain and apply the theory of root- cause analysis
- 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
- 05.05 Identify and practice security procedures for medical supplies and equipment.
- 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions).
- 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
- 05.08 Demonstrate proper body mechanics and ergonomics.
- 05.09 Demonstrate the procedure for properly identifying patients.
- 05.10 Demonstrate procedures for the safe transport and transfer of patients.
- 05.11 Describe fire, safety, disaster and evacuations procedures.
- 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )

06.0 Recognize and respond to emergency situations. – The student will be able to:

- 06.01 Monitor and record vital signs.
- 06.02 Describe legal parameters relating to the administration of emergency care.
- 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
- 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.

07.0 Recognize and practice infection control procedures. – The student will be able to:

- 07.01 Define principles of infection control including standard and transmission based precautions.
- 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
- 07.03 Demonstrate knowledge of surgical asepsis.
- 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.

08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:

- 08.01 Describe technology applications in healthcare.
- 08.02 Define terms and demonstrate basic computer skills.
- 08.03 Recognize technology applications in healthcare.
- 08.04 Interpret information from electronic medical documents.
- 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.

09.0 Demonstrate employability skills. – The student will be able to:

- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.
  - 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
  - 09.03 Identify documents that may be required when applying for a job.
  - 09.04 Write an appropriate resume.
  - 09.05 Conduct a job search.
  - 09.06 Complete a job application form correctly.
  - 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
  - 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
  - 09.09 Identify acceptable work habits.
  - 09.10 Recognize appropriate affective/professional behavior.
  - 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:
- 10.01 Recognize emerging diseases and disorders
  - 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
  - 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
  - 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
  - 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
  - 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.
- 11.0 Apply basic math and science skills. – The student will be able to:
- 11.01 Draw, read, and report on graphs, charts and tables.
  - 11.02 Measure time, temperature, distance, capacity, and mass/weight.
  - 11.03 Make, use and convert using both traditional and metric units.
  - 11.04 Make estimations and approximations and judge the reasonableness of the result.
  - 11.05 Convert from regular to 24 hour time.
  - 11.06 Demonstrate ability to evaluate and draw conclusions.
  - 11.07 Organize and communicate the results obtained by observation and experimentation.
  - 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
  - 11.09 Calculate ratios

**PARAMEDIC: Intended outcomes 12-62 complete the occupational exit of the Paramedic. The outcomes may be taught as one or more modules at the postsecondary level. At the completion of these competencies, the student will have reached OCP B Paramedic.**

- 12.0 Demonstrate knowledge of the paramedic's roles and responsibilities. – At the completion of this unit, the paramedic student will understand his or her roles and responsibilities within an EMS system, and how these roles and responsibilities differ from other levels of providers.--The student will be able to:
- 12.01 Define terms, including but not limited to: EMS systems, licensure, registration, profession, professionalism, health care professional, ethics, peer review, medical direction and protocols.
  - 12.02 Describe the attributes of a paramedic as a health care professional.
  - 12.03 Explain paramedic licensure/ certification, recertification, and reciprocity requirements in his or her state.
  - 12.04 Evaluate the importance of maintaining one's paramedic license/ certification.
  - 12.05 Describe the benefits of paramedic continuing education.
  - 12.06 Discuss the role of national associations and of a national registry agency.
  - 12.07 Discuss Chapter 401, Florida Statutes, and Chapter 64-E, Florida Administrative Code
  - 12.08 Discuss the roles of various EMS standard setting agencies.
  - 12.09 Identify the standards (components) of an EMS System as defined by the National Highway Traffic Safety Administration.
  - 12.10 Describe examples of professional behaviors in the following areas: integrity, empathy, self-motivation, appearance and personal hygiene, self-confidence, communications, time management, teamwork and diplomacy, respect, patient advocacy, and careful delivery of service.
  - 12.11 Describe the importance of quality EMS research to the future of EMS.
  - 12.12 List the primary and additional responsibilities of paramedics.
  - 12.13 Describe the role of the EMS physician in providing medical direction.
  - 12.14 Describe the benefits of medical direction, both on-line and off-line.
  - 12.15 Provide examples of local protocols.
  - 12.16 Discuss prehospital and out-of-hospital care as an extension of the physician.
  - 12.17 Describe the relationship between a physician on the scene, the paramedic on the scene, and the EMS physician providing on-line medical direction.
  - 12.18 Define the role of the paramedic relative to the safety of the crew, the patient, and bystanders.
  - 12.19 Assess personal practices relative to the responsibility for personal safety, the safety of the crew, the patient, and bystanders.
  - 12.20 Advocate the need for injury prevention, including abusive situations.
  - 12.21 Exhibit professional behaviors in the following areas: integrity, empathy, self-motivation, appearance and personal hygiene, self-confidence, communications, time management, teamwork and diplomacy, respect, patient advocacy, and careful delivery of service.
- 13.0 Describe wellness in EMS. – At the completion of this unit, the paramedic student will understand and value the importance of personal wellness in EMS and serve as a healthy role model for peers. At the completion of this unit, the paramedic student will be able to:

- 13.01 Discuss the concept of wellness and its benefits.
  - 13.02 Discuss how cardiovascular endurance, muscle strength, and flexibility contribute to physical fitness.
  - 13.03 Describe the impact of shift work on circadian rhythms.
  - 13.04 Discuss how periodic risk assessments and knowledge of warning signs contribute to cancer and cardiovascular disease prevention.
  - 13.05 Differentiate proper from improper body mechanics for lifting and moving patients in emergency and non-emergency situations.
  - 13.06 Describe the problems that a paramedic might encounter in a hostile situation and the techniques used to manage the situation.
  - 13.07 Describe the equipment available for self-protection when confronted with a variety of adverse situations.
  - 13.08 Describe the three phases of the stress response.
  - 13.09 List factors that trigger the stress response.
  - 13.10 Differentiate between normal/ healthy and detrimental reactions to anxiety and stress.
  - 13.11 Identify causes of stress in EMS.
  - 13.12 Identify and describe the defense mechanisms and management techniques commonly used to deal with stress.
  - 13.13 Describe the components of critical incident stress management (CISM).
  - 13.14 Describe the needs of the paramedic when dealing with death and dying.
  - 13.15 Describe the unique challenges for paramedics in dealing with the needs of children and other special populations related to their understanding or experience of death and dying.
  - 13.16 Discuss the importance of universal precautions and body substance isolation practices.
  - 13.17 Defend the need to treat each patient as an individual, with respect and dignity.
  - 13.18 Promote and practice stress management techniques.
  - 13.19 Defend the need to respect the emotional needs of dying patients and their families.
  - 13.20 Advocate and practice the use of personal safety precautions in all scene situations.
  - 13.21 Implement appropriate Joint Commission patient safety goals.
- 14.0 Describe primary injury prevention. – At the completion of this unit, the paramedic student will be able to integrate the implementation of primary injury prevention activities as an effective way to reduce death, disabilities and health care costs. At the completion of this unit, the paramedic student will be able to:
- 14.01 Describe the incidence, morbidity and mortality of unintentional and alleged unintentional events.
  - 14.02 Identify the human, environmental, and socioeconomic impact of unintentional and alleged unintentional events.
  - 14.03 Identify health hazards and potential crime areas within the community.
  - 14.04 Identify the role of EMS in local municipal and community prevention programs.
  - 14.05 Value the contribution of effective documentation as one justification for funding of prevention programs.
- 15.0 Describe medical/legal considerations. – At the completion of this unit, the paramedic student will understand the legal issues that impact decisions made in the out-of-hospital environment. At the completion of this unit, the paramedic student will be able to:

- 15.01 Differentiate between legal and ethical responsibilities.
  - 15.02 Differentiate between licensure and certification as they apply to the paramedic.
  - 15.03 List the specific problems or conditions encountered while providing care that a paramedic is required to report, and identify in each instance to whom the report is to be made.
  - 15.04 Define terms, including but not limited to, the following: abandonment, battery, breach of duty, consent (expressed, implied, informed, voluntary), DNR orders, duty to act, emancipated minor, false imprisonment, liability, libel, negligence, proximate cause, scope of practice, slander, and tort.
  - 15.05 Differentiate between the scope of practice and the standard of care for paramedic practice.
  - 15.06 Discuss the concept of medical direction, including off-line medical direction and on-line medical direction, and its relationship to the standard of care of a paramedic.
  - 15.07 Describe the four elements that must be present in order to prove negligence.
  - 15.08 Discuss the legal concept of immunity, including Good Samaritan statutes and governmental immunity, as it applies to the paramedic.
  - 15.09 Explain the importance and necessity of patient confidentiality and the standards for maintaining patient confidentiality that apply to the paramedic.
  - 15.10 Differentiate among expressed, informed, implied, and involuntary consent.
  - 15.11 Given a scenario, demonstrate appropriate patient management and care techniques in a refusal of care situation.
  - 15.12 Describe what constitutes abandonment.
  - 15.13 Differentiate between assault and battery and describe how to avoid each.
  - 15.14 Describe the actions that the paramedic should take to preserve evidence at a crime or accident scene.
  - 15.15 Describe the importance of providing accurate documentation (oral and written) in substantiating an incident.
  - 15.16 Describe the characteristics of a patient care report required to make it an effective legal document.
- 16.0 Describe emergency medical services ethics. – At the completion of this unit, the paramedic student will understand the role that ethics plays in decision making in the out-of-hospital environment. At the completion of this unit, the paramedic student will be able to:
- 16.01 Distinguish between ethical and moral decisions.
  - 16.02 Identify the premise that should underlie the paramedic's ethical decisions in out-of hospital care.
  - 16.03 Analyze the relationship between the law and ethics in EMS.
  - 16.04 Describe the criteria necessary to honor an advance directive in your state.
- 17.0 Apply the general concepts of pathophysiology. – At the completion of this unit, the paramedic student will be able to apply the general concepts of pathophysiology for the assessment and management of emergency patients. At the completion of this unit, the paramedic student will be able to:
- 17.01 Describe cellular injury and cellular death.
  - 17.02 Describe the factors that precipitate disease in the human body.
  - 17.03 Discuss analyzing disease risk.

- 17.04 Describe environmental risk factors.
  - 17.05 Discuss familial diseases and associated risk factors.
  - 17.06 Discuss hypoperfusion.
  - 17.07 Define terms including but not limited to: cardiogenic, hypovolemic, neurogenic, anaphylactic and septic shock.
  - 17.08 Describe multiple organ dysfunction syndrome.
  - 17.09 Describe the inflammation response.
  - 17.10 Describe the systemic manifestations of the inflammation response.
  - 17.11 Describe the resolution and repair from inflammation.
  - 17.12 Discuss hypersensitivity.
  - 17.13 Describe deficiencies in immunity and inflammation.
  - 17.14 Describe homeostasis as a dynamic steady state.
  - 17.15 Describe neuroendocrine regulation.
- 18.0 Demonstrate knowledge of pharmacology and administer medications. – At the completion of this unit, the paramedic student will be able to integrate pathophysiological principles of pharmacology and the assessment findings to formulate a field impression and implement a pharmacologic management plan. At the completion of this unit, the paramedic student will be able to:
- 18.01 Differentiate among the chemical, generic (nonproprietary), and trade (proprietary) names of a drug.
  - 18.02 List the four main sources of drug products.
  - 18.03 Describe how drugs are classified.
  - 18.04 List legislative acts controlling drug use and abuse in the United States.
  - 18.05 Differentiate among Schedule I, II, III, IV, and V substances.
  - 18.06 Discuss standardization of drugs.
  - 18.07 Discuss investigational drugs, including the Food and Drug Administration (FDA) approval process and the FDA classifications for newly approved drugs.
  - 18.08 Discuss the paramedic's responsibilities and scope of management pertinent to the administration of medications.
  - 18.09 List and describe general properties of drugs.
  - 18.10 List and describe liquid and solid drug forms.
  - 18.11 List and differentiate routes of drug administration.
  - 18.12 Differentiate between enteral and parenteral routes of drug administration.
  - 18.13 Describe mechanisms of drug action.
  - 18.14 Describe the process called pharmacokinetics, pharmacodynamics, including theories of drug action, drug-response relationship, factors altering drug responses, predictable drug responses, iatrogenic drug responses, and unpredictable adverse drug responses.
  - 18.15 Synthesize patient history information and assessment findings to form a field impression.
- 19.0 Demonstrate knowledge of the venous circulation and safely administer medications. – At the completion of this unit, the paramedic student will be able to safely and precisely access the venous circulation and administer medications. At the completion of this unit, the paramedic student will be able to:
- 19.01 Review the specific anatomy and physiology pertinent to medication administration.
  - 19.02 Review mathematical principles.

- 19.03 Discuss formulas as a basis for performing drug calculations.
  - 19.04 Describe the indications, equipment needed, technique used, precautions, and general principles of peripheral venous or external jugular cannulation.
  - 19.05 Describe the indications, equipment needed, technique used, precautions, and general principles of intraosseous needle placement and infusion.
  - 19.06 Discuss the "six rights" of drug administration and correlate these with the principles of medication administration.
  - 19.07 Describe the use of universal precautions and body substance isolation (BSI) procedures when administering a medication.
  - 19.08 Describe the equipment needed and general principles of administering oral medications.
  - 19.09 Describe the indications, equipment needed, techniques used, precautions, and general principles of administering medications by the inhalation route.
  - 19.10 Describe the indications, equipment needed, techniques used, precautions, and general principles of administering medications by the gastric tube.
  - 19.11 Describe the indications, equipment needed, techniques used, precautions, and general principles of rectal medication administration.
  - 19.12 Differentiate among the different percutaneous routes of medication administration.
  - 19.13 Describe the purpose, equipment needed, techniques used, complications, and general principles for obtaining a blood sample.
  - 19.14 Synthesize a pharmacologic management plan including medication administration.
  - 19.15 Demonstrate cannulation of peripheral or external jugular veins.
  - 19.16 Demonstrate intraosseous needle placement and infusion.
  - 19.17 Demonstrate clean technique during medication administration.
  - 19.18 Demonstrate administration of oral medications.
  - 19.19 Demonstrate administration of medications by the inhalation route.
- 20.0 Demonstrate effective therapeutic communication. – At the completion of this unit, the paramedic student will be able to integrate the principles of therapeutic communication to effectively communicate with any patient while providing care. At the completion of this unit, the paramedic student will be able to:
- 20.01 Identify internal and external factors that affect a patient/ bystander interview conducted by a paramedic.
  - 20.02 Restate the strategies for developing patient rapport.
  - 20.03 Summarize the methods to assess mental status based on interview techniques.
  - 20.04 Discuss the strategies for interviewing a patient who is unmotivated to talk.
  - 20.05 Summarize developmental considerations of various age groups that influence patient interviewing.
  - 20.06 Restate unique interviewing techniques necessary to employ with patients who have special needs.
  - 20.07 Discuss interviewing considerations used by paramedics in cross-cultural communications.
- 21.0 Demonstrate the knowledge of human development with assessment and communication strategies. – The paramedic student will be able to integrate the physiological, psychological, and sociological changes throughout human development with assessment and communication strategies for patients of all ages. At the completion of this unit, the paramedic student will be able to:

- 21.01 Compare the physiological and psychosocial characteristics of an infant with those of an early adult.
  - 21.02 Compare the physiological and psychosocial characteristics of a toddler with those of an early adult.
  - 21.03 Compare the physiological and psychosocial characteristics of a pre-school child with those of an early adult.
  - 21.04 Compare the physiological and psychosocial characteristics of a school-aged child with those of an early adult.
  - 21.05 Compare the physiological and psychosocial characteristics of an adolescent with those of an early adult.
  - 21.06 Compare the physiological and psychosocial characteristics of a middle aged adult with those of an early adult.
- 22.0 Establish and/or maintain a patent airway and ventilation. – At the completion of this unit, the paramedic student will be able to establish and/ or maintain a patent airway, oxygenate, and ventilate a patient. At the completion of this unit, the paramedic student will be able to:
- 22.01 Explain the primary objective of airway maintenance.
  - 22.02 Explain the differences between adult and pediatric airway anatomy.
  - 22.03 Define gag reflex.
  - 22.04 List the concentration of gases that comprise atmospheric air.
  - 22.05 Describe the measurement of oxygen in the blood.
  - 22.06 Describe the measurement of carbon dioxide in the blood.
  - 22.07 Describe peak expiratory flow.
  - 22.08 List factors that cause decreased oxygen concentrations in the blood.
  - 22.09 List the factors that increase and decrease carbon dioxide production in the body.
  - 22.10 Define pulsus paradoxes.
  - 22.11 Describe the Sellick (cricoid pressure) maneuver.
  - 22.12 Describe the use of an oral and nasal airway.
  - 22.13 Describe indications, contraindications, advantages, disadvantages, complications, and technique for ventilating a patient with an automatic transport ventilator (ATV).
  - 22.14 Describe the indications, contraindications, advantages, disadvantages, complications, liter flow range, and concentration of delivered oxygen for supplemental oxygen delivery devices.
  - 22.15 Define, identify and describe a tracheostomy, stoma, and tracheostomy tube.
  - 22.16 Define, identify, and describe a laryngectomy.
  - 22.17 Describe the special considerations in airway management and ventilation for the pediatric patient.
  - 22.18 Describe the indications, contraindications, advantages, disadvantages, complications and equipment for rapid sequence intubation with neuromuscular blockade.
  - 22.19 Identify neuromuscular blocking drugs and other agents used in rapid sequence intubation.
  - 22.20 Describe the indications, contraindications, advantages, disadvantages, complications and equipment for sedation during intubation.
  - 22.21 Describe the indications, contraindications, advantages, disadvantages and complications for performing an open cricothyrotomy.

- 22.22 Describe methods of assessment for confirming correct placement of an endotracheal tube.
  - 22.23 Describe the indications, contraindications, advantages, disadvantages, complications, equipment and technique for extubation.
  - 22.24 Describe methods of endotracheal intubation in the pediatric patient.
  - 22.25 Perform pulse oximetry.
  - 22.26 Perform end-tidal CO<sub>2</sub> detection.
- 23.0 Demonstrate general patient assessment and initial management. - At the completion of this unit, the paramedic student will be able to use the appropriate techniques to obtain a medical history from a patient, and the paramedic student will be able to explain the pathophysiological significance of physical exam findings. At the completion of this unit, the paramedic student will be able to:
- 23.01 Describe the techniques of history taking.
  - 23.02 Demonstrate the importance of empathy when obtaining a health history.
  - 23.03 Describe the techniques of inspection, palpation, percussion, and auscultation.
  - 23.04 Describe the evaluation of mental status.
  - 23.05 Distinguish the importance of abnormal findings of the assessment of the skin.
  - 23.06 Describe the examination of the head and neck.
  - 23.07 Differentiate normal and abnormal assessment findings of the mouth and pharynx.
  - 23.08 Appreciate the limitations of conducting a physical exam in the out-of-hospital environment.
  - 23.09 Demonstrate the examination of skin, hair and nails.
  - 23.10 Demonstrate the examination of the head and neck.
  - 23.11 Demonstrate the examination of the eyes.
  - 23.12 Demonstrate the examination of the ears.
  - 23.13 Demonstrate the examination of the nose.
  - 23.14 Demonstrate the examination of the mouth and pharynx.
  - 23.15 Demonstrate the examination of the neck.
  - 23.16 Demonstrate the examination of the thorax and ventilation.
  - 23.17 Demonstrate the examination of the posterior chest.
  - 23.18 Demonstrate auscultation of the chest.
  - 23.19 Demonstrate percussion of the chest.
  - 23.20 Demonstrate the examination of the arterial pulse including location, rate, rhythm, and amplitude.
  - 23.21 Demonstrate special examination techniques of the cardiovascular examination.
  - 23.22 Demonstrate the examination of the abdomen.
  - 23.23 Demonstrate auscultation of the abdomen.
  - 23.24 Demonstrate the external visual examination of the female genitalia.
  - 23.25 Demonstrate the examination of the male genitalia.
  - 23.26 Demonstrate the examination of the peripheral vascular system.
  - 23.27 Demonstrate the examination of the musculoskeletal system.
  - 23.28 Demonstrate the examination of the nervous system.
- 24.0 Demonstrate techniques of a physical exam to perform a patient assessment. – At the end of this unit, the paramedic student will be able to integrate the principles of history taking and techniques of physical exam to perform a patient assessment. At the completion of this unit, the paramedic student will be able to:

- 24.01 Describe common hazards found at the scene of a trauma and a medical patient.
  - 24.02 Discuss common mechanisms of injury/ nature of illness.
  - 24.03 Explain the reasons for identifying the need for additional help or assistance.
  - 24.04 Summarize the reasons for forming a general impression of the patient.
  - 24.05 Discuss methods of assessing mental status.
  - 24.06 Categorize levels of consciousness in the adult, infant and child.
  - 24.07 Discuss methods of assessing the airway in the adult, child and infant patient.
  - 24.08 State reasons for management of the cervical spine once the patient has been determined to be a trauma patient.
  - 24.09 Describe methods used for assessing if a patient is breathing.
  - 24.10 Distinguish between methods of assessing breathing in the adult, child and infant patient.
  - 24.11 Compare the methods of providing airway care to the adult, child and infant patient.
  - 24.12 Differentiate between locating and assessing a pulse in an adult, child and infant patient.
  - 24.13 Discuss the need for assessing the patient for external bleeding.
  - 24.14 Describe normal and abnormal findings when assessing skin color, temperature, and condition.
  - 24.15 Explain the reason for prioritizing a patient for care and transport.
  - 24.16 Describe the evaluation of patient's perfusion status based on findings in the initial assessment.
  - 24.17 State the reasons for performing a rapid trauma assessment.
  - 24.18 Discuss the reason for performing a focused history and physical exam.
  - 24.19 Discuss the components of the detailed physical exam in relation to the techniques of examination.
  - 24.20 Discuss the reasons for repeating the initial assessment as part of the on-going assessment.
  - 24.21 Describe the components of the on-going assessment.
  - 24.22 Discuss medical identification devices/ systems.
  - 24.23 Explain the rationale for crew members to evaluate scene safety prior to entering.
  - 24.24 Explain the value of performing an initial assessment.
  - 24.25 Observe various scenarios and identify potential hazards.
  - 24.26 Demonstrate the scene-size-up.
  - 24.27 Demonstrate the techniques for assessing mental status.
  - 24.28 Demonstrate the techniques for assessing the airway.
  - 24.29 Demonstrate the techniques for assessing if the patient is breathing.
  - 24.30 Demonstrate the techniques for assessing if the patient has a pulse.
  - 24.31 Demonstrate the techniques for assessing the patient for external bleeding.
  - 24.32 Demonstrate the techniques for assessing the patient's skin color, temperature, and condition.
  - 24.33 Demonstrate the ability to prioritize patients.
  - 24.34 Perform a detailed physical examination.
  - 24.35 Demonstrate the skills involved in performing the on-going assessment.
- 25.0 Demonstrate the ability to apply a process of clinical decision making. – At the end of this unit, the paramedic student will be able to apply a process of clinical decision making to use the assessment findings to help form a field impression. At the end of this unit, the paramedic student will be able to:

- 25.01 Compare the factors influencing medical care in the out-of-hospital environment to other medical settings.
  - 25.02 Differentiate between critical life-threatening, potentially life-threatening, and non life-threatening patient presentations.
  - 25.03 Evaluate the benefits and shortfalls of protocols, standing orders and patient care algorithms.
  - 25.04 Define the components, stages and sequences of the critical thinking process for paramedics.
  - 25.05 Apply the fundamental elements of critical thinking for paramedics.
  - 25.06 Describe the effects of the fight or flight response and the positive and negative effects on a paramedic's decision making.
  - 25.07 Summarize the six R's of putting it all together: Read the patient, Read the scene, React, Reevaluate, Revise the management plan, Review performance.
- 26.0 Describe and demonstrate EMS communications systems. – At the completion of this unit, the paramedic student will be able to follow an accepted format for dissemination of patient information in verbal form, either in person or over the radio. At the completion of this unit, the paramedic student will be able to:
- 26.01 Identify the role of verbal, written, and electronic communications in the provision of EMS.
  - 26.02 Describe the phases of communications necessary to complete a typical EMS event.
  - 26.03 Identify the importance of proper terminology when communicating during an EMS event.
  - 26.04 List factors that impede effective verbal communications.
  - 26.05 List factors which enhance verbal communications.
  - 26.06 List factors which impede effective written communications.
  - 26.07 List factors which enhance written communications.
  - 26.08 Recognize the legal status of written communications related to an EMS event.
  - 26.09 Identify the components of the local EMS communications system and describe their function and use.
  - 26.10 Identify and differentiate among the following communications systems: simplex, multiplex, duplex, trunked, digital communications, and cellular telephone.
  - 26.11 Describe the functions and responsibilities of the Federal Communications Commission.
  - 26.12 Describe how an EMS dispatcher functions as an integral part of the EMS team.
  - 26.13 List appropriate information to be gathered by the Emergency Medical Dispatcher.
  - 26.14 Describe information that should be included in patient assessment information verbally reported to medical direction.
  - 26.15 Organize a list of patient assessment information in the correct order for electronic transmission to medical direction according to the format used locally.
- 27.0 Demonstrate proper patient documentation. – At the completion of this unit, the paramedic student will be able to effectively document the essential elements of patient assessment, care and transport. At the completion of this unit, the paramedic student will be able to:
- 27.01 Identify the general principles regarding the importance of EMS documentation and ways in which documents are used.

- 27.02 Identify and use medical terminology correctly.
  - 27.03 Record all pertinent administrative information.
  - 27.04 Analyze the documentation for accuracy and completeness, including spelling.
  - 27.05 Describe the differences between subjective and objective elements of documentation.
  - 27.06 Describe the potential consequences of illegible, incomplete, or inaccurate documentation.
  - 27.07 Describe the special considerations concerning patient refusal of transport.
  - 27.08 Explain how to properly record direct patient or bystander comments.
  - 27.09 Describe the special considerations concerning mass casualty incident documentation.
  - 27.10 Identify and record the pertinent, reportable clinical data of each patient interaction.
  - 27.11 Note and record pertinent negative clinical findings.
  - 27.12 Demonstrate proper completion of an EMS event record used locally.
- 28.0 Integrate the principles of kinematics to enhance the patient assessment. – At the completion of this unit, the Paramedic student will be able to integrate the principles of kinematics to enhance the patient assessment and predict the likelihood of injuries based on the patient’s mechanism of injury. At the completion of this unit, the Paramedic student will be able to:
- 28.01 List and describe the components of a comprehensive trauma system.
  - 28.02 Describe the role of and differences between levels of trauma centers.
  - 28.03 Describe the criteria for transport to a trauma center.
  - 28.04 Describe the criteria and procedure for air medical transport.
  - 28.05 Define energy and force as they relate to trauma.
  - 28.06 Define laws of motion and energy and understand the role that increased speed has on injuries.
  - 28.07 Describe the pathophysiology of the head, spine, thorax, and abdomen that result from the above forces.
  - 28.08 List specific injuries and their causes as related to interior and exterior vehicle damage.
  - 28.09 Describe the kinematics of penetrating injuries.
- 29.0 Implement the proper treatment plan for a patient with shock or hemorrhage. – At the completion of this unit, the paramedic student will be able to integrate pathophysiological principles and assessment findings to formulate a field impression and implement the treatment plan for the patient with shock or hemorrhage. At the completion of this unit, the paramedic student will be able to:
- 29.01 Describe the epidemiology, including the morbidity/ mortality and prevention strategies, for shock and hemorrhage.
  - 29.02 Discuss the anatomy and physiology of the cardiovascular system.
  - 29.03 Discuss the various types and degrees of shock and hemorrhage.
  - 29.04 Discuss the pathophysiology of hemorrhage and shock.
  - 29.05 Discuss the assessment findings associated with hemorrhage and shock.
  - 29.06 Discuss the treatment plan and management of hemorrhage and shock.
  - 29.07 Discuss the management of external hemorrhage.
  - 29.08 Differentiate between the administration rate and amount of IV fluid in a patient with controlled versus uncontrolled hemorrhage.

- 29.09 Relate internal hemorrhage to the assessment findings of compensated and decompensated hemorrhagic shock.
  - 29.10 Discuss the management of internal hemorrhage.
  - 29.11 Describe the effects of decreased perfusion at the capillary level.
  - 29.12 Relate pulse pressure changes to perfusion status.
  - 29.13 Relate orthostatic vital sign changes to perfusion status.
  - 29.14 Define compensated and decompensated hemorrhagic shock.
  - 29.15 Differentiate between compensated and decompensated shock.
  - 29.16 Differentiate between the normotensive, hypotensive, or profoundly hypotensive patient.
  - 29.17 Differentiate between the administration of fluid in the normotensive, hypotensive, or profoundly hypotensive patient.
  - 29.18 Develop, execute and evaluate a treatment plan based on the field impression for the hemorrhage or shock patient.
- 30.0 Implement the proper treatment plan for a patient with soft tissue trauma. – At the completion of this unit, the paramedic student will be able to integrate pathophysiological principles and the assessment findings to formulate a field impression and implement the treatment plan for the patient with soft tissue trauma. At the completion of this unit, the paramedic student will be able to:
- 30.01 Identify the major functions of the integumentary system.
  - 30.02 Discuss the pathophysiology of soft tissue injuries.
  - 30.03 Differentiate between the following types of closed soft tissue injuries: contusions, hematoma and crush injuries.
  - 30.04 Discuss the assessment findings associated with closed soft tissue injuries.
  - 30.05 Discuss the management of a patient with closed soft tissue injuries.
  - 30.06 Differentiate between the following types of open soft tissue injuries: abrasions, lacerations, major arterial lacerations, avulsions, impaled objects, amputations, incisions, crush injuries, blast injuries, and penetrations/punctures.
  - 30.07 Discuss the incidence, morbidity, and mortality of blast injuries.
  - 30.08 Predict blast injuries based on mechanism of injury, including primary, secondary and tertiary.
  - 30.09 Discuss types of trauma, including but not limited to blunt, penetrating, barotrauma and bur
  - 30.10 Discuss the effects of an explosion within an enclosed space on a patient.
  - 30.11 Discuss the assessment findings associated with blast injuries.
  - 30.12 Discuss the management of a patient with a blast injury.
  - 30.13 Discuss the incidence, morbidity, and mortality of crush injuries.
  - 30.14 Define crush injury, crush syndrome and compartment syndrome.
  - 30.15 Discuss the management of a patient with a crush injury.
  - 30.16 Discuss the pathophysiology of hemorrhage associated with soft tissue injuries, including capillary, venous and arterial.
  - 30.17 Discuss the assessment findings associated with open soft tissue injuries.
  - 30.18 Differentiate between the various management techniques for hemorrhage control of open soft tissue injuries, including but not limited to: direct pressure, elevation, pressure dressing, pressure point and tourniquet application.
  - 30.19 Integrate pathophysiological principles to the assessment of a patient with a soft tissue injury.

- 30.20 Formulate treatment priorities for patients with soft tissue injuries in conjunction with airway/face/neck trauma, thoracic trauma (open/closed), and abdominal trauma.
  - 30.21 Develop, execute, and evaluate a treatment plan based on the field impression for the patient with soft tissue trauma.
  - 30.22 Defend the rationale explaining why immediate life-threats must take priority over wound closure.
  - 30.23 Defend the management regimens for various soft tissue injuries.
- 31.0 Implement the proper treatment plan for a patient with burn injuries. – At the completion of this unit, the paramedic student will be able to integrate pathophysiological principles and the assessment findings to formulate a field impression and implement the management plan for the patient with a burn injury. At the completion of this unit, the paramedic student will be able to:
- 31.01 Describe the epidemiology, including incidence, mortality/ morbidity, risk factors, and prevention strategies for the patient with a burn injury.
  - 31.02 Describe the pathophysiologic complications and systemic complications of a burn injury.
  - 31.03 Identify and describe types of burn injuries, including a thermal burn, an inhalation burn, a chemical burn, an electrical burn, and a radiation exposure.
  - 31.04 Identify and describe the depth classifications of burn injuries, including a superficial burn, a partial-thickness burn, a full-thickness burn, and other depth classifications described by local protocol.
  - 31.05 Identify and describe methods for determining body surface area percentage of a burn injury including the "rules of nines," the "rules of palms," and other methods described by local protocol.
  - 31.06 Identify and describe the severity of a burn including a minor burn, a moderate burn, a severe burn, and other severity classifications described by local protocol.
  - 31.07 Describe special considerations for a pediatric patient with a burn injury.
  - 31.08 Discuss conditions associated with burn injuries, including trauma, blast injuries, airway compromise, respiratory compromise, and child abuse.
  - 31.09 Describe the management of a burn injury, including airway and ventilation, circulation, pharmacological, non-pharmacological, transport considerations, psychological support/ communication strategies, and other management described by local protocol.
  - 31.10 Describe the pathophysiology of a thermal burn injury.
  - 31.11 Identify and describe the depth classifications of a thermal burn injury.
  - 31.12 Describe the pathophysiology of an inhalation burn injury.
  - 31.13 Describe considerations which impact management and prognosis of the patient with an inhalation burn injury.
  - 31.14 Describe the management of an inhalation burn injury, including airway and ventilation, circulation, pharmacological, non-pharmacological, transport considerations, and psychological support/ communication strategies.
  - 31.15 Describe the pathophysiology of a chemical burn injury, including types of chemicals and their burning processes and a chemical burn injury to the eye.
  - 31.16 Describe the management of a chemical burn injury and a chemical burn injury to the eye, including airway and ventilation, circulation, pharmacological, non-pharmacological, transport considerations, and psychological support/ communication strategies.

- 31.17 Identify and describe the severity of an electrical burn injury.
  - 31.18 Discuss mechanisms of burn injury and conditions associated with an electrical burn injury.
  - 31.19 Describe the management of an electrical burn injury, including airway and ventilation, circulation, pharmacological, non-pharmacological, transport considerations, and psychological support/ communication strategies.
  - 31.20 Describe the pathophysiology of a radiation exposure, including the types and characteristics of ionizing radiation.
  - 31.21 Identify and describe the severity of a radiation exposure.
  - 31.22 Describe the management of a radiation exposure, including airway and ventilation, circulation, pharmacological, non-pharmacological, transport considerations, and psychological support/ communication strategies.
  - 31.23 Develop, execute and evaluate a management plan based on the field impression for the patient with thermal, inhalation, chemical, electrical, and radiation burn injuries.
  - 31.24 Perform management of a thermal burn injury, including airway and ventilation, circulation, pharmacological, non-pharmacological, transport considerations, psychological support/ communication strategies, and other management described by local protocol.
  - 31.25 Perform management of an inhalation burn injury, including airway and ventilation, circulation, pharmacological, non-pharmacological, transport considerations, psychological support/ communication strategies, and other management described by local protocol.
  - 31.26 Perform management of a chemical burn injury, including airway and ventilation, circulation, pharmacological, non-pharmacological, transport considerations, psychological support/ communication strategies, and other management described by local protocol.
  - 31.27 Perform management of an electrical burn injury, including airway and ventilation, circulation, pharmacological, non-pharmacological, transport considerations, psychological support/ communication strategies, and other management described by local protocol.
  - 31.28 Perform management of a radiation exposure, including airway and ventilation, circulation, pharmacological, non-pharmacological, transport considerations, psychological support/ communication strategies, and other management described by local protocol.
- 32.0 Implement the proper treatment plan for a trauma patient with a head injury. – At the completion of this unit, the paramedic student will be able to integrate pathophysiological principles and the assessment findings to formulate a field impression and implement a treatment plan for the trauma patient with a suspected head injury. At the completion of this unit, the paramedic student will be able to:
- 32.01 Differentiate between facial injuries based on the assessment and history.
  - 32.02 Develop a patient management plan for a patient with a facial injury based on the field impression.
  - 32.03 Relate assessment findings associated with eye injuries to pathophysiology.
  - 32.04 Develop a patient management plan for a patient with an eye injury based on the field impression.
  - 32.05 Formulate a field impression for a patient with an ear injury based on the assessment findings.

- 32.06 Develop a patient management plan for a patient with an ear injury based on the field impression.
  - 32.07 Formulate a field impression for a patient with a nose injury based on the assessment findings.
  - 32.08 Develop a patient management plan for a patient with a nose injury based on the field impression.
  - 32.09 Formulate a field impression for a patient with a throat injury based on the assessment findings.
  - 32.10 Develop a patient management plan for a patient with a throat injury based on the field impression.
  - 32.11 Formulate a field impression for a patient with a mouth injury based on the assessment findings.
  - 32.12 Develop a patient management plan for a patient with a mouth injury based on the field impression.
  - 32.13 Distinguish between head injury and brain injury.
  - 32.14 Define and explain the process involved with each of the levels of increasing ICP.
  - 32.15 Identify the need for rapid intervention and transport of the patient with a head/brain injury.
  - 32.16 Describe and explain the general management of the head/ brain injury patient, including pharmacological and non-pharmacological treatment.
  - 32.17 Explain the pathophysiology of skull fracture.
  - 32.18 Develop a management plan for a patient with a skull fracture.
  - 32.19 Develop a management plan for a patient with a cerebral contusion.
  - 32.20 Explain the pathophysiology of intracranial hemorrhage, including epidural, subdural, intracerebral, and subarachnoid.
  - 32.21 Develop a management plan for a patient with an intracranial hemorrhage, including epidural, subdural, intracerebral and subarachnoid.
- 33.0 Implement the proper treatment plan for a patient with a suspected spinal injury. – At the completion of this unit, the paramedic student will be able to integrate pathophysiological principles and the assessment findings to formulate a field impression and implement a treatment plan for the patient with a suspected spinal injury. At the completion of this unit, the paramedic student will be able to:
- 33.01 Describe the pathophysiology of spinal injuries.
  - 33.02 Describe the assessment findings associated with spinal injuries.
  - 33.03 Describe the management of spinal injuries.
  - 33.04 Develop a patient management plan based on the field impression.
  - 33.05 Describe the pathophysiology of traumatic spinal injury related to spinal shock, spinal neurogenic shock, quadriplegia/paraplegia, and incomplete cord injury/cord syndromes, including central cord syndrome, anterior cord syndrome and Brown-Sequard syndrome.
  - 33.06 Describe the assessment findings associated with traumatic spinal injuries.
  - 33.07 Describe the management of traumatic spinal injuries.
  - 33.08 Differentiate between traumatic and non-traumatic spinal injuries based on the assessment and history.
  - 33.09 Develop a patient management plan for traumatic spinal injury based on the field impression.
  - 33.10 Describe the pathophysiology of non-traumatic spinal injury, including but not limited to, low back pain, herniated intervertebral disk and spinal cord tumors.
  - 33.11 Describe the management of non-traumatic spinal injuries.

- 33.12 Differentiate between traumatic and non-traumatic spinal injuries based on the assessment and history.
  - 33.13 Develop a patient management plan for non-traumatic spinal injury based on the field impression.
  - 33.14 Demonstrate a clinical assessment to determine the proper management modality for a patient with a suspected traumatic spinal injury.
  - 33.15 Demonstrate a clinical assessment to determine the proper management modality for a patient with a suspected non-traumatic spinal injury.
  - 33.16 Demonstrate immobilization of the urgent and non-urgent patient with assessment findings of spinal injury from the following presentations: Supine, Prone, Semi-prone, Sitting, Standing
  - 33.17 Demonstrate preferred methods for stabilization of a helmet from a potentially spine injured patient.
  - 33.18 Demonstrate helmet removal techniques.
- 34.0 Implement the proper treatment plan for a patient with a suspected thoracic injury. – At the completion of this unit, the paramedic student will be able to integrate pathophysiological principles and the assessment findings to formulate a field impression and implement a treatment plan for a patient with a thoracic injury. At the completion of this unit, the paramedic student will be able to:
- 34.01 Discuss the anatomy and physiology of the organs and structures related to thoracic injuries.
  - 34.02 Discuss the pathophysiology of thoracic injuries.
  - 34.03 Discuss the management of thoracic injuries.
  - 34.04 Identify the need for rapid intervention and transport of the patient with thoracic injuries.
  - 34.05 Discuss the pathophysiology of specific chest wall injuries, including rib fracture, flail segment, and sternal fracture.
  - 34.06 Identify the need for rapid intervention and transport of the patient with chest wall injuries.
  - 34.07 Discuss the management of chest wall injuries.
  - 34.08 Discuss the pathophysiology of injury to the lung, including but not limited to simple, open and tension pneumothorax, hemothorax, hemopneumothorax, and pulmonary contusion.
  - 34.09 Discuss the management of lung injuries.
  - 34.10 Discuss the pathophysiology of myocardial injuries, including but not limited to pericardial tamponade, myocardial contusion and myocardial rupture.
  - 34.11 Discuss the management of myocardial injuries.
  - 34.12 Discuss the pathophysiology of vascular injuries, including injuries to the aorta, vena cava, and pulmonary arteries and veins.
  - 34.13 Discuss the management of vascular injuries.
  - 34.14 Discuss the pathophysiology of tracheo-bronchial injuries.
  - 34.15 Discuss the management of tracheo-bronchial injuries.
  - 34.16 Discuss the pathophysiology of traumatic asphyxia.
  - 34.17 Discuss the assessment findings associated with traumatic asphyxia.
  - 34.18 Discuss the management of traumatic asphyxia.
  - 34.19 Demonstrate a clinical assessment for a patient with suspected thoracic trauma.
  - 34.20 Demonstrate the following techniques of management for thoracic injuries: Needle decompression, Fracture stabilization, Elective intubation, ECG monitoring Oxygenation and ventilation

- 35.0 Implement the proper treatment plan for a patient with a suspected abdominal trauma. – At the completion of this unit, the paramedic student will be able to integrate pathophysiologic principles and the assessment findings to formulate a field impression and implement the treatment plan for the patient with suspected abdominal trauma. At the completion of this unit, the paramedic student will be able to:
- 35.01 Describe the anatomy and physiology of organs and structures related to abdominal injuries.
  - 35.02 Describe open and closed abdominal injuries.
  - 35.03 Explain the pathophysiology of abdominal injuries.
  - 35.04 Describe the management of abdominal injuries.
  - 35.05 Describe the assessment findings associated with solid organ injuries.
  - 35.06 Describe the treatment plan and management of solid organ injuries.
  - 35.07 Describe the assessment findings associated with hollow organ injuries.
  - 35.08 Describe the treatment plan and management of hollow organ injuries.
  - 35.09 Describe the assessment findings associated with pelvic fractures.
  - 35.10 Describe the treatment plan and management of pelvic fractures.
  - 35.11 Develop a patient management plan for a patient with abdominal injuries, based upon field impression.
- 36.0 Implement the proper treatment plan for a patient with a suspected musculoskeletal injury. – At the completion of this unit, the paramedic student will be able to integrate pathophysiological principles and the assessment findings to formulate a field impression and implement the treatment plan for the patient with a musculoskeletal injury. At the completion of this unit, the paramedic student will be able to:
- 36.01 Discuss the anatomy and physiology of the musculoskeletal system.
  - 36.02 Discuss types of musculoskeletal injuries, including fracture (open and closed), dislocation/fracture, sprain, and strain.
  - 36.03 Discuss the pathophysiology of musculoskeletal injuries.
  - 36.04 Discuss the assessment findings associated with musculoskeletal injuries.
  - 36.05 Discuss the management of musculoskeletal injuries.
  - 36.06 Discuss the general guidelines for splinting.
  - 36.07 Discuss the pathophysiology of open and closed fractures.
  - 36.08 Discuss the assessment findings associated with fractures.
  - 36.09 Discuss the management of fractures.
  - 36.10 Discuss the pathophysiology of dislocations.
  - 36.11 Discuss the out-of-hospital management of dislocation/fractures, including splinting and realignment.
  - 36.12 Explain the importance of manipulating a knee dislocation/fracture with an absent distal pulse.
  - 36.13 Discuss the assessment findings of sprains.
  - 36.14 Discuss the management of sprains.
  - 36.15 Discuss the management of strains.
  - 36.16 Discuss the management of a tendon injury.
  - 36.17 Develop a patient management plan for the musculoskeletal injury based on the field impression.
  - 36.18 Demonstrate a clinical assessment to determine the proper treatment plan for a patient with a suspected musculoskeletal injury.

- 36.19 Demonstrate the proper use of fixation, soft and traction splints for a patient with a suspected fracture.
- 37.0 Implement the proper treatment plan for a patient with suspected respiratory problems. – At the completion of this unit, the paramedic student will be able to integrate pathophysiological principles and assessment findings to formulate a field impression and implement the treatment plan for the patient with respiratory problems. At the completion of this unit, the paramedic student will be able to:
- 37.01 Identify and describe the function of the structures located in the upper and lower airway.
  - 37.02 Discuss the physiology of ventilation and respiration.
  - 37.03 Discuss abnormal assessment findings associated with pulmonary diseases and conditions.
  - 37.04 Compare various airway and ventilation techniques used in the management of pulmonary diseases.
  - 37.05 Review the pharmacological preparations that paramedics use for management of respiratory diseases and conditions.
  - 37.06 Review the use of equipment used during the physical examination of patients with complaints associated with respiratory diseases and conditions.
  - 37.07 Identify the epidemiology, anatomy, physiology, pathophysiology, assessment findings, and management for, but not limited to the following: adult respiratory distress syndrome, chronic bronchitis, bronchial asthma, emphysema, pneumonia, pulmonary edema, pulmonary thromboembolism, neoplasms of the lung, upper respiratory infections, spontaneous pneumothorax and hyperventilation syndrome.
  - 37.08 Demonstrate proper use of airway and ventilation devices.
  - 37.09 Conduct a history and patient assessment for patients with pulmonary diseases and conditions.
- 38.0 Implement the proper treatment plan for a patient with suspected cardiovascular disease. – At the completion of this unit, the paramedic student will be able to integrate pathophysiological principles and assessment findings to formulate a field impression and implement the treatment plan for the patient with cardiovascular disease. At the completion of this unit, the paramedic student will be able to:
- 38.01 Identify the risk factors most predisposing to coronary artery disease.
  - 38.02 Describe the anatomy of the heart, including the position in the thoracic cavity, layers of the heart, chambers of the heart, and location and function of cardiac valves.
  - 38.03 Identify the major structures of the vascular system.
  - 38.04 Identify and define the components of cardiac output.
  - 38.05 Identify phases of the cardiac cycle.
  - 38.06 Identify the structure and course of all divisions and subdivisions of the cardiac conduction system.
  - 38.07 Identify and describe how the heart's pacemaking control, rate, and rhythm are determined.
  - 38.08 Describe the clinical significance of Starling's law.
  - 38.09 Identify the structures of the autonomic nervous system (ANS).
  - 38.10 Identify the effect of the ANS on heart rate, rhythm and contractility.

- 38.11 Identify and describe the components of the focused history as it relates to the patient with cardiovascular compromise.
- 38.12 Explain the purpose of ECG monitoring.
- 38.13 Correlate the electrophysiological and hemodynamic events occurring throughout the entire cardiac cycle with the various ECG wave forms, segments and intervals.
- 38.14 Given an ECG, identify the arrhythmia.
- 38.15 Describe a systematic approach to the analysis and interpretation of cardiac arrhythmias.
- 38.16 Describe the arrhythmias originating in the sinus node, the AV junction, the atria, and the ventricles.
- 38.17 Describe the arrhythmias originating or sustained in the AV junction.
- 38.18 Describe the abnormalities originating within the bundle branch system.
- 38.19 Describe the conditions of pulseless electrical activity.
- 38.20 Recognize the changes on the ECG that may reflect evidence of myocardial ischemia and injury.
- 38.21 Identify the major therapeutic objectives in the treatment of the patient with any arrhythmia.
- 38.22 Identify the clinical indications for transcutaneous and permanent artificial cardiac pacing.
- 38.23 Describe the techniques of applying a transcutaneous pacing system.
- 38.24 List the possible complications of pacing.
- 38.25 Describe the epidemiology, morbidity and mortality, and pathophysiology of angina pectoris.
- 38.26 List other clinical conditions that may mimic signs and symptoms of coronary artery disease and angina pectoris.
- 38.27 Identify the paramedic responsibilities associated with management of the patient with angina pectoris.
- 38.28 Describe the epidemiology, morbidity and mortality of myocardial infarction.
- 38.29 List and describe the assessment parameters to be evaluated in a patient with a suspected myocardial infarction.
- 38.30 List the characteristics of a patient eligible for thrombolytic therapy.
- 38.31 Describe the most commonly used cardiac drugs in terms of therapeutic effect and dosages, routes of administration, side effects and toxic effects.
- 38.32 Define the term "acute pulmonary edema" and describe its relationship to left ventricular failure.
- 38.33 Define preload, afterload and left ventricular end-diastolic pressure and relate each to the pathophysiology of heart failure.
- 38.34 Differentiate between early and late signs and symptoms of left ventricular failure and those of right ventricular failure.
- 38.35 Explain the clinical significance of paroxysmal nocturnal dyspnea.
- 38.36 List the interventions prescribed for the patient in acute congestive heart failure.
- 38.37 Describe the most commonly used pharmacological agents in the management of congestive heart failure in terms of therapeutic effect, dosages, routes of administration, side effects and toxic effects.
- 38.38 Define the term "cardiac tamponade".
- 38.39 Identify the paramedic responsibilities associated with management of a patient with cardiac tamponade.
- 38.40 Define the term "hypertensive emergency".
- 38.41 Describe the clinical features of the patient in a hypertensive emergency.

- 38.42 Identify the drugs of choice for hypertensive emergencies, rationale for use, clinical precautions and disadvantages of selected antihypertensive agents.
  - 38.43 Define the term "cardiogenic shock".
  - 38.44 Describe the most commonly used pharmacological agents in the management of cardiogenic shock in terms of therapeutic effects, dosages, routes of administration, side effects and toxic effects.
  - 38.45 Define the term "cardiac arrest".
  - 38.46 Describe the arrhythmias seen in cardiac arrest.
  - 38.47 Define the terms defibrillation and synchronized cardioversion.
  - 38.48 Describe the most commonly used pharmacological agents in the management of cardiac arrest in terms of therapeutic effects.
  - 38.49 Identify the major factors involved in the pathophysiology of aortic aneurysm. myocardial infarction patient
  - 38.50 Recognize and describe the signs and symptoms of dissecting thoracic or abdominal aneurysm.
  - 38.51 Differentiate between signs and symptoms of cardiac tamponade, hypertensive emergencies, cardiogenic shock, and cardiac arrest.
  - 38.52 Develop, execute, and evaluate a treatment plan based on field impression for the patient in need of a pacemaker.
  - 38.53 Develop, execute and evaluate a treatment plan based on the field impression for the patient with chest pain.
  - 38.54 Develop, execute and evaluate a treatment plan based on the field impression for the suspected myocardial infarction patient.
  - 38.55 Develop, execute, and evaluate a treatment plan based on the field impression for the heart failure patient.
  - 38.56 Develop, execute and evaluate a treatment plan based on the field impression for the patient with cardiac tamponade.
  - 38.57 Develop, execute and evaluate a treatment plan based on the field impression for the patient with a hypertensive emergency.
  - 38.58 Develop, execute, and evaluate a treatment plan based on the field impression for the patient with cardiogenic shock.
  - 38.59 Demonstrate a working knowledge of various ECG lead systems.
  - 38.60 Set up and apply a transcutaneous pacing system.
  - 38.61 Demonstrate satisfactory performance of psychomotor skills of basic and advanced life support techniques according to the current American Heart Association Standards and Guidelines, including: cardiopulmonary resuscitation, defibrillation, synchronized cardioversion, and transcutaneous pacing.
  - 38.62 Complete a communication patch with medical direction and law enforcement used for termination of resuscitation efforts.
- 39.0 Implement the proper treatment plan for a patient with a suspected neurologic problem.  
– At the completion of this unit, the paramedic student will be able to integrate pathophysiological principles and assessment findings to formulate a field impression and implement the treatment plan for the patient with a neurological problem. At the completion of this unit, the paramedic student will be able to:
- 39.01 Identify the risk factors most predisposing to the nervous system.
  - 39.02 Discuss the anatomy and physiology of the organs and structures related to nervous system.
  - 39.03 Discuss the assessment findings associated with non-traumatic neurologic emergencies.

- 39.04 Discuss the management of non-traumatic neurological emergencies.
  - 39.05 Discuss the pathophysiology of coma and altered mental status.
  - 39.06 Discuss the management/treatment plan of coma and altered mental status.
  - 39.07 Describe and differentiate the major types of seizures.
  - 39.08 Discuss the assessment findings associated with syncope.
  - 39.09 Discuss the management/treatment plan of syncope.
  - 39.10 Describe the types of stroke and intracranial hemorrhage.
  - 39.11 Discuss the assessment findings associated with stroke and intracranial hemorrhage.
  - 39.12 Discuss the management/treatment plan of stroke and intracranial hemorrhage.
  - 39.13 Discuss the assessment findings associated with transient ischemic attack.
  - 39.14 Discuss the management/treatment plan of transient ischemic attack.
  - 39.15 Discuss the assessment findings associated with degenerative neurological diseases.
  - 39.16 Discuss the management/treatment plan of degenerative neurological diseases.
  - 39.17 Differentiate among the various treatment and pharmacological interventions used in the management of degenerative neurological diseases.
  - 39.18 Perform an appropriate assessment of a patient with coma or altered mental status.
  - 39.19 Perform a complete neurological examination as part of the comprehensive physical examination of a patient with coma or altered mental status.
  - 39.20 Appropriately manage a patient with coma or altered mental status, including the administration of oxygen, oral glucose, 50% dextrose and narcotic reversal agents.
  - 39.21 Perform an appropriate assessment of a patient with syncope.
  - 39.22 Appropriately manage a patient with syncope.
  - 39.23 Appropriately manage a patient with seizures, including the administration of diazepam or lorazepam.
  - 39.24 Perform an appropriate assessment of a patient with stroke and intracranial hemorrhage or TIA.
  - 39.25 Appropriately manage a patient with stroke and intracranial hemorrhage or TIA.
- 40.0 Implement the proper treatment plan for a patient with a suspected endocrine problem. – At the completion of this unit, the paramedic student will be able to integrate pathophysiological principles and assessment findings to formulate a field impression and implement a treatment plan for the patient with an endocrine problem. At the completion of this unit, the paramedic student will be able to:
- 40.01 Identify the risk factors most predisposing to endocrinologic disease.
  - 40.02 Discuss the anatomy and physiology of organs and structures related to endocrinologic diseases.
  - 40.03 Discuss the general assessment findings associated with endocrinologic emergencies.
  - 40.04 Discuss the management of endocrinologic emergencies.
  - 40.05 Discuss the management of diabetic emergencies.
  - 40.06 Differentiate between the pathophysiology of normal glucose metabolism and diabetic glucose metabolism.
  - 40.07 Describe the mechanism of ketone body formation and its relationship to ketoacidosis.
  - 40.08 Recognize the signs and symptoms of the patient with hypoglycemia.

- 40.09 Describe the compensatory mechanisms utilized by the body to promote homeostasis relative to hypoglycemia.
  - 40.10 Describe the management of a responsive hypoglycemic patient.
  - 40.11 Correlate abnormal findings in assessment with clinical significance in the patient with hypoglycemia.
  - 40.12 Recognize the signs and symptoms of the patient with hyperglycemia.
  - 40.13 Describe the management of hyperglycemia.
  - 40.14 Discuss the pathophysiology of diabetic ketoacidosis.
  - 40.15 Recognize the signs and symptoms of the patient with diabetic ketoacidosis.
  - 40.16 Describe the management of diabetic ketoacidosis.
  - 40.17 Discuss the pathophysiology of Cushing's syndrome.
  - 40.18 Recognize signs and symptoms of the patient with Cushing's syndrome.
  - 40.19 Describe the management of Cushing's syndrome.
  - 40.20 Discuss the pathophysiology of adrenal Insufficiency.
  - 40.21 Recognize signs and symptoms of the patient with adrenal insufficiency.
  - 40.22 Describe the management of adrenal insufficiency.
  - 40.23 Develop a patient management plan based on field impression in the patient with an endocrinologic emergency.
- 41.0 Implement the proper treatment plan for a patient with a suspected allergic or anaphylactic reaction. – At the completion of this unit, the paramedic student will be able to integrate pathophysiological principles and assessment findings to formulate a field impression and implement a treatment plan for the patient with an allergic or anaphylactic reaction. At the completion of this unit, the paramedic student will be able to:
- 41.01 Define allergic reaction.
  - 41.02 Define anaphylaxis.
  - 41.03 Discuss the anatomy and physiology of the organs and structures related to anaphylaxis.
  - 41.04 Describe the prevention of anaphylaxis and appropriate patient education.
  - 41.05 Discuss the pathophysiology of allergy and anaphylaxis.
  - 41.06 Describe the common methods of entry of substances into the body.
  - 41.07 Define antigens and antibodies.
  - 41.08 List common antigens most frequently associated with anaphylaxis.
  - 41.09 Describe physical manifestations in anaphylaxis.
  - 41.10 Differentiate manifestations of an allergic reaction from anaphylaxis.
  - 41.11 Recognize the signs and symptoms related to anaphylaxis.
  - 41.12 Differentiate among the various treatment and pharmacological interventions used in the management of anaphylaxis.
  - 41.13 Develop a treatment plan based on field impression in the patient with allergic reaction and anaphylaxis.
- 42.0 Implement the proper treatment plan for a patient with a suspected gastroenterologic problem. – At the completion of this unit, the paramedic student will be able to integrate pathophysiological principles and assessment findings to formulate a field impression and implement the treatment plan for the patient with a gastroenterologic problem. At the conclusion of this unit, the paramedic student will be able to:
- 42.01 Discuss the anatomy and physiology of the organs and structures related to gastrointestinal diseases.

- 42.02 Discuss the pathophysiology of inflammation and its relationship to acute abdominal pain.
  - 42.03 Differentiate between hemorrhagic and non-hemorrhagic abdominal pain.
  - 42.04 Discuss the signs and symptoms of peritoneal inflammation relative to acute abdominal pain.
  - 42.05 Describe the questioning technique and specific questions the paramedic should ask when gathering a focused history in a patient with abdominal pain.
  - 42.06 Describe the technique for performing a comprehensive physical examination on a patient complaining of abdominal pain.
  - 42.07 Define upper gastrointestinal bleeding.
  - 42.08 Recognize the signs and symptoms related to upper gastrointestinal bleeding.
  - 42.09 Describe the management for upper gastrointestinal bleeding.
  - 42.10 Recognize the signs and symptoms related to lower gastrointestinal bleeding.
  - 42.11 Describe the management for lower gastrointestinal bleeding.
  - 42.12 Define acute gastroenteritis.
  - 42.13 Recognize the signs and symptoms related to acute gastroenteritis.
  - 42.14 Describe the management for acute gastroenteritis.
  - 42.15 Recognize the signs and symptoms related to colitis.
  - 42.16 Describe the management for colitis.
  - 42.17 Recognize the signs and symptoms related to gastroenteritis.
  - 42.18 Describe the management for gastroenteritis.
  - 42.19 Recognize the signs and symptoms related to diverticulitis.
  - 42.20 Describe the management for diverticulitis.
  - 42.21 Recognize the signs and symptoms related to appendicitis.
  - 42.22 Describe the management for appendicitis.
  - 42.23 Recognize the signs and symptoms related to peptic ulcer disease.
  - 42.24 Describe the management for peptic ulcer disease.
  - 42.25 Recognize the signs and symptoms related to bowel obstruction.
  - 42.26 Describe the management for bowel obstruction.
  - 42.27 Recognize the signs and symptoms related to Crohn's disease.
  - 42.28 Describe the management for Crohn's disease.
  - 42.29 Recognize the signs and symptoms related to pancreatitis.
  - 42.30 Describe the management for pancreatitis.
  - 42.31 Recognize the signs and symptoms related to esophageal varices.
  - 42.32 Describe the management for esophageal varices.
  - 42.33 Recognize the signs and symptoms related to hemorrhoids.
  - 42.34 Describe the management for hemorrhoids.
  - 42.35 Recognize the signs and symptoms related to cholecystitis.
  - 42.36 Describe the management for cholecystitis.
  - 42.37 Recognize the signs and symptoms related to acute hepatitis.
  - 42.38 Describe the management for acute hepatitis.
  - 42.39 Differentiate between gastrointestinal emergencies based on assessment findings.
  - 42.40 Correlate abnormal findings in the assessment with the clinical significance in the patient with abdominal pain.
  - 42.41 Develop a patient management plan based on field impression in the patient with abdominal pain.
- 43.0 Implement the proper treatment plan for a patient with a suspected renal or urologic problem. – At the completion of this unit, the paramedic student will be able to integrate pathophysiological principles and the assessment findings to formulate a field

impression and implement a treatment plan for the patient with a renal or urologic problem. At the conclusion of this unit, the paramedic student will be able to:

- 43.01 Describe the incidence, morbidity, mortality, and risk factors predisposing to urological emergencies.
  - 43.02 Discuss the anatomy and physiology of the organs and structures related to urogenital diseases.
  - 43.03 Define referred pain and visceral pain as it relates to urology.
  - 43.04 Describe the technique for performing a comprehensive physical examination of a patient complaining of abdominal pain.
  - 43.05 Discuss the pathophysiology of acute renal failure.
  - 43.06 Recognize the signs and symptoms related to acute renal failure.
  - 43.07 Describe the management for acute renal failure.
  - 43.08 Define chronic renal failure.
  - 43.09 Define renal dialysis.
  - 43.10 Discuss the common complication of renal dialysis.
  - 43.11 Discuss the pathophysiology of renal calculi.
  - 43.12 Recognize the signs and symptoms related to renal calculi.
  - 43.13 Describe the management for renal calculi.
  - 43.14 Discuss the pathophysiology of urinary tract infection.
  - 43.15 Recognize the signs and symptoms related to urinary tract infection.
  - 43.16 Describe the management for a urinary tract infection.
  - 43.17 Apply the epidemiology to develop prevention strategies for urological emergencies.
  - 43.18 Integrate pathophysiological principles to the assessment of a patient with abdominal pain.
  - 43.19 Synthesize assessment findings and patient history information to accurately differentiate between pain of a urogenital emergency and that of other origins.
  - 43.20 Develop, execute, and evaluate a treatment plan based on the field impression made in the assessment.
- 44.0 Implement the proper treatment plan for a patient with a suspected toxic exposure. – At the completion of this unit, the paramedic student will be able to integrate pathophysiological principles and assessment findings to formulate a field impression and implement a treatment plan for the patient with a toxic exposure. At the completion of this unit, the paramedic student will be able to:
- 44.01 Describe the incidence, morbidity and mortality of toxic emergencies.
  - 44.02 Identify the risk factors most predisposing to toxic emergencies.
  - 44.03 Describe the routes of entry of toxic substances into the body.
  - 44.04 Discuss the role of the Poison Control Center in the United States.
  - 44.05 Discuss the assessment findings associated with various toxidromes.
  - 44.06 Discuss the management of toxic substances.
  - 44.07 List the most common poisonings by ingestion.
  - 44.08 Recognize the signs and symptoms related to the most common poisonings by ingestion.
  - 44.09 Differentiate among the various treatments and pharmacological interventions in the management of the most common poisonings by ingestion.
  - 44.10 Discuss the factors affecting the decision to induce vomiting in a patient with ingested poison.

- 44.11 Integrate pathophysiological principles and the assessment findings to formulate a field impression and implement a treatment plan for the patient with the most common poisonings by ingestion.
- 44.12 Define poisoning by inhalation.
- 44.13 List the most common poisonings by inhalation.
- 44.14 Describe the pathophysiology of poisoning by inhalation.
- 44.15 Recognize the signs and symptoms related to the most common poisonings by inhalation.
- 44.16 Integrate pathophysiological principles and the assessment findings to formulate a field impression and implement a treatment plan for the patient with the most common poisonings by inhalation.
- 44.17 Define poisoning by injection.
- 44.18 List the most common poisonings by injection.
- 44.19 Recognize the signs and symptoms related to the most common poisonings by injection.
- 44.20 Differentiate among the various treatments and pharmacological interventions in the management of the most common poisonings by injection.
- 44.21 Integrate pathophysiological principles and the assessment findings to formulate a field impression and implement a treatment plan for the patient with the most common poisonings by injection.
- 44.22 Define poisoning by surface absorption.
- 44.23 List the most common poisonings by surface absorption.
- 44.24 Describe the pathophysiology of poisoning by surface absorption.
- 44.25 Recognize the signs and symptoms related to the most common poisonings by surface absorption.
- 44.26 Differentiate among the various treatments and pharmacological interventions in the management of the most common poisonings by surface absorption.
- 44.27 Integrate pathophysiological principles and the assessment findings to formulate a field impression and implement a treatment plan for patients with the most common poisonings by surface absorption.
- 44.28 Define poisoning by overdose.
- 44.29 List the most common poisonings by overdose.
- 44.30 Describe the pathophysiology of poisoning by overdose.
- 44.31 Recognize the signs and symptoms related to the most common poisonings by overdose.
- 44.32 Integrate pathophysiological principles and the assessment findings to formulate a field impression and implement a treatment plan for patients with the most common poisonings by overdose.
- 44.33 Define drug abuse.
- 44.34 Define the following terms: Substance or drug abuse, Substance or drug dependence, Tolerance, Withdrawal, Addiction
- 44.35 List the most commonly abused drugs (both by chemical name and street names).
- 44.36 Describe the pathophysiology of commonly used drugs.
- 44.37 Recognize the signs and symptoms related to the most commonly abused drugs.
- 44.38 Integrate pathophysiological principles and the assessment findings to formulate a field impression and implement a treatment plan for patients using the most commonly abused drugs.
- 44.39 List the clinical uses, street names, pharmacology, assessment finding and management for patient who have taken the following drugs or been exposed to the following substances: Cocaine, marijuana and cannabis compounds,

Amphetamines and amphetamine-like drugs, Barbiturates, Sedative-hypnotics, Cyanide, Narcotics/opiates, cardiac medications, Caustics, common household substances, Drugs abused for sexual purposes/sexual gratification, Carbon monoxide, Alcohols, Hydrocarbons, Psychiatric medications, Newer anti-depressants and serotonin syndromes, Lithium, MAO inhibitors, Non-prescription pain medications, Nonsteroidal anti-inflammatory agents, Salicylates, Acetaminophen, Theophylline, Metals, Plants and mushrooms

- 44.40 Discuss common causative agents, pharmacology, assessment findings and management for a patient with food poisoning.
  - 44.41 Discuss common offending organisms, pharmacology, assessment findings and management for a patient with a bite or sting.
  - 44.42 Develop a patient management plan based on field impression in the patient exposed to a toxic substance.
- 45.0 Implement the proper treatment plan for a patient with a suspected hematopoietic patient. – At the completion of this unit, the paramedic student will be able to integrate the pathophysiological principles of the hematopoietic system to formulate a field impression and implement a treatment plan. At the completion to this unit, the paramedic student will be able to:
- 45.01 Identify the anatomy of the hematopoietic system.
  - 45.02 Describe volume and volume-control related to the hematopoietic system.
  - 45.03 Describe normal red blood cell (RBC) production, function and destruction.
  - 45.04 Explain the significance of the hematocrit with respect to red cell size and number.
  - 45.05 Explain the correlation of the RBC count, hematocrit and hemoglobin values.
  - 45.06 Define anemia.
  - 45.07 Describe normal white blood cell (WBC) production, function and destruction.
  - 45.08 Identify alterations in immunologic response.
  - 45.09 List the leukocyte disorders.
  - 45.10 Describe platelets with respect to normal function, life span and numbers.
  - 45.11 Describe the components of the hemostatic mechanism.
  - 45.12 Describe the function of coagulation factors, platelets and blood vessels necessary for normal coagulation.
  - 45.13 Identify blood groups.
  - 45.14 Identify the components of physical assessment as they relate to the hematologic system.
  - 45.15 Describe the pathology and clinical manifestations and prognosis associated with Anemia, Leukemia, Lymphomas, Polycythemia, Disseminated intravascular coagulopathy Hemophilia, Sickle cell disease, Multiple myeloma
  - 45.16 Integrate pathophysiological principles into the assessment of a patient with hematologic disease.
  - 45.17 Perform an assessment of the patient with hematologic disorder.
- 46.0 Implement the proper treatment plan for a patient with a suspected environmental problem. – At the completion of this unit, the paramedic student will be able to integrate pathophysiological principles and assessment findings to formulate a field impression and implement the treatment plan for the patient with an environmentally induced or exacerbated medical or traumatic condition. At the completion of this unit, the paramedic student will be able to:

- 46.01 Define "environmental emergency."
- 46.02 Identify environmental factors that may cause illness or exacerbate a preexisting illness.
- 46.03 Identify environmental factors that may complicate treatment or transport decisions.
- 46.04 List the principal types of environmental illnesses.
- 46.05 Describe several methods of temperature monitoring.
- 46.06 Identify the components of the body's thermoregulatory mechanism.
- 46.07 Describe the general process of thermal regulation, including substances used and wastes generated.
- 46.08 Describe the body's compensatory process for over heating.
- 46.09 Describe the body's compensatory process for excess heat loss.
- 46.10 List the common forms of heat and cold disorders.
- 46.11 Integrate the pathophysiological principles and complicating factors common to environmental emergencies and discuss differentiating features between emergent and urgent presentations.
- 46.12 Relate symptomatic findings to the commonly used terms: heat cramps, heat exhaustion, and heatstroke.
- 46.13 Describe the contribution of dehydration to the development of heat disorders.
- 46.14 Describe the differences between classical and exertional heatstroke.
- 46.15 Define fever and discuss its pathophysiologic mechanism.
- 46.16 Discuss the role of fluid therapy in the treatment of heat disorders.
- 46.17 Integrate the pathophysiological principles and the assessment findings to formulate a field impression and implement a treatment plan for the patient who has dehydration, heat exhaustion, or heatstroke.
- 46.18 Describe the pathophysiology of hypothermia.
- 46.19 Identify differences between mild and severe hypothermia.
- 46.20 Describe differences between chronic and acute hypothermia.
- 46.21 List signs and symptoms of hypothermia.
- 46.22 Integrate pathophysiological principles and the assessment findings to formulate a field impression and implement a treatment plan for the patient who has either mild or severe hypothermia.
- 46.23 Define frostbite.
- 46.24 Define superficial frostbite (frostnip).
- 46.25 Integrate pathophysiological principles and the assessment findings to formulate a field impression and implement a treatment plan for the patient with superficial or deep frostbite.
- 46.26 Define near-drowning.
- 46.27 List signs and symptoms of near-drowning.
- 46.28 Describe the lack of significance of fresh versus saltwater immersion, as it relates to near-drowning.
- 46.29 Discuss the incidence of "wet" versus "dry" drownings and the differences in their management.
- 46.30 Integrate pathophysiological principles and assessment findings to formulate a field impression and implement a treatment plan for the near-drowning patient.
- 46.31 Define self contained underwater breathing apparatus (SCUBA).
- 46.32 Describe the pathophysiology of diving emergencies.
- 46.33 Define decompression illness (DCI).
- 46.34 Identify the various conditions that may result from pulmonary over-pressure accidents.
- 46.35 List signs and symptoms of diving emergencies.

- 46.36 Describe the function of the Divers Alert Network (DAN) and how its members may aid in the management of diving related illnesses.
  - 46.37 Differentiate among the various treatments and interventions for the management of diving accidents.
  - 46.38 Describe the specific function and benefit of hyperbaric oxygen therapy for the management of diving accidents.
  - 46.39 Integrate pathophysiological principles and assessment findings to formulate a field impression and implement a management plan for the patient who has had a diving accident.
  - 46.40 Develop a patient management plan based on the field impression of the patient affected by an environmental emergency.
- 47.0 Implement the proper treatment plan for a patient with a suspected infectious and/or communicable disease. – At the completion of this unit, the paramedic student will be able to integrate pathophysiological principles and assessment findings to formulate a field impression and implement a management plan for the patient with infectious and communicable diseases. At the completion of this unit, the paramedic student will be able to:
- 47.01 Review the specific anatomy and physiology pertinent to infectious and communicable diseases.
  - 47.02 List and describe the steps of an infectious process.
  - 47.03 List and describe infectious agents, including bacteria, viruses, fungi, protozoans, and helminths (worms).
  - 47.04 Describe host defense mechanisms against infection.
  - 47.05 Describe characteristics of the immune system, including the categories of white blood cells, the reticuloendothelial system (RES), and the complement system.
  - 47.06 Describe and discuss the rationale for the various types of PPE.
  - 47.07 Describe the assessment of a patient suspected of, or identified as having, an infectious/communicable disease.
  - 47.08 Discuss the proper disposal of contaminated supplies (sharps, gauze sponges, tourniquets, etc.).
  - 47.09 Discuss disinfection of patient care equipment, and areas in which care of the patient occurred.
  - 47.10 Discuss the following relative to HIV - causative agent, body systems affected and potential secondary complications, modes of transmission, the seroconversion rate after direct significant exposure, susceptibility and resistance, signs and symptoms, specific patient management and personal protective measures, and immunization.
  - 47.11 Discuss Hepatitis A (infectious hepatitis), including the causative agent, body systems affected and potential secondary complications, routes of transmission, susceptibility and resistance, signs and symptoms, patient management and protective measures, and immunization.
  - 47.12 Discuss Hepatitis B (serum hepatitis), including the causative agent, the organ affected and potential secondary complications, routes of transmission, signs and symptoms, patient management and protective measures, and immunization.
  - 47.13 Discuss Hepatitis C, including the causative agent, the organ affected, routes of transmission, susceptibility and resistance, signs and symptoms, patient management and protective measures, and immunization and control measures.
  - 47.14 Discuss Hepatitis D (Hepatitis delta virus), including the causative agent, the organ affected, routes of transmission, susceptibility and resistance, signs and

- symptoms, patient management and protective measures, and immunization and control measures.
- 47.15 Discuss Hepatitis E, including the causative agent, the organ affected, routes of transmission, susceptibility and resistance, signs and symptoms, patient management and protective measures, and immunization and control measures.
  - 47.16 Discuss tuberculosis, including the causative agent, body systems affected and secondary complications, routes of transmission, susceptibility and resistance, signs and symptoms, patient management and protective measures, and immunization and control measures.
  - 47.17 Discuss meningococcal meningitis (spinal meningitis), including causative organisms, tissues affected, modes of transmission, susceptibility and resistance, signs and symptoms, patient management and protective measures, and immunization and control measures.
  - 47.18 Discuss pneumonia, including causative organisms, body systems affected, routes of transmission, susceptibility and resistance, signs and symptoms, patient management and protective measures, and immunization.
  - 47.19 Discuss tetanus, including the causative organism, the body system affected, modes of transmission, susceptibility and resistance, signs and symptoms, patient management and protective measures, and immunization.
  - 47.20 Discuss chickenpox, including the causative organism, the body system affected, mode of transmission, susceptibility and resistance, signs and symptoms, patient management and protective measures, and immunization and control measures.
  - 47.21 Discuss mumps, including the causative organism, the body organs and systems affected, mode of transmission, susceptibility and resistance, signs and symptoms, patient management and protective measures, and immunization.
  - 47.22 Discuss rubella (German measles), including the causative agent, the body tissues and systems affected, modes of transmission, susceptibility and resistance, signs and symptoms, patient management and protective measures, and immunization.
  - 47.23 Discuss measles (rubeola, hard measles), including the causative organism, the body tissues, organs, and systems affected, mode of transmission, susceptibility and resistance, signs and symptoms, patient management and protective measures, and immunization.
  - 47.24 Discuss influenza, including causative organisms, the body system affected, mode of transmission, susceptibility and resistance, signs and symptoms, patient management and protective measures, and immunization.
  - 47.25 Discuss mononucleosis, including the causative organisms, the body regions, organs, and systems affected, modes of transmission, susceptibility and resistance, signs and symptoms, patient management and protective measures, and immunization.
  - 47.26 Discuss the characteristics of, and organisms associated with, febrile and afebrile respiratory disease, to include bronchiolitis, bronchitis, laryngitis, croup, epiglottitis, and the common cold.
  - 47.27 Discuss gastroenteritis, including the causative organisms, the body system affected, modes of transmission, susceptibility and resistance, signs and symptoms, patient management and protective measures, and immunization.
  - 47.28 Consistently demonstrate the use of body substance isolation.
  - 47.29 Demonstrate the ability to comply with body substance isolation guidelines.
  - 47.30 Perform an assessment of a patient with an infectious/communicable disease.
  - 47.31 Effectively and safely manage a patient with an infectious/communicable disease, including airway and ventilation care, support of circulation,

pharmacological intervention, transport considerations, psychological support/communication strategies, and other considerations as mandated by local protocol.

48.0 Implement the proper treatment plan for a patient with a suspected behavioral emergency. – At the end of this unit, the paramedic student will be able to describe and demonstrate safe, empathetic competence in caring for patients with behavioral emergencies. At the completion of this unit, the paramedic student will be able to:

- 48.01 Define behavior and distinguish between normal and abnormal behavior.
- 48.02 Discuss the prevalence of behavior and psychiatric disorders.
- 48.03 Discuss the factors that may alter the behavior or emotional status of an ill or injured individual.
- 48.04 Describe the medical legal considerations for management of emotionally disturbed patients.
- 48.05 Discuss the pathophysiology of behavioral and psychiatric disorders.
- 48.06 Define the following terms: Affect, Anger, Anxiety, Confusion, Depression, Fear, Mental status, Open-ended questions, Posture
- 48.07 Describe the verbal techniques useful in managing the emotionally disturbed patient.
- 48.08 Describe the circumstances when relatives, bystanders and others should be removed from the scene.
- 48.09 Describe the techniques that facilitate the systematic gathering of information from the disturbed patient.
- 48.10 Identify techniques for physical assessment in a patient with behavioral problems.
- 48.11 Describe methods of restraint that may be necessary in managing the emotionally disturbed patient.
- 48.12 List the risk factors for suicide.
- 48.13 List the behaviors that may be seen indicating that patient may be at risk for suicide.
- 48.14 Differentiate between the various behavioral and psychiatric disorders based on the assessment and history.
- 48.15 Develop a patient management plan based on the field impressions.
- 48.16 Demonstrate safe techniques for managing and restraining a violent patient.

49.0 Implement the proper treatment plan for a patient with a suspected gynecological emergency. – At the end of this unit, the paramedic student will be able to utilize gynecological principles and assessment findings to formulate a field impression and implement the management plan for the patient experiencing a gynecological emergency. At the completion of this unit, the paramedic student will be able to:

- 49.01 Review the anatomic structures and physiology of the female reproductive system.
- 49.02 Identify the normal events of the menstrual cycle.
- 49.03 Describe how to assess a patient with a gynecological complaint.
- 49.04 Explain how to recognize a gynecological emergency.
- 49.05 Describe the general care for any patient experiencing a gynecological emergency.
- 49.06 Describe the pathophysiology, assessment, and management of specific gynecological emergencies.

- 49.07 Value the importance of maintaining a patient's modesty and privacy while still being able to obtain necessary information.
  - 49.08 Defend the need to provide care for a patient of sexual assault, while still preventing destruction of crime scene information.
  - 49.09 Serve as a role model for other EMS providers when discussing or caring for patients with gynecological emergencies.
  - 49.10 Demonstrate how to assess a patient with a gynecological complaint.
  - 49.11 Demonstrate how to provide care for a patient with: Excessive vaginal bleeding, Abdominal pain Sexual assault.
- 50.0 Implement the proper treatment plan for a patient with a suspected obstetrical emergency. – At the completion of this unit, the paramedic student will be able to apply an understanding of the anatomy and physiology of the female reproductive system to the assessment and management of a patient experiencing normal or abnormal labor. At the completion of this unit, the paramedic student will be able to:
- 50.01 Review the anatomic structures and physiology of the reproductive system.
  - 50.02 Identify the normal events of pregnancy.
  - 50.03 Describe how to assess an obstetrical patient.
  - 50.04 Identify the stages of labor and the paramedic's role in each stage.
  - 50.05 Differentiate between normal and abnormal delivery.
  - 50.06 Identify and describe complications associated with pregnancy and delivery.
  - 50.07 State indications of an imminent delivery.
  - 50.08 Differentiate the management of a patient with predelivery emergencies from a normal delivery.
  - 50.09 State the steps in the predelivery preparation of the mother.
  - 50.10 State the steps to assist in the delivery of a newborn.
  - 50.11 Describe how to care for the newborn.
  - 50.12 Describe how and when to cut the umbilical cord.
  - 50.13 Discuss the steps in the delivery of the placenta.
  - 50.14 Describe the management of the mother post-delivery.
  - 50.15 Describe the procedures for handling abnormal deliveries.
  - 50.16 Describe the procedures for handling complications of pregnancy.
  - 50.17 Describe the procedures for handling maternal complications of labor.
  - 50.18 Describe special considerations when meconium is present in amniotic fluid or during delivery.
  - 50.19 Describe special considerations of a premature baby.
  - 50.20 Demonstrate how to assess an obstetric patient.
  - 50.21 Demonstrate how to provide care for a patient with: Excessive vaginal bleeding, Abdominal pain Hypertensive crisis
  - 50.22 Demonstrate how to prepare the obstetric patient for delivery.
  - 50.23 Demonstrate how to assist in the normal cephalic delivery of the fetus.
  - 50.24 Demonstrate how to deliver the placenta.
  - 50.25 Demonstrate how to provide post-delivery care of the mother.
  - 50.26 Demonstrate how to assist with abnormal deliveries.
  - 50.27 Demonstrate how to care for the mother with delivery complications.
- 51.0 Implement the proper treatment plan for a neonatal emergency. – At the completion of this unit, the paramedic student will be able to integrate pathophysiological principles and assessment findings to formulate a field impression and implement a treatment plan

for a neonatal patient. At the completion of this unit, the paramedic student will be able to:

- 51.01 Define the term neonate.
- 51.02 Identify important antepartum factors that can affect childbirth.
- 51.03 Identify important intrapartum factors that can term the newborn high risk.
- 51.04 Identify the factors that lead to premature birth and low birth weight newborns.
- 51.05 Discuss pulmonary perfusion and asphyxia.
- 51.06 Calculate the APGAR score given various newborn situations.
- 51.07 Determine when ventilatory assistance is appropriate for a newborn.
- 51.08 Prepare appropriate ventilation equipment, adjuncts and technique for a newborn.
- 51.09 Determine when chest compressions are appropriate for a newborn.
- 51.10 Discuss appropriate chest compression techniques for a newborn.
- 51.11 Determine when endotracheal intubation is appropriate for a newborn.
- 51.12 Discuss appropriate endotracheal intubation techniques for a newborn.
- 51.13 Identify complications related to endotracheal intubation for a newborn.
- 51.14 Determine when vascular access is indicated for a newborn.
- 51.15 Discuss the routes of medication administration for a newborn.
- 51.16 Determine when blow-by oxygen delivery is appropriate for a newborn.
- 51.17 Determine when an orogastric tube should be inserted during positive-pressure ventilation.
- 51.18 Discuss the signs of hypovolemia in a newborn.
- 51.19 Discuss the initial steps in resuscitation of a newborn.
- 51.20 Discuss the effects maternal narcotic usage has on the newborn.
- 51.21 Discuss appropriate transport guidelines for a newborn.
- 51.22 Determine appropriate receiving facilities for low and high risk newborns.
- 51.23 Describe the epidemiology, including the incidence, morbidity/ mortality, risk factors and prevention strategies for meconium aspiration.
- 51.24 Discuss the management/treatment plan for meconium aspiration.
- 51.25 Discuss the pathophysiology of apnea in the neonate.
- 51.26 Discuss the assessment findings associated with apnea in the neonate.
- 51.27 Discuss the management/treatment plan for apnea in the neonate.
- 51.28 Describe the epidemiology, including the incidence, morbidity/ mortality and risk factors for bradycardia in the neonate.
- 51.29 Discuss the assessment findings associated with bradycardia in the neonate.
- 51.30 Discuss the management/ treatment plan for bradycardia in the neonate.
- 51.31 Discuss the pathophysiology of premature infants.
- 51.32 Discuss the assessment findings associated with premature infants.
- 51.33 Discuss the management/treatment plan for premature infants.
- 51.34 Discuss the pathophysiology of respiratory distress/ cyanosis in the neonate.
- 51.35 Discuss the assessment findings associated with respiratory distress/ cyanosis in the neonate.
- 51.36 Discuss the management/treatment plan for respiratory distress/ cyanosis in the neonate.
- 51.37 Discuss the pathophysiology of seizures in the neonate.
- 51.38 Discuss the assessment findings associated with seizures in the neonate.
- 51.39 Discuss the management/treatment plan for seizures in the neonate.
- 51.40 Discuss the pathophysiology of fever in the neonate.
- 51.41 Discuss the assessment findings associated with fever in the neonate.
- 51.42 Discuss the management/treatment plan for fever in the neonate.

- 51.43 Discuss the pathophysiology of hypothermia in the neonate.
  - 51.44 Discuss the assessment findings associated with hypothermia in the neonate.
  - 51.45 Discuss the management/treatment plan for hypothermia in the neonate.
  - 51.46 Discuss the pathophysiology of hypoglycemia in the neonate.
  - 51.47 Discuss the assessment findings associated with hypoglycemia in the neonate.
  - 51.48 Discuss the management/treatment plan for hypoglycemia in the neonate.
  - 51.49 Discuss the pathophysiology of vomiting in the neonate.
  - 51.50 Discuss the assessment findings associated with vomiting in the neonate.
  - 51.51 Discuss the management/treatment plan for vomiting in the neonate.
  - 51.52 Discuss the pathophysiology of common birth injuries in the neonate.
  - 51.53 Discuss the assessment findings associated with common birth injuries in the neonate.
  - 51.54 Discuss the management/treatment plan for common birth injuries in the neonate.
  - 51.55 Discuss the pathophysiology of cardiac arrest in the neonate.
  - 51.56 Discuss the assessment findings associated with cardiac arrest in the neonate.
  - 51.57 Discuss the management/treatment plan for cardiac arrest in the neonate.
  - 51.58 Discuss the pathophysiology of post arrest management of the neonate.
  - 51.59 Discuss the management/treatment plan to stabilize the post arrest neonate.
  - 51.60 Demonstrate preparation of a newborn resuscitation area.
  - 51.61 Demonstrate appropriate assessment technique for examining a newborn.
  - 51.62 Demonstrate appropriate assisted ventilations for a newborn.
  - 51.63 Demonstrate appropriate endotracheal intubation technique for a newborn.
  - 51.64 Demonstrate appropriate chest compression and ventilation technique for a newborn.
  - 51.65 Demonstrate vascular access cannulation techniques for a newborn.
  - 51.66 Demonstrate the initial steps in resuscitation of a newborn.
  - 51.67 Demonstrate blow-by oxygen delivery for a newborn.
- 52.0 Implement the proper treatment plan for the pediatric patient. – At the completion of this unit, the paramedic student will be able to integrate pathophysiological principles and assessment findings to formulate a field impression and implement a treatment plan for the pediatric patient. At the completion of this unit, the paramedic student will be able to:
- 52.01 Identify key growth and developmental characteristics of infants and children and their implications.
  - 52.02 Identify key anatomical and physiological characteristics of infants and children and their implications.
  - 52.03 Describe techniques for successful assessment of infants and children.
  - 52.04 Describe techniques for successful treatment of infants and children.
  - 52.05 Outline differences in adult and childhood anatomy and physiology.
  - 52.06 Identify "normal" age group related vital signs.
  - 52.07 Determine appropriate airway adjuncts for infants and children.
  - 52.08 Discuss complications of improper utilization of airway adjuncts with infants and children.
  - 52.09 Discuss appropriate ventilation devices for infants and children.
  - 52.10 Discuss complications of improper utilization of ventilation devices with infants and children.
  - 52.11 Identify complications of improper endotracheal intubation procedure in infants and children.

- 52.12 List the indications and methods for gastric decompression for infants and children.
- 52.13 Differentiate between upper airway obstruction and lower airway disease.
- 52.14 Describe the general approach to the treatment of children with respiratory distress, failure, or arrest from upper airway obstruction or lower airway disease.
- 52.15 Discuss the common causes of hypoperfusion in infants and children.
- 52.16 Identify the major classifications of pediatric cardiac rhythms.
- 52.17 Discuss the primary etiologies of cardiopulmonary arrest in infants and children.
- 52.18 Discuss the appropriate equipment for vascular access in infants and children.
- 52.19 Identify complications of vascular access for infants and children.
- 52.20 Describe the primary etiologies of altered level of consciousness in infants and children.
- 52.21 Identify common lethal mechanisms of injury in infants and children.
- 52.22 Identify infant and child trauma patients who require spinal immobilization.
- 52.23 Discuss fluid management and shock treatment for infant and child trauma patient.
- 52.24 Determine when pain management and sedation are appropriate for infants and children.
- 52.25 Define child abuse.
- 52.26 Define child neglect.
- 52.27 Define sudden infant death syndrome (SIDS).
- 52.28 Discuss the parent/caregiver responses to the death of an infant or child.
- 52.29 Define children with special health care needs.
- 52.30 Discuss basic cardiac life support (CPR) guidelines for infants and children.
- 52.31 Integrate advanced life support skills with basic cardiac life support for infants and children.
- 52.32 Discuss the indications, dosage, route of administration and special considerations for medication administration in infants and children.
- 52.33 Discuss the pathophysiology of respiratory distress/failure in infants and children.
- 52.34 Discuss the assessment findings associated with respiratory distress/ failure in infants and children.
- 52.35 Discuss the management/treatment plan for respiratory distress/failure in infants and children.
- 52.36 Discuss the pathophysiology of hypoperfusion in infants and children.
- 52.37 Discuss the assessment findings associated with hypoperfusion in infants and children.
- 52.38 Discuss the management/treatment plan for hypoperfusion in infants and children.
- 52.39 Discuss the pathophysiology of cardiac dysrhythmias in infants and children.
- 52.40 Discuss the assessment findings associated with cardiac dysrhythmias in infants and children.
- 52.41 Discuss the management/treatment plan for cardiac dysrhythmias in infants and children.
- 52.42 Discuss the pathophysiology of neurological emergencies in infants and children.
- 52.43 Discuss the assessment findings associated with neurological emergencies in infants and children.
- 52.44 Discuss the management/treatment plan for neurological emergencies in infants and children.
- 52.45 Discuss the pathophysiology of trauma in infants and children.
- 52.46 Discuss the assessment findings associated with trauma in infants and children.
- 52.47 Discuss the management/treatment plan for trauma in infants and children.

- 52.48 Discuss the pathophysiology of abuse and neglect in infants and children.
- 52.49 Discuss the assessment findings associated with abuse and neglect in infants and children.
- 52.50 Discuss the management/treatment plan for abuse and neglect in infants and children, including documentation and reporting.
- 52.51 Discuss the pathophysiology of children with special health care needs including technology assisted children.
- 52.52 Discuss the assessment findings associated for children with special health care needs including technology assisted children.
- 52.53 Discuss the management/treatment plan for children with special health care needs including technology assisted children.
- 52.54 Discuss the pathophysiology of SIDS in infants.
- 52.55 Discuss the assessment findings associated with SIDS infants.
- 52.56 Discuss the management/treatment plan for SIDS in infants.
- 52.57 Demonstrate the appropriate approach for treating infants and children.
- 52.58 Demonstrate appropriate intervention techniques with families of acutely ill or injured infants and children.
- 52.59 Demonstrate an appropriate assessment for different developmental age groups.
- 52.60 Demonstrate an appropriate technique for measuring pediatric vital signs.
- 52.61 Demonstrate the use of a length-based resuscitation device for determining equipment sizes, drug doses and other pertinent information for a pediatric patient.
- 52.62 Demonstrate the appropriate approach for treating infants and children with respiratory distress, failure, and arrest.
- 52.63 Demonstrate proper technique for administering blow-by oxygen to infants and children.
- 52.64 Demonstrate the proper utilization of a pediatric non-rebreather oxygen mask.
- 52.65 Demonstrate proper technique for suctioning of infants and children.
- 52.66 Demonstrate appropriate use of airway adjuncts with infants and children.
- 52.67 Demonstrate appropriate use of ventilation devices for infants and children.
- 52.68 Demonstrate endotracheal intubation procedures in infants and children.
- 52.69 Demonstrate appropriate treatment/management of intubation complications for infants and children.
- 52.70 Demonstrate appropriate needle cricothyroidotomy in infants and children.
- 52.71 Demonstrate proper placement of a gastric tube in infants and children.
- 52.72 Demonstrate an appropriate technique for insertion of peripheral intravenous catheters for infants and children.
- 52.73 Demonstrate an appropriate technique for administration of intramuscular, inhalation, subcutaneous, rectal, endotracheal and oral medication for infants and children.
- 52.74 Demonstrate an appropriate technique for insertion of an intraosseous line for infants and children.
- 52.75 Demonstrate age appropriate basic airway clearing maneuvers for infants and children with a completely obstructed airway.
- 52.76 Demonstrate proper technique for direct laryngoscopy and foreign body retrieval in infants and children with a completely obstructed airway.
- 52.77 Demonstrate appropriate airway and breathing control maneuvers for infant and child trauma patients.
- 52.78 Demonstrate appropriate immobilization techniques for infant and child trauma patients.
- 52.79 Demonstrate treatment of infants and children with head injuries.

- 52.80 Demonstrate appropriate treatment of infants and children with chest injuries.
  - 52.81 Demonstrate appropriate treatment of infants and children with abdominal injuries.
  - 52.82 Demonstrate appropriate treatment of infants and children with extremity injuries.
  - 52.83 Demonstrate appropriate treatment of infants and children with burns.
  - 52.84 Demonstrate appropriate parent/caregiver interviewing techniques for infant and child death situations.
  - 52.85 Demonstrate proper infant CPR.
  - 52.86 Demonstrate proper child CPR.
  - 52.87 Demonstrate proper techniques for performing infant and child defibrillation and synchronized cardioversion.
- 53.0 Implement the proper treatment plan for the geriatric patient. – At the completion of this unit, the paramedic student will be able to integrate the pathophysiological principles and the assessment findings to formulate and implement a treatment plan for the geriatric patient. At the completion of this unit, the paramedic student will be able to:
- 53.01 Discuss common emotional and psychological reactions to aging to include causes and manifestations.
  - 53.02 Discuss the problems with mobility in the elderly and develop strategies to prevent falls.
  - 53.03 Discuss factors that may complicate the assessment of the elderly patient.
  - 53.04 Describe principles that should be employed when assessing and communicating with the elderly.
  - 53.05 Discuss common complaints of elderly patients.
  - 53.06 Discuss the impact of polypharmacy and medication non-compliance on patient assessment and management.
  - 53.07 Discuss medication issues of the elderly including polypharmacy, dosing errors and increased drug sensitivity.
  - 53.08 Discuss the assessment of the elderly patient with pulmonary complaints, including pneumonia, chronic obstructive pulmonary diseases, and pulmonary embolism.
  - 53.09 Identify the need for intervention and transport of the elderly patient with pulmonary complaints.
  - 53.10 Develop a treatment and management plan of the elderly patient with pulmonary complaints, including pneumonia, chronic obstructive pulmonary diseases, and pulmonary embolism.
  - 53.11 Discuss the assessment of the elderly patient with complaints related to the cardiovascular system, including myocardial infarction, heart failure, dysrhythmias, aneurism, and hypertension.
  - 53.12 Develop a treatment and management plan of the elderly patient with cardiovascular complaints, including myocardial infarction, heart failure, dysrhythmias, aneurism and hypertension.
  - 53.13 Discuss the assessment of the elderly patient with complaints related to the nervous system, including cerebral vascular disease, delirium, dementia, Alzheimer's disease and Parkinson's disease.
  - 53.14 Develop a treatment and management plan of the elderly patient with complaints related to the nervous system, including cerebral vascular disease, delirium, dementia, Alzheimer's disease and Parkinson's disease.

- 53.15 Describe the epidemiology for endocrine diseases in the elderly, including incidence, morbidity/mortality, risk factors, and prevention strategies for patients with diabetes and thyroid diseases.
  - 53.16 Discuss the assessment of the elderly patient with complaints related to the endocrine system, including diabetes and thyroid diseases.
  - 53.17 Develop a treatment and management plan of the elderly patient with endocrine problems, including diabetes and thyroid diseases.
  - 53.18 Develop and execute a treatment and management plan of the elderly patient with gastrointestinal problems.
  - 53.19 Develop and execute a treatment and management plan of the elderly patient with toxicological problems.
  - 53.20 Discuss the management/considerations when treating an elderly patient with drug and alcohol abuse.
  - 53.21 Develop and execute a treatment and management plan of the elderly patient with environmental considerations.
  - 53.22 Develop a treatment and management plan of the elderly psychiatric patient, including depression and suicide.
  - 53.23 Discuss the assessment findings common in elderly patients with traumatic injuries, including orthopedic injuries, burns and head injuries.
  - 53.24 Discuss the management/considerations when treating an elderly patient with traumatic injuries, including orthopedic injuries, burns and head injuries.
  - 53.25 Demonstrate the ability to assess a geriatric patient.
  - 53.26 Demonstrate the ability to adjust their assessment to a geriatric patient.
- 54.0 Implement the proper treatment plan for a patient who has sustained abuse or assault. – At the completion of this unit, the paramedic student will be able to integrate the assessment findings to formulate a field impression and implement a treatment plan for the patient who has sustained abuse or assault. At the completion of this unit, the paramedic student will be able to:
- 54.01 Discuss the incidence of abuse and assault.
  - 54.02 Describe the categories of abuse.
  - 54.03 Discuss examples of spouse abuse.
  - 54.04 Discuss examples of elder abuse.
  - 54.05 Discuss examples of child abuse.
  - 54.06 Discuss examples of sexual assault.
  - 54.07 Describe the characteristics associated with the profile of the typical abuser of a spouse.
  - 54.08 Describe the characteristics associated with the profile of the typical abuser of the elder.
  - 54.09 Describe the characteristics associated with the profile of the typical abuser of children.
  - 54.10 Describe the characteristics associated with the profile of the typical assailant of sexual assault.
  - 54.11 Identify the profile of the "at-risk" spouse.
  - 54.12 Identify the profile of the "at-risk" elder.
  - 54.13 Identify the profile of the "at-risk" child.
  - 54.14 Discuss the assessment and management of the abused patient.
  - 54.15 Discuss the legal aspects associated with abuse situations.
  - 54.16 Discuss the documentation associated with abused and assaulted patient.
  - 54.17 Demonstrate the ability to assess a spouse, elder or child abused patient.

- 54.18 Demonstrate the ability to assess a sexually assaulted patient.
- 55.0 Implement the proper treatment plan for a variety of diverse patients with a suspected emergency. – At the completion of this unit the paramedic student will be able to integrate pathophysiological and psychosocial principles to adapt the assessment and treatment plan for diverse patients and those who face physical, mental, social and financial challenges. At the completion of this unit, the paramedic student will be able to:
- 55.01 Recognize the patient with a hearing impairment.
  - 55.02 Anticipate accommodations that may be needed in order to properly manage the patient with a hearing impairment.
  - 55.03 Recognize the patient with a visual impairment.
  - 55.04 Describe the various etiologies and types of speech impairments.
  - 55.05 Recognize the patient with a speech impairment.
  - 55.06 Describe paraplegia/quadriplegia.
  - 55.07 Describe the various etiologies of mental illness.
  - 55.08 Recognize the presenting signs of the various mental illnesses.
  - 55.09 Recognize the patient with a developmental disability.
  - 55.10 Recognize the patient with Down's syndrome.
  - 55.11 Describe the various etiologies of emotional impairment.
  - 55.12 Recognize the patient with an emotional impairment.
  - 55.13 Describe the following diseases/illnesses: Arthritis, Cancer, Cerebral palsy, Cystic fibrosis Multiple sclerosis, Muscular dystrophy, Myasthenia gravis, Poliomyelitis, Spina bifida, patients with a previous head injury
  - 55.14 Identify the possible presenting sign(s) for the following diseases/illnesses: Arthritis, Cancer, Cerebral palsy, Cystic fibrosis, Multiple sclerosis, Muscular dystrophy, Myasthenia gravis, Poliomyelitis, Spina bifida, and patients with a previous head injury.
  - 55.15 Identify a patient that is terminally ill.
  - 55.16 Identify a patient with a communicable disease.
  - 55.17 Recognize the presenting signs of a patient with a communicable disease.
  - 55.18 Recognize sign(s) of financial impairments.
- 56.0 Implement the proper treatment plan for the chronic care patient. – At the completion of this unit, the paramedic student will be able to integrate the pathophysiological principles and the assessment findings to formulate a field impression and implement a treatment plan for the acute deterioration of a chronic care patient. At the completion of this unit, the paramedic student will be able to:
- 56.01 Identify the importance of home health care medicine as related to the ALS level of care.
  - 56.02 Differentiate between the role of EMS provider and the role of the home care provider.
  - 56.03 Discuss the aspects of home care that result in enhanced quality of care for a given patient.
  - 56.04 Discuss the aspects of home care that have a potential to become a detriment to the quality of care for a given patient.
  - 56.05 List complications commonly seen in the home care patients, which result in their hospitalization.
  - 56.06 Define hospice care, comfort care and DNR/DNAR as they relate to local practice, law and policy.

- 56.07 List the stages of the grief process and relate them to an individual in hospice care.
  - 56.08 Given a series of home care scenarios, determine which patients should receive follow-up home care and which should be transported to an emergency care facility.
  - 56.09 Describe airway maintenance devices typically found in the home care environment.
  - 56.10 Describe devices that provide or enhance alveolar ventilation in the home care setting.
  - 56.11 List vascular access devices found in the home care setting.
  - 56.12 Describe complications of assessing each of the airway, vascular access, and GI/GU devices described above.
  - 56.13 Describe the indications and contraindications for urinary catheter insertion in an out-of-hospital setting.
  - 56.14 Identify the proper anatomy for placement of urinary catheters in males or females.
  - 56.15 Identify failure of GI/GU devices found in the home care setting.
  - 56.16 Identify failure of ventilatory devices found in the home care setting.
  - 56.17 Identify failure of vascular access devices found in the home care setting.
  - 56.18 Identify failure of drains.
  - 56.19 Discuss the rights of the terminally ill.
  - 56.20 Observe for an infected or otherwise complicated venous access point.
  - 56.21 Demonstrate proper tracheotomy care.
  - 56.22 Demonstrate the insertion of a new inner cannula and/or the use of an endotracheal tube to temporarily maintain an airway in a tracheostomy patient.
  - 56.23 Demonstrate proper technique for drawing blood from a central venous line.
  - 56.24 Demonstrate the method of accessing vascular access devices found in the home health care setting.
- 57.0 Implement the proper treatment plan for patients with common complaints. – At the completion of this unit, the paramedic student will be able to integrate the principles of assessment based management to perform an appropriate assessment and implement the management plan for patients with common complaints. At the completion of this unit, the paramedic student will be able to:
- 57.01 Explain how the paramedic's attitude affects assessment and decision making.
  - 57.02 Explain how uncooperative patients affect assessment and decision making.
  - 57.03 Explain the roles of the team leader and the patient care person.
  - 57.04 List and explain the rationale for carrying the essential patient care items.
  - 57.05 Explain the general approach to the emergency patient.
  - 57.06 Explain the general approach, patient assessment, differentials, and management priorities for patients, including but not limited to the following problems: chest pain, medical and traumatic cardiac arrest, acute abdominal pain, GI bleed, altered mental status, dyspnea, syncope, seizures, environmental or thermal problems, hazardous material or toxic exposure, trauma or multi-trauma patients, allergic reactions, behavioral problems, obstetric or gynecological problems, and pediatric problems.
  - 57.07 Describe how to effectively communicate patient information face to face, over the telephone, by radio, and in writing.

- 57.08 While serving as team leader, choreograph the EMS response team, perform a patient assessment, provide local/regionally appropriate treatment, present cases verbally and in writing given a moulaged and programmed simulated patient.
  - 57.09 While serving as team leader, assess a programmed patient or mannequin, consider differentials, make decisions relative to interventions and transportation, provide the interventions, patient packaging and transportation, work as a team and practice various roles, including but not limited to the following common emergencies: chest pain. Cardiac arrest, acute abdominal pain, GI bleed, altered mental status, dyspnea, syncope, seizure, thermal/environmental problems, hazardous materials/toxicology, trauma, allergic reactions/bites/envenomation, behavioral, obstetrical, gynecological and pediatric.
- 58.0 Demonstrate the proper procedures to ensure safe and effective ground and air transport. – At the completion of this unit, the paramedic will understand standards and guidelines that help ensure safe and effective ground and air medical transport. At the completion of this unit, the paramedic student will be able to:
- 58.01 Identify current local and state standards which influence ambulance design, equipment requirements and staffing of ambulances.
  - 58.02 Discuss the importance of completing an ambulance equipment/ supply checklist.
  - 58.03 Discuss the factors to be considered when determining ambulance stationing within a community.
  - 58.04 Describe the advantages and disadvantages of air medical transport.
  - 58.05 Identify the conditions/situations in which air medical transport should be considered.
  - 58.06 Assess personal practices relative to ambulance operations which may affect the safety of the crew, the patient and bystanders.
  - 58.07 Serve as a role model for others relative to the operation of ambulances.
  - 58.08 Value the need to serve as the patient advocate to ensure appropriate patient transportation via ground or air.
  - 58.09 Demonstrate how to place a patient in, and remove a patient from, an ambulance.
- 59.0 Integrate the principles of general incident management and multiple casualty incident management. – At the completion of this unit, the paramedic student will be able to integrate the principles of general incident management and multiple casualty incident (MCI) management techniques in order to function effectively at major incidents. At the completion of this unit, the paramedic student will be able to:
- 59.01 Explain the need for the incident management system (IMS)/incident command system (ICS) in managing emergency medical services incidents.
  - 59.02 Define the term multiple casualty incident (MCI).
  - 59.03 Define the term disaster management.
  - 59.04 Describe essential elements of scene size-up when arriving at a potential MCI.
  - 59.05 Describe the role of the paramedics and EMS systems in planning for MCIs and disasters.
  - 59.06 Describe the functional components of the incident management system in terms of the following: command, finance, logistics, operations and planning.
  - 59.07 Differentiate between singular and unified command and when each is most applicable.
  - 59.08 Describe the role of command.

- 59.09 Describe the need for transfer of command and procedures for transferring it.
  - 59.10 List and describe the functions of the following groups and leaders in ICS as it pertains to EMS incidents: safety, logistics, rehabilitation, staging, treatment, triage, transportation, extrication/rescue, morgue, and communications.
  - 59.11 Describe the role of the physician at multiple casualty incidents.
  - 59.12 Define triage and describe the principles of triage.
  - 59.13 Describe the START (simple triage and rapid treatment) method of initial triage.
  - 59.14 Define primary and secondary triage.
  - 59.15 Describe techniques used to allocate patients to hospitals and track them.
  - 59.16 List and describe the essential equipment to provide logistical support to MCI operations, including but not limited to: Airway, respiratory and hemorrhage control, Burn management, and Patient packaging/immobilization.
  - 59.17 List the physical and psychological signs of critical incident stress.
  - 59.18 Describe the role of critical incident stress management sessions in MCIs.
  - 59.19 Explain the organizational benefits for having standard operating procedures (SOPs) for using the incident management system or incident command system.
  - 59.20 Demonstrate the use of local/regional triage tagging system used for primary and secondary triage.
  - 59.21 Given a classroom simulation of a MCI with 5-10 patients, fulfill the role of triage group leader.
  - 59.22 Given a classroom simulation of a MCI with 5-10 patients, fulfill the role of treatment group leader.
  - 59.23 Given a classroom simulation of a MCI with 5-10 patients, fulfill the role of transportation group leader.
- 60.0 Integrate the principles of rescue awareness management. – At the completion of this unit, the paramedic student will be able to integrate the principles of rescue awareness and operations to safely rescue a patient from water, hazardous atmospheres, trenches, highways, and hazardous terrain. At the completion of this unit, the paramedic student will be able to:
- 60.01 Explain the medical and mechanical aspects of rescue situations.
  - 60.02 Explain the role of the paramedic in delivering care at the site of the injury, continuing through the rescue process and to definitive care.
  - 60.03 Describe the phases of a rescue operation.
  - 60.04 Explain the differences in risk between moving water and flat water rescue.
  - 60.05 Explain the effects of immersion hypothermia on the ability to survive sudden immersion and self rescue.
  - 60.06 Explain the phenomenon of the cold protective response in cold water drowning situations.
  - 60.07 Explain the rescue techniques associated with reach-throw-row-go.
  - 60.08 Given a list of rescue scenarios, identify the victim survivability profile and which are rescue versus body recovery situations.
  - 60.09 Explain the self-rescue position if unexpectedly immersed in moving water.
  - 60.10 Identify components necessary to ensure site safety prior to confined space rescue attempts.
  - 60.11 Explain the hazard of cave-in during trench rescue operations.
  - 60.12 Describe the effects of traffic flow on the highway rescue incident including limited access superhighways and regular access highways.
  - 60.13 List and describe the hazards associated with the following auto/ truck components: energy absorbing bumpers, air bag/supplemental restraint systems,

- catalytic converters and conventional fuel systems, stored energy, and alternate fuel systems.
- 60.14 Describe methods for emergency stabilization using rope, cribbing, jacks, spare tire, and come-a-longs for vehicles found on their:
  - 60.15 Describe the electrical hazards commonly found at highway incidents (above and below ground).
  - 60.16 Explain the difference between tempered and safety glass, identify its locations on a vehicle and how to break it safely.
  - 60.17 Explain typical door anatomy and methods to access through stuck doors.
  - 60.18 Explain SRS or "air bag" systems and methods to neutralize them.
  - 60.19 Describe the procedure for stokes litter packaging for low angle evacuations.
  - 60.20 Explain techniques to be used in non-technical litter carries over rough terrain.
  - 60.21 Explain non-technical high angle rescue procedures using aerial apparatus.
  - 60.22 Explain assessment procedures and modifications necessary when caring for entrapped patients.
  - 60.23 List the equipment necessary for an "off road" medical pack.
  - 60.24 Explain specific methods of improvisation for assessment, spinal immobilization and extremity splinting.
  - 60.25 Explain the indications, contraindications and methods of pain control for entrapped patients.
  - 60.26 Explain the need for and techniques of thermal control for entrapped patients.
  - 60.27 Develop proficiency in patient packaging and evacuation techniques that pertain to hazardous or rescue environments.
  - 60.28 Demonstrate methods of "stokes" packaging for patients being vertically lifted (high angle), horizontally lifted (low angle), and carried over rough terrain.
  - 60.29 Demonstrate methods of packaging for patients being vertically lifted without stokes litter stretcher packaging.
  - 60.30 Demonstrate litter securing techniques for patients being evacuated by aerial apparatus.
  - 60.31 Demonstrate in-water spinal immobilization techniques.
  - 60.32 Demonstrate donning and properly adjusting a PFD.
- 61.0 Integrate the principles of human hazard awareness. – At the completion of this unit, the paramedic student will have an awareness of the human hazard of crime and violence and the safe operation at crime scenes and other emergencies. At the completion of this unit, the paramedic student will be able to:
- 61.01 Explain specific techniques for risk reduction when approaching the following types of routine EMS scenes: highway encounters, violent street incidents, and residences and "dark houses".
  - 61.02 Describe warning signs of potentially violent situations.
  - 61.03 Describe police evidence considerations and techniques to assist in evidence preservation.
  - 61.04 Demonstrate field contact and cover procedures during assessment and care, evasive tactics, and concealment techniques.
- 62.0 Integrate the principles of general incident management of hazardous materials emergencies. – At the completion of this unit, the paramedic student will be able to evaluate hazardous materials emergencies, call for appropriate resources, and work in the cold zone. At the completion of this unit, the paramedic student will be able to:

- 62.01 Identify resources for substance identification, decontamination and treatment information, including but not limited to the following: poison control center, medical control, material safety data sheets (MSDS), reference textbooks, computer databases (CAMEO), CHEMTREC, technical specialists and agency for toxic substances and disease registry.
- 62.02 Explain primary and secondary contamination risk.
- 62.03 List and describe the following routes of exposure: topical, respiratory, gastrointestinal, and parenteral.
- 62.04 Explain how the substance and route of contamination alters triage and decontamination methods.
- 62.05 Explain the limitations of field decontamination procedures.
- 62.06 Explain the use and limitations of personal protective equipment (PPE) in hazardous material situations.
- 62.07 List and explain the common signs, symptoms and treatment for the following substances: corrosives (acids/alkalis), pesticides (carbamates/organophosphates), chemical asphyxiants (cyanide/carbon monoxide), and hydrocarbon solvents (xylene, methylene chloride).
- 62.08 Identify local facilities and resources capable of treating patients exposed to hazardous materials.
- 62.09 Define the following terms and explain their importance to the risk assessment process: boiling point, flammable/explosive limits, flash point, ignition temperature, specific gravity, vapor density, vapor pressure, water solubility, and alpha, beta, and gamma radiation.
- 62.10 Define the following toxicologic terms and their use in the risk assessment process: threshold limit value (TLV), lethal concentration and doses (LD), parts per million/billion (ppm/ppb), immediately dangerous to life and health (IDLH), permissible exposure limit (PEL), permissible exposure limit (PEL), short term exposure limit (TLV-STEL), and ceiling level (TLV-C).
- 62.11 Determine the appropriate level of PPE to include: types, application, use and limitations, and use of chemical compatibility chart.
- 62.12 Explain decontamination procedures when functioning in the following modes: critical patient rapid two step decontamination process and non-critical patient eight step decontamination process.
- 62.13 Explain specific decontamination procedures.
- 62.14 Explain the documentation necessary for Haz-Mat medical monitoring and rehabilitation operations, including the substance, the toxicity and danger of secondary contamination, appropriate PPE and suit breakthrough time, appropriate level of decontamination, appropriate antidote and medical treatment and transportation method.
- 62.15 Given a simulated hazardous substance, use reference material to determine the appropriate actions.
- 62.16 Demonstrate the donning and doffing of appropriate PPE.
- 62.17 Set up and demonstrate an emergency two-step decontamination process.

**2011-2012**

**Florida Department of Education  
Curriculum Framework**

**Program Title:**        **Emergency Medical Services**  
**Career Cluster:**     **Health Science**

	<b>AS</b>	<b>AAS</b>
CIP Number	1317020601	0317020601
Program Type	College Credit	College Credit
Standard Length	73 credit hours	73 credit hours
CTSO	HOSA	HOSA
SOC Codes (all applicable)	31-9099,29-2041, 11-1021 25-1194	31-9099, 29-2041, 11-1021 25-1194
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>	
Perkins Technical Skill Attainment Inventory	<a href="http://www.fldoe.org/workforce/perkins/perkins_resources.asp">http://www.fldoe.org/workforce/perkins/perkins_resources.asp</a>	

### **Purpose**

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

The content includes but is not limited to all those objectives identified in the current U S Department of Transportation, National Standard Curriculum for the EMT-Paramedic, Instructor Lesson Plans.

### **Program Structure**

This program is a planned sequence of instruction consisting of 73 credit hours.

### **Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

The recommended instructor-student ratio should not exceed 1:8. Hospital activity shall include a minimum of 20 hours of supervised experience in the hospital emergency department.

Clinical activity shall include appropriate patient assessment skills, intervention and documentation relevant to each clinical rotation.

### Special Notes

This program meets the Department of Health HIV/AIDS education requirements and the instructor will provide a certificate to the student verifying that this requirement has been met. Programs may also teach domestic violence and prevention of medical errors education and may choose to provide a certificate to the student verifying that this education has been completed.

Please refer to chapter 401 F.S. for more information on disqualification for the EMT license through the Bureau of Emergency Medical Services, Department of Health.

An EMT-B program must be taught by an instructor meeting the qualifications as set forth in 64J-1.201 FAC.

Through the use of common core courses and the addition of several optional courses, this program is designed to prepare students for employment in the following occupational areas:

Management Option: EMS Coordinator, EMS Supervisor, EMS Shift Supervisor, Operations Manager, EMS Manager, or Director of EMS Services. SOC Code 11-1021 (General and Operations Managers)

Education Option: Field Training Officer, Inservice Training Officer, or EMS Instructor, **SOC Code 25-1194 Vocational Education Teachers, Post Secondary** or to provide supplemental training for persons previously or currently employed in these occupations. The program must be approved by the Department of Health, Office of Emergency Medical Services; and the curriculum must adhere to the U S Department of Transportation National Standard Curriculum.

Management practicum shall be provided in an agency which will provide the student with the opportunity to observe and practice the learning objectives.

An EMS program must be taught by a Florida certified paramedic with 2 years experience, meeting the qualifications as set forth in 64E-2 F.A.C. The program must be accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP).

Emergency Medical Technician (EMT) certification is required for admittance into the program.

Intended outcomes from 1-40 include all the outcomes for the paramedic program (0317.020600). The medical procedures performed by a Paramedic must be performed under the direction of a licensed physician with appropriate emergency experience according to Chapter 64E-2, Florida Administrative Code.

Outcomes 01-11 are referred to as the Health Careers Core and do not have to be completed if the student has previously completed the Core in another health science program. The Core should be taken first or concurrently with the first course in the program. Following the successful completion of the core, the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

## **Career and Technical Student Organization (CTSO)**

Health Occupations Students of America, Inc. (HOSA) is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

## **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

## **Articulation**

To be transferable statewide between institutions, this program must have been reviewed, and a "transfer value" assigned the curriculum content by the appropriate Statewide Course Numbering System discipline committee. This does not preclude institutions from developing specific articulation agreements with each other.

The following ATD programs articulate credit into this degree program. These statewide articulation agreements have been approved by the Articulation Coordinating Committee.

Emergency Medical Technician (Basic)-ATD (0317020503/0317020504) – 11 credits

For details on existing articulation agreements, refer to [http://www.fldoe.org/workforce/dwdframe/artic\\_frame.asp](http://www.fldoe.org/workforce/dwdframe/artic_frame.asp).

## **Program Length**

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. The standard length of this program is 73 credit hours according to Rule 6A-14.030, F.A.C.

## **Certificate Programs**

A College Credit Certificate consists of a program of instruction of less than sixty (60) credits of college-level courses, which is part of an AS or AAS degree program and prepares students for entry into employment (Rule 6A-14.030, F.A.C.). This AS/AAS degree program includes the following College Credit Certificates:

Paramedic (0317020600) – 42 credit hours  
Emergency Medical Technician (Basic) (0317020500) – 11 credit hours

The following ATD programs articulate credit into this degree program. These statewide articulation agreements have been approved by the Articulation Coordinating Committee.

Emergency Medical Technician (Basic)-ATD (0317020504/0317020503) – 11 credits

For details on existing articulation agreements, refer to  
[http://www.fldoe.org/workforce/dwdframe/artic\\_frame.asp](http://www.fldoe.org/workforce/dwdframe/artic_frame.asp).

Standards for the above certificate programs are contained in separate curriculum frameworks.

## Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.
- 12.0 Demonstrate knowledge of the paramedic profession.
- 13.0 Describe EMS systems.
- 14.0 Describe medical/legal considerations.
- 15.0 Describe and demonstrate EMS communications systems.
- 16.0 Demonstrate rescue techniques and extrication.
- 17.0 Describe major incident response.
- 18.0 Describe and manage causes of stress.
- 19.0 Use medical terms specific to EMS.
- 20.0 Demonstrate general patient assessment and initial management.
- 21.0 Manage airway and ventilation.
- 22.0 Assess and manage shock.
- 23.0 Demonstrate knowledge of pharmacology and administer medications.
- 24.0 Assess and manage trauma emergencies.
- 25.0 Assess and manage burn injuries.
- 26.0 Assess and manage respiratory emergencies.
- 27.0 Assess and manage cardiovascular emergencies.
- 28.0 Assess and manage endocrine emergencies.
- 29.0 Assess and manage neurological emergencies.
- 30.0 Assess and manage digestive, genitourinary, and reproductive emergencies.
- 31.0 Assess and manage anaphylaxis emergencies.
- 32.0 Assess and manage toxicological, alcohol, and drug abuse emergencies.

- 33.0 Assess and manage infectious diseases.
- 34.0 Assess and manage environmental injuries.
- 35.0 Assess and manage geriatric emergencies.
- 36.0 Assess and manage pediatric emergencies.
- 37.0 Assess and manage the gynecologic patient.
- 38.0 Assess and manage the obstetric patient.
- 39.0 Assess and manage the neonate.
- 40.0 Assess and manage behavioral emergencies.
- 41.0 Demonstrate leadership and administrative skills basic to management emergency medical service systems.
- 42.0 Interpret federal, state and local laws as they apply to emergency medical service systems.
- 43.0 Demonstrate knowledge of operational and organizational structures of emergency medical service systems.
- 44.0 Demonstrate knowledge of psychological problems and stressors in emergency medical service employees and find appropriate solutions.
- 45.0 Demonstrate knowledge of materials and supplies used in emergency medical service systems.
- 46.0 Demonstrate knowledge of occupational safety and health.
- 47.0 Demonstrate knowledge of appropriate workloads for each employee.
- 48.0 Review, approve and monitor departmental capital and operational budgets.
- 49.0 Identify and apply legal reimbursement systems.
- 50.0 Comply with accreditation standards of governmental or governmental-appointed agencies and organizations.
- 51.0 Demonstrate computer literacy.
- 52.0 Demonstrate knowledge of basic teaching methods, learning and educational psychology.
- 53.0 Describe and discuss curriculum design and development.
- 54.0 Demonstrate appropriate measurement and evaluation skills.
- 55.0 Demonstrate mastery of required technical skills.
- 56.0 Demonstrate classroom management skills.
- 57.0 Demonstrate computer literacy.

2011-2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Emergency Medical Services  
**CIP Numbers:** 1317.020601 AS, 0317.020601AAS  
**Program Length:** 73 credit hours  
**SOC Code(s):** 31-9099, 29-2041, 11-1021, 25-1194

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. At the completion of this program, the student will be able to:

**Health Careers Core: The Health Careers Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Careers Core or any other health occupations program do not have to repeat intended outcomes 01-11.**

01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:

- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
- 01.02 Identify common methods of payment for healthcare services.
- 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
- 01.04 Describe the composition and functions of a healthcare team.
- 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
- 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
- 01.07 Identify characteristics of effective teams.
- 01.08 Recognize methods for building positive team relationships.
- 01.09 Analyze attributes and attitudes of an effective leader.
- 01.10 Recognize factors and situations that may lead to conflict.
- 01.11 Demonstrate effective techniques for managing team conflict.
- 01.12 Describe factors that influence the current delivery system of healthcare.
- 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.

02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:

- 02.01 Develop basic speaking and active listening skills.
- 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
- 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
- 02.04 Respond to verbal and non-verbal cues.

- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.
- 02.06 Use appropriate medical terminology and abbreviations.
- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
- 02.08 Recognize the importance of patient/client educations regarding healthcare.
- 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
- 02.10 Analyze elements of communication using a sender-receiver model.
- 02.11 Distinguish between and report subjective and objective information.
- 02.12 Report relevant information in order of occurrence.

03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:

- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
- 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
- 03.03 Demonstrate procedures for accurate documentation and record keeping.
- 03.04 Interpret healthcare facility policy and procedures.
- 03.05 Explain the “Patient’s Bill of Rights”.
- 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
- 03.07 Describe advance directives.
- 03.08 Describe informed consent.
- 03.09 Explain the laws governing harassment, labor and employment.
- 03.10 Differentiate between legal and ethical issues in healthcare.
- 03.11 Describe a code of ethics consistent with the healthcare occupation.
- 03.12 Identify and compare personal, professional, and organizational ethics.
- 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
- 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
- 03.15 Recognize and report abuse including domestic violence and neglect.
- 03.16 Distinguish among the five schedules of controlled substances.

04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:

- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
- 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
- 04.03 Identify psychological reactions to illness including defense mechanisms.
- 04.04 Identify complementary and alternative health practices.
- 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
- 04.06 Explain the basic concepts of positive self image, wellness and stress.
- 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
- 04.08 Explain the nutrition pyramid.

- 04.09 Recognize the steps in the grief process.
- 05.0 Recognize and practice safety and security procedures. – The student will be able to:
  - 05.01 Recognize safe and unsafe working conditions and report safety hazards.
  - 05.02 Demonstrate the safe use of medical equipment.
  - 05.03 Explain and apply the theory of root- cause analysis
  - 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
  - 05.05 Identify and practice security procedures for medical supplies and equipment.
  - 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions.
  - 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
  - 05.08 Demonstrate proper body mechanics and ergonomics.
  - 05.09 Demonstrate the procedure for properly identifying patients.
  - 05.10 Demonstrate procedures for the safe transport and transfer of patients.
  - 05.11 Describe fire, safety, disaster and evacuations procedures.
  - 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )
- 06.0 Recognize and respond to emergency situations. – The student will be able to:
  - 06.01 Monitor and record vital signs.
  - 06.02 Describe legal parameters relating to the administration of emergency care.
  - 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
  - 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.
- 07.0 Recognize and practice infection control procedures. – The student will be able to:
  - 07.01 Define principles of infection control including standard and transmission based precautions.
  - 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
  - 07.03 Demonstrate knowledge of surgical asepsis.
  - 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.
- 08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:
  - 08.01 Describe technology applications in healthcare.
  - 08.02 Define terms and demonstrate basic computer skills.
  - 08.03 Recognize technology applications in healthcare.
  - 08.04 Interpret information from electronic medical documents.
  - 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.

09.0 Demonstrate employability skills. – The student will be able to:

- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.
- 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
- 09.03 Identify documents that may be required when applying for a job.
- 09.04 Write an appropriate resume.
- 09.05 Conduct a job search.
- 09.06 Complete a job application form correctly.
- 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
- 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
- 09.09 Identify acceptable work habits.
- 09.10 Recognize appropriate affective/professional behavior.
- 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).

10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:

- 10.01 Recognize emerging diseases and disorders
- 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
- 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
- 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
- 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
- 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.

11.0 Apply basic math and science skills. – The student will be able to:

- 11.01 Draw, read, and report on graphs, charts and tables.
- 11.02 Measure time, temperature, distance, capacity, and mass/weight.
- 11.03 Make, use and convert using both traditional and metric units.
- 11.04 Make estimations and approximations and judge the reasonableness of the result.
- 11.05 Convert from regular to 24 hour time.
- 11.06 Demonstrate ability to evaluate and draw conclusions.
- 11.07 Organize and communicate the results obtained by observation and experimentation.
- 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
- 11.09 Calculate ratios

**Paramedic: Intended outcomes 12-40 lead to the occupational completion point of paramedic and students completing these outcomes may take the licensure exam for Paramedic.**

- 12.0 Demonstrate knowledge of the paramedic profession. – The student will be able to:
  - 12.01 Define the role and responsibilities of the paramedic.
  - 12.02 Describe and contrast the differences between the various levels of training, from EMT to Paramedic.
  - 12.03 List current state requirements for paramedic certification and recertification.
  - 12.04 Discuss Chapter 401, Florida Statutes, and Chapter 64E-2, Florida Administrative Code.
  - 12.05 State the major purposes of a national association, a national registry, and professional journals.
  - 12.06 State the benefits of paramedics teaching in their community.
  - 12.07 Define continuing education, certification, licensure and registration.
  
- 13.0 Describe EMS systems. – The student will be able to:
  - 13.01 Define and describe Medical Control and physician responsibility.
  - 13.02 Discuss pre-hospital stabilization of patients.
  - 13.03 Discuss the general differences between management of trauma and medical patients.
  - 13.04 Define and discuss protocols and their development.
  - 13.05 Describe the relationship between prehospital care and total patient care including the emergency department, and hospital specialty departments.
  - 13.06 Describe the continuum of patient care and the responsibilities of the paramedic within the transfer of patient responsibility.
  - 13.07 Discuss the development, implementation, and control of an EMS system.
  - 13.08 Discuss response of the EMS system including system access, dispatcher responsibilities, patient evaluation, medical command, and patient responsibility.
  - 13.09 Discuss promulgation of national standards such as KKK ambulance standards, and involvement of groups such as ASTM, NCSEMSTC, American College of Surgeons, American Medical Association Joint Review Committee, and the U S Department of Transportation.
  - 13.10 Discuss the various paramedic-physician relationships.
  - 13.11 Describe retrospective evaluation of patient care including run report review, continuing education, skill practice, and skill deterioration.
  - 13.12 Discuss the EMT-P's initial responsibilities when arriving on the scene.
  
- 14.0 Describe medical/legal considerations. – The student will be able to:
  - 14.01 Discuss the scope and significance of current national and Florida laws and administrative rules relating to the paramedic.
  - 14.02 Discuss medical-legal concepts relating to the paramedic.
  - 14.03 Discuss the need for accurate medical documentation and recordkeeping.
  - 14.04 Discuss the extent to which force and restraint may be used to protect the patient, the Paramedic, and third parties.

- 14.05 Identify those circumstances that require the Paramedic to report incidents to law enforcement and/or other appropriate authorities.
- 15.0 Describe and demonstrate EMS communications systems. – The student will be able to:
  - 15.01 Describe the phases of communication necessary to complete a typical EMS event.
  - 15.02 Define and describe essential communication equipment.
  - 15.03 Describe various EMS communication systems and the advantages and disadvantages of each.
  - 15.04 Describe factors affecting interference, range and clarity of base, vehicle and portable radio communications.
  - 15.05 Describe the functions and responsibilities of the F.C.C.
  - 15.06 Describe the functions and responsibilities of the EMS dispatcher.
  - 15.07 Describe purposes and methods of verbal communication of patient information to the hospital and to the physician.
  - 15.08 Organize a patient presentation in the proper order for radio transmission to the physician.
  - 15.09 Describe the importance of written medical protocols and the written EMS run report.
  - 15.10 Demonstrate the proper use of portable and mobile transmitter/receivers in a real or simulated patient situation.
  - 15.11 Discuss uses of biotelemetry equipment.
  - 15.12 Complete a written EMS report based on a real or simulated patient situation.
- 16.0 Demonstrate rescue techniques and extrication. – The student will be able to:
  - 16.01 Identify possible hazards when given a description of a scene and describe the procedures for handling the hazards.
  - 16.02 Identify and/or describe the equipment used and the techniques necessary for gaining access to, packaging, extricating and transporting patients trapped within a vehicle or other confinement.
  - 16.03 Describe the integration of patient care into the process of patient disentanglement and rescue.
  - 16.04 Identify proper response in the presence of hazardous materials and name proper hazardous materials authorities that should be notified.
  - 16.05 Manage scene and safe patient access.
  - 16.06 Discuss removal and transport of the patient from the scene.
  - 16.07 Demonstrate the procedures and operation of equipment used for gaining access to, packaging, extricating, and transporting patients trapped or confined in a vehicle or other type of entrapment.
  - 16.08 Demonstrate techniques for lifting and handling patients with and without spine injuries and/or other special injury problems utilizing the specialized equipment found on a rescue vehicle.
- 17.0 Describe major incident response. – The student will be able to:
  - 17.01 Define mass casualty incident (MCI) and when it should be declared.
  - 17.02 Describe the "pre-planning phase" and "response planning".
  - 17.03 Discuss MCI communications.
  - 17.04 Describe the components of special resources.

- 17.05 Describe the function of "scene command", "scene triage", and the "transferring command function".
  - 17.06 Describe section and staging management and a system for patient identification.
  - 17.07 Discuss on-scene medical control.
- 18.0 Describe and manage causes of stress. – The student will be able to:
- 18.01 Define stress and discuss its causes and phases.
  - 18.02 Describe common physiologic responses to stress and its effects.
  - 18.03 Describe factors that determine whether anxiety is a positive or negative response.
  - 18.04 Describe behavior that is a manifestation of stress in patients, patients' families and the paramedic.
  - 18.05 Describe common causes of job-related stress and various techniques of paramedic stress management.
  - 18.06 Describe the stages of the grief process and common needs of the patient, the family and the paramedic in dealing with death and dying.
  - 18.07 Describe common management techniques used by the paramedic when a patient is dead or dying.
  - 18.08 Discuss areas of controversy in prehospital care involving death and dying.
- 19.0 Use medical terms specific to EMS. – The student will be able to:
- 19.01 Read, write, use and respond correctly to terms specific to EMS.
  - 19.02 Read, write, use and respond correctly to abbreviations specific to EMS.
- 20.0 Demonstrate general patient assessment and initial management. – The student will be able to:
- 20.01 Establish priorities of care based on threat to life and describe the treatment modalities for the management of these conditions.
  - 20.02 Describe the primary and secondary survey.
  - 20.03 Describe the anatomy, physiology and pathophysiology of the airway and lungs and their anatomical structures.
  - 20.04 Describe the use of adjuncts in airway management.
  - 20.05 Describe advanced methods of airway management.
  - 20.06 Explain the significance of protection of the cervical spine in airway management.
  - 20.07 Explain pulmonary ventilation and gas exchange across the alveolar-capillary membrane.
  - 20.08 Describe the pathophysiology of open and closed pulmonary injuries.
  - 20.09 Discuss the techniques for evaluating effectiveness of ventilation.
  - 20.10 Describe the anatomy and physiology of the heart and the cardiovascular system.
  - 20.11 Describe the pathophysiology of cardiac arrest.
  - 20.12 Describe the mechanisms of evaluating the effectiveness of perfusion.
  - 20.13 Describe hemorrhage control and its benefits and complications.
  - 20.14 Assess neurological status.
  - 20.15 Discuss the pathophysiology of shock.
  - 20.16 Define the trauma score and its usefulness.
  - 20.17 Demonstrate obtaining a relevant patient medical history.

- 20.18 Describe how a patient is packaged and stabilized for transportation to the hospital.
  - 20.19 Discuss procedures for hospital selection, the transportation phase, and patient monitoring enroute to the hospital.
  - 20.20 Perform a rapid assessment.
  - 20.21 Perform a secondary survey.
  - 20.22 Demonstrate cardiopulmonary resuscitation.
- 21.0 Manage airway and ventilation. – The student will be able to:
- 21.01 Describe and discuss techniques of advanced airway management, to include intubation and surgical procedures.
  - 21.02 Demonstrate methods of airway management on adult, child, and intact manikins both manually and with adjunctive equipment.
  - 21.03 Demonstrate methods for assessing continued adequacy of airway management and ventilation when using advanced airway devices.
  - 21.04 Demonstrate use of portable and fixed suction devices for oropharyngeal and tracheal suctioning.
- 22.0 Assess and manage shock. – The student will be able to:
- 22.01 Identify and describe the causes, pathophysiology signs, symptoms, clinical manifestations, and management of shock.
  - 22.02 Describe fluids, fluid transport, and fluid and electrolyte imbalances.
  - 22.03 Discuss resuscitation of the shock patient.
  - 22.04 Discuss the hemodynamics of the cardiovascular system.
  - 22.05 Discuss differences in IV fluid composition and their implications in fluid administration.
  - 22.06 Describe baroreceptors and their affect on blood pressure and perfusion.
  - 22.07 Describe compensated and uncompensated shock.
  - 22.08 Discuss evaluation of the patient's perfusion status.
  - 22.09 Define and discuss acid-base balance.
  - 22.10 Describe indications and contraindications of the pneumatic anti-shock garment.
  - 22.11 Discuss the methods of fluid replacement and the advantages and disadvantages of each.
  - 22.12 Demonstrate, in order of priority, the steps in shock resuscitation.
  - 22.13 Demonstrate the use of the pneumatic anti-shock garment.
  - 22.14 Demonstrate proper technique of setting up intravenous fluids for administration.
  - 22.15 Demonstrate proper technique of peripheral and external jugular venous cannulation on the adult, child and infant patient.
  - 22.16 Demonstrate proper techniques for trouble-shooting an intravenous infusion.
  - 22.17 Calculate fluid administration rates for intravenous fluids utilizing a variety of administration sets.
- 23.0 Demonstrate knowledge of pharmacology and administer medications. – The student will be able to:
- 23.01 Discuss the various origins and forms of drugs.
  - 23.02 Discuss the various names of a drug (i.e. generic, trade, official, chemical).
  - 23.03 Identify those agencies responsible for regulating drugs and the rationale for regulation.

- 23.04 Demonstrate use of the Physicians Desk Reference.
  - 23.05 Identify local and systemic effects of drugs.
  - 23.06 List and evaluate effects of various factors on the action of drugs.
  - 23.07 Discuss the methods of drug absorption.
  - 23.08 Define and use relevant pharmacology terms.
  - 23.09 Describe and discuss the apothecary and metric systems and convert between and within the systems.
  - 23.10 Describe the various types of drugs and routes of administration.
  - 23.11 Calculate fractional drug dosages.
  - 23.12 State the advantages and disadvantages of subcutaneous, intramuscular, intravenous, and transtracheal injections.
  - 23.13 Demonstrate the proper procedure for intramuscular, subcutaneous, intravenous piggyback, intravenous bolus, and transtracheal medication administration.
  - 23.14 Demonstrate the proper procedure for withdrawing medication from a glass vial and a glass ampule.
- 24.0 Assess and manage trauma emergencies. – The student will be able to:
- 24.01 Describe the general care and transportation of the trauma patient.
  - 24.02 Describe the priorities of trauma care and triage with multiple patients.
  - 24.03 Describe the anatomy, physiology, pathophysiology assessment, and management of trauma to all regions of the human body.
  - 24.04 Describe and demonstrate methods of hemorrhage control.
  - 24.05 Describe neurological examination, assessment, pathophysiology, and management.
  - 24.06 Describe rapid on-scene management of the trauma patient.
  - 24.07 Describe the components of a complete prehospital history and the significance of each.
  - 24.08 Describe various types of splints that are used for immobilization of fractures and dislocations, their use and the advantages and disadvantages of each.
  - 24.09 Describe the short and long backboard, the various state-of-the-art substitutes available, and their specific uses.
  - 24.10 Describe various systems designed for scoring the severity of injuries to the trauma patient and contrast with them with the Florida Trauma Scorecard as identified in Chapter 64E-2, F.A.C.
  - 24.11 Identify and describe the use of a trauma score in quantifying patient condition.
  - 24.12 Demonstrate advanced methods of airway management and ventilation in the trauma patient.
  - 24.13 Demonstrate decompression of a tension pneumothorax.
  - 24.14 Demonstrate application of pneumatic anti-shock garment (MAST).
  - 24.15 Describe and demonstrate physical examination of the trauma patient.
  - 24.16 Demonstrate a neurological examination as performed on the trauma patient.
  - 24.17 Demonstrate immobilization of the cervical spine.
  - 24.18 Demonstrate splinting techniques.
- 25.0 Assess and manage burn injuries. – The student will be able to:
- 25.01 Describe the anatomy, physiology, pathophysiology, and assessment of the integumentary system.
  - 25.02 Discuss the movement of body fluids between plasma, interstitial compartments and intracellular compartments.

- 25.03 Describe the assessment and management of the burn victim.
- 25.04 Describe the pathophysiology and treatment of burn shock.
- 25.05 Describe and discuss the major causes, classifications, and categories of burn.
- 25.06 Describe and discuss the method of calculating percentages of body surface area burned and various formulas for calculating fluid resuscitation.
- 25.07 Describe the assessment and management of inhalation injury.
- 25.08 Demonstrate management of the burn victim with and without associated injuries.

26.0 Assess and manage respiratory emergencies. – The student will be able to:

- 26.01 Describe the anatomy and physiology of the respiratory system and define appropriate medical terms.
- 26.02 Identify the normal partial pressures of oxygen and carbon dioxide in the alveoli, arterial and venous blood, and factors that affect those levels.
- 26.03 Describe the normal and COPD respiratory drives.
- 26.04 Identify the pharmacology, actions, indications, precautions, dosages, contraindications, and side effects of typical respiratory drugs for the adult and pediatric patient and demonstrate methods of administration.
- 26.05 Discuss the signs, symptoms, and pathophysiology of conditions affecting the respiratory system.
- 26.06 Demonstrate inspection, auscultation and palpation of the thorax.
- 26.07 Identify normal and abnormal lung sounds.
- 26.08 Obtain a history and assess patients with respiratory complaints.
- 26.09 Describe the management of patients with respiratory problems.

27.0 Assess and manage cardiovascular emergencies. – The student will be able to:

- 27.01 Describe the anatomy, physiology, and pathophysiology relevant to cardiovascular disease and emergencies.
- 27.02 Identify the pharmacology, actions, indications, precautions, methods of administration, dosages, contraindications, and side effects of common emergency cardiovascular drugs (AHA/ACLS).
- 27.03 Identify complications of intracardiac injections.
- 27.04 Describe innervation of the heart, sympathetic and parasympathetic stimulation, blockade, and effects on the heart rate.
- 27.05 Discuss myocardial electrical physiology.
- 27.06 Describe signs, symptoms, and common chief complaints of patients with cardiac conditions.
- 27.07 Identify and describe the historical information, specific observations, and physical findings to be evaluated in the cardiac patient.
- 27.08 Identify actions, uses, and side effects of common prescription drugs relative to cardiac problems.
- 27.09 Discuss the etiology of cardiac arrest in adults and pediatric patients.
- 27.10 Discuss concepts of ECG monitoring, types and causes of artifacts, and rhythm analysis format.
- 27.11 Identify the wave forms, intervals, and normal values relative to an electrocardiogram (ECG).
- 27.12 Describe a 12-lead ECG and compare to continuous monitoring.
- 27.13 Describe the etiology, clinical significance, and ECG characteristics of cardiac dysrhythmias.

- 27.14 Describe the indications for use of a precordial thump, vago tonic maneuvers, synchronized cardioversion, and defibrillation and discuss energy recommendations for adult and pediatric patients.
  - 27.15 Identify wave forms, artifacts, and dysrhythmias on Lead or MC11 rhythm strips and oscilloscope.
  - 27.16 Obtain history, assess, and manage dysrhythmias or cardiac condition.
  - 27.17 Demonstrate application of ECG electrodes and obtain a sample Lead II or MC11 rhythm strip.
  - 27.18 Use defibrillator paddles for Lead II monitoring.
  - 27.19 Troubleshoot a poor ECG rhythm.
  - 27.20 Perform a precordial thump, vago tonic maneuvers, synchronized cardioversion, defibrillation, and external cardiac pacing.
  - 27.21 Use a mechanical CPR device.
- 28.0 Assess and manage endocrine emergencies. – The student will be able to:
- 28.01 Identify and describe the anatomy, physiology, pathophysiology of the endocrine system.
  - 28.02 Describe the assessment and management of endocrine emergencies.
  - 28.03 Identify and discuss the significance of the historical information, observations, and physical findings in the patient with endocrine disorders.
  - 28.04 Identify common prescription drugs that a patient with endocrine problems might take and the implications of each.
  - 28.05 Identify the pharmacology, actions, indications, precautions, methods of administration, dosages, contraindications, and side effects of relevant drugs.
  - 28.06 Obtain a history and assess and manage patients with endocrine problems.
  - 28.07 Administer relevant drugs.
- 29.0 Assess and manage neurological emergencies. – The student will be able to:
- 29.01 Identify and describe the anatomy, physiology, pathophysiology of the neurological system.
  - 29.02 Describe the assessment and management of neurological disorders.
  - 29.03 Identify the actions, uses and side effects of common prescription drugs relative to neurological problems.
  - 29.04 Identify common prescription drugs that a patient with neurological problems might take and the implications of each.
  - 29.05 Identify the pharmacology, actions, indications, precautions, methods of administration, dosages, contraindications, and side effects of relevant drugs.
  - 29.06 Describe and use the Glasgow Coma Scale.
  - 29.07 Describe and differentiate various types of seizures and their phases.
  - 29.08 Obtain history and assess patients with neurological disorders.
  - 29.09 Manage patients with neurological emergencies.
- 30.0 Assess and manage digestive, genitourinary, and reproductive emergencies. – The student will be able to:
- 30.01 Describe the anatomy, physiology, pathophysiology of the digestive, genitourinary and reproductive systems.

- 30.02 Identify and describe the significance of the historical information, observations, and physical findings in the patient with digestive, genitourinary, and reproductive disorders.
  - 30.03 Describe the assessment and treatment of digestive, genitourinary, and reproductive system disorders.
  - 30.04 Identify common prescription drugs that a patient with digestive, genitourinary, and reproductive problems might take and the implications of each.
  - 30.05 Discuss the basic principles, types, and complications of dialysis.
  - 30.06 Discuss the assessment and management of the dialysis patient, to include vascular access.
  - 30.07 Obtain a history and assess patients with digestive, genitourinary, and reproductive problems.
  - 30.08 Manage patients with digestive, genitourinary, and reproductive emergencies.
- 31.0 Assess and manage anaphylaxis emergencies. – The student will be able to:
- 31.01 Describe the anatomy, physiology, pathophysiology, causes, signs and symptoms, assessment and management of anaphylaxis.
  - 31.02 Identify and discuss the significance of historical information, observations, and physical findings in the patient with potential anaphylaxis.
  - 31.03 Identify the pharmacology, actions, indications, precautions, methods of administration, dosages, contraindications, and side effects for the adult and pediatric patient for epinephrine, diphenhydramine, aminophylline, and dexamethasone.
  - 31.04 Obtain a history and assess patients with potential anaphylaxis.
  - 31.05 Manage patients with anaphylactic emergencies.
  - 31.06 Administer epinephrine, diphenhydramine, aminophylline, and dexamethasone to the adult and pediatric patient.
- 32.0 Assess and manage toxicological, alcohol, and drug abuse emergencies. – The student will be able to:
- 32.01 Discuss toxicologic emergencies.
  - 32.02 Identify and discuss the routes of entry of toxic substances into the body.
  - 32.03 Discuss the role of Poison Control Centers in the EMS system and in the management of patients with toxicological emergencies.
  - 32.04 Define abuse terms, identify commonly abused drugs, and describe their effects.
  - 32.05 Describe the anatomy, physiology, pathophysiology assessment and management of patients with toxicological emergencies, animal or insect bites, stings, drug overdose, and alcoholism.
  - 32.06 Discuss the incidence of alcoholism, drug abuse, and substance abuse in the United States.
  - 32.07 obtain a history, assess, and manage patients with toxicological emergencies, animal or insect bites, stings, drug overdose, and alcoholism.
  - 32.08 Administer relevant drugs.
  - 32.09 Apply a constricting band.
- 33.0 Assess and manage infectious diseases. – The student will be able to:
- 33.01 Define terms and conditions relative to infectious diseases.

- 33.02 Describe the anatomy, physiology, pathophysiology, causes, mode of transmission, incubation period, assessment and management typical infectious and communicable diseases and parasites.
  - 33.03 Identify and discuss the significance of historical information, observations, and physical findings in the patient with infectious/communicable disease or parasites.
  - 33.04 Practice Universal Precautions according to established standards (CDC).
  - 33.05 Discuss procedures for reporting and follow-up after exposure to a communicable disease, according to established standards.
  - 33.06 Describe methods used to disinfect equipment and vehicles involved with an infectious patient.
  - 33.07 Obtain a history and assess patients with infectious/communicable diseases or parasites.
  - 33.08 Manage patients with infectious/communicable disease or parasites.
- 34.0 Assess and manage environmental injuries. – The student will be able to:
- 34.01 Describe and discuss homeostasis, methods of body temperature regulation and the role and methods of thermoregulation and heat dissipation and retention in pathologic circumstances.
  - 34.02 Identify and discuss the significance of historical information, observations, and physical findings in the patient with hypothermic or hyperthermic disorders.
  - 34.03 Describe the anatomy, physiology, pathophysiology, causes, signs and symptoms, assessment and management of hypothermic or hyperthermic disorders.
  - 34.04 Describe the anatomy, physiology, pathophysiology, signs and symptoms, assessment and management of near-drowning.
  - 34.05 Identify and discuss the significance of historical information, observations, and physical findings in the patient with a near-drowning emergency.
  - 34.06 State the factors affecting survivability and probability of successful resuscitation in near-drowning patients.
  - 34.07 Identify the common types and sources of ionizing radiation.
  - 34.08 Identify sources of normal background radiation.
  - 34.09 Describe the anatomy, physiology, pathophysiology, signs and symptoms, assessment and management of acute and/or chronic exposure to ionizing radiation.
  - 34.10 Identify and discuss the significance of historical information, observations, and physical findings in the patient with acute and/or chronic exposure to ionizing radiation.
  - 34.11 Discuss the safety of allied health personnel and patients related to exposure to ionizing radiation.
  - 34.12 Discuss procedures relating to radiological incidents for notification of appropriate health officials.
  - 34.13 List the common medical problems associated with scuba diving accidents.
  - 34.14 Describe the anatomy, physiology, pathophysiology, signs and symptoms, assessment and management of decompression sickness, overpressure accidents, pneumomediastinum, air embolism, nitrogen narcosis, and subcutaneous emphysema.
  - 34.15 Identify and discuss the significance of historical information, observations, and physical findings in patients with decompression sickness, overpressure

- accidents, pneumomediastinum, air embolism, nitrogen narcosis, and subcutaneous emphysema, and the significance of each.
- 34.16 Obtain a history and assess patients with hypothermic and hyperthermic problems.
  - 34.17 Discuss management of patients with hypothermic and hyperthermic complaints.
  - 34.18 Obtain a history and assess patients with exposure to ionizing radiation.
  - 34.19 Discuss management of patients with exposure to ionizing radiation.
  - 34.20 Obtain a history and assess patients with near-drowning emergencies.
  - 34.21 Discuss management of patients with near-drowning emergencies.
  - 34.22 Obtain a history and assess patients with scuba diving emergencies.
  - 34.23 Discuss management of patients with scuba diving emergencies.
- 35.0 Assess and manage geriatric emergencies. – The student will be able to:
- 35.01 Identify the physical, social and psychological differences between youth and the elderly.
  - 35.02 Identify and discuss the significance of historical information, observations, and physical findings in the geriatric patient with acute and/or chronic medical problems.
  - 35.03 Identify and discuss illness/complaints that require special consideration in the elderly.
  - 35.04 Describe the anatomy, physiology, pathophysiology, assessment and management of common geriatric illnesses.
  - 35.05 Obtain a history and assess geriatric patients.
  - 35.06 Treat geriatric patients.
  - 35.07 Discuss geriatric abuse.
  - 35.08 Discuss the components and objectives of a gerontology program.
- 36.0 Assess and manage pediatric emergencies. – The student will be able to:
- 36.01 Identify the general goals of management of the pediatric patient.
  - 36.02 Discuss specific historical information and its sources in evaluating the pediatric patient.
  - 36.03 Discuss by age groups the relevant aspects of normal growth and development, personality development, relationship to parents, history factors, common illnesses and accidents.
  - 36.04 Describe Sudden Infant Death Syndrome (SIDS), current theories, assessment and management, and the immediate needs of the family.
  - 36.05 Describe the characteristics of the child abuser and the abused child.
  - 36.06 Discuss the assessment and management of the potentially abused child including important historical information and management of the family in the child abuse situation.
  - 36.07 Describe the anatomy, physiology, pathophysiology, assessment, and management of common pediatric disorders.
  - 36.08 Identify the pediatric dosage for relevant drugs (AHA/ACLS).
  - 36.09 Discuss and demonstrate techniques for airway maintenance in the pediatric patient.
  - 36.10 Describe and discuss techniques and sites for intravenous infusion in the pediatric patient.
  - 36.11 Obtain history and assess the pediatric patient.

- 37.0 Assess and manage the gynecologic patient. – The student will be able to:
- 37.01 Describe the anatomy and physiology of the female reproductive system.
  - 37.02 Identify and discuss the significance of historical information, observations, and physical findings to be evaluated in the patient's gynecologic problems.
  - 37.03 Describe the pathophysiology and management of gynecological disorders.
  - 37.04 Describe potential causes, assessment and management of trauma to the external genitalia.
  - 37.05 Describe the assessment and management of a sexual assault victim.
  - 37.06 Obtain a history and assess and manage the patient with a gynecologic problem.
- 38.0 Assess and manage the obstetric patient. – The student will be able to:
- 38.01 Define obstetrical terminology.
  - 38.02 Describe the process of fetal development and circulation.
  - 38.03 Identify and discuss the significance of historical information, observations, and physical findings in the obstetric patient.
  - 38.04 Identify and describe early signs and symptoms of pregnancy.
  - 38.05 Describe potential causes, assessment, and management of trauma to the pregnant mother and the fetus.
  - 38.06 Discuss the effects of pregnancy on pre-existing medical conditions.
  - 38.07 Describe the anatomy, physiology, pathophysiology, causes, assessment and management of obstetric.
  - 38.08 Describe Braxton-Hicks contractions.
  - 38.09 Discuss the progression of labor.
  - 38.10 Discuss factors that influence transport decisions for the patient in labor.
  - 38.11 Describe a normal cephalic delivery.
  - 38.12 Discuss the pathophysiology, assessment, and management of delivery complications.
  - 38.13 Identify the pharmacology, actions, indications, methods of administration, dosages, contraindications and side effects of oxytocin.
  - 38.14 Obtain a history and assess the obstetric patient.
  - 38.15 Treat obstetrical patients, including assisting with childbirth.
  - 38.16 Administer oxytocin.
- 39.0 Assess and manage the neonate. – The student will be able to:
- 39.01 Describe anatomy, physiology, pathophysiology, assessment, and routine management of the neonate.
  - 39.02 Describe the mechanisms and effects, and treatment of hypothermia in the neonate.
  - 39.03 Define the parameters, numerical values utilized, and the procedure for Apgar scoring.
  - 39.04 Describe and demonstrate stimulation of and CPR for the distressed neonate.
  - 39.05 Identify observations and physical findings to be evaluated in the neonate.
  - 39.06 Identify the problems and equipment requirements for transportation of the neonate.
  - 39.07 Obtain a history, assess, and manage the neonate.
  - 39.08 Administer oxygen to the neonate.
  - 39.09 Suction the neonate using DeLee Suction and bulb syringe.
  - 39.10 Calculate Apgar score.

- 40.0 Assess and manage behavioral emergencies. – The student will be able to:
- 40.01 Define behavioral emergency.
  - 40.02 Discuss factors that may alter the emotional status of the ill or injured.
  - 40.03 Discuss reasons and method of reassuring the patient experiencing and emotional crisis.
  - 40.04 Discuss verbal communication techniques useful in managing the emotionally disturbed patient.
  - 40.05 Discuss means to insure the safety of the Paramedic.
  - 40.06 Discuss circumstances when bystanders and relatives should be removed from the scene.
  - 40.07 Discuss factors which increase the risk of suicide and behaviors that are indicators of an impending suicide attempt.
  - 40.08 Discuss the techniques that facilitate the systematic gathering and reporting of information about the disturbed patient.
  - 40.09 Discuss techniques that are useful in managing the effects of crisis situations on the Paramedic.
  - 40.10 Discuss techniques that are useful in redirecting anxiety in relatives and bystanders.
  - 40.11 Discuss appropriate action of the Paramedic when confronted with an uncontrollable, armed patient.
  - 40.12 Discuss those situations in which the EMT-Paramedic may forcibly restrain or transport a patient.
  - 40.13 Discuss and demonstrate techniques for restraining the violent patient.
  - 40.14 Discuss and demonstrate techniques useful in protecting the EMT-Paramedic when attacked by a violent patient.
  - 40.15 Obtain a history, assess, and manage patients with behavioral emergencies.

**Management Option: This option (outcomes 41-51) prepares students for administrative and supervisory positions in the emergency Medical Services field.**

- 41.0 Demonstrate leadership and administrative skills basic to management emergency medical service systems. – The student will be able to:
- 41.01 Describe an emergency medical service system, its scope, national, state and local involvement, and the organizational climate that serves as the setting and framework for managing an emergency medical service system.
  - 41.02 Identify current trends and perspectives related to the management of health care organizations in general, and emergency medical service systems in particular, and the means by which the application of sound management principles and behavior can facilitate change.
  - 41.03 Interpret managerial principles, practices and processes and relate them to emergency medical service systems.
  - 41.04 Identify the role, responsibilities and parameters for the various levels of management within emergency medical service systems.
  - 41.05 State the control processes and techniques used to ensure that the objectives, strategies, and policies of the emergency medical service system are achieved effectively and efficiently.
  - 41.06 Relate the various aspects of organizational dynamics (decision making, motivations, leadership, and communication) to the needs and problems of emergency medical service systems.
  - 41.07 Relate personnel administration practices to the total scope of labor relations, including manpower acquisition, maintenance, and utilization.
- 42.0 Interpret federal, state and local laws as they apply to emergency medical service systems. – The student will be able to:
- 42.01 List and discuss federal, state and local laws, administrative rules, requirements and recommendations relating to emergency medical service systems.
  - 42.02 List required standards and procedures for facility and staff.
  - 42.03 Identify mandatory requirements regarding environmental health and safety standards.
  - 42.04 Discuss the impact of legislative changes on emergency medical service systems.
- 43.0 Demonstrate knowledge of operational and organizational structures of emergency medical service systems. – The student will be able to:
- 43.01 Describe the functions and standards of departments in emergency medical service systems.
  - 43.02 Contrast administrative roles and responsibilities in different types of emergency medical service systems.
  - 43.03 Describe principles and philosophies of emergency medical service systems.
  - 43.04 Identify several basic principles of emergency medical care.
  - 43.05 Describe communication techniques within health care systems.
  - 43.06 Utilize state of the art language and terminology when communicating within the emergency medical service system.

- 44.0 Demonstrate knowledge of psychological problems and stressors in emergency medical service employees and find appropriate solutions. – The student will be able to:
- 44.01 Demonstrate knowledge of the worth and dignity of each employee.
  - 44.02 Accommodate individual differences, characteristics, and behaviors.
  - 44.03 Adjust employee schedules, personnel assignments, etc. to provide optimum performance.
- 45.0 Demonstrate knowledge of materials and supplies used in emergency medical service systems. – The student will be able to:
- 45.01 Evaluate current inventory.
  - 45.02 Prepare purchase orders with knowledge of current financial status and budgetary constraints.
  - 45.03 Demonstrate knowledge of optimum quality, price, and quantity.
- 46.0 Demonstrate knowledge of occupational safety and health. – The student will be able to:
- 46.01 Prepare a plan for employee safety in the event of emergency situations involving business or office facilities.
  - 46.02 Identify hazardous materials and substances in the workplace.
  - 46.03 Identify appropriate storage facilities for all substances.
  - 46.04 Conduct inservice for employees.
  - 46.05 Respond to employee inquiries and post notices as needed.
  - 46.06 Implement Appropriate THE JOINT COMMISSION patient safety goals.
- 47.0 Demonstrate knowledge of appropriate workloads for each employee. – The student will be able to:
- 47.01 Prepare job descriptions.
  - 47.02 Prepare job advertisements and notices.
  - 47.03 Compute man-hours required for each job position within the emergency medical service system.
  - 47.04 Identify factors that alter the workload and man-hours computed for each position.
- 48.0 Review, approve and monitor departmental capital and operational budgets. – The student will be able to:
- 48.01 Develop capital budget justification format.
  - 48.02 Delegate capital budget preparation to key managers.
  - 48.03 Analyze and approve appropriate capital budget items.
  - 48.04 Develop an operational budget format.
  - 48.05 Analyze and approve appropriate financial levels in each operational budget.
- 49.0 Identify and apply legal reimbursement systems. – The student will be able to:
- 49.01 Establish an item charge system that meets reimbursement system requirements.
  - 49.02 Establish a mechanism for utilization review and quality assurance.

- 49.03 Develop an accounts receivable system which monitors and optimizes reimbursement.
- 50.0 Comply with accreditation standards of governmental or governmental-appointed agencies and organizations. – The student will be able to:
  - 50.01 Describe and discuss procedures to meet required standards for emergency medical service systems.
  - 50.02 Identify the required standards for health care personnel in general and emergency medical service personnel in particular.
  - 50.03 Develop policies and operational procedures to meet required standards.
  - 50.04 Establish liaison mechanisms with appropriate accrediting organizations.
- 51.0 Demonstrate computer literacy. – The student will be able to:
  - 51.01 Describe and demonstrate function and operation of basic computer systems.
  - 51.02 Describe and demonstrate various types of computer systems and their specific applications.
  - 51.03 Describe and demonstrate general applications such as word processing, database management, spreadsheets, and communications.
  - 51.04 Describe and discuss special applications such as computer-aided dispatch (CAD), quality assurance, and inventory control.

**Education Option: This option (outcomes 52-57) prepares students as trainers and/or instructors in the EMS field.**

- 52.0 Demonstrate knowledge of basic teaching methods, learning and educational psychology. – The student will be able to:
  - 52.01 Describe and demonstrate various methods of student learning.
  - 52.02 Describe and demonstrate various methods of teaching as they apply to student learning techniques.
  - 52.03 Describe and demonstrate competency-based education (CBE).
  - 52.04 Describe and demonstrate short-term and long-term memory and the implications of each on the student learning process.
  - 52.05 Describe and demonstrate various educational psychologies.
  
- 53.0 Describe and discuss curriculum design and development. – The student will be able to:
  - 53.01 Develop and discuss needs assessments.
  - 53.02 Develop a task analysis.
  - 53.03 Develop student behavioral objectives.
  - 53.04 Design and develop competency-based curriculum.
  - 53.05 Integrate curriculum with current occupational responsibilities.
  - 53.06 Perform on-going curriculum review and development.
  
- 54.0 Demonstrate appropriate measurement and evaluation skills. – The student will be able to:
  - 54.01 Construct appropriate objective tests commensurate with curriculum.
  - 54.02 Develop effective measurement instruments for student performance in clinical settings.
  - 54.03 Develop effective evaluation tools for evaluating student performance.
  - 54.04 Record, monitor, and provide feedback to student regarding student progress.
  
- 55.0 Demonstrate mastery of required technical skills. – The student will be able to:
  - 55.01 Demonstrate performance of basic life support instructor skills.
  - 55.02 Demonstrate performance of advanced life support instructor skills.
  - 55.03 Demonstrate performance of trauma life support instructor skills.
  - 55.04 Demonstrate performance of other medical skills appropriate to the emergency medical services curriculum.
  
- 56.0 Demonstrate classroom management skills. – The student will be able to:
  - 56.01 Demonstrate and apply effective leadership skills.
  - 56.02 Demonstrate and apply effective motivational skills.
  - 56.03 Demonstrate and apply effective organizational skills.
  - 56.04 Demonstrate and apply effective disciplinary skill.
  
- 57.0 Demonstrate computer literacy. – The student will be able to:

- 57.01 Describe and discuss various types of computer systems and their specific applications as they relate to Emergency Medical Services.
- 57.02 Describe and discuss applications such as word processing, database management, spreadsheets, communications, and computer-aided instruction (CAI) as they relate to Emergency Medical Services.

2011 - 2012

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Medical Clinical Dosimetry  
**Career Cluster:** Health Science

<b>CCC</b>	
CIP Number	0317020701
Program Type	College Credit Certificate (CCC)
Program Length	31 credit hours
CTSO	HOSA
SOC Codes (all applicable)	31-9099, 29-2033
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>

### **Purpose**

This certificate program is part of the Radiation Therapy AS/AAS degree program (1317.020901).

A College Credit Certificate consists of a program of instruction of less than sixty (60) credits of college-level courses, which is part of an AS or AAS degree program and prepares students for entry into employment (Rule 6A-14.030, F.A.C.).

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

The purpose of this program is to prepare students for employment as dosimetrist SOC Code 29-2033 (Nuclear Medicine Technologists) or provide supplemental training for persons previously or presently employed in a related imaging occupation (i.e. radiologic technology, radiation therapy, etc.).

The content includes but is not limited to practice the art of radiation therapy as a modality of treatment; to aid in development and implementation of a plan of treatment prescribed by the Radiation Therapist which will deliver treatments of the highest caliber, thereby providing the patient treatment planning of the highest quality and accuracy; to become members of the health care team that contributes to the physical and psychological comfort of the patient; to provide radiation protection to the patient, self and health care team; to provide a system of quality assurance for both equipment and treatment delivery; to design and fabricate specialized treatment aids necessary to offer state-of-the-art treatments; to assist the Physicist in the detection of erratic performance of equipment; to assist the Radiation Therapist in the

preparation and administration of internal (brachytherapy) radiation therapy treatments, to work with the health care team to improve radiotherapeutic health care in the hospital and community; to manage personnel and the daily routine functions associated with a radiation therapy department; and to understand the importance of maintaining membership in the professional organizations and keeping abreast of the changes in the field of radiation therapy.

The program is designed to provide the radiation therapy community with workers who, under the supervision of a Radiation Oncologist and/or Physicist, aids in the treatment of disease with ionizing radiation. The curriculum provides students an opportunity to develop technical and social skills through experiences in the clinic, classroom, and laboratory.

### **Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

Clinical education or internship has been established for students in this program. It is designed to permit accurate assessment of the knowledge, skills and abilities of students in the clinical intern component of the program. After completion of the prerequisite practice of clinical internship in dosimetry procedures, students indicate to the faculty his/her readiness for evaluation of competence in a specific competency category/procedure.

### **Special Notes**

This program meets the Department of Health HIV/AIDS Domestic Violence and Prevention of Medical Errors education requirements. Upon completion of this program, the instructor will provide a certificate to the student verifying that these requirements have been met.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635 F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

Multiple affiliates are utilized for the clinical internship activities which provide equitable opportunities for the student to achieve the program clinical objectives. The resulting clinical internship rotations provide students with the techniques of dosimetry for the delivery of treatments utilizing a variety of megavoltage equipment, simulation and localization, machine calibration, quality assurance, radiation protection, preparation and handling of brachytherapy sources and systems of documentation and verification.

The designation of PSV-C requires that the student have an associate degree in a related field of study (i.e., radiologic technology, radiation therapy, etc.). Upon the successful completion of the program the student will receive a certificate in Medical Clinical Dosimetry.

Students are encouraged to become members of their appropriate professional organizations such as the American Society of Radiologic Technologists (ASRT), Florida Society of Radiologic Technologists (FSRT) and its' local affiliate.

Student membership in the professional organization, America Association of Medical Dosimetrists, is encouraged.

Outcomes 01-11 are referred to as the Health Careers Core and do not have to be completed if the student has previously completed the Core in another health science program. The Core should be taken first or concurrently with the first course in the program. Following the successful completion of the core, the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

### **Career and Technical Student Organization (CTSO)**

Health Occupations Students of America, Inc. (HOSA) is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

### **Standards**

After successfully completing this course the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.
- 12.0 Discuss the patient's diagnosis with the Radiation Therapist and what he/she wishes to achieve by irradiation.
- 13.0 Supervise or accomplish simulation and localization of the treatment volume by topographical landmarks and verification (portal) filming and prepare the contour or contours for the patient.

- 14.0 Prepare daily set-up sheets detailing information relating to dose, daily dose per field, field weighting, wedges, shielding, etc. and to prepare final chart check and dosage summary after completion of therapy for presentation to the Radiation Therapist.
- 15.0 Apply isodose charts or computer to the treatment problem to produce a treatment plan or plans for presentation to the Radiation Therapist.
- 16.0 Calculate, using hand or computer, the setting necessary to accomplish the treatment plan as approved by the Radiation Therapist.
- 17.0 Supervise or accomplish planning for special procedures; skin compensatory filters; field separation; cutting custom designed blocks; construction of wedge filters; construction of other shielding devices.
- 18.0 Supervise mold room techniques including immobilization casts.
- 19.0 Responsible for quality control and accurate beam alignment in all patient set-ups.
- 20.0 Function as an assistant Radiation Therapist and Physicist in intracavitary/interstitial implant procedures and prepare the dose calculation for these.
- 21.0 Assist the Radiation Therapy Physicist in calibration procedures, detection of erratic performance of equipment, and in the organization and maintenance of the radiation protection program.
- 22.0 Be responsible for "in vivo" dosimetry.
- 23.0 Work with the Radiation Therapist and Physicist with the implementation of new techniques of radiation therapy.

2011 - 2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Medical Clinical Dosimetry  
**CIP Number:** 0317020701  
**Program Length:** 31 credit hours  
**SOC Code(s):** 31-9099, 29-2033

This certificate program is part of the Radiation Therapy AS/AAS degree program (1317.020901). At the completion of this program, the student will be able to:

**Health Careers Core: The Health Careers Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Careers Core or any other health occupations program do not have to repeat intended outcomes 01-11.**

01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:

- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
- 01.02 Identify common methods of payment for healthcare services.
- 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
- 01.04 Describe the composition and functions of a healthcare team.
- 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
- 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
- 01.07 Identify characteristics of effective teams.
- 01.08 Recognize methods for building positive team relationships.
- 01.09 Analyze attributes and attitudes of an effective leader.
- 01.10 Recognize factors and situations that may lead to conflict.
- 01.11 Demonstrate effective techniques for managing team conflict.
- 01.12 Describe factors that influence the current delivery system of healthcare.
- 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.

02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:

- 02.01 Develop basic speaking and active listening skills.
- 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
- 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
- 02.04 Respond to verbal and non-verbal cues.
- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.
- 02.06 Use appropriate medical terminology and abbreviations.

- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
  - 02.08 Recognize the importance of patient/client educations regarding healthcare.
  - 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
  - 02.10 Analyze elements of communication using a sender-receiver model.
  - 02.11 Distinguish between and report subjective and objective information.
  - 02.12 Report relevant information in order of occurrence.
- 03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:
- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
  - 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
  - 03.03 Demonstrate procedures for accurate documentation and record keeping.
  - 03.04 Interpret healthcare facility policy and procedures.
  - 03.05 Explain the “Patient’s Bill of Rights”.
  - 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
  - 03.07 Describe advance directives.
  - 03.08 Describe informed consent.
  - 03.09 Explain the laws governing harassment, labor and employment.
  - 03.10 Differentiate between legal and ethical issues in healthcare.
  - 03.11 Describe a code of ethics consistent with the healthcare occupation.
  - 03.12 Identify and compare personal, professional, and organizational ethics.
  - 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
  - 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
  - 03.15 Recognize and report abuse including domestic violence and neglect.
  - 03.16 Distinguish among the five schedules of controlled substances.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:
- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
  - 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
  - 04.03 Identify psychological reactions to illness including defense mechanisms.
  - 04.04 Identify complementary and alternative health practices.
  - 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
  - 04.06 Explain the basic concepts of positive self image, wellness and stress.
  - 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
  - 04.08 Explain the nutrition pyramid.
  - 04.09 Recognize the steps in the grief process.
- 05.0 Recognize and practice safety and security procedures. – The student will be able to:

- 05.01 Recognize safe and unsafe working conditions and report safety hazards.
  - 05.02 Demonstrate the safe use of medical equipment.
  - 05.03 Explain and apply the theory of root- cause analysis
  - 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
  - 05.05 Identify and practice security procedures for medical supplies and equipment.
  - 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions.
  - 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
  - 05.08 Demonstrate proper body mechanics and ergonomics.
  - 05.09 Demonstrate the procedure for properly identifying patients.
  - 05.10 Demonstrate procedures for the safe transport and transfer of patients.
  - 05.11 Describe fire, safety, disaster and evacuations procedures.
  - 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )
- 06.0 Recognize and respond to emergency situations. – The student will be able to:
- 06.01 Monitor and record vital signs.
  - 06.02 Describe legal parameters relating to the administration of emergency care.
  - 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
  - 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.
- 07.0 Recognize and practice infection control procedures. – The student will be able to:
- 07.01 Define principles of infection control including standard and transmission based precautions.
  - 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
  - 07.03 Demonstrate knowledge of surgical asepsis.
  - 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.
- 08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:
- 08.01 Describe technology applications in healthcare.
  - 08.02 Define terms and demonstrate basic computer skills.
  - 08.03 Recognize technology applications in healthcare.
  - 08.04 Interpret information from electronic medical documents.
  - 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.
- 09.0 Demonstrate employability skills. – The student will be able to:
- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.

- 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
  - 09.03 Identify documents that may be required when applying for a job.
  - 09.04 Write an appropriate resume.
  - 09.05 Conduct a job search.
  - 09.06 Complete a job application form correctly.
  - 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
  - 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
  - 09.09 Identify acceptable work habits.
  - 09.10 Recognize appropriate affective/professional behavior.
  - 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:
- 10.01 Recognize emerging diseases and disorders
  - 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
  - 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
  - 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
  - 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
  - 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.
- 11.0 Apply basic math and science skills. – The student will be able to:
- 11.01 Draw, read, and report on graphs, charts and tables.
  - 11.02 Measure time, temperature, distance, capacity, and mass/weight.
  - 11.03 Make, use and convert using both traditional and metric units.
  - 11.04 Make estimations and approximations and judge the reasonableness of the result.
  - 11.05 Convert from regular to 24 hour time.
  - 11.06 Demonstrate ability to evaluate and draw conclusions.
  - 11.07 Organize and communicate the results obtained by observation and experimentation.
  - 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
  - 11.09 Calculate ratios

## Medical Clinical Dosimetry: (12-23)

- 12.0 Discuss the patient's diagnosis with the radiation oncologist and what he/she wishes to achieve by irradiation. – The student will be able to:
- 12.01 Identify the anatomical location of the treatment volume and the surrounding normal structures.
  - 12.02 Verify the treatment modality and unit, field size, blocking, dosage of critical organs and the treatment volume and any other specialized treatment aids.
- 13.0 Supervise or accomplish simulation and localization of the treatment volume by topographical landmarks and verification (portal) filming and prepare the contour or contours for the patient. – The student will be able to:
- 13.01 Outline the plan of treatment to the Radiation Therapy Technologist.
  - 13.02 Identify the patient and orient the patient as to the intent of the procedure.
  - 13.03 Position the patient in the optimum position for accomplishment of the planned method of treatment.
  - 13.04 Ensure placement of any treatment accessories and documentation of their use in the set-up sheet.
  - 13.05 Position equipment to localize and delineate the desired treatment volume with necessary markers.
  - 13.06 Perform localization procedures as required.
  - 13.07 Obtain the Radiation Therapist approval for the optimum treatment plan as outlined on the simulation film.
  - 13.08 Obtain a radiograph of the treatment volume as approved by the Radiation Therapist.
- 14.0 Prepare daily set-up sheets detailing information relating to dose, daily dose per field, field weighting, wedges, shielding, etc. and to prepare final chart check and dosage summary after completion of therapy for presentation to the radiation therapist. – The student will be able to:
- 14.01 Record the approved treatment information, such as the anatomical description, equipment and modality, SSD/SAD, field size, type of blocking, treatment depth, daily fraction, gantry angle, any special instructions and film.
  - 14.02 Present final chart to Therapist.
- 15.0 Apply isodose charts or computer to the treatment problem to produce a treatment plan or plans for presentation to the radiation therapist. – The student will be able to:
- 15.01 Select the appropriate beam information according to the equipment and modality, SSD/SAD, field size, gantry angle, blocking, technique and any other special treatment aids.
  - 15.02 Perform isodose distribution for the treatment plan or plans.
  - 15.03 Obtain approval from the Radiation Therapist.
  - 15.04 Document the approved treatment plan.
- 16.0 Calculate, using hand or computer, the setting necessary to accomplish the treatment plan as approved by the radiation therapist. – The student will be able to:

- 16.01 Select the appropriate beam information according to equipment and modality, SSD/SAD, field size, gantry angle, blocking, technique and any other special treatment aids.
  - 16.02 Generate the appropriate factors to perform the calculation, i.e., Output Factor, TMR, % depth dose, TAR, SAR, wedge factor, etc..
  - 16.03 Obtain the final setting to be used in treatment delivery.
  - 16.04 Obtain a verification of the calculation by the Physicist.
  - 16.05 Document the calculation.
- 17.0 Supervise or accomplish planning for special procedures; skin compensatory filters; field separation; cutting custom designed blocks; construction of wedge filters; construction of other shielding devices. – The student will be able to:
- 17.01 Perform irregular field calculations for blocked fields.
  - 17.02 Perform field separation or gap calculation for adjacent fields.
  - 17.03 Fabricate lead equivalent shielding blocks as prescribed by the Radiation Therapist.
  - 17.04 Fabricate compensating filters as required.
  - 17.05 Fabricate skin compensating materials (bolus).
  - 17.06 Fabricate other shielding devices such as lead shielding cut outs.
  - 17.07 Document the use of the treatment aid.
- 18.0 Supervise, mold room techniques including immobilization casts. – The student will be able to:
- 18.01 Fabricate immobilization devices which may be made of plaster casting material, fiberglass material or perspex.
  - 18.02 Document the use of the immobilization device.
- 19.0 Responsible for quality control and accurate beam alignment in all patient set-ups. – The student will be able to:
- 19.01 Develop and maintain a system of quality assurance checks each morning on all treatment units.
  - 19.02 Perform QA checks and document the results.
  - 19.03 Inform the Physicist of any equipment inconsistency from the specified values.
  - 19.04 Inform the Radiation Therapist of any dosage errors.
- 20.0 Function as an assistant to the radiation oncologist and physicist in intracavitary/interstitial implant procedures and prepare the dose calculation for these. – The student will be able to:
- 20.01 Prepare the applicator for sterilization and delivery to the implant location.
  - 20.02 Monitor any implants necessary, i.e., iodine 125.
  - 20.03 Assist the Radiation Therapist in the placement of the applicator.
  - 20.04 Perform or supervise the localization films after placement of the applicator.
  - 20.05 Prepare the radioactive sources for insertion into the applicator.
  - 20.06 Document removal of radioactive the sources.
  - 20.07 Transport the radioactive sources to the patients location.
  - 20.08 Assist the Radiation Therapist in placement of the radioactive sources.

- 20.09 Take and record appropriate radiation levels in accordance with the recommendations of the NRC.
  - 20.10 Assist in the removal of the radioactive sources.
  - 20.11 Perform dosage calculations utilizing the radiographs done for the applicator localization.
  - 20.12 Transport, return and document the replacement of the radioactive sources as indicated by the dosage calculation.
- 21.0 Assist the radiation therapy physicist in calibration procedures, detection of erratic performance of equipment, and in the organization and maintenance of the radiation protection program. – The student will be able to:
- 21.01 Wear appropriate monitoring device while on duty to obtain a record of radiation exposure over a period of time.
  - 21.02 Protect workers and others in the area from radiation exposure.
  - 21.03 Perform radiation surveys as directed by the Physicist.
- 22.0 Be responsible for "in vivo" dosimetry. – The student will be able to:
- 22.01 Place TLD crystals as directed in the treatment field in order to verify dosage.
  - 22.02 Read and record dose verified.
  - 22.03 Perform other "in vivo" dosimetry as directed.
- 23.0 Work with the radiation oncologist and physicist with research, continuing education, and the implementation of new techniques of radiation therapy. – The student will be able to:
- 23.01 Read current publications regarding new treatment techniques.
  - 23.02 Strive to isolate new topics for publication.
  - 23.03 Participate in research problems with the Radiation Therapist and Physicist.
  - 23.04 Participate in continuing education activities for personnel in radiation therapy.
  - 23.05 Participate in educational conferences in radiation therapy.

Perkins Technical Skill Attainment Inventory	<a href="http://www.fldoe.org/workforce/perkins/perkins_resources.asp">http://www.fldoe.org/workforce/perkins/perkins_resources.asp</a>	

### **Purpose**

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

This program is designed to prepare students for employment as radiologic technologists or nuclear medicine technologists, SOC Code-29-2033 (Nuclear Medicine Technologists) or to provide supplemental training for persons previously or currently employed in this occupation.

The content includes but is not limited to the utilization of radioactive materials for diagnostic and therapeutic procedures, patient care, administrative functions, health and safety including CPR.

### **Program Structure**

This program is a planned sequence of instruction consisting of 75 credit hours.

### **Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these

occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

### Special Notes

This program meets the Department of Health HIV/AIDS Domestic Violence and Prevention of Medical Errors education requirements. Upon completion of this program, the instructor will choose to provide a certificate to the student verifying that these requirements have been met.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635 F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

The program must be accredited by the:

Joint Review Committee on Educational Programs in Nuclear Medicine Technology

2000 W. Danforth Rd., Ste 130 #203

Edmond OK 73003

Tel: (405) 285-0546

Fax: (405) 285-0579

<http://www.jrcnmt.org/>

Or

Southern Association of Colleges and Schools (SACS)

2520 Northwinds Parkway

Suite 600

Alpharetta, GA 30009

888.41ED NOW (888.413.3669)

<http://www.sacs.org/>

The program must also be approved by the Department of Health Bureau of Radiation Control so that the graduate is eligible to be licensed in Florida as a Certified Radiologic Technologist - Nuclear Medicine (i.e., a Nuclear Medicine Technologist). As specified in Chapter 468, Part IV and 64E-FAC. All accredited NMT programs which are recognized and accepted by either the American Registry of Radiologic Technologists (ARRT), or the Nuclear Medicine Technology Certification Board (NMTCB), are approved by the Department of Health

The nuclear medicine technologist performs patient care with understanding of patients' special needs, fears and concerns and recognizes changes in patient condition. Limiting the exposure of the patient and other health care workers to minimal levels of radiation is of paramount importance.

A fundamental knowledge and understanding of the physical and biological sciences, including radiation biology and protection, as well as radiopharmaceuticals "in vivo" and "in vitro", is essential: nuclear physics, biochemistry, immunology, physiology and an introduction to computer application/operation with data manipulation must be included. Program completers will be eligible to apply to the Department of Health for the required state Nuclear Medicine Technologist license. For further information contact:

Students are encouraged to become members of their appropriate professional organizations such as the Society of Nuclear Medicine –technologist Section (SNM-TS), Florida Nuclear Medicine Technologists, Inc. (FNMT), the American Society of Radiologic Technologists (ASRT), Florida Society of Radiologic Technologists (FSRT) and its local affiliate.

Outcomes 01-11 are referred to as the Health Careers Core and do not have to be completed if the student has previously completed the Core in another health science program. The Core should be taken first or concurrently with the first course in the program. Following the successful completion of the core, the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

### **Career and Technical Student Organization (CTSO)**

Health Occupations Students of America, Inc. (HOSA) is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations

received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

### **Articulation**

This program has no statewide articulation agreement approved by the Articulation Coordinating Committee. However, this does not preclude the awarding of credits by any college through local agreements.

For details on statewide articulation agreements which correlate to programs and industry certifications, refer to [http://www.fl DOE.org/workforce/dwdframe/artic\\_frame.asp](http://www.fl DOE.org/workforce/dwdframe/artic_frame.asp).

### **Program Length**

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. The standard length of this program is 75 credit hours according to Rule 6A-14.030, F.A.C.

### **Certificate Programs**

A College Credit Certificate consists of a program of instruction of less than sixty (60) credits of college-level courses, which is part of an AS or AAS degree program and prepares students for entry into employment (Rule 6A-14.030, F.A.C.). This AS/AAS degree program includes the following College Credit Certificates:

Nuclear Medicine Technology Specialist (0317.020801) – 48 credit hours

Standards for the above certificate programs are contained in separate curriculum frameworks.

### **Standards**

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.

- 12.0 Practice radiation safety.
- 13.0 Practice basic radiopharmacy.
- 14.0 Calculate doses and administer radiopharmaceuticals and interventional pharmaceuticals.
- 15.0 Perform "in vitro"/"in vivo" nonimaging procedures.
- 16.0 Perform imaging procedures.
- 17.0 Perform computerized procedures.
- 18.0 Practice quality control.

2011-2012

**Florida Department of Education  
Student Performance Standards**

**Program Title: Nuclear Medicine Technology**  
**CIP Numbers: 1317.020800 AS, 0317.020800 AAS**  
**Program Length: 75 credit hours**  
**SOC Code(s): 31-9099, 29-2033**

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. At the completion of this program, the student will be able to:

**Health Careers Core: The Health Careers Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Careers Core or any other health occupations program do not have to repeat intended outcomes 01-11.**

01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:

- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
- 01.02 Identify common methods of payment for healthcare services.
- 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
- 01.04 Describe the composition and functions of a healthcare team.
- 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
- 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
- 01.07 Identify characteristics of effective teams.
- 01.08 Recognize methods for building positive team relationships.
- 01.09 Analyze attributes and attitudes of an effective leader.
- 01.10 Recognize factors and situations that may lead to conflict.
- 01.11 Demonstrate effective techniques for managing team conflict.
- 01.12 Describe factors that influence the current delivery system of healthcare.
- 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.

02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:

- 02.01 Develop basic speaking and active listening skills.
- 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
- 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
- 02.04 Respond to verbal and non-verbal cues.

- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.
- 02.06 Use appropriate medical terminology and abbreviations.
- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
- 02.08 Recognize the importance of patient/client educations regarding healthcare.
- 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
- 02.10 Analyze elements of communication using a sender-receiver model.
- 02.11 Distinguish between and report subjective and objective information.
- 02.12 Report relevant information in order of occurrence.

03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:

- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
- 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
- 03.03 Demonstrate procedures for accurate documentation and record keeping.
- 03.04 Interpret healthcare facility policy and procedures.
- 03.05 Explain the “Patient’s Bill of Rights”.
- 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
- 03.07 Describe advance directives.
- 03.08 Describe informed consent.
- 03.09 Explain the laws governing harassment, labor and employment.
- 03.10 Differentiate between legal and ethical issues in healthcare.
- 03.11 Describe a code of ethics consistent with the healthcare occupation.
- 03.12 Identify and compare personal, professional, and organizational ethics.
- 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
- 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
- 03.15 Recognize and report abuse including domestic violence and neglect.
- 03.16 Distinguish among the five schedules of controlled substances.

04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:

- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
- 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
- 04.03 Identify psychological reactions to illness including defense mechanisms.
- 04.04 Identify complementary and alternative health practices.
- 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
- 04.06 Explain the basic concepts of positive self image, wellness and stress.
- 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
- 04.08 Explain the nutrition pyramid.

- 04.09 Recognize the steps in the grief process.
- 05.0 Recognize and practice safety and security procedures. – The student will be able to:
  - 05.01 Recognize safe and unsafe working conditions and report safety hazards.
  - 05.02 Demonstrate the safe use of medical equipment.
  - 05.03 Explain and apply the theory of root- cause analysis
  - 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
  - 05.05 Identify and practice security procedures for medical supplies and equipment.
  - 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions.
  - 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
  - 05.08 Demonstrate proper body mechanics and ergonomics.
  - 05.09 Demonstrate the procedure for properly identifying patients.
  - 05.10 Demonstrate procedures for the safe transport and transfer of patients.
  - 05.11 Describe fire, safety, disaster and evacuations procedures.
  - 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )
- 06.0 Recognize and respond to emergency situations. – The student will be able to:
  - 06.01 Monitor and record vital signs.
  - 06.02 Describe legal parameters relating to the administration of emergency care.
  - 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
  - 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.
- 07.0 Recognize and practice infection control procedures. – The student will be able to:
  - 07.01 Define principles of infection control including standard and transmission based precautions.
  - 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
  - 07.03 Demonstrate knowledge of surgical asepsis.
  - 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.
- 08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:
  - 08.01 Describe technology applications in healthcare.
  - 08.02 Define terms and demonstrate basic computer skills.
  - 08.03 Recognize technology applications in healthcare.
  - 08.04 Interpret information from electronic medical documents.
  - 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.

09.0 Demonstrate employability skills. – The student will be able to:

- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.
- 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
- 09.03 Identify documents that may be required when applying for a job.
- 09.04 Write an appropriate resume.
- 09.05 Conduct a job search.
- 09.06 Complete a job application form correctly.
- 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
- 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
- 09.09 Identify acceptable work habits.
- 09.10 Recognize appropriate affective/professional behavior.
- 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).

10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:

- 10.01 Recognize emerging diseases and disorders
- 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
- 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
- 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
- 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
- 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.

11.0 Apply basic math and science skills. – The student will be able to:

- 11.01 Draw, read, and report on graphs, charts and tables.
- 11.02 Measure time, temperature, distance, capacity, and mass/weight.
- 11.03 Make, use and convert using both traditional and metric units.
- 11.04 Make estimations and approximations and judge the reasonableness of the result.
- 11.05 Convert from regular to 24 hour time.
- 11.06 Demonstrate ability to evaluate and draw conclusions.
- 11.07 Organize and communicate the results obtained by observation and experimentation.
- 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
- 11.09 Calculate ratios

## **Nuclear Medicine Technology: (12-18)**

- 12.0 Practice radiation safety. – The student will be able to:
  - 12.01 Assure compliance with local, state and federal regulations.
  - 12.02 Follow appropriate protection procedures.
  - 12.03 Perform area surveys and wipe tests.
  - 12.04 Perform decontamination procedures.
  - 12.05 Appropriately dispose of radioactive waste.
  - 12.06 Follow approved procedures for identifying and labeling.
  - 12.07 Practice personnel monitoring of radiation exposure.
  - 12.08 Implement appropriate THE JOINT COMMISSION patient safety goals.
  
- 13.0 Practice basic radiopharmacy. – The student will be able to:
  - 13.01 Maintain radiopharmaceutical laboratory records and materials.
  - 13.02 Obtain generator eluate.
  - 13.03 Prepare radiopharmaceuticals and perform quality control tests.
  - 13.04 Appropriately dispose of radioactive waste.
  - 13.05 Demonstrate understanding of ordering pharmaceuticals in appropriate dosage and effective time frame.
  
- 14.0 Calculate doses and administer radiopharmaceutical and interventional pharmaceuticals. – The student will be able to:
  - 14.01 Assay radiopharmaceuticals.
  - 14.02 Calculate doses.
  - 14.03 Dispense exact doses.
  - 14.04 Properly administer radiopharmaceuticals.
  - 14.05 Maintain records of administrations/preparations.
  - 14.06 Perform dose calibrator quality control tests.
  - 14.07 Properly prepare and administer interventional pharmaceuticals
  - 14.08 Strictly observe precautions and contraindications
  - 14.09 Access and care for patients
  - 14.10 Appropriately support treatment for adverse affects
  - 14.11 Document accordingly
  
- 15.0 Perform "in vitro"/"in vivo" nonimaging procedures. – The student will be able to:
  - 15.01 Operate conventional laboratory equipment.
  - 15.02 Prepare doses and standards.
  - 15.03 Collect specimens.
  - 15.04 Operate radiation detection equipment.
  - 15.05 Perform calculations.
  - 15.06 Perform radioassays.
  - 15.07 Perform venipuncture accurately and efficiently.
  
- 16.0 Perform imaging procedures. – The student will be able to:

- 16.01 Prepare patients.
- 16.02 Select imaging parameters.
- 16.03 Position patients and obtain images.
- 16.04 Perform data processing.
- 16.05 Maintain appropriate records.

17.0 Perform computerized procedures. – The student will be able to:

- 17.01 Retrieve patient studies and display on computer video screen.
- 17.02 Select proper protocol and process data.
- 17.03 Acquire and store patient studies for future reference.
- 17.04 Manipulate computer data for appropriate display.

18.0 Practice quality control. – The student will be able to:

- 18.01 Perform quality assurance testing of imaging systems.
- 18.02 Calibrate and operate scintillation counters.
- 18.03 Calibrate and operate gas-filled detectors.
- 18.04 Perform quality assurance testing of routine imaging and assay procedures.

**2011-2012**

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Nuclear Medicine Technology Specialist  
**Career Cluster:** Health Science

<b>CCC</b>	
CIP Number	0317020801
Program Type	College Credit Certificate (CCC)
Program Length	48 credit hours
CTSO	HOSA
SOC Codes (all applicable)	31-9099, 29-2033
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>

### **Purpose**

This certificate program is part of the Nuclear Medicine Technology AS/AAS degree program (1317.020800).

A College Credit Certificate consists of a program of instruction of less than sixty (60) credits of college-level courses, which is part of an AS or AAS degree program and prepares students for entry into employment (Rule 6A-14.030, F.A.C.).

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

The program is designed to prepare students for employment as radiologic technologists, nuclear medicine or nuclear medicine technologists SOC Code 29-2033 (Nuclear Medicine Technologists) or provide supplemental training for persons previously or presently employed in these occupations.

The content includes but is not limited to the utilization of radioactive materials for diagnostic and therapeutic procedures, patient care, administrative functions, health and safety including CPR.

### **Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these

occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

### Special Notes

This program meets the Department of Health HIV/AIDS Domestic Violence and Prevention of Medical Errors education requirements. Upon completion of this program, the instructor will provide a certificate to the student verifying that these requirements have been met.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635 F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

The program must be accredited by the:

Joint Review Committee on Educational Programs in Nuclear Medicine  
Technology (JRCNMT)

2000 W. Danforth Rd., Ste 130 #203  
Edmond OK 73003  
Tel: (405) 285-0546  
Fax: (405) 285-0579  
<http://www.jrcnmt.org/>

Or  
Southern Association of Colleges and Schools (SACS)  
2520 Northwinds Parkway  
Suite 600  
Alpharetta, GA 30009  
888.41ED NOW (888.413.3669)  
<http://www.sacs.org/>

The program must also be approved by the Department of Health Bureau of Radiation Control so that the graduate is eligible to be licensed in Florida as a Certified Radiologic Technologist - Nuclear Medicine (i.e., a Nuclear Medicine Technologist). As specified in Chapter 468, Part IV and 64E-FAC. All accredited NMT programs which are recognized and accepted by either the American Registry of Radiologic Technologists (ARRT), or the Nuclear Medicine Technology Certification Board (NMTCB), are approved by the Department of Health

The nuclear medicine technologist performs patient care with understanding of patient's special needs, fears and concerns and recognizes changes in patient condition. Limiting the exposure of the patient and other health care workers to minimal levels of radiation is of paramount importance.

A fundamental knowledge and understanding of the physical and biological sciences, including radiation biology and protection, as well as radiopharmaceuticals "in vivo" and "Invitro" is essential: nuclear physics, biochemistry, immunology, physiology and an introduction to computer applications/operations with data manipulation must be included.

The designation of PSV-C requires that the student have an associate degree in a related field of study (i.e., radiologic technology, etc.). Upon the successful completion of the program the student will receive a Nuclear Medicine Specialist Certificate.

Program completers will be eligible to apply to the Department of Health for the required state Nuclear Medicine Technologist license. For further information contact:

Department of Health  
MQA Radiologic Technology Program  
4052 Bald Cypress Way, Bin #C85

Students are encouraged to become members of their appropriate professional organizations such as the Society of Nuclear Medicine –technologist Section (SNM-TS), Florida Nuclear Medicine Technologists, Inc. (FNMT), the the American Society of Radiologic Technologists (ASRT), Florida Society of Radiologic Technologists (FSRT) and its' local affiliate.

Outcomes 01-11 are referred to as the Health Careers Core and do not have to be completed if the student has previously completed the Core in another health science program. The Core should be taken first or concurrently with the first course in the program. Following the successful completion of the core, the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

### **Career and Technical Student Organization (CTSO)**

Health Occupations Students of America, Inc. (HOSA) is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

## **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

## **Standards**

After successfully completing this course the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.
- 12.0 Practice radiation safety.
- 13.0 Practice basic radiopharmacy.
- 14.0 Calculate doses and administer radiopharmaceuticals and interventional pharmaceuticals.
- 15.0 Perform "in vitro"/"in vivo" nonimaging procedures.
- 16.0 Perform imaging procedures.
- 17.0 Perform computerized procedures.
- 18.0 Practice quality control.

2011-2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Nuclear Medicine Technology Specialist  
**CIP Number:** 0317020801  
**Program Length:** 48 credit hours  
**SOC Code(s):** 31-9099, 29-2033

This certificate program is part of the Nuclear Medicine Technology AS/AAS degree program (1317.020800). At the completion of this program, the student will be able to:

**Health Science Core: The Health Science Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Science Core in any other health occupations program do not have to repeat intended outcomes 01-11.**

01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:

- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
- 01.02 Identify common methods of payment for healthcare services.
- 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
- 01.04 Describe the composition and functions of a healthcare team.
- 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
- 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
- 01.07 Identify characteristics of effective teams.
- 01.08 Recognize methods for building positive team relationships.
- 01.09 Analyze attributes and attitudes of an effective leader.
- 01.10 Recognize factors and situations that may lead to conflict.
- 01.11 Demonstrate effective techniques for managing team conflict.
- 01.12 Describe factors that influence the current delivery system of healthcare.
- 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.

02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:

- 02.01 Develop basic speaking and active listening skills.
- 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
- 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
- 02.04 Respond to verbal and non-verbal cues.
- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.

- 02.06 Use appropriate medical terminology and abbreviations.
- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
- 02.08 Recognize the importance of patient/client educations regarding healthcare.
- 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
- 02.10 Analyze elements of communication using a sender-receiver model.
- 02.11 Distinguish between and report subjective and objective information.
- 02.12 Report relevant information in order of occurrence.

03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:

- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
- 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
- 03.03 Demonstrate procedures for accurate documentation and record keeping.
- 03.04 Interpret healthcare facility policy and procedures.
- 03.05 Explain the “Patient’s Bill of Rights”.
- 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
- 03.07 Describe advance directives.
- 03.08 Describe informed consent.
- 03.09 Explain the laws governing harassment, labor and employment.
- 03.10 Differentiate between legal and ethical issues in healthcare.
- 03.11 Describe a code of ethics consistent with the healthcare occupation.
- 03.12 Identify and compare personal, professional, and organizational ethics.
- 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
- 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
- 03.15 Recognize and report abuse including domestic violence and neglect.
- 03.16 Distinguish among the five schedules of controlled substances.

04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:

- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
- 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
- 04.03 Identify psychological reactions to illness including defense mechanisms.
- 04.04 Identify complementary and alternative health practices.
- 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
- 04.06 Explain the basic concepts of positive self image, wellness and stress.
- 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
- 04.08 Explain the nutrition pyramid.
- 04.09 Recognize the steps in the grief process.

05.0 Recognize and practice safety and security procedures. – The student will be able to:

- 05.01 Recognize safe and unsafe working conditions and report safety hazards.
- 05.02 Demonstrate the safe use of medical equipment.
- 05.03 Explain and apply the theory of root- cause analysis
- 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
- 05.05 Identify and practice security procedures for medical supplies and equipment.
- 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions.
- 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
- 05.08 Demonstrate proper body mechanics and ergonomics.
- 05.09 Demonstrate the procedure for properly identifying patients.
- 05.10 Demonstrate procedures for the safe transport and transfer of patients.
- 05.11 Describe fire, safety, disaster and evacuations procedures.
- 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )

06.0 Recognize and respond to emergency situations. – The student will be able to:

- 06.01 Monitor and record vital signs.
- 06.02 Describe legal parameters relating to the administration of emergency care.
- 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
- 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.

07.0 Recognize and practice infection control procedures. – The student will be able to:

- 07.01 Define principles of infection control including standard and transmission based precautions.
- 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
- 07.03 Demonstrate knowledge of surgical asepsis.
- 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.

08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:

- 08.01 Describe technology applications in healthcare.
- 08.02 Define terms and demonstrate basic computer skills.
- 08.03 Recognize technology applications in healthcare.
- 08.04 Interpret information from electronic medical documents.
- 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.

09.0 Demonstrate employability skills. – The student will be able to:

- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.
  - 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
  - 09.03 Identify documents that may be required when applying for a job.
  - 09.04 Write an appropriate resume.
  - 09.05 Conduct a job search.
  - 09.06 Complete a job application form correctly.
  - 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
  - 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
  - 09.09 Identify acceptable work habits.
  - 09.10 Recognize appropriate affective/professional behavior.
  - 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:
- 10.01 Recognize emerging diseases and disorders
  - 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
  - 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
  - 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
  - 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
  - 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.
- 11.0 Apply basic math and science skills. – The student will be able to:
- 11.01 Draw, read, and report on graphs, charts and tables.
  - 11.02 Measure time, temperature, distance, capacity, and mass/weight.
  - 11.03 Make, use and convert using both traditional and metric units.
  - 11.04 Make estimations and approximations and judge the reasonableness of the result.
  - 11.05 Convert from regular to 24 hour time.
  - 11.06 Demonstrate ability to evaluate and draw conclusions.
  - 11.07 Organize and communicate the results obtained by observation and experimentation.
  - 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
  - 11.09 Calculate ratios

## **Nuclear Medicine Technology: (12-18)**

- 12.0 Practice radiation safety. – The student will be able to:
- 12.01 Assure compliance with local, state and federal regulations.
  - 12.02 Follow appropriate protection procedures.
  - 12.03 Perform area surveys and wipe tests.
  - 12.04 Perform decontamination procedures.
  - 12.05 Appropriately dispose of radioactive waste.
  - 12.06 Follow approved procedures for identifying and labeling.
  - 12.07 Practice personnel monitoring of radiation exposure.
  - 12.08 Implement appropriate The Joint Commission patient safety goals.
- 13.0 Practice basic radiopharmacy. – The student will be able to:
- 13.01 Maintain radiopharmaceutical laboratory records and materials.
  - 13.02 Obtain generator eluate.
  - 13.03 Prepare radiopharmaceuticals and perform quality control tests.
  - 13.04 Appropriately dispose of radioactive waste.
  - 13.05 Demonstrate understanding of ordering pharmaceuticals in appropriate dosage and effective time frame.
- 14.0 Calculate doses and administer radiopharmaceuticals and interventional pharmaceuticals. – The student will be able to:
- 14.01 Assay radiopharmaceuticals.
  - 14.02 Calculate doses.
  - 14.03 Dispense exact doses.
  - 14.04 Properly administer radiopharmaceuticals.
  - 14.05 Maintain records of administrations/preparations.
  - 14.06 Perform dose calibrator quality control tests.
  - 14.07 Properly prepare and administer interventional pharmaceuticals
  - 14.08 Strictly observe precautions and contraindications
  - 14.09 Access and care for patients
  - 14.10 Appropriately support treatment for adverse affects
  - 14.11 Document accordingly
- 15.0 Perform "in vitro"/"in vivo" nonimaging procedures. – The student will be able to:
- 15.01 Operate conventional laboratory equipment.
  - 15.02 Prepare doses and standards.
  - 15.03 Collect specimens.
  - 15.04 Operate radiation detection equipment.
  - 15.05 Perform calculations.
  - 15.06 Perform radioassays.
  - 15.07 Perform venipuncture accurately and efficiently.
- 16.0 Perform imaging procedures. – The student will be able to:

- 16.01 Prepare patients.
- 16.02 Select imaging parameters.
- 16.03 Position patients and obtain images.
- 16.04 Perform data processing.
- 16.05 Maintain appropriate records.

17.0 Perform computerized procedures. – The student will be able to:

- 17.01 Retrieve patient studies and display on computer video screen.
- 17.02 Select proper protocol and process data.
- 17.03 Acquire and store patient studies for future reference.
- 17.04 Manipulate computer data for appropriate display.

18.0 Practice quality control. – The student will be able to:

- 18.01 Perform quality assurance testing of imaging systems.
- 18.02 Calibrate and operate scintillation counters.
- 18.03 Calibrate and operate gas-filled detectors.
- 18.04 Perform quality assurance testing of routine imaging and assay procedures.

2011 - 2012

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Radiography  
**Career Cluster:** Health Science

	<b>AS</b>	<b>AAS</b>
CIP Number	1317020900	0317020900
Program Type	College Credit	College Credit
Standard Length	77 credit hours	77 credit hours
CTSO	HOSA	HOSA
SOC Codes (all applicable)	31-9099, 29-2034	31-9099, 29-2034
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>	
Perkins Technical Skill Attainment Inventory	<a href="http://www.fl DOE.org/workforce/perkins/perkins_resources.asp">http://www.fl DOE.org/workforce/perkins/perkins_resources.asp</a>	

### **Purpose**

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

The purpose of this program is to prepare students for employment as Radiographers, Radiologic Technologists Soc Code 29-2034 (Radiologic Technologists/**Technicians**) or to provide supplemental training for persons previously or presently employed in these occupations.

The content includes but is not limited to introduction to radiography, medical ethics and law, medical terminology, methods of patient care, human structure and function, radiographic procedures, principles of radiographic exposure, imaging equipment, radiographic film processing, evaluation of radiographs, radiation physics, principles of radiation protection, principles of radiation biology, radiographic pathology, introduction to quality assurance, introduction to computer literacy, and clinical education. The curriculum includes a plan for well-structured competency based clinical education.

### **Program Structure**

This program is a planned sequence of instruction consisting of 77 credit hours.

## **Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

## **Special Notes**

This program meets the Department of Health HIV/AIDS Domestic Violence and Prevention of Medical Errors education requirements. Upon completion of this program, the instructor will provide a certificate to the student verifying that these requirements have been met.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635 F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

The program must be accredited by the Joint Review Committee on Education in Radiologic Technology (JRCERT), 20 North Wacker Drive, Suite 900, Chicago, Illinois 60606-2901, (312) 704-5300, or by the Southern Association of Colleges and Schools.

The program must also be approved by the Department of Health, Bureau of Radiation Control so that the graduate is eligible for licensure in Florida as a Certified Radiologic Technologist. As specified in Chapter 468 Part IV F.S. and Chapter 64E-3 F.A.C.

Radiographers provide patient services using imaging modalities, as directed by physicians qualified to order and/or perform radiologic procedures. Radiographers usually provide patient care essential to radiologic procedures, including exercising judgment when performing medical imaging procedures. When providing patient services, the radiographer adheres to the principles of radiation protection for the patient, self, and others.

Radiographers accurately demonstrate anatomical structures on various imaging receptors by knowledge of anatomy, positioning, radiographic technique, and radiation protection. Radiographers must also be able to recognize emergency patient conditions and initiate lifesaving first aid. Additional duties may include performing quality assurance, processing film, and keeping patient records. Radiographers may be required to perform some of these duties at the patient's bedside or in the operating room.

The policies and process by which students receive clinical education shall be published and made known to all concerned in order to avoid practices in which students are substituted for paid staff. Students shall not take the responsibility or the place of qualified staff. After demonstrating competency, students may be permitted to perform procedures with indirect supervision. Unsatisfactory radiographs shall be repeated only in the presence of a qualified radiographer.

Program completers will be eligible to make an application to take the National Registry examination. For further information contact:

American Registry of Radiologic Technologists (ARRT)  
1255 Northland Drive  
St. Paul, MN 55120-1155

(612/687-0048)

Students are encouraged to become members of their appropriate professional organizations such as the American Society of Radiologic Technologists (ASRT), Florida Society of Radiologic Technologists (FSRT) and its' local affiliate.

Outcomes 01-11 are referred to as the Health Careers Core and do not have to be completed if the student has previously completed the Core in another health science program. The Core should be taken first or concurrently with the first course in the program. Following the successful completion of the core, the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

### **Career and Technical Student Organization (CTSO)**

Health Occupations Students of America, Inc.(HOSA) is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

### **Articulation**

This program has no statewide articulation agreement approved by the Articulation Coordinating Committee. However, this does not preclude the awarding of credits by any college through local agreements.

For details on statewide articulation agreements which correlate to programs and industry certifications, refer to [http://www.fl DOE.org/workforce/dwdframe/artic\\_frame.asp](http://www.fl DOE.org/workforce/dwdframe/artic_frame.asp).

### **Program Length**

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. The standard length of this program is 77 credit hours according to Rule 6A-14.030, F.A.C.

## Standards

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.
- 12.0 Techniques to accurately demonstrate anatomical structures on a radiograph or another imaging receptor. Apply knowledge of anatomy, physiology, positioning and radiographic
- 13.0 Evaluate radiographic images for appropriate positioning and image quality.
- 14.0 Apply the principles of radiation protection for the patient, self and others.
- 15.0 Anticipate and provide patient care and comfort.
- 16.0 Perform quality assurance procedures.
- 17.0 Exercise independent judgment and discretion in the technical performance of medical imaging procedures.
- 18.0 Demonstrate proper operation of radiographic equipment and accessories.

2011 - 2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Radiography  
**CIP Numbers:** 1317.020900 AS, 0317.020900 AAS  
**Program Length:** 77 credit hours  
**SOC Code(s):** 31-9099, 29-2034

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. At the completion of this program, the student will be able to:

**Health Careers Core: The Health Careers Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Careers Core or any other health occupations program do not have to repeat intended outcomes 01-11.**

01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:

- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
- 01.02 Identify common methods of payment for healthcare services.
- 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
- 01.04 Describe the composition and functions of a healthcare team.
- 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
- 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
- 01.07 Identify characteristics of effective teams.
- 01.08 Recognize methods for building positive team relationships.
- 01.09 Analyze attributes and attitudes of an effective leader.
- 01.10 Recognize factors and situations that may lead to conflict.
- 01.11 Demonstrate effective techniques for managing team conflict.
- 01.12 Describe factors that influence the current delivery system of healthcare.
- 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.

02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:

- 02.01 Develop basic speaking and active listening skills.
- 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
- 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
- 02.04 Respond to verbal and non-verbal cues.

- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.
- 02.06 Use appropriate medical terminology and abbreviations.
- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
- 02.08 Recognize the importance of patient/client educations regarding healthcare.
- 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
- 02.10 Analyze elements of communication using a sender-receiver model.
- 02.11 Distinguish between and report subjective and objective information.
- 02.12 Report relevant information in order of occurrence.

03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:

- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
- 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
- 03.03 Demonstrate procedures for accurate documentation and record keeping.
- 03.04 Interpret healthcare facility policy and procedures.
- 03.05 Explain the “Patient’s Bill of Rights”.
- 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
- 03.07 Describe advance directives.
- 03.08 Describe informed consent.
- 03.09 Explain the laws governing harassment, labor and employment.
- 03.10 Differentiate between legal and ethical issues in healthcare.
- 03.11 Describe a code of ethics consistent with the healthcare occupation.
- 03.12 Identify and compare personal, professional, and organizational ethics.
- 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
- 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
- 03.15 Recognize and report abuse including domestic violence and neglect.
- 03.16 Distinguish among the five schedules of controlled substances.

04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:

- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
- 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
- 04.03 Identify psychological reactions to illness including defense mechanisms.
- 04.04 Identify complementary and alternative health practices.
- 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
- 04.06 Explain the basic concepts of positive self image, wellness and stress.
- 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
- 04.08 Explain the nutrition pyramid.

- 04.09 Recognize the steps in the grief process.
- 05.0 Recognize and practice safety and security procedures. – The student will be able to:
  - 05.01 Recognize safe and unsafe working conditions and report safety hazards.
  - 05.02 Demonstrate the safe use of medical equipment.
  - 05.03 Explain and apply the theory of root- cause analysis
  - 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
  - 05.05 Identify and practice security procedures for medical supplies and equipment.
  - 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions.
  - 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
  - 05.08 Demonstrate proper body mechanics and ergonomics.
  - 05.09 Demonstrate the procedure for properly identifying patients.
  - 05.10 Demonstrate procedures for the safe transport and transfer of patients.
  - 05.11 Describe fire, safety, disaster and evacuations procedures.
  - 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )
- 06.0 Recognize and respond to emergency situations. – The student will be able to:
  - 06.01 Monitor and record vital signs.
  - 06.02 Describe legal parameters relating to the administration of emergency care.
  - 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
  - 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.
- 07.0 Recognize and practice infection control procedures. – The student will be able to:
  - 07.01 Define principles of infection control including standard and transmission based precautions.
  - 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
  - 07.03 Demonstrate knowledge of surgical asepsis.
  - 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.
- 08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:
  - 08.01 Describe technology applications in healthcare.
  - 08.02 Define terms and demonstrate basic computer skills.
  - 08.03 Recognize technology applications in healthcare.
  - 08.04 Interpret information from electronic medical documents.
  - 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.

09.0 Demonstrate employability skills. – The student will be able to:

- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.
- 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
- 09.03 Identify documents that may be required when applying for a job.
- 09.04 Write an appropriate resume.
- 09.05 Conduct a job search.
- 09.06 Complete a job application form correctly.
- 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
- 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
- 09.09 Identify acceptable work habits.
- 09.10 Recognize appropriate affective/professional behavior.
- 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).

10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:

- 10.01 Recognize emerging diseases and disorders
- 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
- 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
- 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
- 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
- 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.

11.0 Apply basic math and science skills. – The student will be able to:

- 11.01 Draw, read, and report on graphs, charts and tables.
- 11.02 Measure time, temperature, distance, capacity, and mass/weight.
- 11.03 Make, use and convert using both traditional and metric units.
- 11.04 Make estimations and approximations and judge the reasonableness of the result.
- 11.05 Convert from regular to 24 hour time.
- 11.06 Demonstrate ability to evaluate and draw conclusions.
- 11.07 Organize and communicate the results obtained by observation and experimentation.
- 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
- 11.09 Calculate ratios

## **Radiography: (12-18)**

- 12.0 Apply knowledge of anatomy, physiology, positioning and radiographic techniques to accurately demonstrate anatomical structures on a radiograph or other imaging receptor. – The student will be able to:
- 12.01 Evaluate requisition for proper exam and/or patient.
  - 12.02 Demonstrate knowledge of human anatomy, physiology, positioning and radiographic techniques to accurately demonstrate anatomical structures on a radiograph or other imaging receptor.
  - 12.03 Position patient, utilizing body landmarks, to achieve the best demonstration of the affected body part by adjusting table, radiographic and/or fluoroscopic equipment, and image receptor using knowledge of anatomy, standard radiographic positions and departmental protocol.
  - 12.04 To insure proper patient positioning during film exposure, use immobilization devices, when indicated, to prevent patient movement.
  - 12.05 Give patient appropriate breathing instructions (e.g., inspiration, expiration) prior to making exposure.
  - 12.06 When indicated, take scout radiograph(s) on trauma patients to determine the extent and nature of injury, and whether injury will permit standard examination procedures.
  - 12.07 Remove all radiopaque materials (e.g., jewelry, hairpins, contrast materials) from patient and/or table that could interfere with the quality of the radiograph.
- 13.0 Evaluate radiographic images for appropriate positioning and image quality. – The student will be able to:
- 13.01 Identify qualities that characterize a diagnostic radiograph.
  - 13.02 Identify human structural landmarks and pathological conditions.
  - 13.03 Identify incorrect image density, contrast, over/under exposures, artifacts, etc.
  - 13.04 Recognize the effect of various patient conditions, equipment, accessories, and contrast media on radiographic quality.
  - 13.05 Recognize legal, ethical, and professional responsibilities to patients, physicians, and co-workers.
  - 13.06 Evaluate radiographic images for appropriate positioning and image quality.
  - 13.07 If radiograph is not suitable, review procedural steps taken and modify as necessary.
- 14.0 Apply the principles of radiation protection for the patient, self and others. – The student will be able to:
- 14.01 Demonstrate knowledge of the principles of radiation protection for the patient, self and others.
  - 14.02 Question female patients of child-bearing age about menstrual cycle and/or possible pregnancy to alert radiologist and/or referring physician.
  - 14.03 When indicated place a gonadal shield over male and female reproductive organs prior to taking radiograph.
  - 14.04 Stand behind lead barrier or wear a lead apron while activating radiographic equipment.

- 14.05 Wear a monitoring device in the correct designated location while on duty to obtain a record of radiation exposure over a given period of time while operating radiographic equipment.
  - 14.06 Place protective shield over radiosensitive organs (other than gonads) in or near the primary beam prior to exposure (i.e.: thyroid, eyes, etc.).
  - 14.07 Remove all unnecessary persons from area prior to taking radiograph.
  - 14.08 Restrict the beam to the area to be radiographed.
  - 14.09 Explain the biological effects of ionizing radiation.
- 15.0 Anticipate and provide patient care and comfort. – The student will be able to:
- 15.01 Demonstrate knowledge required to anticipate and provide patient care and comfort.
  - 15.02 Explain procedures to patient before beginning procedure.
  - 15.03 Determine patients' identity using information on request form and confirm by checking wristband and/or by questioning patient.
  - 15.04 Observe and/or question patient to determine if alternate radiographic projections are needed as well as any modifications that might be useful in the diagnosis.
  - 15.05 Assist patient onto or off the table, stool or bed to avoid patient and personal injury using proper body mechanics and/or mechanical transfer devices.
  - 15.06 Instruct patient about diet restrictions and/or self-administered preparatory medication or contrast agent relative to an examination.
  - 15.07 Clean, wash, disinfect and/or sterilize facilities and equipment (e.g., cassettes, tabletops) and dispose of contaminated items prior to each patient to be radiographed.
  - 15.08 Observe appropriate protective techniques when radiographing a patient in isolation to provide for effective infection control.
  - 15.09 Use sterile and/or aseptic technique as required to help prevent infection.
  - 15.10 Apply infection control techniques according to Center for Disease Control (CDC) guidelines.
  - 15.11 Prior to injecting an iodinated contrast medium, elicit such information about the patient which might indicate a risk of a reaction using patient's chart, radiograph file jacket and/or by questioning patient.
  - 15.12 Assist physician in the intravenous injection of contrast medium using appropriate aseptic technique.
  - 15.13 After injection of iodinated contrast medium, observe patient to detect adverse reactions to the medium using knowledge of common reactions.
  - 15.14 Introduce contrast medium (excluding intravenous injections) into patient according to procedure indicated by physician.
  - 15.15 Recognize and report symptoms of abuse and neglect.
- 16.0 Perform quality assurance procedures. – The student will be able to:
- 16.01 Demonstrate the knowledge required to perform basic quality assurance procedures.
  - 16.02 Perform safety checks of radiographic equipment including table, tube and accessories.
  - 16.03 Report malfunction in radiographic unit.
  - 16.04 Clean screens and cassettes on a regular basis to remove dirt, paper or other artifacts.
  - 16.05 Recognize and report malfunctions in the automatic processor.

- 16.06 Implement appropriate JCAHO patient safety goals.
- 17.0 Exercise independent judgment and discretion in the technical performance of medical imaging procedures. – The student will be able to:
  - 17.01 Demonstrate the knowledge to exercise independent judgment and discretion in the technical performance of medical imaging procedures.
  - 17.02 Select film, screen and/or grid combination appropriate for the part to be radiographed.
  - 17.03 Restrict the beam to limit exposure to the area of interest to improve image quality.
  - 17.04 Set appropriate kVp, mA and time for the radiographic unit to achieve optimal image quality and safe operating conditions.
  - 17.05 Set appropriate kVp, mA, and time for the fluoroscopic and accessory imaging devices to achieve optimal image quality and safe operating conditions.
- 18.0 Demonstrate proper operation of radiographic equipment and accessories. – The student will be able to:
  - 18.01 Demonstrate the knowledge to properly operate radiographic equipment and accessories.
  - 18.02 Warm-up x-ray tube to achieve proper operating conditions by following a prescribed sequence of steps.
  - 18.03 Set appropriate kVp, mA and time (or if photo-timed, select appropriate kVp, mA, back-up time and photosensor) for the radiographic unit to achieve optimum image quality and safe operating conditions.
  - 18.04 Utilize measuring calipers, technique charts and tube rating charts for selection of exposure factors.
  - 18.05 Set appropriate kVp, mA, and time for the fluoroscopic and accessory imaging devices to achieve optimal image quality and safe operating conditions.
  - 18.06 Store film in a manner which will reduce the possibility of accidentally exposing or re-exposing film.
  - 18.07 Process film in a correct manner.
  - 18.08 Reload cassettes by selecting film of proper size/type and place in designated area.

**2011-2012**

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Radiation Therapy  
**Career Cluster:** Health Science

	<b>AS</b>	<b>AAS</b>
CIP Number	1317020901	0317020901
Program Type	College Credit	College Credit
Standard Length	77 credit hours	77 credit hours
CTSO	HOSA	HOSA
SOC Codes (all applicable)	31-9099, 29-1124	31-9099, 29-1124
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>	
Perkins Technical Skill Attainment Inventory	<a href="http://www.fldoe.org/workforce/perkins/perkins_resources.asp">http://www.fldoe.org/workforce/perkins/perkins_resources.asp</a>	

### **Purpose**

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

The purpose of this program is to prepare students for employment as Radiation Therapy Technologist Soc Code 29-1124 (Radiation Therapists) or to provide supplemental training for persons previously or presently employed in these occupations.

The content includes but is not limited to performing radiation therapy procedures with skill and understanding to practice the art and science of radiation therapy technology; to administer the prescribed radiation therapy treatments of the highest caliber, thereby providing the patient treatments of the highest quality and accuracy; to become members of the health care team that contributes to the physical and psychological comfort of the patient, to provide radiation protection to the patient, self and health care team; to work with the health care team to improve radiotherapeutic health care in the hospital and community; and to understand the importance of maintaining membership in the professional organizations and keeping abreast of the changes in the field of radiation therapy.

The program is designed to provide the radiation therapy community with workers who, under the supervision of a Radiation Oncologist, uses ionizing radiation to treat disease. The

curriculum provides students an opportunity to develop technical and social skills through experiences in the clinic, classroom, and laboratory.

### **Program Structure**

This program is a planned sequence of instruction consisting of 77 credit hours.

### **Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

Clinical education has been established for the students in these programs. It is designed to permit accurate assessment of the knowledge, skills and abilities of students in the clinical education component of the program. After completion of the prerequisite practice of radiotherapeutic procedures, students indicate readiness for evaluation in a specific category to the clinical affiliate or faculty in the assigned clinical education center.

Clinical education and laboratory activities facilitate student rotations to provide them equitable opportunity to achieve the program clinical objective utilizing multiple affiliates. The resulting clinical rotation and laboratory practicum provides students with patient treatment techniques utilizing a variety of megavoltage equipment, radiation therapy patient care procedures, localization and treatment, radiation therapy physics including dosimetry, machine calibration, quality assurance, handling of sealed radioactive sources and protection, follow up, patient care and patient recordkeeping.

### **Special Notes**

This program meets the Department of Health HIV/AIDS Domestic Violence and Prevention of Medical Errors education requirements. Upon completion of this program, the instructor will provide a certificate to the student verifying that these requirements have been met.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635 F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

The program must be accredited by the Joint Review Committee on Education in Radiologic Technology (JRCERT), 20 North Wacker Drive, Suite 900, Chicago, Illinois 60606-2901 (312) 704-5300, or by the Southern Association of Colleges and Schools to enable graduates to become candidates for examination in Radiation Therapy Technology by the American Registry of Radiologic Technologists. It may also be approved by the Department of Health, Bureau of Radiation Control so that the graduate is eligible for licensure in Florida as a certified Radiation Therapy Technologists. As specified in Chapter 468 Part IV F.S. and Chapter 64E-3 F.A.C.

Program completers will be eligible to make application to take the National Registry examination. For further information contact:

American Registry of Radiologic Technologists (ARRT)

1255 Northland Drive  
St. Paul, MN 55120-1155  
(612/687-0048)  
[www.arrt.org](http://www.arrt.org)

Students are encouraged to become members of their appropriate professional organizations such as the American Society of Radiologic Technologists (ASRT), Florida Society of Radiologic Technologists (FSRT) and its' local affiliate.

Outcomes 01-11 are referred to as the Health Careers Core and do not have to be completed if the student has previously completed the Core in another health science program. The Core should be taken first or concurrently with the first course in the program. Following the successful completion of the core, the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

### **Career and Technical Student Organization (CTSO)**

Health Occupations Students of America, Inc. (HOSA) is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

### **Articulation**

This program has no statewide articulation agreement approved by the Articulation Coordinating Committee. However, this does not preclude the awarding of credits by any college through local agreements.

For details on statewide articulation agreements which correlate to programs and industry certifications, refer to [http://www.fldoe.org/workforce/dwdframe/artic\\_frame.asp](http://www.fldoe.org/workforce/dwdframe/artic_frame.asp).

### **Program Length**

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education

coursework according to SACS. The standard length of this program is 77 credit hours according to Rule 6A-14.030, F.A.C.

### **Certificate Programs**

A College Credit Certificate consists of a program of instruction of less than sixty (60) credits of college-level courses, which is part of an AS or AAS degree program and prepares students for entry into employment (Rule 6A-14.030, F.A.C.). This AS/AAS degree program includes the following College Credit Certificates:

- Radiation Therapy Specialist (0317020903) – 43 credit hours
- Medical Clinical Dosimetry (0317.020701) – 31 credits

Standards for the above certificate programs are contained in separate curriculum frameworks.

### **Standards**

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.
- 12.0 Deliver a planned course of radiation therapy.
- 13.0 Verify the mathematical accuracy of the prescription.
- 14.0 Maintain daily records and document technical details of the treatment administered.
- 15.0 Observe the clinical progress of the patient undergoing radiation therapy; recognize the first signs of any complication; and determine when treatment should be withheld until a physician may be consulted.
- 16.0 Provide patient care and comfort essential to radiation therapy procedures.
- 17.0 Detect equipment malfunctions; report same to the proper authority; and know the safe limits of equipment operation.
- 18.0 Apply the rules and regulations for radiation safety; detect any radiation hazards; and maintain control in the event of a radiation accident.
- 19.0 Understand the function of equipment and utilize equipment to its full potential.
- 20.0 Demonstrate the use of all treatment accessories.
- 21.0 Construct immobilization and beam-directional devices and prepare brachytherapy molds.
- 22.0 Assist in the preparation of brachytherapy sources.
- 23.0 Assist the physicist in calibration of equipment and in treatment planning procedures.

2011-2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Radiation Therapy  
**CIP Numbers:** 1317020901 AS, 0317020901 AAS  
**Program Length:** 77 credit hours  
**SOC Code(s):** 31-9099, 29-1124

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. At the completion of this program, the student will be able to:

**Health Careers Core: The Health Careers Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Careers Core or any other health occupations program do not have to repeat intended outcomes 01-11.**

01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:

- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
- 01.02 Identify common methods of payment for healthcare services.
- 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
- 01.04 Describe the composition and functions of a healthcare team.
- 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
- 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
- 01.07 Identify characteristics of effective teams.
- 01.08 Recognize methods for building positive team relationships.
- 01.09 Analyze attributes and attitudes of an effective leader.
- 01.10 Recognize factors and situations that may lead to conflict.
- 01.11 Demonstrate effective techniques for managing team conflict.
- 01.12 Describe factors that influence the current delivery system of healthcare.
- 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.

02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:

- 02.01 Develop basic speaking and active listening skills.
- 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
- 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
- 02.04 Respond to verbal and non-verbal cues.

- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.
- 02.06 Use appropriate medical terminology and abbreviations.
- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
- 02.08 Recognize the importance of patient/client educations regarding healthcare.
- 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
- 02.10 Analyze elements of communication using a sender-receiver model.
- 02.11 Distinguish between and report subjective and objective information.
- 02.12 Report relevant information in order of occurrence.

03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:

- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
- 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
- 03.03 Demonstrate procedures for accurate documentation and record keeping.
- 03.04 Interpret healthcare facility policy and procedures.
- 03.05 Explain the “Patient’s Bill of Rights”.
- 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
- 03.07 Describe advance directives.
- 03.08 Describe informed consent.
- 03.09 Explain the laws governing harassment, labor and employment.
- 03.10 Differentiate between legal and ethical issues in healthcare.
- 03.11 Describe a code of ethics consistent with the healthcare occupation.
- 03.12 Identify and compare personal, professional, and organizational ethics.
- 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
- 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
- 03.15 Recognize and report abuse including domestic violence and neglect.
- 03.16 Distinguish among the five schedules of controlled substances.

04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:

- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
- 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
- 04.03 Identify psychological reactions to illness including defense mechanisms.
- 04.04 Identify complementary and alternative health practices.
- 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
- 04.06 Explain the basic concepts of positive self image, wellness and stress.
- 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
- 04.08 Explain the nutrition pyramid.

- 04.09 Recognize the steps in the grief process.
- 05.0 Recognize and practice safety and security procedures. – The student will be able to:
  - 05.01 Recognize safe and unsafe working conditions and report safety hazards.
  - 05.02 Demonstrate the safe use of medical equipment.
  - 05.03 Explain and apply the theory of root- cause analysis
  - 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
  - 05.05 Identify and practice security procedures for medical supplies and equipment.
  - 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions.
  - 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
  - 05.08 Demonstrate proper body mechanics and ergonomics.
  - 05.09 Demonstrate the procedure for properly identifying patients.
  - 05.10 Demonstrate procedures for the safe transport and transfer of patients.
  - 05.11 Describe fire, safety, disaster and evacuations procedures.
  - 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )
- 06.0 Recognize and respond to emergency situations. – The student will be able to:
  - 06.01 Monitor and record vital signs.
  - 06.02 Describe legal parameters relating to the administration of emergency care.
  - 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
  - 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.
- 07.0 Recognize and practice infection control procedures. – The student will be able to:
  - 07.01 Define principles of infection control including standard and transmission based precautions.
  - 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
  - 07.03 Demonstrate knowledge of surgical asepsis.
  - 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.
- 08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:
  - 08.01 Describe technology applications in healthcare.
  - 08.02 Define terms and demonstrate basic computer skills.
  - 08.03 Recognize technology applications in healthcare.
  - 08.04 Interpret information from electronic medical documents.
  - 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.

09.0 Demonstrate employability skills. – The student will be able to:

- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.
- 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
- 09.03 Identify documents that may be required when applying for a job.
- 09.04 Write an appropriate resume.
- 09.05 Conduct a job search.
- 09.06 Complete a job application form correctly.
- 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
- 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
- 09.09 Identify acceptable work habits.
- 09.10 Recognize appropriate affective/professional behavior.
- 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).

10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:

- 10.01 Recognize emerging diseases and disorders
- 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
- 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
- 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
- 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
- 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.

11.0 Apply basic math and science skills. – The student will be able to:

- 11.01 Draw, read, and report on graphs, charts and tables.
- 11.02 Measure time, temperature, distance, capacity, and mass/weight.
- 11.03 Make, use and convert using both traditional and metric units.
- 11.04 Make estimations and approximations and judge the reasonableness of the result.
- 11.05 Convert from regular to 24 hour time.
- 11.06 Demonstrate ability to evaluate and draw conclusions.
- 11.07 Organize and communicate the results obtained by observation and experimentation.
- 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
- 11.09 Calculate ratios

## **Radiation Therapy: (12-23)**

- 12.0 Deliver a planned course of radiation therapy. – The student will be able to:
- 12.01 Orient patient to the planned treatment procedure and give emotional support.
  - 12.02 Identify patient scheduled for treatment by arm band, photograph, or verbally and help patient onto and off the treatment table with the aid of assistants, when necessary, using proper body mechanics to avoid injury to patient or technologist.
  - 12.03 Position patient to reproduce set-up indicated in the treatment chart, using positioning aids and immobilization devices.
  - 12.04 Position treatment machine to reproduce set-up indicated by the approved treatment plan.
  - 12.05 Set appropriate controls on treatment machine console (e.g., modality, energy, monitor units, time) and activate machine to deliver prescribed treatment indicated on treatment plan.
  - 12.06 Discuss with physician any questions concerning patient's prescription.
- 13.0 Verify the mathematical accuracy of the prescription. – The student will be able to:
- 13.01 Calculate the number of monitor units/exposure time for each treatment session to achieve the prescribed dose indicated by the physician, taking into account such factors as the energy of the beam, number of and orientation of the beam(s), SSD or SAD, depth of tumor, patient thickness, size and shape of portal, use of wedges, et cetera.
  - 13.02 Record factors used in the calculation of monitor units/exposure time onto treatment chart to allow checking of calculations for correctness.
  - 13.03 Recognize if proposed treatment plan appears to deliver inappropriate dose to critical structures in order to alert the physician.
- 14.0 Maintain daily records and document technical details of the treatment administered. – The student will be able to:
- 14.01 Obtain and process verification radiographs for documentation of accuracy of field position.
  - 14.02 Set up preliminary treatment field and take a radiograph with the field marked by collimator wires, solder wire, or lead ladders taped to the patient's skin.
  - 14.03 Record information on treatment chart, describing the conditions used in the simulation, to aid in their reproduction (e.g., patient position, technique and positioning devices) on the treatment machine.
- 15.0 Observe the clinical progress of the patient undergoing radiation therapy; recognize the first signs of any complication; and determine when treatment should be withheld until a physician may be consulted. – The student will be able to:
- 15.01 When requested, measure and record vital signs (blood pressure, respiratory rate, pulse rate and temperature).

- 15.02 Schedule patient for blood studies and record result (e.g., platelets, WBC, PVC, [HCT]) on treatment chart to provide record of effects of radiation on patient during course of treatment, and report abnormal results to physician.
  - 15.03 Observe and/or question patient regarding nutritional status offering dietary hints or referring patient to appropriate personnel for management.
  - 15.04 Observe and question patient about any side effects or problems he/she may be experiencing, and notify physician.
- 16.0 Provide patient care and comfort essential to radiation therapy procedures. – The student will be able to:
- 16.01 Answer patient's questions regarding treatment related topics or refer to the physician when inappropriate for the therapist to answer.
  - 16.02 Maintain accessory medical equipment attached to patient (e.g., IVs, oxygen tanks) to avoid endangering the patient during the therapy procedure using knowledge of such hospital apparatus.
  - 16.03 Educate patient concerning proper skin care of treatment area(s).
  - 16.04 Clean, wash, disinfect and/or sterilize facility and equipment, and dispose of contaminated items in preparation for next patient.
- 17.0 Detect equipment malfunctions; report same to the proper authority, and know the safe limits of equipment operation. – The student will be able to:
- 17.01 Warm up treatment machines and/or simulators and check all safety and operation procedures according to manufacturer's operating manual for possible malfunction.
  - 17.02 Monitor console of treatment machine to spot any malfunctioning of equipment during treatment using indicators on machine, and take appropriate action when necessary to assure safety of patient and personnel.
  - 17.03 Maintain treatment machines and accessories to minimize necessary interruptions in treatment due to mechanical breakdown.
- 18.0 Apply the rules and regulations for radiation safety; detect any radiation hazards; and maintain control in the event of radiation accident. – The student will be able to:
- 18.01 Wear a monitoring device while on duty to obtain a personal record of radiation exposure over a period of time.
  - 18.02 Protect workers and others in the area from radiation exposure by closing door to treatment room to activate interlock.
  - 18.03 Monitor patient visually (directly or indirectly) and by intercommunication system to insure patient's safety and accuracy of treatment.
  - 18.04 Implement appropriate The joint Commission patient safety goals.
- 19.0 Understand the function of equipment and utilize equipment to its full potential. – The student will be able to:
- 19.01 Position patient on simulator table in proper orientation to the simulator using positioning aids and immobilization devices.
  - 19.02 Assist physician in localizing tumor volume and critical organs using radiographic techniques, with or without contrast media.

- 19.03 Process films to produce finished radiographs and have physician approve treatment (field) area indicated in film.
- 20.0 Demonstrate the use of all treatment accessories. – The student will be able to:
- 20.01 Assist physician with the physical examinations of patients (e.g., preparing patient, examination room, instruments).
  - 20.02 Assist physician in determining optimum fields to cover volume of interest utilizing knowledge of shape of field, gantry angle, blocks, et cetera.
  - 20.03 Take contours of body parts for use in treatment planning using methods or materials such as a solder wire, pin device, pantograph, CT, et cetera.
- 21.0 Construct immobilization and beam directional devices and prepare brachytherapy molds. – The student will be able to:
- 21.01 When procedure requires, manufacture individualized immobilization devices to aid in the replication of the treatment set-up (e.g., bite blocks, molds, plaster shells).
  - 21.02 When appropriate, measure and record information necessary to fabricate blocks or accessories required for treatment.
  - 21.03 Prepare custom blocks for use in shaping treatment field by cutting lead blocks or using molten metal techniques.
- 22.0 Assist in the preparation of brachytherapy sources. – The student will be able to:
- 22.01 Take placement radiographs of implants to be used in dose calculation and placement verification according to protocol.
  - 22.02 Assist with measurement and recording of the necessary parameters for calculation of the dose to be delivered.
  - 22.03 Assist with brachytherapy using knowledge of radionuclides employed and interstitial and intracavitary applications as integrated into the patient treatment plan.
- 23.0 Assist the physicist in calibration of equipment and in treatment planning procedures. – The student will be able to:
- 23.01 Check dose rate by measuring radiation dose reading at standard distance and standard conditions, and then compare with proper standard using appropriate radiation measuring devices (e.g., Victoreen Timble Chamber).
  - 23.02 Perform light field test on treatment machine to check alignment of collimator light and cross hairs with treatment beam by setting a standard field size, exposing a radiograph and physically measuring the field size recorded on the radiograph.
  - 23.03 Check rotation by setting gantry so it goes through complete arc.

**2011-2012**

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Radiation Therapy Specialist  
**Career Cluster:** Health Science

<b>CCC</b>	
CIP Number	0317020903
Program Type	College Credit Certificate (CCC)
Program Length	43 credit hours
CTSO	HOSA
SOC Codes (all applicable)	31-9099, 29-1124
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>

### **Purpose**

This certificate program is part of the Radiation Therapy AS/AAS degree program (1317.020901).

A College Credit Certificate consists of a program of instruction of less than sixty (60) credits of college-level courses, which is part of an AS or AAS degree program and prepares students for entry into employment (Rule 6A-14.030, F.A.C.).

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

The purpose of this program is to prepare students for employment as radiation therapy technologist SOC Code 29-1124 (Radiation Therapists), or to provide supplemental training for persons previously or presently employed in these occupations.

The content includes but is not limited to administer the prescribed radiation therapy treatments of the highest caliber, thereby providing the patient treatments of the highest quality and accuracy; to become members of the health care team that contributes to the physical and psychological comfort of the patient, to provide radiation protection to the patient, self and health care team; to work with the health care team to improve radiotherapeutic health care in the hospital and community; and to understand the importance of maintaining membership in the professional organizations and keeping abreast of the changes in the field of radiation therapy.

The program is designed to provide the radiation therapy community with workers who, under the supervision of a Radiation Oncologist, uses ionizing radiation to treat disease. The

curriculum provides students an opportunity to develop technical and social skills through experiences in the clinic, classroom, and laboratory.

### **Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

Clinical education has been established for the students in these programs. It is designed to permit accurate assessment of the knowledge, skills and abilities of students in the clinical education component of the program. After completion of the prerequisite practice of radiotherapeutic procedures, students indicate readiness for evaluation in a specific category to the clinical affiliate or faculty in the assigned clinical education center.

Clinical education and laboratory activities facilitate student rotations to provide them equitable opportunity to achieve the program clinical objective utilizing multiple affiliates. The resulting clinical rotation and laboratory practicum provides students with patient treatment techniques utilizing a variety of megavoltage equipment, radiation therapy patient care procedures, localization and treatment, radiation therapy physics including dosimetry, machine calibration, quality assurance, handling of sealed radioactive sources and protection, follow up, patient care and patient recordkeeping.

### **Special Notes**

This program meets the Department of Health HIV/AIDS Domestic Violence and Prevention of Medical Errors education requirements. Upon completion of this program, the instructor will provide a certificate to the student verifying that these requirements have been met.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635 F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

The program must be accredited by the Joint Review Committee on Education in Radiologic Technology (JRCERT), 20 North Wacker Drive, Suite 900, Chicago, Illinois 60606-2901, (312) 704-5300, or by the Southern Association of Colleges and Schools to enable graduates to become candidates for examination in Radiation Therapy Technology by the American Registry of Radiologic Technologists. It may also be approved by the Department of Health, Bureau of Radiation Control so that the graduate is eligible for licensure in Florida as a certified Radiation Therapy Technologists. As specified in Chapter 468 Part IV F.S. and 64E-3 F.A.C.

The designation of PSV-C requires that the student have an associate degree in a related field of study (i.e. radiologic technology, etc.). Upon the successful completion of the program the student will receive a Radiation Therapy Specialist Certificate.

Program completers will be eligible to make application to take the National Registry examination. For further information contact:

American Registry of Radiologic Technologists (ARRT)  
1255 Northland Drive

St. Paul, MN 55120  
(612/687-0048)  
[www.arrt.org](http://www.arrt.org)

Students are encouraged to become members of their appropriate professional organizations such as the American Society of Radiologic Technologists (ASRT), Florida Society of Radiologic Technologists (FSRT) and its' local affiliate.

Outcomes 01-11 are referred to as the Health Careers Core and do not have to be completed if the student has previously completed the Core in another health science program. The Core should be taken first or concurrently with the first course in the program. Following the successful completion of the core, the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

### **Career and Technical Student Organization (CTSO)**

Health Occupations Students of America, Inc. (HOSA) is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

### **Standards**

After successfully completing this course the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.

- 12.0 Deliver a planned course of radiation therapy.
- 13.0 Verify the mathematical accuracy of the prescription.
- 14.0 Maintain daily records and document technical details of the treatment administered.
- 15.0 Observe the clinical progress of the patient undergoing radiation therapy; recognize the first signs of any complication; and determine when treatment should be withheld until a physician may be consulted.
- 16.0 Provide patient care and comfort essential to radiation therapy procedures.
- 17.0 Detect equipment malfunctions; report same to the proper authority; and know the safe limits of equipment operation.
- 18.0 Apply the rules and regulations for radiation safety; detect any radiation hazards; and maintain control in the event of a radiation accident.
- 19.0 Understand the function of equipment and utilize equipment to its full potential.
- 20.0 Demonstrate the use of all treatment accessories.
- 21.0 Construct immobilization and beam-directional devices and prepare brachytherapy molds.
- 22.0 Assist in the preparation of brachytherapy sources.
- 23.0 Assist the physicist in calibration of equipment and in treatment planning procedures.

2011-2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Radiation Therapy Specialist  
**CIP Number:** 0317020903  
**Program Length:** 43 credit hours  
**SOC Code(s):** 31-9099, 29-1124

This certificate program is part of the Radiation Therapy AS/AAS degree program (1317.020901). At the completion of this program, the student will be able to:

**Health Careers Core: The Health Careers Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Careers Core or any other health occupations program do not have to repeat intended outcomes 01-11.**

01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:

- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
- 01.02 Identify common methods of payment for healthcare services.
- 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
- 01.04 Describe the composition and functions of a healthcare team.
- 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
- 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
- 01.07 Identify characteristics of effective teams.
- 01.08 Recognize methods for building positive team relationships.
- 01.09 Analyze attributes and attitudes of an effective leader.
- 01.10 Recognize factors and situations that may lead to conflict.
- 01.11 Demonstrate effective techniques for managing team conflict.
- 01.12 Describe factors that influence the current delivery system of healthcare.
- 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.

02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:

- 02.01 Develop basic speaking and active listening skills.
- 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
- 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
- 02.04 Respond to verbal and non-verbal cues.
- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.
- 02.06 Use appropriate medical terminology and abbreviations.

- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
  - 02.08 Recognize the importance of patient/client educations regarding healthcare.
  - 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
  - 02.10 Analyze elements of communication using a sender-receiver model.
  - 02.11 Distinguish between and report subjective and objective information.
  - 02.12 Report relevant information in order of occurrence.
- 03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:
- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
  - 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
  - 03.03 Demonstrate procedures for accurate documentation and record keeping.
  - 03.04 Interpret healthcare facility policy and procedures.
  - 03.05 Explain the “Patient’s Bill of Rights”.
  - 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
  - 03.07 Describe advance directives.
  - 03.08 Describe informed consent.
  - 03.09 Explain the laws governing harassment, labor and employment.
  - 03.10 Differentiate between legal and ethical issues in healthcare.
  - 03.11 Describe a code of ethics consistent with the healthcare occupation.
  - 03.12 Identify and compare personal, professional, and organizational ethics.
  - 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
  - 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
  - 03.15 Recognize and report abuse including domestic violence and neglect.
  - 03.16 Distinguish among the five schedules of controlled substances.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:
- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
  - 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
  - 04.03 Identify psychological reactions to illness including defense mechanisms.
  - 04.04 Identify complementary and alternative health practices.
  - 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
  - 04.06 Explain the basic concepts of positive self image, wellness and stress.
  - 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
  - 04.08 Explain the nutrition pyramid.
  - 04.09 Recognize the steps in the grief process.
- 05.0 Recognize and practice safety and security procedures. – The student will be able to:

- 05.01 Recognize safe and unsafe working conditions and report safety hazards.
  - 05.02 Demonstrate the safe use of medical equipment.
  - 05.03 Explain and apply the theory of root- cause analysis
  - 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
  - 05.05 Identify and practice security procedures for medical supplies and equipment.
  - 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions.
  - 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
  - 05.08 Demonstrate proper body mechanics and ergonomics.
  - 05.09 Demonstrate the procedure for properly identifying patients.
  - 05.10 Demonstrate procedures for the safe transport and transfer of patients.
  - 05.11 Describe fire, safety, disaster and evacuations procedures.
  - 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )
- 06.0 Recognize and respond to emergency situations. – The student will be able to:
- 06.01 Monitor and record vital signs.
  - 06.02 Describe legal parameters relating to the administration of emergency care.
  - 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
  - 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.
- 07.0 Recognize and practice infection control procedures. – The student will be able to:
- 07.01 Define principles of infection control including standard and transmission based precautions.
  - 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
  - 07.03 Demonstrate knowledge of surgical asepsis.
  - 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.
- 08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:
- 08.01 Describe technology applications in healthcare.
  - 08.02 Define terms and demonstrate basic computer skills.
  - 08.03 Recognize technology applications in healthcare.
  - 08.04 Interpret information from electronic medical documents.
  - 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.
- 09.0 Demonstrate employability skills. – The student will be able to:
- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.

- 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
  - 09.03 Identify documents that may be required when applying for a job.
  - 09.04 Write an appropriate resume.
  - 09.05 Conduct a job search.
  - 09.06 Complete a job application form correctly.
  - 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
  - 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
  - 09.09 Identify acceptable work habits.
  - 09.10 Recognize appropriate affective/professional behavior.
  - 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:
- 10.01 Recognize emerging diseases and disorders
  - 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
  - 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
  - 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
  - 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
  - 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.
- 11.0 Apply basic math and science skills. – The student will be able to:
- 11.01 Draw, read, and report on graphs, charts and tables.
  - 11.02 Measure time, temperature, distance, capacity, and mass/weight.
  - 11.03 Make, use and convert using both traditional and metric units.
  - 11.04 Make estimations and approximations and judge the reasonableness of the result.
  - 11.05 Convert from regular to 24 hour time.
  - 11.06 Demonstrate ability to evaluate and draw conclusions.
  - 11.07 Organize and communicate the results obtained by observation and experimentation.
  - 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
  - 11.09 Calculate ratios

**Radiation Therapy Specialist: (12-23)**

- 12.0 Deliver a planned course of radiation therapy. – The student will be able to:
- 12.01 Orient patient to the planned treatment procedure and give emotional support.
  - 12.02 Identify patient scheduled for treatment by arm band, photograph, or verbally and help patient onto and off the treatment table with the aid of assistants, when necessary, using proper body mechanics to avoid injury to patient or technologist.
  - 12.03 Position patient to reproduce set-up indicated in the treatment chart, using positioning aids and immobilization devices.
  - 12.04 Position treatment machine to reproduce set-up indicated by the approved treatment plan.
  - 12.05 Set appropriate controls on treatment machine console (e.g., modality, energy, monitor units, time) and activate machine to deliver prescribed treatment indicated on treatment plan.
  - 12.06 Discuss with physician any questions concerning patient's prescription.
- 13.0 Verify the mathematical accuracy of the prescription. – The student will be able to:
- 13.01 Calculate the number of monitor units/exposure time for each treatment session to achieve the prescribed dose indicated by the physician, taking into account such factors as the energy of the beam, number of and orientation of the beam(s), SSD or SAD, depth of tumor, patient thickness, size and shape of portal, use of wedges, et cetera.
  - 13.02 Record factors used in the calculation of monitor units/exposure time onto treatment chart to allow checking of calculations for correctness.
  - 13.03 Recognize if proposed treatment plan appears to deliver inappropriate dose to critical structures in order to alert the physician.
- 14.0 Maintain daily records and document technical details of the treatment administered. – The student will be able to:
- 14.01 Obtain and process verification radiographs for documentation of accuracy of field position.
  - 14.02 Set up preliminary treatment field and take a radiograph with the field marked by collimator wires, solder wire, or lead ladders taped to the patient's skin.
  - 14.03 Record information on treatment chart, describing the conditions used in the simulation, to aid in their reproduction (e.g., patient position, technique and positioning devices) on the treatment machine.
- 15.0 Observe the clinical progress of the patient undergoing radiation therapy; recognize the first signs of any complication; and determine when treatment should be withheld until a physician may be consulted. – The student will be able to:
- 15.01 When requested, measure and record vital signs (blood pressure, respiratory rate, pulse rate and temperature).
  - 15.02 Schedule patient for blood studies and record result (e.g., platelets, WBC, PVC, [HCT]) on treatment chart to provide record of effects of radiation on patient during course of treatment, and report abnormal results to physician.

- 15.03 Observe and/or question patient regarding nutritional status offering dietary hints or referring patient to appropriate personnel for management.
- 15.04 Observe and question patient about any side effects or problems he/she may be experiencing, and notify physician.
- 16.0 Provide patient care and comfort essential to radiation therapy procedures. – The student will be able to:
  - 16.01 Answer patient's questions regarding treatment related topics or refer to the physician when inappropriate for the therapist to answer.
  - 16.02 Maintain accessory medical equipment attached to patient (e.g., IVs, oxygen tanks) to avoid endangering the patient during the therapy procedure using knowledge of such hospital apparatus.
  - 16.03 Educate patient concerning proper skin care of treatment area(s).
  - 16.04 Clean, wash, disinfect and/or sterilize facility and equipment, and dispose of contaminated items in preparation for next patient.
- 17.0 Detect equipment malfunctions; report same to the proper authority, and know the safe limits of equipment operation. – The student will be able to:
  - 17.01 Warm up treatment machines and/or simulators and check all safety and operation procedures according to manufacturer's operating manual for possible malfunction.
  - 17.02 Monitor console of treatment machine to spot any malfunctioning of equipment during treatment using indicators on machine, and take appropriate action when necessary to assure safety of patient and personnel.
  - 17.03 Maintain treatment machines and accessories to minimize necessary interruptions in treatment due to mechanical breakdown.
- 18.0 Apply the rules and regulations for radiation safety; detect any radiation hazards; and maintain control in the event of radiation accident. – The student will be able to:
  - 18.01 Wear a monitoring device while on duty to obtain a personal record of radiation exposure over a period of time.
  - 18.02 Protect workers and others in the area from radiation exposure by closing door to treatment room to activate interlock.
  - 18.03 Monitor patient visually (directly or indirectly) and by intercommunication system to insure patient's safety and accuracy of treatment.
  - 18.04 Implement appropriate The Joint Commission patient safety goals.
- 19.0 Understand the function of equipment and utilize equipment to its full potential. – The student will be able to:
  - 19.01 Position patient on simulator table in proper orientation to the simulator using positioning aids and immobilization devices.
  - 19.02 Assist physician in localizing tumor volume and critical organizing radiographic techniques, with or without contrast media.
  - 19.03 Process films to produce finished radiographs and have physician approve treatment (field) area indicated in film.
- 20.0 Demonstrate the use of all treatment accessories. – The student will be able to:

- 20.01 Assist physician with the physical examinations of patients (e.g., preparing patient, examination room, instruments).
  - 20.02 Assist physician in determining optimum fields to cover volume of interest utilizing knowledge of shape of field, gantry angle, blocks, et cetera.
  - 20.03 Take contours of body parts for use in treatment planning using methods or materials such as a solder wire, pin device, pantograph, CT, et cetera.
- 21.0 Construct immobilization and beam directional devices and prepare brachytherapy molds. – The student will be able to:
- 21.01 When procedure requires, manufacture individualized immobilization devices to aid in the replication of the treatment set-up (e.g., bite blocks, molds, plaster shells).
  - 21.02 When appropriate, measure and record information necessary to fabricate blocks or accessories required for treatment.
  - 21.03 Prepare custom blocks for use in shaping treatment field by cutting lead blocks or using molten metal techniques.
- 22.0 Assist in the preparation of brachytherapy source. – The student will be able to:
- 22.01 Take placement radiographs of implants to be used in dose calculation and placement verification according to protocol.
  - 22.02 Assist with measurement and recording of the necessary parameters for calculation of the dose to be delivered.
  - 22.03 Assist with brachytherapy using knowledge of radionuclides employed and interstitial and intracavitary applications as integrated into the patient treatment plan.
- 23.0 Assist the physicist in calibration of equipment and in treatment planning procedures. – The student will be able to:
- 23.01 Check dose rate by measuring radiation dose reading at standard distance and standard conditions, and then compare with proper standard using appropriate radiation measuring devices (e.g., Victoreen Tumble Chamber).
  - 23.02 Perform light field test on treatment machine to check alignment of collimator light and cross hairs with treatment beam by setting a standard field size, exposing a radiograph and physically measuring the field size recorded on the radiograph.
  - 23.03 Check rotation by setting gantry so it goes through complete arc.

### **Purpose**

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

The program is designed to prepare students for employment as diagnostic medical sonographers SOC Code 29-2032 (Diagnostic Medical Sonographers) or to provide supplemental training for persons previously or currently employed in this occupation.

The content includes but is not limited to anatomy, physiology and pathology of the abdominal, pelvic, and urogenital structures; physics; instrumentation; equipment standards; biological effect of ultrasound; patient care; clinical medicine; applications and limitations of ultrasound; related diagnostic procedures; image evaluation; administration; first aid and cardiopulmonary resuscitation; employability skills; leadership and human relations skills; health and safety.

### **Program Structure**

This program is a planned sequence of instruction consisting of 72 credit hours.

## Laboratory Activities

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

## Special Notes

This program meets the Department of Health HIV/AIDS Domestic Violence and Prevention of Medical Errors education requirements. Upon completion of this program, the instructor will provide a certificate to the student verifying that these requirements have been met.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635 F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

The program should meet the requirements of:

Commission on Accreditation of Allied Health Education Programs  
(CAAHEP)  
361 Park St.  
Clearwater, FL 33756  
727-210-2350  
[www.caahep.org](http://www.caahep.org)

Written clinical affiliation agreements must be maintained with each health care facility. Health care facilities must be accredited by The Joint Commission.

Students completing this program may apply to take one or both of the national registry examinations to obtain certification, for further information contact:

American Registry of Diagnostic  
Medical Sonographers (ARDMS)  
51 Monroe St. Plaza East 1  
Rockville, Maryland 20850-2400  
301-738-8401  
[www.ardms.org](http://www.ardms.org)

or

American Registry of Radiologic Technologists (ARRT)  
1255 Northland Drive  
St. Paul, MN 55120-1155  
(612/687-0048)  
[www.arrt.org](http://www.arrt.org)

Outcomes 01-11 are referred to as the Health Careers Core and do not have to be completed if the student has previously completed the Core in another health science program. The Core should be taken first or concurrently with the first course in the program. Following the

successful completion of the core, the student is eligible to take the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

### **Career and Technical Student Organization (CTSO)**

Health Occupations Students of America, Inc.(HOSA) is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

### **Articulation**

This program has no statewide articulation agreement approved by the Articulation Coordinating Committee. However, this does not preclude the awarding of credits by any college through local agreements.

For details on statewide articulation agreements which correlate to programs and industry certifications, refer to [http://www.fl DOE.org/workforce/dwdframe/artic\\_frame.asp](http://www.fl DOE.org/workforce/dwdframe/artic_frame.asp).

### **Program Length**

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. The standard length of this program is 72 credit hours according to Rule 6A-14.030, F.A.C.

### **Certificate Programs**

A College Credit Certificate consists of a program of instruction of less than sixty (60) credits of college-level courses, which is part of an AS or AAS degree program and prepares students for entry into employment (Rule 6A-14.030, F.A.C.). This AS/AAS degree program includes the following College Credit Certificates:

Diagnostic Medical Sonography Specialist (0317.021201) – 42 credit hours

Standards for the above certificate programs are contained in separate curriculum frameworks.

**Standards**

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.
- 12.0 Demonstrate an awareness of the uses of ultrasound imaging, types of presentations, orientation, and relationships to other imaging modalities.
- 13.0 Demonstrate an awareness of the basic principles of ultrasound physics, emphasizing practical relationships of physics to proper diagnosis.
- 14.0 Demonstrate an awareness of ultrasound physics by exploring the various aspects of the field through individual experimentation.
- 15.0 Apply knowledge of the anatomy and scanning techniques related to the upper abdominal organs and systems.
- 16.0 Demonstrate an awareness of the basic principles of instrumentation common to the field of ultrasound.
- 17.0 Apply knowledge gained in instrumentation lecture and work with actual ultrasound scanners similar to those found in local hospitals.
- 18.0 Demonstrate awareness of knowledge of anatomy, pathology, and scanning techniques used in modern sonography for obstetrics and gynecology.
- 19.0 Apply knowledge of anatomy, pathology, and scanning techniques used in modern sonography for obstetrics and gynecology.
- 20.0 Demonstrate awareness of knowledge of anatomy, pathology, and scanning techniques used in modern sonography of the genitourinary system.
- 21.0 Develop a continuous awareness of the disease process.
- 22.0 Apply accumulated knowledge to the process of creating diagnostic sonograms.
- 23.0 Apply skills needed to complete diagnostic images of high quality from a variety of scanning units

Florida Department of Education

2011 - 2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Diagnostic Medical Sonography Technology  
**CIP Numbers:** 1317021200 AS, 0317021200 AAS  
**Program Length:** 72 credit hours  
**SOC Code(s):** 31-9099, 29-2032

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. At the completion of this program, the student will be able to:

**Health Careers Core: The Health Careers Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Careers Core or any other health occupations program do not have to repeat the intended outcomes 01-11.**

01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:

- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
- 01.02 Identify common methods of payment for healthcare services.
- 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
- 01.04 Describe the composition and functions of a healthcare team.
- 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
- 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
- 01.07 Identify characteristics of effective teams.
- 01.08 Recognize methods for building positive team relationships.
- 01.09 Analyze attributes and attitudes of an effective leader.
- 01.10 Recognize factors and situations that may lead to conflict.
- 01.11 Demonstrate effective techniques for managing team conflict.
- 01.12 Describe factors that influence the current delivery system of healthcare.
- 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.

02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:

- 02.01 Develop basic speaking and active listening skills.
- 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
- 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
- 02.04 Respond to verbal and non-verbal cues.

- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.
- 02.06 Use appropriate medical terminology and abbreviations.
- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
- 02.08 Recognize the importance of patient/client educations regarding healthcare.
- 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
- 02.10 Analyze elements of communication using a sender-receiver model.
- 02.11 Distinguish between and report subjective and objective information.
- 02.12 Report relevant information in order of occurrence.

03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:

- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
- 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
- 03.03 Demonstrate procedures for accurate documentation and record keeping.
- 03.04 Interpret healthcare facility policy and procedures.
- 03.05 Explain the “Patient’s Bill of Rights”.
- 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
- 03.07 Describe advance directives.
- 03.08 Describe informed consent.
- 03.09 Explain the laws governing harassment, labor and employment.
- 03.10 Differentiate between legal and ethical issues in healthcare.
- 03.11 Describe a code of ethics consistent with the healthcare occupation.
- 03.12 Identify and compare personal, professional, and organizational ethics.
- 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
- 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
- 03.15 Recognize and report abuse including domestic violence and neglect.
- 03.16 Distinguish among the five schedules of controlled substances.

04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:

- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
- 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
- 04.03 Identify psychological reactions to illness including defense mechanisms.
- 04.04 Identify complementary and alternative health practices.
- 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
- 04.06 Explain the basic concepts of positive self image, wellness and stress.
- 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
- 04.08 Explain the nutrition pyramid.

- 04.09 Recognize the steps in the grief process.
- 05.0 Recognize and practice safety and security procedures. – The student will be able to:
  - 05.01 Recognize safe and unsafe working conditions and report safety hazards.
  - 05.02 Demonstrate the safe use of medical equipment.
  - 05.03 Explain and apply the theory of root- cause analysis
  - 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
  - 05.05 Identify and practice security procedures for medical supplies and equipment.
  - 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions.
  - 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
  - 05.08 Demonstrate proper body mechanics and ergonomics.
  - 05.09 Demonstrate the procedure for properly identifying patients.
  - 05.10 Demonstrate procedures for the safe transport and transfer of patients.
  - 05.11 Describe fire, safety, disaster and evacuations procedures.
  - 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )
- 06.0 Recognize and respond to emergency situations. – The student will be able to:
  - 06.01 Monitor and record vital signs.
  - 06.02 Describe legal parameters relating to the administration of emergency care.
  - 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
  - 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.
- 07.0 Recognize and practice infection control procedures. – The student will be able to:
  - 07.01 Define principles of infection control including standard and transmission based precautions.
  - 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
  - 07.03 Demonstrate knowledge of surgical asepsis.
  - 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.
- 08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:
  - 08.01 Describe technology applications in healthcare.
  - 08.02 Define terms and demonstrate basic computer skills.
  - 08.03 Recognize technology applications in healthcare.
  - 08.04 Interpret information from electronic medical documents.
  - 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.

09.0 Demonstrate employability skills. – The student will be able to:

- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.
- 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
- 09.03 Identify documents that may be required when applying for a job.
- 09.04 Write an appropriate resume.
- 09.05 Conduct a job search.
- 09.06 Complete a job application form correctly.
- 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
- 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
- 09.09 Identify acceptable work habits.
- 09.10 Recognize appropriate affective/professional behavior.
- 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).

10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:

- 10.01 Recognize emerging diseases and disorders
- 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
- 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
- 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
- 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
- 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.

11.0 Apply basic math and science skills. – The student will be able to:

- 11.01 Draw, read, and report on graphs, charts and tables.
- 11.02 Measure time, temperature, distance, capacity, and mass/weight.
- 11.03 Make, use and convert using both traditional and metric units.
- 11.04 Make estimations and approximations and judge the reasonableness of the result.
- 11.05 Convert from regular to 24 hour time.
- 11.06 Demonstrate ability to evaluate and draw conclusions.
- 11.07 Organize and communicate the results obtained by observation and experimentation.
- 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
- 11.09 Calculate ratios

**Diagnostic Medical Sonography Technology: The intended outcomes (12-23) complete the occupational completion point of Diagnostic Medical Sonography Technology.**

- 12.0 Demonstrate an awareness of the uses of ultrasound imaging, types of presentations, orientation, and relationships to other imaging modalities. – The student will be able to:
- 12.01 Describe the relationship of ultrasound to other imaging fields.
  - 12.02 Explain the role of the sonographer.
  - 12.03 Describe and explain the proper uses of orientation and standard labeling of ultrasound images.
  - 12.04 Describe/Explain protocol for a sonogram from the time the exam is ordered to the time your patient is ready to be scanned.
  - 12.05 Explain the basic concepts of ultrasound equipment available and demonstrate safety in their use and basic techniques of scanning.
  - 12.06 Explain and use the criteria for image evaluation and specifically of special sonographic parameters.
  - 12.07 Describe special problems encountered and methods to improve medical ethics in sonography.
  - 12.08 Describe the organizational structure common to most hospitals with special emphasis placed on the role of the ultrasound department.
  - 12.09 Describe the relationship of the sonographer to the patients and their special needs.
- 13.0 Demonstrate an awareness of the basic principles of ultrasound physics, emphasizing practical relationships of physics to proper diagnosis. – The student will be able to:
- 13.01 Explain what sound is and its characteristics.
  - 13.02 Compare the difference between pulsed and continuous wave sound.
  - 13.03 Explain amplitude and intensity of sound as it applies to the field of ultrasound.
  - 13.04 Describe the causes and effects of attenuation and acoustic impedance on ultrasound.
  - 13.05 Identify the causes and effects of incidence, scattering and refraction of ultrasound.
  - 13.06 Explain the Doppler effect and its use in medicine.
  - 13.07 Describe the factors of attenuation versus depth penetration of ultrasound in human tissue.
  - 13.08 Identify resolution and controlling factors of resolution as applied to the field of ultrasound.
- 14.0 Demonstrate an awareness of ultrasound physics by exploring the various aspects of the field through individual experimentation. – The student will be able to:
- 14.01 Discuss and demonstrate the basic principles governing sound and sound interaction in various types of tissue.
  - 14.02 Describe and demonstrate the conditions affecting sound transmission such as the attenuation factors.
  - 14.03 Relate mathematical formulas to the action of sound at interfaces of various qualities.

- 14.04 Describe resolution and its effect on the final image.
  - 14.05 Describe and demonstrate the factors that control and determine both axial , elevational and lateral resolution.
- 15.0 Apply knowledge of the anatomy and scanning techniques related to the upper abdominal organs and systems. – The student will be able to:
- 15.01 Draw and label the gross upper abdominal organs in both longitudinal and transverse dimensions.
  - 15.02 Identify the gross upper abdominal anatomy as demonstrated by sonography, and common anatomic drawings.
  - 15.03 Explain the physiology of the upper abdominal organs and the related lab examinations.
  - 15.04 Explain the normal preparations for the sonographic demonstration of the upper abdominal organs.
  - 15.05 Explain the protocol for (actual) scanning sonographically the upper abdominal organs.
  - 15.06 Explain the common pathology related to the upper abdomen and correlate with special scanning techniques.
  - 15.07 Demonstrate the normal anatomy of the upper abdomen with a real-time device.
  - 15.08 Explain the various types of equipment and their selection in performing an ultrasound exam.
  - 15.09 Explain and use the various techniques of instrumentation required to create a diagnostic sonogram.
  - 15.10 Explain and use the methods of patient preparation and care before and during a sonogram.
  - 15.11 Present a sonographic exam in completed form.
  - 15.12 Perform a complete ultrasound examination of the upper abdomen with little if any assistance (from patient preparation to final reading).
  - 15.13 Demonstrate skills to develop and maintain the special relationship of the sonographer to the patient and to other persons in medicine.
  - 15.14 Demonstrate laboratory safety techniques as related to sonographic imaging units in the patient examination situation.
  - 15.15 Use basic techniques for orientation and labeling of sonographic images.
  - 15.16 Describe the preparations and over-all procedures for a typical ultrasound examination of the upper abdomen.
  - 15.17 Identify gross abdominal structures as demonstrated by ultrasound such as the liver, gall bladder, aorta, inferior vena cava, stomach, pancreas, bowel and spleen.
- 16.0 Demonstrate an awareness of the basic principles of instrumentation common to the field of ultrasound. – The student will be able to:
- 16.01 Describe piezoelectric effects.
  - 16.02 Describe both static and real-time transducer construction.
  - 16.03 Discuss historical perspective of scanner development.
  - 16.04 Explain and describe signal processing how it effects image presentations.
  - 16.05 Discuss basic unit construction in the form of block diagrams static, real-time and Doppler.
  - 16.06 Describe the purpose and use of typical controls located on static, real-time and Doppler ultrasound scanners.

- 16.07 Identify methods of determining and assuring quality control both sonographically and photographically.
- 16.08 Demonstrate communication skills required on a daily basis in the typical sonography setting.
- 16.09 Discuss causes, detection and control of factors that may create biologic effects in human tissue with insonation at the diagnostic medical exposure level.
- 17.0 Apply knowledge gained in instrumentation lecture and work with actual ultrasound scanners similar to those found in local hospitals – The student will be able to:
  - 17.01 Develop and use patient information systems and impressions.
  - 17.02 Explain the various types of transducers available on the market, their construction and selection for sonographic imaging.
  - 17.03 Explain and use amplification in all its forms to produce a diagnostic quality sonogram.
  - 17.04 Explain and use power to produce a diagnostic quality sonogram.
  - 17.05 Explain and use the various forms of processing to produce a diagnostic quality sonogram.
  - 17.06 Explain and use the various types of scanning movements required to produce diagnostic quality sonograms.
  - 17.07 To explain and recognize typical artifacts as found in sonographic imaging and photography.
  - 17.08 Explain and use a test object.
  - 17.09 Quality assurance and equipment maintenance & testing
- 18.0 Demonstrate awareness of knowledge of anatomy, pathology and scanning techniques used in modern sonography for obstetrics. – The student will be able to:
  - 18.01 Describe the basic stages of embryology and sonographic relationships.
  - 18.02 Describe events occurring in the first trimester and their relationship to ultrasound.
  - 18.03 Discuss anatomy, physiology and pathology of the various stages of fetal development as related to ultrasound.
  - 18.04 Discuss anatomy, physiology and pathology of the placenta at all stages of development.
  - 18.05 Describe methods for determining gestational and fetal growth by ultrasound and physical examination methods.
  - 18.06 Identify specific diseases common to the gestational period.
  - 18.07 Describe normal anatomy of the female pelvis and its relationship to ultrasound.
  - 18.08 Compare normal and abnormal states of embryology in the human as demonstrated by ultrasound.
  - 18.09 Explain the normal anatomy of the pregnant uterus and dating techniques of the fetus and placenta.
  - 18.10 Compare the normal and pathologic appearance of the fetus.
  - 18.11 Demonstrate special techniques of ultrasound scanning and collateral processes during pregnancy.
- 19.0 Apply knowledge of anatomy, pathology, and scanning techniques used in modern sonography of the pelvis. – The student will be able to:
  - 19.01 Explain sonographic evaluation of the female pelvis in the pathologic state.

- 19.02 Discuss anatomy, physiology and pathology of the female reproductive organs.
  - 19.03 Describe the normal anatomy and scanning techniques used to demonstrate the female and male pelvis.
  - 19.04 Describe pathology common to the human pelvis and special techniques for demonstrating sonographically.
  - 19.05 Explain the process used to develop pelvic mass charts and their use.
- 20.0 Demonstrate awareness of knowledge of anatomy, pathology, and scanning techniques used in modern sonography of the genitourinary system. – The student will be able to:
- 20.01 Identify anatomy of renals.
  - 20.02 Describe physiology of renals.
  - 20.03 Discuss pathology of renals.
  - 20.04 Explain scanning techniques of renals.
  - 20.05 Discuss anatomy, physiology, pathology and scanning techniques of adrenals.
  - 20.06 Discuss gross anatomy, pathology and scanning techniques of the ureters, urinary bladder, prostate, testicles.
  - 20.07 Compare the normal and pathologic anatomy of the human renal system to include adrenals.
  - 20.08 Describe the scanning techniques common to sonographic imaging of the renals and the adrenals.
- 21.0 Develop a continuous awareness of the disease processes. – The student will be able to:
- 21.01 Discuss basic concepts of the causes of disease.
  - 21.02 Discuss common urogenital pathology.
  - 21.03 Discuss gastrointestinal diseases.
  - 21.04 Discuss common pathology found in obstetrics and gynecology.
  - 21.05 Discuss common pathology found in the cardiovascular system.
  - 21.06 Discuss common pathology found in hepatobiliary system to include: liver, gallbladder, pancreas and spleen.
- 22.0 Apply accumulated knowledge to the process of creating diagnostic sonograms. – The student will be able to:
- 22.01 Complete in all aspects a diagnostic sonogram with emphasis on:
    - 22.01.01 patient identification
    - 22.01.02 patient interaction
    - 22.01.03 general attitude
    - 22.01.04 creation of sonogram
    - 22.01.05 safety
    - 22.01.06 recognition of anatomy, both normal and pathologic.
  - 22.02 Complete routine documentation associated with a typical ultrasound department.
- 23.0 Apply skills needed to complete diagnostic images of high quality from a variety of scanning units. – The student will be able to:

- 23.01 Perform complete and diagnostic examinations of the abdomen, pelvis and obstetrical patient using real-time and/or static devices.
- 23.02 Present completed examinations in detail with justification of all techniques, methods and procedures used to obtain data.
- 23.03 Identify gross pathology of the abdomen, pelvis and obstetrical patient, both on sonograms and related imaging modalities.
- 23.04 Perform all preliminary procedures leading to actual examination by sonography and all procedures necessary post examination.
- 23.05 Demonstrate skills needed to relate with tact and diplomacy with patients, physicians, nurses, other imaging personnel and the general hospital population.
- 23.06 Demonstrate those characteristics that reflect the high degree of professionalism associated with the field of ultrasound.

**2011-2012**

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Diagnostic Medical Sonography Specialist  
**Career Cluster:** Health Science

<b>CCC</b>	
CIP Number	0317021201
Program Type	College Credit Certificate (CCC)
Program Length	42 credit hours
CTSO	HOSA
SOC Codes (all applicable)	31-9099, 29-2032
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>

### **Purpose**

The program is designed to prepare students for employment as diagnostic medical sonographers, SOC Code 29-2032, or to provide supplemental training for persons previously or currently employed in this occupation.

This certificate program is part of the Diagnostic Medical Sonography Technology AS/AAS degree program (1317.021200).

A College Credit Certificate consists of a program of instruction of less than sixty (60) credits of college-level courses, which is part of an AS or AAS degree program and prepares students for entry into employment (Rule 6A-14.030, F.A.C.).

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

The content includes but is not limited to anatomy, physiology and pathology of the abdominal, pelvic, and urogenital structures; physics; instrumentation; equipment standards; biological effect of ultrasound; patient care; clinical medicine; applications and limitations of ultra- sound; related diagnostic procedures; image evaluation; administration; first aid and cardiopulmonary resuscitation; employability skills; leadership and human relations skills; health and safety.

### **Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these

occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

### Special Notes

This program meets the Department of Health HIV/AIDS Domestic Violence and Prevention of Medical Errors education requirements. Upon completion of this program, the instructor will provide a certificate to the student verifying that these requirements have been met.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635 F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

The program should meet the requirements of:

Commission on Accreditation of Allied Health Education Programs  
(CAAHEP)  
361 Park St.  
Clearwater, FL 33756  
727-210-2350  
[www.caahep.org](http://www.caahep.org)

Written clinical affiliation agreements must be maintained with each health care facility. Health care facilities must be accredited by The Joint Commission.

The designation of PSV-C requires that the student have an associate degree in a related field of study (i.e. radiologic technology, nursing-RN, etc.). Upon the successful completion of the program the student will receive a Diagnostic Medical Sonography Specialist Certificate.

Students completing this program may apply to take one or both of the national registry examinations to obtain certification, for further information contact:

American Registry of Diagnostic  
Medical Sonographers (ARDMS)  
51 Monroe St. Plaza East 1  
Rockville, Maryland 20850-2400  
301-738-8401  
[www.ardms.org](http://www.ardms.org)

Or

American Registry of Radiologic Technologists (ARRT)  
1255 Northland Drive  
St. Paul, MN 55120-1155  
(612/687-0048)  
[www.arrt.org](http://www.arrt.org)

Outcomes 01-11 are referred to as the Health Careers Core and do not have to be completed if the student has previously completed the Core in another health science program. The Core should be taken first or concurrently with the first course in the program. Following the

successful completion of the core, the student is eligible to take the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio

### **Career and Technical Student Organization (CTSO)**

Health Occupations Students of America, Inc. (HOSA) is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

### **Standards**

After successfully completing this course the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.
- 12.0 Demonstrate an awareness of the uses of ultrasound imaging, types of presentations, orientation, and relationships to other imaging modalities.
- 13.0 Demonstrate an awareness of the basic principles of ultrasound physics, emphasizing practical relationships of physics to proper diagnosis.
- 14.0 Demonstrate an awareness of ultrasound physics by exploring the various aspects of the field through individual experimentation.
- 15.0 Apply knowledge of the anatomy and scanning techniques related to the upper abdominal organs and systems.
- 16.0 Demonstrate an awareness of the basic principles of instrumentation common to the field of ultrasound.

- 17.0 Apply knowledge gained in instrumentation lecture and work with actual ultrasound scanners similar to those found in local hospitals.
- 18.0 Demonstrate awareness of knowledge of anatomy, pathology, and scanning techniques used in modern sonography for obstetrics and gynecology.
- 19.0 Apply knowledge of anatomy, pathology, and scanning techniques used in modern sonography for obstetrics and gynecology.
- 20.0 Demonstrate awareness of knowledge of anatomy, pathology, and scanning techniques used in modern sonography of the genitourinary system.
- 21.0 Develop a continuous awareness of the disease process.
- 22.0 Apply accumulated knowledge to the process of creating diagnostic sonograms.
- 23.0 Apply skills needed to complete diagnostic images of high quality from a variety of scanning units.

2011-2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Diagnostic Medical Sonography Specialist  
**CIP Number:** 0317021201  
**Program Length:** 42 credit hours  
**SOC Code(s):** 31-9099, 29-2032

This certificate program is part of the Diagnostic Medical Sonography Technology AS/AAS degree program (1317.021200). At the completion of this program, the student will be able to:

**Health Careers Core: The Health Careers Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Careers Core or any other health occupations program do not have to repeat the intended outcomes 01-11.**

01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:

- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
- 01.02 Identify common methods of payment for healthcare services.
- 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
- 01.04 Describe the composition and functions of a healthcare team.
- 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
- 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
- 01.07 Identify characteristics of effective teams.
- 01.08 Recognize methods for building positive team relationships.
- 01.09 Analyze attributes and attitudes of an effective leader.
- 01.10 Recognize factors and situations that may lead to conflict.
- 01.11 Demonstrate effective techniques for managing team conflict.
- 01.12 Describe factors that influence the current delivery system of healthcare.
- 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.

02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:

- 02.01 Develop basic speaking and active listening skills.
- 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
- 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
- 02.04 Respond to verbal and non-verbal cues.
- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.
- 02.06 Use appropriate medical terminology and abbreviations.

- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
  - 02.08 Recognize the importance of patient/client educations regarding healthcare.
  - 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
  - 02.10 Analyze elements of communication using a sender-receiver model.
  - 02.11 Distinguish between and report subjective and objective information.
  - 02.12 Report relevant information in order of occurrence.
- 03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:
- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
  - 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
  - 03.03 Demonstrate procedures for accurate documentation and record keeping.
  - 03.04 Interpret healthcare facility policy and procedures.
  - 03.05 Explain the “Patient’s Bill of Rights”.
  - 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
  - 03.07 Describe advance directives.
  - 03.08 Describe informed consent.
  - 03.09 Explain the laws governing harassment, labor and employment.
  - 03.10 Differentiate between legal and ethical issues in healthcare.
  - 03.11 Describe a code of ethics consistent with the healthcare occupation.
  - 03.12 Identify and compare personal, professional, and organizational ethics.
  - 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
  - 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
  - 03.15 Recognize and report abuse including domestic violence and neglect.
  - 03.16 Distinguish among the five schedules of controlled substances.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:
- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
  - 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
  - 04.03 Identify psychological reactions to illness including defense mechanisms.
  - 04.04 Identify complementary and alternative health practices.
  - 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
  - 04.06 Explain the basic concepts of positive self image, wellness and stress.
  - 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
  - 04.08 Explain the nutrition pyramid.
  - 04.09 Recognize the steps in the grief process.
- 05.0 Recognize and practice safety and security procedures. – The student will be able to:

- 05.01 Recognize safe and unsafe working conditions and report safety hazards.
  - 05.02 Demonstrate the safe use of medical equipment.
  - 05.03 Explain and apply the theory of root- cause analysis
  - 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
  - 05.05 Identify and practice security procedures for medical supplies and equipment.
  - 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions).
  - 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
  - 05.08 Demonstrate proper body mechanics and ergonomics.
  - 05.09 Demonstrate the procedure for properly identifying patients.
  - 05.10 Demonstrate procedures for the safe transport and transfer of patients.
  - 05.11 Describe fire, safety, disaster and evacuations procedures.
  - 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )
- 06.0 Recognize and respond to emergency situations. – The student will be able to:
- 06.01 Monitor and record vital signs.
  - 06.02 Describe legal parameters relating to the administration of emergency care.
  - 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
  - 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.
- 07.0 Recognize and practice infection control procedures. – The student will be able to:
- 07.01 Define principles of infection control including standard and transmission based precautions.
  - 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
  - 07.03 Demonstrate knowledge of surgical asepsis.
  - 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.
- 08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:
- 08.01 Describe technology applications in healthcare.
  - 08.02 Define terms and demonstrate basic computer skills.
  - 08.03 Recognize technology applications in healthcare.
  - 08.04 Interpret information from electronic medical documents.
  - 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.
- 09.0 Demonstrate employability skills. – The student will be able to:
- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.

- 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
  - 09.03 Identify documents that may be required when applying for a job.
  - 09.04 Write an appropriate resume.
  - 09.05 Conduct a job search.
  - 09.06 Complete a job application form correctly.
  - 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
  - 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
  - 09.09 Identify acceptable work habits.
  - 09.10 Recognize appropriate affective/professional behavior.
  - 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:
- 10.01 Recognize emerging diseases and disorders
  - 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
  - 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
  - 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
  - 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
  - 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.
- 11.0 Apply basic math and science skills. – The student will be able to:
- 11.01 Draw, read, and report on graphs, charts and tables.
  - 11.02 Measure time, temperature, distance, capacity, and mass/weight.
  - 11.03 Make, use and convert using both traditional and metric units.
  - 11.04 Make estimations and approximations and judge the reasonableness of the result.
  - 11.05 Convert from regular to 24 hour time.
  - 11.06 Demonstrate ability to evaluate and draw conclusions.
  - 11.07 Organize and communicate the results obtained by observation and experimentation.
  - 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
  - 11.09 Calculate ratios

**Diagnostic Medical Sonography Specialist: The intended outcomes complete the occupational completion point of Diagnostic Medical Sonography Specialist.**

- 12.0 Demonstrate an awareness of the uses of ultrasound imaging, types of presentations, orientation, and relationships to other imaging modalities. – The student will be able to:
- 12.01 Describe the relationship of ultrasound to other imaging fields.
  - 12.02 Explain the role of the sonographer.
  - 12.03 Describe and explain the proper uses of orientation and standard labeling of ultrasound images.
  - 12.04 Describe/Explain protocol for a sonogram from the time the exam is ordered to the time your patient is ready to be scanned.
  - 12.05 Explain the basic concepts of ultrasound equipment available and demonstrate safety in their use and basic techniques of scanning.
  - 12.06 Explain and use the criteria for image evaluation and specifically of special sonographic parameters.
  - 12.07 Describe special problems encountered and methods to improve medical ethics in sonography.
  - 12.08 Describe the organizational structure common to most hospitals with special emphasis placed on the role of the ultrasound department.
  - 12.09 Describe the relationship of the sonographer to the patients and their special needs.
- 13.0 Demonstrate an awareness of the basic principles of ultrasound physics, emphasizing practical relationships of physics to proper diagnosis. – The student will be able to:
- 13.01 Explain what sound is and its characteristics.
  - 13.02 Compare the difference between pulsed and continuous wave sound.
  - 13.03 Explain amplitude and intensity of sound as it applies to the field of ultrasound.
  - 13.04 Describe the causes and effects of attenuation and acoustic impedance on ultrasound.
  - 13.05 Identify the causes and effects of incidence, scattering and refraction of ultrasound.
  - 13.06 Explain the Doppler Effect and its use in medicine.
  - 13.07 Describe the factors of attenuation versus depth penetration of ultrasound in human tissue.
  - 13.08 Identify resolution and controlling factors of resolution as applied to the field of ultrasound.
- 14.0 Demonstrate an awareness of ultrasound physics by exploring the various aspects of the field through individual experimentation. – The student will be able to:
- 14.01 Discuss and demonstrate the basic principles governing sound and sound interaction in various types of tissue.
  - 14.02 Describe and demonstrate the conditions affecting sound transmission such as the attenuation factors.
  - 14.03 Relate mathematical formulas to the action of sound at interfaces of various qualities.
  - 14.04 Describe resolution and its effect on the final image.

- 14.05 Describe and demonstrate the factors that control and determine both axial, elevational and lateral resolution.
- 15.0 Apply knowledge of the anatomy and scanning techniques related to the upper abdominal organs and systems. – The student will be able to:
- 15.01 Draw and label the gross upper abdominal organs in both longitudinal and transverse dimensions.
  - 15.02 Identify the gross upper abdominal anatomy as demonstrated by sonography, and common anatomic drawings.
  - 15.03 Explain the physiology of the upper abdominal organs and the related lab examinations.
  - 15.04 Explain the normal preparations for the sonographic demonstration of the upper abdominal organs.
  - 15.05 Explain the protocol for (actual) scanning sonographically the upper abdominal organs.
  - 15.06 Explain the common pathology related to the upper abdomen and correlate with special scanning techniques.
  - 15.07 Demonstrate the normal anatomy of the upper abdomen with a real-time device.
  - 15.08 Explain the various types of equipment and their selection in performing an ultrasound exam.
  - 15.09 Explain and use the various techniques of instrumentation required to create a diagnostic sonogram.
  - 15.10 Explain and use the methods of patient preparation and care before and during a sonogram.
  - 15.11 Present a sonographic exam in completed form.
  - 15.12 Perform a complete ultrasound examination of the upper abdomen with little if any assistance (from patient preparation to final reading).
  - 15.13 Demonstrate skills to develop and maintain the special relationship of the sonographer to the patient and to other persons in medicine.
  - 15.14 Demonstrate laboratory safety techniques as related to sonographic imaging units in the patient examination situation.
  - 15.15 Use basic techniques for orientation and labeling of sonographic images.
  - 15.16 Describe the preparations and over-all procedures for a typical ultrasound examination of the upper abdomen.
  - 15.17 Identify gross abdominal structures as demonstrated by ultrasound such as the liver, gall bladder, aorta, inferior vena cava, stomach, pancreas, bowel and spleen.
- 16.0 Demonstrate an awareness of the basic principles of instrumentation common to the field of ultrasound. – The student will be able to:
- 16.01 Describe piezoelectric effects.
  - 16.02 Describe both static and real-time transducer construction.
  - 16.03 Discuss historical perspective of scanner development.
  - 16.04 Explain and describe signal processing how it effects image presentations.
  - 16.05 Discuss basic unit construction in the form of block diagrams static, real-time and Doppler.
  - 16.06 Describe the purpose and use of typical controls located on static, real-time and Doppler ultrasound scanners.

- 16.07 Identify methods of determining and assuring quality control both sonographically and photographically.
  - 16.08 Demonstrate communication skills required on a daily basis in the typical sonography setting.
  - 16.09 Discuss causes, detection and control of factors that may create biologic effects in human tissue with insonation at the diagnostic medical exposure level.
- 17.0 Apply knowledge gained in instrumentation lecture and work with actual ultrasound scanners similar to those found in local hospitals. – The student will be able to:
- 17.01 Develop and use patient information systems and impressions.
  - 17.02 Explain the various types of transducers available on the market, their construction and selection for sonographic imaging.
  - 17.03 Explain and use amplification in all its forms to produce a diagnostic quality sonogram.
  - 17.04 Explain and use power to produce a diagnostic quality sonogram.
  - 17.05 Explain and use the various forms of processing to produce a diagnostic quality sonogram.
  - 17.06 Explain and use the various types of scanning movements required to produce diagnostic quality sonograms.
  - 17.07 To explain and recognize typical artifacts as found in sonographic imaging and photography.
  - 17.08 Explain and use a test object.
  - 17.09 Quality assurance and equipment maintenance & testing
- 18.0 Demonstrate awareness of knowledge of anatomy, pathology and scanning techniques used in modern sonography for obstetrics. – The student will be able to:
- 18.01 Describe the basic stages of embryology and sonographic relationships.
  - 18.02 Describe events occurring in the first trimester and their relationship to ultrasound.
  - 18.03 Discuss anatomy, physiology and pathology of the various stages of fetal development as related to ultrasound.
  - 18.04 Discuss anatomy, physiology and pathology of the placenta at all stages of development.
  - 18.05 Describe methods for determining gestational and fetal growth by ultrasound and physical examination methods.
  - 18.06 Identify specific diseases common to the gestational period.
  - 18.07 Describe normal anatomy of the female pelvis and its relationship to ultrasound.
  - 18.08 Compare normal and abnormal states of embryology in the human as demonstrated by ultrasound.
  - 18.09 Explain the normal anatomy of the pregnant uterus and dating techniques of the fetus and placenta.
  - 18.10 Compare the normal and pathologic appearance of the fetus.
  - 18.11 Demonstrate special techniques of ultrasound scanning and collateral processes during pregnancy.
- 19.0 Apply knowledge of anatomy, pathology, and scanning techniques used in modern sonography of the pelvis. – The student will be able to:

- 19.01 Explain sonographic evaluation of the female pelvis in the pathologic state.
  - 19.02 Discuss anatomy, physiology and pathology of the female reproductive organs.
  - 19.03 Describe the normal anatomy and scanning techniques used to demonstrate the female and male pelvis.
  - 19.04 Describe pathology common to the human pelvis and special techniques for demonstrating sonographically.
  - 19.05 Explain the process used to develop pelvic mass charts and their use.
- 20.0 Demonstrate awareness of knowledge of anatomy, pathology, and scanning techniques used in modern sonography of the genitourinary system. – The student will be able to:
- 20.01 Identify anatomy of renals.
  - 20.02 Describe physiology of renals.
  - 20.03 Discuss pathology of renals.
  - 20.04 Explain scanning techniques of renals.
  - 20.05 Discuss anatomy, physiology, pathology and scanning techniques of adrenals.
  - 20.06 Discuss gross anatomy, pathology and scanning techniques of the ureters, urinary bladder, prostate, testicles.
  - 20.07 Compare the normal and pathologic anatomy of the human renal system to include adrenals.
  - 20.08 Describe the scanning techniques common to sonographic imaging of the renals and the adrenals.
- 21.0 Develop a continuous awareness of the disease processes. – The student will be able to:
- 21.01 Discuss basic concepts of the causes of disease.
  - 21.02 Discuss common urogenital pathology.
  - 21.03 Discuss gastrointestinal diseases.
  - 21.04 Discuss common pathology found in obstetrics and gynecology.
  - 21.05 Discuss common pathology found in the cardiovascular system.
  - 21.06 Discuss common pathology found in hepatobiliary system to include: liver, gallbladder, pancreas and spleen.
- 22.0 Apply accumulated knowledge to the process of creating diagnostic sonograms. – The student will be able to:
- 22.01 Complete in all aspects a diagnostic sonogram with emphasis on:
    - a. patient identification
    - b. patient interaction
    - c. general attitude
    - d. creation of sonogram
    - e. safety
    - f. recognition of anatomy, both normal and pathologic.
  - 22.02 Complete routine documentation associated with a typical ultrasound department.
- 23.0 Apply skills needed to complete diagnostic images of high quality from a variety of scanning units. – The student will be able to:

- 23.01 Perform complete and diagnostic examinations of the abdomen, pelvis and obstetrical patient using real-time and/or static devices.
- 23.02 Present completed examinations in detail with justification of all techniques, methods and procedures used to obtain data.
- 23.03 Identify gross pathology of the abdomen, pelvis and obstetrical patient, both on sonograms and related imaging modalities.
- 23.04 Perform all preliminary procedures leading to actual examination by sonography and all procedures necessary post examination.
- 23.05 Demonstrate skills needed to relate with tact and diplomacy with patients, physicians, nurses, other imaging personnel and the general hospital population.
- 23.06 Demonstrate those characteristics that reflect the high degree of professionalism associated with the field of ultrasound.

2011-2012

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Medical Clinical Laboratory Technician-ATD  
**Program Type:** ATD (Applied Technology Diploma)  
**Career Cluster:** Health Science

	<b>CC</b>	<b>PSAV</b>
Program Number	N/A	H170308
CIP Number	0317030502	0317030503
Grade Level	Applied Technology Diploma ( <u>ATD</u> )	Applied Technology Diploma ( <u>ATD</u> )
Standard Length	40 credit hours	1515 hours
CTSO	HOSA	HOSA
SOC Codes (all applicable)	31-9099, 29-2012	31-9099, 29-2012
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>	
Basic Skills Level	Mathematics: 10 Language: 11 Reading: 11	

### **Purpose**

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

The purpose of this program is to prepare students for employment as medical lab technicians, medical/clinical laboratory technicians SOC 29-2012.

The content includes but is not limited to didactic and laboratory performance of routine procedures in hematology, immunology, urinalysis, immunohematology, microbiology and clinical chemistry including the use of common laboratory instruments. A clinical component is a necessary element of this program.

### **Program Structure**

This program is an Applied Technology Diploma program that is part of a technical degree program, is less than 60 credit hours, and leads to employment in a specific occupation. An applied technology diploma program may consist of either technical credit or college credit. A public school district may offer an applied technology diploma program only as technical credit, with college credit awarded to a student upon articulation to a community college.

**PSAV Program**

When offered at the district level, this program is a planned sequence of instruction consisting of four occupational completion points and the courses as shown below.

OCP	Course Number	Course Title	Length	SOC Code
A	HSC0003	Basic Healthcare Worker	90 hours	31-9099
B	MEA0520	Phlebotomist	75 hours	31-9099
C	MEA0560	Medical Lab Assistant	300 hours	31-9099
D	MEA0570	Medical/Clinical Lab Technician 1	350 hours	29-2012
	MEA0571	Medical/Clinical Lab Technician 2	350 hours	29-2012
	MEA0572	Medical/Clinical Lab Technician 3	350 hours	29-2012

**Community College**

When offered at the community college level, this ATD program is part of the Medical Laboratory Technology AS/AAS program (1317.030900) and has a program length of 40 credits.

**Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

**Special Notes**

This program meets the Department of Health HIV/AIDS Domestic Violence and Prevention of Medical Errors education requirements. Upon completion of this program, the instructor will provide a certificate to the student verifying that these requirements have been met.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635 F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

Either a community college or school district may offer the Applied Technology Diploma program. When offered at the community college, college credit shall be awarded for completion of this program. When offered at the school district, vocational credit will be awarded. Vocational credit will be converted to college credit upon transfer to the AS degree at the community college.

Faculty teaching this program must have a minimum of a bachelor's degree in the specialty area or an associate degree and demonstrated competencies in the specialty area.

The programs should be accredited by:

The Accrediting Bureau of Health Education Schools (ABHES)

7777 Leesburg Pike  
Suite 314  
North Falls Church, VA 22403  
703-917-9503 Fax 703-917-4109

**OR**

any other agency as specified by the Division of Medical Quality Administration, Board of Clinical Laboratory Personnel Chapter 483 F.S., Rule 590 FAC, "Florida Clinical Laboratory Personnel Law". The graduate of a board approved program should be prepared to take the appropriate licensing examination to practice in Florida and an appropriate national certifying examination. For further information contact:

Board of Clinical Laboratory Personnel  
4052 Bald Cypress Way, Bin CO7  
Tallahassee, FL 32399-3257  
(850) 245-4444 x3625

National Certification is voluntary and may be obtained from the American Medical Technologists, 710 Higgins Rd., Park Ridge, Il., 60068, 847/823-5169 or 1-800-275-1268 or

National Healthcare Association  
194 Route 46 East  
Fairfield, NJ 07004  
973/244-0023  
1-800-499-9092

Outcomes 01-11 are referred to as the Health Careers Core and do not have to be completed if the student has previously completed the Core in another health science program. The Core should be taken first or concurrently with the first course in the program. Following the successful completion of the core, the student is eligible to take the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio

### **Career and Technical Student Organization (CTSO)**

Health Occupations Students of America, Inc. (HOSA) is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

### **Basic Skills**

In PSAV programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C. the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Mathematics 10, Language 11, and Reading 11. These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination. Students may be exempt from meeting the Basic Skills requirements by earning an eligible industry certification. See the Basic Skills Exemption List document for a list of eligible industry certifications (<http://www.fldoe.org/workforce/dwdframe/rtf/basic-skills.rtf>).

Adult students with disabilities, as defined in Section 1004.02(7), Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01(3)(a), F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91(3), F.S.

Students who possess a college degree at the Associate of Applied Science level or higher; who have completed or are exempt from the college entry-level examination pursuant to Section 1008.29, F.S.; or who have passed a state, national, or industry licensure exam are exempt from meeting the Basic Skills requirement (Rule 6A-10.040, F.A.C.)

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Some secondary students with disabilities (ESE) may need additional time (i.e., longer than the regular school year), to master the student performance standards associated with a regular occupational completion point (OCP) or a modified occupational completion point (MOCP). If needed, a student may enroll in the same career and technical course more than once. Documentation should be included in the IEP that clearly indicates that it is anticipated that the student may need an additional year to complete an OCP/MOCP. The student should work on different competencies and new applications of competencies each year toward completion of the OCP(s)/MOCP. After achieving the competencies identified for the year, the student earns credit for the course. It is important to ensure that credits earned by students are reported accurately. The district's information system must be designed to accept multiple credits for the same course number (for eligible students with disabilities). For further information, see Rule 6A-6.0312, F.A.C., Course Modifications for Exceptional Students, and the latest pertinent Technical Assistance Paper (<http://www.fldoe.org/ese/tap-home.asp>).

### **Articulation**

The information related to the guaranteed transfer of credit between an applied technology diploma program and AS/AAS degree must be documented and maintained by the Articulation Coordinating Committee (ACC). The transfer of the applied technology diploma to an AS/AAS degree is guaranteed for a period of three (3) years following the date of the award of the applied technology diploma.

### **Program Length**

In accordance with Rule 6A-10.024, F.A.C. an Applied Technology Diploma program consists of a course of study that is part of an AS/AAS degree program, is less than 60 credit hours, is approximately 50% of the technical component (non-general education), and leads to employment in a specific occupation. An applied technology diploma program may consist of either technical credit or college credit.

Students must have a high school diploma, a GED, or a certificate of completion to be admitted to an applied technology diploma program. Within six weeks of entry, students in ATD programs of 450 or more hours must be tested pursuant to Rule 6A-10.040, F.A.C. and if below minimum standards for completion from the program, must receive remedial instruction. The minimum standards must be at least the equivalent of a score of ten (10) on all sections of basic skills test approved in Rule 6A-10.040, F.A.C. Students must successfully complete all remedial instruction before completing the Applied Technology Diploma.

Community Colleges may offer either college or career credit toward the applied technology diploma. A Career Center in a public school district may offer an applied technology diploma program only as technical credit, with college credit awarded to a student upon articulation to a community college (Section 1004.02, F.S.)

When offered at a community college the standard length of this program is 40 credits. When offered at a technical center the standard length of this program is 1515 clock hours.

In accordance with Rule 6A-10.024, F.A.C. all faculty providing instruction must have at least a baccalaureate degree or an associate degree with demonstrated competencies in the specific instructional program as defined by the Southern Association of Colleges and Schools.

### **Standards**

After successfully completing this program the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.

- 12.0 Demonstrate accepted professional, communication and interpersonal skills.
- 13.0 Discuss phlebotomy in relation to the health care setting.
- 14.0 Identify the anatomic structure and function of body systems in relation to services performed by phlebotomist.
- 15.0 Recognize and identify collection reagents supplies, equipment and interfering chemical substances.
- 16.0 Demonstrate skills and knowledge necessary to perform phlebotomy.
- 17.0 Practice infection control following universal (standard) precautions.
- 18.0 Practice accepted procedures of transporting, accessioning and processing specimens.
- 19.0 Practice quality assurance and safety.
- 20.0 Demonstrate basic knowledge of microbiology, perform clinical laboratory "WAIVED TESTS".
- 21.0 Demonstrate basic knowledge of urinalysis, perform clinical laboratory "WAIVED TESTS".
- 22.0 Demonstrate basic knowledge of clinical chemistry, perform clinical laboratory "WAIVED TESTS".
- 23.0 Demonstrate basic knowledge of hematology, perform clinical laboratory "WAIVED TESTS".
- 24.0 Discuss anatomy and physiology of the human body as it relates to the field of Medical Laboratory Technology.
- 25.0 Discuss the general responsibilities and functions encountered by a Medical Technician.
- 26.0 Apply quality assurance principles and safety protocols.
- 27.0 Demonstrate knowledge of the operation of computer systems.
- 28.0 Demonstrate knowledge of urinalysis principles and procedures.
- 29.0 Demonstrate knowledge of hematological principles and procedures.
- 30.0 Demonstrate knowledge of hemostasis and related diagnostic principles and procedures.
- 31.0 Demonstrate knowledge of immunology principles and procedures
- 32.0 Demonstrate knowledge of clinical chemistry principles and procedures.
- 33.0 Demonstrate knowledge of immunohematological principles and procedures.
- 34.0 Demonstrate knowledge of microbiological principles and procedures.

2011-2012

**Florida Department of Education  
Student Performance Standards**

**Program Title: Medical Clinical Laboratory Technician**  
**PSAV Number: H170308**

When this program is offered at the PSAV level, the following organization of courses, standards, and benchmarks apply.

**PSAV Course Number: HSC0003**  
**Occupational Completion Point: A**  
**Basic Healthcare Worker – 90 Hours – SOC Code 31-9099**

**Health Careers Core: The Health Careers Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Careers Core or any other health occupations program do not have to repeat intended outcomes 01-11.**

01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:

- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
- 01.02 Identify common methods of payment for healthcare services.
- 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
- 01.04 Describe the composition and functions of a healthcare team.
- 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
- 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
- 01.07 Identify characteristics of effective teams.
- 01.08 Recognize methods for building positive team relationships.
- 01.09 Analyze attributes and attitudes of an effective leader.
- 01.10 Recognize factors and situations that may lead to conflict.
- 01.11 Demonstrate effective techniques for managing team conflict.
- 01.12 Describe factors that influence the current delivery system of healthcare.
- 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.

02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:

- 02.01 Develop basic speaking and active listening skills.
- 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
- 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
- 02.04 Respond to verbal and non-verbal cues.

- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.
- 02.06 Use appropriate medical terminology and abbreviations.
- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
- 02.08 Recognize the importance of patient/client educations regarding healthcare.
- 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
- 02.10 Analyze elements of communication using a sender-receiver model.
- 02.11 Distinguish between and report subjective and objective information.
- 02.12 Report relevant information in order of occurrence.

03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:

- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
- 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
- 03.03 Demonstrate procedures for accurate documentation and record keeping.
- 03.04 Interpret healthcare facility policy and procedures.
- 03.05 Explain the “Patient’s Bill of Rights”.
- 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
- 03.07 Describe advance directives.
- 03.08 Describe informed consent.
- 03.09 Explain the laws governing harassment, labor and employment.
- 03.10 Differentiate between legal and ethical issues in healthcare.
- 03.11 Describe a code of ethics consistent with the healthcare occupation.
- 03.12 Identify and compare personal, professional, and organizational ethics.
- 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
- 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
- 03.15 Recognize and report abuse including domestic violence and neglect.
- 03.16 Distinguish among the five schedules of controlled substances.

04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:

- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
- 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
- 04.03 Identify psychological reactions to illness including defense mechanisms.
- 04.04 Identify complementary and alternative health practices.
- 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
- 04.06 Explain the basic concepts of positive self image, wellness and stress.
- 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
- 04.08 Explain the nutrition pyramid.

- 04.09 Recognize the steps in the grief process.
- 05.0 Recognize and practice safety and security procedures. – The student will be able to:
  - 05.01 Recognize safe and unsafe working conditions and report safety hazards.
  - 05.02 Demonstrate the safe use of medical equipment.
  - 05.03 Explain and apply the theory of root- cause analysis
  - 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
  - 05.05 Identify and practice security procedures for medical supplies and equipment.
  - 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions.
  - 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
  - 05.08 Demonstrate proper body mechanics and ergonomics.
  - 05.09 Demonstrate the procedure for properly identifying patients.
  - 05.10 Demonstrate procedures for the safe transport and transfer of patients.
  - 05.11 Describe fire, safety, disaster and evacuations procedures.
  - 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )
- 06.0 Recognize and respond to emergency situations. – The student will be able to:
  - 06.01 Monitor and record vital signs.
  - 06.02 Describe legal parameters relating to the administration of emergency care.
  - 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
  - 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.
- 07.0 Recognize and practice infection control procedures. – The student will be able to:
  - 07.01 Define principles of infection control including standard and transmission based precautions.
  - 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
  - 07.03 Demonstrate knowledge of surgical asepsis.
  - 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.
- 08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:
  - 08.01 Describe technology applications in healthcare.
  - 08.02 Define terms and demonstrate basic computer skills.
  - 08.03 Recognize technology applications in healthcare.
  - 08.04 Interpret information from electronic medical documents.
  - 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.

09.0 Demonstrate employability skills. – The student will be able to:

- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.
- 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
- 09.03 Identify documents that may be required when applying for a job.
- 09.04 Write an appropriate resume.
- 09.05 Conduct a job search.
- 09.06 Complete a job application form correctly.
- 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
- 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
- 09.09 Identify acceptable work habits.
- 09.10 Recognize appropriate affective/professional behavior.
- 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).

10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:

- 10.01 Recognize emerging diseases and disorders
- 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
- 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
- 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
- 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
- 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.

11.0 Apply basic math and science skills. – The student will be able to:

- 11.01 Draw, read, and report on graphs, charts and tables.
- 11.02 Measure time, temperature, distance, capacity, and mass/weight.
- 11.03 Make, use and convert using both traditional and metric units.
- 11.04 Make estimations and approximations and judge the reasonableness of the result.
- 11.05 Convert from regular to 24 hour time.
- 11.06 Demonstrate ability to evaluate and draw conclusions.
- 11.07 Organize and communicate the results obtained by observation and experimentation.
- 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
- 11.09 Calculate ratios

**PSAV Course Number: MEA0520**  
**Occupational Completion Point: B**  
**Phlebotomist – 75 Hours – SOC Code 31-9099**

- 12.0 Demonstrate accepted professional, communication, and interpersonal skills. – The student will be able to:
- 12.01 Follow approved procedure for labeling of specimens.
  - 12.02 Demonstrate the appropriate professional behavior of a phlebotomist.
  - 12.03 Explain to the patient the procedure to be used in specimen collection.
  - 12.04 Explain in detail the importance of identifying patients correctly when drawing blood.
- 13.0 Discuss phlebotomy in relation to the health care setting. – The student will be able to:
- 13.01 List, classify and discuss various departments and services within the health care setting with which the phlebotomist must interact to obtain laboratory specimens from patients.
  - 13.02 Identify the major departments/sections within the clinical laboratory, the major types of procedures run in each department/section, and their specimen requirements.
  - 13.03 Describe roles of the major classifications of clinical laboratory personnel (i.e., pathologist, chief/administrative technologist, CLS, MT, phlebotomist, etc.).
- 14.0 Identify the anatomic structure and function of body systems in relation to services performed by phlebotomist. – The student will be able to:
- 14.01 Describe and define major body systems with emphasis on the circulatory system.
  - 14.02 List and describe the main superficial veins used in performing venipuncture.
  - 14.03 Identify appropriate sites for capillary/venipuncture and name/find the most desirable one(s).
  - 14.04 Describe the function of the following blood components: erythrocytes, thrombocytes, leukocytes, plasma, and serum.
- 15.0 Recognize and identify collection reagents supplies, equipment and interfering chemical substances. – The student will be able to:
- 15.01 Identify and discuss proper use of appropriate types of equipment needed to collect various clinical laboratory blood specimens by venipuncture.
  - 15.02 Explain the special precautions and types of equipment needed to collect blood from a neonate.
  - 15.03 Identify and discuss proper use of supplies used in collecting microspecimens.
  - 15.04 Identify and discuss the proper use of the various types of anticoagulants, preservatives and gels used in blood collection and the vacuum tube color-codes for these additives.

- 15.05 Describe the types of patients' specimens that are analyzed in the clinical laboratory and the phlebotomist's role in collecting and/or transporting these specimens to the laboratory.
  - 15.06 Describe substances potentially encountered during phlebotomy which can interfere in analysis of blood constituents.
  - 15.07 Define and utilize correct medical terminology and metric measurement needed for specimen collection.
- 16.0 Demonstrate skills and knowledge necessary to perform phlebotomy. – The student will be able to:
- 16.01 Recognize a properly completed requisition and apply established protocol for patient and specimen identification.
  - 16.02 Discuss/perform methods for facilitating capillary/venipuncture collection.
  - 16.03 Demonstrate knowledge of established protocol for patient and specimen identification.
  - 16.04 List appropriate antiseptic agents useful in preparing sites for capillary/venipuncture.
  - 16.05 Discuss/perform appropriate methods for preparing a site for capillary or venipuncture.
  - 16.06 Perform venipuncture by evacuated tube and syringe systems, demonstrating appropriate use of supplies, proper handling of equipment and specimens, and patient care.
  - 16.07 Describe the correct order of draw during capillary and venipuncture.
  - 16.08 Perform a capillary puncture using appropriate supplies and techniques for adults, children and neonates.
  - 16.09 Describe the most common complications associated with capillary and venipuncture, their causes, prevention and treatment.
  - 16.10 Describe/perform capillary/venipuncture procedures for disposing of used or contaminated supplies.
  - 16.11 Describe/perform appropriate techniques for making a peripheral blood smear for hematologic evaluation.
- 17.0 Practice infection control following universal (standard) precautions. – The student will be able to:
- 17.01 Define the term "nosocomial infection."
  - 17.02 Describe/practice procedures for infection prevention.
  - 17.03 Discuss/perform isolation procedures.
  - 17.04 Identify potential routes of infection.
- 18.0 Practice accepted procedures of transporting, accessioning and processing specimens. – The student will be able to:
- 18.01 Describe routine procedures for transporting and processing specimens.
  - 18.02 Describe the significance of time constraints for specimen collection and delivery.
  - 18.03 Demonstrate knowledge of accessioning procedures.
  - 18.04 Aliquot specimens for testing
  - 18.05 Follow protocol for accepting verbal test orders.
- 19.0 Practice quality assurance and safety. – The student will be able to:

- 19.01 Distinguish and perform procedures which ensure reliability of test results when collecting blood specimens.
- 19.02 Demonstrate knowledge of and practice appropriate patient safety.
- 19.03 Practice safety in accordance with established procedures.
- 19.04 Follow documentation procedures for work related accidents.
- 19.05 Implement appropriate THE JOINT COMMISSION patient safety goals.

**PSAV Course Number: MEA0560**  
**Occupational Completion Point: C**  
**Medical Lab Assistant – 300 Hours – SOC Code 31-9099**

- 20.0 Demonstrate basic knowledge of microbiology, perform clinical laboratory "waived tests". – The student will be able to:
  - 20.01 Perform techniques of microbiology related to disinfection techniques.
  - 20.02 Discuss techniques of microbiology related to isolation techniques.
  - 20.03 Perform techniques of microbiology related to sterilization techniques.
  - 20.04 Perform techniques of microbiology related to preparation, staining.
  - 20.05 Understand the microscopic examination of gram stains.
  - 20.06 Discuss techniques of microbiology related to inoculation and transfer of cultures.
  - 20.07 Perform basic techniques of microbiology
  - 20.08 Perform techniques of microbiology related to preparation of artificial culture media.
  - 20.09 Discuss techniques of microbiology related to principles and use of the microscope.
  
- 21.0 Demonstrate basic knowledge of urinalysis, perform clinical laboratory "waived tests". – The student will be able to:
  - 21.01 Discuss urinalysis techniques related to normal and abnormal components of the urine.
  - 21.02 Perform urinalysis techniques related to collection and preservation of specimens.
  - 21.03 Discuss urinalysis techniques related to physical properties of urine and related odors, color.
  - 21.04 Perform urinalysis techniques related to dipstick urine pH and describe clinical significance.
  - 21.05 Discuss urinalysis techniques related to urine specific gravity techniques; calibration and use of urinometer and refractometer.
  - 21.06 Perform dipstick or tablet (nonautomated) urinalysis techniques related to performance of chemical tests.
  - 21.07 Discuss urinalysis techniques related to microscopic identification of significant elements.
  - 21.08 Perform urinalysis techniques related to principles and use of centrifuge.
  
- 22.0 Demonstrate basic knowledge of clinical chemistry, perform clinical laboratory "waived tests". – The student will be able to:
  - 22.01 Perform techniques of clinical chemistry related to metric measurement.

- 22.02 Perform techniques of clinical chemistry related to laboratory glassware and equipment.
  - 22.03 Perform techniques of clinical chemistry related to reagent preparation, laboratory equipment and laboratory techniques.
  - 22.04 Discuss techniques of clinical chemistry related to preparation of protein free filtrate and chemical tests.
  - 22.05 Discuss techniques of clinical chemistry related to standardization of procedure and use of standards, blanks and controls.
  - 22.06 Discuss techniques of clinical chemistry related to visual colorimetry; calibration and use of the spectrophotometer.
  - 22.07 Discuss basic techniques of clinical chemistry related to normal and abnormal physiology.
- 23.0 Demonstrate basic knowledge of hematology, perform clinical laboratory "waived tests".  
– The student will be able to:
- 23.01 Discuss techniques of hematology related to counting formed elements of blood.
  - 23.02 Perform techniques of hematology related to preparation and staining.
  - 23.03 Discuss techniques of cell differential microscopic examination of blood films.
  - 23.04 Perform techniques of hematology related to spun hematocrit tests.
  - 23.05 Discuss techniques of hematology related to bleeding and clotting times.
  - 23.06 Perform techniques of hematology related to hemoglobin tests.
  - 23.07 Discuss techniques of hematology related to calculation of red blood cell indices.
  - 23.08 Discuss basic techniques of hematology related to normal and abnormal physiology.

**PSAV Course Number: MEA0570**  
**Occupational Completion Point: D**  
**Medical/Clinical Lab Technician 1 – 350 Hours – SOC Code 29-2012**

- 24.0 Discuss anatomy and physiology of the human body as it relates to the field of medical laboratory technology. – The student will be able to:
- 24.01 Identify the major body systems and their anatomical features.
  - 24.02 Explain the physiological processes in the human system necessary to influence and maintain homeostasis.
- 25.0 Discuss the general responsibilities and functions encountered by a medical technician.  
– The students will be able to:
- 25.01 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solutions of such questions.
  - 25.02 Organize and communicate the results obtained by observation and experimentation.
  - 25.03 Demonstrate ability to evaluate and draw conclusions.
  - 25.04 Demonstrate knowledge of anatomy and physiology of body systems.
  - 25.05 Demonstrate ability to report observations in written or oral form.
  - 25.06 Discuss the licensure and certification requirements of the major classifications of clinical laboratory personnel.
- 26.0 Apply quality assurance principles and safety protocols. – The student will be able to:

- 26.01 Recognize specimen suitability and determine need for rejection/recollection using factors described in clinical protocol.
  - 26.02 Describe special procedures for transporting and processing specimens.
  - 26.03 Describe clinical laboratory role in providing quality assurance in laboratory testing, reporting, and use and maintenance of equipment.
  - 26.04 Demonstrate all required calibration procedures.
  - 26.05 Demonstrate and record all quality control procedures required for the tests assayed and recognize unacceptable results.
  - 26.06 Identify and report problems encountered in daily quality control according to standard operating procedures.
  - 26.07 Adhere to current OSHA regulations regarding laboratory hazards.
- 27.0 Demonstrate knowledge of the operation of computer systems. – The student will be able to:
- 27.01 Discuss the role of computer systems in laboratory data management.
  - 27.02 Demonstrate knowledge of common computer terminology.
  - 27.03 Demonstrate entry level computer operations for specimen accessioning, data reporting, and quality control recording.
  - 27.04 Demonstrate entry level operational skills in the use of computer-interfaced analytical instrumentation.

**PSAV Course Number: MEA0571**  
**Occupational Completion Point: D**  
**Medical/Clinical Lab Technician 2– 350 Hours – SOC Code 29-2012**

- 28.0 Demonstrate knowledge of urinalysis and body fluids principles and procedures. – The student will be able to:
- 28.01 Describe collection, transport and storage procedures for random and timed urine specimens.
  - 28.02 Discuss the renal system as it relates to urinalysis.
  - 28.03 Describe renal function tests.
  - 28.04 Describe principles of and perform routine physical and chemical analyses on urine.
  - 28.05 Prepare urine sediments and perform identification and quantitation of microscopic formed elements.
  - 28.06 Correlate abnormal physical, chemical and microscopic urine results with associated pathological conditions.
  - 28.07 Define and discuss the differences between transudates and exudates.
  - 28.08 Discuss miscellaneous body fluids to include cerebral spinal, seminal and joint fluids.
  - 28.09 Perform physical, chemical and microscopic evaluations of common body fluids.
- 29.0 Demonstrate knowledge of hematological principles and procedures. – The student will be able to:
- 29.01 Discuss the organs, cells and cellular interaction of the lymphoids, myeloid and reticuloendothelial systems.

- 29.02 Demonstrate an understanding of basic concepts of hematopoietic regulation, proliferation and cellular differentiation.
  - 29.03 Discuss the function of formed elements of blood.
  - 29.04 Discuss normal and abnormal hematology findings, reference ranges and associated diseases.
  - 29.05 Demonstrate an understanding of normal and abnormal molecular structure of hemoglobin and common hemoglobinopathies and associated tests.
  - 29.06 Demonstrate an understanding of disease, normal and abnormal white cell morphology, and associated tests.
  - 29.07 Discuss assessment and impact of preanalytical factors on hematology testing.
  - 29.08 Discuss the principles of and perform routine hematology procedures.
  - 29.09 Differentiate normal from abnormal blood cell morphology and relate the abnormal findings to the commonly referenced hematological disorders.
  - 29.10 Identify normal and abnormal molecular structure of hemoglobin and the more common hemoglobinopathies.
- 30.0 Demonstrate knowledge of hemostasis and related diagnostic principles and procedures. – The student will be able to:
- 30.01 Discuss and define the interactive systems necessary to maintain hemostasis.
  - 30.02 Discuss common coagulopathies and associated treatments and therapies.
  - 30.03 Discuss assessment and impact of preanalytical factors on hemostasis testing
  - 30.04 Describe the principles of and perform routine testing used in the evaluation of the vascular, platelet, coagulation and fibrinolytic systems.
  - 30.05 Discuss additional hemostasis tests performed to differentiate the cause of abnormal routine tests.
- 31.0 Demonstrate knowledge of microbiological principles and procedures. – The student will be able to:
- 31.01 Discuss microbial taxonomy and classification.
  - 31.02 Discuss bacterial metabolism, reproduction, cell structures and their functions.
  - 31.03 Discuss and perform disinfection and sterilization techniques.
  - 31.04 Discuss classification, composition and preparation of culture media.
  - 31.05 Discuss specimen collection, handling, and culturing techniques for urine, stool, wound, throat, body fluids, blood and exudates.
  - 31.06 Demonstrate bacteriologic culture techniques necessary for isolation and identification of organisms.
  - 31.07 Demonstrate and interpret antibiotic susceptibility tests.
  - 31.08 Discuss diseases associated with selected anaerobic and aerobic bacteria.
  - 31.09 Identify commonly encountered aerobic bacteria through morphological, physical and biochemical properties.
  - 31.10 Discuss the principles of, prepare, and interpret Gram stains.
  - 31.11 Discuss collection and handling of specimens for fungal, mycobacterial and viral specimens.
  - 31.12 Prepare and examine specimens, and identify ova and parasites as indicated.
- 32.0 Demonstrate knowledge of clinical chemistry principles and procedures. – The student will be able to:
- 32.01 Discuss the renal system and related chemistry tests.

- 32.02 Discuss principles of and perform common renal function tests.
- 32.03 Discuss carbohydrate, protein and lipid metabolism.
- 32.04 Discuss principles of and perform commonly ordered tests related to carbohydrate, protein and lipid metabolism.
- 32.05 Discuss the liver and its functions as related to chemistry tests.
- 32.06 Discuss principles of and perform commonly ordered liver function tests.
- 32.07 Discuss enzyme classification, origin, activity and function.
- 32.08 Discuss principles of and perform commonly ordered enzyme procedures.
- 32.09 Discuss electrolyte balance as related to health and disease.
- 32.10 Discuss principles of and perform electrolyte analyses.
- 32.11 Discuss principles of and perform commonly ordered tests to evaluate cardiac function.
- 32.12 Discuss the physiology of the endocrine system and the principal tests used to determine endocrine function.
- 32.13 Discuss the role of the laboratory in therapeutic drug monitoring and toxicology.
- 32.14 Discuss and perform general electrophoresis techniques.
- 32.15 Demonstrate knowledge of principles of instrumentation as related to the clinical chemistry laboratory.

**PSAV Course Number: MEA0572**  
**Occupational Completion Point: D**  
**Medical/Clinical Lab Technician 3 – 350 Hours – SOC Code 29-2012**

- 33.0 Demonstrate knowledge of immunohematological principles and procedures. – The student will be able to:
- 33.01 Discuss basic genetics of the blood group antigens.
  - 33.02 . Discuss the ABO blood group system
  - 33.03 Discuss the Rh blood group system
  - 33.04 Discuss other blood group systems
  - 33.05 Perform antigen and antibody testing to determine ABO group and Rh phenotypes.
  - 33.06 Discuss and perform antibody screening tests.
  - 33.07 Discuss and perform antibody identification tests.
  - 33.08 Discuss donor unit screening for compatibility with unexpected blood group antibodies.
  - 33.09 Discuss and perform red cell antigen typing on recipient donor specimens.
  - 33.10 Discuss and perform routine compatibility testing.
  - 33.11 Discuss and perform antibody screening and identification of common single antibodies.
  - 33.12 Discuss donor interview, criteria for selection, phlebotomy preparation, and donor blood processing.
  - 33.13 Identify symptoms of and required laboratory protocol for handling suspected transfusion reactions.
  - 33.14 Discuss immune hemolytic disorders and perform the direct antiglobulin test.
  - 33.15 Discuss identification of multiple antibodies in a specimen.
  - 33.16 Discuss appropriate absorption and elution techniques.
  - 33.17 Discuss component collection and preparation.
- 34.0 Demonstrate knowledge of immunological principles and procedures. – The student will be able to:

- 34.01 Discuss the immune system and the normal immune response.
- 34.02 Discuss physical and chemical properties of immunogens (antigens), immunoglobulins (antibodies) and complement and their *in vivo* and *in vitro* reactions.
- 34.03 Discuss the principle of and perform the basic agglutination, flocculation and precipitation procedures in serology.
- 34.04 Discuss principles of complement fixation, immunoelectrophoresis and enzyme immunoassay.
- 34.05 Discuss the clinical significance of the commonly performed immunology tests.

2011-2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Medical Clinical Laboratory Technician- ATD  
**ATD CIP Number:** 0317.030502  
**SOC Code(s):** 31-9099, 29-2012

When this program is offered by a community or state college, the following standards, and benchmarks apply.

**Health Careers Core: The Health Careers Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Careers Core or any other health occupations program do not have to repeat intended outcomes 01-11.**

01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:

- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
- 01.02 Identify common methods of payment for healthcare services.
- 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
- 01.04 Describe the composition and functions of a healthcare team.
- 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
- 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
- 01.07 Identify characteristics of effective teams.
- 01.08 Recognize methods for building positive team relationships.
- 01.09 Analyze attributes and attitudes of an effective leader.
- 01.10 Recognize factors and situations that may lead to conflict.
- 01.11 Demonstrate effective techniques for managing team conflict.
- 01.12 Describe factors that influence the current delivery system of healthcare.
- 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.

02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:

- 02.01 Develop basic speaking and active listening skills.
- 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
- 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
- 02.04 Respond to verbal and non-verbal cues.
- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.
- 02.06 Use appropriate medical terminology and abbreviations.

- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
  - 02.08 Recognize the importance of patient/client educations regarding healthcare.
  - 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
  - 02.10 Analyze elements of communication using a sender-receiver model.
  - 02.11 Distinguish between and report subjective and objective information.
  - 02.12 Report relevant information in order of occurrence.
- 03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:
- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
  - 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
  - 03.03 Demonstrate procedures for accurate documentation and record keeping.
  - 03.04 Interpret healthcare facility policy and procedures.
  - 03.05 Explain the “Patient’s Bill of Rights”.
  - 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
  - 03.07 Describe advance directives.
  - 03.08 Describe informed consent.
  - 03.09 Explain the laws governing harassment, labor and employment.
  - 03.10 Differentiate between legal and ethical issues in healthcare.
  - 03.11 Describe a code of ethics consistent with the healthcare occupation.
  - 03.12 Identify and compare personal, professional, and organizational ethics.
  - 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
  - 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
  - 03.15 Recognize and report abuse including domestic violence and neglect.
  - 03.16 Distinguish among the five schedules of controlled substances.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:
- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
  - 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
  - 04.03 Identify psychological reactions to illness including defense mechanisms.
  - 04.04 Identify complementary and alternative health practices.
  - 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
  - 04.06 Explain the basic concepts of positive self image, wellness and stress.
  - 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
  - 04.08 Explain the nutrition pyramid.
  - 04.09 Recognize the steps in the grief process.
- 05.0 Recognize and practice safety and security procedures. – The student will be able to:

- 05.01 Recognize safe and unsafe working conditions and report safety hazards.
  - 05.02 Demonstrate the safe use of medical equipment.
  - 05.03 Explain and apply the theory of root- cause analysis
  - 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
  - 05.05 Identify and practice security procedures for medical supplies and equipment.
  - 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions.
  - 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
  - 05.08 Demonstrate proper body mechanics and ergonomics.
  - 05.09 Demonstrate the procedure for properly identifying patients.
  - 05.10 Demonstrate procedures for the safe transport and transfer of patients.
  - 05.11 Describe fire, safety, disaster and evacuations procedures.
  - 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )
- 06.0 Recognize and respond to emergency situations. – The student will be able to:
- 06.01 Monitor and record vital signs.
  - 06.02 Describe legal parameters relating to the administration of emergency care.
  - 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
  - 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.
- 07.0 Recognize and practice infection control procedures. – The student will be able to:
- 07.01 Define principles of infection control including standard and transmission based precautions.
  - 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
  - 07.03 Demonstrate knowledge of surgical asepsis.
  - 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.
- 08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:
- 08.01 Describe technology applications in healthcare.
  - 08.02 Define terms and demonstrate basic computer skills.
  - 08.03 Recognize technology applications in healthcare.
  - 08.04 Interpret information from electronic medical documents.
  - 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.
- 09.0 Demonstrate employability skills. – The student will be able to:
- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.

- 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
  - 09.03 Identify documents that may be required when applying for a job.
  - 09.04 Write an appropriate resume.
  - 09.05 Conduct a job search.
  - 09.06 Complete a job application form correctly.
  - 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
  - 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
  - 09.09 Identify acceptable work habits.
  - 09.10 Recognize appropriate affective/professional behavior.
  - 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:
- 10.01 Recognize emerging diseases and disorders
  - 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
  - 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
  - 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
  - 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
  - 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.
- 11.0 Apply basic math and science skills. – The student will be able to:
- 11.01 Draw, read, and report on graphs, charts and tables.
  - 11.02 Measure time, temperature, distance, capacity, and mass/weight.
  - 11.03 Make, use and convert using both traditional and metric units.
  - 11.04 Make estimations and approximations and judge the reasonableness of the result.
  - 11.05 Convert from regular to 24 hour time.
  - 11.06 Demonstrate ability to evaluate and draw conclusions.
  - 11.07 Organize and communicate the results obtained by observation and experimentation.
  - 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
  - 11.09 Calculate ratios

**Phlebotomy (12-19) OCP B**

- 12.0 Demonstrate accepted professional, communication, and interpersonal skills. – The student will be able to:
- 12.01 Follow approved procedure for labeling of specimens.
  - 12.02 Demonstrate the appropriate professional behavior of a phlebotomist.
  - 12.03 Explain to the patient the procedure to be used in specimen collection.
  - 12.04 Explain in detail the importance of identifying patients correctly when drawing blood.
- 13.0 Discuss phlebotomy in relation to the health care setting. – The student will be able to:
- 13.01 List, classify and discuss various departments and services within the health care setting with which the phlebotomist must interact to obtain laboratory specimens from patients.
  - 13.02 Identify the major departments/sections within the clinical laboratory, the major types of procedures run in each department/section, and their specimen requirements.
  - 13.03 Describe roles of the major classifications of clinical laboratory personnel (i.e., pathologist, chief/administrative technologist, CLS, MT, phlebotomist, etc.).
- 14.0 Identify the anatomic structure and function of body systems in relation to services performed by phlebotomist. – The student will be able to:
- 14.01 Describe and define major body systems with emphasis on the circulatory system.
  - 14.02 List and describe the main superficial veins used in performing venipuncture.
  - 14.03 Identify appropriate sites for capillary/venipuncture and name/find the most desirable one(s).
  - 14.04 Describe the function of the following blood components: erythrocytes, thrombocytes, leukocytes, plasma, and serum.
- 15.0 Recognize and identify collection reagents supplies, equipment and interfering chemical substances. – The student will be able to:
- 15.01 Identify and discuss proper use of appropriate types of equipment needed to collect various clinical laboratory blood specimens by venipuncture.
  - 15.02 Explain the special precautions and types of equipment needed to collect blood from a neonate.
  - 15.03 Identify and discuss proper use of supplies used in collecting microspecimens.
  - 15.04 Identify and discuss the proper use of the various types of anticoagulants, preservatives and gels used in blood collection and the vacuum tube color-codes for these additives.
  - 15.05 Describe the types of patients' specimens that are analyzed in the clinical laboratory and the phlebotomist's role in collecting and/or transporting these specimens to the laboratory.
  - 15.06 Describe substances potentially encountered during phlebotomy which can interfere in analysis of blood constituents.
  - 15.07 Define and utilize correct medical terminology and metric measurement needed for specimen collection.

- 16.0 Demonstrate skills and knowledge necessary to perform phlebotomy. – The student will be able to:
- 16.01 Recognize a properly completed requisition and apply established protocol for patient and specimen identification.
  - 16.02 Discuss/perform methods for facilitating capillary/venipuncture collection.
  - 16.03 Demonstrate knowledge of established protocol for patient and specimen identification.
  - 16.04 List appropriate antiseptic agents useful in preparing sites for capillary/venipuncture.
  - 16.05 Discuss/perform appropriate methods for preparing a site for capillary or venipuncture.
  - 16.06 Perform venipuncture by evacuated tube and syringe systems, demonstrating appropriate use of supplies, proper handling of equipment and specimens, and patient care.
  - 16.07 Describe the correct order of draw during capillary and venipuncture.
  - 16.08 Perform a capillary puncture using appropriate supplies and techniques for adults, children and neonates.
  - 16.09 Describe the most common complications associated with capillary and venipuncture, their causes, prevention and treatment.
  - 16.10 Describe/perform capillary/venipuncture procedures for disposing of used or contaminated supplies.
  - 16.11 Describe/perform appropriate techniques for making a peripheral blood smear for hematologic evaluation.
- 17.0 Practice infection control following universal (standard) precautions. – The student will be able to:
- 17.01 Define the term "nosocomial infection."
  - 17.02 Describe/practice procedures for infection prevention.
  - 17.03 Discuss/perform isolation procedures.
  - 17.04 Identify potential routes of infection.
- 18.0 Practice accepted procedures of transporting, accessioning and processing specimens. – The student will be able to:
- 18.01 Describe routine procedures for transporting and processing specimens.
  - 18.02 Describe the significance of time constraints for specimen collection and delivery.
  - 18.03 Demonstrate knowledge of accessioning procedures.
  - 18.04 Aliquot specimens for testing
  - 18.05 Follow protocol for accepting verbal test orders.
- 19.0 Practice quality assurance and safety. – The student will be able to:
- 19.01 Distinguish and perform procedures which ensure reliability of test results when collecting blood specimens.
  - 19.02 Demonstrate knowledge of and practice appropriate patient safety.
  - 19.03 Practice safety in accordance with established procedures.
  - 19.04 Follow documentation procedures for work related accidents.
  - 19.05 Implement appropriate THE JOINT COMMISSION patient safety goals.

**-Medical Laboratory Technician: (20-34)**

- 20.0 Demonstrate basic knowledge of microbiology; perform clinical laboratory "waived tests".  
– The student will be able to:
- 20.01 Perform techniques of microbiology related to disinfection techniques.
  - 20.02 Perform techniques of microbiology related to preparation, staining.
  - 20.03 Understand the microscopic examination of gram stains.
  - 20.04 Perform basic techniques of microbiology
- 21.0 Demonstrate basic knowledge of urinalysis; perform clinical laboratory "waived tests". –  
The student will be able to:
- 21.01 Discuss urinalysis techniques related to normal and abnormal components of the urine.
  - 21.02 Perform urinalysis techniques related to collection and preservation of specimens.
  - 21.03 Discuss urinalysis techniques related to physical properties of urine and related odors, color.
  - 21.04 Perform urinalysis techniques related to dipstick urine pH and describe clinical significance.
  - 21.05 Discuss urinalysis techniques related to urine specific gravity techniques; calibration and use of urinometer and refractometer.
  - 21.06 Perform dipstick or tablet (nonautomated) urinalysis techniques related to performance of chemical tests.
- 22.0 Demonstrate basic knowledge of clinical chemistry, perform clinical laboratory "waived tests". – The student will be able to:
- 22.01 Discuss and apply metric measurements in clinical chemistry.
  - 22.02 Demonstrate knowledge and use of standard laboratory glassware and basic equipment, i.e. graduates, centrifuges, transfer pipettes
  - 22.03 *Discuss* and perform techniques of clinical chemistry related to reagent preparation, laboratory equipment and laboratory techniques.
- 23.0 Demonstrate basic knowledge of hematology, perform clinical laboratory "waived tests".  
– The student will be able to:
- 23.01 Discuss techniques of hematology related to counting formed elements of blood.
  - 23.02 Perform techniques of hematology related to preparation and staining.
  - 23.03 Perform techniques of hematology related to spun hematocrit tests.
- 24.0 Discuss anatomy and physiology of the human body as it relates to the field of medical laboratory technology. – The student will be able to:
- 24.01 Identify the major body systems and their anatomical features.
  - 24.02 Explain the physiological processes in the human system necessary to influence and maintain homeostasis.

25.0 Discuss the general responsibilities and functions encountered by a medical technician.

– The students will be able to:

- 25.01 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solutions of such questions.
- 25.02 Organize and communicate the results obtained by observation and experimentation.
- 25.03 Demonstrate ability to evaluate and draw conclusions.
- 25.04 Demonstrate knowledge of anatomy and physiology of body systems.
- 25.05 Demonstrate ability to report observations in written or oral form.
- 25.06 Discuss the licensure and certification requirements of the major classifications of clinical laboratory personnel.

26.0 Apply quality assurance principles and safety protocols. – The student will be able to:

- 26.01 Recognize specimen suitability and determine need for rejection/recollection using factors described in clinical protocol.
- 26.02 Describe special procedures for transporting and processing specimens.
- 26.03 Describe clinical laboratory role in providing quality assurance in laboratory testing, reporting, and use and maintenance of equipment.
- 26.04 Demonstrate all required calibration procedures.
- 26.05 Demonstrate and record all quality control procedures required for the tests performed and recognize unacceptable results.
- 26.06 Identify and report problems encountered in daily quality control according to standard operating procedures.
- 26.07 Adhere to current OSHA regulations regarding laboratory hazards.

27.0 Demonstrate knowledge of the operation of computer systems. – The student will be able to:

- 27.01 Discuss the role of computer systems in laboratory data management.
- 27.02 Demonstrate knowledge of common computer terminology.
- 27.03 Demonstrate entry level computer operations for specimen accessioning, data reporting, and quality control recording.
- 27.04 Demonstrate entry level operational skills in the use of computer-interfaced analytical instrumentation.

28.0 Demonstrate knowledge of urinalysis and body fluids principles and procedures. – The student will be able to:

- 28.01 Describe collection, transport and storage procedures for random and timed urine specimens.
- 28.02 Discuss the renal system as it relates to urinalysis.
- 28.03 Describe renal function tests.
- 28.04 Describe principles of and perform routine physical and clinical chemical analyses on urine.
- 28.05 Prepare urine sediments and perform identification and quantitation of microscopic formed elements.
- 28.06 Correlate abnormal physical, chemical and microscopic urine results with associated pathological conditions.

- 28.07 Define and discuss the differences between transudates and exudates.
  - 28.08 Discuss miscellaneous body fluids to include cerebral spinal, seminal and joint fluids.
  - 28.09 DPerform physical, chemical and microscopic evaluations of common body fluids
- 29.0 Demonstrate knowledge of hematological principles and procedures. – The student will be able to:
- 29.01 Discuss the organs, cells and cellular interaction of the lymphoids, myeloid and reticuloendothelial systems.
  - 29.02 Demonstrate an understanding of basic concepts of hematopoietic regulation, proliferation and cellular differentiation.
  - 29.03 Discuss the function of formed elements of blood.
  - 29.04 Discuss normal and abnormal hematology findings, reference ranges and associated diseases.
  - 29.05 Demonstrate an understanding of normal and abnormal molecular structure of hemoglobin ,common hemoglobinopathies and associated tests.
  - 29.06 Demonstrate an understanding of disease,normal and abnormal white cell morphology, and associated tests.
  - 29.07 Discuss assessment and impact of preanalytical factors on hematology testing.
  - 29.08 Discuss the principles of and perform routine hematology procedures.
  - 29.09 Perform techniques of manual blood smear evaluation including white blood cell differential, red cell and platelet morphology.
  - 29.10 Discuss techniques of hematology related to calculation of red blood cell indices.
- 30.0 Demonstrate knowledge of hemostasis and related diagnostic principles and procedures. – The student will be able to:
- 30.01 Discuss and define the interactive systems necessary to maintain hemostasis.
  - 30.02 Discuss. common coagulopathies and associated treatments and therapies.
  - 30.03 Discuss assessment and impact of preanalytical factors on hemostasis testing
  - 30.04 Describe the principles of and perform routine testing used in the evaluation of the vascular, platelet, coagulation and fibrinolytic systems.
  - 30.05 Discuss additional hemostasis tests performed to differentiate the cause of abnormal routine tests.
- 31.0 Demonstrate knowledge of immunology principles and procedures. – The student will be able to:
- 31.01 Discuss the immune system and the normal immune response.
  - 31.02 Discuss physical and chemical properties of immunogens (antigens), immunoglobulins (antibodies) and complement and their *in vivo* and *in vitro* reactions.
  - 31.03 Discuss the principle of and perform the basic agglutination, flocculation and precipitation procedures in serology.
  - 31.04 Discuss principles of complement fixation, immunoelectrophoresis and enzyme immunoassay.
  - 31.05 Discuss the clinical significance of the commonly performed immunology tests.

- 32.0 Demonstrate knowledge of clinical chemistry principles and procedures. – The student will be able to:
- 32.01 Discuss the renal system and related chemistry tests.
  - 32.02 Discuss principles of and perform common renal function tests.
  - 32.03 Discuss carbohydrate, protein and lipid metabolism.
  - 32.04 Discuss principles of and perform commonly ordered tests related to carbohydrate, protein and lipid metabolism.
  - 32.05 Discuss the liver and its functions as related to chemistry tests.
  - 32.06 Discuss principles of and perform commonly ordered liver function tests.
  - 32.07 Discuss enzyme classification, origin, activity and function.
  - 32.08 Discuss principles of and perform commonly ordered enzyme procedures.
  - 32.09 Discuss electrolyte balance as related to health and disease.
  - 32.10 Discuss principles of and perform electrolyte analyses.
  - 32.11 Discuss principles of and perform commonly ordered tests to evaluate cardiac function.
  - 32.12 Discuss the physiology of the endocrine system and the principal tests used to evaluate endocrine function.
  - 32.13 Discuss the role of the laboratory in therapeutic drug monitoring and toxicology.
  - 32.14 Discuss and perform general electrophoresis techniques.
  - 32.15 Discuss the clinical significance of commonly ordered chemistry tests.
  - 32.16 Demonstrate knowledge of principles of instrumentation as related to the clinical chemistry laboratory.
  - 32.17 Discuss techniques of clinical chemistry related to standardization of procedure and use of standards, blanks and controls.
  - 32.18 Discuss techniques of clinical chemistry related to visual colorimetry; calibration and use of the spectrophotometer.
  - 32.19 Discuss basic techniques of clinical chemistry related to normal and abnormal physiology.
- 33.0 Demonstrate knowledge of immunohematology principles and procedures. – The student will be able to:
- 33.01 Discuss basic genetics of the blood group antigens
  - 33.02 Discuss the ABO blood group system
  - 33.03 Discuss the Rh blood group system
  - 33.04 Discuss other blood group systems
  - 33.05 Perform antigen and antibody testing to determine ABO and Rh phenotypes.
  - 33.06 Discuss and perform antibody screening tests.
  - 33.07 Discuss and perform antibody identification tests.
  - 33.08 Discuss donor unit screening for compatibility with unexpected blood group antibodies.
  - 33.09 Discuss and perform red cell antigen typing on recipient donor specimens.
  - 33.10 Discuss and perform routine compatibility testing.
  - 33.11 Discuss blood component collection and, preparation, storage and use.
  - 33.12 Identify symptoms of and required laboratory protocol for handling suspected transfusion reactions.
  - 33.13 Discuss immune hemolytic Disorders and perform the direct antiglobulin test.
  - 33.14 Discuss identification of multiple antibodies in a specimen.
  - 33.15 Discuss appropriate absorption and elution techniques.

- 33.16 Discuss donor interview, criteria for selection, phlebotomy preparation, and donor blood processing.
  - 33.17 Discuss the principles of electronic crossmatching
- 34.0 Demonstrate knowledge of microbiological principles and procedures. – The student will be able to:
- 34.01 Discuss microbial taxonomy and nomenclature.
  - 34.02 Discuss bacterial metabolism, reproduction, cell structures and their functions.
  - 34.03 Discuss classification, composition and preparation of culture media.
  - 34.04 Discuss the human pathogenesis of bacteria
  - 34.05 Discuss and perform techniques of microbiology related to sterilization techniques.
  - 34.06 Perform techniques of microbiology related to preparation of artificial culture media.
  - 34.07 Perform culturing techniques for urine, stool, wound, throat, body fluids, blood and exudates.
  - 34.08 Perform techniques of microbiology related to inoculation and transfer of cultures.
  - 34.09 Discuss and demonstrate the use of the microscope related to laboratory procedures.
  - 34.10 Discuss the principles of, prepare, and interpret Gram stains.
  - 34.11 Perform techniques necessary for isolation and identification of aerobic and anaerobic bacterial organisms.
  - 34.12 Identify commonly encountered aerobic bacteria through morphological, physical and biochemical properties.
  - 34.13 Perform and interpret antibiotic susceptibility tests.
  - 34.14 Discuss collection and handling of specimens for fungal, mycobacterial and viral culture.
  - 34.15 Prepare and examine specimens, and identify ova and parasites when present.

2011-2012

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Medical Clinical Laboratory Technician( NEW)-ATD  
**Program Type:** ATD (Applied Technology Diploma)  
**Career Cluster:** Health Science

	<b>CC</b>	<b>PSAV-NEW</b>
Program Number	N/A	H170600
CIP Number	0317030502	0317030505
Grade Level	Applied Technology Diploma ( <u>ATD</u> )	Applied Technology Diploma ( <u>ATD</u> )
Standard Length	40 credit hours	1515 hours
CTSO	HOSA	HOSA
SOC Codes (all applicable)	31-9099, 29-2012	31-9099, 29-2012
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>	
Basic Skills Level	Mathematics: 10 Language: 11 Reading: 11	

### Purpose

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

The purpose of this program is to prepare students for employment as medical lab technicians, medical/clinical laboratory technicians SOC 29-2012.

The content includes but is not limited to didactic and laboratory performance of routine procedures in hematology, immunology, urinalysis, immunochemistry, microbiology and clinical chemistry including the use of common laboratory instruments. A clinical component is a necessary element of this program.

### Program Structure

This program is an Applied Technology Diploma program that is part of a technical degree program, is less than 60 credit hours, and leads to employment in a specific occupation. An applied technology diploma program may consist of either technical credit or college credit. A public school district may offer an applied technology diploma program only as technical credit, with college credit awarded to a student upon articulation to a community college.

**PSAV Program**

When offered at the district level, this program is a planned sequence of instruction consisting of three occupational completion points and the courses as shown below.

OCP	Course Number	Course Title	Length	SOC Code
A	HSC0003	Basic Healthcare Worker	90 hours	31-9099
B	MEA0520	Phlebotomist	75 hours	31-9099
C	MLT0009	Introduction to Medical laboratory Technology	90 hours	29-2012
	MLT0220	Urinalysis and Body Fluids	135 hours	29-2012
	MLT0335	Hematology and Hemostasis	280 hours	29-2012
	MLT0505	Immunology	60 hours	29-2012
	MLT0640	Clinical Chemistry	255 hours	29-2012
	MLT0520	Immunoematology	255 hours	29-2012
	MLT0450	Microbiology and Parasitology	275 hours	29-2012

**Community College**

When offered at the community college level, this ATD program is part of the Medical Laboratory Technology AS/AAS program (1317.030900) and has a program length of 40 credits.

**Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

**Clinical learning experiences in a clinical laboratory and related areas are an integral part of this program. Clinical learning experiences should reflect the full breadth of responsibilities expected of a Medical Laboratory Technician and should include appropriate experience in each of the areas of the laboratory described herein. The specified length for each of the courses listed is inclusive of clinical experience for each of the respective laboratory sections.**

## Special Notes

This program meets the Department of Health HIV/AIDS Domestic Violence and Prevention of Medical Errors education requirements. Upon completion of this program, the instructor will provide a certificate to the student verifying that these requirements have been met.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635 F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

Either a community college or school district may offer the Applied Technology Diploma program. When offered at the community college, college credit shall be awarded for completion of this program. When offered at the school district, vocational credit will be awarded. Vocational credit will be converted to college credit upon transfer to the AS degree at the community college.

Faculty teaching this program must have a minimum of a bachelor's degree in the specialty area or an associate degree and demonstrated competencies in the specialty area or meet the "exceptional cases" criteria as established by the Southern Association of Colleges and Schools.

The programs should be accredited by:

The Accrediting Bureau of Health Education Schools (ABHES)

7777 Leesburg Pike  
Suite 314  
North Falls Church, VA 22403  
703-917-9503 Fax 703-917-4109  
[info@abhes.org](mailto:info@abhes.org)

**OR**

any other agency as specified by the Division of Medical Quality Administration, Board of Clinical Laboratory Personnel Chapter 483 F.S., Rule 590 FAC, "Florida Clinical Laboratory Personnel Law". The graduate of a board approved program should be prepared to take the appropriate licensing examination to practice in Florida and an appropriate national certifying examination. For further information contact:

Board of Clinical Laboratory Personnel  
4052 Bald Cypress Way, Bin CO7  
Tallahassee, FL 32399-3257  
(850) 245-4444 x3625

National Certification is voluntary and may be obtained from the American Medical Technologists, 710 Higgins Rd., Park Ridge, Il., 60068, 847/823-5169 or 1-800-275-1268 or

National Healthcareer Association  
7500 West 160<sup>th</sup> Street  
Stilwell, Kansas 66085  
800-499-9092

973-644-4797  
[www.nhanow.com](http://www.nhanow.com)

Outcomes 01-11 are referred to as the Health Careers Core and do not have to be completed if the student has previously completed the Core in another health science program. The Core should be taken first or concurrently with the first course in the program. Following the successful completion of the core, the student is eligible to take the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio

### **Career and Technical Student Organization (CTSO)**

Health Occupations Students of America, Inc. (HOSA) is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

### **Basic Skills**

In PSAV programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C. the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Mathematics 10, Language 11, and Reading 11. These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination. Students may be exempt from meeting the Basic Skills requirements by earning an eligible industry certification. See the Basic Skills Exemption List document for a list of eligible industry certifications (<http://www.fldoe.org/workforce/dwdframe/rtf/basic-skills.rtf>).

Adult students with disabilities, as defined in Section 1004.02(7), Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01(3)(a), F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91(3), F.S.

Students who possess a college degree at the Associate of Applied Science level or higher; who have completed or are exempt from the college entry-level examination pursuant to Section 1008.29, F.S.; or who have passed a state, national, or industry licensure exam are exempt from meeting the Basic Skills requirement (Rule 6A-10.040, F.A.C.)

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and

special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Some secondary students with disabilities (ESE) may need additional time (i.e., longer than the regular school year), to master the student performance standards associated with a regular occupational completion point (OCP) or a modified occupational completion point (MOCP). If needed, a student may enroll in the same career and technical course more than once. Documentation should be included in the IEP that clearly indicates that it is anticipated that the student may need an additional year to complete an OCP/MOCP. The student should work on different competencies and new applications of competencies each year toward completion of the OCP(s)/MOCP. After achieving the competencies identified for the year, the student earns credit for the course. It is important to ensure that credits earned by students are reported accurately. The district's information system must be designed to accept multiple credits for the same course number (for eligible students with disabilities). For further information, see Rule 6A-6.0312, F.A.C., Course Modifications for Exceptional Students, and the latest pertinent Technical Assistance Paper (<http://www.fldoe.org/ese/tap-home.asp>).

### **Articulation**

The information related to the guaranteed transfer of credit between an applied technology diploma program and AS/AAS degree must be documented and maintained by the Articulation Coordinating Committee (ACC). The transfer of the applied technology diploma to an AS/AAS degree is guaranteed for a period of three (3) years following the date of the award of the applied technology diploma.

### **Program Length**

In accordance with Rule 6A-10.024, F.A.C. an Applied Technology Diploma program consists of a course of study that is part of an AS/AAS degree program, is less than 60 credit hours, is approximately 50% of the technical component (non-general education), and leads to employment in a specific occupation. An applied technology diploma program may consist of either technical credit or college credit.

Students must have a high school diploma, a GED, or a certificate of completion to be admitted to an applied technology diploma program. Within six weeks of entry, students in ATD programs of 450 or more hours must be tested pursuant to Rule 6A-10.040, F.A.C. and if below minimum standards for completion from the program, must receive remedial instruction. The minimum standards must be at least the equivalent of a score of ten (10) on all sections of basic skills test approved in Rule 6A-10.040, F.A.C. Students must successfully complete all remedial instruction before completing the Applied Technology Diploma.

Community Colleges may offer either college or career credit toward the applied technology diploma. A Career Center in a public school district may offer an applied technology diploma program only as technical credit, with college credit awarded to a student upon articulation to a community college (Section 1004.02, F.S.)

When offered at a community college the standard length of this program is 40 credits. When offered at a technical center the standard length of this program is 1515 clock hours.

In accordance with Rule 6A-10.024, F.A.C. all faculty providing instruction must have at least a baccalaureate degree or an associate degree with demonstrated competencies in the specific instructional program as defined by the Southern Association of Colleges and Schools.

## **Standards**

After successfully completing this program the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.
- 12.0 Demonstrate accepted professional, communication and interpersonal skills.
- 13.0 Discuss phlebotomy in relation to the health care setting.
- 14.0 Identify the anatomic structure and function of body systems in relation to services performed by phlebotomist.
- 15.0 Recognize and identify collection reagents supplies, equipment and interfering chemical substances.
- 16.0 Demonstrate skills and knowledge necessary to perform phlebotomy.
- 17.0 Practice infection control following universal (standard) precautions.
- 18.0 Practice accepted procedures of transporting, accessioning and processing specimens.
- 19.0 Practice quality assurance and safety.
- 20.0 Demonstrate basic knowledge of microbiology, perform clinical laboratory "WAIVED TESTS".
- 21.0 Demonstrate basic knowledge of urinalysis, perform clinical laboratory "WAIVED TESTS".
- 22.0 Demonstrate basic knowledge of clinical chemistry, perform clinical laboratory "WAIVED TESTS".
- 23.0 Demonstrate basic knowledge of hematology, perform clinical laboratory "WAIVED TESTS".
- 24.0 Discuss anatomy and physiology of the human body as it relates to the field of Medical Laboratory Technology.
- 25.0 Discuss the general responsibilities and functions encountered by a Medical Technician.
- 26.0 Apply quality assurance principles and safety protocols.
- 27.0 Demonstrate knowledge of the operation of computer systems.
- 28.0 Demonstrate knowledge of urinalysis and body fluids principles and procedures.
- 29.0 Demonstrate knowledge of hematological principles and procedures.
- 30.0 Demonstrate knowledge of hemostasis and related diagnostic principles and procedures.
- 31.0 Demonstrate knowledge of immunological-principles and procedures.
- 32.0 Demonstrate knowledge of clinical chemistry principles and procedures.
- 33.0 Demonstrate knowledge of immunohematological principles and procedures.
- 34.0 Demonstrate knowledge of microbiological principles and procedures.

2011-2012

**Florida Department of Education  
Student Performance Standards**

**Program Title: Medical Clinical Laboratory Technician-ATD**  
**PSAV Number: H170600**

When this program is offered at the PSAV level, the following organization of courses, standards, and benchmarks apply.

**PSAV Course Number: HSC0003**  
**Occupational Completion Point: A**  
**Basic Healthcare Worker – 90 Hours – SOC Code 31-9099**

**Health Careers Core: The Health Careers Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Careers Core or any other health occupations program do not have to repeat intended outcomes 01-11.**

01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:

- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
- 01.02 Identify common methods of payment for healthcare services.
- 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
- 01.04 Describe the composition and functions of a healthcare team.
- 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
- 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
- 01.07 Identify characteristics of effective teams.
- 01.08 Recognize methods for building positive team relationships.
- 01.09 Analyze attributes and attitudes of an effective leader.
- 01.10 Recognize factors and situations that may lead to conflict.
- 01.11 Demonstrate effective techniques for managing team conflict.
- 01.12 Describe factors that influence the current delivery system of healthcare.
- 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.

02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:

- 02.01 Develop basic speaking and active listening skills.
- 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
- 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
- 02.04 Respond to verbal and non-verbal cues.

- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.
- 02.06 Use appropriate medical terminology and abbreviations.
- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
- 02.08 Recognize the importance of patient/client educations regarding healthcare.
- 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
- 02.10 Analyze elements of communication using a sender-receiver model.
- 02.11 Distinguish between and report subjective and objective information.
- 02.12 Report relevant information in order of occurrence.

03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:

- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
- 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
- 03.03 Demonstrate procedures for accurate documentation and record keeping.
- 03.04 Interpret healthcare facility policy and procedures.
- 03.05 Explain the “Patient’s Bill of Rights”.
- 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
- 03.07 Describe advance directives.
- 03.08 Describe informed consent.
- 03.09 Explain the laws governing harassment, labor and employment.
- 03.10 Differentiate between legal and ethical issues in healthcare.
- 03.11 Describe a code of ethics consistent with the healthcare occupation.
- 03.12 Identify and compare personal, professional, and organizational ethics.
- 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
- 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
- 03.15 Recognize and report abuse including domestic violence and neglect.
- 03.16 Distinguish among the five schedules of controlled substances.

04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:

- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
- 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
- 04.03 Identify psychological reactions to illness including defense mechanisms.
- 04.04 Identify complementary and alternative health practices.
- 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
- 04.06 Explain the basic concepts of positive self image, wellness and stress.
- 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
- 04.08 Explain the nutrition pyramid.

- 04.09 Recognize the steps in the grief process.
- 05.0 Recognize and practice safety and security procedures. – The student will be able to:
  - 05.01 Recognize safe and unsafe working conditions and report safety hazards.
  - 05.02 Demonstrate the safe use of medical equipment.
  - 05.03 Explain and apply the theory of root- cause analysis
  - 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
  - 05.05 Identify and practice security procedures for medical supplies and equipment.
  - 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions.
  - 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
  - 05.08 Demonstrate proper body mechanics and ergonomics.
  - 05.09 Demonstrate the procedure for properly identifying patients.
  - 05.10 Demonstrate procedures for the safe transport and transfer of patients.
  - 05.11 Describe fire, safety, disaster and evacuations procedures.
  - 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )
- 06.0 Recognize and respond to emergency situations. – The student will be able to:
  - 06.01 Monitor and record vital signs.
  - 06.02 Describe legal parameters relating to the administration of emergency care.
  - 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
  - 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.
- 07.0 Recognize and practice infection control procedures. – The student will be able to:
  - 07.01 Define principles of infection control including standard and transmission based precautions.
  - 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
  - 07.03 Demonstrate knowledge of surgical asepsis.
  - 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.
- 08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:
  - 08.01 Describe technology applications in healthcare.
  - 08.02 Define terms and demonstrate basic computer skills.
  - 08.03 Recognize technology applications in healthcare.
  - 08.04 Interpret information from electronic medical documents.
  - 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.

09.0 Demonstrate employability skills. – The student will be able to:

- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.
- 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
- 09.03 Identify documents that may be required when applying for a job.
- 09.04 Write an appropriate resume.
- 09.05 Conduct a job search.
- 09.06 Complete a job application form correctly.
- 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
- 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
- 09.09 Identify acceptable work habits.
- 09.10 Recognize appropriate affective/professional behavior.
- 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).

10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:

- 10.01 Recognize emerging diseases and disorders
- 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
- 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
- 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
- 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
- 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.

11.0 Apply basic math and science skills. – The student will be able to:

- 11.01 Draw, read, and report on graphs, charts and tables.
- 11.02 Measure time, temperature, distance, capacity, and mass/weight.
- 11.03 Make, use and convert using both traditional and metric units.
- 11.04 Make estimations and approximations and judge the reasonableness of the result.
- 11.05 Convert from regular to 24 hour time.
- 11.06 Demonstrate ability to evaluate and draw conclusions.
- 11.07 Organize and communicate the results obtained by observation and experimentation.
- 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
- 11.09 Calculate ratios

**PSAV Course Number: MEA0520**  
**Occupational Completion Point: B**  
**Phlebotomist – 75 Hours – SOC Code 31-9099**

- 12.0 Demonstrate accepted professional, communication, and interpersonal skills. – The student will be able to:
- 12.01 Follow approved procedure for labeling of specimens.
  - 12.02 Demonstrate the appropriate professional behavior of a phlebotomist.
  - 12.03 Explain to the patient the procedure to be used in specimen collection.
  - 12.04 Explain in detail the importance of identifying patients correctly when drawing blood.
- 13.0 Discuss phlebotomy in relation to the health care setting. – The student will be able to:
- 13.01 List, classify and discuss various departments and services within the health care setting with which the phlebotomist must interact to obtain laboratory specimens from patients.
  - 13.02 Identify the major departments/sections within the clinical laboratory, the major types of procedures run in each department/section, and their specimen requirements.
  - 13.03 Describe roles of the major classifications of clinical laboratory personnel (i.e., pathologist, chief/administrative technologist, CLS, MT, phlebotomist, etc.).
- 14.0 Identify the anatomic structure and function of body systems in relation to services performed by phlebotomist. – The student will be able to:
- 14.01 Describe and define major body systems with emphasis on the circulatory system.
  - 14.02 List and describe the main superficial veins used in performing venipuncture.
  - 14.03 Identify appropriate sites for capillary/venipuncture and name/find the most desirable one(s).
  - 14.04 Describe the function of the following blood components: erythrocytes, thrombocytes, leukocytes, plasma, and serum.
- 15.0 Recognize and identify collection reagents supplies, equipment and interfering chemical substances. – The student will be able to:
- 15.01 Identify and discuss proper use of appropriate types of equipment needed to collect various clinical laboratory blood specimens by venipuncture.
  - 15.02 Explain the special precautions and types of equipment needed to collect blood from a neonate.
  - 15.03 Identify and discuss proper use of supplies used in collecting microspecimens.
  - 15.04 Identify and discuss the proper use of the various types of anticoagulants, preservatives and gels used in blood collection and the vacuum tube color-codes for these additives.
  - 15.05 Describe the types of patients' specimens that are analyzed in the clinical laboratory and the phlebotomist's role in collecting and/or transporting these specimens to the laboratory.

- 15.06 Describe substances potentially encountered during phlebotomy which can interfere in analysis of blood constituents.
  - 15.07 Define and utilize correct medical terminology and metric measurement needed for specimen collection.
- 16.0 Demonstrate skills and knowledge necessary to perform phlebotomy. – The student will be able to:
- 16.01 Recognize a properly completed requisition and apply established protocol for patient and specimen identification.
  - 16.02 Discuss/perform methods for facilitating capillary/venipuncture collection.
  - 16.03 Demonstrate knowledge of established protocol for patient and specimen identification.
  - 16.04 List appropriate antiseptic agents useful in preparing sites for capillary/venipuncture.
  - 16.05 Discuss/perform appropriate methods for preparing a site for capillary or venipuncture.
  - 16.06 Perform venipuncture by evacuated tube and syringe systems, demonstrating appropriate use of supplies, proper handling of equipment and specimens, and patient care.
  - 16.07 Describe the correct order of draw during capillary and venipuncture.
  - 16.08 Perform a capillary puncture using appropriate supplies and techniques for adults, children and neonates.
  - 16.09 Describe the most common complications associated with capillary and venipuncture, their causes, prevention and treatment.
  - 16.10 Describe/perform capillary/venipuncture procedures for disposing of used or contaminated supplies.
  - 16.11 Describe/perform appropriate techniques for making a peripheral blood smear for hematologic evaluation.
- 17.0 Practice infection control following universal (standard) precautions. – The student will be able to:
- 17.01 Define the term "nosocomial infection."
  - 17.02 Describe/practice procedures for infection prevention.
  - 17.03 Discuss/perform isolation procedures.
  - 17.04 Identify potential routes of infection.
- 18.0 Practice accepted procedures of transporting, accessioning and processing specimens. – The student will be able to:
- 18.01 Describe routine procedures for transporting and processing specimens.
  - 18.02 Describe the significance of time constraints for specimen collection and delivery.
  - 18.03 Demonstrate knowledge of accessioning procedures.
  - 18.04 Aliquot specimens for testing
  - 18.05 Follow protocol for accepting verbal test orders.
- 19.0 Practice quality assurance and safety. – The student will be able to:
- 19.01 Distinguish and perform procedures which ensure reliability of test results when collecting blood specimens.

- 19.02 Demonstrate knowledge of and practice appropriate patient safety.
- 19.03 Practice safety in accordance with established procedures.
- 19.04 Follow documentation procedures for work related accidents.
- 19.05 Implement appropriate joint commission patient safety goals.

**PSAV Course Number: MLT0009**  
**Occupational Completion Point: C**  
**Introduction to Medical Laboratory Technology –90 Hours – SOC Code 29-2012**

- 20.0 Demonstrate basic knowledge of microbiology; perform clinical laboratory "waived tests". – The student will be able to:
  - 20.01 Perform techniques of microbiology related to disinfection techniques.
  - 20.02 Perform techniques of microbiology related to preparation, staining.
  - 20.03 Understand the microscopic examination of gram stains.
  - 20.04 Perform basic techniques of microbiology
- 21.0 Demonstrate basic knowledge of urinalysis; perform clinical laboratory "waived tests". – The student will be able to:
  - 21.01 Discuss urinalysis techniques related to normal and abnormal components of the urine.
  - 21.02 Perform urinalysis techniques related to collection and preservation of specimens.
  - 21.03 Discuss urinalysis techniques related to physical properties of urine and related odors, color.
  - 21.04 Perform urinalysis techniques related to dipstick urine pH and describe clinical significance.
  - 21.05 Discuss urinalysis techniques related to urine specific gravity techniques; calibration and use of urinometer and refractometer.
  - 21.06 Perform dipstick or tablet (nonautomated) urinalysis techniques related to performance of chemical tests.
- 22.0 Demonstrate basic knowledge of clinical chemistry, perform clinical laboratory "waived tests". – The student will be able to:
  - 22.01 Discuss and apply metric measurements in clinical chemistry.
  - 22.02 . Demonstrate knowledge and use of standard laboratory glassware and basic equipment, i.e. graduates, centrifuges, transfer pipettes
  - 22.03 *Discuss* and perform techniques of clinical chemistry related to reagent preparation, laboratory equipment and laboratory techniques.
- 23.0 Demonstrate basic knowledge of hematology, perform clinical laboratory "waived tests". – The student will be able to:
  - 23.01 Discuss techniques of hematology related to counting formed elements of blood.
  - 23.02 Perform techniques of hematology related to preparation and staining.
  - 23.03 Perform techniques of hematology related to spun hematocrit tests.

- 24.0 Discuss anatomy and physiology of the human body as it relates to the field of medical laboratory technology. – The student will be able to:
- 24.01 Identify the major body systems and their anatomical features.
  - 24.02 Explain the physiological processes in the human system necessary to influence and maintain homeostasis.
- 25.0 Discuss the general responsibilities and functions encountered by a medical technician.  
– The students will be able to:
- 25.01 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solutions of such questions.
  - 25.02 Organize and communicate the results obtained by observation and experimentation.
  - 25.03 Demonstrate ability to evaluate and draw conclusions.
  - 25.04 Demonstrate knowledge of anatomy and physiology of body systems.
  - 25.05 Demonstrate ability to report observations in written or oral form.
  - 25.06 Discuss the licensure and certification requirements of the major classifications of clinical laboratory personnel.
- 26.0 Apply quality assurance principles and safety protocols. – The student will be able to:
- 26.01 Recognize specimen suitability and determine need for rejection/recollection using factors described in clinical protocol.
  - 26.02 Describe special procedures for transporting and processing specimens.
  - 26.03 Describe clinical laboratory role in providing quality assurance in laboratory testing, reporting, and use and maintenance of equipment.
  - 26.04 Demonstrate required calibration procedures.
  - 26.05 Demonstrate and record quality control procedures required for the tests performed and recognize unacceptable results.
  - 26.06 Identify and report problems encountered in daily quality control according to standard operating procedures.
  - 26.07 Adhere to current OSHA regulations regarding laboratory hazards.
- 27.0 Demonstrate knowledge of the operation of computer systems. – The student will be able to:
- 27.01 Discuss the role of computer systems in laboratory data management.
  - 27.02 Demonstrate knowledge of common computer terminology.
  - 27.03 Demonstrate entry level computer operations for specimen accessioning, data reporting, and quality control recording.
  - 27.04 Demonstrate entry level operational skills in the use of computer-interfaced analytical instrumentation.

**PSAV Course Number: MLT0220**  
**Occupational Completion Point: C**  
**Urinalysis and Body Fluids –135 Hours – SOC Code 29-2012**

- 28.0 Demonstrate knowledge of urinalysis and body fluids principles and procedures. – The student will be able to:
- 28.01 Describe collection, transport and storage procedures for random and timed urine specimens.
  - 28.02 Discuss the renal system as it relates to urinalysis.
  - 28.03 Describe renal function tests.
  - 28.04 Describe principles of and perform routine physical and chemical analyses on urine.
  - 28.05 Prepare urine sediments and perform identification and quantitation of microscopic formed elements.
  - 28.06 Correlate abnormal physical, chemical and microscopic urine results with associated pathological conditions.
  - 28.07 Define and discuss the differences between transudates and exudates.
  - 28.08 Discuss miscellaneous body fluids to include cerebral spinal, seminal and joint fluids.
  - 28.09 Perform physical, chemical and microscopic evaluations of common body fluids.

**PSAV Course Number: MLT0335:  
Occupational Completion Point: C  
Hematology and Hemostasis -280 Hours – SOC Code 29-2012**

- 29.0 Demonstrate knowledge of hematological principles and procedures. – The student will be able to:
- 29.01 Discuss the organs, cells and cellular interaction of the lymphoids, myeloid and reticuloendothelial systems.
  - 29.02 Demonstrate an understanding of basic concepts of hematopoietic regulation, proliferation and cellular differentiation.
  - 29.03 Discuss the function of formed elements of blood.
  - 29.04 Discuss normal and abnormal hematology findings, reference ranges and associated diseases.
  - 29.05 Demonstrate an understanding of normal and abnormal molecular structure of hemoglobin, common hemoglobinopathies and associated tests.
  - 29.06 Demonstrate an understanding of disease, normal and abnormal white cell morphology, and associated tests.
  - 29.07 Discuss assessment and impact of preanalytical factors on hematology testing.
  - 29.08 Discuss the principles of and perform routine hematology procedures.
  - 29.09** . Perform techniques of manual blood smear evaluation including white blood cell differential, red cell and platelet morphology.
  - 29.10 Discuss techniques of hematology related to calculation of red blood cell indices.
- 30.0 Demonstrate knowledge of Hemostasis and related diagnostic principles and procedures. – The student will be able to:
- 30.01 Discuss and define the interactive systems necessary to maintain hemostasis.
  - 30.02 Discuss common coagulopathies and associated treatments and therapies.
  - 30.03 Discuss assessment and impact of preanalytical factors on hemostasis testing
  - 30.04 Describe the principles of and perform routine testing used in the evaluation of the vascular, platelet, coagulation and fibrinolytic systems.

- 30.05 Discuss additional hemostasis tests performed to differentiate the cause of abnormal routine tests.

**PSAV Course Number: MLT0505**  
**Occupational Completion Point: C**  
**Immunology -60 Hours – SOC Code 29-2012**

- 31.0 Demonstrate knowledge of immunology principles and procedures. – The student will be able to:
  - 31.01 Discuss the immune system and the normal immune response.
  - 31.02 Discuss physical and chemical properties of immunogens (antigens), immunoglobulins (antibodies) and complement and their *in vivo* and *in vitro* reactions.
  - 31.03 Discuss the principle of and perform the basic agglutination, flocculation and precipitation procedures in serology.
  - 31.04 Discuss principles of complement fixation, immunoelectrophoresis and enzyme immunoassay.
  - 31.05 Discuss the clinical significance of the commonly performed immunology/ tests.

**PSAV Course Number: MLT0640**  
**Occupational Completion Point: C**  
**Clinical Chemistry - 255 Hours – SOC Code 29-2012**

- 32.0 Demonstrate knowledge of clinical chemistry principles and procedures. – The student will be able to:
  - 32.01 Discuss the renal system and related chemistry tests.
  - 32.02 Discuss principles of and perform common renal function tests.
  - 32.03 Discuss carbohydrate, protein and lipid metabolism.
  - 32.04 Discuss principles of and perform commonly ordered tests related to carbohydrate, protein and lipid metabolism.
  - 32.05 Discuss the liver and its functions as related to chemistry tests.
  - 32.06 Discuss principles of and perform commonly ordered liver function tests.
  - 32.07 Discuss enzyme classification, origin, activity and function.
  - 32.08 Discuss principles of and perform commonly ordered enzyme procedures.
  - 32.09 Discuss electrolyte balance as related to health and disease.
  - 32.10 Discuss principles of and perform electrolyte analyses.
  - 32.11 Discuss principles of and perform commonly ordered tests to evaluate cardiac function.
  - 32.12 Discuss the physiology of the endocrine system and the principal tests used to evaluate endocrine function.
  - 32.13 Discuss the role of the laboratory in therapeutic drug monitoring and toxicology.
  - 32.14 Discuss and perform general electrophoresis techniques.
  - 32.15 Discuss the clinical significance of commonly ordered chemistry tests.
  - 32.16 Demonstrate knowledge of principles of instrumentation as related to the clinical chemistry laboratory.
  - 32.17 Discuss techniques of clinical chemistry related to standardization of procedure and use of standards, blanks and controls.

- 32.18 Discuss techniques of clinical chemistry related to visual colorimetry; calibration and use of the spectrophotometer
- 32.19 Discuss basic techniques of clinical chemistry related to normal and abnormal physiology.

**PSAV Course Number: MLT0520**  
**Occupational Completion Point: C**  
**Immunohematology - 255 Hours – SOC Code 29-2012**

33.0 Demonstrate knowledge of immunohematology principles and procedures. – The student will be able to:

- 33.01 Discuss basic genetics of the blood group antigens
- 33.02 Discuss the ABO blood group system
- 33.03 Discuss the Rh blood group system
- 33.04 Discuss other blood group systems
- 33.05 Perform antigen and antibody testing to determine ABO and Rh phenotypes.
- 33.06 . Discuss and perform antibody screening tests.
- 33.07 Discuss and perform antibody identification tests.
- 33.08 Discuss donor unit screening for compatibility with unexpected blood group antibodies.
- 33.09 Discuss and perform red cell antigen typing on recipient donor specimens.
- 33.10 Discuss and perform routine compatibility testing.
- 33.11 Discuss blood component collection and, preparation, storage and use.
- 33.12 Identify symptoms of and required laboratory protocol for handling suspected transfusion reactions.
- 33.13 Discuss immune hemolytic Disorders and perform the direct antiglobulin test.
- 33.14 Discuss identification of multiple antibodies in a specimen.
- 33.15 Discuss appropriate absorption and elution techniques.
- 33.16 Discuss donor interview, criteria for selection, phlebotomy preparation, and donor blood processing.
- 33.17 Discuss the principles of electronic crossmatching

**PSAV Course Number: MLT0450**  
**Occupational Completion Point: D C**  
**Microbiology and Parsitology - 275 Hours – SOC Code 29-2012**

34.0 Demonstrate knowledge of microbiological principles and procedures. – The student will be able to:

- 34.01 Discuss microbial taxonomy and nomenclature.
- 34.02 Discuss bacterial metabolism, reproduction, cell structures and their functions.
- 34.03 Discuss classification, composition and preparation of culture media.
- 34.04 Discuss the human pathogenesis of bacteria
- 34.05** Discuss and perform techniques of microbiology related to sterilization techniques.
- 34.06 Perform techniques of microbiology related to preparation of artificial culture media.

- 34.07 Perform culturing techniques for urine, stool, wound, throat, body fluids, blood and exudates.
- 34.08 Perform techniques of microbiology related to inoculation and transfer of cultures.
- 34.09 Discuss and demonstrate the use of the microscope related to laboratory procedures
- 34.10 Discuss the principles of, prepare, and interpret Gram stains.
- 34.11 Perform techniques necessary for isolation and identification of aerobic and anaerobic bacterial organisms.
- 34.12 Identify commonly encountered aerobic bacteria through morphological, physical and biochemical properties.
- 34.13 Perform and interpret antibiotic susceptibility tests.
- 34.14 Discuss collection and handling of specimens for fungal, mycobacterial and viral culture.
- 34.15 Prepare and examine specimens, and identify ova and parasites when present.

2011-2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Medical Clinical Laboratory Technician- ATD  
**ATD CIP Number:** 0317.030502  
**SOC Code(s):** 31-9099, 29-2012

When this program is offered by a community or state college, the following standards, and benchmarks apply.

**Health Careers Core: The Health Careers Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Careers Core or any other health occupations program do not have to repeat intended outcomes 01-11.**

01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:

- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
- 01.02 Identify common methods of payment for healthcare services.
- 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
- 01.04 Describe the composition and functions of a healthcare team.
- 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
- 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
- 01.07 Identify characteristics of effective teams.
- 01.08 Recognize methods for building positive team relationships.
- 01.09 Analyze attributes and attitudes of an effective leader.
- 01.10 Recognize factors and situations that may lead to conflict.
- 01.11 Demonstrate effective techniques for managing team conflict.
- 01.12 Describe factors that influence the current delivery system of healthcare.
- 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.

02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:

- 02.01 Develop basic speaking and active listening skills.
- 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
- 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
- 02.04 Respond to verbal and non-verbal cues.
- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.
- 02.06 Use appropriate medical terminology and abbreviations.

- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
  - 02.08 Recognize the importance of patient/client educations regarding healthcare.
  - 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
  - 02.10 Analyze elements of communication using a sender-receiver model.
  - 02.11 Distinguish between and report subjective and objective information.
  - 02.12 Report relevant information in order of occurrence.
- 03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:
- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
  - 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
  - 03.03 Demonstrate procedures for accurate documentation and record keeping.
  - 03.04 Interpret healthcare facility policy and procedures.
  - 03.05 Explain the “Patient’s Bill of Rights”.
  - 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
  - 03.07 Describe advance directives.
  - 03.08 Describe informed consent.
  - 03.09 Explain the laws governing harassment, labor and employment.
  - 03.10 Differentiate between legal and ethical issues in healthcare.
  - 03.11 Describe a code of ethics consistent with the healthcare occupation.
  - 03.12 Identify and compare personal, professional, and organizational ethics.
  - 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
  - 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
  - 03.15 Recognize and report abuse including domestic violence and neglect.
  - 03.16 Distinguish among the five schedules of controlled substances.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:
- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
  - 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
  - 04.03 Identify psychological reactions to illness including defense mechanisms.
  - 04.04 Identify complementary and alternative health practices.
  - 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
  - 04.06 Explain the basic concepts of positive self image, wellness and stress.
  - 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
  - 04.08 Explain the nutrition pyramid.
  - 04.09 Recognize the steps in the grief process.
- 05.0 Recognize and practice safety and security procedures. – The student will be able to:

- 05.01 Recognize safe and unsafe working conditions and report safety hazards.
  - 05.02 Demonstrate the safe use of medical equipment.
  - 05.03 Explain and apply the theory of root- cause analysis
  - 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
  - 05.05 Identify and practice security procedures for medical supplies and equipment.
  - 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions).
  - 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
  - 05.08 Demonstrate proper body mechanics and ergonomics.
  - 05.09 Demonstrate the procedure for properly identifying patients.
  - 05.10 Demonstrate procedures for the safe transport and transfer of patients.
  - 05.11 Describe fire, safety, disaster and evacuations procedures.
  - 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )
- 06.0 Recognize and respond to emergency situations. – The student will be able to:
- 06.01 Monitor and record vital signs.
  - 06.02 Describe legal parameters relating to the administration of emergency care.
  - 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
  - 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.
- 07.0 Recognize and practice infection control procedures. – The student will be able to:
- 07.01 Define principles of infection control including standard and transmission based precautions.
  - 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
  - 07.03 Demonstrate knowledge of surgical asepsis.
  - 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.
- 08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:
- 08.01 Describe technology applications in healthcare.
  - 08.02 Define terms and demonstrate basic computer skills.
  - 08.03 Recognize technology applications in healthcare.
  - 08.04 Interpret information from electronic medical documents.
  - 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.
- 09.0 Demonstrate employability skills. – The student will be able to:
- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.

- 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
  - 09.03 Identify documents that may be required when applying for a job.
  - 09.04 Write an appropriate resume.
  - 09.05 Conduct a job search.
  - 09.06 Complete a job application form correctly.
  - 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
  - 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
  - 09.09 Identify acceptable work habits.
  - 09.10 Recognize appropriate affective/professional behavior.
  - 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:
- 10.01 Recognize emerging diseases and disorders
  - 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
  - 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
  - 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
  - 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
  - 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.
- 11.0 Apply basic math and science skills. – The student will be able to:
- 11.01 Draw, read, and report on graphs, charts and tables.
  - 11.02 Measure time, temperature, distance, capacity, and mass/weight.
  - 11.03 Make, use and convert using both traditional and metric units.
  - 11.04 Make estimations and approximations and judge the reasonableness of the result.
  - 11.05 Convert from regular to 24 hour time.
  - 11.06 Demonstrate ability to evaluate and draw conclusions.
  - 11.07 Organize and communicate the results obtained by observation and experimentation.
  - 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
  - 11.09 Calculate ratios

**Phlebotomy (12-19)**

- 12.0 Demonstrate accepted professional, communication, and interpersonal skills. – The student will be able to:
- 12.01 Follow approved procedure for labeling of specimens.
  - 12.02 Demonstrate the appropriate professional behavior of a phlebotomist.
  - 12.03 Explain to the patient the procedure to be used in specimen collection.
  - 12.04 Explain in detail the importance of identifying patients correctly when drawing blood.
- 13.0 Discuss phlebotomy in relation to the health care setting. – The student will be able to:
- 13.01 List, classify and discuss various departments and services within the health care setting with which the phlebotomist must interact to obtain laboratory specimens from patients.
  - 13.02 Identify the major departments/sections within the clinical laboratory, the major types of procedures run in each department/section, and their specimen requirements.
  - 13.03 Describe roles of the major classifications of clinical laboratory personnel (i.e., pathologist, chief/administrative technologist, CLS, MT, phlebotomist, etc.).
- 14.0 Identify the anatomic structure and function of body systems in relation to services performed by phlebotomist. – The student will be able to:
- 14.01 Describe and define major body systems with emphasis on the circulatory system.
  - 14.02 List and describe the main superficial veins used in performing venipuncture.
  - 14.03 Identify appropriate sites for capillary/venipuncture and name/find the most desirable one(s).
  - 14.04 Describe the function of the following blood components: erythrocytes, thrombocytes, leukocytes, plasma, and serum.
- 15.0 Recognize and identify collection reagents supplies, equipment and interfering chemical substances. – The student will be able to:
- 15.01 Identify and discuss proper use of appropriate types of equipment needed to collect various clinical laboratory blood specimens by venipuncture.
  - 15.02 Explain the special precautions and types of equipment needed to collect blood from a neonate.
  - 15.03 Identify and discuss proper use of supplies used in collecting microspecimens.
  - 15.04 Identify and discuss the proper use of the various types of anticoagulants, preservatives and gels used in blood collection and the vacuum tube color-codes for these additives.
  - 15.05 Describe the types of patients' specimens that are analyzed in the clinical laboratory and the phlebotomist's role in collecting and/or transporting these specimens to the laboratory.
  - 15.06 Describe substances potentially encountered during phlebotomy which can interfere in analysis of blood constituents.
  - 15.07 Define and utilize correct medical terminology and metric measurement needed for specimen collection.

- 16.0 Demonstrate skills and knowledge necessary to perform phlebotomy. – The student will be able to:
- 16.01 Recognize a properly completed requisition and apply established protocol for patient and specimen identification.
  - 16.02 Discuss/perform methods for facilitating capillary/venipuncture collection.
  - 16.03 Demonstrate knowledge of established protocol for patient and specimen identification.
  - 16.04 List appropriate antiseptic agents useful in preparing sites for capillary/venipuncture.
  - 16.05 Discuss/perform appropriate methods for preparing a site for capillary or venipuncture.
  - 16.06 Perform venipuncture by evacuated tube and syringe systems, demonstrating appropriate use of supplies, proper handling of equipment and specimens, and patient care.
  - 16.07 Describe the correct order of draw during capillary and venipuncture.
  - 16.08 Perform a capillary puncture using appropriate supplies and techniques for adults, children and neonates.
  - 16.09 Describe the most common complications associated with capillary and venipuncture, their causes, prevention and treatment.
  - 16.10 Describe/perform capillary/venipuncture procedures for disposing of used or contaminated supplies.
  - 16.11 Describe/perform appropriate techniques for making a peripheral blood smear for hematologic evaluation.
- 17.0 Practice infection control following universal (standard) precautions. – The student will be able to:
- 17.01 Define the term "nosocomial infection."
  - 17.02 Describe/practice procedures for infection prevention.
  - 17.03 Discuss/perform isolation procedures.
  - 17.04 Identify potential routes of infection.
- 18.0 Practice accepted procedures of transporting, accessioning and processing specimens. – The student will be able to:
- 18.01 Describe routine procedures for transporting and processing specimens.
  - 18.02 Describe the significance of time constraints for specimen collection and delivery.
  - 18.03 Demonstrate knowledge of accessioning procedures.
  - 18.04 Aliquot specimens for testing
  - 18.05 Follow protocol for accepting verbal test orders.
- 19.0 Practice quality assurance and safety. – The student will be able to:
- 19.01 Distinguish and perform procedures which ensure reliability of test results when collecting blood specimens.
  - 19.02 Demonstrate knowledge of and practice appropriate patient safety.
  - 19.03 Practice safety in accordance with established procedures.
  - 19.04 Follow documentation procedures for work related accidents.
  - 19.05 Implement appropriate THE JOINT COMMISSION patient safety goals.

**Medical Laboratory Technician (20-34)**

- 20.0 Demonstrate basic knowledge of microbiology; perform clinical laboratory "waived tests".  
– The student will be able to:
- 20.01 Perform techniques of microbiology related to disinfection techniques.
  - 20.02 Perform techniques of microbiology related to preparation, staining.
  - 20.03 Understand the microscopic examination of gram stains.
  - 20.04 Perform basic techniques of microbiology
- 21.0 Demonstrate basic knowledge of urinalysis; perform clinical laboratory "waived tests". –  
The student will be able to:
- 21.01 Discuss urinalysis techniques related to normal and abnormal components of the urine.
  - 21.02 Perform urinalysis techniques related to collection and preservation of specimens.
  - 21.03 Discuss urinalysis techniques related to physical properties of urine and related odors, color.
  - 21.04 Perform urinalysis techniques related to dipstick urine pH and describe clinical significance.
  - 21.05 Discuss urinalysis techniques related to urine specific gravity techniques; calibration and use of urinometer and refractometer.
  - 21.06 Perform dipstick or tablet (nonautomated) urinalysis techniques related to performance of chemical tests.
- 22.0 Demonstrate basic knowledge of clinical chemistry; perform clinical laboratory "waived tests". – The student will be able to:
- 22.01 Discuss and apply metric measurements in clinical chemistry.
  - 22.02 . Demonstrate knowledge and use of standard laboratory glassware and basic equipment, i.e. graduates, centrifuges, transfer pipettes
  - 22.03 *Discuss* and perform techniques of clinical chemistry related to reagent preparation, laboratory equipment and laboratory techniques.
- 23.0 Demonstrate basic knowledge of hematology; perform clinical laboratory "waived tests".  
– The student will be able to:
- 23.01 Discuss techniques of hematology related to counting formed elements of blood.
  - 23.02 Perform techniques of hematology related to preparation and staining.
  - 23.03 Perform techniques of hematology related to spun hematocrit tests.
- 24.0 Discuss anatomy and physiology of the human body as it relates to the field of medical laboratory technology. – The student will be able to:
- 24.01 Identify the major body systems and their anatomical features.
  - 24.02 Explain the physiological processes in the human system necessary to influence and maintain homeostasis.
- 25.0 Discuss the general responsibilities and functions encountered by a medical technician.  
– The students will be able to:

- 25.01 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solutions of such questions.
  - 25.02 Organize and communicate the results obtained by observation and experimentation.
  - 25.03 Demonstrate ability to evaluate and draw conclusions.
  - 25.04 Demonstrate knowledge of anatomy and physiology of body systems.
  - 25.05 Demonstrate ability to report observations in written or oral form.
  - 25.06 Discuss the licensure and certification requirements of the major classifications of clinical laboratory personnel.
- 26.0 Apply quality assurance principles and safety protocols. – The student will be able to:
- 26.01 Recognize specimen suitability and determine need for rejection/recollection using factors described in clinical protocol.
  - 26.02 Describe special procedures for transporting and processing specimens.
  - 26.03 Describe clinical laboratory role in providing quality assurance in laboratory testing, reporting, and use and maintenance of equipment.
  - 26.04 Demonstrate required calibration procedures.
  - 26.05 Demonstrate and record quality control procedures required for the tests performed and recognize unacceptable results.
  - 26.06 Identify and report problems encountered in daily quality control according to standard operating procedures.
  - 26.07 Adhere to current OSHA regulations regarding laboratory hazards.
- 27.0 Demonstrate knowledge of the operation of computer systems. – The student will be able to:
- 27.01 Discuss the role of computer systems in laboratory data management.
  - 27.02 Demonstrate knowledge of common computer terminology.
  - 27.03 Demonstrate entry level computer operations for specimen accessioning, data reporting, and quality control recording.
  - 27.04 Demonstrate entry level operational skills in the use of computer-interfaced analytical instrumentation.
- 28.0 Demonstrate knowledge of urinalysis and body fluids principles and procedures. – The student will be able to:
- 28.01 Describe collection, transport and storage procedures for random and timed urine specimens.
  - 28.02 Discuss the renal system as it relates to urinalysis.
  - 28.03 Describe renal function tests.
  - 28.04 Describe principles of and perform routine physical and chemical analyses on urine.
  - 28.05 Prepare urine sediments and perform identification and quantitation of microscopic formed elements.
  - 28.06 Correlate abnormal physical, chemical and microscopic urine results with associated pathological conditions.
  - 28.07 Define and discuss the differences between transudates and exudates.

- 28.08 Discuss miscellaneous body fluids to include cerebral spinal, seminal and joint fluids.
- 28.09 Perform physical, chemical and microscopic evaluations of common body fluids.
- 29.0 Demonstrate knowledge of hematological principles and procedures. – The student will be able to:
  - 29.01 Discuss the organs, cells and cellular interaction of the lymphoids, myeloid and reticuloendothelial systems.
  - 29.02 Demonstrate an understanding of basic concepts of hematopoietic regulation, proliferation and cellular differentiation.
  - 29.03 Discuss the function of formed elements of blood.
  - 29.04 Discuss normal and abnormal hematology findings, reference ranges and associated diseases.
  - 29.05 Demonstrate an understanding of normal and abnormal molecular structure of hemoglobin, common hemoglobinopathies and associated tests.
  - 29.06 Demonstrate an understanding of disease, normal and abnormal white cell morphology, and associated tests.
  - 29.07 Discuss assessment and impact of preanalytical factors on hematology testing.
  - 29.08 Discuss the principles of and perform routine hematology procedures.
  - 29.09** . Perform techniques of manual blood smear evaluation including white blood cell differential, red cell and platelet morphology.
  - 29.10 Discuss techniques of hematology related to calculation of red blood cell indices.
- 30.0 Demonstrate knowledge of hemostasis and related diagnostic principles and procedures. – The student will be able to:
  - 30.01 Discuss and define the interactive systems necessary to maintain hemostasis.
  - 30.02 Discuss common coagulopathies and associated treatments and therapies.
  - 30.03 Discuss assessment and impact of preanalytical factors on hemostasis testing
  - 30.04 Describe the principles of and perform routine testing used in the evaluation of the vascular, platelet, coagulation and fibrinolytic systems.
  - 30.05 Discuss additional hemostasis tests performed to differentiate the cause of abnormal routine tests.
- 31.0 Demonstrate knowledge of immunology principles and procedures. – The student will be able to:
  - 31.01 Discuss the immune system and the normal immune response.
  - 31.02 Discuss physical and chemical properties of immunogens (antigens), immunoglobulins (antibodies) and complement and their *in vivo* and *in vitro* reactions.
  - 31.03 Discuss the principle of and perform the basic agglutination, flocculation and precipitation procedures in serology.
  - 31.04 Discuss principles of complement fixation, immunoelectrophoresis and enzyme immunoassay.
  - 31.05 Discuss the clinical significance of the commonly performed immunology/ tests.
- 32.0 Demonstrate knowledge of clinical chemistry principles and procedures. – The student will be able to:

- 32.01 Discuss the renal system and related chemistry tests.
  - 32.02 Discuss principles of and perform common renal function tests.
  - 32.03 Discuss carbohydrate, protein and lipid metabolism.
  - 32.04 Discuss principles of and perform commonly ordered tests related to carbohydrate, protein and lipid metabolism.
  - 32.05 Discuss the liver and its functions as related to chemistry tests.
  - 32.06 Discuss principles of and perform commonly ordered liver function tests.
  - 32.07 Discuss enzyme classification, origin, activity and function.
  - 32.08 Discuss principles of and perform commonly ordered enzyme procedures.
  - 32.09 Discuss electrolyte balance as related to health and disease.
  - 32.10 Discuss principles of and perform electrolyte analyses.
  - 32.11 Discuss principles of and perform commonly ordered tests to evaluate cardiac function.
  - 32.12 Discuss the physiology of the endocrine system and the principal tests used to evaluate endocrine function.
  - 32.13 Discuss the role of the laboratory in therapeutic drug monitoring and toxicology.
  - 32.14 Discuss and perform general electrophoresis techniques.
  - 32.15 Discuss the clinical significance of commonly ordered chemistry tests.
  - 32.16 Demonstrate knowledge of principles of instrumentation as related to the clinical chemistry laboratory.
  - 32.17 Discuss techniques of clinical chemistry related to standardization of procedure and use of standards, blanks and controls.
  - 32.18 Discuss techniques of clinical chemistry related to visual colorimetry; calibration and use of the spectrophotometer
  - 32.19 Discuss basic techniques of clinical chemistry related to normal and abnormal physiology.
- 33.0 Demonstrate knowledge of immunohematology principles and procedures. – The student will be able to:
- 33.01 Discuss basic genetics of the blood group antigens
  - 33.02 Discuss the ABO blood group system
  - 33.03 Discuss the Rh blood group system
  - 33.04 Discuss other blood group systems
  - 33.05 Perform antigen and antibody testing to determine ABO and Rh phenotypes.
  - 33.06 . Discuss and perform antibody screening tests.
  - 33.07 Discuss and perform antibody identification tests.
  - 33.08 Discuss donor unit screening for compatibility with unexpected blood group antibodies.
  - 33.09 Discuss and perform red cell antigen typing on recipient donor specimens.
  - 33.10 Discuss and perform routine compatibility testing.
  - 33.11 Discuss blood component collection and, preparation, storage and use.
  - 33.12 Identify symptoms of and required laboratory protocol for handling suspected transfusion reactions.
  - 33.13 Discuss immune hemolytic Disorders and perform the direct antiglobulin test.
  - 33.14 Discuss identification of multiple antibodies in a specimen.
  - 33.15 Discuss appropriate absorption and elution techniques.
  - 33.16 Discuss donor interview, criteria for selection, phlebotomy preparation, and donor blood processing.

- 33.17 Discuss the principles of electronic crossmatching
- 34.0 Demonstrate knowledge of microbiological principles and procedures. – The student will be able to:
- 34.01 Discuss microbial taxonomy and nomenclature.
  - 34.02 Discuss bacterial metabolism, reproduction, cell structures and their functions.
  - 34.03 Discuss classification, composition and preparation of culture media.
  - 34.04 Discuss the human pathogenesis of bacteria
  - 34.05** Discuss and perform techniques of microbiology related to sterilization techniques.
  - 34.06 Perform techniques of microbiology related to preparation of artificial culture media.
  - 34.07 Perform culturing techniques for urine, stool, wound, throat, body fluids, blood and exudates.
  - 34.08 Perform techniques of microbiology related to inoculation and transfer of cultures.
  - 34.09 Discuss and demonstrate the use of the microscope related to laboratory procedures
  - 34.10 Discuss the principles of, prepare, and interpret Gram stains.
  - 34.11 Perform techniques necessary for isolation and identification of aerobic and anaerobic bacterial organisms.
  - 34.12 Identify commonly encountered aerobic bacteria through morphological, physical and biochemical properties.
  - 34.13 Perform and interpret antibiotic susceptibility tests.
  - 34.14 Discuss collection and handling of specimens for fungal, mycobacterial and viral culture.
  - 34.15 Prepare and examine specimens, and identify ova and parasites when present.

2011 - 2012

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Histologic Technology  
**Career Cluster:** Health Science

	AS	AAS
CIP Number	1317030800	0317030800
Program Type	College Credit	College Credit
Standard Length	76 credit hours	76 credit hours
CTSO	HOSA	HOSA
SOC Codes (all applicable)	31-9099, 29-2011	31-9099, 29-2011
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>	
Perkins Technical Skill Attainment Inventory	<a href="http://www.fldoe.org/workforce/perkins/perkins_resources.asp">http://www.fldoe.org/workforce/perkins/perkins_resources.asp</a>	

### Purpose

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

The purpose of this program is to prepare students for employment as tissue technologists SOC Code 29-2011 (Medical and Clinical Laboratory Technologists) or histotechnicians or to provide supplemental training for persons previously or currently employed in these occupations.

The content includes but is not limited to preparation of tissue specimens of human and animal origin for research, teaching purposes, or diagnosis of body dysfunction and malignancy. A clinical component is a necessary element of this program.

### Program Structure

This program is a planned sequence of instruction consisting of 76 credit hours.

### Laboratory Activities

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these

occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

### **Special Notes**

This program meets the Department of Health HIV/AIDS Domestic Violence and Prevention of Medical Errors education requirements. Upon completion of this program, the instructor will provide a certificate to the student verifying that these requirements have been met.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635 F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

Outcomes 01-11 are referred to as the Health Careers Core and do not have to be completed if the student has previously completed the Core in another health science program. The Core should be taken first or concurrently with the first course in the program. Following the successful completion of the core, the student is eligible to take the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio

### **Career and Technical Student Organization (CTSO)**

Health Occupations Students of America, Inc. (HOSA) is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

### **Articulation**

This program has no statewide articulation agreement approved by the Articulation Coordinating Committee. However, this does not preclude the awarding of credits by any college through local agreements.

For details on statewide articulation agreements which correlate to programs and industry certifications, refer to [http://www.fldoe.org/workforce/dwdframe/artic\\_frame.asp](http://www.fldoe.org/workforce/dwdframe/artic_frame.asp).

## **Program Length**

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. The standard length of this program is 76 credit hours according to Rule 6A-14.030, F.A.C.

## **Standards**

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.
- 12.0 Identify the anatomic structure and function of body systems in relation to disease states and services performed by the histotechnician.
- 13.0 Practice quality assurance, safety, and acceptable communication skills.
- 14.0 Adhere to legal and ethical principles related to the practice of histotechnology.
- 15.0 Receive tissue specimens and perform preparation techniques as indicated.
- 16.0 Assist with frozen section procedures.
- 17.0 Maintain equipment.

2011 - 2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Histologic Technology  
**CIP Numbers:** 1317030800 AS, 0317030800 AAS  
**Program Length:** 76 credit hours  
**SOC Code(s):** 31-9099, 29-2011

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. At the completion of this program, the student will be able to:

**Health Careers Core: The Health Careers Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Careers Core or any other health occupations program do not have to repeat intended outcomes 01-11.**

01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:

- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
- 01.02 Identify common methods of payment for healthcare services.
- 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
- 01.04 Describe the composition and functions of a healthcare team.
- 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
- 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
- 01.07 Identify characteristics of effective teams.
- 01.08 Recognize methods for building positive team relationships.
- 01.09 Analyze attributes and attitudes of an effective leader.
- 01.10 Recognize factors and situations that may lead to conflict.
- 01.11 Demonstrate effective techniques for managing team conflict.
- 01.12 Describe factors that influence the current delivery system of healthcare.
- 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.

02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:

- 02.01 Develop basic speaking and active listening skills.
- 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
- 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
- 02.04 Respond to verbal and non-verbal cues.

- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.
- 02.06 Use appropriate medical terminology and abbreviations.
- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
- 02.08 Recognize the importance of patient/client educations regarding healthcare.
- 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
- 02.10 Analyze elements of communication using a sender-receiver model.
- 02.11 Distinguish between and report subjective and objective information.
- 02.12 Report relevant information in order of occurrence.

03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:

- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
- 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
- 03.03 Demonstrate procedures for accurate documentation and record keeping.
- 03.04 Interpret healthcare facility policy and procedures.
- 03.05 Explain the “Patient’s Bill of Rights”.
- 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
- 03.07 Describe advance directives.
- 03.08 Describe informed consent.
- 03.09 Explain the laws governing harassment, labor and employment.
- 03.10 Differentiate between legal and ethical issues in healthcare.
- 03.11 Describe a code of ethics consistent with the healthcare occupation.
- 03.12 Identify and compare personal, professional, and organizational ethics.
- 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
- 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
- 03.15 Recognize and report abuse including domestic violence and neglect.
- 03.16 Distinguish among the five schedules of controlled substances.

04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:

- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
- 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
- 04.03 Identify psychological reactions to illness including defense mechanisms.
- 04.04 Identify complementary and alternative health practices.
- 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
- 04.06 Explain the basic concepts of positive self image, wellness and stress.
- 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
- 04.08 Explain the nutrition pyramid.

- 04.09 Recognize the steps in the grief process.
- 05.0 Recognize and practice safety and security procedures. – The student will be able to:
  - 05.01 Recognize safe and unsafe working conditions and report safety hazards.
  - 05.02 Demonstrate the safe use of medical equipment.
  - 05.03 Explain and apply the theory of root- cause analysis
  - 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
  - 05.05 Identify and practice security procedures for medical supplies and equipment.
  - 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions.
  - 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
  - 05.08 Demonstrate proper body mechanics and ergonomics.
  - 05.09 Demonstrate the procedure for properly identifying patients.
  - 05.10 Demonstrate procedures for the safe transport and transfer of patients.
  - 05.11 Describe fire, safety, disaster and evacuations procedures.
  - 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )
- 06.0 Recognize and respond to emergency situations. – The student will be able to:
  - 06.01 Monitor and record vital signs.
  - 06.02 Describe legal parameters relating to the administration of emergency care.
  - 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
  - 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.
- 07.0 Recognize and practice infection control procedures. – The student will be able to:
  - 07.01 Define principles of infection control including standard and transmission based precautions.
  - 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
  - 07.03 Demonstrate knowledge of surgical asepsis.
  - 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.
- 08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:
  - 08.01 Describe technology applications in healthcare.
  - 08.02 Define terms and demonstrate basic computer skills.
  - 08.03 Recognize technology applications in healthcare.
  - 08.04 Interpret information from electronic medical documents.
  - 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.

09.0 Demonstrate employability skills. – The student will be able to:

- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.
- 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
- 09.03 Identify documents that may be required when applying for a job.
- 09.04 Write an appropriate resume.
- 09.05 Conduct a job search.
- 09.06 Complete a job application form correctly.
- 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
- 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
- 09.09 Identify acceptable work habits.
- 09.10 Recognize appropriate affective/professional behavior.
- 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).

10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:

- 10.01 Recognize emerging diseases and disorders
- 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
- 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
- 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
- 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
- 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.

11.0 Apply basic math and science skills. – The student will be able to:

- 11.01 Draw, read, and report on graphs, charts and tables.
- 11.02 Measure time, temperature, distance, capacity, and mass/weight.
- 11.03 Make, use and convert using both traditional and metric units.
- 11.04 Make estimations and approximations and judge the reasonableness of the result.
- 11.05 Convert from regular to 24 hour time.
- 11.06 Demonstrate ability to evaluate and draw conclusions.
- 11.07 Organize and communicate the results obtained by observation and experimentation.
- 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
- 11.09 Calculate ratios

**Histologic Technology: The following intended outcomes complete the occupational completion point for the Histologic Technology program.**

- 12.0 Identify the anatomic structure and function of body systems in relation to disease states and services performed by the histotechnician. – The student will be able to:
- 12.01 Demonstrate knowledge of human anatomy and physiology as related to histotechnology.
  - 12.02 Demonstrate knowledge of normal histology of human organs.
  - 12.03 Demonstrate knowledge of various methods of obtaining histological specimens from patients.
  - 12.04 Identify tissue structures and cellular components; relate both to physiological functions.
  - 12.05 Demonstrate knowledge of types of histological specimens usually submitted for gross and microscopic examination.
  - 12.06 Demonstrate knowledge of the processing of histologic specimens especially as related to disease processes.
  - 12.07 Demonstrate knowledge of tissue processing methods, including variety of fixatives used and how each relates to a specific entity or disease process to be diagnosed.
- 13.0 Practice quality assurance, safety and acceptable communication skills. – The student will be able to:
- 13.01 Practice quality control in the histology laboratory as required by the accrediting agency.
  - 13.02 Follow institutional policies and procedures related to safety.
  - 13.03 Practice acceptable laboratory safety.
  - 13.04 Demonstrate knowledge of diagnostic terminology.
  - 13.05 Recognize errors and their sources, and take corrective action.
  - 13.06 Demonstrate knowledge of chemical hazards within the histopathology laboratory.
  - 13.07 Demonstrate knowledge of proper disposal methods for all chemical and biological waste within the histopathology laboratory.
  - 13.08 Implement appropriate Joint Commission patient safety goals.
- 14.0 Adhere to legal and ethical principles related to the practice of histotechnology. – The student will be able to:
- 14.01 Practice discretion and confidentiality in regard to laboratory reports.
  - 14.02 Demonstrate knowledge of the histotechnician's role and responsibilities in relation to the health care team.
  - 14.03 Demonstrate knowledge of the legal ramifications of clinical practice.
- 15.0 Receive tissue specimens and perform preparation techniques as indicated. – The student will be able to:
- 15.01 Evaluate, accept, identify and label histologic specimens.
  - 15.02 Perform the most advantageous preparation and staining techniques.
  - 15.03 Solve problems in staining and preparation procedures.

- 15.04 Evaluate and implement new preparation and staining procedures.
  - 15.05 Distinguish between well-prepared and stained and poorly-prepared and stained histologic specimens.
  - 15.06 Identify tissue structures and their staining characteristics.
- 16.0 Assist with frozen section procedures. – The student will be able to:
- 16.01 Demonstrate cryostat cutting.
  - 16.02 Demonstrate rapid hematoxylin and eosin staining.
  - 16.03 Process consultation report, slides and tissue.
- 17.0 Maintain equipment. – The student will be able to:
- 17.01 Perform preventive and corrective maintenance of equipment and instruments within specified limits.
  - 17.02 Refer to appropriate person(s) for complex repairs.
  - 17.03 Demonstrate knowledge of laboratory management.

**2011-2012**

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Medical Laboratory Technology (Associate Degree)  
**Career Cluster:** Health Science

	<b>AS</b>	<b>AAS</b>
CIP Number	1317030900	0317030900
Program Type	College Credit	College Credit
Standard Length	76 credit hours	76 credit hours
CTSO	HOSA	HOSA
SOC Codes (all applicable)	29-2011, 31-9099	29-2011, 31-9099
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>	
Perkins Technical Skill Attainment Inventory	<a href="http://www.fldoe.org/workforce/perkins/perkins_resources.asp">http://www.fldoe.org/workforce/perkins/perkins_resources.asp</a>	

### **Purpose**

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

The purpose of this program is to prepare students for employment as medical/clinical laboratory technologist Soc Code 29-2011 (medical clinical laboratory technologist) or medical laboratory technologists (associate degree) or to provide supplemental training for persons previously or currently employed in these occupations.

The content includes but is not limited to specific techniques and instruments, identification of factors directly affecting procedures and results, confirmation of results and monitoring quality control programs within pre-determined parameters, and correction of errors using pre-set standards. A clinical component is a necessary element of this program.

### **Program Structure**

This program is a planned sequence of instruction consisting of 76 credit hours.

## **Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

**Clinical learning experiences in a clinical laboratory and related areas are an integral part of this program. Clinical learning experiences should reflect the full breadth of responsibilities expected of a Medical Laboratory Technician and should include appropriate experience in each of the areas of the laboratory described herein. The specified length for each of the courses listed is inclusive of clinical experience for each of the respective laboratory sections.**

## **Special Notes**

This program meets the Department of Health HIV/AIDS Domestic Violence and Prevention of Medical Errors education requirements. Upon completion of this program, the instructor will provide a certificate to the student verifying that these requirements have been met.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635 F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

Outcomes 01-11 are referred to as the Health Careers Core and do not have to be completed if the student has previously completed the Core in another health science program. The Core should be taken first or concurrently with the first course in the program. Following the successful completion of the core, the student is eligible to take the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio

## **Career and Technical Student Organization (CTSO)**

Health Occupations Students of America, Inc. (HOSA) is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

## **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

## **Articulation**

To be transferable statewide between institutions, this program must have been reviewed, and a “transfer value” assigned the curriculum content by the appropriate Statewide Course Numbering System discipline committee. This does not preclude institutions from developing specific articulation agreements with each other.

The following ATD program articulates credit into this degree program. These statewide articulation agreements have been approved by the Articulation Coordinating Committee.

Medical Laboratory Technology (0317.030502/0317.030503) – 40 credits  
Medical Laboratory technology –ATD (NEW) (0317030505) - 40 credits

For details on existing articulation agreements, refer to  
[http://www.fldoe.org/workforce/dwdframe/artic\\_frame.asp](http://www.fldoe.org/workforce/dwdframe/artic_frame.asp).

## **Program Length**

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. The standard length of this program is 76 credit hours according to Rule 6A-14.030, F.A.C.

## **Standards**

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.
- 12.0 Demonstrate accepted professional, communication and interpersonal skills.
- 13.0 Discuss phlebotomy in relation to the health care setting.
- 14.0 Identify the anatomic structure and function of body systems in relation to services performed by phlebotomist.
- 15.0 Recognize and identify collection reagents supplies, equipment and interfering chemical substances.
- 16.0 Demonstrate skills and knowledge necessary to perform phlebotomy.
- 17.0 Practice infection control following universal (standard) precautions.
- 18.0 Practice accepted procedures of transporting, accessioning and processing specimens.
- 19.0 Practice quality assurance and safety.

- 20.0 Demonstrate basic knowledge of microbiology, perform clinical laboratory "WAIVED TESTS".
- 21.0 Demonstrate basic knowledge of urinalysis, perform clinical laboratory "WAIVED TESTS".
- 22.0 Demonstrate basic knowledge of clinical chemistry, perform clinical laboratory "WAIVED TESTS".
- 23.0 Demonstrate basic knowledge of hematology, perform clinical laboratory "WAIVED TESTS".
- 24.0 Discuss anatomy and physiology of the human body as it relates to the field of Medical Laboratory Technology.
- 25.0 Discuss the general responsibilities and functions encountered by a Medical Technician.
- 26.0 Apply quality assurance principles and safety protocols.
- 27.0 Demonstrate knowledge of the operation of computer systems.
- 28.0 Demonstrate knowledge of urinalysis and body fluids principles and procedures.
- 29.0 Demonstrate knowledge of hematological principles and procedures.
- 30.0 Demonstrate knowledge of hemostasis and related diagnostic principles and procedures.
- 31.0 Demonstrate knowledge of immunological/-principles and procedures.
- 32.0 Demonstrate knowledge of clinical chemistry principles and procedures.
- 33.0 Demonstrate knowledge of immunohematological principles and procedures.
- 34.0 Demonstrate knowledge of microbiological principles and procedures.
- 35.0 Demonstrate knowledge of selected laboratory operations.
- 36.0 Demonstrate knowledge of advanced hematological principles and procedures.
- 37.0 Demonstrate knowledge of advanced hemostasis testing.
- 38.0 Demonstrate knowledge of advanced microbiological principles and procedures.
- 39.0 Demonstrate knowledge of advanced clinical chemistry principles and procedures.
- 40.0 Demonstrate knowledge of advanced immunological procedures.

2011-2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Medical Laboratory Technology (Associate Degree)  
**CIP Numbers:** 1317030900 AS, 0317030900 AAS  
**Program Length:** 76 credit hours  
**SOC Code(s):** 29-2011, 31-9099

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. At the completion of this program, the student will be able to:

**Health Careers Core: The Health Careers Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Careers Core or any other health occupations program do not have to repeat intended outcomes 01-11.**

01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:

- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
- 01.02 Identify common methods of payment for healthcare services.
- 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
- 01.04 Describe the composition and functions of a healthcare team.
- 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
- 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
- 01.07 Identify characteristics of effective teams.
- 01.08 Recognize methods for building positive team relationships.
- 01.09 Analyze attributes and attitudes of an effective leader.
- 01.10 Recognize factors and situations that may lead to conflict.
- 01.11 Demonstrate effective techniques for managing team conflict.
- 01.12 Describe factors that influence the current delivery system of healthcare.
- 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.

02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:

- 02.01 Develop basic speaking and active listening skills.
- 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
- 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
- 02.04 Respond to verbal and non-verbal cues.

- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.
- 02.06 Use appropriate medical terminology and abbreviations.
- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
- 02.08 Recognize the importance of patient/client educations regarding healthcare.
- 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
- 02.10 Analyze elements of communication using a sender-receiver model.
- 02.11 Distinguish between and report subjective and objective information.
- 02.12 Report relevant information in order of occurrence.

03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:

- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
- 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
- 03.03 Demonstrate procedures for accurate documentation and record keeping.
- 03.04 Interpret healthcare facility policy and procedures.
- 03.05 Explain the “Patient’s Bill of Rights”.
- 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
- 03.07 Describe advance directives.
- 03.08 Describe informed consent.
- 03.09 Explain the laws governing harassment, labor and employment.
- 03.10 Differentiate between legal and ethical issues in healthcare.
- 03.11 Describe a code of ethics consistent with the healthcare occupation.
- 03.12 Identify and compare personal, professional, and organizational ethics.
- 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
- 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
- 03.15 Recognize and report abuse including domestic violence and neglect.
- 03.16 Distinguish among the five schedules of controlled substances.

04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:

- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
- 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
- 04.03 Identify psychological reactions to illness including defense mechanisms.
- 04.04 Identify complementary and alternative health practices.
- 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
- 04.06 Explain the basic concepts of positive self image, wellness and stress.
- 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
- 04.08 Explain the nutrition pyramid.

- 04.09 Recognize the steps in the grief process.
- 05.0 Recognize and practice safety and security procedures. – The student will be able to:
  - 05.01 Recognize safe and unsafe working conditions and report safety hazards.
  - 05.02 Demonstrate the safe use of medical equipment.
  - 05.03 Explain and apply the theory of root- cause analysis
  - 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
  - 05.05 Identify and practice security procedures for medical supplies and equipment.
  - 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions.
  - 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
  - 05.08 Demonstrate proper body mechanics and ergonomics.
  - 05.09 Demonstrate the procedure for properly identifying patients.
  - 05.10 Demonstrate procedures for the safe transport and transfer of patients.
  - 05.11 Describe fire, safety, disaster and evacuations procedures.
  - 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )
- 06.0 Recognize and respond to emergency situations. – The student will be able to:
  - 06.01 Monitor and record vital signs.
  - 06.02 Describe legal parameters relating to the administration of emergency care.
  - 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
  - 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.
- 07.0 Recognize and practice infection control procedures. – The student will be able to:
  - 07.01 Define principles of infection control including standard and transmission based precautions.
  - 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
  - 07.03 Demonstrate knowledge of surgical asepsis.
  - 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.
- 08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:
  - 08.01 Describe technology applications in healthcare.
  - 08.02 Define terms and demonstrate basic computer skills.
  - 08.03 Recognize technology applications in healthcare.
  - 08.04 Interpret information from electronic medical documents.
  - 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.

09.0 Demonstrate employability skills. – The student will be able to:

- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.
- 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
- 09.03 Identify documents that may be required when applying for a job.
- 09.04 Write an appropriate resume.
- 09.05 Conduct a job search.
- 09.06 Complete a job application form correctly.
- 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
- 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
- 09.09 Identify acceptable work habits.
- 09.10 Recognize appropriate affective/professional behavior.
- 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).

10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:

- 10.01 Recognize emerging diseases and disorders
- 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
- 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
- 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
- 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
- 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.

11.0 Apply basic math and science skills. – The student will be able to:

- 11.01 Draw, read, and report on graphs, charts and tables.
- 11.02 Measure time, temperature, distance, capacity, and mass/weight.
- 11.03 Make, use and convert using both traditional and metric units.
- 11.04 Make estimations and approximations and judge the reasonableness of the result.
- 11.05 Convert from regular to 24 hour time.
- 11.06 Demonstrate ability to evaluate and draw conclusions.
- 11.07 Organize and communicate the results obtained by observation and experimentation.
- 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
- 11.09 Calculate ratios

**Phlebotomy (12-19)**

- 12.0 Demonstrate accepted professional, communication, and interpersonal skills. – The student will be able to:
- 12.01 Follow approved procedure for labeling of specimens.
  - 12.02 Demonstrate the appropriate professional behavior of a phlebotomist.
  - 12.03 Explain to the patient the procedure to be used in specimen collection.
  - 12.04 Explain in detail the importance of identifying patients correctly when drawing blood.
- 13.0 Discuss phlebotomy in relation to the health care setting. – The student will be able to:
- 13.01 List, classify and discuss various departments and services within the health care setting with which the phlebotomist must interact to obtain laboratory specimens from patients.
  - 13.02 Identify the major departments/sections within the clinical laboratory, the major types of procedures run in each department/section, and their specimen requirements.
  - 13.03 Describe roles of the major classifications of clinical laboratory personnel (i.e., pathologist, chief/administrative technologist, CLS, MT, phlebotomist, etc.).
- 14.0 Identify the anatomic structure and function of body systems in relation to services performed by phlebotomist. – The student will be able to:
- 14.01 Describe and define major body systems with emphasis on the circulatory system.
  - 14.02 List and describe the main superficial veins used in performing venipuncture.
  - 14.03 Identify appropriate sites for capillary/venipuncture and name/find the most desirable one(s).
  - 14.04 Describe the function of the following blood components: erythrocytes, thrombocytes, leukocytes, plasma, and serum.
- 15.0 Recognize and identify collection reagents supplies, equipment and interfering chemical substances. – The student will be able to:
- 15.01 Identify and discuss proper use of appropriate types of equipment needed to collect various clinical laboratory blood specimens by venipuncture.
  - 15.02 Explain the special precautions and types of equipment needed to collect blood from a neonate.
  - 15.03 Identify and discuss proper use of supplies used in collecting microspecimens.
  - 15.04 Identify and discuss the proper use of the various types of anticoagulants, preservatives and gels used in blood collection and the vacuum tube color-codes for these additives.
  - 15.05 Describe the types of patient's specimens that are analyzed in the clinical laboratory and the phlebotomist's role in collecting and/or transporting these specimens to the laboratory.
  - 15.06 Describe substances potentially encountered during phlebotomy which can interfere in analysis of blood constituents.

- 15.07 Define and utilize correct medical terminology and metric measurement needed for specimen collection.
- 16.0 Demonstrate skills and knowledge necessary to perform phlebotomy. – The student will be able to:
- 16.01 Recognize a properly completed requisition and apply established protocol for patient and specimen identification.
  - 16.02 Discuss/perform methods for facilitating capillary/venipuncture collection.
  - 16.03 Demonstrate knowledge of established protocol for patient and specimen identification.
  - 16.04 List appropriate antiseptic agents useful in preparing sites for capillary/venipuncture.
  - 16.05 Discuss/perform appropriate methods for preparing a site for capillary or venipuncture.
  - 16.06 Perform venipuncture by evacuated tube and syringe systems, demonstrating appropriate use of supplies, proper handling of equipment and specimens, and patient care.
  - 16.07 Describe the correct order of draw during capillary and venipuncture.
  - 16.08 Perform a capillary puncture using appropriate supplies and techniques for adults, children and neonates.
  - 16.09 Describe the most common complications associated with capillary and venipuncture, their causes, prevention and treatment.
  - 16.10 Describe/perform capillary/venipuncture procedures for disposing of used or contaminated supplies.
  - 16.11 Describe/perform appropriate techniques for making a peripheral blood smear for hematologic evaluation.
- 17.0 Practice infection control following universal (standard) precautions. – The student will be able to:
- 17.01 Define the term "nosocomial infection."
  - 17.02 Describe/practice procedures for infection prevention.
  - 17.03 Discuss/perform isolation procedures.
  - 17.04 Identify potential routes of infection.
- 18.0 Practice accepted procedures of transporting, accessioning and processing specimens. – The student will be able to:
- 18.01 Describe routine procedures for transporting and processing specimens.
  - 18.02 Describe the significance of time constraints for specimen collection and delivery.
  - 18.03 Demonstrate knowledge of accessioning procedures.
  - 18.04 Aliquot samples for testing.
  - 18.05 Follow protocol for accepting verbal test orders.
- 19.0 Practice quality assurance and safety. – The student will be able to:
- 19.01 Distinguish and perform procedures which ensure reliability of test results when collecting blood specimens.
  - 19.02 Demonstrate knowledge of and practice appropriate patient safety.
  - 19.03 Practice safety in accordance with established procedures.

- 19.04 Follow documentation procedures for work related accidents.
- 19.05 Implement appropriate THE JOINT COMMISSION patient safety goals.

### **Medical Laboratory Technician (20-34)**

- 20.0 Demonstrate basic knowledge of microbiology; perform clinical laboratory "waived tests".  
– The student will be able to:
  - 20.01 Perform techniques of microbiology related to disinfection techniques.
  - 20.02 Perform techniques of microbiology related to preparation, staining.
  - 20.03 Understand the microscopic examination of gram stains.
  - 20.04 Perform basic techniques of microbiology
- 21.0 Demonstrate basic knowledge of urinalysis; perform clinical laboratory "waived tests". –  
The student will be able to:
  - 21.01 Discuss urinalysis techniques related to normal and abnormal components of the urine.
  - 21.02 Perform urinalysis techniques related to collection and preservation of specimens.
  - 21.03 Discuss urinalysis techniques related to physical properties of urine and related odors, color.
  - 21.04 Perform urinalysis techniques related to dipstick urine pH and describe clinical significance.
  - 21.05 Discuss urinalysis techniques related to urine specific gravity techniques; calibration and use of urinometer and refractometer.
  - 21.06 Perform dipstick or tablet (nonautomated) urinalysis techniques related to performance of chemical tests.
- 22.0 Demonstrate basic knowledge of clinical chemistry, perform clinical laboratory "waived tests". – The student will be able to:
  - 22.01 Discuss and apply metric measurements in clinical chemistry.
  - 22.02 . Demonstrate knowledge and use of standard laboratory glassware and basic equipment, i.e. graduated cylinders, centrifuges, transfer pipettes
  - 22.03 *Discuss* and perform techniques of clinical chemistry related to reagent preparation, laboratory equipment and laboratory techniques.
- 23.0 Demonstrate basic knowledge of hematology, perform clinical laboratory "waived tests".  
– The student will be able to:
  - 23.01 Discuss techniques of hematology related to counting formed elements of blood.
  - 23.02 Perform techniques of hematology related to preparation and staining.
  - 23.03 Perform techniques of hematology related to spun hematocrit tests.
- 24.0 Discuss anatomy and physiology of the human body as it relates to the field of medical laboratory technology. – The student will be able to:
  - 24.01 Identify the major body systems and their anatomical features.
  - 24.02 Explain the physiological processes in the human system necessary to influence and maintain homeostasis.

25.0 Discuss the general responsibilities and functions encountered by a medical technician.

– The students will be able to:

- 25.01 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solutions of such questions.
- 25.02 Organize and communicate the results obtained by observation and experimentation.
- 25.03 Demonstrate ability to evaluate and draw conclusions.
- 25.04 Demonstrate knowledge of anatomy and physiology of body systems.
- 25.05 Demonstrate ability to report observations in written or oral form.
- 25.06 Discuss the licensure and certification requirements of the major classifications of clinical laboratory personnel.

26.0 Apply quality assurance principles and safety protocols. – The student will be able to:

- 26.01 Recognize specimen suitability and determine need for rejection/recollection using factors described in clinical protocol.
- 26.02 Describe special procedures for transporting and processing specimens.
- 26.03 Describe clinical laboratory role in providing quality assurance in laboratory testing, reporting, and use and maintenance of equipment.
- 26.04 Demonstrate required calibration procedures.
- 26.05 Demonstrate and record quality control procedures required for the tests performed and recognize unacceptable results.
- 26.06 Identify and report problems encountered in daily quality control according to standard operating procedures.
- 26.07 Adhere to current OSHA regulations regarding laboratory hazards.

27.0 Demonstrate knowledge of the operation of computer systems. – The student will be able to:

- 27.01 Discuss the role of computer systems in laboratory data management.
- 27.02 Demonstrate knowledge of common computer terminology.
- 27.03 Demonstrate entry level computer operations for specimen accessioning, data reporting, and quality control recording.
- 27.04 Demonstrate entry level operational skills in the use of computer-interfaced analytical instrumentation.

28.0 Demonstrate knowledge of urinalysis and body fluids principles and procedures. – The student will be able to:

- 28.01 Describe collection, transport and storage procedures for random and timed urine specimens.
- 28.02 Discuss the renal system as it relates to urinalysis.
- 28.03 Describe renal function tests.
- 28.04 Describe principles of and perform routine physical and chemical analyses on urine.
- 28.05 Prepare urine sediments and perform identification and quantitation of microscopic formed elements.

- 28.06 Correlate abnormal physical, chemical and microscopic urine results with associated pathological conditions.
  - 28.07 Define and discuss the differences between transudates and exudates.
  - 28.08 Discuss miscellaneous body fluids to include cerebral spinal, seminal and joint fluids.
  - 28.09 Perform physical, chemical and microscopic evaluations of common body fluids.
- 29.0 Demonstrate knowledge of hematological principles and procedures. – The student will be able to:
- 29.01 Discuss the organs, cells and cellular interaction of the lymphoids, myeloid and reticuloendothelial systems.
  - 29.02 Demonstrate an understanding of basic concepts of hematopoietic regulation, proliferation and cellular differentiation.
  - 29.03 Discuss the function of formed elements of blood.
  - 29.04 Discuss normal and abnormal hematology findings, reference ranges and associated diseases.
  - 29.05 Demonstrate an understanding of normal and abnormal molecular structure of hemoglobin, common hemoglobinopathies and associated tests.
  - 29.06 Demonstrate an understanding of disease, normal and abnormal white cell morphology, and associated tests.
  - 29.07 Discuss assessment and impact of preanalytical factors on hematology testing.
  - 29.08 Discuss the principles of and perform routine hematology procedures.
  - 29.09** . Perform techniques of manual blood smear evaluation including white blood cell differential, red cell and platelet morphology.
  - 29.10 Discuss techniques of hematology related to calculation of red blood cell indices.
- 30.0 Demonstrate knowledge of Hemostasis and related diagnostic principles and procedures. – The student will be able to:
- 30.01 Discuss and define the interactive systems necessary to maintain hemostasis.
  - 30.02 Discuss common coagulopathies and associated treatments and therapies.
  - 30.03 Discuss assessment and impact of preanalytical factors on hemostasis testing
  - 30.04 Describe the principles of and perform routine testing used in the evaluation of the vascular, platelet, coagulation and fibrinolytic systems.
  - 30.05 Discuss additional hemostasis tests performed to differentiate the cause of abnormal routine tests.
- 31.0 Demonstrate knowledge of immunology principles and procedures. – The student will be able to:
- 31.01 Discuss the immune system and the normal immune response.
  - 31.02 Discuss physical and chemical properties of immunogens (antigens), immunoglobulins (antibodies) and complement and their *in vivo* and *in vitro* reactions.
  - 31.03 Discuss the principle of and perform the basic agglutination, flocculation and precipitation procedures in serology.
  - 31.04 Discuss principles of complement fixation, immunoelectrophoresis and enzyme immunoassay.
  - 31.05 Discuss the clinical significance of the commonly performed immunology/ tests.

- 32.0 Demonstrate knowledge of clinical chemistry principles and procedures. – The student will be able to:
- 32.01 Discuss the renal system and related chemistry tests.
  - 32.02 Discuss principles of and perform common renal function tests.
  - 32.03 Discuss carbohydrate, protein and lipid metabolism.
  - 32.04 Discuss principles of and perform commonly ordered tests related to carbohydrate, protein and lipid metabolism.
  - 32.05 Discuss the liver and its functions as related to chemistry tests.
  - 32.06 Discuss principles of and perform commonly ordered liver function tests.
  - 32.07 Discuss enzyme classification, origin, activity and function.
  - 32.08 Discuss principles of and perform commonly ordered enzyme procedures.
  - 32.09 Discuss electrolyte balance as related to health and disease.
  - 32.10 Discuss principles of and perform electrolyte analyses.
  - 32.11 Discuss principles of and perform commonly ordered tests to evaluate cardiac function.
  - 32.12 Discuss the physiology of the endocrine system and the principal tests used to evaluate endocrine function.
  - 32.13 Discuss the role of the laboratory in therapeutic drug monitoring and toxicology.
  - 32.14 Discuss and perform general electrophoresis techniques.
  - 32.15 Discuss the clinical significance of commonly ordered chemistry tests.
  - 32.16 Demonstrate knowledge of principles of instrumentation as related to the clinical chemistry laboratory.
  - 32.17 Discuss techniques of clinical chemistry related to standardization of procedure and use of standards, blanks and controls.
  - 32.18 Discuss techniques of clinical chemistry related to visual colorimetry; calibration and use of the spectrophotometer
  - 32.19 Discuss basic techniques of clinical chemistry related to normal and abnormal physiology.
- 33.0 Demonstrate knowledge of immunohematology principles and procedures. – The student will be able to:
- 33.01 Discuss basic genetics of the blood group antigens
  - 33.02 Discuss the ABO blood group system
  - 33.03 Discuss the Rh blood group system
  - 33.04 Discuss other blood group systems
  - 33.05 Perform antigen and antibody testing to determine ABO and Rh phenotypes.
  - 33.06 . Discuss and perform antibody screening tests.
  - 33.07 Discuss and perform antibody identification tests.
  - 33.08 Discuss donor unit screening for compatibility with unexpected blood group antibodies.
  - 33.09 Discuss and perform red cell antigen typing on recipient donor specimens.
  - 33.10 Discuss and perform routine compatibility testing.
  - 33.11 Discuss blood component collection and, preparation, storage and use.
  - 33.12 Identify symptoms of and required laboratory protocol for handling suspected transfusion reactions.
  - 33.13 Discuss immune hemolytic Disorders and perform the direct antiglobulin test.

- 33.14 Discuss identification of multiple antibodies in a specimen.
  - 33.15 Discuss appropriate absorption and elution techniques.
  - 33.16 Discuss donor interview, criteria for selection, phlebotomy preparation, and donor blood processing.
  - 33.17 Discuss the principles of electronic crossmatching
- 34.0 Demonstrate knowledge of microbiological principles and procedures. – The student will be able to:
- 34.01 Discuss microbial taxonomy and nomenclature.
  - 34.02 Discuss bacterial metabolism, reproduction, cell structures and their functions.
  - 34.03 Discuss classification, composition and preparation of culture media.
  - 34.04 Discuss the human pathogenesis of bacteria
  - 34.05 Discuss and perform techniques of microbiology related to sterilization techniques.
  - 34.06 Perform techniques of microbiology related to preparation of artificial culture media.
  - 34.07 Perform culturing techniques for urine, stool, wound, throat, body fluids, blood and exudates.
  - 34.08 Perform techniques of microbiology related to inoculation and transfer of cultures.
  - 34.09 Discuss and demonstrate the use of the microscope related to laboratory procedures
  - 34.10 Discuss the principles of, prepare, and interpret Gram stains.
  - 34.11 Perform techniques necessary for isolation and identification of aerobic and anaerobic bacterial organisms.
  - 34.12 Identify commonly encountered aerobic bacteria through morphological, physical and biochemical properties.
  - 34.13 Perform and interpret antibiotic susceptibility tests.
  - 34.14 Discuss collection and handling of specimens for fungal, mycobacterial and viral culture.
  - 34.15 Prepare and examine specimens, and identify ova and parasites when present.

**Medical Laboratory Technology (Associate Degree) - The following intended outcomes (37-42), in addition to the outcomes for the program of Medical Laboratory Technology (Certificate), complete the competencies for the Medical Laboratory Technology (Associate Degree) program.**

- 35.0 Demonstrate knowledge of selected laboratory operations. – The student will be able to:
- 35.01 Apply principles of quality assurance to correct problems encountered in monitoring daily quality control.
  - 35.02 Evaluate laboratory findings and take necessary action to confirm or clarify results according to standard operation and procedure.
  - 35.03 Demonstrate knowledge of operation and principles of laboratory instruments.
- 36.0 Demonstrate knowledge of advanced hematological principles and procedures. – The student will be able to:

- 36.01 Identify normal and abnormal, immature and mature erythrocytes at each stage of maturation.
  - 36.02 Identify and distinguish between normal, atypical and leukemic leukocytes at each stage of maturation.
  - 36.03 Perform selected cytochemical staining procedures.
  - 36.04 Discuss the principle of and perform hemoglobin electrophoresis with pattern interpretation.
- 37.0 Demonstrate knowledge of advanced hemostasis testing. –The student will be able to:
- 37.01 Discuss the principle of substitution testing for factor deficiencies.
  - 37.02 Discuss the principle of specific factor assays.
  - 37.03 Correlate the laboratory test results for fibrinolysis with conditions affecting the fibrinolytic system.
  - 37.04 Discuss specialized platelet function tests.
  - 37.05 Correlate laboratory results with possible inherited and/or acquired coagulation abnormalities.
- 38.0 Demonstrate knowledge of advanced microbiological principles and procedures. – The student will be able to:
- 38.01 Discuss procedures for and clinical significance of anaerobe identification.
  - 38.02 Classify fungi and state their clinical significance.
  - 38.03 Perform general techniques used in identifying fungi.
  - 38.04 Identify selected fungi.
  - 38.05 Discuss and perform automated microbiological procedures.
  - 38.06 Identify life cycles, modes of transmission, prevention and pathophysiology of clinically significant parasites.
  - 38.07 Discuss microbial and immunological techniques to identify selected clinically significant viruses.
  - 38.08 Discuss classification and related disease states of clinically significant viruses.
  - 38.09 Identify commonly used antibiotics, their usage and mechanisms of activity.
- 39.0 Demonstrate knowledge of advanced clinical chemistry principles and procedures. – The student will be able to:
- 39.01 Perform, calculate, analyze and recognize normal/abnormal electrophoresis procedures.
  - 39.02 Perform and calculate results of immunoassay procedures.
  - 39.03 Perform, calculate, and recognize associated disease states for selected isoenzyme assays.
  - 39.04 Perform, calculate, and recognize associated disease states for blood lipid profiles.
  - 39.05 Perform and calculate selected procedures related to endocrine function.
  - 39.06 Perform selected assays for therapeutic and toxic substances.
  - 39.07 Discuss the principles and procedures of blood gas analysis, including arterial specimen collection and clinical significance.
- 40.0 Demonstrate knowledge of advanced immunological procedures. – The student will be able to:

- 40.01 Discuss selected specialty serological tests such as immunofluorescence assays.
- 40.02 Discuss and interpret antinuclear antibody patterns and their relationship to disease states.

2011-2012

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Health Information Management  
**Career Cluster:** Health Science

	<b>AS</b>	<b>AAS</b>
CIP Number	1317050600	0317050600
Program Type	College Credit	College Credit
Standard Length	67 credit hours	67 credit hours
CTSO	HOSA	HOSA
SOC Codes (all applicable)	31-9099, 29-2071	31-9099, 29-2071
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>	
Perkins Technical Skill Attainment Inventory	<a href="http://www.fldoe.org/workforce/perkins/perkins_resources.asp">http://www.fldoe.org/workforce/perkins/perkins_resources.asp</a>	

### **Purpose**

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

This program is designed to prepare students for employment as Health Information Technicians, Medical Record Technicians SOC Code 29-2071 (Medical Records and Health Information Technicians), or to provide supplemental training for persons previously or currently employed in these occupations. It prepares the student to take the national accreditation examination for Registered Health Information Technicians (RHIT). The program should meet the program standards and guidelines of the Commission on Accreditation of Health Informatics and Information Management (CAHIIM) in collaboration with the American Health Information Management Association (AHIMA). The program should encompass the AHIMA established knowledge clusters and entry-level competencies for Registered Health Information Technicians (RHIT's).

The content includes but is not limited to health information management, ethical and medico-legal aspects, computer information technology for health records, biomedical sciences, including anatomy and physiology, medical terminology, pharmacology and pathophysiology, health record science, computer applications, word processing, data base management, and spreadsheet, health data content, analysis and structure, statistics and data literacy, coding, clinical classification systems, reimbursement methodologies, quality assessment and

performance improvement, health care delivery systems, indexing, organization and supervision, professional practice experience, and employability skills.

### **Program Structure**

This program is a planned sequence of instruction consisting of 67 credit hours.

### **Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

### **Special Notes**

This program must be taught in accordance with the accrediting standards of: Commission on Accreditation of Health Informatics and Information Management (CAHIIM) in collaboration with the American Health Information Management Association (AHIMA), 233 North Michigan Ave., Suite 2150, Chicago, IL 60601-5800 (312/233-1100).

Students should be encouraged to join the (AHIMA) American Health Information Management Association and/or (AAPC) American Academy of Professional Coders and participate in the state/local association.

Outcomes 01-11 are referred to as the Health Information Technology core and do not have to be completed if the students has previously completed the core in another program at any level. The Core should be taken first or concurrently with the first course in the program.

### **Career and Technical Student Organization (CTSO)**

Health Occupations Students of America, Inc. (HOSA) is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

## **Articulation**

To be transferable statewide between institutions, this program must have been reviewed, and a “transfer value” assigned the curriculum content by the appropriate Statewide Course Numbering System discipline committee. This does not preclude institutions from developing specific articulation agreements with each other.

The following ATD programs articulate credit into this degree program. These statewide articulation agreements have been approved by the Articulation Coordinating Committee.

Medical Coder/Biller (0317050605/0317050603) – 26 credit hours  
Medical Record Transcribing (0317.050606/0317.050604) – 33 credit hours

For details on existing articulation agreements, refer to [http://www.fldoe.org/workforce/dwdframe/artic\\_frame.asp](http://www.fldoe.org/workforce/dwdframe/artic_frame.asp).

## **Program Length**

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. The standard length of this program is 67 credit hours according to Rule 6A-14.030, F.A.C.

## **Certificate Programs**

A College Credit Certificate consists of a program of instruction of less than sixty (60) credits of college-level courses, which is part of an AS or AAS degree program and prepares students for entry into employment (Rule 6A-14.030, F.A.C.). This AS/AAS degree program includes the following College Credit Certificates:

Healthcare Informatics Specialist (0317.050611) – 18 credit hours  
Medical Information Coder/Biller (0317050607) – 34 credit hours

The following ATD programs articulate credit into this degree program. These statewide articulation agreements have been approved by the Articulation Coordinating Committee.

Medical Coder/Biller (0317050605) – 26 credit hours  
Medical Record Transcribing (0317.050606) – 33 credit hours

For details on existing articulation agreements, refer to [http://www.fldoe.org/workforce/dwdframe/artic\\_frame.asp](http://www.fldoe.org/workforce/dwdframe/artic_frame.asp).

Standards for the above certificate programs are contained in separate curriculum frameworks.

## **Standards**

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate an understanding of the healthcare delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Explore health informatics and information management as a profession.
- 04.0 Demonstrate an understanding of health data concepts.
- 05.0 Describe the functions of a health record
- 06.0 Demonstrate a basic understanding of Health Information Technology.
- 07.0 Discuss classification systems, clinical vocabularies and terminologies.
- 08.0 Explore ethical issues in Health Informatics and Information Management
- 09.0 Identify the importance of privacy and health records law in healthcare.
- 10.0 Demonstrate computer knowledge and skills
- 11.0 Demonstrate employability skills.
- 12.0 Describe the anatomy and physiology of the human body.
- 13.0 Demonstrate an understanding of the fundamentals of disease process in relationship to the human body, including pharmacology.
- 14.0 Manage health data.
- 15.0 Demonstrate proficiency in clinical classification systems.
- 16.0 Use medical references.
- 17.0 Manage healthcare statistics, including biomedical research and quality.
- 18.0 Utilize appropriate health services organization and delivery system regulations.
- 19.0 Utilize appropriate information technology and systems
- 20.0 Manage organizational resources

2011-2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Health Information Management  
**CIP Numbers:** 1317050600 AS, 0317050600 AAS  
**Program Length:** 67 credit hours  
**SOC Code(s):** 31-9099, 29-2071

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. At the completion of this program, the student will be able to:

Outcomes 01-11 are referred to as the Health Information Technology core and do not have to be completed if the students has previously completed the core in another program at any level. The Core should be taken first or concurrently with the first course in the program.

- 01.0 Demonstrate an understanding of the healthcare delivery system and health occupations.
- 01.01 Discuss the evolution of health care.
  - 01.02 Demonstrate an understanding of the infrastructure of healthcare in the United States.
  - 01.03 Discuss regulatory agencies and organizations within the healthcare delivery system
  - 01.04 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:
- 02.01 Develop basic speaking and active listening skills.
  - 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
  - 02.03 Identify characteristics of successful and unsuccessful communication including barriers.
  - 02.04 Respond to verbal and non-verbal cues.
  - 02.05 Compose written communication using correct spelling, grammar, formatting and confidentiality.
  - 02.06 Use appropriate medical terminology and abbreviations.
  - 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
  - 02.08 Recognize the importance of patient/client educations regarding healthcare.
  - 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
  - 02.10 Recognize elements of communication using a sender-receiver model.
  - 02.11 Distinguish between and report subjective and objective information.
  - 02.12 Report relevant information in order of occurrence.
- 03.0 Explore health informatics and information management as a profession.
- 03.01 Discuss the history of health information management.

- 03.02 Discuss the professional opportunities within the health information management profession.
- 03.03 Demonstrate knowledge of professional associations within HIM.
- 04.0 Demonstrate an understanding of health data concepts.
  - 04.01 Describe the various uses of health data.
  - 04.02 Describe various characteristics of data quality.
- 05.0 Describe the functions of a health record
  - 05.01 Demonstrate an understanding of the various formats of the health record.
  - 05.02 Explain the various uses of a health record.
  - 05.03 Follow medical records policies and procedures for security, including confidentiality.
- 06.0 Demonstrate a basic understanding of Health Information Technology.
  - 06.01 Discuss how healthcare reform legislation can and does affect the HIT field.
  - 06.02 Interpret information from Electronic Health Records (EHR) and applications in healthcare
  - 06.03 Demonstrate an understanding of creation, use, and purpose of the electronic health record.
- 07.0 Discuss classification systems, clinical vocabularies and terminologies.
  - 07.01 Demonstrate knowledge of administrative terminologies as they relate to HIM.
  - 07.02 Demonstrate knowledge of clinical terminologies as they relate to HIM.
- 08.0 Explore ethical issues in Health Informatics and Information Management
  - 08.01 Describe the code of ethics consistent with healthcare occupations.
  - 08.02 Recognize ethical issues related to health information technology.
  - 08.03 Recognize ethical issues related to coding and billing/medical transcription.
- 09.0 Identify the importance of privacy and health records law in healthcare.
  - 09.01 Identify standards of the Health Insurance Portability and Accountability Act (HIPAA).
  - 09.02 Define and explain how to create a legal patient record.
- 10.0 Demonstrate computer knowledge and skills
  - 10.01 Demonstrate keyboarding skills
  - 10.02 Demonstrate the ability to save files and retrieve files from your computer.
  - 10.03 Demonstrate ability to connect to the internet
  - 10.04 Demonstrate ability to perform research on the internet by identifying reliable websites.
  - 10.05 Demonstrate ability to send and receive e-mail.
  - 10.06 Demonstrate ability to send messages with attached files.
  - 10.07 Demonstrate ability in word processing to create, edit, save, and print a Microsoft Word document.
  - 10.08 Demonstrate the ability to create and present a Microsoft PowerPoint project.
- 11.0 Demonstrate employability skills. – The student will be able to:
  - 11.01 Identify personal traits or attitudes desirable in a member of the healthcare team.

- 11.02 Define basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. courtesy and self-introductions).
- 11.03 Identify documents that may be required when applying for a job.
- 11.04 Write an appropriate resume.
- 11.05 Conduct a job search.
- 11.06 Complete a job application form correctly.
- 11.07 Demonstrate competence in job interview techniques.
- 11.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
- 11.09 Identify acceptable work habits.
- 11.10 Recognize appropriate affective/professional behavior.
- 11.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).

### **Health Information Management SOC Code 29-2071 (Medical Records and Health Information Technicians)**

- 12.0 Describe the anatomy and physiology of the human body. – The student will be able to:
  - 12.01 Describe the structure and function of the respiratory system.
  - 12.02 Describe the structure and function of the cardio-vascular system.
  - 12.03 Describe the structure and function of the muscular-skeletal system.
  - 12.04 Describe the structure and function of nervous, skin, and sensory systems.
  - 12.05 Describe the structure and function of the reproductive system.
  - 12.06 Describe the structure and function of the urinary system.
  - 12.07 Describe the structure and function of the digestive system.
  - 12.08 Describe the structure and function of the endocrine system.
- 13.0 Demonstrate an understanding of the fundamentals of disease process in relationship to the human body, including pharmacology. – The student will be able to:
  - 13.01 Demonstrate an understanding of the predisposing factors and direct causes of disease as they relate to the human body.
  - 13.02 Demonstrate an understanding of the general morphology of organisms and their role in the disease process.
  - 13.03 Demonstrate an understanding of the pathogenesis of diseases of all the body systems.
- 14.0 Manage health data. –The student will be able to:
  - 14.01 Collect and maintain health data (such as data elements, data sets, and databases).
  - 14.02 Conduct analysis to ensure documentation in the health record supports the diagnosis and reflects the patient's progress, clinical findings, and discharge status.
  - 14.03 Apply policies and procedures to ensure the accuracy of health data.
  - 14.04 Utilize correct clinical vocabulary and terminology.

- 14.05 Verify timelines, completeness, accuracy, and appropriateness of data and data sources for patient care, management, billing reports, registries, and/or databases.
- 14.06 Maintain healthcare information requirements and standards.
- 15.0 Demonstrate proficiency in clinical classification systems. –The student will be able to:
  - 15.01 Use and maintain electronic applications and work processes to support classification and coding
  - 15.02 Apply diagnosis/procedure codes using ICD-9-CM.
  - 15.03 Apply procedure codes using CPT/HCPCS.
  - 15.04 Ensure accuracy of diagnostic/procedural groupings such as DRG, APC, etc.
  - 15.05 Adhere to current regulations and established guidelines in code assignment.
  - 15.06 Validate coding accuracy using clinical information found in the health record.
  - 15.07 Use and maintain applications and processes to support other clinical classification and nomenclature systems (such as ICD-10-CM, SNOMED etc.)
  - 15.08 Resolve discrepancies between coded data and supporting documentation.
  - 15.09 Apply policies and procedures for the use of clinical data required in reimbursement and prospective payment systems (PPS) in healthcare delivery.
  - 15.10 Support accurate billing through coding, chargemaster, claims management, and bill reconciliation processes.
  - 15.11 Use established guidelines to comply with reimbursement and reporting requirements such as the National Correct Coding initiative.
  - 15.12 Compile patient data and perform data quality reviews to validate code assignment and compliance with reporting requirements such as outpatient prospective payment systems.
- 16.0 Utilize medical references. – The student will be able to:
  - 16.01 Use medical dictionaries.
  - 16.02 Identify and use trade generic and chemical drug names utilizing reference sources.
  - 16.03 Identify and use diagnostic test terminology.
- 17.0 Manage healthcare statistics, including biomedical research and quality. –The student will be able to:
  - 17.01 Abstract and maintain data for clinical indices/databases/registries.
  - 17.02 Collect, organize, and present data for quality management, utilization management, risk management, and other related studies.
  - 17.03 Compute and interpret healthcare statistics.
  - 17.04 Apply institutional Review Board (IRB) processes and policies.
  - 17.05 Use specialized databases to meet specific organization needs such as medical research and disease registries.
  - 17.06 Abstract and report data for facility wide quality management and performance improvement programs.
  - 17.07 Analyze clinical data to identify trends that demonstrate quality, safety, and effectiveness of healthcare.

- 18.0 Utilize appropriate health services organization and delivery system regulations. – The student will be able to:
- 18.01 Apply information system policies and procedures required by national health information initiatives on the healthcare delivery system.
  - 18.02 Apply current laws, accreditation, licensure, and certification standards related to health information initiatives from the national, state, local, and facility levels.
  - 18.03 Apply policies and procedures to comply with the changing regulations among various payment systems for healthcare services such as Medicare, Medicaid, managed care, etc.
  - 18.04 Differentiate the roles of various providers and disciplines throughout the continuum of healthcare and respond to their information needs.
  - 18.05 Describe how to monitor and re-adjust workflow as necessary.
  - 18.06 Participate in the implementation of legal and regulatory requirements related to the health information infrastructure.
  - 18.07 Apply policies and procedures for access and disclosure of personal health information.
  - 18.08 Release patient-specific data to authorized users.
  - 18.09 Maintain user access logs/systems to track access to and disclosure of identifiable patient data.
  - 18.10 Conduct privacy and confidentiality training programs.
  - 18.11 Investigate and recommend solutions to privacy issues/problems.
  - 18.12 Apply and promote ethical standards of practice.
  - 18.13 Implement appropriate JCAHO patient safety goals.
- 19.0 Utilize appropriate information technology and systems. – The student will be able to:
- 19.01 Use technology, including hardware and software, to ensure data collection, storage, analysis and reporting of information.
  - 19.02 Use common software application such as spreadsheets, databases, word processing, graphics, presentation, e-mail, etc. in the execution of work processes.
  - 19.03 Use specialized software in the completion of HIM processes such as record tracking, release of information, coding, grouping, registries, billing, quality improvement, and imaging.
  - 19.04 Apply policies and procedures to the use of networks, including internet and intranet applications to facilitate the electronic health record (HER), personal health record (PHR), public health and other administrative applications.
  - 19.05 Apply knowledge of data base architecture and design (such as data dictionary, data modeling, data warehousing) to meet departmental needs.
  - 19.06 Use appropriate electronic or imaging technology for data/record storage.
  - 19.07 Query and generate reports to facilitate information retrieval.
  - 19.08 Design and generate reports to facilitate information retrieval.
  - 19.09 Maintain archival and retrieval systems for patient information stored in multiple formats.
  - 19.10 Coordinate, use, and maintain systems for document imaging and storage.
- 20.0 Manage Organizational Resources
- 20.01 Apply and organize roles and functions of teams and committees
  - 20.02 Adapt communication and interpersonal abilities

- 20.03 Illustrate team leadership techniques
- 20.04 Design training and orientation programs.
- 20.05 Facilitate continuing education programs.
- 20.06 Identify the components of workflow and process monitors
- 20.07 Prioritize job functions and productivity criteria and communicate the resulting outcomes
- 20.08 Compose organizational plans, budgets, and proposals.
- 20.09 Create and maintain monitors for employee performance, the revenue cycle, and resource allocation

Basic Skills Level	Mathematics: 10 Language: 11 Reading: 11	

### **Purpose**

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

The program is designed to prepare students for employment in a variety of health care settings as entry level coder, medical record coder, coding technician, or coding clerks, or medical coder/billers or SOC Code 29-2071 (Medical Records and Health Information Technicians)

The content includes but is not limited to medical terminology, anatomy and physiology, coding systems, fundamentals of disease process including pharmacology, health care delivery systems, basics of medical records services, ethical and legal responsibilities, safety/security procedures, basic data processing, and employability skills.

### **Program Structure**

This program is an Applied Technology Diploma program that is part of a technical degree program, is less than 60 credit hours, and leads to employment in a specific occupation. An applied technology diploma program may consist of either technical credit or college credit. A public school district may offer an applied technology diploma program only as technical credit, with college credit awarded to a student upon articulation to a community college.

**PSAV Program**

When offered at the district level, this program is a planned sequence of instruction consisting of two occupational completion points and the courses as shown below.

OCP	Course Number	Course Title	Course Length	SOC Code
A	HIM0009	Introduction to Health Information Technology*	90 hours	29-2099
B	HIM0071	Medical Coder/Biller 1	300 hours	29-2071
	HIM0072	Medical Coder/Biller 2	300 hours	29-2071
	HIM0073	Medical Coder/Biller 3	310 hours	29-2071

\* Students who have taken the Health core (HSC0003) previously as part of this program are not required to take HIM0009 to complete the program. These students should continue on to OCP B. Beginning in 2011-12 new students should be enrolled in HIM0009 as the first course in the program.

**Community College**

When offered at the community college level, this ATD program is part of the Health Information Management (1317.050600) and has a program length of 26 credits.

**Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

**Special Notes**

Either a community college or school district may offer the Applied Technology Diploma program. When offered at the community college, college credit shall be awarded for completion of this program. When offered at the school district, vocational credit will be awarded. Vocational credit will be converted to college credit upon transfer to the AS degree at the community college.

Faculty teaching this program must have a minimum of a bachelor's degree in the specialty area.

Students should be encouraged to become members and participate in the activities of the professional organizations: American Health Information Management Association and/or American Academy of Procedural Coders.

#### About AHIMA Credentials:

Completers of the Medical Biller Coder program may take the Certified Coding Associate (CCA) credential exam as the first step in their coding career. The CCA is an entry-level credential that distinguishes new coders in the job market. Individuals with a CCA credential:

- Exhibit a level of commitment, competency, and professional capability usually absent in a newcomer to the field
- Demonstrate a commitment to the coding profession
- Distinguish themselves from non-credentialed coders and those holding credentials from other organizations less demanding of the higher level of expertise required to earn AHIMA certification.

The CCA should be viewed as the starting point for an individual entering a career as a coder. The AHIMA CCS and CCS-P exams demonstrate mastery level skills in coding. Most individuals challenge the CCS or CCS-P exams after two or more years of work experience in coding.

American Health Information Management Association  
919 North Michigan Ave. Suite 2150  
Chicago, IL. 60611-5519  
312/233-1100

The American Academy of Professional Coders (AAPC) sponsors a certification exam for coders with expertise in physician-based settings which leads to the title of Certified Professional Coder (CPC) or Certified Professional Coder Hospital (CPC-H).

American Academy of Professional Coders  
309 West 700 South  
Salt Lake City, UT. 84101  
1-800-626-2633

The National Healthcare Association also offers a national certification examination for a Certified Billing and Coding Specialist (CBCS).

National Healthcareer Association  
7500 West 160<sup>th</sup> Street  
Stilwell, Kansas 66085  
800-499-9092  
[www.nhanow.com](http://www.nhanow.com)

Outcomes 01-11 are referred to as the Health Information Technology core and do not have to be completed if the students has previously completed the core in another program at any level. The Core should be taken first or concurrently with the first course in the program.

#### **Career and Technical Student Organization (CTSO)**

Health Occupations Students of America, (HOSA) Inc. is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

## **Basic Skills**

In PSAV programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C. the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Mathematics 10, Language 11, and Reading 11. These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination. Students may be exempt from meeting the Basic Skills requirements by earning an eligible industry certification. See the Basic Skills Exemption List document for a list of eligible industry certifications (<http://www.fldoe.org/workforce/dwdframe/rtf/basic-skills.rtf>).

Adult students with disabilities, as defined in Section 1004.02(7), Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01(3)(a), F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91(3), F.S.

Students who possess a college degree at the Associate of Applied Science level or higher; who have completed or are exempt from the college entry-level examination pursuant to Section 1008.29, F.S.; or who have passed a state, national, or industry licensure exam are exempt from meeting the Basic Skills requirement (Rule 6A-10.040, F.A.C.)

## **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Some secondary students with disabilities (ESE) may need additional time (i.e., longer than the regular school year), to master the student performance standards associated with a regular occupational completion point (OCP) or a modified occupational completion point (MOCP). If needed, a student may enroll in the same career and technical course more than once. Documentation should be included in the IEP that clearly indicates that it is anticipated that the student may need an additional year to complete an OCP/MOCP. The student should work on different competencies and new applications of competencies each year toward completion of the OCP(s)/MOCP. After achieving the competencies identified for the year, the student earns credit for the course. It is important to ensure that credits earned by students are reported accurately. The district's information system must be designed to accept multiple credits for the same course number (for eligible students with disabilities). For further information, see Rule 6A-6.0312, F.A.C., Course Modifications for Exceptional Students, and the latest pertinent Technical Assistance Paper (<http://www.fldoe.org/ese/tap-home.asp>).

## **Articulation**

The information related to the guaranteed transfer of credit between an applied technology diploma program and AS/AAS degree must be documented and maintained by the Articulation Coordinating Committee (ACC). The transfer of the applied technology diploma to an AS/AAS degree is guaranteed for a period of three (3) years following the date of the award of the applied technology diploma.

## **Program Length**

In accordance with Rule 6A-10.024, F.A.C. an Applied Technology Diploma program consists of a course of study that is part of an AS/AAS degree program, is less than 60 credit hours, is approximately 50% of the technical component (non-general education), and leads to employment in a specific occupation. An applied technology diploma program may consist of either technical credit or college credit.

Students must have a high school diploma, a GED, or a certificate of completion to be admitted to an applied technology diploma program. Within six weeks of entry, students in ATD programs of 450 or more hours must be tested pursuant to Rule 6A-10.040, F.A.C. and if below minimum standards for completion from the program, must receive remedial instruction. The minimum standards must be at least the equivalent of a score of ten (10) on all sections of basic skills test approved in Rule 6A-10.040, F.A.C. Students must successfully complete all remedial instruction before completing the Applied Technology Diploma.

Community Colleges may offer either college or career credit toward the applied technology diploma. A Career Center in a public school district may offer an applied technology diploma program only as technical credit, with college credit awarded to a student upon articulation to a community college (Section 1004.02, F.S.)

When offered at a community college the standard length of this program is 26 credits. When offered at a technical center the standard length of this program is 1000 clock hours.

In accordance with Rule 6A-10.024, F.A.C. all faculty providing instruction must have at least a baccalaureate degree or an associate degree with demonstrated competencies in the specific instructional program as defined by the Southern Association of Colleges and Schools.

## **Standards**

After successfully completing this program the student will be able to perform the following:

- 01.0 Demonstrate an understanding of the healthcare delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Explore health informatics and information management as a profession.
- 04.0 Demonstrate an understanding of health data concepts.
- 05.0 Describe the functions of a health record
- 06.0 Demonstrate a basic understanding of Health Information Technology.
- 07.0 Discuss classification systems, clinical vocabularies and terminologies.
- 08.0 Explore ethical issues in Health Informatics and Information Management
- 09.0 Identify the importance of privacy and health records law in healthcare.
- 10.0 Demonstrate computer knowledge and skills

- 11.0 Demonstrate employability skills.
- 12.0 Describe the anatomy and physiology of the human body.
- 13.0 Demonstrate proficiency in the application of medical terminology.
- 14.0 Demonstrate an understanding of the fundamentals of disease process in relationship to the human body, including pharmacology.
- 15.0 Demonstrate proficiency in the use of ICD and CPT coding systems, both manual and automated.
- 16.0 Demonstrate proficiency in ICD coding complexities
- 17.0 Utilize medical coding references.
- 18.0 Explain the basics of health information services.
- 19.0 Demonstrate ethical and legal principles with regard to the use of medical records.
- 20.0 Demonstrate understanding of medical billing.

2011-2012

**Florida Department of Education  
Student Performance Standards**

**Program Title: Medical Coder/Biller**  
**PSAV Number: H170528**

When this program is offered at the PSAV level, the following organization of courses, standards, and benchmarks apply.

Outcomes 01-11 are referred to as the Health Information Technology core and do not have to be completed if the students has previously completed the core in another program at any level. The Core should be taken first or concurrently with the first course in the program.

**PSAV Course Number: HIM0009**  
**Occupational Completion Point: A**  
**Basic Health Information Technician– 90 Hours – SOC Code 29-2099**

- 01.0 Demonstrate an understanding of the healthcare delivery system and health occupations. – The student will be able to:
- 01.01 Discuss the evolution of health care.
  - 01.02 Demonstrate an understanding of the infrastructure of healthcare in the United States.
  - 01.03 Discuss regulatory agencies and organizations within the healthcare delivery system
  - 01.04 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:
- 02.01 Develop basic speaking and active listening skills.
  - 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
  - 02.03 Identify characteristics of successful and unsuccessful communication including barriers.
  - 02.04 Respond to verbal and non-verbal cues.
  - 02.05 Compose written communication using correct spelling, grammar, formatting and confidentiality.
  - 02.06 Use appropriate medical terminology and abbreviations.
  - 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
  - 02.08 Recognize the importance of patient/client educations regarding healthcare.
  - 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
  - 02.10 Recognize elements of communication using a sender-receiver model.
  - 02.11 Distinguish between and report subjective and objective information.
  - 02.12 Report relevant information in order of occurrence.

- 03.0 Explore health informatics and information management as a profession. – The student will be able to:
  - 03.01 Discuss the history of health information management.
  - 03.02 Discuss the professional opportunities within the health information management profession.
  - 03.03 Demonstrate knowledge of professional associations within HIM.
  
- 04.0 Demonstrate an understanding of health data concepts. – The student will be able to:
  - 04.01 Describe the various uses of health data.
  - 04.02 Describe various characteristics of data quality.
  
- 05.0 Describe the functions of a health record – The student will be able to:
  - 05.01 Demonstrate an understanding of the various formats of the health record.
  - 05.02 Explain the various uses of a health record.
  - 05.03 Follow medical records policies and procedures for security, including confidentiality.
  
- 06.0 Demonstrate a basic understanding of Health Information Technology. – The student will be able to:
  - 06.01 Discuss how healthcare reform legislation can and does affect the HIT field.
  - 06.02 Interpret information from Electronic Health Records (EHR) and applications in healthcare
  - 06.03 Demonstrate an understanding of creation, use, and purpose of the electronic health record.
  
- 07.0 Discuss classification systems, clinical vocabularies and terminologies. – The student will be able to:
  - 07.01 Demonstrate knowledge of administrative terminologies as they relate to HIM.
  - 07.02 Demonstrate knowledge of clinical terminologies as they relate to HIM.
  
- 08.0 Explore ethical issues in Health Informatics and Information Management – The student will be able to:
  - 08.01 Describe the code of ethics consistent with healthcare occupations.
  - 08.02 Recognize ethical issues related to health information technology.
  - 08.03 Recognize ethical issues related to coding and billing/medical transcription.
  
- 09.0 Identify the importance of privacy and health records law in healthcare. – The student will be able to:
  - 09.01 Identify standards of the Health Insurance Portability and Accountability Act (HIPAA).
  - 09.02 Define and explain how to create a legal patient record.
  
- 10.0 Demonstrate computer knowledge and skills – The student will be able to:

- 10.01 Demonstrate keyboarding skills
- 10.02 Demonstrate the ability to save files and retrieve files from your computer.
- 10.03 Demonstrate ability to connect to the internet
- 10.04 Demonstrate ability to perform research on the internet by identifying reliable websites.
- 10.05 Demonstrate ability to send and receive e-mail.
- 10.06 Demonstrate ability to send messages with attached files.
- 10.07 Demonstrate ability in word processing to create, edit, save, and print a Microsoft Word document.
- 10.08 Demonstrate the ability to create and present a Microsoft PowerPoint project.

11.0 Demonstrate employability skills. – The student will be able to:

- 11.01 Identify personal traits or attitudes desirable in a member of the healthcare team.
- 11.02 Define basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. courtesy and self-introductions).
- 11.03 Identify documents that may be required when applying for a job.
- 11.04 Write an appropriate resume.
- 11.05 Conduct a job search.
- 11.06 Complete a job application form correctly.
- 11.07 Demonstrate competence in job interview techniques.
- 11.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
- 11.09 Identify acceptable work habits.
- 11.10 Recognize appropriate affective/professional behavior.
- 11.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).

**PSAV Course Number: HIM0071**  
**Occupational Completion Point: B**  
**Medical Coder/Biller 1 – 300 Hours – SOC Code 29-2071**

Students completing intended outcomes 12-21 in this module meet the requirements for the occupational completion point of Medical Coder/ Biller or SOC Code 29-2071 (Medical Records and Health Information Technicians)

12.0 Describe the anatomy and physiology of the human body. – The student will be able to:

- 12.01 Describe the structure and function of the respiratory system.
- 12.02 Describe the structure and function of the cardio-vascular system.
- 12.03 Describe the structure and function of the muscular-skeletal system.
- 12.04 Describe the structure and function of nervous, skin, and sensory systems.
- 12.05 Describe the structure and function of the reproductive system.
- 12.06 Describe the structure and function of the urinary system.
- 12.07 Describe the structure and function of the digestive system.
- 12.08 Describe the structure and function of the endocrine system.

13.0 Demonstrate proficiency in the application of medical terminology. – The student will be able to:

- 13.01 Recognize and identify word parts of medical terminology in daily use.
  - 13.02 Build, spell and pronounce correctly, appropriate terms from word parts learned and be able to give the meaning of the word.
  - 13.03 Identify word parts and be able to build, spell and understand new words with those parts.
  - 13.04 Spell and use medical abbreviations.
  - 13.05 Recognize and identify terminology of hospital and other clinical forms.
  - 13.06 Demonstrate use of basic terminology common to medical/surgical practices.
- 14.0 Demonstrate an understanding of the fundamentals of disease process in relationship to the human body, including pharmacology. – The student will be able to:
- 14.01 Demonstrate an understanding of the predisposing factors and direct causes of disease as they relate to the human body.
  - 14.02 Demonstrate an understanding of the general morphology of organisms and their role in the disease process.
  - 14.03 Demonstrate an understanding of the pathogenesis of diseases of all the body systems.

**Course Number: HIM0072**

**Occupational Completion Point: B**

**Medical Coder/Biller 2– 300 Hours – SOC Code 29-2071**

- 15.0 Demonstrate proficiency in use of ICD and CPT coding systems, both manual and automated. – The student will be able to:
- 15.01 Outline the development of nomenclatures and classification systems.
  - 15.02 Identify conventions and Guidelines used in coding.
  - 15.03 Describe the process to annually update coding resources.
  - 15.04 Demonstrate the ability to code CPT and HCPCS II Codes with a focus on correct coding and sequencing of CPT codes for Anesthesia; Evaluation & Management (E&M); Surgery; Pathology and Laboratory; Radiology , and Medicine.
  - 15.05 Identify when it is appropriate to use HCPCS Level II codes and how to code them correctly.
  - 15.06 Use case studies and authentic medical records/abstracts to code intermediate and advanced, complex procedure code assignment using CPT (all sections), HCPCS II Codes, and, the current ICD Procedural Coding System
  - 15.07 Append all appropriate modifiers to both CPT and HCPCS II codes
  - 15.08 Explain Physician Quality Reporting Initiative (PQRI) and its relationship to CPT Category II codes.
  - 15.09 Demonstrate the ability to accurately code and sequence ICD-9-CM (volumes 1, 2 &3), ICD-10 and ICD-10-PCS Codes by body systems and supplemental chapters/materials.
  - 15.10 Identify any discrepancies, incomplete information and/or poor document practices in relation to coding while following appropriate departmental policies for correcting errors or improving documentation practices.
- 16.0 Demonstrate proficiency in ICD coding complexities – The student will be able to:

- 16.01 Apply advanced ICD coding concepts to diagnostic complexities of complex case studies with an articulation of coding rules and sequencing.
  - 16.02 Using a variety of simulated patient records (Emergency Department, Ambulatory Surgery, and Inpatient), interpret data and assign diagnostic codes.
  - 16.03 Describe characteristics of prospective payment systems (DRG, APR-DRG and RUGS groupers) for various types of healthcare settings
  - 16.04 Review the format and conventions of ICD-10 coding systems.
  - 16.05 Identify the areas of similarities and differences between ICD-9-CM and ICD-10 and other diagnosis coding systems (DSM-IV, ICD-O).
  - 16.06 Use and maintain application processes to support other clinical classification systems (DSM IV, ICD-O).
  - 16.07 Explain how the Systematized Nomenclature of Medicine clinical terminology is utilized in the development of an electronic health record system.
- 17.0 Utilize medical coding references. – The student will be able to:
- 17.01 Use medical dictionaries.
  - 17.02 Identify and use trade generic and chemical drug names utilizing reference sources.
  - 17.03 Identify and use diagnostic test terminology.
- 18.0 Explain the significance of health information services to the Medical Coder/Biller. – The student will be able to:
- 18.01 Describe origin, history and definition of medical records.
  - 18.02 Describe the functions of the medical record department, i.e., data collecting, filing, retrieving, coding, indexing, etc.
  - 18.03 Explain the classification and functions of health information management personnel and chain of command.
  - 18.04 State reasons medical records are important in the health care delivery system.
  - 18.05 Explain different filing systems used in health care institutions.
  - 18.06 Describe the development of the medical record.
  - 18.07 Explain the importance of the medical record in relation to state and federal agencies, accrediting and licensing agencies.
  - 18.08 Demonstrate the use of a master patient index (MPI) system.

**Course Number: HIM0073**

**Occupational Completion Point: B**

**Medical Coder/Biller 3 – 310 Hours – SOC Code 29-2071**

- 19.0 Demonstrate ethical and legal principles with regard to the use of medical records. – The student will be able to:
- 19.01 Explain the importance of maintaining ethical and legal standards in compiling and using medical records.
  - 19.02 Discuss the Code of Ethics of the American Health Information Management Association.
  - 19.03 Explain the scope of practice of the medical coder/biller.

- 19.04 Demonstrate ethical coding practices as outlined by AHIMA.
- 20.0 Demonstrate understanding of medical billing. – The student will be able to:
  - 20.01 Complete HCFA 1500 or comparable claim form.
  - 20.02 Compare and contrast various reimbursement entities.
  - 20.03 Identify sources of payment, including patient and third parties.
  - 20.04 Use medical billing software.
  - 20.05 Perform electronic claims billing and submission.
  - 20.06 Interpret explanation of benefits (EOBs) and explanation of Medicare benefits (EOMBs).
  - 20.07 Analyze claims rejection, correct and resubmit for payment.
  - 20.08 Explain the relationship of Medicare Severity Diagnosis Related Groups (MS-DRGs) and Ambulatory Patient Classifications (APCs).
  - 20.09 Identify the various external regulating agencies and their impact on the coding systems.

**2011-2012**

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Medical Coder/Biller-ATD  
**ATD CIP Number:** 0317050605  
**SOC Code(s):** 31-9099, 29-2071

When this program is offered by a community or state college, the following standards, and benchmarks apply.

Outcomes 01-11 are referred to as the Health Information Technology core and do not have to be completed if the students has previously completed the core in another program at any level. The Core should be taken first or concurrently with the first course in the program.

- 01.0 Demonstrate an understanding of the healthcare delivery system and health occupations. – The student will be able to:
- 01.01 Discuss the evolution of health care.
  - 01.02 Demonstrate an understanding of the infrastructure of healthcare in the United States.
  - 01.03 Discuss regulatory agencies and organizations within the healthcare delivery system
  - 01.04 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:
- 02.01 Develop basic speaking and active listening skills.
  - 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
  - 02.03 Identify characteristics of successful and unsuccessful communication including barriers.
  - 02.04 Respond to verbal and non-verbal cues.
  - 02.05 Compose written communication using correct spelling, grammar, formatting and confidentiality.
  - 02.06 Use appropriate medical terminology and abbreviations.
  - 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
  - 02.08 Recognize the importance of patient/client educations regarding healthcare.
  - 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
  - 02.10 Recognize elements of communication using a sender-receiver model.
  - 02.11 Distinguish between and report subjective and objective information.
  - 02.12 Report relevant information in order of occurrence.

- 03.0 Explore health informatics and information management as a profession. – The student will be able to:
- 03.01 Discuss the history of health information management.
  - 03.02 Discuss the professional opportunities within the health information management profession.
  - 03.03 Demonstrate knowledge of professional associations within HIM.
- 04.0 Demonstrate an understanding of health data concepts. – The student will be able to:
- 04.01 Describe the various uses of health data.
  - 04.02 Describe various characteristics of data quality.
- 05.0 Describe the functions of a health record – The student will be able to:
- 05.01 Demonstrate an understanding of the various formats of the health record.
  - 05.02 Explain the various uses of a health record.
  - 05.03 Follow medical records policies and procedures for security, including confidentiality.
- 06.0 Demonstrate a basic understanding of Health Information Technology. – The student will be able to:
- 06.01 Discuss how healthcare reform legislation can and does affect the HIT field.
  - 06.02 Interpret information from Electronic Health Records (EHR) and applications in healthcare
  - 06.03 Demonstrate an understanding of creation, use, and purpose of the electronic health record.
- 07.0 Discuss classification systems, clinical vocabularies and terminologies. – The student will be able to:
- 07.01 Demonstrate knowledge of administrative terminologies as they relate to HIM.
  - 07.02 Demonstrate knowledge of clinical terminologies as they relate to HIM.
- 08.0 Explore ethical issues in Health Informatics and Information Management – The student will be able to:
- 08.01 Describe the code of ethics consistent with healthcare occupations.
  - 08.02 Recognize ethical issues related to health information technology.
  - 08.03 Recognize ethical issues related to coding and billing/medical transcription.
- 09.0 Identify the importance of privacy and health records law in healthcare. – The student will be able to:
- 09.01 Identify standards of the Health Insurance Portability and Accountability Act (HIPAA).
  - 09.02 Define and explain how to create a legal patient record.
- 10.0 Demonstrate computer knowledge and skills – The student will be able to:

- 10.01 Demonstrate keyboarding skills
- 10.02 Demonstrate the ability to save files and retrieve files from your computer.
- 10.03 Demonstrate ability to connect to the internet
- 10.04 Demonstrate ability to perform research on the internet by identifying reliable websites.
- 10.05 Demonstrate ability to send and receive e-mail.
- 10.06 Demonstrate ability to send messages with attached files.
- 10.07 Demonstrate ability in word processing to create, edit, save, and print a Microsoft Word document.
- 10.08 Demonstrate the ability to create and present a Microsoft PowerPoint project.

11.0 Demonstrate employability skills. – The student will be able to:

- 11.01 Identify personal traits or attitudes desirable in a member of the healthcare team.
- 11.02 Define basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. courtesy and self-introductions).
- 11.03 Identify documents that may be required when applying for a job.
- 11.04 Write an appropriate resume.
- 11.05 Conduct a job search.
- 11.06 Complete a job application form correctly.
- 11.07 Demonstrate competence in job interview techniques.
- 11.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
- 11.09 Identify acceptable work habits.
- 11.10 Recognize appropriate affective/professional behavior.
- 11.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).

Students completing intended outcomes 12-20 in this module meet the requirements for the occupational completion point of Medical Coder/ Biller or SOC Code 29-2071 (Medical Records and Health Information Technicians)

12.0 Describe the anatomy and physiology of the human body. – The student will be able to:

- 12.01 Describe the structure and function of the respiratory system.
- 12.02 Describe the structure and function of the cardio-vascular system.
- 12.03 Describe the structure and function of the muscular-skeletal system.
- 12.04 Describe the structure and function of nervous, skin, and sensory systems.
- 12.05 Describe the structure and function of the reproductive system.
- 12.06 Describe the structure and function of the urinary system.
- 12.07 Describe the structure and function of the digestive system.
- 12.08 Describe the structure and function of the endocrine system.

13.0 Demonstrate proficiency in the application of medical terminology. – The student will be able to:

- 13.01 Recognize and identify word parts of medical terminology in daily use.

- 13.02 Build, spell and pronounce correctly, appropriate terms from word parts learned and be able to give the meaning of the word.
  - 13.03 Identify word parts and be able to build, spell and understand new words with those parts.
  - 13.04 Spell and use medical abbreviations.
  - 13.05 Recognize and identify terminology of hospital and other clinical forms.
  - 13.06 Demonstrate use of basic terminology common to medical/surgical practices.
- 14.0 Demonstrate an understanding of the fundamentals of disease process in relationship to the human body, including pharmacology. – The student will be able to:
- 14.01 Demonstrate an understanding of the predisposing factors and direct causes of disease as they relate to the human body.
  - 14.02 Demonstrate an understanding of the general morphology of organisms and their role in the disease process.
  - 14.03 Demonstrate an understanding of the pathogenesis of diseases of all the body systems.
- 15.0 Demonstrate proficiency in use of ICD and CPT coding systems, both manual and automated. – The student will be able to:
- 15.01 Outline the development of nomenclatures and classification systems.
  - 15.02 Identify conventions and Guidelines used in coding.
  - 15.03 Describe the process to annually update coding resources.
  - 15.04 Demonstrate the ability to code CPT and HCPCS II Codes with a focus on correct coding and sequencing of CPT codes for Anesthesia; Evaluation & Management (E&M); Surgery; Pathology and Laboratory; Radiology , and Medicine.
  - 15.05 Identify when it is appropriate to use HCPCS Level II codes and how to code them correctly.
  - 15.06 Use case studies and authentic medical records/abstracts to code intermediate and advanced, complex procedure code assignment using CPT (all sections), HCPCS II Codes, and, the current ICD Procedural Coding System
  - 15.07 Append all appropriate modifiers to both CPT and HCPCS II codes
  - 15.08 Explain Physician Quality Reporting Initiative (PQRI) and its relationship to CPT Category II codes.
  - 15.09 Demonstrate the ability to accurately code and sequence ICD-9-CM (volumes 1, 2 &3), ICD-10 and ICD-10-PCS Codes by body systems and supplemental chapters/materials.
  - 15.10 Identify any discrepancies, incomplete information and/or poor document practices in relation to coding while following appropriate departmental policies for correcting errors or improving documentation practices.
- 16.0 Demonstrate proficiency in ICD coding complexities
- 16.01 Apply advanced ICD coding concepts to diagnostic complexities of complex case studies with an articulation of coding rules and sequencing.
  - 16.02 Using a variety of simulated patient records (Emergency Department, Ambulatory Surgery, and Inpatient), interpret data and assign diagnostic codes.
  - 16.03 Describe characteristics of prospective payment systems (DRG, APR-DRG and RUGS groupers) for various types of healthcare settings

- 16.04 Review the format and conventions of ICD-10 coding systems.
  - 16.05 Identify the areas of similarities and differences between ICD-9-CM and ICD-10 and other diagnosis coding systems (DSM-IV, ICD-O).
  - 16.06 Use and maintain application processes to support other clinical classification systems (DSM IV, ICD-O).
  - 16.07 Explain how the Systematized Nomenclature of Medicine clinical terminology is utilized in the development of an electronic health record system.
- 17.0 Utilize medical coding references. – The student will be able to:
- 17.01 Use medical dictionaries.
  - 17.02 Identify and use trade generic and chemical drug names utilizing reference sources.
  - 17.03 Identify and use diagnostic test terminology.
- 18.0 Explain the significance of health information services to the Medical Coder/Biller. – The student will be able to:
- 18.01 Describe origin, history and definition of medical records.
  - 18.02 Describe the functions of the medical record department, i.e., data collecting, filing, retrieving, coding, indexing, etc.
  - 18.03 Explain the classification and functions of health information management personnel and chain of command.
  - 18.04 State reasons medical records are important in the health care delivery system.
  - 18.05 Explain different filing systems used in health care institutions.
  - 18.06 Describe the development of the medical record.
  - 18.07 Explain the importance of the medical record in relation to state and federal agencies, accrediting and licensing agencies.
  - 18.08 Demonstrate the use of a master patient index (MPI) system.
- 19.0 Demonstrate ethical and legal principles with regard to the use of medical records. – The student will be able to:
- 19.01 Explain the importance of maintaining ethical and legal standards in compiling and using medical records.
  - 19.02 Discuss the Code of Ethics of the American Health Information Management Association.
  - 19.03 Explain the scope of practice of the medical coder/biller.
  - 19.04 Demonstrate ethical coding practices as outlined by AHIMA.
- 20.0 Demonstrate understanding of medical billing. – The student will be able to:
- 20.01 Complete HCFA 1500 or comparable claim form.
  - 20.02 Compare and contrast various reimbursement entities.
  - 20.03 Identify sources of payment, including patient and third parties.
  - 20.04 Use medical billing software.
  - 20.05 Perform electronic claims billing and submission.
  - 20.06 Interpret explanation of benefits (EOBs) and explanation of Medicare benefits (EOMBs).

- 20.07 Analyze claims rejection, correct and resubmit for payment.
- 20.08 Explain the relationship of Medicare Severity Diagnosis Related Groups (MS-DRGs) and Ambulatory Patient Classifications (APCs).
- 20.09 Identify the various external regulating agencies and their impact on the coding systems.

2011-2012

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Medical Record Transcribing-ATD  
**Program Type:** ATD (Applied Technology Diploma)  
**Career Cluster:** Health Science

	<b>CC</b>	<b>PSAV</b>
Program Number	N/A	H170508
CIP Number	0317050606	0317050604
Grade Level	Applied Technology Diploma (ATD)	Applied Technology Diploma (ATD)
Standard Length	33 credit hours	1200 hours
CTSO	HOSA	HOSA
SOC Codes (all applicable)	31-9099, 31-9094	31-9099, 31-9094
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>	
Basic Skills Level	Mathematics: 10 Language: 11 Reading: 11	

### **Purpose**

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

The purpose of this program is to prepare student for employment as medical transcribers SOC 31-9094 Medical Transcriptionists.

The content includes but is not limited to medical terminology, anatomy and physiology, grammar and punctuation, health care delivery systems, health information services, ethical and legal responsibilities, safety/security procedures, word processing/ transcription skills and employability skills.

### **Program Structure**

This program is an Applied Technology Diploma program that is part of a technical degree program, is less than 60 credit hours, and leads to employment in a specific occupation. An applied technology diploma program may consist of either technical credit or college credit. A public school district may offer an applied technology diploma program only as technical credit, with college credit awarded to a student upon articulation to a community college.

**PSAV Program**

When offered at the district level, this program is a planned sequence of instruction consisting of two occupational completion points and the courses as shown below.

OCP	Course Number	Course Title	Course Length	SOC Code
A	HIM0009	Introduction to Health Information Technology *	90 hours	29-2099
B	HIM0002	Medical Transcriber-ATD 1	370 hours	31-9094
	HIM0083	Medical Transcriber-ATD 2	370 hours	31-9094
	HIM0084	Medical Transcriber-ATD 3	370 hours	31-9094

**\* Students who have taken the Health core (HSC0003) previously as part of this program are not required to take HIM0009 to complete the program. These students should continue on to OCP B. Beginning in 2011-12 new students should be enrolled in HIM0009 as the first course in the program.**

**Community College**

When offered at the community college level, this ATD program is part of the Health Information Management AS/AAS degree (1317.050600) and has a program length of 33 credits.

**Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

**Special Notes**

Outcomes 01- 11 are referred to as the Health Information Technology core and do not have to be completed if the students has previously completed the core in another program at any level. The Core should be taken first or concurrently with the first course in the program.

Faculty teaching in this program must have a minimum of a B.S. degree in Health Information Management or Office Systems Technology -Medical Office Systems Specializations

Program must be taught in accordance with the guidelines of the model curriculum of the: Association for Healthcare Documentation Integrity (AHDI).

4230 Kiernan Avenue

Suite 130

Modesto, CA 95356

Phone: Toll Free (800) 982-2182 - Direct (209) 527-9620

Fax: 209-527-9633. Web site: <http://www.ahdionline.org/> E-mail: [ahdi@ahdionline.org](mailto:ahdi@ahdionline.org)

Students should be encouraged to become members of their professional organization, and participate in the state/local chapter activities. Admissions should be limited to individuals who have the ability to keyboard at a speed of 45 correct words per minute.

The program should prepare the graduate to take the national examination to become a Certified Medical Transcriptionist. Certification is voluntary and is sponsored by the American Association for Medical Transcription, 3460 Oakdale Rd. Suite M, Modesto, Ca. 95355-9690, 1-800-982-2182 or 209/551-0883.

### **Career and Technical Student Organization (CTSO)**

Health Occupations Students of America, (HOSA) Inc. is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

### **Basic Skills**

In PSAV programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C. the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Mathematics 10, Language 11, and Reading 11. These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination. Students may be exempt from meeting the Basic Skills requirements by earning an eligible industry certification. See the Basic Skills Exemption List document for a list of eligible industry certifications (<http://www.fldoe.org/workforce/dwdframe/rtf/basic-skills.rtf>).

Adult students with disabilities, as defined in Section 1004.02(7), Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01(3)(a), F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91(3), F.S.

Students who possess a college degree at the Associate of Applied Science level or higher; who have completed or are exempt from the college entry-level examination pursuant to Section 1008.29, F.S.; or who have passed a state, national, or industry licensure exam are exempt from meeting the Basic Skills requirement (Rule 6A-10.040, F.A.C.)

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and

special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Some secondary students with disabilities (ESE) may need additional time (i.e., longer than the regular school year), to master the student performance standards associated with a regular occupational completion point (OCP) or a modified occupational completion point (MOCP). If needed, a student may enroll in the same career and technical course more than once. Documentation should be included in the IEP that clearly indicates that it is anticipated that the student may need an additional year to complete an OCP/MOCP. The student should work on different competencies and new applications of competencies each year toward completion of the OCP(s)/MOCP. After achieving the competencies identified for the year, the student earns credit for the course. It is important to ensure that credits earned by students are reported accurately. The district's information system must be designed to accept multiple credits for the same course number (for eligible students with disabilities). For further information, see Rule 6A-6.0312, F.A.C., Course Modifications for Exceptional Students, and the latest pertinent Technical Assistance Paper (<http://www.fldoe.org/ese/tap-home.asp>).

### **Articulation**

The information related to the guaranteed transfer of credit between an applied technology diploma program and AS/AAS degree must be documented and maintained by the Articulation Coordinating Committee (ACC). The transfer of the applied technology diploma to an AS/AAS degree is guaranteed for a period of three (3) years following the date of the award of the applied technology diploma.

### **Program Length**

In accordance with Rule 6A-10.024, F.A.C. an Applied Technology Diploma program consists of a course of study that is part of an AS/AAS degree program, is less than 60 credit hours, is approximately 50% of the technical component (non-general education), and leads to employment in a specific occupation. An applied technology diploma program may consist of either technical credit or college credit.

Students must have a high school diploma, a GED, or a certificate of completion to be admitted to an applied technology diploma program. Within six weeks of entry, students in ATD programs of 450 or more hours must be tested pursuant to Rule 6A-10.040, F.A.C. and if below minimum standards for completion from the program, must receive remedial instruction. The minimum standards must be at least the equivalent of a score of ten (10) on all sections of basic skills test approved in Rule 6A-10.040, F.A.C. Students must successfully complete all remedial instruction before completing the Applied Technology Diploma.

Community Colleges may offer either college or career credit toward the applied technology diploma. A Career Center in a public school district may offer an applied technology diploma program only as technical credit, with college credit awarded to a student upon articulation to a community college (Section 1004.02, F.S.)

When offered at a community college the standard length of this program is 33 credits. When offered at a technical center the standard length of this program is 1200 clock hours.

In accordance with Rule 6A-10.024, F.A.C. all faculty providing instruction must have at least a baccalaureate degree or an associate degree with demonstrated competencies in the specific instructional program as defined by the Southern Association of Colleges and Schools.

## **Standards**

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate an understanding of the healthcare delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Explore health informatics and information management as a profession.
- 04.0 Demonstrate an understanding of health data concepts.
- 05.0 Describe the functions of a health record
- 06.0 Demonstrate a basic understanding of Health Information Technology.
- 07.0 Discuss classification systems, clinical vocabularies and terminologies.
- 08.0 Explore ethical issues in Health Informatics and Information Management
- 09.0 Identify the importance of privacy and health records law in healthcare.
- 10.0 Demonstrate computer knowledge and skills
- 11.0 Demonstrate employability skills.
- 12.0 Use appropriate medical and scientific terminology.
- 13.0 Apply rules of English grammar and punctuation.
- 14.0 Utilize medical references.
- 15.0 Apply medical transcription technology
- 16.0 Practice safety and security specific to medical transcriber.
- 17.0 Explain the role of health information services.
- 18.0 Demonstrate ethical and legal principles with regard to the use of medical records.

2011-2012

**Florida Department of Education  
Student Performance Standards**

**Program Title: Medical Record Transcribing**  
**PSAV Number: H170508**

When this program is offered at the PSAV level, the following organization of courses, standards, and benchmarks apply.

Outcomes 01- 11 are referred to as the Health Information Technology core and do not have to be completed if the students has previously completed the core in another program at any level. The Core should be taken first or concurrently with the first course in the program.

**PSAV Course Number: HIM0009**  
**Occupational Completion Point: A**  
**Basic Healthcare Worker – 90 Hours – SOC Code 31-9099**

- 01.0 Demonstrate an understanding of the healthcare delivery system and health occupations. – The student will be able to:
- 01.01 Discuss the evolution of health care.
  - 01.02 Demonstrate an understanding of the infrastructure of healthcare in the United States.
  - 01.03 Discuss regulatory agencies and organizations within the healthcare delivery system
  - 01.04 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:
- 02.01 Develop basic speaking and active listening skills.
  - 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
  - 02.03 Identify characteristics of successful and unsuccessful communication including barriers.
  - 02.04 Respond to verbal and non-verbal cues.
  - 02.05 Compose written communication using correct spelling, grammar, formatting and confidentiality.
  - 02.06 Use appropriate medical terminology and abbreviations.
  - 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
  - 02.08 Recognize the importance of patient/client educations regarding healthcare.
  - 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
  - 02.10 Recognize elements of communication using a sender-receiver model.
  - 02.11 Distinguish between and report subjective and objective information.
  - 02.12 Report relevant information in order of occurrence.

- 03.0 Explore health informatics and information management as a profession. – The student will be able to:
  - 03.01 Discuss the history of health information management.
  - 03.02 Discuss the professional opportunities within the health information management profession.
  - 03.03 Demonstrate knowledge of professional associations within HIM.
  
- 04.0 Demonstrate an understanding of health data concepts. – The student will be able to:
  - 04.01 Describe the various uses of health data.
  - 04.02 Describe various characteristics of data quality.
  
- 05.0 Describe the functions of a health record – The student will be able to:
  - 05.01 Demonstrate an understanding of the various formats of the health record.
  - 05.02 Explain the various uses of a health record.
  - 05.03 Follow medical records policies and procedures for security, including confidentiality.
  
- 06.0 Demonstrate a basic understanding of Health Information Technology. – The student will be able to:
  - 06.01 Discuss how healthcare reform legislation can and does affect the HIT field.
  - 06.02 Interpret information from Electronic Health Records (EHR) and applications in healthcare
  - 06.03 Demonstrate an understanding of creation, use, and purpose of the electronic health record.
  
- 07.0 Discuss classification systems, clinical vocabularies and terminologies. – The student will be able to:
  - 07.01 Demonstrate knowledge of administrative terminologies as they relate to HIM.
  - 07.02 Demonstrate knowledge of clinical terminologies as they relate to HIM.
  
- 08.0 Explore ethical issues in Health Informatics and Information Management – The student will be able to:
  - 08.01 Describe the code of ethics consistent with healthcare occupations.
  - 08.02 Recognize ethical issues related to health information technology.
  - 08.03 Recognize ethical issues related to coding and billing/medical transcription.
  
- 09.0 Identify the importance of privacy and health records law in healthcare. – The student will be able to:
  - 09.01 Identify standards of the Health Insurance Portability and Accountability Act (HIPAA).
  - 09.02 Define and explain how to create a legal patient record.
  
- 10.0 Demonstrate computer knowledge and skills – The student will be able to:

- 10.01 Demonstrate keyboarding skills
- 10.02 Demonstrate the ability to save files and retrieve files from your computer.
- 10.03 Demonstrate ability to connect to the internet
- 10.04 Demonstrate ability to perform research on the internet by identifying reliable websites.
- 10.05 Demonstrate ability to send and receive e-mail.
- 10.06 Demonstrate ability to send messages with attached files.
- 10.07 Demonstrate ability in word processing to create, edit, save, and print a Microsoft Word document.
- 10.08 Demonstrate the ability to create and present a Microsoft PowerPoint project.

11.0 Demonstrate employability skills. – The student will be able to:

- 11.01 Identify personal traits or attitudes desirable in a member of the healthcare team.
- 11.02 Define basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. courtesy and self-introductions).
- 11.03 Identify documents that may be required when applying for a job.
- 11.04 Write an appropriate resume.
- 11.05 Conduct a job search.
- 11.06 Complete a job application form correctly.
- 11.07 Demonstrate competence in job interview techniques.
- 11.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
- 11.09 Identify acceptable work habits.
- 11.10 Recognize appropriate affective/professional behavior.
- 11.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).

**PSAV Course Number: HIM0002**

**Occupational Completion Point: B**

**Medical Transcriber-ATD 1– 370 Hours – SOC Code 31-9094**

12.0 Use appropriate medical and scientific terminology. – The student will be able to:

- 12.01 Spell, define and pronounce medical words and their components.
- 12.02 Define and use medical abbreviations.
- 12.03 Identify and explain structure and function of the human body.
- 12.04 Identify disorders and treatments of the human body.

13.0 Apply rules of English grammar and punctuation. – The student will be able to:

- 13.01 Recognize and use the principal parts of speech.
- 13.02 Recognize and use punctuation marks.
- 13.03 Apply rules of numerical expression.
- 13.04 Apply rules of capitalization.
- 13.05 Define and use abbreviations.
- 13.06 Demonstrate ability to spell words in common usage
- 13.07 Evaluate and use reliable resources for research and practice.

- 13.08 Apply correct medical style as defined by authorities( i.e. AHDI Book of style, AMA Manual of Style)
- 13.09 Edit and proofread transcription.
- 13.010 Recognize and use report formats.

14.0 Utilize medical references. – The student will be able to:

- 14.01 Use medical dictionaries and specialty word books.
- 14.02 Identify and use trade, generic and chemical drug names utilizing reference sources.
- 14.03 Identify and use diagnostic test terminology.
- 14.04 Access, use and evaluate the reliability of resources located on the internet

**PSAV Course Number: HIM0083**

**Occupational Completion Point: B**

**Medical Transcriber –ATD 2– 370 Hours – SOC Code 31-9094**

15.0 Apply medical transcription technology – The student will be able to:

- 15.01 Demonstrate keyboarding skills with an awareness of productivity and accuracy standards and definitions.
- 15.02 Demonstrate use of transcriber/dictation retrieval systems.
- 15.03 Students will accurately transcribe a required minimum number of reports history and physical, consultations, discharge summaries, operative reports and special reports, applying competencies specified in the areas of English Language, Medical Knowledge, Technology, Healthcare Documentation, and Professional practice.
- 15.04 Demonstrate the use of word processing programs, including commands.
- 15.05 Demonstrate knowledge of abbreviation expanders and other productivity-enhancing software.
- 15.06 Demonstrate a general knowledge of speech recognition technology and how it integrates into medical transcription.
- 15.07 Demonstrate a general knowledge of Electronic healthcare records (EHR) including the functions related to diction/transcription integration and editing, and common terminology used in EHR systems.

16.0 Practice safety and security specific to medical transcriber. – The student will be able to:

- 16.01 Follow health information policies and procedures for security, including confidentiality
- 16.02 Demonstrate workstation ergonomics specific to the medical transcriptionist.

**PSAV Course Number: HIM0084**

**Occupational Completion Point: B**

**Medical Transcriber-ATD 3– 370 Hours – SOC Code 31-9094**

17.0 Explain the role of health information services. – The student will be able to:

- 17.01 Understand the documentation workflow, will be able and explain the importance of delivering healthcare documentation in a timely manner, and apply this concept.

- 17.02 Explain the use of the health record by state, federal, accrediting and licensing agencies.
  - 17.03 Students will demonstrate an awareness of the opportunities in medical transcription and related careers and the importance of professional development.
- 18.0 Demonstrate ethical and legal principles with regard to the use of medical records. – The student will be able to:
- 18.01 Explain the importance of maintaining ethical and legal standards in compiling and using medical records.
  - 18.02 Maintain workstation confidentiality.
  - 18.03 Explain medical record authentication and its legal implications.
  - 18.04 Explain the scope of practice of the medical transcriptionist.
  - 18.05 Discuss the code of ethics of the (AAMT) Association for Healthcare Documentation Integrity (AHDI).
  - 18.06 Discuss the code of ethics of the American Health Information Management Association (AHIMA).
  - 18.07 Observe Health Insurance Portability and Accountability Act (HIPAA) regulations as these regulations apply to medical transcription

2011-2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Medical Record Transcribing-ATD  
**ATD CIP Number:** 0317050606  
**SOC Code(s):** 31-9099, 31-9094

When this program is offered by a community or state college, the following standards, and benchmarks apply.

**Health Science Core: The Health Science Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Science Core in any other health occupations program do not have to repeat intended outcomes 01-11.**

- 01.0 Demonstrate an understanding of the healthcare delivery system and health occupations.
- 01.01 Discuss the evolution of health care.
  - 01.02 Demonstrate an understanding of the infrastructure of healthcare in the United States.
  - 01.03 Discuss regulatory agencies and organizations within the healthcare delivery system
  - 01.04 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:
- 02.01 Develop basic speaking and active listening skills.
  - 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
  - 02.03 Identify characteristics of successful and unsuccessful communication including barriers.
  - 02.04 Respond to verbal and non-verbal cues.
  - 02.05 Compose written communication using correct spelling, grammar, formatting and confidentiality.
  - 02.06 Use appropriate medical terminology and abbreviations.
  - 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
  - 02.08 Recognize the importance of patient/client educations regarding healthcare.
  - 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
  - 02.10 Recognize elements of communication using a sender-receiver model.
  - 02.11 Distinguish between and report subjective and objective information.
  - 02.12 Report relevant information in order of occurrence.
- 03.0 Explore health informatics and information management as a profession.
- 03.01 Discuss the history of health information management.
  - 03.02 Discuss the professional opportunities within the health information management profession.
  - 03.03 Demonstrate knowledge of professional associations within HIM.

- 04.0 Demonstrate an understanding of health data concepts.
  - 04.01 Describe the various uses of health data.
  - 04.02 Describe various characteristics of data quality.
  
- 05.0 Describe the functions of a health record
  - 05.01 Demonstrate an understanding of the various formats of the health record.
  - 05.02 Explain the various uses of a health record.
  - 05.03 Follow medical records policies and procedures for security, including confidentiality.
  
- 06.0 Demonstrate a basic understanding of Health Information Technology.
  - 06.01 Discuss how healthcare reform legislation can and does affect the HIT field.
  - 06.02 Interpret information from Electronic Health Records (EHR) and applications in healthcare
  - 06.03 Demonstrate an understanding of creation, use, and purpose of the electronic health record.
  
- 07.0 Discuss classification systems, clinical vocabularies and terminologies.
  - 07.01 Demonstrate knowledge of administrative terminologies as they relate to HIM.
  - 07.02 Demonstrate knowledge of clinical terminologies as they relate to HIM.
  
- 08.0 Explore ethical issues in Health Informatics and Information Management
  - 08.01 Describe the code of ethics consistent with healthcare occupations.
  - 08.02 Recognize ethical issues related to health information technology.
  - 08.03 Recognize ethical issues related to coding and billing/medical transcription.
  
- 09.0 Identify the importance of privacy and health records law in healthcare.
  - 09.01 Identify standards of the Health Insurance Portability and Accountability Act (HIPAA).
  - 09.02 Define and explain how to create a legal patient record.
  
- 10.0 Demonstrate computer knowledge and skills
  - 10.01 Demonstrate keyboarding skills
  - 10.02 Demonstrate the ability to save files and retrieve files from your computer.
  - 10.03 Demonstrate ability to connect to the internet
  - 10.04 Demonstrate ability to perform research on the internet by identifying reliable websites.
  - 10.05 Demonstrate ability to send and receive e-mail.
  - 10.06 Demonstrate ability to send messages with attached files.
  - 10.07 Demonstrate ability in word processing to create, edit, save, and print a Microsoft Word document.
  - 10.08 Demonstrate the ability to create and present a Microsoft PowerPoint project.
  
- 11.0 Demonstrate employability skills. – The student will be able to:
  - 11.01 Identify personal traits or attitudes desirable in a member of the healthcare team.
  - 11.02 Define basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. courtesy and self-introductions).
  - 11.03 Identify documents that may be required when applying for a job.

- 11.04 Write an appropriate resume.
  - 11.05 Conduct a job search.
  - 11.06 Complete a job application form correctly.
  - 11.07 Demonstrate competence in job interview techniques.
  - 11.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
  - 11.09 Identify acceptable work habits.
  - 11.10 Recognize appropriate affective/professional behavior.
  - 11.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).
- 12.0 Explain the role of health information services. – The student will be able to:
- 12.01 Understand the documentation workflow, will be able and explain the importance of delivering healthcare documentation in a timely manner, and apply this concept.
  - 12.02 Explain the use of the health record by state, federal, accrediting and licensing agencies.
  - 12.03 Students will demonstrate an awareness of the opportunities in medical transcription and related careers and the importance of professional development.
- 13.0 Demonstrate ethical and legal principles with regard to the use of medical records. – The student will be able to:
- 13.01 Explain the importance of maintaining ethical and legal standards in compiling and using medical records.
  - 13.02 Maintain workstation confidentiality.
  - 13.03 Explain medical record authentication and its legal implications.
  - 13.04 Explain the scope of practice of the medical transcriptionist.
  - 13.05 Discuss the code of ethics of the Association for Healthcare Documentation Integrity (AHDI).
  - 13.06 Discuss the code of ethics of the American Health Information Management Association (AHIMA).
  - 13.07 Observe Health Insurance Portability and Accountability Act (HIPAA) regulations as these regulations apply to medical transcription
- 14.0 Apply medical transcription technology – The student will be able to:
- 14.01 Demonstrate keyboarding skills with an awareness of productivity and accuracy standards and definitions.
  - 14.02 Demonstrate use of transcriber/dictation retrieval systems.
  - 14.03 Students will accurately transcribe a required minimum number of reports history and physical, consultations, discharge summaries, operative reports and special reports, applying competencies specified in the areas of English Language, Medical Knowledge, Technology, Healthcare Documentation, and Professional practice.
  - 14.04 Demonstrate the use of word processing programs, including commands.

- 14.05 Demonstrate knowledge of abbreviation expanders and other productivity-enhancing software.
  - 14.06 Demonstrate a general knowledge of speech recognition technology and how it integrates into medical transcription.
  - 14.07 Demonstrate a general knowledge of Electronic healthcare records (EHR) including the functions related to diction/transcription integration and editing, and common terminology used in EHR systems.
- 15.0 Practice safety and security specific to medical transcriber. – The student will be able to:
- 15.01 Follow health information policies and procedures for security, including confidentiality
  - 15.02 Demonstrate workstation ergonomics specific to the medical transcriptionist.
- 16.0 Use appropriate medical and scientific terminology. – The student will be able to:
- 16.01 Spell, define and pronounce medical words and their components.
  - 16.02 Define and use medical abbreviations.
  - 16.03 Identify and explain structure and function of the human body.
  - 16.04 Identify disorders and treatments of the human body.
- 17.0 Apply rules of English grammar and punctuation. – The student will be able to:
- 17.01 Recognize and use the principal parts of speech.
  - 17.02 Recognize and use punctuation marks.
  - 17.03 Apply rules of numerical expression.
  - 17.04 Apply rules of capitalization.
  - 17.05 Define and use abbreviations.
  - 17.06 Demonstrate ability to spell words in common usage.
  - 17.07 Evaluate and use reliable resources for research and practice.
  - 17.08 Apply correct medical style as defined by authorities( i.e. AHDI Book of style, AMA Manual of Style)
  - 17.09 Edit and proofread transcription.
  - 17.10 Recognize and use report formats.
- 18.0 Utilize medical references. – The student will be able to:
- 18.01 Use medical dictionaries and specialty word books.
  - 18.02 Identify and use trade, generic and chemical drug names utilizing reference sources.
  - 18.03 Identify and use diagnostic test terminology.
  - 18.04 Access, use and evaluate the reliability of resources located on the internet

**2011-2012**

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Medical Information Coder/Biller  
**Career Cluster:** Health Science

<b>CCC</b>	
CIP Number	0317050607
Program Type	College Credit Certificate (CCC)
Program Length	34 credit hours
CTSO	HOSA, Phi Beta Lambda
SOC Codes (all applicable)	31-9099, 29-2071
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>

### **Purpose**

This certificate program is part of the Health Information Management AS/AAS degree program (1317050600).

A College Credit Certificate consists of a program of instruction of less than sixty (60) credits of college-level courses, which is part of an AS or AAS degree program and prepares students for entry into employment (Rule 6A-14.030, F.A.C.).

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

The program is designed to prepare students for employment in a variety of health care settings as entry level coder, medical record coder, coding technician, or coding clerks, or medical coder/billers. SOC Code 29-2071 (Medical Records and Health Information Technicians). Some colleges may choose to divide the Coder/Biller Certificate into two tracks, one for coding and one for billing.

The content includes but is not limited to medical terminology, anatomy and physiology, coding systems, fundamentals of disease process, including pharmacology, health care delivery systems, basics of medical records services, ethical and legal responsibilities, safety/security procedures, basic data processing, and employability skills.

### **Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

### **Special Notes**

This program is part of Health Information Management or Office Administration - Medical Office Specialization. The College Credit Certificate guarantees transfer of credit of 34 hours toward the AAS/AS degree in Health Information Management or Office Administration. Minimum entrance requirements for this program include a high school diploma or GED.

The cooperative method of instruction or clinical rotation is appropriate for this program. Whenever these methods are offered, the following is required for each student: a training plan, signed by the student, teacher, and employer, which includes instructional objectives and a list of on-the-job and in-school learning experiences; and a work station which reflects equipment, skills, and tasks which are relevant to the occupation which the student has chosen as a career goal. The student may receive compensation for work performed.

Faculty teaching this program must have a minimum of an AS degree in Health Information Management.

Students should be encouraged to become members and participate in the activities of the professional organizations: American Health Information Management Association and/or American Academy of Procedural Coders.

#### About AHIMA Credentials:

Completers of the Medical Biller Coder program may take the Certified Coding Associate (CCA) credential exam as the first step in their coding career. The CCA is an entry-level credential that distinguishes new coders in the job market. Individuals with a CCA credential:

- Exhibit a level of commitment, competency, and professional capability usually absent in a newcomer to the field
- Demonstrate a commitment to the coding profession
- Distinguish themselves from non-credentialed coders and those holding credentials from other organizations less demanding of the higher level of expertise required to earn AHIMA certification.

The CCA should be viewed as the starting point for an individual entering a career as a coder. The AHIMA CCS and CCS-P exams demonstrate mastery level skills in coding. Most individuals challenge the CCS or CCS-P exams after two or more years of work experience in coding.

American Health Information Management Association  
919 North Michigan Ave. Suite 2150  
Chicago, IL. 60611-5519  
312/233-1100

The American Academy of Professional Coders (AAPC) sponsors a certification exam for coders with expertise in physician-based settings which leads to the title of Certified Professional Coder (CPC) or Certified Professional Coder Hospital (CPC-H).

American Academy of Professional Coders  
309 West 700 South  
Salt Lake City, UT. 84101  
1-800-626-2633

The National Healthcare Association also offers a national certification examination for a Certified Billing and Coding Specialist (CBCS).

National Healthcare Association  
7500 West 160<sup>th</sup> Street  
Stilwell, Kansas 66085  
800-499-9092  
[www.nhanow.com](http://www.nhanow.com)

Outcomes 01-11 are referred to as the Health Information Technology core and do not have to be completed if the students has previously completed the core in another program at any level. The Core should be taken first or concurrently with the first course in the program.

Career and Technical Student Organization (CTSO)

Health Occupations Students of America, (HOSA) Inc. or Phi Beta Lambda (postsecondary) are the appropriate career and technical student organizations for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

### **Standards**

After successfully completing this course the student will be able to perform the following:

- 01.0 Demonstrate an understanding of the healthcare delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.

- 03.0 Explore health informatics and information management as a profession.
- 04.0 Demonstrate an understanding of health data concepts.
- 05.0 Describe the functions of a health record
- 06.0 Demonstrate a basic understanding of Health Information Technology.
- 07.0 Discuss classification systems, clinical vocabularies and terminologies.
- 08.0 Explore ethical issues in Health Informatics and Information Management
- 09.0 Identify the importance of privacy and health records law in healthcare.
- 10.0 Demonstrate computer knowledge and skills
- 11.0 Demonstrate employability skills.
- 12.0 Describe the anatomy and physiology of the human body.
- 13.0 Demonstrate proficiency in the application of medical terminology.
- 14.0 Demonstrate an understanding of the fundamentals of disease process in relationship to the human body, including pharmacology.
- 15.0 Demonstrate proficiency in the use of ICD and CPT coding systems, both manual and automated.
- 16.0 Demonstrate proficiency in ICD coding complexities
- 17.0 Utilize medical coding references.
- 18.0 Explain the basics of health information services.
- 19.0 Demonstrate ethical and legal principles with regard to the use of medical records.
- 20.0 Demonstrate understanding of medical billing.

2011-2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Medical Information Coder/Biller  
**CIP Number:** 0317050607  
**Program Length:** 34 credit hours  
**SOC Code(s):** 31-9099, 29-2071

This certificate program is part of the Health Information Management AS/AAS degree program (1317050600). At the completion of this program, the student will be able to:  
 Outcomes 01-11 are referred to as the Health Information Technology core and do not have to be completed if the students has previously completed the core in another program at any level. The Core should be taken first or concurrently with the first course in the program.

- 01.0 Demonstrate an understanding of the healthcare delivery system and health occupations. – The student will be able to:
- 01.01 Discuss the evolution of health care.
  - 01.02 Demonstrate an understanding of the infrastructure of healthcare in the United States.
  - 01.03 Discuss regulatory agencies and organizations within the healthcare delivery system
  - 01.04 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:
- 02.01 Develop basic speaking and active listening skills.
  - 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
  - 02.03 Identify characteristics of successful and unsuccessful communication including barriers.
  - 02.04 Respond to verbal and non-verbal cues.
  - 02.05 Compose written communication using correct spelling, grammar, formatting and confidentiality.
  - 02.06 Use appropriate medical terminology and abbreviations.
  - 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
  - 02.08 Recognize the importance of patient/client educations regarding healthcare.
  - 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
  - 02.10 Recognize elements of communication using a sender-receiver model.
  - 02.11 Distinguish between and report subjective and objective information.
  - 02.12 Report relevant information in order of occurrence.
- 03.0 Explore health informatics and information management as a profession. – The student will be able to:

- 03.01 Discuss the history of health information management.
- 03.02 Discuss the professional opportunities within the health information management profession.
- 03.03 Demonstrate knowledge of professional associations within HIM.
- 04.0 Demonstrate an understanding of health data concepts. – The student will be able to:
  - 04.01 Describe the various uses of health data.
  - 04.02 Describe various characteristics of data quality.
- 05.0 Describe the functions of a health record – The student will be able to:
  - 05.01 Demonstrate an understanding of the various formats of the health record.
  - 05.02 Explain the various uses of a health record.
  - 05.03 Follow medical records policies and procedures for security, including confidentiality.
- 06.0 Demonstrate a basic understanding of Health Information Technology. – The student will be able to:
  - 06.01 Discuss how healthcare reform legislation can and does affect the HIT field.
  - 06.02 Interpret information from Electronic Health Records (EHR) and applications in healthcare
  - 06.03 Demonstrate an understanding of creation, use, and purpose of the electronic health record.
- 07.0 Discuss classification systems, clinical vocabularies and terminologies. – The student will be able to:
  - 07.01 Demonstrate knowledge of administrative terminologies as they relate to HIM.
  - 07.02 Demonstrate knowledge of clinical terminologies as they relate to HIM.
- 08.0 Explore ethical issues in Health Informatics and Information Management – The student will be able to:
  - 08.01 Describe the code of ethics consistent with healthcare occupations.
  - 08.02 Recognize ethical issues related to health information technology.
  - 08.03 Recognize ethical issues related to coding and billing/medical transcription.
- 09.0 Identify the importance of privacy and health records law in healthcare. – The student will be able to:
  - 09.01 Identify standards of the Health Insurance Portability and Accountability Act (HIPAA).
  - 09.02 Define and explain how to create a legal patient record.
- 10.0 Demonstrate computer knowledge and skills – The student will be able to:
  - 10.01 Demonstrate keyboarding skills
  - 10.02 Demonstrate the ability to save files and retrieve files from your computer.
  - 10.03 Demonstrate ability to connect to the internet

- 10.04 Demonstrate ability to perform research on the internet by identifying reliable websites.
- 10.05 Demonstrate ability to send and receive e-mail.
- 10.06 Demonstrate ability to send messages with attached files.
- 10.07 Demonstrate ability in word processing to create, edit, save, and print a Microsoft Word document.
- 10.08 Demonstrate the ability to create and present a Microsoft PowerPoint project.

11.0 Demonstrate employability skills. – The student will be able to:

- 11.01 Identify personal traits or attitudes desirable in a member of the healthcare team.
- 11.02 Define basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. courtesy and self-introductions).
- 11.03 Identify documents that may be required when applying for a job.
- 11.04 Write an appropriate resume.
- 11.05 Conduct a job search.
- 11.06 Complete a job application form correctly.
- 11.07 Demonstrate competence in job interview techniques.
- 11.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
- 11.09 Identify acceptable work habits.
- 11.10 Recognize appropriate affective/professional behavior.
- 11.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).

**Students completing intended outcomes 12-20 in this module meet the requirements for the occupational completion point of Medical Coder/ Biller or SOC Code 29-2071(Medical Records and Health Information Technicians)**

12.0 Describe the anatomy and physiology of the human body. – The student will be able to:

- 12.01 Describe the structure and function of the respiratory system.
- 12.02 Describe the structure and function of the cardio-vascular system.
- 12.03 Describe the structure and function of the muscular-skeletal system.
- 12.04 Describe the structure and function of nervous, skin, and sensory systems.
- 12.05 Describe the structure and function of the reproductive system.
- 12.06 Describe the structure and function of the urinary system.
- 12.07 Describe the structure and function of the digestive system.
- 12.08 Describe the structure and function of the endocrine system.

13.0 Demonstrate proficiency in the application of medical terminology. – The student will be able to:

- 13.01 Recognize and identify word parts of medical terminology in daily use.
- 13.02 Build, spell and pronounce correctly, appropriate terms from word parts learned and be able to give the meaning of the word.

- 13.03 Identify word parts and be able to build, spell and understand new words with those parts.
  - 13.04 Spell and use medical abbreviations.
  - 13.05 Recognize and identify terminology of hospital and other clinical forms.
  - 13.06 Demonstrate use of basic terminology common to medical/surgical practices.
- 14.0 Demonstrate an understanding of the fundamentals of disease process in relationship to the human body, including pharmacology. – The student will be able to:
- 14.01 Demonstrate an understanding of the predisposing factors and direct causes of disease as they relate to the human body.
  - 14.02 Demonstrate an understanding of the general morphology of organisms and their role in the disease process.
  - 14.03 Demonstrate an understanding of the pathogenesis of diseases of all the body systems.
- 15.0 Demonstrate proficiency in use of ICD and CPT coding systems, both manual and automated. – The student will be able to:
- 15.01 Outline the development of nomenclatures and classification systems.
  - 15.02 Identify conventions and Guidelines used in coding.
  - 15.03 Describe the process to annually update coding resources.
  - 15.04 Demonstrate the ability to code CPT and HCPCS II Codes with a focus on correct coding and sequencing of CPT codes for Anesthesia; Evaluation & Management (E&M); Surgery; Pathology and Laboratory; Radiology , and Medicine.
  - 15.05 Identify when it is appropriate to use HCPCS Level II codes and how to code them correctly.
  - 15.06 Use case studies and authentic medical records/abstracts to code intermediate and advanced, complex procedure code assignment using CPT (all sections), HCPCS II Codes, and, the current ICD Procedural Coding System
  - 15.07 Append all appropriate modifiers to both CPT and HCPCS II codes
  - 15.08 Explain Physician Quality Reporting Initiative (PQRI) and its relationship to CPT Category II codes.
  - 15.09 Demonstrate the ability to accurately code and sequence ICD-9-CM (volumes 1, 2 &3), ICD-10 and ICD-10-PCS Codes by body systems and supplemental chapters/materials.
  - 15.10 Identify any discrepancies, incomplete information and/or poor document practices in relation to coding while following appropriate departmental policies for correcting errors or improving documentation practices.
- 16.0 Demonstrate proficiency in ICD coding complexities
- 16.01 Apply advanced ICD coding concepts to diagnostic complexities of complex case studies with an articulation of coding rules and sequencing.
  - 16.02 Using a variety of simulated patient records (Emergency Department, Ambulatory Surgery, and Inpatient), interpret data and assign diagnostic codes.
  - 16.03 Describe characteristics of prospective payment systems (DRG, APR-DRG and RUGS groupers) for various types of healthcare settings
  - 16.04 Review the format and conventions of ICD-10 coding systems.

- 16.05 Identify the areas of similarities and differences between ICD-9-CM and ICD-10 and other diagnosis coding systems (DSM-IV, ICD-O).
  - 16.06 Use and maintain application processes to support other clinical classification systems (DSM IV, ICD-O).
  - 16.07 Explain how the Systematized Nomenclature of Medicine clinical terminology is utilized in the development of an electronic health record system.
- 17.0 Utilize medical coding references. – The student will be able to:
- 17.01 Use medical dictionaries.
  - 17.02 Identify and use trade generic and chemical drug names utilizing reference sources.
  - 17.03 Identify and use diagnostic test terminology.
- 18.0 Explain the significance of health information services to the Medical Coder/Biller. – The student will be able to:
- 18.01 Describe origin, history and definition of medical records.
  - 18.02 Describe the functions of the medical record department, i.e., data collecting, filing, retrieving, coding, indexing, etc.
  - 18.03 Explain the classification and functions of health information management personnel and chain of command.
  - 18.04 State reasons medical records are important in the health care delivery system.
  - 18.05 Explain different filing systems used in health care institutions.
  - 18.06 Describe the development of the medical record.
  - 18.07 Explain the importance of the medical record in relation to state and federal agencies, accrediting and licensing agencies.
  - 18.08 Demonstrate the use of a master patient index (MPI) system.
- 19.0 Demonstrate ethical and legal principles with regard to the use of medical records. – The student will be able to:
- 19.01 Explain the importance of maintaining ethical and legal standards in compiling and using medical records.
  - 19.02 Discuss the Code of Ethics of the American Health Information Management Association.
  - 19.03 Explain the scope of practice of the medical coder/biller.
  - 19.04 Demonstrate ethical coding practices as outlined by AHIMA.
- 20.0 Demonstrate understanding of medical billing. – The student will be able to:
- 20.01 Complete HCFA 1500 or comparable claim form.
  - 20.02 Compare and contrast various reimbursement entities.
  - 20.03 Identify sources of payment, including patient and third parties.
  - 20.04 Use medical billing software.
  - 20.05 Perform electronic claims billing and submission.
  - 20.06 Interpret explanation of benefits (EOBs) and explanation of Medicare benefits (EOMBs).
  - 20.07 Analyze claims rejection, correct and resubmit for payment.

- 20.08 Explain the relationship of Medicare Severity Diagnosis Related Groups (MS-DRGs) and Ambulatory Patient Classifications (APCs).
- 20.09 Identify the various external regulating agencies and their impact on the coding systems.

**2011-2012**

**Florida Department of Education  
Curriculum Framework**

**Program Title:**        **Healthcare Informatics Specialist**  
**Career Cluster:**     **Health Science**

<b>CCC</b>

Program Type	College Credit Certificate (CCC)
Program Length	18 credit hours
CTSO	HOSA
SOC Codes (all applicable)	31-9099, 29-2071
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>

### **Purpose**

This certificate program is part of the Health Information Management AS/AAS degree program (1317050600).

A College Credit Certificate consists of a program of instruction of less than sixty (60) credits of college-level courses, which is part of an AS or AAS degree program and prepares students for entry into employment (Rule 6A-14.030, F.A.C.).

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

This program is designed to prepare students for employment as entry level Healthcare Informatics Specialists or to provide supplemental training for persons previously or currently employed in related health record occupations.

The content includes but is not limited to biomedical sciences, including anatomy and physiology, medical terminology, pharmacology and pathophysiology, health care delivery systems, basic principles of healthcare informatics; electronic health/medical record systems; data and workflow management concepts; and project management skills specific to healthcare informatics, ethical and legal concepts, health data content, clinical classification systems, organization and supervision, quality and performance improvement, healthcare statistics and research, reimbursement methodologies, professional practice experiences, and employability skills.

## **Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

## **Special Notes**

The cooperative method of instruction or clinical rotation is appropriate for this program. Whenever these methods are offered, the following is required for each student: a training plan, signed by the student, teacher, and employer, which includes instructional objectives and a list of on-the-job and in-school learning experiences; and a work station which reflects equipment, skills, and tasks which are relevant to the occupation which the student has chosen as a career goal. The student may receive compensation for work performed.

Faculty teaching this program must have a minimum of an AS degree in Healthcare Informatics, Nursing, Health Information Management -

Students should be encouraged to become members and participate in the activities of the professional organizations: American Health Information Management Association (AHIMA), Healthcare Information and Management Systems Society (HIMSS), American Informatics Association, and other discipline-specific professional informatics organizations.

Outcomes 01-11 are referred to as the Health Information Technology core and do not have to be completed if the students has previously completed the core in another program at any level. The Core should be taken first or concurrently with the first course in the program.

## **Career and Technical Student Organization (CTSO)**

Health Occupations Students of America, (HOSA) Inc. is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

## **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

## Standards

After successfully completing this course the student will be able to perform the following:

- 01.0 Demonstrate an understanding of the healthcare delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Explore health informatics and information management as a profession.
- 04.0 Demonstrate an understanding of health data concepts.
- 05.0 Describe the functions of a health record
- 06.0 Demonstrate a basic understanding of Health Information Technology.
- 07.0 Discuss classification systems, clinical vocabularies and terminologies.
- 08.0 Explore ethical issues in Health Informatics and Information Management
- 09.0 Identify the importance of privacy and health records law in healthcare.
- 10.0 Demonstrate computer knowledge and skills
- 11.0 Demonstrate employability skills.
- 12.0 Utilize appropriate health services organizational and delivery systems regulations related to information technology.
- 13.0 Demonstrate a basic understanding of the various informatics related disciplines.
- 14.0 Demonstrate proficiency in electronic health/medical record systems and work flow management.
- 15.0 Demonstrate an understanding of the fundamental principles related to health record data and work flow management.
- 16.0 Apply project management principles and practices to health informatics activities.
- 17.0 Demonstrate proficiency in the application and integration of healthcare informatics concepts and skills.
- 18.0 Utilize Healthcare Informatics publications, journals, websites, and associated references to retrieve relevant information.
- 19.0 Demonstrate ethical and legal principles with regard to the use of electronic medical records.

2011-2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:       Healthcare Informatics Specialist**  
**CIP Number: 0317050611**  
**Program Length:     18 credit hours**  
**SOC Code(s):        31-9099, 29-2071**

This certificate program is part of the Health Information Management AS/AAS degree program (1317050600). At the completion of this program, the student will be able to:

Outcomes 01-11 are referred to as the Health Information Technology core and do not have to be completed if the students has previously completed the core in another program at any level. The Core should be taken first or concurrently with the first course in the program.

- 01.0 Demonstrate an understanding of the healthcare delivery system and health occupations.
- 01.01 Discuss the evolution of health care.
  - 01.02 Demonstrate an understanding of the infrastructure of healthcare in the United States.
  - 01.03 Discuss regulatory agencies and organizations within the healthcare delivery system
  - 01.04 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:
- 02.01 Develop basic speaking and active listening skills.
  - 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
  - 02.03 Identify characteristics of successful and unsuccessful communication including barriers.
  - 02.04 Respond to verbal and non-verbal cues.
  - 02.05 Compose written communication using correct spelling, grammar, formatting and confidentiality.
  - 02.06 Use appropriate medical terminology and abbreviations.
  - 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
  - 02.08 Recognize the importance of patient/client educations regarding healthcare.
  - 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
  - 02.10 Recognize elements of communication using a sender-receiver model.
  - 02.11 Distinguish between and report subjective and objective information.
  - 02.12 Report relevant information in order of occurrence.
- 03.0 Explore health informatics and information management as a profession.
- 03.01 Discuss the history of health information management.
  - 03.02 Discuss the professional opportunities within the health information management profession.
  - 03.03 Demonstrate knowledge of professional associations within HIM.

- 04.0 Demonstrate an understanding of health data concepts.
  - 04.01 Describe the various uses of health data.
  - 04.02 Describe various characteristics of data quality.
  
- 05.0 Describe the functions of a health record
  - 05.01 Demonstrate an understanding of the various formats of the health record.
  - 05.02 Explain the various uses of a health record.
  - 05.03 Follow medical records policies and procedures for security, including confidentiality.
  
- 06.0 Demonstrate a basic understanding of Health Information Technology.
  - 06.01 Discuss how healthcare reform legislation can and does affect the HIT field.
  - 06.02 Interpret information from Electronic Health Records (EHR) and applications in healthcare
  - 06.03 Demonstrate an understanding of creation, use, and purpose of the electronic health record.
  
- 07.0 Discuss classification systems, clinical vocabularies and terminologies.
  - 07.01 Demonstrate knowledge of administrative terminologies as they relate to HIM.
  - 07.02 Demonstrate knowledge of clinical terminologies as they relate to HIM.
  
- 08.0 Explore ethical issues in Health Informatics and Information Management
  - 08.01 Describe the code of ethics consistent with healthcare occupations.
  - 08.02 Recognize ethical issues related to health information technology.
  - 08.03 Recognize ethical issues related to coding and billing/medical transcription.
  
- 09.0 Identify the importance of privacy and health records law in healthcare.
  - 09.01 Identify standards of the Health Insurance Portability and Accountability Act (HIPAA).
  - 09.02 Define and explain how to create a legal patient record.
  
- 10.0 Demonstrate computer knowledge and skills
  - 10.01 Demonstrate keyboarding skills
  - 10.02 Demonstrate the ability to save files and retrieve files from your computer.
  - 10.03 Demonstrate ability to connect to the internet
  - 10.04 Demonstrate ability to perform research on the internet by identifying reliable websites.
  - 10.05 Demonstrate ability to send and receive e-mail.
  - 10.06 Demonstrate ability to send messages with attached files.
  - 10.07 Demonstrate ability in word processing to create, edit, save, and print a Microsoft Word document.
  - 10.08 Demonstrate the ability to create and present a Microsoft PowerPoint project.
  
- 11.0 Demonstrate employability skills. – The student will be able to:
  - 11.01 Identify personal traits or attitudes desirable in a member of the healthcare team.
  - 11.02 Define basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. courtesy and self-introductions).
  - 11.03 Identify documents that may be required when applying for a job.

- 11.04 Write an appropriate resume.
- 11.05 Conduct a job search.
- 11.06 Complete a job application form correctly.
- 11.07 Demonstrate competence in job interview techniques.
- 11.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
- 11.09 Identify acceptable work habits.
- 11.10 Recognize appropriate affective/professional behavior.
- 11.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).

**Healthcare Informatics Specialist: Students completing intended outcomes 12-18 in this module meet the requirements for the completion OCP B of Healthcare Informatics Specialist. SOC Code 29-2071 (Medical Records and Health Information Technicians)**

- 12.0 Utilize appropriate health services organization, delivery system regulations and information technology and systems. – The student will be able to:
  - 12.01 Demonstrate knowledge of the purpose, organization, general functions and staffing of various types of healthcare facilities.
  - 12.02 Demonstrate basic knowledge of financial reimbursement systems.
  - 12.03 Demonstrate basic knowledge of healthcare computerization.
  - 12.04 Demonstrate basic knowledge of documentation, quality, compliance and regulatory requirements for healthcare organizations.
- 13.0 Demonstrate a basic understanding of the various informatics related disciplines. – The student will be able to:
  - 13.01 Identify key events in the history and development of the informatics discipline, including the present industry environment and future trends.
  - 13.02 Demonstrate comprehensive knowledge of health data standards related to the development of the computerized infrastructure necessary to support the implementation of electronic health/medical records.
  - 13.03 Explore the role of informatics professionals, specifically in the assessment of training needs and ethical practices to safeguard confidential health information.
  - 13.04 Explain the scope of practice of the healthcare informatics technician.
- 14.0 Demonstrate proficiency in electronic health/medical record systems and work flow management. – The student will be able to:
  - 14.01 Demonstrate the ability to research best practices and perform a needs assessment to determine the architecture and system specifications needed for selection of an electronic health/medical record system for specific healthcare environments.

- 14.02 Evaluate, select, and implement information technologies to manage health data and systems in various healthcare settings, i.e. hospitals, clinics, physician practices.
  - 14.03 Identify technological and behavioral barriers and potential solutions associated with electronic health/medical record implementation initiatives.
  - 14.04 Explore the influence and scope of electronic health/medical record system practices on a global and international scale.
- 15.0 Demonstrate an understanding of the fundamental principles related to health record data and work flow management. – The student will be able to:
- 15.01 Demonstrate an understanding of the architectural and operational components of an integrated health management information system.
  - 15.02 Demonstrate knowledge of health/medical record relational database design, management, and data warehousing/mining for decision support.
  - 15.03 Demonstrate the ability to utilize data flow diagrams and process design and redesign methodologies.
- 16.0 Apply project management principles and practices to health informatics activities. – The student will be able to:
- 16.01 Demonstrate an understanding of the definition and general principles of healthcare informatics project management.
  - 16.02 Demonstrate skills associated with planning, executing, and tracking a healthcare informatics project.
  - 16.03 Demonstrate abilities related to managing work teams, allocating project resources, and resolving problems associated with a healthcare informatics project.
- 17.0 Demonstrate proficiency in the application and integration of healthcare informatics concepts and skills through hands-on practicum/clinical projects and assignments. – The student will be able to:
- 17.01 Explore the role and responsibilities of the health informatics specialist as team leader and/or project manager.
  - 17.02 Apply knowledge and skills related to organization or electronic health/medical record operations, personnel, equipment and resources.
  - 17.03 Critique real-world applications of healthcare informatics principles and practices.
  - 17.04 Demonstrate assimilation of knowledge and skills necessary for entry-level performance as a health informatics specialist.
  - 17.05 Demonstrate an understanding of the definition and general principles of healthcare informatics project management.
  - 17.06 Demonstrate skills associated with planning, executing, and tracking a healthcare informatics project.
  - 17.07 Demonstrate abilities related to managing work teams, allocating project resources, and resolving problems associated with a healthcare informatics project.
- 18.0 Utilize healthcare informatics publications, journals, web sites, and associated references to retrieve relevant information. – The student will be able to:

- 18.01 Demonstrate the ability to identify credible informatics resources relevant to the content, applications, and assignments.
- 18.02 Utilize case studies and best practices in informatics projects and course work.
- 19.0 Demonstrate ethical and legal principles with regard to the use of electronic medical records. – The student will be able to:
  - 19.01 Explain the importance of maintaining ethical and legal standards in compiling and using paper-based and electronic health/medical records.
  - 19.02 Discuss the Code of Ethics of the American Health Information Management Association and other informatics related professional organizations.
  - 19.03 Explain the scope of practice of the healthcare informatics specialist.
  - 19.04 Demonstrate ethical professional practices related to privacy and security of patient information.
  - 19.05 Demonstrate basic knowledge of accreditation standards.
  - 19.06 Demonstrate basic knowledge of the licensure agencies.
  - 19.07 Demonstrate basic knowledge of healthcare legal and ethical issues.

**2011-2012**

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Pharmacy Management  
**Career Cluster:** Health Science

	<b>AS</b>	<b>AAS</b>
CIP Number	1317050702	0317050702
Program Type	College Credit	College Credit
Standard Length	70 credit hours	70 credit hours
CTSO	HOSA, Skills USA	HOSA, Skills USA
SOC Codes (all applicable)	41-1011, 29-2052, 31-9099	41-1011, 29-2052, 31-9099

Perkins Technical Skill Attainment Inventory	<a href="http://www.fl DOE.org/workforce/perkins/perkins_resources.asp">http://www.fl DOE.org/workforce/perkins/perkins_resources.asp</a>	

### **Purpose**

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

The program is designed to prepare students for employment as a Senior/Lead Pharmacy Technician, Pharmacy Technician Coordinator, Pharmacy Manager/Supervisor trainee, drugstore/pharmacy managers , purchasing managers or SOC 41-1011 (First line supervisors/Manager of Retail sales worker), or to provide supplemental training for persons previously or currently employed in these occupations.

This program focuses on broad, transferable skills and stresses understanding and demonstration of the following elements of the health care industry; planning, management, finance, technical and production skills, underlying principles of technology, labor issues, community issues and health, safety, and environmental issues.

The content includes but is not limited to metric system, medical terminology, medicinal drugs, pharmaceutical compounding, USP 795 standards, sterile techniques, USP 797 standards, maintenance of inventory, IV preparation, , receiving and handling of hazardous materials , preparing purchase orders, receiving and checking supplies purchased, printing labels, typing prescription labels, delivering medications, pricing prescription drug orders and supplies, prepackaging unit dose packages, patient record systems, control records, data processing

automation in pharmacy, computer application, employability skills, leadership and human relations skills, health and safety, including CPR. The Health Science Core must be taken by all students (secondary, postsecondary adult and postsecondary vocational) planning to complete any Health Science program. Once successfully completed, the core does not need to be repeated at any instructional level.

### **Program Structure**

This program is a planned sequence of instruction consisting of 70 credit hours.

### **Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

Clinical practicum experiences are an integral part of this program.

### **Special Notes**

This program must be approved by the Board of Pharmacy. Program completers who wish to work as Pharmacy Technicians in the State of Florida must register with the Board of Pharmacy (465.014 F.S.).

This program meets the Department of Health HIV/AIDS Domestic Violence and Prevention of Medical Errors education requirements. Upon completion of this program, the instructor will provide a certificate to the student verifying that these requirements have been met.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635 F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

It is recommended that program completers take national pharmacy technician certification exam offered by the Pharmacy Technician Certification Board, 2215 Constitution Ave, Washington, DC 20037-2985, 202-429-7576. This certification is offered three times annually.

Cooperative training - OJT is appropriate for this program. When cooperative training is offered, the following is required for each student: a training plan, signed by the student, instructor and employer which includes instructional objectives and a list of on-the-job and in-school learning experiences; a workstation which reflects equipment, skills and tasks which are relevant to the occupations which the student has chosen as a career goal. Students must receive compensation for work performed.

Outcomes 01-11 are referred to as the Health Careers Core and do not have to be completed if the student has previously completed the Core in another health science program. The CORE should be taken first or concurrently with the first course in the program. Following the successful completion of the core, the student is eligible to take the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

## **Career and Technical Student Organization (CTSO)**

Health Occupations Students of America (HOSA), Inc. and Skills USA are the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

## **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

## **Articulation**

To be transferable statewide between institutions, this program must have been reviewed, and a "transfer value" assigned the curriculum content by the appropriate Statewide Course Numbering System discipline committee. This does not preclude institutions from developing specific articulation agreements with each other.

The following ATD program articulates credit into this degree program. These statewide articulation agreements have been approved by the Articulation Coordinating Committee.

Pharmacy Technician-ATD (0317.050703/0317.050704) – 40 credit hours  
Pharmacy Technician-ATD (NEW) 0317050707– 40 credit hours

For details on existing articulation agreements, refer to [http://www.fldoe.org/workforce/dwdframe/artic\\_frame.asp](http://www.fldoe.org/workforce/dwdframe/artic_frame.asp).

## **Program Length**

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. The standard length of this program is 70 credit hours according to Rule 6A-14.030, F.A.C.

## **Standards**

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.
- 12.0 Practice human relations skills.
- 13.0 Identify medical and legal considerations.
- 14.0 Identify pharmaceutical abbreviations and terminology as related to Community Pharmacy Practice.
- 15.0 Perform clerical duties as related to Pharmacy Practice.
- 16.0 Demonstrate knowledge of basic pharmaceutical chemistry and drug classification as it relates to the human physiology.
- 17.0 Demonstrate knowledge of inventory control.
- 18.0 Initiate measurement and calculating techniques as it relates to Community Practice.
- 19.0 Demonstrate a basic knowledge of pharmaceutical chemistry as it relates to the human physiology.
- 20.0 Prepare and deliver medications
- 21.0 Prepackage unit dose medications.
- 22.0 Prepare intravenous admixtures.
- 23.0 Perform Consumer economic activities.
- 24.0 Perform decision making activities.
- 25.0 Demonstrate leadership skills.
- 26.0 Identify, classify, and demonstrate management activities.

2011-2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Pharmacy Management  
**CIP Numbers:** 1317050702 AS, 0317050702 AAS  
**Program Length:** 70 credit hours  
**SOC Code(s):** 41-1011, 29-2052, ~~31-9095~~, 31-9099

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. At the completion of this program, the student will be able to:

**Health Careers Core: The Health Careers Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Careers Core or any other health occupations program do not have to repeat intended outcomes 01-11.**

01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:

- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
- 01.02 Identify common methods of payment for healthcare services.
- 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
- 01.04 Describe the composition and functions of a healthcare team.
- 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
- 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
- 01.07 Identify characteristics of effective teams.
- 01.08 Recognize methods for building positive team relationships.
- 01.09 Analyze attributes and attitudes of an effective leader.
- 01.10 Recognize factors and situations that may lead to conflict.
- 01.11 Demonstrate effective techniques for managing team conflict.
- 01.12 Describe factors that influence the current delivery system of healthcare.
- 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.

02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:

- 02.01 Develop basic speaking and active listening skills.
- 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
- 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
- 02.04 Respond to verbal and non-verbal cues.

- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.
- 02.06 Use appropriate medical terminology and abbreviations.
- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
- 02.08 Recognize the importance of patient/client educations regarding healthcare.
- 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
- 02.10 Analyze elements of communication using a sender-receiver model.
- 02.11 Distinguish between and report subjective and objective information.
- 02.12 Report relevant information in order of occurrence.

03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:

- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
- 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
- 03.03 Demonstrate procedures for accurate documentation and record keeping.
- 03.04 Interpret healthcare facility policy and procedures.
- 03.05 Explain the “Patient’s Bill of Rights”.
- 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
- 03.07 Describe advance directives.
- 03.08 Describe informed consent.
- 03.09 Explain the laws governing harassment, labor and employment.
- 03.10 Differentiate between legal and ethical issues in healthcare.
- 03.11 Describe a code of ethics consistent with the healthcare occupation.
- 03.12 Identify and compare personal, professional, and organizational ethics.
- 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
- 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
- 03.15 Recognize and report abuse including domestic violence and neglect.
- 03.16 Distinguish among the five schedules of controlled substances.

04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:

- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
- 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
- 04.03 Identify psychological reactions to illness including defense mechanisms.
- 04.04 Identify complementary and alternative health practices.
- 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
- 04.06 Explain the basic concepts of positive self image, wellness and stress.
- 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
- 04.08 Explain the nutrition pyramid.

- 04.09 Recognize the steps in the grief process.
- 05.0 Recognize and practice safety and security procedures. – The student will be able to:
  - 05.01 Recognize safe and unsafe working conditions and report safety hazards.
  - 05.02 Demonstrate the safe use of medical equipment.
  - 05.03 Explain and apply the theory of root- cause analysis
  - 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
  - 05.05 Identify and practice security procedures for medical supplies and equipment.
  - 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions.
  - 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
  - 05.08 Demonstrate proper body mechanics and ergonomics.
  - 05.09 Demonstrate the procedure for properly identifying patients.
  - 05.10 Demonstrate procedures for the safe transport and transfer of patients.
  - 05.11 Describe fire, safety, disaster and evacuations procedures.
  - 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )
- 06.0 Recognize and respond to emergency situations. – The student will be able to:
  - 06.01 Monitor and record vital signs.
  - 06.02 Describe legal parameters relating to the administration of emergency care.
  - 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
  - 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.
- 07.0 Recognize and practice infection control procedures. – The student will be able to:
  - 07.01 Define principles of infection control including standard and transmission based precautions.
  - 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
  - 07.03 Demonstrate knowledge of surgical asepsis.
  - 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.
- 08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:
  - 08.01 Describe technology applications in healthcare.
  - 08.02 Define terms and demonstrate basic computer skills.
  - 08.03 Recognize technology applications in healthcare.
  - 08.04 Interpret information from electronic medical documents.
  - 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.

09.0 Demonstrate employability skills. – The student will be able to:

- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.
- 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
- 09.03 Identify documents that may be required when applying for a job.
- 09.04 Write an appropriate resume.
- 09.05 Conduct a job search.
- 09.06 Complete a job application form correctly.
- 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
- 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
- 09.09 Identify acceptable work habits.
- 09.10 Recognize appropriate affective/professional behavior.
- 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).

10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:

- 10.01 Recognize emerging diseases and disorders
- 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
- 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
- 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
- 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
- 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.

11.0 Apply basic math and science skills. – The student will be able to:

- 11.01 Draw, read, and report on graphs, charts and tables.
- 11.02 Measure time, temperature, distance, capacity, and mass/weight.
- 11.03 Make, use and convert using both traditional and metric units.
- 11.04 Make estimations and approximations and judge the reasonableness of the result.
- 11.05 Convert from regular to 24 hour time.
- 11.06 Demonstrate ability to evaluate and draw conclusions.
- 11.07 Organize and communicate the results obtained by observation and experimentation.
- 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
- 11.09 Calculate ratios

## Pharmacy Technician (12-22)

- 12.0 Practice human relation skills. -- The student will be able to:
- 12.01 Identify the meaning and duties of a pharmacy technician.
  - 12.02 Discuss the organizational flow of responsibilities within a pharmacy setting.
  - 12.03 Establish and maintain a professional rapport with co-workers.
  - 12.04 Demonstrate an understanding of the Situation Background Assessment Recommendation (SBAR) communication model.
  - 12.05 Identify the current trends and perspectives related to the management of pharmacy health care organizations.
  - 12.06 Identify the means by which the application of team building can facilitate change within the pharmacy working environment.
- 13.0 Identify pharmaceutical abbreviations and terminology as related to community pharmacy practice. -- The student will be able to:
- 13.01 Use pharmaceutical medical terminology.
  - 13.02 Define the major symbols and abbreviations used on prescriptions and state the meaning.
- 14.0 Identify medical and legal considerations. -- The student will be able to:
- 14.01 Discuss the significance and scope of current national and Florida law and administrative rules as they relate to the practice of the pharmacy technician.
  - 14.02 Discuss medical legal concepts as they relate to the practice of the pharmacy technician.
  - 14.03 Discuss the need for accurate pharmacy documentation and recordkeeping.
  - 14.04 State valid reasons for confidentiality of patient information.
  - 14.05 Discuss the patient's Bill of Rights as it relates to pharmacy.
  - 14.06 Discuss pertinent laws governing pharmacy practice such as false prescriptions and an impaired person.
  - 14.07 Identify controlled substance and their applicable regulations.
  - 14.08 Discuss the Florida Right to Know Act with respect to hazardous materials.
  - 14.09 Implement appropriate THE JOINT COMMISSION patient safety goals.
- 15.0 Perform clerical duties. -- The student will be able to:
- 15.01 Identify computer applications used in pharmacy.
  - 15.02 Demonstrate computer applications in processing pharmacy prescription data.
  - 15.03 Identify the application of facsimile equipment in generating patient prescriptions.
  - 15.04 Demonstrate the application of office equipment in duplicating patient prescriptions.
  - 15.05 Maintain patient profiles.
  - 15.06 Demonstrate telephone communication skills and routine inquiries.
  - 15.07 Identifies appropriate practice standards pertaining to patient counseling.
  - 15.08 Demonstrate the knowledge of systems used in maintaining pharmacy records.

- 16.0 Demonstrate knowledge of basic pharmaceutical chemistry and drug classification as it relates to the human physiology.-- The student will be able to:
- 16.01 Define the major classifications of pharmaceuticals.
  - 16.02 Identify the sources from which medications are produced.
  - 16.03 Define poison; define placebo.
  - 16.04 List the two official compendia of standards for quality and purity of drugs and authoritative information on dosage and administration and list six non-official reference manuals.
  - 16.05 Display knowledge of trade names and generic name equivalents, chemical names.
- 17.0 Demonstrate knowledge of inventory control. -- The student will be able to:
- 17.01 Display knowledge of prescription pricing systems used in pharmacy.
  - 17.02 Maintain stock inventory.
  - 17.03 Prepare electronic purchase orders.
  - 17.04 Receive, store and distribute pharmaceutical supplies.
  - 17.05 Define industry standards in purchasing pharmaceutical supplies.
  - 17.06 Define industry standards in management of Investigational Drugs
  - 17.07 Display knowledge of purchasing, storage and disposal of Pharmaceutical materials
- 18.0 Initiate measurement and calculating techniques as it relates to community practice. -- The student will be able to:
- 18.01 Explain the difference between a cubic centimeter and a milliliter.
  - 18.02 Use common pharmaceutical weighing equipment.
  - 18.03 Use common pharmaceutical volume measurement equipment.
  - 18.04 Display knowledge of United States Pharmacopeia (USP) 795 standards
  - 18.05 Explain the technique of preparing common pharmaceutical compounds.
  - 18.06 Convert measurements within the apothecary, avoirdupois, and metric systems.
  - 18.07 Demonstrate knowledge of common pharmaceutical calculations.
- 19.0 Demonstrate a basic knowledge of pharmaceutical chemistry as it relates to the human physiology.--The student will be able to:
- 19.01 Predict physical and chemical incompatibilities utilizing chemistry properties.
  - 19.02 Describe electrolyte balances.
  - 19.03 Relate the general classes, actions, routes, action and side effects of drugs.
  - 19.04 Identify a listing of usual adult doses of medications and respective contraindications.
- 20.0 Prepare and deliver medications. --The student will be able to:
- 20.01 Read and prepare medication orders correctly.
  - 20.02 Check all new orders with medications listed on profiles.

- 20.03 Transport medications safely being aware of hazards: theft, legal implications of accidental loss, and other consequences.
  - 20.04 Identify special precautions pertaining to children.
  - 20.05 Maintain controlled substance inventory.
  - 20.06 Demonstrate the proper technique of preparing pharmaceutical preparations.
  - 20.07 Demonstrate the ability to correctly fill and deliver medication cassettes.
  - 20.08 Collect data from medication administration record and drug use and evaluation form.
  - 20.09 Identify and demonstrate use of automated medication dispensing equipment
- 21.0 Prepackage unit dose medications.--The student will be able to:
- 21.01 Locate correct stock container.
  - 21.02 Weigh measure, count required individual doses of medication.
  - 21.03 Label with required information.
  - 21.04 Operate unit dose packaging equipment.
  - 21.05 Place individual dose in appropriate containers, repackage in predetermined quantities.
  - 21.06 Prepackage unit dose hazardous drugs.
  - 21.07 Record prepackaged medication data correctly.
  - 21.08 Define role of technician in quality assurance activities.
- 22.0 Prepare intravenous admixtures.--The student will be able to:
- 22.01 Compare medication order with label on vial and check expiration date of product.
  - 22.02 Calculate drug dosage for parenteral use.
  - 22.03 Identify common drug/drug incompatibilities.
  - 22.04 Reconstitute parenteral medications.
  - 22.05 Use aseptic techniques to withdraw medication from stock vial measure correct quantity as instructed, select and insert it into IV solution without error.
  - 22.06 Use aseptic technique to withdraw medication from an ampule.
  - 22.07 Prepare parenteral solutions and discuss current intravenous preparation industry trends.
  - 22.08 Prepare Total Parenteral Nutrition solutions.
  - 22.09 Prepare chemotherapeutic agents using proper safety techniques.
  - 22.10 Demonstrate appropriate technique in the use of specialized equipment such as: laminar flow hoods, filters, pumps,,automated compounders, and barrier isolator.
  - 22.11 Place label on IV solution container and keep records.
  - 22.12 Perform quality control check.
  - 22.13 Identify storage requirements of reconstituted IV solutions.
  - 22.14 Display knowledge of United States Pharmacopeia (USP) 797 regulations and the quality assurance required.

## **Pharmacy Management (23.0-26.0)**

- 23.0 Perform consumer economic activities. – The student will be able to:
  - 23.01 Identify basic concepts of the American economic system.
  - 23.02 Identify basic types and sources of consumer credit.
  
- 24.0 Perform decision making activities. – The student will be able to:
  - 24.01 Demonstrate the ability to determine the proper priority of work.
  - 24.02 Prepare a day's schedule for the employer.
  - 24.03 Choose appropriate action in situations requiring application of business ethics.
  - 24.04 Choose appropriate action in situations requiring following a chain of command.
  - 24.05 Choose appropriate action in situations requiring effective time management.
  
- 25.0 Demonstrate leadership skills. – The student will be able to:
  - 25.01 Prepare an agenda.
  - 25.02 Demonstrate the ability to conduct an orderly meeting.
  - 25.03 Greet and introduce individuals.
  - 25.04 Demonstrate ability to give clear directions, fair assignments & constructive criticism.
  - 25.05 Demonstrate ability to manage a team.
  
- 26.0 Identify, classify, and demonstrate management activities. – The student will be able to:
  - 26.01 Define management.
  - 26.02 Identify various management positions.
  - 26.03 Identify various management styles.
  - 26.04 Identify the major functions of management.
  - 26.05 Classify activities as part of the planning function of management.
  - 26.06 Classify activities as part of the organizing function of management.
  - 26.07 Classify activities as part of the staffing function of management.
  - 26.08 Classify activities as part of the directing function of management.
  - 26.09 Classify activities as part of the controlling function of management.
  - 26.10 Demonstrate the ability to perform planning, organizing, staffing, directing, and controlling activities of management.
  - 26.11 Demonstrate knowledge of the relationship between authority and responsibility to task accomplishment.
  - 26.12 Select the most effective communication systems.
  - 26.13 Identify problems and make appropriate decisions.

2011-2012

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Pharmacy Technician-ATD  
**Program Type:** ATD (Applied Technology Diploma)  
**Career Cluster:** Health Science

	CC	PSAV
Program Number	N/A	H170606
CIP Number	0317050703	0317050704
Grade Level	Applied Technology Diploma (ATD)	Applied Technology Diploma (ATD)
Standard Length	40 credit hours	1050 hours
CTSO	HOSA, Skills USA	HOSA, Skills USA
SOC Codes (all applicable)	31-9099, 31-9095, 29-2052	31-9099, 31-9095, 29-2052
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>	
Basic Skills Level	Mathematics: 11 Language: 10 Reading: 10	

### Purpose

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

The program is designed to prepare students for employment as pharmacy technicians SOC 29-2052

This program focuses on broad, transferable skills and stresses understanding and demonstration of the following elements of the health care industry; planning, management, finance, technical and production skills, underlying principles of technology, labor issues, community issues and health, safety, and environmental issues.

The content includes but is not limited to metric system, medical terminology, medicinal drugs, pharmaceutical compounding, USP 795 standards, sterile techniques, USP 797 standards, maintenance of inventory, IV preparation, , receiving and handling of hazardous materials , preparing purchase orders, receiving and checking supplies purchased, printing labels, typing prescription labels, delivering medications, pricing prescription drug orders and supplies, prepackaging unit dose packages, patient record systems, control records, data processing automation in pharmacy, computer application, employability skills, leadership and human

relations skills, health and safety, including CPR. The Health Science Core must be taken by all students (secondary, postsecondary adult and postsecondary vocational) planning to complete any Health Science program. Once successfully completed, the core does not need to be repeated at any instructional level.

### **Program Structure**

This program is an Applied Technology Diploma program that is part of a technical degree program, is less than 60 credit hours, and leads to employment in a specific occupation. An applied technology diploma program may consist of either technical credit or college credit. A public school district may offer an applied technology diploma program only as technical credit, with college credit awarded to a student upon articulation to a community college.

### **PSAV Program**

When offered at the district level, this program is a planned sequence of instruction consisting of three occupational completion points and the courses as shown below.

OCP	Course Number	Course Title	Length	SOC Code
A	HSC0003	Basic Healthcare Worker	90 hours	31-9099
B	PTN0080	Community Pharmacy Technician	360 hours	31-9095
C	PTN0082	Pharmacy Technician 1	300 hours	29-2052
	PTN0083	Pharmacy Technician 2	300 hours	29-2052

### **Community College**

When offered at the community college level, this ATD program is part of the Pharmacy Management AS/AAS program (1317050702) and has a program length of 40 credits.

### **Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

Clinical practicum experiences are an integral part of this program.

### **Special Notes**

Program completers who wish to work as Pharmacy Technicians in the State of Florida must register with the Board of Pharmacy (465.014 F.S.).

It is recommended that program completers take national pharmacy technician certification exam offered by the Pharmacy Technician Certification Board, 2215 Constitution Ave, Washington, DC 20037-2985, 202-429-7576. This certification is offered three times annually.

This program meets the Department of Health HIV/AIDS Domestic Violence and Prevention of Medical Errors education requirements. Upon completion of this program, the instructor will provide a certificate to the student verifying that these requirements have been met.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635 F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

Outcomes 01-11 are referred to as the Health Science Core and do not have to be completed if the student has previously completed the Core in another health occupations program at any level. The Core should be taken first or concurrently with the first course in the program. Following the successful completion of the core, the student is eligible to take the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

### **Career and Technical Student Organization (CTSO)**

Health Occupations Students of America (HOSA), Inc. and Skills USA are the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

### **Basic Skills**

In PSAV programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C. the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Mathematics 11, Language 10, and Reading 10. These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination. Students may be exempt from meeting the Basic Skills requirements by earning an eligible industry certification. See the Basic Skills Exemption List document for a list of eligible industry certifications (<http://www.fldoe.org/workforce/dwdframe/rtf/basic-skills.rtf>).

Adult students with disabilities, as defined in Section 1004.02(7), Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01(3)(a), F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91(3), F.S.

Students who possess a college degree at the Associate of Applied Science level or higher; who have completed or are exempt from the college entry-level examination pursuant to Section 1008.29, F.S.; or who have passed a state, national, or industry licensure exam are exempt from meeting the Basic Skills requirement (Rule 6A-10.040, F.A.C.)

## **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Some secondary students with disabilities (ESE) may need additional time (i.e., longer than the regular school year), to master the student performance standards associated with a regular occupational completion point (OCP) or a modified occupational completion point (MOCP). If needed, a student may enroll in the same career and technical course more than once. Documentation should be included in the IEP that clearly indicates that it is anticipated that the student may need an additional year to complete an OCP/MOCP. The student should work on different competencies and new applications of competencies each year toward completion of the OCP(s)/MOCP. After achieving the competencies identified for the year, the student earns credit for the course. It is important to ensure that credits earned by students are reported accurately. The district's information system must be designed to accept multiple credits for the same course number (for eligible students with disabilities). For further information, see Rule 6A-6.0312, F.A.C., Course Modifications for Exceptional Students, and the latest pertinent Technical Assistance Paper (<http://www.fldoe.org/ease/tap-home.asp>).

## **Articulation**

The information related to the guaranteed transfer of credit between an applied technology diploma program and AS/AAS degree must be documented and maintained by the Articulation Coordinating Committee (ACC). The transfer of the applied technology diploma to an AS/AAS degree is guaranteed for a period of three (3) years following the date of the award of the applied technology diploma.

## **Program Length**

In accordance with Rule 6A-10.024, F.A.C. an Applied Technology Diploma program consists of a course of study that is part of an AS/AAS degree program, is less than 60 credit hours, is approximately 50% of the technical component (non-general education), and leads to employment in a specific occupation. An applied technology diploma program may consist of either technical credit or college credit.

Students must have a high school diploma, a GED, or a certificate of completion to be admitted to an applied technology diploma program. Within six weeks of entry, students in ATD programs of 450 or more hours must be tested pursuant to Rule 6A-10.040, F.A.C. and if below minimum standards for completion from the program, must receive remedial instruction. The minimum standards must be at least the equivalent of a score of ten (10) on all sections of basic

skills test approved in Rule 6A-10.040, F.A.C. Students must successfully complete all remedial instruction before completing the Applied Technology Diploma.

Community Colleges may offer either college or career credit toward the applied technology diploma. A Career Center in a public school district may offer an applied technology diploma program only as technical credit, with college credit awarded to a student upon articulation to a community college (Section 1004.02, F.S.)

When offered at a community college the standard length of this program is 40 credits. When offered at a technical center the standard length of this program is 1050 clock hours.

In accordance with Rule 6A-10.024, F.A.C. all faculty providing instruction must have at least a baccalaureate degree or an associate degree with demonstrated competencies in the specific instructional program as defined by the Southern Association of Colleges and Schools.

## **Standards**

After successfully completing this program the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.
- 12.0 Practice human relations.
- 13.0 Identify medical and legal considerations.
- 14.0 Identify pharmaceutical abbreviations and terminology as related to Community Pharmacy Practice.
- 15.0 Perform clerical duties as related to Pharmacy Practice.
- 16.0 Demonstrate knowledge of basic pharmaceutical chemistry and drug classification as it relates to the human physiology.
- 17.0 Demonstrate knowledge of inventory control.
- 18.0 Initiate measurement and calculating techniques as it relates to Community Practice.
- 19.0 Demonstrate a basic knowledge of pharmaceutical chemistry as it relates to the human physiology.
- 20.0 Prepare and deliver medications.
- 21.0 Prepackage unit dose medications.
- 22.0 Prepare intravenous admixtures.

2011-2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Pharmacy Technician-ATD  
**PSAV Number:** H170606

When this program is offered at the PSAV level, the following organization of courses, standards, and benchmarks apply.

**PSAV Course Number:** HSC0003  
**Occupational Completion Point:** A  
**Basic Healthcare Worker – 90 Hours – SOC Code 31-9099**

**Health Careers Core:** The Health Careers Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Careers Core or any other health occupations program do not have to repeat intended outcomes 01-11.

01.0 Demonstrate knowledge of the health care delivery system and health occupations. –

The student will be able to:

- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
- 01.02 Identify common methods of payment for healthcare services.
- 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
- 01.04 Describe the composition and functions of a healthcare team.
- 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
- 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
- 01.07 Identify characteristics of effective teams.
- 01.08 Recognize methods for building positive team relationships.
- 01.09 Analyze attributes and attitudes of an effective leader.
- 01.10 Recognize factors and situations that may lead to conflict.
- 01.11 Demonstrate effective techniques for managing team conflict.
- 01.12 Describe factors that influence the current delivery system of healthcare.
- 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.

02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:

- 02.01 Develop basic speaking and active listening skills.
- 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
- 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
- 02.04 Respond to verbal and non-verbal cues.
- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.

- 02.06 Use appropriate medical terminology and abbreviations.
- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
- 02.08 Recognize the importance of patient/client educations regarding healthcare.
- 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
- 02.10 Analyze elements of communication using a sender-receiver model.
- 02.11 Distinguish between and report subjective and objective information.
- 02.12 Report relevant information in order of occurrence.

03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:

- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
- 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
- 03.03 Demonstrate procedures for accurate documentation and record keeping.
- 03.04 Interpret healthcare facility policy and procedures.
- 03.05 Explain the “Patient’s Bill of Rights”.
- 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
- 03.07 Describe advance directives.
- 03.08 Describe informed consent.
- 03.09 Explain the laws governing harassment, labor and employment.
- 03.10 Differentiate between legal and ethical issues in healthcare.
- 03.11 Describe a code of ethics consistent with the healthcare occupation.
- 03.12 Identify and compare personal, professional, and organizational ethics.
- 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
- 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
- 03.15 Recognize and report abuse including domestic violence and neglect.
- 03.16 Distinguish among the five schedules of controlled substances.

04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:

- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
- 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
- 04.03 Identify psychological reactions to illness including defense mechanisms.
- 04.04 Identify complementary and alternative health practices.
- 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
- 04.06 Explain the basic concepts of positive self image, wellness and stress.
- 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
- 04.08 Explain the nutrition pyramid.
- 04.09 Recognize the steps in the grief process.

05.0 Recognize and practice safety and security procedures. – The student will be able to:

- 05.01 Recognize safe and unsafe working conditions and report safety hazards.
- 05.02 Demonstrate the safe use of medical equipment.
- 05.03 Explain and apply the theory of root- cause analysis
- 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
- 05.05 Identify and practice security procedures for medical supplies and equipment.
- 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions).
- 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
- 05.08 Demonstrate proper body mechanics and ergonomics.
- 05.09 Demonstrate the procedure for properly identifying patients.
- 05.10 Demonstrate procedures for the safe transport and transfer of patients.
- 05.11 Describe fire, safety, disaster and evacuations procedures.
- 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )

06.0 Recognize and respond to emergency situations. – The student will be able to:

- 06.01 Monitor and record vital signs.
- 06.02 Describe legal parameters relating to the administration of emergency care.
- 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
- 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.

07.0 Recognize and practice infection control procedures. – The student will be able to:

- 07.01 Define principles of infection control including standard and transmission based precautions.
- 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
- 07.03 Demonstrate knowledge of surgical asepsis.
- 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.

08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:

- 08.01 Describe technology applications in healthcare.
- 08.02 Define terms and demonstrate basic computer skills.
- 08.03 Recognize technology applications in healthcare.
- 08.04 Interpret information from electronic medical documents.
- 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.

09.0 Demonstrate employability skills. – The student will be able to:

- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.
  - 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
  - 09.03 Identify documents that may be required when applying for a job.
  - 09.04 Write an appropriate resume.
  - 09.05 Conduct a job search.
  - 09.06 Complete a job application form correctly.
  - 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
  - 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
  - 09.09 Identify acceptable work habits.
  - 09.10 Recognize appropriate affective/professional behavior.
  - 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:
- 10.01 Recognize emerging diseases and disorders
  - 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
  - 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
  - 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
  - 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
  - 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.
- 11.0 Apply basic math and science skills. – The student will be able to:
- 11.01 Draw, read, and report on graphs, charts and tables.
  - 11.02 Measure time, temperature, distance, capacity, and mass/weight.
  - 11.03 Make, use and convert using both traditional and metric units.
  - 11.04 Make estimations and approximations and judge the reasonableness of the result.
  - 11.05 Convert from regular to 24 hour time.
  - 11.06 Demonstrate ability to evaluate and draw conclusions.
  - 11.07 Organize and communicate the results obtained by observation and experimentation.
  - 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
  - 11.09 Calculate ratios

**Course Number: PTN0080**  
**Occupational Completion Point: B**  
**Community Pharmacy Technician – 360 Hours – SOC Code 31-9095**

- 12.0 Practice human relation skills. -- The student will be able to:
- 12.01 Identify the meaning and duties of a pharmacy technician.
  - 12.02 Discuss the organizational flow of responsibilities within a pharmacy setting.
  - 12.03 Establish and maintain a professional rapport with co-workers.
  - 12.04 Demonstrate an understanding of the Situation Background Assessment Recommendation (SBAR) communication model.
  - 12.05 Identify the current trends and perspectives related to the management of pharmacy health care organizations.
  - 12.06 Identify the means by which the application of team building can facilitate change within the pharmacy working environment.
- 13.0 Identify pharmaceutical abbreviations and terminology as related to community pharmacy practice. -- The student will be able to:
- 13.01 Use pharmaceutical medical terminology.
  - 13.02 Define the major symbols and abbreviations used on prescriptions and state the meaning.
- 14.0 Identify medical and legal considerations. -- The student will be able to:
- 14.01 Discuss the significance and scope of current national and Florida law and administrative rules as they relate to the practice of the pharmacy technician.
  - 14.02 Discuss medical legal concepts as they relate to the practice of the pharmacy technician.
  - 14.03 Discuss the need for accurate pharmacy documentation and recordkeeping.
  - 14.04 State valid reasons for confidentiality of patient information.
  - 14.05 Discuss the patient's Bill of Rights as it relates to pharmacy.
  - 14.06 Discuss pertinent laws governing pharmacy practice such as false prescriptions and an impaired person.
  - 14.07 Identify controlled substance and their applicable regulations.
  - 14.08 Discuss the Florida Right to Know Act with respect to hazardous materials.
  - 14.09 Implement appropriate THE JOINT COMMISSION patient safety goals.
- 15.0 Perform clerical duties. -- The student will be able to:
- 15.01 Identify computer applications used in pharmacy.
  - 15.02 Demonstrate computer applications in processing pharmacy prescription data.
  - 15.03 Identify the application of facsimile equipment in generating patient prescriptions.
  - 15.04 Demonstrate the application of office equipment in duplicating patient prescriptions.
  - 15.05 Maintain patient profiles.
  - 15.06 Demonstrate telephone communication skills and routine inquiries.
  - 15.07 Identifies appropriate practice standards pertaining to patient counseling.
  - 15.08 Demonstrate the knowledge of systems used in maintaining pharmacy records.

- 16.0 Demonstrate knowledge of basic pharmaceutical chemistry and drug classification as it relates to the human physiology.-- The student will be able to:
- 16.01 Define the major classifications of pharmaceuticals.
  - 16.02 Identify the sources from which medications are produced.
  - 16.03 Define poison; define placebo.
  - 16.04 List the two official compendia of standards for quality and purity of drugs and authoritative information on dosage and administration and list six non-official reference manuals.
  - 16.05 Display knowledge of trade names and generic name equivalents, chemical names.
- 17.0 Demonstrate knowledge of inventory control. -- The student will be able to:
- 17.01 Display knowledge or prescription pricing systems used in pharmacy.
  - 17.02 Maintain stock inventory.
  - 17.03 Prepare electronic purchase orders.
  - 17.04 Receive, store and distribute pharmaceutical supplies.
  - 17.05 Define industry standards in purchasing pharmaceutical supplies.
  - 17.06 Define industry standards in management of Investigational Drugs
  - 17.07 Display knowledge of purchasing, storage and disposal of Pharmaceutical materials
- 18.0 Initiate measurement and calculating techniques as it relates to community practice. -- The student will be able to:
- 18.01 Explain the difference between a cubic centimeter and a milliliter.
  - 18.02 Use common pharmaceutical weighing equipment.
  - 18.03 Use common pharmaceutical volume measurement equipment.
  - 18.04 Display knowledge of United States Pharmacopeia (USP) 795 standards
  - 18.05 Explain the technique of preparing common pharmaceutical compounds.
  - 18.06 Convert measurements within the apothecary, avoirdupois, and metric systems.
  - 18.07 Demonstrate knowledge of common pharmaceutical calculations.

**Course Number: PTN0082**

**Occupational Completion Point: C**

**Pharmacy Technician 1 – 300 Hours – SOC Code 29-2052**

- 19.0 Demonstrate a basic knowledge of pharmaceutical chemistry as it relates to the human physiology.--The student will be able to:
- 19.01 Predict physical and chemical incompatibilities utilizing chemistry properties.
  - 19.02 Describe electrolyte balances.
  - 19.03 Relate the general classes, actions, routes, action and side effects of drugs.
  - 19.04 Identify a listing of usual adult doses of medications and respective contraindications.
- 20.0 Prepare and deliver medications. --The student will be able to:
- 20.01 Read and prepare medication orders correctly.

- 20.02 Check all new orders with medications listed on profiles.
- 20.03 Transport medications safely being aware of hazards: theft, legal implications of accidental loss, and other consequences.
- 20.04 Identify special precautions pertaining to children.
- 20.05 Maintain controlled substance inventory.
- 20.06 Demonstrate the proper technique of preparing pharmaceutical preparations.
- 20.07 Demonstrate the ability to correctly fill and deliver medication cassettes.
- 20.08 Collect data from medication administration record and drug use and evaluation form.
- 20.09 Identify and demonstrate use of automated medication dispensing equipment

**Course Number: PTN0083**

**Occupational Completion Point: C**

**Pharmacy Technician 2 – 300 Hours – SOC Code 29-2052**

- 21.0 Prepackage unit dose medications.--The student will be able to:
  - 21.01 Locate correct stock container.
  - 21.02 Weigh measure, count required individual doses of medication.
  - 21.03 Label with required information.
  - 21.04 Operate unit dose packaging equipment.
  - 21.05 Place individual dose in appropriate containers, repackage in predetermined quantities.
  - 21.06 Prepackage unit dose hazardous drugs.
  - 21.07 Record prepackaged medication data correctly.
  - 21.08 Define role of technician in quality assurance activities.
  
- 22.0 Prepare intravenous admixtures.--The student will be able to:
  - 22.01 Compare medication order with label on vial and check expiration date of product.
  - 22.02 Calculate drug dosage for parenteral use.
  - 22.03 Identify common drug/drug incompatibilities.
  - 22.04 Reconstitute parenteral medications.
  - 22.05 Use aseptic techniques to withdraw medication from stock vial measure correct quantity as instructed, select and insert it into IV solution without error.
  - 22.06 Use aseptic technique to withdraw medication from an ampule.
  - 22.07 Prepare parenteral solutions and discuss current intravenous preparation industry trends.
  - 22.08 Prepare Total Parenteral Nutrition solutions.
  - 22.09 Prepare chemotherapeutic agents using proper safety techniques.
  - 22.10 Demonstrate appropriate technique in the use of specialized equipment such as: laminar flow hoods, filters, pumps,,automated compounders, and barrier isolator.
  - 22.11 Place label on IV solution container and keep records.
  - 22.12 Perform quality control check.
  - 22.13 Identify storage requirements of reconstituted IV solutions.
  - 22.14 Display knowledge of United States Pharmacopeia (USP) 797 regulations and the quality assurance required.

2011-2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Pharmacy Technician-ATD  
**ATD CIP Number:** 0317050703  
**SOC Code(s):** 31-9099, 31-9095, 29-2052

When this program is offered by a community or state college, the following standards, and benchmarks apply.

**Health Careers Core: The Health Careers Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Careers Core or any other health occupations program do not have to repeat intended outcomes 01-11.**

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:
- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
  - 01.02 Identify common methods of payment for healthcare services.
  - 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
  - 01.04 Describe the composition and functions of a healthcare team.
  - 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
  - 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
  - 01.07 Identify characteristics of effective teams.
  - 01.08 Recognize methods for building positive team relationships.
  - 01.09 Analyze attributes and attitudes of an effective leader.
  - 01.10 Recognize factors and situations that may lead to conflict.
  - 01.11 Demonstrate effective techniques for managing team conflict.
  - 01.12 Describe factors that influence the current delivery system of healthcare.
  - 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:
- 02.01 Develop basic speaking and active listening skills.
  - 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
  - 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
  - 02.04 Respond to verbal and non-verbal cues.
  - 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.
  - 02.06 Use appropriate medical terminology and abbreviations.

- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
  - 02.08 Recognize the importance of patient/client educations regarding healthcare.
  - 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
  - 02.10 Analyze elements of communication using a sender-receiver model.
  - 02.11 Distinguish between and report subjective and objective information.
  - 02.12 Report relevant information in order of occurrence.
- 03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:
- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
  - 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
  - 03.03 Demonstrate procedures for accurate documentation and record keeping.
  - 03.04 Interpret healthcare facility policy and procedures.
  - 03.05 Explain the “Patient’s Bill of Rights”.
  - 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
  - 03.07 Describe advance directives.
  - 03.08 Describe informed consent.
  - 03.09 Explain the laws governing harassment, labor and employment.
  - 03.10 Differentiate between legal and ethical issues in healthcare.
  - 03.11 Describe a code of ethics consistent with the healthcare occupation.
  - 03.12 Identify and compare personal, professional, and organizational ethics.
  - 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
  - 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
  - 03.15 Recognize and report abuse including domestic violence and neglect.
  - 03.16 Distinguish among the five schedules of controlled substances.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:
- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
  - 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
  - 04.03 Identify psychological reactions to illness including defense mechanisms.
  - 04.04 Identify complementary and alternative health practices.
  - 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
  - 04.06 Explain the basic concepts of positive self image, wellness and stress.
  - 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
  - 04.08 Explain the nutrition pyramid.
  - 04.09 Recognize the steps in the grief process.
- 05.0 Recognize and practice safety and security procedures. – The student will be able to:

- 05.01 Recognize safe and unsafe working conditions and report safety hazards.
  - 05.02 Demonstrate the safe use of medical equipment.
  - 05.03 Explain and apply the theory of root- cause analysis
  - 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
  - 05.05 Identify and practice security procedures for medical supplies and equipment.
  - 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions).
  - 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
  - 05.08 Demonstrate proper body mechanics and ergonomics.
  - 05.09 Demonstrate the procedure for properly identifying patients.
  - 05.10 Demonstrate procedures for the safe transport and transfer of patients.
  - 05.11 Describe fire, safety, disaster and evacuations procedures.
  - 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )
- 06.0 Recognize and respond to emergency situations. – The student will be able to:
- 06.01 Monitor and record vital signs.
  - 06.02 Describe legal parameters relating to the administration of emergency care.
  - 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
  - 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.
- 07.0 Recognize and practice infection control procedures. – The student will be able to:
- 07.01 Define principles of infection control including standard and transmission based precautions.
  - 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
  - 07.03 Demonstrate knowledge of surgical asepsis.
  - 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.
- 08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:
- 08.01 Describe technology applications in healthcare.
  - 08.02 Define terms and demonstrate basic computer skills.
  - 08.03 Recognize technology applications in healthcare.
  - 08.04 Interpret information from electronic medical documents.
  - 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.
- 09.0 Demonstrate employability skills. – The student will be able to:
- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.

- 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
  - 09.03 Identify documents that may be required when applying for a job.
  - 09.04 Write an appropriate resume.
  - 09.05 Conduct a job search.
  - 09.06 Complete a job application form correctly.
  - 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
  - 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
  - 09.09 Identify acceptable work habits.
  - 09.10 Recognize appropriate affective/professional behavior.
  - 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:
- 10.01 Recognize emerging diseases and disorders
  - 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
  - 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
  - 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
  - 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
  - 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.
- 11.0 Apply basic math and science skills. – The student will be able to:
- 11.01 Draw, read, and report on graphs, charts and tables.
  - 11.02 Measure time, temperature, distance, capacity, and mass/weight.
  - 11.03 Make, use and convert using both traditional and metric units.
  - 11.04 Make estimations and approximations and judge the reasonableness of the result.
  - 11.05 Convert from regular to 24 hour time.
  - 11.06 Demonstrate ability to evaluate and draw conclusions.
  - 11.07 Organize and communicate the results obtained by observation and experimentation.
  - 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
  - 11.09 Calculate ratios

## **Pharmacy Technician (12-22)**

- 12.0 Practice human relation skills. -- The student will be able to:
- 12.01 Identify the meaning and duties of a pharmacy technician.
  - 12.02 Discuss the organizational flow of responsibilities within a pharmacy setting.
  - 12.03 Establish and maintain a professional rapport with co-workers.
  - 12.04 Demonstrate an understanding of the Situation Background Assessment Recommendation (SBAR) communication model.
  - 12.05 Identify the current trends and perspectives related to the management of pharmacy health care organizations.
  - 12.06 Identify the means by which the application of team building can facilitate change within the pharmacy working environment.
- 13.0 Identify pharmaceutical abbreviations and terminology as related to community pharmacy practice. -- The student will be able to:
- 13.01 Use pharmaceutical medical terminology.
  - 13.02 Define the major symbols and abbreviations used on prescriptions and state the meaning.
- 14.0 Identify medical and legal considerations. -- The student will be able to:
- 14.01 Discuss the significance and scope of current national and Florida law and administrative rules as they relate to the practice of the pharmacy technician.
  - 14.02 Discuss medical legal concepts as they relate to the practice of the pharmacy technician.
  - 14.03 Discuss the need for accurate pharmacy documentation and recordkeeping.
  - 14.04 State valid reasons for confidentiality of patient information.
  - 14.05 Discuss the patient's Bill of Rights as it relates to pharmacy.
  - 14.06 Discuss pertinent laws governing pharmacy practice such as false prescriptions and an impaired person.
  - 14.07 Identify controlled substance and their applicable regulations.
  - 14.08 Discuss the Florida Right to Know Act with respect to hazardous materials.
  - 14.09 Implement appropriate THE JOINT COMMISSION patient safety goals.
- 15.0 Perform clerical duties. -- The student will be able to:
- 15.01 Identify computer applications used in pharmacy.
  - 15.02 Demonstrate computer applications in processing pharmacy prescription data.
  - 15.03 Identify the application of facsimile equipment in generating patient prescriptions.
  - 15.04 Demonstrate the application of office equipment in duplicating patient prescriptions.
  - 15.05 Maintain patient profiles.
  - 15.06 Demonstrate telephone communication skills and routine inquiries.
  - 15.07 Identifies appropriate practice standards pertaining to patient counseling.
  - 15.08 Demonstrate the knowledge of systems used in maintaining pharmacy records.
- 16.0 Demonstrate knowledge of basic pharmaceutical chemistry and drug classification as it relates to the human physiology.-- The student will be able to:

- 16.01 Define the major classifications of pharmaceuticals.
  - 16.02 Identify the sources from which medications are produced.
  - 16.03 Define poison; define placebo.
  - 16.04 List the two official compendia of standards for quality and purity of drugs and authoritative information on dosage and administration and list six non-official reference manuals.
  - 16.05 Display knowledge of trade names and generic name equivalents, chemical names.
- 17.0 Demonstrate knowledge of inventory control. -- The student will be able to:
- 17.01 Display knowledge or prescription pricing systems used in pharmacy.
  - 17.02 Maintain stock inventory.
  - 17.03 Prepare electronic purchase orders.
  - 17.04 Receive, store and distribute pharmaceutical supplies.
  - 17.05 Define industry standards in purchasing pharmaceutical supplies.
  - 17.06 Define industry standards in management of Investigational Drugs
  - 17.07 Display knowledge of purchasing, storage and disposal of Pharmaceutical materials
- 18.0 Initiate measurement and calculating techniques as it relates to community practice. -- The student will be able to:
- 18.01 Explain the difference between a cubic centimeter and a milliliter.
  - 18.02 Use common pharmaceutical weighing equipment.
  - 18.03 Use common pharmaceutical volume measurement equipment.
  - 18.04 Display knowledge of United States Pharmacopeia (USP) 795 standards
  - 18.05 Explain the technique of preparing common pharmaceutical compounds.
  - 18.06 Convert measurements within the apothecary, avoirdupois, and metric systems.
  - 18.07 Demonstrate knowledge of common pharmaceutical calculations.
- 19.0 Demonstrate a basic knowledge of pharmaceutical chemistry as it relates to the human physiology.--The student will be able to:
- 19.01 Predict physical and chemical incompatibilities utilizing chemistry properties.
  - 19.02 Describe electrolyte balances.
  - 19.03 Relate the general classes, actions, routes, action and side effects of drugs.
  - 19.04 Identify a listing of usual adult doses of medications and respective contraindications.
- 20.0 Prepare and deliver medications. --The student will be able to:
- 20.01 Read and prepare medication orders correctly.
  - 20.02 Check all new orders with medications listed on profiles.
  - 20.03 Transport medications safely being aware of hazards: theft, legal implications of accidental loss, and other consequences.
  - 20.04 Identify special precautions pertaining to children.
  - 20.05 Maintain controlled substance inventory.
  - 20.06 Demonstrate the proper technique of preparing pharmaceutical preparations.
  - 20.07 Demonstrate the ability to correctly fill and deliver medication cassettes.

- 20.08 Collect data from medication administration record and drug use and evaluation form.
- 20.09 Identify and demonstrate use of automated medication dispensing equipment
- 21.0 Prepackage unit dose medications.--The student will be able to:
  - 21.01 Locate correct stock container.
  - 21.02 Weigh measure, count required individual doses of medication.
  - 21.03 Label with required information.
  - 21.04 Operate unit dose packaging equipment.
  - 21.05 Place individual dose in appropriate containers, repackage in predetermined quantities.
  - 21.06 Prepackage unit dose hazardous drugs.
  - 21.07 Record prepackaged medication data correctly.
  - 21.08 Define role of technician in quality assurance activities.
- 22.0 Prepare intravenous admixtures.--The student will be able to:
  - 22.01 Compare medication order with label on vial and check expiration date of product.
  - 22.02 Calculate drug dosage for parenteral use.
  - 22.03 Identify common drug/drug incompatibilities.
  - 22.04 Reconstitute parenteral medications.
  - 22.05 Use aseptic techniques to withdraw medication from stock vial measure correct quantity as instructed, select and insert it into IV solution without error.
  - 22.06 Use aseptic technique to withdraw medication from an ampule.
  - 22.07 Prepare parenteral solutions and discuss current intravenous preparation industry trends.
  - 22.08 Prepare Total Parenteral Nutrition solutions.
  - 22.09 Prepare chemotherapeutic agents using proper safety techniques.
  - 22.10 Demonstrate appropriate technique in the use of specialized equipment such as: laminar flow hoods, filters, pumps,,automated compounders, and barrier isolator.
  - 22.11 Place label on IV solution container and keep records.
  - 22.12 Perform quality control check.
  - 22.13 Identify storage requirements of reconstituted IV solutions.
  - 22.14 Display knowledge of United States Pharmacopeia (USP) 797 regulations and the quality assurance required.

2011 – 2012

**Florida Department of Education  
Curriculum Framework**

**Program Title: Pharmacy Technician (NEW)-ATD**  
**Program Type: ATD (Applied Technology Diploma)**  
**Career Cluster: Health Science**

	<b>CC</b>	<b>PSAV-NEW</b>
Program Number	N/A	H170700
CIP Number	0317050703	0317050707
Grade Level	Applied Technology Diploma (ATD)	Applied Technology Diploma (ATD)
Standard Length	40 credit hours	1050 hours
CTSO	HOSA, Skills USA	HOSA, Skills USA
SOC Codes (all applicable)	31-9099,29-2052	31-9099, 29-2052
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>	
Basic Skills Level	Mathematics: 11 Language: 10 Reading: 10	

### **Purpose**

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

The program is designed to prepare students for employment as pharmacy technicians SOC 29-2052

This program focuses on broad, transferable skills and stresses understanding and demonstration of the following elements of the health care industry; planning, management, finance, technical and production skills, underlying principles of technology, labor issues, community issues and health, safety, and environmental issues.

The content includes but is not limited to metric system, medical terminology, medicinal drugs, pharmaceutical compounding, USP 795 standards, sterile techniques, USP 797 standards, maintenance of inventory, IV preparation, , receiving and handling of hazardous materials , preparing purchase orders, receiving and checking supplies purchased, printing labels, typing prescription labels, delivering medications, pricing prescription drug orders and supplies, prepackaging unit dose packages, patient record systems, control records, data processing automation in pharmacy, computer application, employability skills, leadership and human

relations skills, health and safety, including CPR. The Health Science Core must be taken by all students (secondary, postsecondary adult and postsecondary vocational) planning to complete any Health Science program. Once successfully completed, the core does not need to be repeated at any instructional level.

### **Program Structure**

This program is an Applied Technology Diploma program that is part of a technical degree program, is less than 60 credit hours, and leads to employment in a specific occupation. An applied technology diploma program may consist of either technical credit or college credit. A public school district may offer an applied technology diploma program only as technical credit, with college credit awarded to a student upon articulation to a community college.

### **PSAV Program**

When offered at the district level, this program is a planned sequence of instruction consisting of two occupational completion points and the courses as shown below.

OCP	Course Number	Course Title	Length	SOC Code
A	HSC0003	Basic Healthcare Worker	90 hours	31-9099
B	PTN0084	Pharmacy Technician 1	360 hours	29-2052
	PTN0085	Pharmacy Technician 2	300 hours	29-2052
	PTN0086	Pharmacy Technician 3	300 hours	29-2052

### **Community College**

When offered at the community college level, this ATD program is part of the Pharmacy Management (AS/AAS) [1/0317050702] and has a program length of 40 credits.

### **Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

Clinical practicum experiences are an integral part of this program.

### **Special Notes**

This program must be approved by the Board of Pharmacy. Program completers who wish to work as Pharmacy Technicians in the State of Florida must register with the Board of Pharmacy (465.014 F.S.).

It is recommended that program completers take national pharmacy technician certification exam offered by the Pharmacy Technician Certification Board, 2215 Constitution Ave, Washington, DC 20037-2985, 202-429-7576. This certification is offered three times annually.

This program meets the Department of Health HIV/AIDS Domestic Violence and Prevention of Medical Errors education requirements. Upon completion of this program, the instructor will provide a certificate to the student verifying that these requirements have been met.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635 F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

Outcomes 01-11 are referred to as the Health Science Core and do not have to be completed if the student has previously completed the Core in another health occupations program at any level. The Core should be taken first or concurrently with the first course in the program. Following the successful completion of the core, the student is eligible to take the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

### **Career and Technical Student Organization (CTSO)**

Health Occupations Students of America (HOSA), Inc. and Skills USA are the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

### **Basic Skills**

In PSAV programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C. the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Mathematics 10, Language 10, and Reading 10. These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination. Students may be exempt from meeting the Basic Skills requirements by earning an eligible industry certification. See the Basic Skills Exemption List document for a list of eligible industry certifications (<http://www.fldoe.org/workforce/dwdframe/rtf/basic-skills.rtf>).

Adult students with disabilities, as defined in Section 1004.02(7), Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01(3)(a), F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91(3), F.S.

Students who possess a college degree at the Associate of Applied Science level or higher; who have completed or are exempt from the college entry-level examination pursuant to Section 1008.29, F.S.; or who have passed a state, national, or industry licensure exam are exempt from meeting the Basic Skills requirement (Rule 6A-10.040, F.A.C.)

## **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Some secondary students with disabilities (ESE) may need additional time (i.e., longer than the regular school year), to master the student performance standards associated with a regular occupational completion point (OCP) or a modified occupational completion point (MOCP). If needed, a student may enroll in the same career and technical course more than once. Documentation should be included in the IEP that clearly indicates that it is anticipated that the student may need an additional year to complete an OCP/MOCP. The student should work on different competencies and new applications of competencies each year toward completion of the OCP(s)/MOCP. After achieving the competencies identified for the year, the student earns credit for the course. It is important to ensure that credits earned by students are reported accurately. The district's information system must be designed to accept multiple credits for the same course number (for eligible students with disabilities). For further information, see Rule 6A-6.0312, F.A.C., Course Modifications for Exceptional Students, and the latest pertinent Technical Assistance Paper (<http://www.fldoe.org/ease/tap-home.asp>).

## **Articulation**

The information related to the guaranteed transfer of credit between an applied technology diploma program and AS/AAS degree must be documented and maintained by the Articulation Coordinating Committee (ACC). The transfer of the applied technology diploma to an AS/AAS degree is guaranteed for a period of three (3) years following the date of the award of the applied technology diploma.

## **Program Length**

In accordance with Rule 6A-10.024, F.A.C. an Applied Technology Diploma program consists of a course of study that is part of an AS/AAS degree program, is less than 60 credit hours, is approximately 50% of the technical component (non-general education), and leads to employment in a specific occupation. An applied technology diploma program may consist of either technical credit or college credit.

Students must have a high school diploma, a GED, or a certificate of completion to be admitted to an applied technology diploma program. Within six weeks of entry, students in ATD programs of 450 or more hours must be tested pursuant to Rule 6A-10.040, F.A.C. and if below minimum standards for completion from the program, must receive remedial instruction. The minimum standards must be at least the equivalent of a score of ten (10) on all sections of basic skills test approved in Rule 6A-10.040, F.A.C. Students must successfully complete all remedial instruction before completing the Applied Technology Diploma.

Community Colleges may offer either college or career credit toward the applied technology diploma. A Career Center in a public school district may offer an applied technology diploma program only as technical credit, with college credit awarded to a student upon articulation to a community college (Section 1004.02, F.S.)

When offered at a community college the standard length of this program is 40 credits. When offered at a technical center the standard length of this program is 1050 clock hours.

In accordance with Rule 6A-10.024, F.A.C. all faculty providing instruction must have at least a baccalaureate degree or an associate degree with demonstrated competencies in the specific instructional program as defined by the Southern Association of Colleges and Schools.

## **Standards**

After successfully completing this program the student will be able to perform the following:

- 12.0 Demonstrate knowledge of the health care delivery system and health occupations.
- 13.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 14.0 Demonstrate legal and ethical responsibilities.
- 15.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 16.0 Recognize and practice safety and security procedures.
- 17.0 Recognize and respond to emergency situations.
- 18.0 Recognize and practice infection control procedures.
- 19.0 Demonstrate an understanding of information technology applications in healthcare.
- 20.0 Demonstrate employability skills.
- 21.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 22.0 Apply basic math and science skills.
- 23.0 Practice human relations.
- 24.0 Identify medical and legal considerations.
- 25.0 Identify pharmaceutical abbreviations and terminology as related to Community Pharmacy Practice.
- 26.0 Perform clerical duties as related to Pharmacy Practice.
- 27.0 Demonstrate knowledge of basic pharmaceutical chemistry and drug classification as it relates to the human physiology.
- 28.0 Demonstrate knowledge of inventory control.
- 29.0 Initiate measurement and calculating techniques as it relates to Community Practice.
- 30.0 Demonstrate a basic knowledge of pharmaceutical chemistry as it relates to the human physiology.
- 31.0 Prepare and deliver medications.
- 32.0 Prepackage unit dose medications.
- 33.0 Prepare intravenous admixtures.

2011 – 2012

**Florida Department of Education  
Student Performance Standards**

**Program Title: Pharmacy Technician-ATD (NEW)**  
**PSAV Number: H170700**

When this program is offered at the PSAV level, the following organization of courses, standards, and benchmarks apply.

**PSAV Course Number: HSC0003**  
**Occupational Completion Point: A**  
**Basic Healthcare Worker – 90 Hours – SOC Code 31-9099**

01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:

- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
- 01.02 Identify common methods of payment for healthcare services.
- 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
- 01.04 Describe the composition and functions of a healthcare team.
- 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
- 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
- 01.07 Identify characteristics of effective teams.
- 01.08 Recognize methods for building positive team relationships.
- 01.09 Analyze attributes and attitudes of an effective leader.
- 01.10 Recognize factors and situations that may lead to conflict.
- 01.11 Demonstrate effective techniques for managing team conflict.
- 01.12 Describe factors that influence the current delivery system of healthcare.
- 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.

02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:

- 02.01 Develop basic speaking and active listening skills.
- 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
- 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
- 02.04 Respond to verbal and non-verbal cues.
- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.
- 02.06 Use appropriate medical terminology and abbreviations.
- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
- 02.08 Recognize the importance of patient/client educations regarding healthcare.

- 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
  - 02.10 Analyze elements of communication using a sender-receiver model.
  - 02.11 Distinguish between and report subjective and objective information.
  - 02.12 Report relevant information in order of occurrence.
- 03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:
- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
  - 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
  - 03.03 Demonstrate procedures for accurate documentation and record keeping.
  - 03.04 Interpret healthcare facility policy and procedures.
  - 03.05 Explain the “Patient’s Bill of Rights”.
  - 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
  - 03.07 Describe advance directives.
  - 03.08 Describe informed consent.
  - 03.09 Explain the laws governing harassment, labor and employment.
  - 03.10 Differentiate between legal and ethical issues in healthcare.
  - 03.11 Describe a code of ethics consistent with the healthcare occupation.
  - 03.12 Identify and compare personal, professional, and organizational ethics.
  - 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
  - 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
  - 03.15 Recognize and report abuse including domestic violence and neglect.
  - 03.16 Distinguish among the five schedules of controlled substances.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:
- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
  - 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
  - 04.03 Identify psychological reactions to illness including defense mechanisms.
  - 04.04 Identify complementary and alternative health practices.
  - 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
  - 04.06 Explain the basic concepts of positive self image, wellness and stress.
  - 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
  - 04.08 Explain the nutrition pyramid.
  - 04.09 Recognize the steps in the grief process.
- 05.0 Recognize and practice safety and security procedures. – The student will be able to:
- 05.01 Recognize safe and unsafe working conditions and report safety hazards.
  - 05.02 Demonstrate the safe use of medical equipment.

- 05.03 Explain and apply the theory of root- cause analysis
  - 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
  - 05.05 Identify and practice security procedures for medical supplies and equipment.
  - 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions.
  - 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
  - 05.08 Demonstrate proper body mechanics and ergonomics.
  - 05.09 Demonstrate the procedure for properly identifying patients.
  - 05.10 Demonstrate procedures for the safe transport and transfer of patients.
  - 05.11 Describe fire, safety, disaster and evacuations procedures.
  - 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )
- 06.0 Recognize and respond to emergency situations. – The student will be able to:
- 06.01 Monitor and record vital signs.
  - 06.02 Describe legal parameters relating to the administration of emergency care.
  - 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
  - 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.
- 07.0 Recognize and practice infection control procedures. – The student will be able to:
- 07.01 Define principles of infection control including standard and transmission based precautions.
  - 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
  - 07.03 Demonstrate knowledge of surgical asepsis.
  - 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.
- 08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:
- 08.01 Describe technology applications in healthcare.
  - 08.02 Define terms and demonstrate basic computer skills.
  - 08.03 Recognize technology applications in healthcare.
  - 08.04 Interpret information from electronic medical documents.
  - 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.
- 09.0 Demonstrate employability skills. – The student will be able to:
- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.
  - 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).

- 09.03 Identify documents that may be required when applying for a job.
  - 09.04 Write an appropriate resume.
  - 09.05 Conduct a job search.
  - 09.06 Complete a job application form correctly.
  - 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
  - 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
  - 09.09 Identify acceptable work habits.
  - 09.10 Recognize appropriate affective/professional behavior.
  - 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:
- 10.01 Recognize emerging diseases and disorders
  - 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
  - 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
  - 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
  - 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
  - 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.
- 11.0 Apply basic math and science skills. – The student will be able to:
- 11.01 Draw, read, and report on graphs, charts and tables.
  - 11.02 Measure time, temperature, distance, capacity, and mass/weight.
  - 11.03 Make, use and convert using both traditional and metric units.
  - 11.04 Make estimations and approximations and judge the reasonableness of the result.
  - 11.05 Convert from regular to 24 hour time.
  - 11.06 Demonstrate ability to evaluate and draw conclusions.
  - 11.07 Organize and communicate the results obtained by observation and experimentation.
  - 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
  - 11.09 Calculate ratios

**Course Number: PTN0084**  
**Occupational Completion Point: B**  
**Pharmacy Technician 1 –360 Hours – SOC Code 29-2052**

- 12.0 Practice human relation skills. -- The student will be able to:
- 12.01 Identify the meaning and duties of a pharmacy technician.
  - 12.02 Discuss the organizational flow of responsibilities within a pharmacy setting.
  - 12.03 Establish and maintain a professional rapport with co-workers.
  - 12.04 Demonstrate an understanding of the Situation Background Assessment Recommendation (SBAR) communication model.
  - 12.05 Identify the current trends and perspectives related to the management of pharmacy health care organizations.
  - 12.06 Identify the means by which the application of team building can facilitate change within the pharmacy working environment.
- 13.0 Identify pharmaceutical abbreviations and terminology as related to community pharmacy practice. -- The student will be able to:
- 13.01 Use pharmaceutical medical terminology.
  - 13.02 Define the major symbols and abbreviations used on prescriptions and state the meaning.
- 14.0 Identify medical and legal considerations. -- The student will be able to:
- 14.01 Discuss the significance and scope of current national and Florida law and administrative rules as they relate to the practice of the pharmacy technician.
  - 14.02 Discuss medical legal concepts as they relate to the practice of the pharmacy technician.
  - 14.03 Discuss the need for accurate pharmacy documentation and recordkeeping.
  - 14.04 State valid reasons for confidentiality of patient information.
  - 14.05 Discuss the patient's Bill of Rights as it relates to pharmacy.
  - 14.06 Discuss pertinent laws governing pharmacy practice such as false prescriptions and an impaired person.
  - 14.07 Identify controlled substance and their applicable regulations.
  - 14.08 Discuss the Florida Right to Know Act with respect to hazardous materials.
  - 14.09 Implement appropriate THE JOINT COMMISSION patient safety goals.
- 15.0 Perform clerical duties. -- The student will be able to:
- 15.01 Identify computer applications used in pharmacy.
  - 15.02 Demonstrate computer applications in processing pharmacy prescription data.
  - 15.03 Identify the application of facsimile equipment in generating patient prescriptions.
  - 15.04 Demonstrate the application of office equipment in duplicating patient prescriptions.
  - 15.05 Maintain patient profiles.
  - 15.06 Demonstrate telephone communication skills and routine inquiries.
  - 15.07 Identifies appropriate practice standards pertaining to patient counseling.
  - 15.08 Demonstrate the knowledge of systems used in maintaining pharmacy records.

- 16.0 Demonstrate knowledge of basic pharmaceutical chemistry and drug classification as it relates to the human physiology.-- The student will be able to:
- 16.01 Define the major classifications of pharmaceuticals.
  - 16.02 Identify the sources from which medications are produced.
  - 16.03 Define poison; define placebo.
  - 16.04 List the two official compendia of standards for quality and purity of drugs and authoritative information on dosage and administration and list six non-official reference manuals.
  - 16.05 Display knowledge of trade names and generic name equivalents, chemical names.
- 17.0 Demonstrate knowledge of inventory control. -- The student will be able to:
- 17.01 Display knowledge or prescription pricing systems used in pharmacy.
  - 17.02 Maintain stock inventory.
  - 17.03 Prepare electronic purchase orders.
  - 17.04 Receive, store and distribute pharmaceutical supplies.
  - 17.05 Define industry standards in purchasing pharmaceutical supplies.
  - 17.06 Define industry standards in management of Investigational Drugs
  - 17.07 Display knowledge of purchasing, storage and disposal of Pharmaceutical materials
- 18.0 Initiate measurement and calculating techniques as it relates to community practice. -- The student will be able to:
- 18.01 Explain the difference between a cubic centimeter and a milliliter.
  - 18.02 Use common pharmaceutical weighing equipment.
  - 18.03 Use common pharmaceutical volume measurement equipment.
  - 18.04 Display knowledge of United States Pharmacopeia (USP) 795 standards
  - 18.05 Explain the technique of preparing common pharmaceutical compounds.
  - 18.06 Convert measurements within the apothecary, avoirdupois, and metric systems.
  - 18.07 Demonstrate knowledge of common pharmaceutical calculations.

**Course Number: PTN0085**

**Occupational Completion Point: C**

**Pharmacy Technician 2 – 300 Hours – SOC Code 29-2052**

- 19.0 Demonstrate a basic knowledge of pharmaceutical chemistry as it relates to the human physiology.--The student will be able to:
- 19.01 Predict physical and chemical incompatibilities utilizing chemistry properties.
  - 19.02 Describe electrolyte balances.
  - 19.03 Relate the general classes, actions, routes, action and side effects of drugs.
  - 19.04 Identify a listing of usual adult doses of medications and respective contraindications.
- 20.0 Prepare and deliver medications. --The student will be able to:

- 20.01 Read and prepare medication orders correctly.
- 20.02 Check all new orders with medications listed on profiles.
- 20.03 Transport medications safely being aware of hazards: theft, legal implications of accidental loss, and other consequences.
- 20.04 Identify special precautions pertaining to children.
- 20.05 Maintain controlled substance inventory.
- 20.06 Demonstrate the proper technique of preparing pharmaceutical preparations.
- 20.07 Demonstrate the ability to correctly fill and deliver medication cassettes.
- 20.08 Collect data from medication administration record and drug use and evaluation form.
- 20.09 Identify and demonstrate use of automated medication dispensing equipment

**Course Number: PTN0086**

**Occupational Completion Point: C B**

**Pharmacy Technician 3 – 300 Hours – SOC Code 29-2052**

21.0 Prepackage unit dose medications.--The student will be able to:

- 21.01 Locate correct stock container.
- 21.02 Weigh measure, count required individual doses of medication.
- 21.03 Label with required information.
- 21.04 Operate unit dose packaging equipment.
- 21.05 Place individual dose in appropriate containers, repackage in predetermined quantities.
- 21.06 Prepackage unit dose hazardous drugs.
- 21.07 Record prepackaged medication data correctly.
- 21.08 Define role of technician in quality assurance activities.

22.0 Prepare intravenous admixtures.--The student will be able to:

- 22.01 Compare medication order with label on vial and check expiration date of product.
- 22.02 Calculate drug dosage for parenteral use.
- 22.03 Identify common drug/drug incompatibilities.
- 22.04 Reconstitute parenteral medications.
- 22.05 Use aseptic techniques to withdraw medication from stock vial measure correct quantity as instructed, select and insert it into IV solution without error.
- 22.06 Use aseptic technique to withdraw medication from an ampule.
- 22.07 Prepare parenteral solutions and discuss current intravenous preparation industry trends.
- 22.08 Prepare Total Parenteral Nutrition solutions.
- 22.09 Prepare chemotherapeutic agents using proper safety techniques.
- 22.10 Demonstrate appropriate technique in the use of specialized equipment such as: laminar flow hoods, filters, pumps, ,automated compounders, and barrier isolator.
- 22.11 Place label on IV solution container and keep records.
- 22.12 Perform quality control check.
- 22.13 Identify storage requirements of reconstituted IV solutions.
- 22.14 Display knowledge of United States Pharmacopeia (USP) 797 regulations and the quality assurance required.

**2011 – 2012**

**Florida Department of Education  
Student Performance Standards**

**Program Title: Pharmacy Technician-ATD**  
**ATD CIP Number: 0317050703**  
**SOC Code(s):31-9099; 29-2052**

When this program is offered by a community or state college, the following standards, and benchmarks apply.

01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:

- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
- 01.02 Identify common methods of payment for healthcare services.
- 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
- 01.04 Describe the composition and functions of a healthcare team.
- 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
- 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
- 01.07 Identify characteristics of effective teams.
- 01.08 Recognize methods for building positive team relationships.
- 01.09 Analyze attributes and attitudes of an effective leader.
- 01.10 Recognize factors and situations that may lead to conflict.
- 01.11 Demonstrate effective techniques for managing team conflict.
- 01.12 Describe factors that influence the current delivery system of healthcare.
- 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.

02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:

- 02.01 Develop basic speaking and active listening skills.
- 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
- 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
- 02.04 Respond to verbal and non-verbal cues.
- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.
- 02.06 Use appropriate medical terminology and abbreviations.
- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
- 02.08 Recognize the importance of patient/client educations regarding healthcare.
- 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
- 02.10 Analyze elements of communication using a sender-receiver model.

- 02.11 Distinguish between and report subjective and objective information.
- 02.12 Report relevant information in order of occurrence.
- 03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:
  - 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
  - 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
  - 03.03 Demonstrate procedures for accurate documentation and record keeping.
  - 03.04 Interpret healthcare facility policy and procedures.
  - 03.05 Explain the “Patient’s Bill of Rights”.
  - 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
  - 03.07 Describe advance directives.
  - 03.08 Describe informed consent.
  - 03.09 Explain the laws governing harassment, labor and employment.
  - 03.10 Differentiate between legal and ethical issues in healthcare.
  - 03.11 Describe a code of ethics consistent with the healthcare occupation.
  - 03.12 Identify and compare personal, professional, and organizational ethics.
  - 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
  - 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
  - 03.15 Recognize and report abuse including domestic violence and neglect.
  - 03.16 Distinguish among the five schedules of controlled substances.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:
  - 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
  - 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
  - 04.03 Identify psychological reactions to illness including defense mechanisms.
  - 04.04 Identify complementary and alternative health practices.
  - 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
  - 04.06 Explain the basic concepts of positive self image, wellness and stress.
  - 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
  - 04.08 Explain the nutrition pyramid.
  - 04.09 Recognize the steps in the grief process.
- 05.0 Recognize and practice safety and security procedures. – The student will be able to:
  - 05.01 Recognize safe and unsafe working conditions and report safety hazards.
  - 05.02 Demonstrate the safe use of medical equipment.
  - 05.03 Explain and apply the theory of root- cause analysis
  - 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.

- 05.05 Identify and practice security procedures for medical supplies and equipment.
  - 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions).
  - 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
  - 05.08 Demonstrate proper body mechanics and ergonomics.
  - 05.09 Demonstrate the procedure for properly identifying patients.
  - 05.10 Demonstrate procedures for the safe transport and transfer of patients.
  - 05.11 Describe fire, safety, disaster and evacuations procedures.
  - 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org))
- 06.0 Recognize and respond to emergency situations. – The student will be able to:
- 06.01 Monitor and record vital signs.
  - 06.02 Describe legal parameters relating to the administration of emergency care.
  - 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
  - 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.
- 07.0 Recognize and practice infection control procedures. – The student will be able to:
- 07.01 Define principles of infection control including standard and transmission based precautions.
  - 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
  - 07.03 Demonstrate knowledge of surgical asepsis.
  - 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.
- 08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:
- 08.01 Describe technology applications in healthcare.
  - 08.02 Define terms and demonstrate basic computer skills.
  - 08.03 Recognize technology applications in healthcare.
  - 08.04 Interpret information from electronic medical documents.
  - 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.
- 09.0 Demonstrate employability skills. – The student will be able to:
- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.
  - 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
  - 09.03 Identify documents that may be required when applying for a job.
  - 09.04 Write an appropriate resume.
  - 09.05 Conduct a job search.

- 09.06 Complete a job application form correctly.
  - 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
  - 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
  - 09.09 Identify acceptable work habits.
  - 09.10 Recognize appropriate affective/professional behavior.
  - 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:
- 10.01 Recognize emerging diseases and disorders
  - 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
  - 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
  - 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
  - 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
  - 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.
- 11.0 Apply basic math and science skills. – The student will be able to:
- 11.01 Draw, read, and report on graphs, charts and tables.
  - 11.02 Measure time, temperature, distance, capacity, and mass/weight.
  - 11.03 Make, use and convert using both traditional and metric units.
  - 11.04 Make estimations and approximations and judge the reasonableness of the result.
  - 11.05 Convert from regular to 24 hour time.
  - 11.06 Demonstrate ability to evaluate and draw conclusions.
  - 11.07 Organize and communicate the results obtained by observation and experimentation.
  - 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
  - 11.09 Calculate ratios

## **Pharmacy Technician (12-22)**

- 12.0 Practice human relation skills. -- The student will be able to:
- 12.01 Identify the meaning and duties of a pharmacy technician.
  - 12.02 Discuss the organizational flow of responsibilities within a pharmacy setting.
  - 12.03 Establish and maintain a professional rapport with co-workers.
  - 12.04 Demonstrate an understanding of the Situation Background Assessment Recommendation (SBAR) communication model.
  - 12.05 Identify the current trends and perspectives related to the management of pharmacy health care organizations.
  - 12.06 Identify the means by which the application of team building can facilitate change within the pharmacy working environment.
- 13.0 Identify pharmaceutical abbreviations and terminology as related to community pharmacy practice. -- The student will be able to:
- 13.01 Use pharmaceutical medical terminology.
  - 13.02 Define the major symbols and abbreviations used on prescriptions and state the meaning.
- 14.0 Identify medical and legal considerations. -- The student will be able to:
- 14.01 Discuss the significance and scope of current national and Florida law and administrative rules as they relate to the practice of the pharmacy technician.
  - 14.02 Discuss medical legal concepts as they relate to the practice of the pharmacy technician.
  - 14.03 Discuss the need for accurate pharmacy documentation and recordkeeping.
  - 14.04 State valid reasons for confidentiality of patient information.
  - 14.05 Discuss the patient's Bill of Rights as it relates to pharmacy.
  - 14.06 Discuss pertinent laws governing pharmacy practice such as false prescriptions and an impaired person.
  - 14.07 Identify controlled substance and their applicable regulations.
  - 14.08 Discuss the Florida Right to Know Act with respect to hazardous materials.
  - 14.09 Implement appropriate THE JOINT COMMISSION patient safety goals.
- 15.0 Perform clerical duties. -- The student will be able to:
- 15.01 Identify computer applications used in pharmacy.
  - 15.02 Demonstrate computer applications in processing pharmacy prescription data.
  - 15.03 Identify the application of facsimile equipment in generating patient prescriptions.
  - 15.04 Demonstrate the application of office equipment in duplicating patient prescriptions.
  - 15.05 Maintain patient profiles.
  - 15.06 Demonstrate telephone communication skills and routine inquiries.
  - 15.07 Identifies appropriate practice standards pertaining to patient counseling.
  - 15.08 Demonstrate the knowledge of systems used in maintaining pharmacy records.
- 16.0 Demonstrate knowledge of basic pharmaceutical chemistry and drug classification as it relates to the human physiology.-- The student will be able to:

- 16.01 Define the major classifications of pharmaceuticals.
  - 16.02 Identify the sources from which medications are produced.
  - 16.03 Define poison; define placebo.
  - 16.04 List the two official compendia of standards for quality and purity of drugs and authoritative information on dosage and administration and list six non-official reference manuals.
  - 16.05 Display knowledge of trade names and generic name equivalents, chemical names.
- 17.0 Demonstrate knowledge of inventory control. -- The student will be able to:
- 17.01 Display knowledge of prescription pricing systems used in pharmacy.
  - 17.02 Maintain stock inventory.
  - 17.03 Prepare electronic purchase orders.
  - 17.04 Receive, store and distribute pharmaceutical supplies.
  - 17.05 Define industry standards in purchasing pharmaceutical supplies.
  - 17.06 Define industry standards in management of Investigational Drugs
  - 17.07 Display knowledge of purchasing, storage and disposal of Pharmaceutical materials
- 18.0 Initiate measurement and calculating techniques as it relates to community practice. --  
The student will be able to:
- 18.01 Explain the difference between a cubic centimeter and a milliliter.
  - 18.02 Use common pharmaceutical weighing equipment.
  - 18.03 Use common pharmaceutical volume measurement equipment.
  - 18.04 Display knowledge of United States Pharmacopeia (USP) 795 standards
  - 18.05 Explain the technique of preparing common pharmaceutical compounds.
  - 18.06 Convert measurements within the apothecary, avoirdupois, and metric systems.
  - 18.07 Demonstrate knowledge of common pharmaceutical calculations.
- 19.0 Demonstrate a basic knowledge of pharmaceutical chemistry as it relates to the human physiology.--The student will be able to:
- 19.01 Predict physical and chemical incompatibilities utilizing chemistry properties.
  - 19.02 Describe electrolyte balances.
  - 19.03 Relate the general classes, actions, routes, action and side effects of drugs.
  - 19.04 Identify a listing of usual adult doses of medications and respective contraindications.
- 20.0 Prepare and deliver medications. --The student will be able to:
- 20.01 Read and prepare medication orders correctly.
  - 20.02 Check all new orders with medications listed on profiles.
  - 20.03 Transport medications safely being aware of hazards: theft, legal implications of accidental loss, and other consequences.
  - 20.04 Identify special precautions pertaining to children.
  - 20.05 Maintain controlled substance inventory.

- 20.06 Demonstrate the proper technique of preparing pharmaceutical preparations.
  - 20.07 Demonstrate the ability to correctly fill and deliver medication cassettes.
  - 20.08 Collect data from medication administration record and drug use and evaluation form.
  - 20.09 Identify and demonstrate use of automated medication dispensing equipment
- 21.0 Prepackage unit dose medications.--The student will be able to:
- 21.01 Locate correct stock container.
  - 21.02 Weigh measure, count required individual doses of medication.
  - 21.03 Label with required information.
  - 21.04 Operate unit dose packaging equipment.
  - 21.05 Place individual dose in appropriate containers, repackage in predetermined quantities.
  - 21.06 Prepackage unit dose hazardous drugs.
  - 21.07 Record prepackaged medication data correctly.
  - 21.08 Define role of technician in quality assurance activities.
- 22.0 Prepare intravenous admixtures.--The student will be able to:
- 22.01 Compare medication order with label on vial and check expiration date of product.
  - 22.02 Calculate drug dosage for parenteral use.
  - 22.03 Identify common drug/drug incompatibilities.
  - 22.04 Reconstitute parenteral medications.
  - 22.05 Use aseptic techniques to withdraw medication from stock vial measure correct quantity as instructed, select and insert it into IV solution without error.
  - 22.06 Use aseptic technique to withdraw medication from an ampule.
  - 22.07 Prepare parenteral solutions and discuss current intravenous preparation industry trends.
  - 22.08 Prepare Total Parenteral Nutrition solutions.
  - 22.09 Prepare chemotherapeutic agents using proper safety techniques.
  - 22.10 Demonstrate appropriate technique in the use of specialized equipment such as: laminar flow hoods, filters, pumps,,automated compounders, and barrier isolator.
  - 22.11 Place label on IV solution container and keep records.
  - 22.12 Perform quality control check.
  - 22.13 Identify storage requirements of reconstituted IV solutions.
  - 22.14 Display knowledge of United States Pharmacopeia (USP) 797 regulations and the quality assurance required.

2011 - 2012

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Physician Assistant  
**Career Cluster:** Health Science

	<b>AS</b>	<b>AAS</b>
CIP Number	1317050800	0317050800
Program Type	College Credit	College Credit
Standard Length	87 credit hours	87 credit hours
CTSO	HOSA	HOSA
SOC Codes (all applicable)	31-9099, 29-1071	31-9099, 29-1071
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>	
Perkins Technical Skill Attainment Inventory	<a href="http://www.fldoe.org/workforce/perkins/perkins_resources.asp">http://www.fldoe.org/workforce/perkins/perkins_resources.asp</a>	

### **Purpose**

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

The content includes but is not limited to anatomy, physiology, microbiology, chemistry, physical diagnosis, pathophysiological basis of disease, electrocardiography/cardiology, pharmacology, pharmacotherapeutics, clinical diagnostic imaging, medical ethics/risk management, introduction to medicine, surgical problems and procedures, family medicine, internal medicine, pediatrics, obstetrics, emergency medicine and psychiatry.

### **Program Structure**

This program is a planned sequence of instruction consisting of 87 credit hours.

### **Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

## **Special Notes**

This program is designed to prepare students for employment as physician assistants. SOC Code 29-1071 (Physician Assistants)

The program **must** meet the requirements of:

Accreditation Review Commission on Education for the Physician Assistant  
12000 Findley Road  
Suite 240  
Duluth, GA 30097

Prerequisites: Students must have completed postsecondary education including successful completion of TOEFL and CPT, prior to being admitted to the Physician Assistant Program. A background in the medical field is strongly recommended in order to aid the student in this program. Upon successful completion of this program, the student will receive an associate degree in science for physician assistant. Students completing this program may apply to take the national certification examination:

National Commission on Certification of  
Physician Assistants Examination  
2845 Henderson Mill Road, NE  
Atlanta, GA 30341  
(770) 493-9100

This program meets the Department of Health HIV/AIDS Domestic Violence and Prevention of Medical Errors education requirements. Upon completion of this program, the instructor will provide a certificate to the student verifying that these requirements have been met.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635 F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

Outcomes 01-11 are referred to as the Health Careers Core and do not have to be completed if the student has previously completed the Core in another health science program. The CORE should be taken first or concurrently with the first course in the program. Following the successful completion of the core, the student is eligible to take the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

## **Career and Technical Student Organization (CTSO)**

Health Occupations Students of America, Inc. (HOSA) is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

## **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's

accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

### **Articulation**

This program has no statewide articulation agreement approved by the Articulation Coordinating Committee. However, this does not preclude the awarding of credits by any college through local agreements.

For details on statewide articulation agreements which correlate to programs and industry certifications, refer to [http://www.fl DOE.org/workforce/dwdframe/artic\\_frame.asp](http://www.fl DOE.org/workforce/dwdframe/artic_frame.asp).

### **Program Length**

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. The standard length of this program is 87 credit hours according to Rule 6A-14.030, F.A.C.

### **Standards**

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.
- 12.0 Recognize interdependent relationship with supervising physician.
- 13.0 Maintain competency.
- 14.0 Promote acceptance of the role
- 15.0 Promote preventive health care.
- 16.0 Demonstrate professional behavior.
- 17.0 Establish effective interpersonal relationships with patients, professionals, and others.
- 18.0 Establish health status data base.
- 19.0 Analyze health status data base to formulate management plan.
- 20.0 Formulate health management plan.

- 21.0 Implement health management plan.
- 22.0 Monitor health management plan.

2011 - 2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Physician Assistant  
**CIP Numbers:** 1317050800 AS, 0317050800 AAS  
**Program Length:** 87 credit hours  
**SOC Code(s):** 31-9099, 29-1071

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. At the completion of this program, the student will be able to:

**Health Careers Core: The Health Careers Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Careers Core or any other health occupations program do not have to repeat intended outcomes 01-11.**

01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:

- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
- 01.02 Identify common methods of payment for healthcare services.
- 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
- 01.04 Describe the composition and functions of a healthcare team.
- 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
- 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
- 01.07 Identify characteristics of effective teams.
- 01.08 Recognize methods for building positive team relationships.
- 01.09 Analyze attributes and attitudes of an effective leader.
- 01.10 Recognize factors and situations that may lead to conflict.
- 01.11 Demonstrate effective techniques for managing team conflict.
- 01.12 Describe factors that influence the current delivery system of healthcare.
- 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.

02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:

- 02.01 Develop basic speaking and active listening skills.
- 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
- 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
- 02.04 Respond to verbal and non-verbal cues.

- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.
- 02.06 Use appropriate medical terminology and abbreviations.
- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
- 02.08 Recognize the importance of patient/client educations regarding healthcare.
- 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
- 02.10 Analyze elements of communication using a sender-receiver model.
- 02.11 Distinguish between and report subjective and objective information.
- 02.12 Report relevant information in order of occurrence.

03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:

- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
- 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
- 03.03 Demonstrate procedures for accurate documentation and record keeping.
- 03.04 Interpret healthcare facility policy and procedures.
- 03.05 Explain the “Patient’s Bill of Rights”.
- 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
- 03.07 Describe advance directives.
- 03.08 Describe informed consent.
- 03.09 Explain the laws governing harassment, labor and employment.
- 03.10 Differentiate between legal and ethical issues in healthcare.
- 03.11 Describe a code of ethics consistent with the healthcare occupation.
- 03.12 Identify and compare personal, professional, and organizational ethics.
- 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
- 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
- 03.15 Recognize and report abuse including domestic violence and neglect.
- 03.16 Distinguish among the five schedules of controlled substances.

04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:

- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
- 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
- 04.03 Identify psychological reactions to illness including defense mechanisms.
- 04.04 Identify complementary and alternative health practices.
- 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
- 04.06 Explain the basic concepts of positive self image, wellness and stress.
- 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
- 04.08 Explain the nutrition pyramid.

- 04.09 Recognize the steps in the grief process.
- 05.0 Recognize and practice safety and security procedures. – The student will be able to:
  - 05.01 Recognize safe and unsafe working conditions and report safety hazards.
  - 05.02 Demonstrate the safe use of medical equipment.
  - 05.03 Explain and apply the theory of root- cause analysis
  - 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
  - 05.05 Identify and practice security procedures for medical supplies and equipment.
  - 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions.
  - 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
  - 05.08 Demonstrate proper body mechanics and ergonomics.
  - 05.09 Demonstrate the procedure for properly identifying patients.
  - 05.10 Demonstrate procedures for the safe transport and transfer of patients.
  - 05.11 Describe fire, safety, disaster and evacuations procedures.
  - 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )
- 06.0 Recognize and respond to emergency situations. – The student will be able to:
  - 06.01 Monitor and record vital signs.
  - 06.02 Describe legal parameters relating to the administration of emergency care.
  - 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
  - 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.
- 07.0 Recognize and practice infection control procedures. – The student will be able to:
  - 07.01 Define principles of infection control including standard and transmission based precautions.
  - 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
  - 07.03 Demonstrate knowledge of surgical asepsis.
  - 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.
- 08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:
  - 08.01 Describe technology applications in healthcare.
  - 08.02 Define terms and demonstrate basic computer skills.
  - 08.03 Recognize technology applications in healthcare.
  - 08.04 Interpret information from electronic medical documents.
  - 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.

09.0 Demonstrate employability skills. – The student will be able to:

- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.
- 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
- 09.03 Identify documents that may be required when applying for a job.
- 09.04 Write an appropriate resume.
- 09.05 Conduct a job search.
- 09.06 Complete a job application form correctly.
- 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
- 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
- 09.09 Identify acceptable work habits.
- 09.10 Recognize appropriate affective/professional behavior.
- 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).

10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:

- 10.01 Recognize emerging diseases and disorders
- 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
- 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
- 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
- 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
- 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.

11.0 Apply basic math and science skills. – The student will be able to:

- 11.01 Draw, read, and report on graphs, charts and tables.
- 11.02 Measure time, temperature, distance, capacity, and mass/weight.
- 11.03 Make, use and convert using both traditional and metric units.
- 11.04 Make estimations and approximations and judge the reasonableness of the result.
- 11.05 Convert from regular to 24 hour time.
- 11.06 Demonstrate ability to evaluate and draw conclusions.
- 11.07 Organize and communicate the results obtained by observation and experimentation.
- 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
- 11.09 Calculate ratios

Physician Assistant (12.0-22.0)

- 12.0 Recognize the interdependent relationship with supervising physician. – The student will be able to:
- 12.01 Accept that the role of the physician assistant is limited by the: supervising physician, legislation and regulations, local circumstances, individual competencies, hospital regulations, patients, and other health professions.
  - 12.02 Resist compromises in the practice of medicine when conflicting with professional ethics.
  - 12.03 Express professional opinion on matters of patient care, even if different from supervising physician's opinion.
  - 12.04 Express the limitations of the role when necessary to the supervising physician, other health professionals, and patient and family.
- 13.0 Maintain competency. – The student will be able to:
- 13.01 Engage in period review of professional skills (self-assessment, etc.)
  - 13.02 Devise and maintain program of formal and informal CME based upon recognized needs.
  - 13.03 Acquire knowledge and skills essential to incorporating into practice proven new evaluation/treatment modalities.
  - 13.04 Maintain an ongoing library of appropriate journals and books.
  - 13.05 Maintain membership in professional organizations.
  - 13.06 Obtain/maintain certification as a PA.
  - 13.07 Critically review the current medical literature.
- 14.0 Promote acceptance of the role. – The student will be able to:
- 14.01 Explain role by actions and words to others.
  - 14.02 Display sensitivity to the partial overlapping and possible sharing of responsibilities with other health professionals.
  - 14.03 Use formal and informal conflict resolution techniques including adjusting activities, fostering improved working relationships and helping behavior.
  - 14.04 Transmit reference materials to relevant professionals concerning physician assistant functions and utilization.
  - 14.05 Assess within the work group the behavior of individuals and group actions to facilitate problem solving or prevent problems from arising.
  - 14.06 Know and implement strategies useful in gaining acceptance of the role within the community.
  - 14.07 Give talks to groups interested in the PA concept.
  - 14.08 Seek out or counsel prospective PA students.
  - 14.09 Write articles for local newspaper about the PA concept.
  - 14.10 Submit articles for publication.
  - 14.11 Initiate contact with other physicians in the area to promote the PA concept.
  - 14.12 Participate in community health programs.
  - 14.13 Initiate change in routine protocol.
- 15.0 Promote preventive health care. – The student will be able to:

- 15.01 Educate patient and family concerning health care measures, including periodic physical examinations, blood pressure screening, exercise and diet, daily dental hygiene and periodic checkups, regular vision checkups, screening for glaucoma, testicular self-exam, breast self-examination/Mammography, pap smear, warning signs of cancer, use of tobacco, alcohol, other drugs, use of seat belts and child restraints in cars, childhood and adult immunization, accident prevention, poisoning prevention, prevention of acquired infections (i.e., pneumonia's, STD's, hepatitis), prevention of common childhood conditions, safer sex methods, environmental hazards, occupational hazards, and prevention of family violence.
  - 15.02 Perform screening examinations, including well baby checkups, periodic physical examinations, prenatal examinations, and chronic disease checkups (e.g., hypertension, diabetes, obesity, arthritis, etc.)
  - 15.03 Provide sex education, including contraception, sexually transmitted diseases, including HIV, sexual dysfunctions, dyspareunia, vaginismus, safer sex methods, and sexuality in the physically impaired.
  - 15.04 Provide counseling to patient and family concerning anxiety reaction, obsessive-compulsive neurosis, depression (non-psychotic), maladaptive disorders, marital, divorce, family relationship problems, adjustments to aging, social isolation, developmental problems of adolescence, behavior problems of children and adults, chronic illness/handicapping conditions, death and dying, psychosomatic illness, mental retardation, sexual problems (e.g., impotency, frigidity, dyspareunia), alcohol/drug abuse, acute/self-limiting illness, and terminal illness.
  - 15.05 Review, recommend and/or distribute patient education materials e.g., health education pamphlets, books, films, slide shows, tapes, and the use of models, community health groups, and the use of other patients as resources.
- 16.0 Demonstrate professional behavior. – The student will be able to:
- 16.01 Demonstrate attributes, such as empathy, objectivity, recognition of personal and professional limitations; stress coping mechanisms and confidence in professional identity.
  - 16.02 Demonstrate attributes by showing respect for the feelings and attitudes of others, maintaining patient confidentiality, accepting personal and professional limitations by admitting to errors, accepting criticism, seeking continued intellectual growth, persisting in effecting constructive change and showing patience in dealing with the change process.
- 17.0 Establish effective interpersonal relationships with patients, professionals, and others. – The student will be able to:
- 17.01 Adapt suitable interviewing style in order to enhance communication, elicit relevant biopsychosocial history, ascertain patient's understanding of historical data, decide on appropriate mode/procedures of presenting information, question patients in terms that are appropriate to their level of understanding, clarify clues to other history data, modify interviewing techniques where appropriate, solicit feedback concerning communication, provide feedback concerning communication, and determine patient's understanding/acceptance of health problems.
  - 17.02 Accept personal, cultural, and professional factors affecting health, accept patient's limitations in perceiving health status, accept patient's ability (inability)

to comply with therapeutic programs, accept existing uncertainties in the management of personal health, accept and respect feelings and attitudes of others, and acknowledge limitations of community resources.

- 17.03 Assist patient/family in handling/expressing feelings, regarding personal problems, illness/death, acceptance of patient's condition/progress, and the relationship of patient's psychological needs to physical condition.
  - 17.04 Recognize changes in patient's psychological state by observing patient's general appearance and behavior, mood changes, and identify factors influencing patient's psychological state.
  - 17.05 Maintain relationship with referred patient by explaining why referral is necessary, continuing to monitor referred patient's progress, providing information pertinent consultation/referral, and updating patient's record according to referral outcomes.
  - 17.06 Demonstrate concern of patient's privacy, modesty, anxieties during the examination by explaining procedures, draping patient appropriately, checking on patient's comfort, warming instruments, responding to patient's inquiries, reassuring patient during all interactions and using a chaperone.
  - 17.07 Transmit and record information by preparing patient summaries, including admission and discharge notes, writing accident/incident reports, writing problem oriented progress notes, preparing correspondence, recording immunizations on special records, performing careful telephone interviews, completing insurance forms, and writing problem lists.
- 18.0 Establish health status data base. – The student will be able to:
- 18.01 Modify data gathering process to take into account sex of including problem-specific examination, follow-up versus initial the patient, the problem, age of the patient, physical condition of the patient, pathophysiology and problem of examination, insurance examination, compensation examination, school examination, sports examination and postpartum examination.
  - 18.02 Elicit pertinent medical and psychological history by eliciting chief complaint, obtaining history of present illness, obtaining past medical history, and reviewing body system.
  - 18.03 Perform complete or problem-specific physical examination as pertinent.
  - 18.04 Obtain information from screening and diagnostic tests as pertinent by ordering and/or performing screening and diagnostic tests, obtaining specimens, understanding the indications for and significance of abnormal results for screening and diagnostic tests ordered as outlined by American Academy of Physician Assistants.
  - 18.05 Record and transmit findings by summarizing pertinent aspects of history and physical examination and preparing patient summaries and progress notes.
- 19.0 Analyze health status data base to formulate management plan. – The student will be able to:
- 19.01 Differentiate between normal and abnormal information contained in the data base and gather additional information as indicated by abnormal findings in the adult and child history and physical examinations, newborn physical examinations, diagnostic tests and geriatric multi-disciplinary assessment.

19.02 Based on assessment of data base, establish, with physician consultation, a working diagnosis of common problems, including, but not limited to the diagnostic clusters as outlined by American Academy of Physician Assistants.

20.0 Formulate health management plan. – The student will be able to:

20.01 Prioritize problems to be managed

20.01 Formulate a management plan for problems identified.

20.02 Devise plan to coordinate multiple treatment modalities.

20.04 Select therapeutic measures by considering patient's sociocultural environment, cost implications of decision on behalf of the patient and motivation of patient to comply with recommended treatment.

20.05 Select supportive services to be involved in patient care, to include the supervising physician, the patient's family, other health professionals and community resources and services.

20.06 Describe parameters of patient education relating to immediate problems, and others, such as: planning limitation of activities and planning scheduled follow-up.

20.07 Implement appropriate Joint Commission patient safety goals.

21.0 Implement health management plan. – The student will be able to:

21.01 Educate patient and family concerning immediate problem(s), follow-up to deferred problems, home care, pregnancy, childbirth and parenthood as outlined in American Academy of Physician Assistants.

21.02 Contact selected supportive services to be involved in patient care.

21.03 Provide information pertinent to consultative/referral.

21.04 Provide treatment of common problems by carrying out the management plan, including the initiating of the following medical therapies/procedures when indicated such as administer medications, all routes, perform musculoskeletal therapies, perform pulmonary therapies, eye, ear, nose and throat therapies, cardiovascular therapies, gastrointestinal therapies, genitourinary therapies, obstetrical/gynecological therapies, surgical procedures and initiate basic management for emergency situations as outlined by American Academy of Physician Assistants.

22.0 Monitor health management plan. – The student will be able to:

22.01 Assess degree of patient compliance.

22.02 Assess progress toward desired result.

22.03 Determine economic impact of management plan.

22.04 Recognize undesirable effects of treatment plan.

22.05 Redirect patient efforts based upon results of treatment plan.

2011 - 2012

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Optician  
**Career Cluster:** Health Science

	AS	AAS
CIP Number	1317070100	0317070100
Program Type	College Credit	College Credit
Standard Length	72 credit hours	72 credit hours
CTSO	HOSA	HOSA
SOC Codes (all applicable)	31-9099, 29-2081	31-9099, 29-2081
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>	
Perkins Technical Skill Attainment Inventory	<a href="http://www.fldoe.org/workforce/perkins/perkins_resources.asp">http://www.fldoe.org/workforce/perkins/perkins_resources.asp</a>	

### Purpose

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

This program is designed to prepare students for employment as dispensing opticians, optician apprentices, dispensing), opticians: dispensing and measuring SOC Code 29-2081 (Opticians, Dispensing) or to provide supplemental training for persons previously or currently employed in these occupations.

This program focuses on broad, transferable skills and stresses understanding and demonstration of the following elements of the health care industry; planning, management, finance, technical and production skills, underlying principles of technology, labor issues, community issues and health, safety, and environmental issues.

The content includes but is not limited to lens surfacing, finishing and mounting; dispensing of completed prescriptions; fitting contact lenses; frame repair, business management techniques and human relations. The Health Careers Core must be taken by all students (secondary, postsecondary adult and postsecondary vocational) planning to complete any Health Occupations program. Once successfully completed, the core does not need to be repeated at any instructional level.

## **Program Structure**

This program is a planned sequence of instruction consisting of 72 credit hours.

## **Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

## **Special Notes**

This program meets the Department of Health HIV/AIDS Domestic Violence and Prevention of Medical Errors education requirements. Upon completion of this program, the instructor will provide a certificate to the student verifying that these requirements have been met.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635 F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

The program must be approved by the Commission on Opticianry Accreditation, 1011 Martin Luther King Highway, Suite 100; Bowie, Maryland 20720 (301/459-8075). Graduates of a recognized program with an A.S. Degree are eligible to take the Florida optician licensure examination administered by the Department of Business and Professional Regulation for the Board of Opticianry (Chapter 484 F.S. Rule Chapter 21, F.A.C.).

The cooperative method of instruction is appropriate for this program. When the cooperative method is offered, the following is required for each student: a training plan signed by the student, instructor and employer which includes instructional objectives and a list of on-the-job and in-school learning experiences; a work station which reflects equipment, skills, and tasks which are relevant to the occupations which the student has chosen as a career goal. Students must receive compensation for work performed.

Outcomes 01-11 are referred to as the Health Careers Core and do not have to be completed if the student has previously completed the Core in another health science program. The CORE should be taken first or concurrently with the first course in the program. Following the successful completion of the core, the student is eligible to take the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

## **Career and Technical Student Organization (CTSO)**

Health Occupations Students of America (HOSA), Inc. is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

## **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

### **Articulation**

This program has no statewide articulation agreement approved by the Articulation Coordinating Committee. However, this does not preclude the awarding of credits by any college through local agreements.

For details on statewide articulation agreements which correlate to programs and industry certifications, refer to [http://www.fldoe.org/workforce/dwdframe/artic\\_frame.asp](http://www.fldoe.org/workforce/dwdframe/artic_frame.asp).

### **Program Length**

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. The standard length of this program is 72 credit hours according to Rule 6A-14.030, F.A.C.

### **Standards**

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.
- 12.0 Surface ophthalmic lenses.
- 13.0 Edge and finish lenses.
- 14.0 Insert and mount lenses.
- 15.0 Select and order frames and lenses.
- 16.0 Fit and dispense prescriptions.
- 17.0 Fit contact lenses.
- 18.0 Repair frames.

- 19.0 Demonstrate knowledge of office management.
- 20.0 Practice effective business management operation techniques.
- 21.0 Demonstrate knowledge of anatomy and physiology of the eye.
- 22.0 Demonstrate knowledge of the effects ophthalmic devices have in correcting the errors of human vision.
- 23.0 Practice technical and business computer functions.

2011 - 2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Optician  
**CIP Numbers:** 1317070100 AS, 0317070100 AAS  
**Program Length:** 72 credit hours  
**SOC Code(s):** 31-9099, 29-2081

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. At the completion of this program, the student will be able to:

**Health Careers Core: The Health Careers Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Careers Core or any other health occupations program do not have to repeat intended outcomes 01-11.**

01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:

- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
- 01.02 Identify common methods of payment for healthcare services.
- 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
- 01.04 Describe the composition and functions of a healthcare team.
- 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
- 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
- 01.07 Identify characteristics of effective teams.
- 01.08 Recognize methods for building positive team relationships.
- 01.09 Analyze attributes and attitudes of an effective leader.
- 01.10 Recognize factors and situations that may lead to conflict.
- 01.11 Demonstrate effective techniques for managing team conflict.
- 01.12 Describe factors that influence the current delivery system of healthcare.
- 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.

02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:

- 02.01 Develop basic speaking and active listening skills.
- 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
- 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
- 02.04 Respond to verbal and non-verbal cues.

- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.
- 02.06 Use appropriate medical terminology and abbreviations.
- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
- 02.08 Recognize the importance of patient/client educations regarding healthcare.
- 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
- 02.10 Analyze elements of communication using a sender-receiver model.
- 02.11 Distinguish between and report subjective and objective information.
- 02.12 Report relevant information in order of occurrence.

03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:

- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
- 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
- 03.03 Demonstrate procedures for accurate documentation and record keeping.
- 03.04 Interpret healthcare facility policy and procedures.
- 03.05 Explain the “Patient’s Bill of Rights”.
- 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
- 03.07 Describe advance directives.
- 03.08 Describe informed consent.
- 03.09 Explain the laws governing harassment, labor and employment.
- 03.10 Differentiate between legal and ethical issues in healthcare.
- 03.11 Describe a code of ethics consistent with the healthcare occupation.
- 03.12 Identify and compare personal, professional, and organizational ethics.
- 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
- 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
- 03.15 Recognize and report abuse including domestic violence and neglect.
- 03.16 Distinguish among the five schedules of controlled substances.

04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:

- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
- 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
- 04.03 Identify psychological reactions to illness including defense mechanisms.
- 04.04 Identify complementary and alternative health practices.
- 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
- 04.06 Explain the basic concepts of positive self image, wellness and stress.
- 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
- 04.08 Explain the nutrition pyramid.

- 04.09 Recognize the steps in the grief process.
- 05.0 Recognize and practice safety and security procedures. – The student will be able to:
  - 05.01 Recognize safe and unsafe working conditions and report safety hazards.
  - 05.02 Demonstrate the safe use of medical equipment.
  - 05.03 Explain and apply the theory of root- cause analysis
  - 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
  - 05.05 Identify and practice security procedures for medical supplies and equipment.
  - 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions.
  - 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
  - 05.08 Demonstrate proper body mechanics and ergonomics.
  - 05.09 Demonstrate the procedure for properly identifying patients.
  - 05.10 Demonstrate procedures for the safe transport and transfer of patients.
  - 05.11 Describe fire, safety, disaster and evacuations procedures.
  - 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )
- 06.0 Recognize and respond to emergency situations. – The student will be able to:
  - 06.01 Monitor and record vital signs.
  - 06.02 Describe legal parameters relating to the administration of emergency care.
  - 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
  - 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.
- 07.0 Recognize and practice infection control procedures. – The student will be able to:
  - 07.01 Define principles of infection control including standard and transmission based precautions.
  - 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
  - 07.03 Demonstrate knowledge of surgical asepsis.
  - 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.
- 08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:
  - 08.01 Describe technology applications in healthcare.
  - 08.02 Define terms and demonstrate basic computer skills.
  - 08.03 Recognize technology applications in healthcare.
  - 08.04 Interpret information from electronic medical documents.
  - 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.

09.0 Demonstrate employability skills. – The student will be able to:

- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.
- 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
- 09.03 Identify documents that may be required when applying for a job.
- 09.04 Write an appropriate resume.
- 09.05 Conduct a job search.
- 09.06 Complete a job application form correctly.
- 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
- 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
- 09.09 Identify acceptable work habits.
- 09.10 Recognize appropriate affective/professional behavior.
- 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).

10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:

- 10.01 Recognize emerging diseases and disorders
- 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
- 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
- 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
- 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
- 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.

11.0 Apply basic math and science skills. – The student will be able to:

- 11.01 Draw, read, and report on graphs, charts and tables.
- 11.02 Measure time, temperature, distance, capacity, and mass/weight.
- 11.03 Make, use and convert using both traditional and metric units.
- 11.04 Make estimations and approximations and judge the reasonableness of the result.
- 11.05 Convert from regular to 24 hour time.
- 11.06 Demonstrate ability to evaluate and draw conclusions.
- 11.07 Organize and communicate the results obtained by observation and experimentation.
- 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
- 11.09 Calculate ratios

**Optician: The completion of this module is the occupational exit of Dispensing Optician. Graduates of a recognized program with an A.S. degree are eligible to take the Florida optician licensure examination administered by the Department of Business and Professional Regulation for the Board of Opticianry (Chapter 484 F.S. Rule Chapter 21, F.A.C.).**

12.0 Surface ophthalmic lenses. – The student will be able to:

- 12.01 Layout single vision and multi-focal lenses.
- 12.02 Grind, fine and polish single vision lenses and/or multi-focal lenses.
- 12.03 Select lenses and supplies.
- 12.04 Inspect lenses.

13.0 Edge and finish lenses. – The student will be able to:

- 13.01 Layout and block lenses.
- 13.02 Machine and hand edge lenses.
- 13.03 Inspect lenses.
- 13.04 Air temper glass lenses.
- 13.05 Chemical temper glass lenses.
- 13.06 Tint hard resin lenses.
- 13.07 Select appropriate lenses.

14.0 Insert and mount lenses. – The student will be able to:

- 14.01 Insert lenses into zyl frames.
- 14.02 Insert lenses into metal frames.
- 14.03 Mount lenses into rimless and semi-rimless mountings or other appropriate designs.
- 14.04 Perform final inspection of eye glasses.
- 14.05 Demonstrate knowledge of lens accessories.

15.0 Select and order frames and lenses. – The student will be able to:

- 15.01 Analyze written prescriptions.
- 15.02 Duplicate prescriptions from existing lenses.
- 15.03 Evaluate patient's life-style needs.
- 15.04 Use selected instruments to assist in the calculation of fitting measurements.
- 15.05 Calculate lens size and availability.
- 15.06 Discuss charges with patients.
- 15.07 Order lenses and frames.

16.0 Fit and dispense prescriptions. – The students will be able to:

- 16.01 Verify finished prescriptions to specifications.
- 16.02 Align frames.
- 16.03 Adjust and fit optical devices to patients.

17.0 Fit contact lenses. – The student will be able to:

- 17.01 Analyze prescriptions.
  - 17.02 Evaluate patient suitability.
  - 17.03 Use selected instruments to conduct and assess fittings.
  - 17.04 Identify types of contact lenses.
  - 17.05 Conduct patient training.
  - 17.06 Outline potential complications.
  - 17.07 Conduct follow-up evaluations.
- 18.0 Repair frames. – The student will be able to:
- 18.01 Restore finish and replace/repair decorative trim on frames.
  - 18.02 Replace/repair nose pieces on zyl or metal frames.
  - 18.03 Solder metal frames.
  - 18.04 Replace/repair temples, front pieces, monofilament, and broken hinges.
  - 18.05 Reshape damaged frames to lenses.
  - 18.06 Replace/repair temples.
  - 18.07 Modify frames for special needs.
- 19.0 Demonstrate knowledge of office management. – The student will be able to:
- 19.01 Demonstrate knowledge of legal and ethical standards of vision care professionals.
  - 19.02 Maintain and file patient records.
  - 19.03 Bill and collect current and overdue accounts.
  - 19.04 Practice office supply control.
- 20.0 Practice effective business management operation techniques. – The student will be able to:
- 20.01 Develop a small business plan of operation.
  - 20.02 Develop an office policy/procedure manual.
  - 20.03 Demonstrate knowledge of business finance and operating expenses.
  - 20.04 Set up a pay scale and benefit program for employees and a bookkeeping system.
  - 20.05 Demonstrate knowledge of tax forms, payroll records, insurance needs and inventory needs.
  - 20.06 Demonstrate knowledge of employee hiring and orientation.
- 21.0 Demonstrate knowledge of anatomy and physiology of the eye. – The student will be able to:
- 21.01 Demonstrate understanding of the interrelationships between body systems.
  - 21.02 Diagram and explain the anatomy of the visual system.
  - 21.03 Recognize and discuss physiological conditions of the eye.
- 22.0 Demonstrate knowledge of the effects ophthalmic devices have in correcting the errors of human vision. – The student will be able to:
- 22.01 Demonstrate knowledge of basic mathematical principles that are involved in ophthalmic and geometrical optics.
  - 22.02 Describe the influence of thick and thin prisms on the behavior of light.

- 22.03 Apply the principles of light acting on curved single refracting surface to the optice of ophthalmic lenses for parallel and nonparallel light.
  - 22.04 Describe the relationship and optical properties of cylindrical lenses.
  - 22.05 Demonstrate knowledge of the theory of lens surface power measuring devices.
  - 22.06 Create and eliminate prismatic effect by decentration.
  - 22.07 Demonstrate the influence of lens thickness and surface curvature.
- 23.0 Practice technical and business computer functions. – The student will be able to:
- 23.01 Demonstrate knowledge of technical computer functions.
  - 23.02 Demonstrate knowledge of business applications of computers.

2011 - 2012

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Ophthalmic Technician  
**Career Cluster:** Health Science

	AS	AAS
CIP Number	1317070101	0317070101
Program Type	College Credit	College Credit
Standard Length	72 credit hours	72 credit hours
CTSO	HOSA	HOSA
SOC Codes (all applicable)	31-9099, 29-2099	31-9099, 29-2099
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>	
Perkins Technical Skill Attainment Inventory	<a href="http://www.fldoe.org/workforce/perkins/perkins_resources.asp">http://www.fldoe.org/workforce/perkins/perkins_resources.asp</a>	

### Purpose

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

The purpose of this program is to prepare students for employment as ophthalmic technicians, optical goods workers SOC Code 29-2099 (Health Technologists and Technicians, All Other) or provide supplemental training for persons previously or presently employed in this occupation.

The program is designed to provide the medical community of ophthalmology with workers who, under the supervision of an ophthalmologist, aid in the treatment of eye conditions and diseases. The curriculum provides students an opportunity to develop technical and social skills through experiences in the clinic, classroom, and laboratory. The Health Careers Core must be taken by all students (secondary, postsecondary adult and postsecondary vocational) planning to complete any Health Occupations program. Once successfully completed, the core does not need to be repeated at any instructional level.

The content includes but is not limited to (1) to perform specified ophthalmologic tests and procedures with skill, (2) understand and practice the art of ophthalmologic assisting, thereby providing the patient with medical care of the highest quality and accuracy, (3) to become members of the health care team who contribute to the physical and psychological comfort of the patient, (4) to provide a system of quality assurance for both equipment and treatment

delivery, (5) and to understand the importance of maintaining membership in the professional organizations and keeping abreast of the changes in the field of ophthalmology.

### **Program Structure**

This program is a planned sequence of instruction consisting of 72 credit hours.

### **Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

Clinical education has been established for students in this program to permit accurate assessment of the knowledge, skills, and abilities of students in the clinical component of the program. After completion of the prerequisite practice of ophthalmic assisting procedures, students indicate to the faculty their readiness for evaluation of competence in a specific competency category/procedure.

Multiple affiliates are utilized for the clinical activities which provide equitable opportunities for the student to achieve the program clinical objectives. The resulting clinical rotations provide students with the technical skills for the ophthalmic medical technician.

### **Special Notes**

This program meets the Department of Health HIV/AIDS Domestic Violence and Prevention of Medical Errors education requirements. Upon completion of this program, the instructor will provide a certificate to the student verifying that these requirements have been met.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635 F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

Outcomes 01-11 are referred to as the Health Careers Core and do not have to be completed if the student has previously completed the Core in another health science program. The CORE should be taken first or concurrently with the first course in the program. Following the successful completion of the core, the student is eligible to take the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

### **Career and Technical Student Organization (CTSO)**

Health Occupations Students of America, Inc. (HOSA) is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

## **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

## **Articulation**

This program has no statewide articulation agreement approved by the Articulation Coordinating Committee. However, this does not preclude the awarding of credits by any college through local agreements.

For details on statewide articulation agreements which correlate to programs and industry certifications, refer to [http://www.fl DOE.org/workforce/dwdframe/artic\\_frame.asp](http://www.fl DOE.org/workforce/dwdframe/artic_frame.asp).

## **Program Length**

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. The standard length of this program is 72 credit hours according to Rule 6A-14.030, F.A.C.

## **Certificate Programs**

A College Credit Certificate consists of a program of instruction of less than sixty (60) credits of college-level courses, which is part of an AS or AAS degree program and prepares students for entry into employment (Rule 6A-14.030, F.A.C.). This AS/AAS degree program includes the following College Credit Certificates:

Ophthalmic Laboratory Technician (0317070104) – 24 Credit Hours  
Eye Care Technician (0317070103) – 48 Credit Hours

Standards for the above certificate programs are contained in separate curriculum frameworks.

## **Standards**

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.

- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.
- 12.0 Demonstrate the taking of a medical history.
- 13.0 Demonstrate the performance of diagnostic tests.
- 14.0 Demonstrate anatomical and functional ocular measurements.
- 15.0 Demonstrate testing of ocular functions (including visual acuity and visual fields).
- 16.0 Demonstrate the administration of topical ophthalmic and oral medications.
- 17.0 Demonstrate the instruction of the patient in personal eye care and in the use of contact lenses.
- 18.0 Demonstrate the caring for and maintaining of ophthalmic instruments.
- 19.0 Demonstrate the caring for, maintaining and sterilizing of surgical instruments.
- 20.0 Demonstrate the maintaining of ophthalmic office equipment.
- 21.0 Demonstrate assisting in ophthalmic surgery in the office or hospital.
- 22.0 Demonstrate the taking of diagnostic measurements.
- 23.0 Demonstrate the fitting of contact lenses.
- 24.0 Demonstrate the adjusting and making of minor repairs on spectacles.
- 25.0 Describe other tasks as may be delegated consistent with sound medical practice (e.g. use of computerized ophthalmic equipment).

2011 - 2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Ophthalmic Technician  
**CIP Numbers:** 1317070101 AS, 0317070101 AAS  
**Program Length:** 72 credit hours  
**SOC Code(s):** 31-9099, 29-2099

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. At the completion of this program, the student will be able to:

**Health Careers Core: The Health Careers Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Careers Core or any other health occupations program do not have to repeat intended outcomes 01-11.**

01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:

- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
- 01.02 Identify common methods of payment for healthcare services.
- 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
- 01.04 Describe the composition and functions of a healthcare team.
- 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
- 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
- 01.07 Identify characteristics of effective teams.
- 01.08 Recognize methods for building positive team relationships.
- 01.09 Analyze attributes and attitudes of an effective leader.
- 01.10 Recognize factors and situations that may lead to conflict.
- 01.11 Demonstrate effective techniques for managing team conflict.
- 01.12 Describe factors that influence the current delivery system of healthcare.
- 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.

02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:

- 02.01 Develop basic speaking and active listening skills.
- 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
- 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
- 02.04 Respond to verbal and non-verbal cues.

- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.
- 02.06 Use appropriate medical terminology and abbreviations.
- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
- 02.08 Recognize the importance of patient/client educations regarding healthcare.
- 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
- 02.10 Analyze elements of communication using a sender-receiver model.
- 02.11 Distinguish between and report subjective and objective information.
- 02.12 Report relevant information in order of occurrence.

03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:

- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
- 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
- 03.03 Demonstrate procedures for accurate documentation and record keeping.
- 03.04 Interpret healthcare facility policy and procedures.
- 03.05 Explain the “Patient’s Bill of Rights”.
- 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
- 03.07 Describe advance directives.
- 03.08 Describe informed consent.
- 03.09 Explain the laws governing harassment, labor and employment.
- 03.10 Differentiate between legal and ethical issues in healthcare.
- 03.11 Describe a code of ethics consistent with the healthcare occupation.
- 03.12 Identify and compare personal, professional, and organizational ethics.
- 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
- 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
- 03.15 Recognize and report abuse including domestic violence and neglect.
- 03.16 Distinguish among the five schedules of controlled substances.

04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:

- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
- 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
- 04.03 Identify psychological reactions to illness including defense mechanisms.
- 04.04 Identify complementary and alternative health practices.
- 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
- 04.06 Explain the basic concepts of positive self image, wellness and stress.
- 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
- 04.08 Explain the nutrition pyramid.

- 04.09 Recognize the steps in the grief process.
- 05.0 Recognize and practice safety and security procedures. – The student will be able to:
  - 05.01 Recognize safe and unsafe working conditions and report safety hazards.
  - 05.02 Demonstrate the safe use of medical equipment.
  - 05.03 Explain and apply the theory of root- cause analysis
  - 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
  - 05.05 Identify and practice security procedures for medical supplies and equipment.
  - 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions.
  - 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
  - 05.08 Demonstrate proper body mechanics and ergonomics.
  - 05.09 Demonstrate the procedure for properly identifying patients.
  - 05.10 Demonstrate procedures for the safe transport and transfer of patients.
  - 05.11 Describe fire, safety, disaster and evacuations procedures.
  - 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )
- 06.0 Recognize and respond to emergency situations. – The student will be able to:
  - 06.01 Monitor and record vital signs.
  - 06.02 Describe legal parameters relating to the administration of emergency care.
  - 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
  - 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.
- 07.0 Recognize and practice infection control procedures. – The student will be able to:
  - 07.01 Define principles of infection control including standard and transmission based precautions.
  - 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
  - 07.03 Demonstrate knowledge of surgical asepsis.
  - 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.
- 08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:
  - 08.01 Describe technology applications in healthcare.
  - 08.02 Define terms and demonstrate basic computer skills.
  - 08.03 Recognize technology applications in healthcare.
  - 08.04 Interpret information from electronic medical documents.
  - 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.

09.0 Demonstrate employability skills. – The student will be able to:

- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.
- 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
- 09.03 Identify documents that may be required when applying for a job.
- 09.04 Write an appropriate resume.
- 09.05 Conduct a job search.
- 09.06 Complete a job application form correctly.
- 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
- 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
- 09.09 Identify acceptable work habits.
- 09.10 Recognize appropriate affective/professional behavior.
- 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).

10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:

- 10.01 Recognize emerging diseases and disorders
- 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
- 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
- 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
- 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
- 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.

11.0 Apply basic math and science skills. – The student will be able to:

- 11.01 Draw, read, and report on graphs, charts and tables.
- 11.02 Measure time, temperature, distance, capacity, and mass/weight.
- 11.03 Make, use and convert using both traditional and metric units.
- 11.04 Make estimations and approximations and judge the reasonableness of the result.
- 11.05 Convert from regular to 24 hour time.
- 11.06 Demonstrate ability to evaluate and draw conclusions.
- 11.07 Organize and communicate the results obtained by observation and experimentation.
- 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
- 11.09 Calculate ratios.

**Ophthalmic Technician: Students completing this module meet the qualifications for Ophthalmic Technicians (Health Technologists and Technicians, All Other)**

- 12.0 Demonstrate the taking of a medical history. – The student will be able to:
  - 12.01 Communicate effectively in written and oral communications.
  - 12.02 Use appropriate medical terminology in recording the medical history.
  - 12.03 Maintain patient confidentiality.
  - 12.04 Maintain applicable ethical and legal standards.
  - 12.05 Identify body structures and describe the physiological processes of the eye.
  
- 13.0 Demonstrate the performance of diagnostic tests. – The student will be able to:
  - 13.01 Perform competently within the scope of training and education.
  - 13.02 Accept responsibility for professional actions.
  
- 14.0 Demonstrate anatomical and functional ocular measurements. – The student will be able to:
  - 14.01 Describe the principles of human physiology.
  - 14.02 Identify and describe tissues and cellular structures of the eye.
  - 14.03 Apply the correct medical terminology to body structures and functions of the eye.
  - 14.04 Identify cause and effect of the most common pathological conditions of each body system as they relate to the eye.
  
- 15.0 Demonstrate testing of ocular functions (including visual acuity and visual fields). – The student will be able to:
  - 15.01 Describe the interaction of light, lenses, laws of optics.
  - 15.02 Describe optical properties of the human eye.
  - 15.03 Measure objectively and subjectively the refractive state of the eye.
  
- 16.0 Demonstrate the administration of topical ophthalmic and oral medications. – The student will be able to:
  - 16.01 Identify commonly administered drugs, their uses and effects upon the human body.
  - 16.02 Identify the correct abbreviations and terminology relating to pharmaceutical preparations.
  - 16.03 Identify the various routes of drug administration.
  - 16.04 Describe the legal records necessary for the administration and dispensing of drugs by the physician.
  - 16.05 Describe the ethical standards necessary for the administration and dispensing of drugs by the physician.
  - 16.06 Administer and record specified topical and oral medications at the direction of the physician and in accordance with medical standards.
  - 16.07 Identify security procedures of medications as regulated by law.
  - 16.08 Describe appropriate procedures for the disposition of medications and clinical supplies in reference of shelf-life expectancies and/or expiration dates.

- 17.0 Demonstrate the instruction of the patient in personal eye care and in the use of contact lenses. – The student will be able to:
- 17.01 Instruct the patient in the correct methods of insertion and removal of the contact lenses.
  - 17.02 Instruct the patient in the appropriate methods of daily care of the eye and the contact lenses.
- 18.0 Demonstrate the caring for and maintaining of ophthalmic instruments. – The student will be able to:
- 18.01 Describe the fundamental principles of the maintenance, inventory control, and ordering of ophthalmic instruments.
  - 18.02 Maintain a clinic inventory of the instruments.
  - 18.03 Describe the appropriate safety/security procedures for the instruments.
- 19.0 Demonstrate the caring for, maintaining and sterilizing of surgical instruments. – The student will be able to:
- 19.01 Describe the fundamentals of microbial control.
  - 19.02 Describe procedures for sterilization, disinfection and sanitation.
  - 19.03 Describe methods for control of infection and prevention of contamination in the medical facility.
  - 19.04 Describe the appropriate procedure for the handling of contaminated equipment and supplies.
  - 19.05 Describe the appropriate method for disposal of contaminated materials.
  - 19.06 Describe and accurately perform handwashing techniques.
  - 19.07 Implement appropriate Joint Commission patient safety goals.
- 20.0 Demonstrate the maintaining of ophthalmic office equipment. – The student will be able to:
- 20.01 Describe the fundamental principles of the maintenance, inventory control, and ordering of ophthalmic supplies and equipment.
  - 20.02 Maintain and inventory of office equipment.
  - 20.03 Apply appropriate safety/security procedures for equipment.
  - 20.04 Perform quality assurance procedures on all clinical equipment.
  - 20.05 Describe and perform appropriate maintenance programs for various ophthalmic equipment.
- 21.0 Demonstrate assisting in ophthalmic surgery in the office or hospital. – The student will be able to:
- 21.01 Describe the fundamentals of microbial control.
  - 21.02 Describe the procedures for sanitation, disinfection, and sterilization.
  - 21.03 Describe methods for infection control and prevention of contamination in the medical facility.
  - 21.04 Describe procedures for safe handling of contaminated equipment and supplies.
  - 21.05 Describe the appropriate method and demonstrate appropriate handwashing techniques.

- 21.06 Describe the appropriate method for creating and maintaining sterile fields for dressings and minor surgery.
  - 21.07 Describe the correct methods for disposal of contaminated materials.
  - 21.08 Describe the appropriate methods for sterilizing and preparing surgical instruments.
  - 21.09 Maintain and use aseptic technique when applicable.
  - 21.10 Prepare the examination and treatment in accordance with the appropriate sterile or aseptic technique.
  - 21.11 Describe the appropriate methods of assisting the physician with various minor office surgical procedures.
- 22.0 Demonstrate the taking of diagnostic measurements. – The student will be able to:
- 22.01 Describe the fundamentals of extraocular muscle balance and binocular vision.
  - 22.02 Test ductions and versions.
  - 22.03 Perform cover tests.
  - 22.04 Perform basic tests to evaluate binocular vision.
  - 22.05 Perform tonometry.
  - 22.06 Perform anterior and posterior photography.
  - 22.07 Perform manual and automated corneal measurements.
  - 22.08 Perform A and B Scan ultrasound.
- 23.0 Demonstrate the fitting of contact lenses. – The student will be able to:
- 23.01 Describe the principles and utilization of hard, soft and gas permeable lenses.
  - 23.02 Perform the fitting and evaluation of contact lenses.
  - 23.03 Provide patient education relative to wearing and maintaining contact lenses.
- 24.0 Demonstrate the adjusting and making of minor repairs on spectacles. – The student will be able to:
- 24.01 Describe the principles of ophthalmic patient services.
  - 24.02 Make simple and minor repairs to spectacles such temple adjustments and adjustment of the nose piece.
  - 24.03 Adjust the spectacles to patient comfort.
- 25.0 Describe other tasks as may be delegated consistent with sound medical practice (e.g. use of computerized ophthalmic equipment). – The student will be able to:
- 25.01 Describe the appropriate application of various tests and procedures.
  - 25.02 Recognize any deviation from the normal test results.
  - 25.03 Describe procedures for collecting, labeling, preserving, staining and culturing of specimens from patients with ocular problems.
  - 25.04 Give appropriate instructions to patients.

2011 - 2012

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Eye Care Technician  
**Career Cluster:** Health Science

<b>CCC</b>	
CIP Number	0317070103
Program Type	College Credit Certificate (CCC)
Program Length	48 credit hours
CTSO	HOSA
SOC Codes (all applicable)	31-9099
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>

### **Purpose**

This certificate program is part of the Ophthalmic Technician AS/AAS degree program (1317070101).

A College Credit Certificate consists of a program of instruction of less than sixty (60) credits of college-level courses, which is part of an AS or AAS degree program and prepares students for entry into employment (Rule 6A-14.030, F.A.C.).

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

The purpose of this program is to prepare students for employment as Eye Care Technicians. SOC Code 31-9099 (Healthcare Support Workers, All Other)

The content includes but is not limited to basic instruction in anatomy and physiology, CPR, Heartsaver, office practices and dispensing of visual devices. Because optometrists now deal with certain drugs, students need knowledge of diagnostic and therapeutic drugs under supervision. The Health Science Core must be taken by all students (secondary, postsecondary adult and postsecondary vocational) planning to complete any Health Occupations program. Once successfully completed, the core does not need to be repeated at any instructional level.

## **Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

## **Special Notes**

This program meets the Department of Health HIV/AIDS Domestic Violence and Prevention of Medical Errors education requirements. Upon completion of this program, the instructor will provide a certificate to the student verifying that these requirements have been met.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635 F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

Students are prepared to assist in performing tests to determine defects in vision, preparing and fitting eyeglasses and contact lenses, and administering corrective eye exercises and other treatments under the supervision of a person licensed under FL Statutes 458, 459, 463 or 484.

This program focuses on broad, transferable skills and stresses understanding and demonstration of the following elements of the health care industry; planning, management, finance, technical and production skills, underlying principles of technology, labor issues, community issues and health, safety, and environmental issues.

Students should be strongly encouraged to take the Certification examination offered by the Paraoptometric Section of the American Optometric Association.

Cooperative training - OJT is appropriate for this program. Whenever cooperative training - OJT is offered, the following are required for each student: a training plan, signed by the student, teacher, and employer, which includes instructional objectives and a list of on-the-job and in-school learning experiences; a workstation that reflects equipment, skills and tasks that are relevant to the occupation which the student has chosen as a career goal. The student must receive compensation for work performed.

Outcomes 01-11 are referred to as the Health Careers Core and do not have to be completed if the student has previously completed the Core in another health science program. The CORE should be taken first or concurrently with the first course in the program. Following the successful completion of the core, the student is eligible to take the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

## **Career and Technical Student Organization (CTSO)**

Health Occupations Students of America (HOSA), Inc., is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

## **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

## **Standards**

After successfully completing this course the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.
- 12.0 Report and record patient information.
- 13.0 Demonstrate knowledge of business management techniques.
- 14.0 Performs delivery of optical devices.
- 15.0 Perform and assist in procedures used in visual testing.
- 16.0 Perform special procedures.
- 17.0 Demonstrate knowledge of the refractive status of the eye and binocularity.
- 18.0 Demonstrate knowledge of basic ocular anatomy and physiology.

2011 - 2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Eye Care Technician  
**CIP Number:** 0317070103  
**Program Length:** 48 credit hours  
**SOC Code(s):** 31-9099

This certificate program is part of the Ophthalmic Technician AS/AAS degree program (1317070101). At the completion of this program, the student will be able to:

**Health Careers Core: The Health Careers Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Careers Core or any other health occupations program do not have to repeat intended outcomes 01-11.**

01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:

- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
- 01.02 Identify common methods of payment for healthcare services.
- 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
- 01.04 Describe the composition and functions of a healthcare team.
- 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
- 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
- 01.07 Identify characteristics of effective teams.
- 01.08 Recognize methods for building positive team relationships.
- 01.09 Analyze attributes and attitudes of an effective leader.
- 01.10 Recognize factors and situations that may lead to conflict.
- 01.11 Demonstrate effective techniques for managing team conflict.
- 01.12 Describe factors that influence the current delivery system of healthcare.
- 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.

02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:

- 02.01 Develop basic speaking and active listening skills.
- 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
- 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
- 02.04 Respond to verbal and non-verbal cues.
- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.
- 02.06 Use appropriate medical terminology and abbreviations.

- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
  - 02.08 Recognize the importance of patient/client educations regarding healthcare.
  - 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
  - 02.10 Analyze elements of communication using a sender-receiver model.
  - 02.11 Distinguish between and report subjective and objective information.
  - 02.12 Report relevant information in order of occurrence.
- 03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:
- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
  - 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
  - 03.03 Demonstrate procedures for accurate documentation and record keeping.
  - 03.04 Interpret healthcare facility policy and procedures.
  - 03.05 Explain the “Patient’s Bill of Rights”.
  - 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
  - 03.07 Describe advance directives.
  - 03.08 Describe informed consent.
  - 03.09 Explain the laws governing harassment, labor and employment.
  - 03.10 Differentiate between legal and ethical issues in healthcare.
  - 03.11 Describe a code of ethics consistent with the healthcare occupation.
  - 03.12 Identify and compare personal, professional, and organizational ethics.
  - 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
  - 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
  - 03.15 Recognize and report abuse including domestic violence and neglect.
  - 03.16 Distinguish among the five schedules of controlled substances.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:
- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
  - 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
  - 04.03 Identify psychological reactions to illness including defense mechanisms.
  - 04.04 Identify complementary and alternative health practices.
  - 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
  - 04.06 Explain the basic concepts of positive self image, wellness and stress.
  - 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
  - 04.08 Explain the nutrition pyramid.
  - 04.09 Recognize the steps in the grief process.
- 05.0 Recognize and practice safety and security procedures. – The student will be able to:

- 05.01 Recognize safe and unsafe working conditions and report safety hazards.
  - 05.02 Demonstrate the safe use of medical equipment.
  - 05.03 Explain and apply the theory of root- cause analysis
  - 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
  - 05.05 Identify and practice security procedures for medical supplies and equipment.
  - 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions).
  - 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
  - 05.08 Demonstrate proper body mechanics and ergonomics.
  - 05.09 Demonstrate the procedure for properly identifying patients.
  - 05.10 Demonstrate procedures for the safe transport and transfer of patients.
  - 05.11 Describe fire, safety, disaster and evacuations procedures.
  - 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )
- 06.0 Recognize and respond to emergency situations. – The student will be able to:
- 06.01 Monitor and record vital signs.
  - 06.02 Describe legal parameters relating to the administration of emergency care.
  - 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
  - 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.
- 07.0 Recognize and practice infection control procedures. – The student will be able to:
- 07.01 Define principles of infection control including standard and transmission based precautions.
  - 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
  - 07.03 Demonstrate knowledge of surgical asepsis.
  - 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.
- 08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:
- 08.01 Describe technology applications in healthcare.
  - 08.02 Define terms and demonstrate basic computer skills.
  - 08.03 Recognize technology applications in healthcare.
  - 08.04 Interpret information from electronic medical documents.
  - 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.
- 09.0 Demonstrate employability skills. – The student will be able to:
- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.

- 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
  - 09.03 Identify documents that may be required when applying for a job.
  - 09.04 Write an appropriate resume.
  - 09.05 Conduct a job search.
  - 09.06 Complete a job application form correctly.
  - 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
  - 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
  - 09.09 Identify acceptable work habits.
  - 09.10 Recognize appropriate affective/professional behavior.
  - 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:
- 10.01 Recognize emerging diseases and disorders
  - 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
  - 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
  - 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
  - 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
  - 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.
- 11.0 Apply basic math and science skills. – The student will be able to:
- 11.01 Draw, read, and report on graphs, charts and tables.
  - 11.02 Measure time, temperature, distance, capacity, and mass/weight.
  - 11.03 Make, use and convert using both traditional and metric units.
  - 11.04 Make estimations and approximations and judge the reasonableness of the result.
  - 11.05 Convert from regular to 24 hour time.
  - 11.06 Demonstrate ability to evaluate and draw conclusions.
  - 11.07 Organize and communicate the results obtained by observation and experimentation.
  - 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
  - 11.09 Calculate ratios

**The completion of the following competencies (12-18) leads to the completion point of SOC Code 31-9099 (Healthcare Support Workers, All Other)**

- 12.0 Report and record patient information. – The student will be able to:
  - 12.01 Properly identify patients.
  - 12.02 Obtain specified data from patient and family regarding visual status.
  - 12.03 Receive and give oral report of patient's visual status.
  - 12.04 Report and record pertinent observations of visual status.
  - 12.05 Utilize verbal and written information to assist with the plan of care for the patient.
  
- 13.0 Demonstrate knowledge of business management techniques. – The student will be able to:
  - 13.01 Demonstrate knowledge of legal and ethical standards of vision care professionals.
  - 13.02 Demonstrate the use of several means of communication.
  - 13.03 Maintain and file patient records.
  - 13.04 Bill and collect current and overdue accounts.
  - 13.05 Practice office supply control.
  - 13.06 Demonstrate knowledge of medical terminology.
  - 13.07 Practice accepted work ethic.
  - 13.08 Demonstrate basic maintenance of equipment.
  - 13.09 Schedule patients.
  - 13.10 Complete and file third party forms.
  - 13.11 Type 25 words per minute correctly.
  
- 14.0 Perform delivery of optical devices. – The student will be able to:
  - 14.01 Transcribe, transpose, and interpret prescriptions.
  - 14.02 Neutralize and verify lenses.
  - 14.03 Edge and insert lenses.
  - 14.04 Select and order lenses.
  - 14.05 Adjust, dispense and repair spectacles.
  - 14.06 Assist patients with frame and lens selection.
  - 14.07 Demonstrate knowledge of basic mathematical principles that are involved in ophthalmic and geometrical optics.
  - 14.08 List the types of repairs which can be performed on plastic and metal frames and describe how these repairs are accomplished.
  - 14.09 Demonstrate knowledge of various lens designs and materials.
  
- 15.0 Perform and assist in procedures used in visual testing. – The student will be able to:
  - 15.01 Perform vision screening and preliminary testing.
  - 15.02 Measure and record visual acuity.
  - 15.03 Measure and record color vision.
  - 15.04 Measure and record stereo acuity.
  - 15.05 Take and record patient histories.
  - 15.06 Perform chairside assisting.

- 15.07 Describe components of and instrumentation used in comprehensive vision evaluation.
- 16.0 Perform special procedures. – The student will be able to:
  - 16.01 Assist in fitting contact lenses.
  - 16.02 Instruct patients in care and handling of contact lenses.
  - 16.03 Use selected instruments to verify contact lenses.
  - 16.04 Demonstrate knowledge of the advantages and disadvantages of various contact lens materials and designs.
  - 16.05 Demonstrate knowledge of vision therapy.
  - 16.06 Measure and record intraocular pressure.
  - 16.07 Measure and record a visual field.
  - 16.08 Demonstrate knowledge of diagnostic and therapeutic drugs.
- 17.0 Demonstrate knowledge of the refractive status of the eye and binocularity. – The student will be able to:
  - 17.01 Demonstrate knowledge of refractive errors.
  - 17.02 Demonstrate knowledge of visual deficiencies.
  - 17.03 Demonstrate knowledge of ocular motility.
  - 17.04 Demonstrate knowledge of binocular vision.
  - 17.05 Demonstrate ability to communicate knowledge to patients.
  - 17.06 Demonstrate the ability to recognize sight threatening emergencies.
- 18.0 Demonstrate knowledge of basic ocular anatomy and physiology. – The student will be able to:
  - 18.01 Demonstrate knowledge of ocular anatomy.
  - 18.02 Demonstrate knowledge of ocular physiology.
  - 18.03 Demonstrate knowledge of pathological and functional disorders of the eye.
  - 18.04 Correlate general health as it relates to ocular health.

2011 - 2012

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Ophthalmic Laboratory Technician  
**Career Cluster:** Health Science

<b>CCC</b>	
CIP Number	0317070104
Program Type	College Credit Certificate (CCC)
Program Length	24 credit hours
CTSO	HOSA
SOC Codes (all applicable)	31-9099, 51-9083
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>

### **Purpose**

This certificate program is part of the Ophthalmic Technician AS/AAS degree program (1317070101).

A College Credit Certificate consists of a program of instruction of less than sixty (60) credits of college-level courses, which is part of an AS or AAS degree program and prepares students for entry into employment (Rule 6A-14.030, F.A.C.).

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

The purpose of this program is to prepare students for employment as Ophthalmic Laboratory Technicians. SOC Code 51-9083 (Ophthalmic Laboratory Technicians)

The content includes but is not limited to basic instruction in anatomy and physiology, CPR, Heartsaver, office practices and dispensing of visual devices. Because optometrists now deal with certain drugs, students need knowledge of diagnostic and therapeutic drugs under supervision. The Health Science Core must be taken by all students (secondary, postsecondary adult and postsecondary vocational) planning to complete any Health Occupations program. Once successfully completed, the core does not need to be repeated at any instructional level.

### **Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

### **Special Notes**

This program meets the Department of Health HIV/AIDS Domestic Violence and Prevention of Medical Errors education requirements. Upon completion of this program, the instructor will provide a certificate to the student verifying that these requirements have been met.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635 F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

Students are prepared to assist in performing tests to determine defects in vision, preparing and fitting eyeglasses and contact lenses, and administering corrective eye exercises and other treatments under the supervision of a person licensed under FL Statutes 458, 459, 463 or 484.

This program focuses on broad, transferable skills and stresses understanding and demonstration of the following elements of the health care industry; planning, management, finance, technical and production skills, underlying principles of technology, labor issues, community issues and health, safety, and environmental issues.

Students should be strongly encouraged to take the Certification examination offered by the Paraoptometric Section of the American Optometric Association.

Cooperative training - OJT is appropriate for this program. Whenever cooperative training - OJT is offered, the following are required for each student: a training plan, signed by the student, teacher, and employer, which includes instructional objectives and a list of on-the-job and in-school learning experiences; a workstation that reflects equipment, skills and tasks that are relevant to the occupation which the student has chosen as a career goal. The student must receive compensation for work performed.

Outcomes 01-11 are referred to as the Health Careers Core and do not have to be completed if the student has previously completed the Core in another health science program. The CORE should be taken first or concurrently with the first course in the program. Following the successful completion of the core, the student is eligible to take the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

### **Career and Technical Student Organization (CTSO)**

Health Occupations Students of America, Inc. (HOSA) is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

## **Standards**

After successfully completing this course the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.
- 12.0 Perform lens preparation
- 13.0 Demonstrate knowledge of edging lenses
- 14.0 Perform edging using appropriate automatic equipment
- 15.0 Perform edging using appropriate hand edging equipment
- 16.0 Demonstrate knowledge of impact resistant lenses
- 17.0 Demonstrate knowledge of insets and prisms in lenses
- 18.0 Perform special procedures

2011 - 2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Ophthalmic Laboratory Technician  
**CIP Number:** 0317070104  
**Program Length:** 24 credit hours  
**SOC Code(s):** 31-9099, 51-9083

This certificate program is part of the Ophthalmic Technician AS/AAS degree program (1317.070101). At the completion of this program, the student will be able to:

**Health Careers Core: The Health Careers Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Careers Core or any other health occupations program do not have to repeat intended outcomes 01-11.**

01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:

- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
- 01.02 Identify common methods of payment for healthcare services.
- 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
- 01.04 Describe the composition and functions of a healthcare team.
- 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
- 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
- 01.07 Identify characteristics of effective teams.
- 01.08 Recognize methods for building positive team relationships.
- 01.09 Analyze attributes and attitudes of an effective leader.
- 01.10 Recognize factors and situations that may lead to conflict.
- 01.11 Demonstrate effective techniques for managing team conflict.
- 01.12 Describe factors that influence the current delivery system of healthcare.
- 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.

02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:

- 02.01 Develop basic speaking and active listening skills.
- 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
- 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
- 02.04 Respond to verbal and non-verbal cues.
- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.

- 02.06 Use appropriate medical terminology and abbreviations.
- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
- 02.08 Recognize the importance of patient/client educations regarding healthcare.
- 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
- 02.10 Analyze elements of communication using a sender-receiver model.
- 02.11 Distinguish between and report subjective and objective information.
- 02.12 Report relevant information in order of occurrence.

03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:

- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
- 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
- 03.03 Demonstrate procedures for accurate documentation and record keeping.
- 03.04 Interpret healthcare facility policy and procedures.
- 03.05 Explain the “Patient’s Bill of Rights”.
- 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
- 03.07 Describe advance directives.
- 03.08 Describe informed consent.
- 03.09 Explain the laws governing harassment, labor and employment.
- 03.10 Differentiate between legal and ethical issues in healthcare.
- 03.11 Describe a code of ethics consistent with the healthcare occupation.
- 03.12 Identify and compare personal, professional, and organizational ethics.
- 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
- 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
- 03.15 Recognize and report abuse including domestic violence and neglect.
- 03.16 Distinguish among the five schedules of controlled substances.

04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:

- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
- 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
- 04.03 Identify psychological reactions to illness including defense mechanisms.
- 04.04 Identify complementary and alternative health practices.
- 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
- 04.06 Explain the basic concepts of positive self image, wellness and stress.
- 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
- 04.08 Explain the nutrition pyramid.
- 04.09 Recognize the steps in the grief process.

05.0 Recognize and practice safety and security procedures. – The student will be able to:

- 05.01 Recognize safe and unsafe working conditions and report safety hazards.
- 05.02 Demonstrate the safe use of medical equipment.
- 05.03 Explain and apply the theory of root- cause analysis
- 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
- 05.05 Identify and practice security procedures for medical supplies and equipment.
- 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions).
- 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
- 05.08 Demonstrate proper body mechanics and ergonomics.
- 05.09 Demonstrate the procedure for properly identifying patients.
- 05.10 Demonstrate procedures for the safe transport and transfer of patients.
- 05.11 Describe fire, safety, disaster and evacuations procedures.
- 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )

06.0 Recognize and respond to emergency situations. – The student will be able to:

- 06.01 Monitor and record vital signs.
- 06.02 Describe legal parameters relating to the administration of emergency care.
- 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
- 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.

07.0 Recognize and practice infection control procedures. – The student will be able to:

- 07.01 Define principles of infection control including standard and transmission based precautions.
- 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
- 07.03 Demonstrate knowledge of surgical asepsis.
- 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.

08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:

- 08.01 Describe technology applications in healthcare.
- 08.02 Define terms and demonstrate basic computer skills.
- 08.03 Recognize technology applications in healthcare.
- 08.04 Interpret information from electronic medical documents.
- 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.

09.0 Demonstrate employability skills. – The student will be able to:

- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.
  - 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
  - 09.03 Identify documents that may be required when applying for a job.
  - 09.04 Write an appropriate resume.
  - 09.05 Conduct a job search.
  - 09.06 Complete a job application form correctly.
  - 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
  - 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
  - 09.09 Identify acceptable work habits.
  - 09.10 Recognize appropriate affective/professional behavior.
  - 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:
- 10.01 Recognize emerging diseases and disorders
  - 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
  - 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
  - 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
  - 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
  - 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.
- 11.0 Apply basic math and science skills. – The student will be able to:
- 11.01 Draw, read, and report on graphs, charts and tables.
  - 11.02 Measure time, temperature, distance, capacity, and mass/weight.
  - 11.03 Make, use and convert using both traditional and metric units.
  - 11.04 Make estimations and approximations and judge the reasonableness of the result.
  - 11.05 Convert from regular to 24 hour time.
  - 11.06 Demonstrate ability to evaluate and draw conclusions.
  - 11.07 Organize and communicate the results obtained by observation and experimentation.
  - 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
  - 11.09 Calculate ratios.

**Completion of the following competencies lead to completion point of SOC Code 51-9083 (Ophthalmic Laboratory Technicians)**

- 12.0 Perform lens preparation. – The student will be able to:
- 12.01 Define the terms pertaining to surfacing.
  - 12.02 Relate the RX to surfacing spherical lenses.
  - 12.03 Calculate laps for spherical lenses.
  - 12.04 Determine the thickness calculations for spherical lenses.
  - 12.05 Prepare a lot spherical lenses for surfacing.
  - 12.06 Block spherical lenses for surfacing glass and plastic.
  - 12.07 Set up a generator for surfacing plus and minus grind spherical lenses.
  - 12.08 Fine spherical glass and plastic lenses.
  - 12.09 Polish spherical glass and plastic lenses.
  - 12.10 Inspect & deblock finished lenses.
  - 12.11 Define terms pertaining to sphero-cylinder lenses.
  - 12.12 Relate RX to surfacing cylindrical lenses for flat transposition and toric transposition.
  - 12.13 Calculate base curve and laps for surfacing cylindrical lenses.
  - 12.14 Thickness calculations for cylindrical lenses.
  - 12.15 Enter information on job ticket.
  - 12.16 Layout lenses for surfacing cylindrical lenses.
  - 12.17 Set-up the generator for surfacing cylindrical lenses.
  - 12.18 Define the terms relating to multifocal lenses.
  - 12.19 Relate Rx to surfacing multifocal lenses.
- 13.0 Demonstrate knowledge of edging lenses. – The student will be able to:
- 13.01 Explain the need to verify a lens before edging.
  - 13.02 Describe the methods to verify a lens before edging.
  - 13.03 Describe the "Boxing System".
  - 13.04 Explain the need for decentering a lens.
  - 13.05 Give examples that bring about decentration in and/or out when laying out for edging.
  - 13.06 Explain how thickness is verified and the need to control it.
  - 13.07 Explain 5 surface defects a lens may have and how an optician would be able to detect each.
  - 13.08 Apply A.N.S.I. Z-80 standards when verifying uncut, edged and mounted single vision lenses.
- 14.0 Perform edging using appropriate automatic equipment. – The student will be able to:
- 14.01 Explain the procedures to layout for edging single vision spherical and cylindrical lenses.
  - 14.02 Demonstrate the ability to layout single vision lenses for edging.
  - 14.03 Explain why verification of the layout is necessary.
  - 14.04 Explain how the optician will verify the layout and what will be checked.
  - 14.05 Explain the different uses the pattern may have in verifying the layout of lenses.
  - 14.06 Explain the use of the "Box-o-graph" for patterns and lenses.
  - 14.07 Demonstrate the ability to verify a layout.

- 14.08 Demonstrate the ability to make patterns.
  - 14.09 Explain methods of blocking lenses for edging.
  - 14.10 Explain sizing procedures including set, set size, and on size.
  - 14.11 Explain the procedures to edge lenses in various automatic edgers.
  - 14.12 Explain a standard bevel and its uses.
  - 14.13 Explain a hide-a-bevel and its uses.
  - 14.14 Explain a flat bevel and its uses.
  - 14.15 Explain a grooved bevel and its uses.
  - 14.16 Explain a 1/3 - 2/3 bevel and its uses.
  - 14.17 Explain combination bevels and what they are used for.
  - 14.18 Explain maintenance schedules and calibration techniques for blocking and edging equipment.
  - 14.19 Demonstrate the ability to block lenses, edge lenses using the automatic edgers, and control sizing.
- 15.0 Perform edging using appropriate hand edging equipment. – The student will be able to:
- 15.01 Describe the different types of hand edgers.
  - 15.02 Compare and contrast the advantages and/or disadvantages of ceramic and diamond hand edgers.
  - 15.03 Explain the methods of hand beveling.
  - 15.04 Explain the reasons for not re-edging glass lenses.
  - 15.05 Explain the methods to re-edge lenses.
  - 15.06 Explain the reasons for and use of safety or pin bevels.
  - 15.07 Explain the difference between hand edging or beveling and safety or pin beveling.
  - 15.08 Demonstrate the ability to hand bevel and/or reshape lenses to fit any given frame.
  - 15.09 Demonstrate the ability to insert lenses into various frames
  - 15.10 Explain the methods of hand beveling.
  - 15.11 Explain the reasons for not re-edging glass lenses.
  - 15.12 Explain the methods to re-edge lenses.
  - 15.13 Explain the uses for the polarascope.
  - 15.14 Demonstrate the ability to hand bevel and/or reshape lenses to fit any given frame.
  - 15.15 Edge lenses using the HORIZON edger.
  - 15.16 Explain prism as it relates to edging of single vision lenses, including decentered & ground.
  - 15.17 Explain the procedure for laying out single vision lenses with prism.
  - 15.18 Explain maintenance schedules and calibration techniques for edging equipment.
- 16.0 Demonstrate knowledge of impact resistant lenses. – The student will be able to:
- 16.01 Explain the heat treating method of making lenses impact resistant.
  - 16.02 Explain the chemical treating method of making lenses impact resistant.
  - 16.03 Explain what happens in the process of making a lens impact resistant.
  - 16.04 Explain the drop ball test and when to use it according to FDA regulations.
  - 16.05 Explain the legal responsibility in relationship to impact resistant lenses.
  - 16.06 Explain different types of lens materials and their relationship to impact resistance.

17.0 Demonstrate knowledge of insets and prisms in lenses. – The student will be able to:

- 17.01 Explain what is meant by segment position for edging and give examples of computation for segment position in bifocal lenses.
- 17.02 Explain inset and relate it to the Rx, the patient, and the lenses.
- 17.03 Explain total decentration or total inset.
- 17.04 Explain the method of achieving prism in a multifocal.
- 17.05 Explain the procedures to layout flat bifocal lenses.
- 17.06 Demonstrate the ability to layout and edge flat top bifocal lenses.

18.0 Perform special procedures. – The student will be able to:

- 18.01 Layout SV, ST, Round, Exec, Progressive and other lenses
- 18.02 Block lenses
- 18.03 Calculate set sizes
- 18.04 Make patterns
- 18.05 Hand bevel lenses
- 18.06 Safety bevel lenses
- 18.07 Reshape lenses
- 18.08 Dye lenses
- 18.09 UV treat lenses
- 18.10 Heat treat lenses
- 18.11 Chemical treat lenses

2011 - 2012

**Florida Department of Education  
Curriculum Framework**

**Program Title:**       **Optical Management**  
**Career Cluster:**     **Health Science**

	<b>AS</b>	<b>AAS</b>
CIP Number	1317070502	0317070502
Program Type	College Credit	College Credit
Standard Length	60 credit hours	60 credit hours
CTSO	HOSA	HOSA
SOC Codes (all applicable)	11-9111, 31-9099	11-9111, 31-9099
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>	
Perkins Technical Skill Attainment Inventory	<a href="http://www.fldoe.org/workforce/perkins/perkins_resources.asp">http://www.fldoe.org/workforce/perkins/perkins_resources.asp</a>	

### **Purpose**

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

The program is designed to prepare students for employment as an Optical Manager, SOC Code 11-9111 (Medical and Health Services Managers) or to provide supplemental training for persons previously or currently employed in these occupations.

This program focuses on broad, transferable skills and stresses understanding and demonstration of the following elements of the health care industry; planning, management, finance, technical and production skills, underlying principles of technology, labor issues, community issues and health, safety, and environmental issues.

The content includes but is not limited to communication skills, leadership skills, human relations and employability skills, principles of management, personnel management, and general business procedures. The Health Science Core must be taken by all students (secondary, postsecondary adult and postsecondary vocational) planning to complete any Health Science program. Once successfully completed, the core does not need to be repeated at any instructional level.

## **Program Structure**

This program is a planned sequence of instruction consisting of 60 credit hours.

## **Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

## **Special Notes**

This program meets the Department of Health HIV/AIDS Domestic Violence and Prevention of Medical Errors education requirements. Upon completion of this program, the instructor will provide a certificate to the student verifying that these requirements have been met.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635 F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

Cooperative training - OJT is appropriate for this program. When cooperative training is offered, the following is required for each student: a training plan, signed by the student, instructor and employer which includes instructional objectives and a list of on-the-job and in-school learning experiences; a workstation which reflects equipment, skills and tasks which are relevant to the occupations which the student has chosen as a career goal. Students must receive compensation for work performed.

Outcomes 01-11 are referred to as the Health Careers Core and do not have to be completed if the student has previously completed the Core in another health science program. The CORE should be taken first or concurrently with the first course in the program. Following the successful completion of the core, the student is eligible to take the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

## **Career and Technical Student Organization (CTSO)**

Health Occupations Students of America (HOSA), Inc. is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

## **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education.

Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

### **Articulation**

This program has no statewide articulation agreement approved by the Articulation Coordinating Committee. However, this does not preclude the awarding of credits by any college through local agreements.

For details on statewide articulation agreements which correlate to programs and industry certifications, refer to [http://www.fldoe.org/workforce/dwdframe/artic\\_frame.asp](http://www.fldoe.org/workforce/dwdframe/artic_frame.asp).

### **Program Length**

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. The standard length of this program is 60 credit hours according to Rule 6A-14.030, F.A.C.

### **Standards**

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.
- 12.0 Apply supervision skills.
- 13.0 Communicate effectively in supervision.
- 14.0 Manage human behavior.
- 15.0 Motivate one's self.
- 16.0 Motivate others.
- 17.0 Apply strategies for effective management.
- 18.0 Utilize creative thinking to achieve business objectives.
- 19.0 Apply basic decision making skills in supervision.
- 20.0 Demonstrate appropriate communication skills
- 21.0 Demonstrate appropriate math skills.
- 22.0 Demonstrate an understanding of basic science as it relates to management.
- 23.0 Demonstrate an understanding of entrepreneurship.
- 24.0 Demonstrate knowledge of data processing activities.

- 25.0 Identify, classify and demonstrate management functions.
- 26.0 Apply basic quality control principles.
- 27.0 Demonstrate an understanding of technical or industrial competencies.

2011 - 2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Optical Management Technology  
**CIP Numbers:** 1317070502 AS, 0317070502 AAS  
**Program Length:** 60 credit hours  
**SOC Code(s):** 11-9111, 31-9099

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. At the completion of this program, the student will be able to:

**Health Careers Core: The Health Careers Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Careers Core or any other health occupations program do not have to repeat intended outcomes 01-11.**

01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:

- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
- 01.02 Identify common methods of payment for healthcare services.
- 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
- 01.04 Describe the composition and functions of a healthcare team.
- 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
- 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
- 01.07 Identify characteristics of effective teams.
- 01.08 Recognize methods for building positive team relationships.
- 01.09 Analyze attributes and attitudes of an effective leader.
- 01.10 Recognize factors and situations that may lead to conflict.
- 01.11 Demonstrate effective techniques for managing team conflict.
- 01.12 Describe factors that influence the current delivery system of healthcare.
- 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.

02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:

- 02.01 Develop basic speaking and active listening skills.
- 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
- 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
- 02.04 Respond to verbal and non-verbal cues.

- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.
- 02.06 Use appropriate medical terminology and abbreviations.
- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
- 02.08 Recognize the importance of patient/client educations regarding healthcare.
- 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
- 02.10 Analyze elements of communication using a sender-receiver model.
- 02.11 Distinguish between and report subjective and objective information.
- 02.12 Report relevant information in order of occurrence.

03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:

- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
- 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
- 03.03 Demonstrate procedures for accurate documentation and record keeping.
- 03.04 Interpret healthcare facility policy and procedures.
- 03.05 Explain the “Patient’s Bill of Rights”.
- 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
- 03.07 Describe advance directives.
- 03.08 Describe informed consent.
- 03.09 Explain the laws governing harassment, labor and employment.
- 03.10 Differentiate between legal and ethical issues in healthcare.
- 03.11 Describe a code of ethics consistent with the healthcare occupation.
- 03.12 Identify and compare personal, professional, and organizational ethics.
- 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
- 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
- 03.15 Recognize and report abuse including domestic violence and neglect.
- 03.16 Distinguish among the five schedules of controlled substances.

04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:

- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
- 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
- 04.03 Identify psychological reactions to illness including defense mechanisms.
- 04.04 Identify complementary and alternative health practices.
- 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
- 04.06 Explain the basic concepts of positive self image, wellness and stress.
- 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
- 04.08 Explain the nutrition pyramid.

- 04.09 Recognize the steps in the grief process.
- 05.0 Recognize and practice safety and security procedures. – The student will be able to:
  - 05.01 Recognize safe and unsafe working conditions and report safety hazards.
  - 05.02 Demonstrate the safe use of medical equipment.
  - 05.03 Explain and apply the theory of root- cause analysis
  - 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
  - 05.05 Identify and practice security procedures for medical supplies and equipment.
  - 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions.
  - 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
  - 05.08 Demonstrate proper body mechanics and ergonomics.
  - 05.09 Demonstrate the procedure for properly identifying patients.
  - 05.10 Demonstrate procedures for the safe transport and transfer of patients.
  - 05.11 Describe fire, safety, disaster and evacuations procedures.
  - 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )
- 06.0 Recognize and respond to emergency situations. – The student will be able to:
  - 06.01 Monitor and record vital signs.
  - 06.02 Describe legal parameters relating to the administration of emergency care.
  - 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
  - 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.
- 07.0 Recognize and practice infection control procedures. – The student will be able to:
  - 07.01 Define principles of infection control including standard and transmission based precautions.
  - 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
  - 07.03 Demonstrate knowledge of surgical asepsis.
  - 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.
- 08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:
  - 08.01 Describe technology applications in healthcare.
  - 08.02 Define terms and demonstrate basic computer skills.
  - 08.03 Recognize technology applications in healthcare.
  - 08.04 Interpret information from electronic medical documents.
  - 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.

09.0 Demonstrate employability skills. – The student will be able to:

- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.
- 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
- 09.03 Identify documents that may be required when applying for a job.
- 09.04 Write an appropriate resume.
- 09.05 Conduct a job search.
- 09.06 Complete a job application form correctly.
- 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
- 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
- 09.09 Identify acceptable work habits.
- 09.10 Recognize appropriate affective/professional behavior.
- 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).

10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:

- 10.01 Recognize emerging diseases and disorders
- 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
- 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
- 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
- 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
- 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.

11.0 Apply basic math and science skills. – The student will be able to:

- 11.01 Draw, read, and report on graphs, charts and tables.
- 11.02 Measure time, temperature, distance, capacity, and mass/weight.
- 11.03 Make, use and convert using both traditional and metric units.
- 11.04 Make estimations and approximations and judge the reasonableness of the result.
- 11.05 Convert from regular to 24 hour time.
- 11.06 Demonstrate ability to evaluate and draw conclusions.
- 11.07 Organize and communicate the results obtained by observation and experimentation.
- 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
- 11.09 Calculate ratios

## **Optical Management (12.0 - 27.0)**

- 12.0 Apply supervision skills. – The student will be able to:
- 12.01 Specify the responsibilities of the supervisor.
  - 12.02 Practice human relations skills.
  - 12.03 Follow leadership principles and approaches.
  - 12.04 Apply positive approaches to discipline.
  - 12.05 Conceptualize organizational functions of management.
  - 12.06 Develop organizational plans.
  - 12.07 Follow and teach accepted accident prevention practices.
  - 12.08 Apply elements of delegation.
  - 12.09 Coordinate employee and organization interest.
  - 12.10 Apply techniques of dealing with crisis.
  - 12.11 Utilize strategies for dealing with interpersonal conflicts.
  - 12.12 Analyze causes of resistance in employees.
  - 12.13 Implement the agreement finding process.
  - 12.14 Develop and implement job instructions.
  - 12.15 Apply delegation procedures.
  - 12.16 Apply principles of management to employee/ employer conflicts.
- 13.0 Communicate effectively in supervision. – The student will be able to:
- 13.01 Solve problems in communicating.
  - 13.02 Exhibit appropriate habits in person to person communication.
  - 13.03 Apply listening skills.
  - 13.04 Discuss the need for accurate pharmacy documentation and recordkeeping.
  - 13.05 Use communication feedback effectively.
  - 13.06 Use persuasion skills in communicating.
  - 13.07 Build credibility in management.
  - 13.08 React to non-verbal communication.
  - 13.09 Practice confrontation skills.
  - 13.10 Write an effective memorandum.
  - 13.11 Prepare a written technical report.
- 14.0 Manage human behavior. – The student will be able to:
- 14.01 Use behavior modification techniques.
  - 14.02 Practice transactional analysis skills.
  - 14.03 Establish goals and objectives.
  - 14.04 Identify and resolve emotional disturbances of workers.
  - 14.05 Use self concept building skills.
  - 14.06 Assess worker and supervisor roles and relationships.
  - 14.07 Manage worker resistance to change.
  - 14.08 Diagnose the dynamics involved in performance appraisal.
  - 14.09 Use appropriate assertiveness skills.
- 15.0 Motivate one's self. – The student will be able to:
- 15.01 Build improved attitude and self-confidence.
  - 15.02 Conceptualize cause and effect relationship.

- 15.03 Set personal goals.
  - 15.04 Apply self-esteem building skills.
  - 15.05 Diagnose life traps.
  - 15.06 Apply self-discipline techniques.
  - 15.07 Determine areas of personal talent.
- 16.0 Motivate others. – The student will be able to:
- 16.01 Discuss the self-fulfilling prophesy.
  - 16.02 Discuss the process of motivation.
  - 16.03 Apply the hierarchy of human needs to worker motivation.
  - 16.04 Apply the hierarchy of human needs to worker motivation.
  - 16.05 Effect job enrichment procedures.
  - 16.06 Apply attitude enrichment procedures.
  - 16.07 Discuss the concept of maintainers and motivators.
  - 16.08 Develop role of trust and credibility in worker motivation.
  - 16.09 Direct goal setting procedures with workers.
  - 16.10 Implement participative style of supervision.
- 17.0 Apply strategies for effective management. – The student will be able to:
- 17.01 Display knowledge or prescription pricing systems used in pharmacy.
  - 17.02 Maintain stock inventory.
  - 17.03 Prepare electronic purchase orders.
  - 17.04 Receive, store and distribute pharmaceutical supplies.
  - 17.05 Define industry standards in purchasing pharmaceutical supplies.
- 18.0 Utilize creative thinking to achieve business objectives. – The student will be able to:
- 18.01 Explain the difference between a cubic centimeter and a milliliter.
  - 18.02 Use common pharmaceutical weighing equipment.
  - 18.03 Use common pharmaceutical volume measurement equipment.
  - 18.04 Explain the technique of preparing a solution, a suspension, an elixir, and emulsion and an extract.
  - 18.05 Convert measurements within the apothecary, avoirdupois, and metric systems.
  - 18.06 Use the following arithmetic procedures: ratio and proportion; percentage.
- 19.0 Apply basic decision making skills in supervision. – The student will be able to:
- 19.01 Predict physical and chemical incompatibilities utilizing chemistry properties.
  - 19.02 Describe electrolyte balances.
  - 19.03 Relate the general classes, actions, routes, action and side effects of drugs.
  - 19.04 Identify a listing of usual adult doses of medications and respective contraindications.
- 20.0 Demonstrate appropriate communication skills. – The student will be able to:
- 20.01 Read and prepare medication orders correctly.
  - 20.02 Transport medications safely being aware of hazards: theft, legal implications of accidental loss, and other consequences.
  - 20.03 Identify special precautions pertaining to children.

- 20.04 Maintain controlled substance inventory.
  - 20.05 Demonstrate the proper technique of preparing pharmaceutical preparations.
  - 20.06 Demonstrate the ability to correctly fill and deliver medication cassettes.
  - 20.07 Collect data from medication administration record and drug use and evaluation form.
  - 20.08 Identify automated medication dispensing equipment and its proper use.
- 21.0 Demonstrate appropriate math skills. – The student will be able to:
- 21.01 Locate correct stock container.
  - 21.02 Weigh measure, count required individual doses of medication.
  - 21.03 Label with required information.
  - 21.04 Operate unit dose pre-packet equipment.
  - 21.05 Place individual dose in appropriate containers, repackage in predetermined quantities.
  - 21.06 Record prepackage medication data correctly.
  - 21.07 Define role of technician in quality assurance activities.
- 22.0 Demonstrate an understanding of basic science as it relates to management. – The student will be able to:
- 22.01 Compare medication order with label on vial and check expiration date of product.
  - 22.02 Calculate drug dosage for parenteral use.
  - 22.03 Identify common drug/drug incompatibilities.
  - 22.04 Reconstitute parenteral medications.
  - 22.05 Use aseptic techniques to withdraw medication from stock vial measure correct quantity as instructed, select and insert it into IV solution without error.
  - 22.06 Use aseptic technique to withdraw medication from an ampule.
  - 22.07 Prepare parenteral solutions.
  - 22.08 Prepare Total Parenteral Nutrition solutions.
  - 22.09 Prepare chemotherapeutic agents using proper safety techniques.
  - 22.10 Demonstrate appropriate technique in the use of specialized equipment such as: laminar flow hoods, filters, pumps, and automated compounders.
  - 22.11 Place label on IV solution container and keep records.
  - 22.12 Perform quality control check.
  - 22.13 Identify storage requirements of reconstituted IV solutions.
- 23.0 Demonstrate an understanding of entrepreneurship. – The student will be able to:
- 23.01 Identify basic concepts of the American economic system.
  - 23.02 Identify basic types and sources of consumer credit.
- 24.0 Demonstrate knowledge of data processing activities. – The student will be able to:
- 24.01 Demonstrate the ability to determine the proper priority of work.
  - 24.02 Prepare a day's schedule for the employer.
  - 24.03 Choose appropriate action in situations requiring application of business ethics.
  - 24.04 Choose appropriate action in situations requiring following a chain of command.
  - 24.05 Choose appropriate action in situations requiring effective time management.
  - 24.06 Demonstrate ability to manage a team.

- 25.0 Identify, classify, and demonstrate management functions. – The student will be able to:
- 25.01 Define management.
  - 25.02 Identify management positions & styles.
  - 25.03 Identify the major functions of management.
  - 25.04 Classify activities as part of the planning function of management.
  - 25.05 Classify activities as part of the organizing function of management.
  - 25.06 Classify activities as part of the staffing function of management.
  - 25.07 Classify activities as part of the directing function of management.
  - 25.08 Classify activities as part of the controlling function of management.
  - 25.09 Demonstrate the ability to perform planning, organizing, staffing, directing, and controlling functions of management.
  - 25.10 Distinguish among management functions.
  - 25.11 Select the most effective communication systems.
- 26.0 Apply basic quality control principles. – The student will be able to:
- 26.01 Describe basic quality control systems.
  - 26.02 Implement and practice quality control.
- 27.0 Demonstrate an understanding of technical or industrial competencies. – The student will be able to:
- 27.01 Discuss and/or perform basic procedures which fall under this management position.
  - 27.02 Possess basic competency understanding necessary to the role of management.

2011 - 2012

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Occupational Therapy Assistant  
**Career Cluster:** Health Science

	AS	AAS
CIP Number	1317080800	0317080800
Program Type	College Credit	College Credit
Standard Length	70 credit hours	70 credit hours
CTSO	HOSA	HOSA
SOC Codes (all applicable)	31-9099, 31-2011	31-9099, 31-2011
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>	
Perkins Technical Skill Attainment Inventory	<a href="http://www.fldoe.org/workforce/perkins/perkins_resources.asp">http://www.fldoe.org/workforce/perkins/perkins_resources.asp</a>	

### Purpose

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

The purpose of this program is to prepare students for employment as occupational therapy assistants (SOC Code 31-2011 (Occupational Therapist Assistants), or to provide supplemental training for persons previously or currently employed in this occupation.

The program prepares students to assist an occupational therapist in implementing the plan of therapy for a patient prescribed by a physician.

This program focuses on broad, transferable skills and stresses understanding and demonstration of the following elements of the health care industry; planning, management, finance, technical and production skills, underlying principles of technology, labor issues, community issues and health, safety, and environmental issues.

The content includes but is not limited to communication and interpersonal skills, health-illness-health concepts, specific life tasks and skills, occupational therapy principles and application, and employability skills, health and safety including CPR, anatomy and physiology, kinesiology, psychology, sociology, and gerontology. The Health Careers Core must be taken by all students (secondary, postsecondary adult and postsecondary vocational) planning to complete

any Health Occupations program. Once successfully completed, the core does not need to be repeated at any instructional level.

### **Program Structure**

This program is a planned sequence of instruction consisting of 70 credit hours.

### **Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

### **Special Notes**

This program meets the Department of Health HIV/AIDS Domestic Violence and Prevention of Medical Errors education requirements. Upon completion of this program, the instructor will provide a certificate to the student verifying that these requirements have been met.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635 F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

The program should meet the guidelines the Accreditation Council for Occupational Therapy Education (ACOTE), 1383 Picard Drive (P. O. Box 1725) Rockville, MD 20849-1725, 301/948-9626 and of the American Occupational Therapy Association so that program completers will be eligible to take the national certification examination administered by the American Occupational Therapy Association. Florida requires licensing of graduates by the Agency for Health Care Administration (AHCA) through the Florida Board of Medical Examiners for persons completing programs approved by the American Occupational Therapy Association. This program must be in accordance with the AHCA, Board of Medicine Occupational Therapy Council Chapter 468, part III, F.S. and Rule Chapters 59R-60, F.A.C.

Cooperative training - OJT is appropriate for this program. Whenever cooperative training is offered, the following are required for each student: a training plan, signed by the student, teacher, and the employer, which includes instructional objectives and a list of on-the-job and in-school learning experiences; a workstation which reflects equipment, skills and tasks which are relevant to the occupation which the student has chosen as a career goal. The student must receive compensation for work performed.

Outcomes 01-11 are referred to as the Health Careers Core and do not have to be completed if the student has previously completed the Core in another health science program. The CORE should be taken first or concurrently with the first course in the program. Following the successful completion of the core, the student is eligible to take the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

### **Career and Technical Student Organization (CTSO)**

Health Occupations Students of America, Inc. (HOSA) is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

### **Articulation**

This program has no statewide articulation agreement approved by the Articulation Coordinating Committee. However, this does not preclude the awarding of credits by any college through local agreements.

For details on statewide articulation agreements which correlate to programs and industry certifications, refer to [http://www.fldoe.org/workforce/dwdframe/artic\\_frame.asp](http://www.fldoe.org/workforce/dwdframe/artic_frame.asp).

### **Program Length**

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. The standard length of this program is 70 credit hours according to Rule 6A-14.030, F.A.C.

### **Standards**

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.

- 11.0 Apply basic math and science skills.
- 12.0 Demonstrate ability to communicate and use interpersonal skills effectively for the occupation.
- 13.0 Demonstrate an understanding of and apply health-illness-health concepts.
- 14.0 Analyze and apply learned skills in specific life tasks and activities.
- 15.0 Apply occupational therapy principles in patient/client relationship.
- 16.0 Demonstrate knowledge of ethics related to occupational therapy assistants.
- 17.0 Transport patients.
- 18.0 Discuss the etiology, progression, management, and prognosis of physical, emotional, and environmental stresses and trauma.
- 19.0 Discuss the effect of stress on optimal human functioning.

2011 - 2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Occupational Therapy Assistant  
**CIP Numbers:** 1317.080800 AS, 0317.080800 AAS  
**Program Length:** 70 credit hours  
**SOC Code(s):** 31-9099, 31-2011

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. At the completion of this program, the student will be able to:

**Health Careers Core: The Health Careers Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Careers Core or any other health occupations program do not have to repeat intended outcomes 01-11.**

01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:

- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
- 01.02 Identify common methods of payment for healthcare services.
- 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
- 01.04 Describe the composition and functions of a healthcare team.
- 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
- 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
- 01.07 Identify characteristics of effective teams.
- 01.08 Recognize methods for building positive team relationships.
- 01.09 Analyze attributes and attitudes of an effective leader.
- 01.10 Recognize factors and situations that may lead to conflict.
- 01.11 Demonstrate effective techniques for managing team conflict.
- 01.12 Describe factors that influence the current delivery system of healthcare.
- 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.

02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:

- 02.01 Develop basic speaking and active listening skills.
- 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
- 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
- 02.04 Respond to verbal and non-verbal cues.

- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.
- 02.06 Use appropriate medical terminology and abbreviations.
- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
- 02.08 Recognize the importance of patient/client educations regarding healthcare.
- 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
- 02.10 Analyze elements of communication using a sender-receiver model.
- 02.11 Distinguish between and report subjective and objective information.
- 02.12 Report relevant information in order of occurrence.

03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:

- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
- 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
- 03.03 Demonstrate procedures for accurate documentation and record keeping.
- 03.04 Interpret healthcare facility policy and procedures.
- 03.05 Explain the “Patient’s Bill of Rights”.
- 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
- 03.07 Describe advance directives.
- 03.08 Describe informed consent.
- 03.09 Explain the laws governing harassment, labor and employment.
- 03.10 Differentiate between legal and ethical issues in healthcare.
- 03.11 Describe a code of ethics consistent with the healthcare occupation.
- 03.12 Identify and compare personal, professional, and organizational ethics.
- 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
- 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
- 03.15 Recognize and report abuse including domestic violence and neglect.
- 03.16 Distinguish among the five schedules of controlled substances.

04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:

- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
- 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
- 04.03 Identify psychological reactions to illness including defense mechanisms.
- 04.04 Identify complementary and alternative health practices.
- 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
- 04.06 Explain the basic concepts of positive self image, wellness and stress.
- 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
- 04.08 Explain the nutrition pyramid.

- 04.09 Recognize the steps in the grief process.
- 05.0 Recognize and practice safety and security procedures. – The student will be able to:
  - 05.01 Recognize safe and unsafe working conditions and report safety hazards.
  - 05.02 Demonstrate the safe use of medical equipment.
  - 05.03 Explain and apply the theory of root- cause analysis
  - 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
  - 05.05 Identify and practice security procedures for medical supplies and equipment.
  - 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions.
  - 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
  - 05.08 Demonstrate proper body mechanics and ergonomics.
  - 05.09 Demonstrate the procedure for properly identifying patients.
  - 05.10 Demonstrate procedures for the safe transport and transfer of patients.
  - 05.11 Describe fire, safety, disaster and evacuations procedures.
  - 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )
- 06.0 Recognize and respond to emergency situations. – The student will be able to:
  - 06.01 Monitor and record vital signs.
  - 06.02 Describe legal parameters relating to the administration of emergency care.
  - 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
  - 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.
- 07.0 Recognize and practice infection control procedures. – The student will be able to:
  - 07.01 Define principles of infection control including standard and transmission based precautions.
  - 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
  - 07.03 Demonstrate knowledge of surgical asepsis.
  - 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.
- 08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:
  - 08.01 Describe technology applications in healthcare.
  - 08.02 Define terms and demonstrate basic computer skills.
  - 08.03 Recognize technology applications in healthcare.
  - 08.04 Interpret information from electronic medical documents.
  - 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.

09.0 Demonstrate employability skills. – The student will be able to:

- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.
- 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
- 09.03 Identify documents that may be required when applying for a job.
- 09.04 Write an appropriate resume.
- 09.05 Conduct a job search.
- 09.06 Complete a job application form correctly.
- 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
- 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
- 09.09 Identify acceptable work habits.
- 09.10 Recognize appropriate affective/professional behavior.
- 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).

10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:

- 10.01 Recognize emerging diseases and disorders
- 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
- 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
- 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
- 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
- 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.

11.0 Apply basic math and science skills. – The student will be able to:

- 11.01 Draw, read, and report on graphs, charts and tables.
- 11.02 Measure time, temperature, distance, capacity, and mass/weight.
- 11.03 Make, use and convert using both traditional and metric units.
- 11.04 Make estimations and approximations and judge the reasonableness of the result.
- 11.05 Convert from regular to 24 hour time.
- 11.06 Demonstrate ability to evaluate and draw conclusions.
- 11.07 Organize and communicate the results obtained by observation and experimentation.
- 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
- 11.09 Calculate ratios

**Occupational Therapy Assistant: The completion of intended outcomes 12-19 lead to the occupational completion point of occupational therapy assistant. The program should meet the guidelines of the American Occupational Therapy Association so that program completers will be eligible to take the national certification examination administered by the American Occupational Therapy Association. Florida requires licensing of graduates by the AHCA through the Florida Board of Medical Examiners for persons completing programs approved by the ACOTE. This program must be in accordance with the Department of Business and Professional Regulations Board of Medicine Occupational Therapy Council Chapter 468, part III, F.S. and Rule Chapters 61F6-12 to 61F6-15, F.A.C.**

- 12.0 Demonstrate ability to communicate and use interpersonal skills effectively for the occupation. – The student will be able to:
- 12.01 Demonstrate awareness of self and relationship with others.
  - 12.02 Conduct didactic and group discussions.
  - 12.03 Record/report observations.
  - 12.04 Instruct individuals and groups.
- 13.0 Demonstrate an understanding of and apply health-illness-health concepts. – The student will be able to:
- 13.01 Explain occupation as a health determinant.
  - 13.02 Describe the basic function of the human body with particular emphasis on the neurological, musculoskeletal and cardiopulmonary systems.
  - 13.03 Describe the basic development of personality and learning.
  - 13.04 Describe appropriate life tasks as related to the developmental process from birth to death.
  - 13.05 Identify and describe disabling conditions commonly referred to occupational therapy.
  - 13.06 Explain the role of occupational therapy as a profession.
  - 13.07 Explain the relationship of occupational therapy to other health care workers.
- 14.0 Analyze and apply learned skills in specific life tasks and activities. – The student will be able to:
- 14.01 Demonstrate skill in performing selected life tasks and activities.
  - 14.02 Demonstrate skill in instructing and adapting selected life tasks and activities.
  - 14.03 Analyze activities.
  - 14.04 Demonstrate proper care and maintenance of equipment and supplies used in occupational therapy.
- 15.0 Apply occupational therapy principles in patient/client relationship. – The student will be able to:
- 15.01 Contribute to initial screening of patients/clients.
  - 15.02 Contribute to evaluation of occupational performance, performance components, and life space.
  - 15.03 Plan occupational therapy programs to prevent deterioration of occupational performance.

- 15.04 Contribute to occupational therapy program planning for remediation of occupational performance deficits and performance component dysfunction.
  - 15.05 Implement occupational therapy program to prevent deterioration of occupational performance.
  - 15.06 Contribute to implementation of occupational therapy programs to restore and develop occupational performance.
  - 15.07 Contribute to the implementation of occupational therapy programs to restore, develop, or prevent the deterioration of performance components.
  - 15.08 Contribute to program administration and support.
  - 15.09 Function in the role of supervisee and assist with supervision of aides and volunteers.
- 16.0 Demonstrate knowledge of ethics related to occupational therapy assistants. – The student will be able to:
- 16.01 Describe the relationship of the occupational therapy assistant to:
    - 16.01.01 the physician
    - 16.01.02 the occupational therapist
    - 16.01.03 the employer
  - 16.02 Explain the term "risk management".
  - 16.03 Explain to patient what you are going to do before you begin.
  - 16.04 Explain the process of applying for a Florida license.
  - 16.05 Identify documents which may be required when applying for a license.
- 17.0 Transport patients. – The student will be able to:
- 17.01 Transfer patient from bed to wheelchair.
  - 17.02 Move wheelchair via corridors, elevators, cars, etc.
  - 17.03 Provide information to patient as needed.
  - 17.04 Implement appropriate Joint Commission patient safety goals.
- 18.0 Discuss the etiology, progression, management, and prognosis of physical, emotional, and environmental stresses and trauma. – The student will be able to:
- 18.01 Discuss the "self fulfilling prophecy" concept as related to outcome after severe trauma, alteration of body image and self concept.
  - 18.02 List the symptoms of stress in progressive order.
  - 18.03 Define psychosomatic illness.
  - 18.04 Define prognosis.
- 19.0 Discuss the effect of stress on optimal human functioning. – The student will be able to:
- 19.01 Define stress in terms of physical assessment.
  - 19.02 List three positive effects of stress.
  - 19.03 Discuss stress as a motivator in improving human performance.

2011 - 2012

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Physical Therapist Assistant  
**Career Cluster:** Health Science

	<b>AS</b>	<b>AAS</b>
CIP Number	1317081500	0317081500
Program Type	College Credit	College Credit
Standard Length	74 credit hours	74 credit hours
CTSO	APTA, HOSA	APTA, HOSA
SOC Codes (all applicable)	31-9099, 31-2021	31-9099, 31-2021
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>	
Perkins Technical Skill Attainment Inventory	<a href="http://www.fldoe.org/workforce/perkins/perkins_resources.asp">http://www.fldoe.org/workforce/perkins/perkins_resources.asp</a>	

### **Purpose**

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

The purpose of this program is to prepare students for employment as physical, corrective therapy assistants SOC Code 31-2021 (Physical Therapist Assistants) or to provide supplemental training for persons previously or currently employed in these occupations.

The content includes but is not limited to the requirements of the Commission on Accreditation in Physical Therapy Education/American Physical Therapy Association, 1111 North Fairfax Street, Alexandria, VA 22314, 703/684-2782. The graduate is prepared to make an application to the Florida Physical Therapist Assistant licensing examination which is given by the Florida Department of Health, Board of Physical Therapy Practice.

### **Program Structure**

This program is a planned sequence of instruction consisting of 74 credit hours.

## **Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

Laboratory work is structured so that students begin with basic patient care skills, progress to basic physical therapy skills and then to more advanced physical therapy application and techniques.

## **Special Notes**

This program meets the Department of Health HIV/AIDS Domestic Violence and Prevention of Medical Errors education requirements. Upon completion of this program, the instructor will provide a certificate to the student verifying that these requirements have been met.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635 F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

The Health Careers Core must be taken by all students (secondary, postsecondary adult and postsecondary vocational) planning to complete any Health Occupations program. Once successfully completed, the core does not need to be repeated at any instructional level.

This program focuses on broad, transferable skills and stresses understanding and demonstration of the following elements of the health care industry; planning, management, finance, technical and production skills, underlying principles of technology, labor issues, community issues and health, safety, and environmental issues.

The cooperative method of instruction is not appropriate for this program.

Outcomes 01-11 are referred to as the Health Careers Core and do not have to be completed if the student has previously completed the Core in another health science program. The CORE should be taken first or concurrently with the first course in the program. Following the successful completion of the core, the student is eligible to take the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

## **Career and Technical Student Organization (CTSO)**

The American Physical Therapy Association (APTA) and Health Occupations Students of America (HOSA), Inc., are the appropriate career and technical student organizations for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

## **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

### **Articulation**

This program has no statewide articulation agreement approved by the Articulation Coordinating Committee. However, this does not preclude the awarding of credits by any college through local agreements.

For details on statewide articulation agreements which correlate to programs and industry certifications, refer to [http://www.fldoe.org/workforce/dwdframe/artic\\_frame.asp](http://www.fldoe.org/workforce/dwdframe/artic_frame.asp).

### **Program Length**

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. The standard length of this program is 74 credit hours according to Rule 6A-14.030, F.A.C.

### **Standards**

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.
- 12.0 Describe anatomical structure, function and dysfunction of the human body related to the practice of physical therapy.
- 13.0 Assist the physical therapist with various treatments/procedures.
- 14.0 Demonstrate ethical and legal practice as a physical therapist assistant.
- 15.0 Respond to patient's needs as reflected in the Patient's Bill of Rights.
- 16.0 Demonstrate safe administration of all physical agents.
- 17.0 Demonstrate use of exercise, assistive/supportive devices and specialized equipment.

- 18.0 Perform routine maintenance of equipment.
- 19.0 Disinfect and sterilize materials and equipment.
- 20.0 Respond to acute changes in physiological state.
- 21.0 Teach other health care providers, patients and families to perform selected treatment procedures and functional activities.
- 22.0 Identify architectural barriers.
- 23.0 Interact with patients and families in a manner which provides desired psycho-social support.
- 24.0 Define scope of practice.
- 25.0 Describe basic concepts related to the health care system including multidisciplinary team approach, quality care, governmental agencies, private sector, role of other health care providers, health care facilities, issues and problems.
- 26.0 Identify basic principles of levels of authority and responsibility, planning, time management, supervisory process, performance evaluations and fiscal consideration (provider and consumer).

2011 - 2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Physical Therapist Assistant  
**CIP Numbers:** 1317081500 AS, 0317081500 AAS  
**Program Length:** 74 credit hours  
**SOC Code(s):** 31-9099, 31-2021

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. At the completion of this program, the student will be able to:

**Health Careers Core: The Health Careers Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Careers Core or any other health occupations program do not have to repeat intended outcomes 01-11.**

01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:

- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
- 01.02 Identify common methods of payment for healthcare services.
- 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
- 01.04 Describe the composition and functions of a healthcare team.
- 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
- 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
- 01.07 Identify characteristics of effective teams.
- 01.08 Recognize methods for building positive team relationships.
- 01.09 Analyze attributes and attitudes of an effective leader.
- 01.10 Recognize factors and situations that may lead to conflict.
- 01.11 Demonstrate effective techniques for managing team conflict.
- 01.12 Describe factors that influence the current delivery system of healthcare.
- 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.

02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:

- 02.01 Develop basic speaking and active listening skills.
- 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
- 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
- 02.04 Respond to verbal and non-verbal cues.

- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.
- 02.06 Use appropriate medical terminology and abbreviations.
- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
- 02.08 Recognize the importance of patient/client educations regarding healthcare.
- 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
- 02.10 Analyze elements of communication using a sender-receiver model.
- 02.11 Distinguish between and report subjective and objective information.
- 02.12 Report relevant information in order of occurrence.

03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:

- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
- 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
- 03.03 Demonstrate procedures for accurate documentation and record keeping.
- 03.04 Interpret healthcare facility policy and procedures.
- 03.05 Explain the “Patient’s Bill of Rights”.
- 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
- 03.07 Describe advance directives.
- 03.08 Describe informed consent.
- 03.09 Explain the laws governing harassment, labor and employment.
- 03.10 Differentiate between legal and ethical issues in healthcare.
- 03.11 Describe a code of ethics consistent with the healthcare occupation.
- 03.12 Identify and compare personal, professional, and organizational ethics.
- 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
- 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
- 03.15 Recognize and report abuse including domestic violence and neglect.
- 03.16 Distinguish among the five schedules of controlled substances.

04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:

- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
- 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
- 04.03 Identify psychological reactions to illness including defense mechanisms.
- 04.04 Identify complementary and alternative health practices.
- 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
- 04.06 Explain the basic concepts of positive self image, wellness and stress.
- 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
- 04.08 Explain the nutrition pyramid.

- 04.09 Recognize the steps in the grief process.
- 05.0 Recognize and practice safety and security procedures. – The student will be able to:
  - 05.01 Recognize safe and unsafe working conditions and report safety hazards.
  - 05.02 Demonstrate the safe use of medical equipment.
  - 05.03 Explain and apply the theory of root- cause analysis
  - 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
  - 05.05 Identify and practice security procedures for medical supplies and equipment.
  - 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions.
  - 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
  - 05.08 Demonstrate proper body mechanics and ergonomics.
  - 05.09 Demonstrate the procedure for properly identifying patients.
  - 05.10 Demonstrate procedures for the safe transport and transfer of patients.
  - 05.11 Describe fire, safety, disaster and evacuations procedures.
  - 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )
- 06.0 Recognize and respond to emergency situations. – The student will be able to:
  - 06.01 Monitor and record vital signs.
  - 06.02 Describe legal parameters relating to the administration of emergency care.
  - 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
  - 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.
- 07.0 Recognize and practice infection control procedures. – The student will be able to:
  - 07.01 Define principles of infection control including standard and transmission based precautions.
  - 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
  - 07.03 Demonstrate knowledge of surgical asepsis.
  - 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.
- 08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:
  - 08.01 Describe technology applications in healthcare.
  - 08.02 Define terms and demonstrate basic computer skills.
  - 08.03 Recognize technology applications in healthcare.
  - 08.04 Interpret information from electronic medical documents.
  - 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.

09.0 Demonstrate employability skills. – The student will be able to:

- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.
- 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
- 09.03 Identify documents that may be required when applying for a job.
- 09.04 Write an appropriate resume.
- 09.05 Conduct a job search.
- 09.06 Complete a job application form correctly.
- 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
- 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
- 09.09 Identify acceptable work habits.
- 09.10 Recognize appropriate affective/professional behavior.
- 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).

10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:

- 10.01 Recognize emerging diseases and disorders
- 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
- 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
- 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
- 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
- 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.

11.0 Apply basic math and science skills. – The student will be able to:

- 11.01 Draw, read, and report on graphs, charts and tables.
- 11.02 Measure time, temperature, distance, capacity, and mass/weight.
- 11.03 Make, use and convert using both traditional and metric units.
- 11.04 Make estimations and approximations and judge the reasonableness of the result.
- 11.05 Convert from regular to 24 hour time.
- 11.06 Demonstrate ability to evaluate and draw conclusions.
- 11.07 Organize and communicate the results obtained by observation and experimentation.
- 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
- 11.09 Calculate ratios

**Physical Therapist Assistant: Intended outcomes lead to the occupational completion point of Physical Therapist Assistant. The graduate is prepared to make an application to the Florida Physical Therapist Assistant licensing examination which is given by the Florida Department of Health, Board of Physical Therapy Practice.**

- 12.0 Describe anatomical structure, function and dysfunction of the human body related to the practice of physical therapy. – The student will be able to:
- 12.01 Describe normal and abnormal motor behavior.
  - 12.02 Describe orthopedic disabilities and related treatment.
  - 12.03 Describe neurological disabilities and related treatment.
  - 12.04 Describe medical/surgical conditions related to physical therapy care.
  - 12.05 Assist physical therapist in evaluation and assessment of disabilities and conditions.
- 13.0 Assist the physical therapist with various treatments/ procedures. – The student will be able to:
- 13.01 Implement a comprehensive treatment plan developed by a physical therapist.
  - 13.02 Perform appropriate measurement and assessment techniques within the knowledge and limits of practice to assist the supervising physical therapist in monitoring and modifying the plan of care.
  - 13.03 Prepare patients, treatment areas and equipment.
  - 13.04 Recognize gait deviations.
  - 13.05 Perform gait training and postural training techniques.
  - 13.06 Administer activities of daily living and functional training to patients/clients.
  - 13.07 Apply external bandages, dressings and support devices.
  - 13.08 Implement therapeutic exercise programs.
  - 13.09 Measure for and fit assistive devices.
  - 13.10 Perform therapeutic massage.
  - 13.11 Perform balance and coordination activities.
  - 13.12 Perform wound care techniques.
  - 13.13 Perform developmental activities
  - 13.14 Participate in discharge planning and follow up care.
- 14.0 Demonstrate ethical and legal practice as a physical therapist assistant. – The student will be able to:
- 14.01 Practice under the direction of a physical therapist.
  - 14.02 Cite indications and contradictions for each treatment/procedure.
  - 14.03 Record treatment/results in progress notes using correct format, content and terminology.
  - 14.04 Read and draw pertinent information from patient charts.
- 15.0 Respond to patient's needs as reflected in the patient's bill of rights. – The student will be able to:
- 15.01 Demonstrate awareness of the patient's need for dignity and independence.
  - 15.02 Recognize patient expressions of discomfort, spoken or unspoken (body language).

- 15.03 Deal effectively with patient's emotional responses.
- 16.0 Demonstrate safe administration of all physical agents. – The student will be able to:
  - 16.01 Read a variety of thermometers, Fahrenheit or centigrade (Celsius).
  - 16.02 State normal body temperature and measure an oral or axillary temperature.
  - 16.03 Measure the temperature of liquids, oils, solids.
  - 16.04 State the therapeutic temperature range for modalities in which temperature is a guideline for application.
  - 16.05 Identify physiological effects of heat vs. cold applications.
  - 16.06 Administer therapeutic ultrasound.
  - 16.07 Describe therapeutic use of ultra-violet light.
  - 16.08 Demonstrate therapeutic use of physical agents such as water, heat, cold and electricity.
- 17.0 Demonstrate use of exercise, assistive/supportive devices and specialized equipment. – The student will be able to:
  - 17.01 State the benefits of exercise.
  - 17.02 Define orthotics and state the importance of proper fit.
  - 17.03 Perform crutch walking, stair climbing, use of wheelchair.
  - 17.04 Describe differences in wheelchairs.
  - 17.05 Discuss upper and lower extremity prosthetics in terms of types of amputations and prosthetics.
  - 17.06 Identify common problems in prosthetic management and apply managerial skills in dealing effectively with them.
  - 17.07 Recognize and assist in exercise techniques used in physical therapy.
  - 17.08 Perform postural drainage and instruct patient in proper coughing and breathing exercises.
  - 17.09 Apply mechanical traction.
  - 17.10 Apply intermittent venous compression.
  - 17.11 Perform goniometric measurement.
  - 17.12 Assist patient in use of orthotic/prosthetic devices.
- 18.0 Perform routine maintenance of equipment. – The student will be able to:
  - 18.01 Recognize the importance of routine maintenance.
  - 18.02 Clean and check operation of wheelchairs, stretchers, treatment tables, etc.
- 19.0 Disinfect and sterilize materials and equipment. – The student will be able to:
  - 19.01 Define disinfect, sterilize, germicide, vaccinate, immunize, antiseptic, septic.
  - 19.02 Disinfect used equipment.
  - 19.03 Prepare materials for sterilization.
- 20.0 Respond to acute changes in physiological state. – The student will be able to:
  - 20.01 Determine baseline physiological state.
  - 20.02 Recognize change in baseline physiological state.
  - 20.03 Determine significance of change in physiological state.

- 20.04 Apply guidelines in the assessment of blood pressure, pulse, respiration, sweating, skin color, mental alertness, skin temp, pupil size and pupil reaction.
- 21.0 Teach other health care providers, patients and families to perform selected treatment procedures and functional activities. – The student will be able to:
- 21.01 Detail equipment or treatment preparation methods.
  - 21.02 Instruct in safety rules for equipment or treatment.
  - 21.03 Utilize proper teaching techniques relative to level of individual's understanding.
  - 21.04 Describe desired outcomes of the selected treatment procedure or functional activity.
  - 21.05 Use appropriate medical terminology.
- 22.0 Identify architectural barriers. – The student will be able to:
- 22.01 Identify which environmental factors are potential architectural barriers.
  - 22.02 Determine which aspects of the patient's functional level and ambulatory/mobility equipment are germane to architectural problems.
  - 22.03 Describe action required to remediate barriers.
- 23.0 Interact with patients and families in a manner which provides the desired psycho-social support. – The student will be able to:
- 23.01 Recognize own reaction to the patient's illness or disability.
  - 23.02 Recognize patient's and family's reactions to illness and disability.
  - 23.03 Respect individual, cultural, religious and socio-economic differences in people.
  - 23.04 Utilize appropriate communicative processes.
- 24.0 Define scope of practice. – The student will be able to:
- 24.01 Demonstrate awareness of his/her own role.
  - 24.02 Identify scope of responsibility as it relates to patient care, departmental function, physical therapist and physical therapist aide.
- 25.0 Describe basic concepts related to the health care system including multi-disciplinary team approach, quality care, governmental agencies, private sector, role of other health care providers, health care facilities, issues and problems. – The student will be able to:
- 25.01 Describe disciplines within medical care arena and the roles served.
  - 25.02 Describe the categories of health care agencies.
  - 25.03 Recognize current issues and problems affecting the delivery of health care.
  - 25.04 Implement appropriate Joint Commission patient safety goals.
- 26.0 Identify basic principles of levels of authority and responsibility, planning, time management, supervisory process, performance evaluations and fiscal consideration (provider and consumer). – The student will be able to:
- 26.01 Organize time effectively.
  - 26.02 Communicate information to correct individual understanding the proper chain of command.
  - 26.03 Prepare daily work schedule for effective, efficient delivery of care.

26.04 Utilize resources efficiently and conservatively in the delivery of health care.

2011 - 2012

**Florida Department of Education  
Curriculum Framework**

**Program Title:**        **Respiratory Care**  
**Career Cluster:**     **Health Science**

	<b>AS</b>	<b>AAS</b>
CIP Number	1317081800	0317081800
Program Type	College Credit	College Credit
Standard Length	76 credit hours	76 credit hours
CTSO	HOSA	HOSA
SOC Codes (all applicable)	31-9099, 29-1126	31-9099, 29-1126
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>	
Perkins Technical Skill Attainment Inventory	<a href="http://www.fldoe.org/workforce/perkins/perkins_resources.asp">http://www.fldoe.org/workforce/perkins/perkins_resources.asp</a>	

### **Purpose**

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

This program trains students for the occupation of Respiratory Therapist (SOC Code 29-1126) or to provide supplemental training for persons previously or currently employed in these occupations. The respiratory therapist specializes in the application of scientific knowledge and theory to practical, clinical problems of respiratory care.

The content includes but is not limited to quality control of all units, intermittent positive pressure breathing (IPPB); humidity/aerosol therapy; medical gas administration; broncho-pulmonary drainage; mechanical ventilation; airway management; emergency care; pulmonary function testing; cardiorespiratory rehabilitation; measurement and reporting of cardiopulmonary sampling, infection control; cardiorespiratory drug administration, physiologic monitoring, and special advanced procedures.

### **Program Structure**

This program is a planned sequence of instruction consisting of 76 credit hours.

## **Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

## **Special Notes**

This program meets the Department of Health HIV/AIDS Domestic Violence and Prevention of Medical Errors education requirements. Upon completion of this program, the instructor will provide a certificate to the student verifying that these requirements have been met.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635 F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

The respiratory therapist may be required to exercise considerable independent, clinical judgment in the respiratory care of patients under the direct or indirect supervision of a physician. Further, the therapist is capable of serving as a technical resource person to the physician with regard to current practices in respiratory care, and to the hospital staff as to effective and safe methods for administering respiratory therapy.

Outcomes 01-11 are referred to as the Health Careers Core and do not have to be completed if the student has previously completed the Core in another health science program. The CORE should be taken first or concurrently with the first course in the program. Following the successful completion of the core, the student is eligible to take the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

## **Career and Technical Student Organization (CTSO)**

Health Occupations Students of America, Inc. (HOSA) is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

## **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

## **Articulation**

This program has no statewide articulation agreement approved by the Articulation Coordinating Committee. However, this does not preclude the awarding of credits by any college through local agreements.

For details on statewide articulation agreements which correlate to programs and industry certifications, refer to [http://www.fldoe.org/workforce/dwdframe/artic\\_frame.asp](http://www.fldoe.org/workforce/dwdframe/artic_frame.asp).

## **Program Length**

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. The standard length of this program is 76 credit hours according to Rule 6A-14.030, F.A.C.

## **Standards**

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.
- 12.0 Select, review, obtain, and interpret patient data.
- 13.0 Select, assemble, and check equipment for proper function, operation, and cleanliness.
- 14.0 Initiate, conduct and modify prescribed therapeutic procedures.
- 15.0 Maintain records and communications.
- 16.0 Demonstrate knowledge of employment requirements as a Respiratory Care Professional.
- 17.0 Adapt appropriate respiratory care procedures to the home care environment.
- 18.0 Perform advanced respiratory care procedures.
- 19.0 Administer cardiorespiratory drugs.
- 20.0 Assist the physician with special respiratory therapy procedures.
- 21.0 Demonstrate leadership and supervisory skills.

2011 - 2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Respiratory Care  
**CIP Numbers:** 1317081800 AS, 0317081800 AAS  
**Program Length:** 76 credit hours  
**SOC Code(s):** 31-9099, 29-1126

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. At the completion of this program, the student will be able to:

**Health Careers Core: The Health Careers Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Careers Core or any other health occupations program do not have to repeat intended outcomes 01-11.**

01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:

- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
- 01.02 Identify common methods of payment for healthcare services.
- 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
- 01.04 Describe the composition and functions of a healthcare team.
- 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
- 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
- 01.07 Identify characteristics of effective teams.
- 01.08 Recognize methods for building positive team relationships.
- 01.09 Analyze attributes and attitudes of an effective leader.
- 01.10 Recognize factors and situations that may lead to conflict.
- 01.11 Demonstrate effective techniques for managing team conflict.
- 01.12 Describe factors that influence the current delivery system of healthcare.
- 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.

02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:

- 02.01 Develop basic speaking and active listening skills.
- 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
- 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
- 02.04 Respond to verbal and non-verbal cues.

- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.
- 02.06 Use appropriate medical terminology and abbreviations.
- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
- 02.08 Recognize the importance of patient/client educations regarding healthcare.
- 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
- 02.10 Analyze elements of communication using a sender-receiver model.
- 02.11 Distinguish between and report subjective and objective information.
- 02.12 Report relevant information in order of occurrence.

03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:

- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
- 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
- 03.03 Demonstrate procedures for accurate documentation and record keeping.
- 03.04 Interpret healthcare facility policy and procedures.
- 03.05 Explain the “Patient’s Bill of Rights”.
- 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
- 03.07 Describe advance directives.
- 03.08 Describe informed consent.
- 03.09 Explain the laws governing harassment, labor and employment.
- 03.10 Differentiate between legal and ethical issues in healthcare.
- 03.11 Describe a code of ethics consistent with the healthcare occupation.
- 03.12 Identify and compare personal, professional, and organizational ethics.
- 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
- 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
- 03.15 Recognize and report abuse including domestic violence and neglect.
- 03.16 Distinguish among the five schedules of controlled substances.

04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:

- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
- 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
- 04.03 Identify psychological reactions to illness including defense mechanisms.
- 04.04 Identify complementary and alternative health practices.
- 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
- 04.06 Explain the basic concepts of positive self image, wellness and stress.
- 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
- 04.08 Explain the nutrition pyramid.

- 04.09 Recognize the steps in the grief process.
- 05.0 Recognize and practice safety and security procedures. – The student will be able to:
  - 05.01 Recognize safe and unsafe working conditions and report safety hazards.
  - 05.02 Demonstrate the safe use of medical equipment.
  - 05.03 Explain and apply the theory of root- cause analysis
  - 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
  - 05.05 Identify and practice security procedures for medical supplies and equipment.
  - 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions.
  - 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
  - 05.08 Demonstrate proper body mechanics and ergonomics.
  - 05.09 Demonstrate the procedure for properly identifying patients.
  - 05.10 Demonstrate procedures for the safe transport and transfer of patients.
  - 05.11 Describe fire, safety, disaster and evacuations procedures.
  - 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )
- 06.0 Recognize and respond to emergency situations. – The student will be able to:
  - 06.01 Monitor and record vital signs.
  - 06.02 Describe legal parameters relating to the administration of emergency care.
  - 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
  - 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.
- 07.0 Recognize and practice infection control procedures. – The student will be able to:
  - 07.01 Define principles of infection control including standard and transmission based precautions.
  - 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
  - 07.03 Demonstrate knowledge of surgical asepsis.
  - 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.
- 08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:
  - 08.01 Describe technology applications in healthcare.
  - 08.02 Define terms and demonstrate basic computer skills.
  - 08.03 Recognize technology applications in healthcare.
  - 08.04 Interpret information from electronic medical documents.
  - 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.

09.0 Demonstrate employability skills. – The student will be able to:

- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.
- 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
- 09.03 Identify documents that may be required when applying for a job.
- 09.04 Write an appropriate resume.
- 09.05 Conduct a job search.
- 09.06 Complete a job application form correctly.
- 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
- 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
- 09.09 Identify acceptable work habits.
- 09.10 Recognize appropriate affective/professional behavior.
- 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).

10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:

- 10.01 Recognize emerging diseases and disorders
- 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
- 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
- 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
- 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
- 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.

11.0 Apply basic math and science skills. – The student will be able to:

- 11.01 Draw, read, and report on graphs, charts and tables.
- 11.02 Measure time, temperature, distance, capacity, and mass/weight.
- 11.03 Make, use and convert using both traditional and metric units.
- 11.04 Make estimations and approximations and judge the reasonableness of the result.
- 11.05 Convert from regular to 24 hour time.
- 11.06 Demonstrate ability to evaluate and draw conclusions.
- 11.07 Organize and communicate the results obtained by observation and experimentation.
- 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
- 11.09 Calculate ratios.

**Respiratory Care: (12-21) Completers are eligible to take the NBRC examination and become licensed with Agency for Health Care Administration (AHCA).**

- 12.0 Select, review, obtain and interpret data. – The student will be able to:
- 12.01 Review existing data in patient record, and recommend diagnostic procedures based on all available patient information.
    - 12.01.01 Review existing data in patient record.
    - 12.01.02 Recommend procedures to obtain additional data.
  - 12.02 Collect and evaluate additional pertinent clinical information.
    - 12.02.01 Assess patient's overall cardiorespiratory status by inspection.
    - 12.02.02 Assess patient's overall cardiopulmonary status by palpation.
    - 12.02.03 Assess the patient's overall cardiopulmonary status by auscultation.
    - 12.02.04 Interview patient.
    - 12.02.05 Inspect chest x-ray to determine position of endotracheal or tracheostomy tube.
  - 12.03 Perform procedures and interpret results.
    - 12.03.01 Perform and/or interpret results of bedside procedures.
    - 12.03.02 Perform and interpret results.
    - 12.03.03 Interpret co-oximetry results.
  - 12.04 Determine the appropriateness of the prescribed respiratory care plan, recommend modifications where indicated, and participate in the development of the respiratory care plan.
    - 12.04.01 Review planned therapy to establish therapeutic goals.
    - 12.04.02 Determine appropriateness of prescribed therapy and goals for identified pathophysiological state.
    - 12.04.03 Recommend changes in therapeutic plan (based on data) if indicated.
    - 12.04.04 Participate in development of respiratory care plan.
- 13.0 Select, assemble, and check equipment for proper function, operation and cleanliness. – The student will be able to:
- 13.01 Select and obtain equipment, and assure cleanliness of equipment appropriate to the respiratory care plan which includes the following:
    - a. Oxygen administration devices.
    - b. Humidifiers.
    - c. Aerosol generators.
    - d. Ventilators.
    - e. Artificial airways.
    - f. Suctioning devices.
    - g. Gas delivery, metering, and clinical analyzing devices.
    - h. Manometers and gauges.
    - i. Resuscitation devices.
    - j. Incentive breathing devices.
    - k. Patient breathing circuits.
    - l. Percussors and vibrators.
    - m. Environmental devices - aerosol (mist) tents.
    - n. Metered dose inhalers (MDI) and spacers.
    - o. Assure selected equipment cleanliness.

- 13.02 Assemble, check for proper function, identify malfunctions of equipment, and take action to correct malfunctions of equipment which includes the following:
  - a. Oxygen administration devices.
  - b. Humidifiers.
  - c. Aerosol generators.
  - d. Resuscitation devices.
  - e. Ventilators.
  - f. Artificial airways.
  - g. Gas delivery, metering and clinical analyzing devices.
  - h. Suctioning devices.
  - i. Patient breathing circuits.
  - j. Incentive breathing devices.
  - k. Environmental devices - aerosol (mist) tents.
  - l. Percussors and vibrators.
  - m. Metered dose inhalers (MDI) and spacers.
  - n. Manometers and gauges.

14.0 Initiate, conduct, and modify prescribed therapeutic procedures. – The student will be able to:

- 14.01 Explain planned therapy and goals to patients; maintain records and communication; and protect patient from nosocomial infection.
  - 14.01.01 Explain planned therapy and goals to patient in understandable terms to achieve optimal therapeutic outcome.
  - 14.01.02 Maintain records and communication.
  - 14.01.03 Protect patient from nosocomial infection by adherence to infection control policies and procedures (universal precautions, blood and body fluid precautions, etc.).
- 14.02 Conduct therapeutic procedures to achieve maintenance of patent airway, including the care of artificial airways; and to achieve removal of bronchopulmonary secretions.
  - 14.02.01 Achieve maintenance of patient airway.
  - 14.02.02 Achieve removal of bronchopulmonary secretions.
- 14.03 Conduct therapeutic procedures to achieve adequate spontaneous and artificial ventilation.
  - 14.03.01 Instruct in proper breathing techniques.
  - 14.03.02 Encourage deep breathing.
  - 14.03.03 Instruct and monitor techniques of incentive spirometry.
  - 14.03.04 Administer prescribed bronchodilators.
  - 14.03.05 Initiate and adjust IPPB therapy.
  - 14.03.06 Select appropriate ventilator.
  - 14.03.07 Select appropriate tidal volume, rate, and/or minute ventilation for mechanical ventilation.
  - 14.03.08 Institute and modify weaning procedures.
  - 14.03.09 Initiate and adjust continuous mechanical ventilation when settings are specified.
  - 14.03.10 Initiate and adjust IMV, SIMV, pressure support ventilation (PSV).
- 14.04 Conduct therapeutic procedures to achieve adequate arterial and tissue oxygenation.
  - 14.04.01 Position patient to minimize hypoxia.
  - 14.04.02 Administer oxygen (on or off ventilator).

- 14.04.03 Prevent procedure-associated hypoxia (e.g. oxygenated before and after suctioning and equipment change, etc.).
- 14.04.04 Initiate and adjust CPAP.
- 14.04.05 Initiate and adjust PEEP therapy.
- 14.05 Evaluate and monitor patient's response to respiratory care.
  - 14.05.01 Measure and record vital signs.
  - 14.05.02 Monitor cardiac rhythm.
  - 14.05.03 Perform pulse oximetry.
  - 14.05.04 Auscultate chest and record changes.
  - 14.05.05 Observe changes in sputum production and consistency.
  - 14.05.06 Note patient's subjective response to therapy.
  - 14.05.07 Measure F1O2 and or liter flow.
  - 14.05.08 Perform spirometry/determine vital capacity.
  - 14.05.09 Perform arterial puncture.
  - 14.05.10 Interpret results of arterial blood gas analysis.
  - 14.05.11 Adjust and check alarm systems.
  - 14.05.12 Note patient's response to mechanical ventilation.
  - 14.05.13 Measure tidal volume, respiratory rate, airway pressures, I:E ratio, and maximum inspiratory pressure.
  - 14.05.14 Monitor endotracheal or tracheostomy tube cuff pressure.
- 14.06 Make necessary modifications in therapeutic procedures and recommend respiratory care plan modifications based on patient response.
  - 14.06.01 Terminate treatment based on patient's adverse reaction to therapy being administered.
  - 14.06.02 Modify bronchial hygiene.
  - 14.06.03 Modify management of artificial airways.
  - 14.06.04 Modify incentive breathing devices.
  - 14.06.05 Modify aerosol therapy.
  - 14.06.06 Modify oxygen therapy.
  - 14.06.07 Modify suctioning.
  - 14.06.08 Modify mechanical ventilation.
  - 14.06.09 Recommend modifications in the respiratory care plan based on the patient's response.
- 14.07 Initiate, conduct, or modify respiratory care techniques in an emergency setting.
  - 14.07.01 Recognize the need for emergency resuscitation.
  - 14.07.02 Call for help.
  - 14.07.03 Establish a patent airway.
  - 14.07.04 Use mouth-to-mouth, bag-mask ventilation, and/or mouth-to-valve mask ventilation.
  - 14.07.05 Perform external cardiac compression.
  - 14.07.06 Check pulse.
  - 14.07.07 Provide supplemental oxygen.
  - 14.07.08 Observe chest excursion.
  - 14.07.09 Recommend obtaining arterial blood gas sample.
- 15.0 Maintain records and communications. – The student will be able to:
  - 15.01 Use computer system to access and input patient data, when appropriate.
  - 15.02 Chart on medical record; record therapy and results using conventional terminology as required by hospital policy and regulatory agencies.

- 15.03 Be familiar with and use departmental policy and procedure manual; actively participate in recommending updates.
  - 15.04 Consistently display a professional and positive attitude in all communications.
  - 15.05 Display respect for patients regardless of race, religion, color, creed, sex, age, or diagnosis.
  - 15.06 Maintain confidentiality of all patient records and information.
- 16.0 Demonstrate knowledge of employment requirements as a respiratory care professional.  
– The student will be able to:
- 16.01 Identify state licensure and continuing education requirements.
  - 16.02 Discuss the Respiratory Care Act.
  - 16.03 List the minimum competency requirements to practice in the state.
  - 16.04 Implement appropriate Joint Commission patient safety goals.
- 17.0 Adapt appropriate respiratory care procedures to the home care environment. – The student will be able to:
- 17.01 Provide for O<sub>2</sub> administration, aerosol and bronchial hygiene therapy and lung expansion therapy in the home.
  - 17.02 Arrange for life support and monitoring (i.e. mechanical ventilation, apnea monitoring, nasal CPAP) in the home.
  - 17.03 Instruct patient, family and other health care workers on the appropriate use, operation, cleaning and maintenance of respiratory care equipment.
  - 17.04 Perform patient monitoring and assessment in the home.
  - 17.05 Recognize and report symptoms of abuse and neglect.
- 18.0 Perform advanced respiratory care procedures. – The student will be able to:
- 18.01 Assume primary clinical responsibility for all respiratory care modalities.
  - 18.02 Check physicians orders or consult with physician.
  - 18.03 Design and implement respiratory care plan as appropriate.
  - 18.04 Perform pulmonary artery sampling.
  - 18.05 Perform cardiac output procedures.
  - 18.06 Perform arterial line set up and monitoring.
  - 18.07 Perform transcutaneous gas monitoring.
  - 18.08 Perform non invasive monitoring techniques as appropriate.
  - 18.09 Perform pulseoximetry monitoring.
  - 18.10 Perform various advanced procedures, based on local practice.
  - 18.11 Remove, clean and replace inner canula tube and/or replace tracheostomy tube, as ordered.
  - 18.12 Perform various mathematical computations dealing with cardiopulmonary assessment.
  - 18.13 Intubate infant.
  - 18.14 Initiate infant mechanical ventilation with appropriate ventilator and parameter including CPAP and PEEP.
  - 18.15 Extubate infant, within recommended criteria.
  - 18.16 Monitor return to normal physiology; reventilate if necessary.
  - 18.17 Add positive end expiratory pressure (PEEP) to ventilator circuit.
  - 18.18 Perform extubation of adult patient.
  - 18.19 Monitor return to normal physiology, reintubate if necessary.

- 19.0 Administer cardiorespiratory drugs. – The student will be able to:
- 19.01 Demonstrate knowledge of drug classifications, actions and uses, route of administration and usual adult doses, mathematics needed to calculate divided or children's dosage, contraindications, drug interactions, adverse reactions, how supplied, mixing instructions, storage, laboratory test interferences.
  - 19.02 Recognize the critical importance of this activity and follow directions.
  - 19.03 Verify physicians orders.
  - 19.04 Prepare medication for administration.
  - 19.05 Identify patient, introduce self.
  - 19.06 Administer drug.
  - 19.07 Document administering of drug in all appropriate records.
  - 19.08 Recognize the symptoms of drug idiosyncracies.
  - 19.09 Identify adverse drug reactions and take appropriate action.
  - 19.10 Recognize anaphylactic shock.
- 20.0 Assist the physician with special respiratory therapy procedures. – The student will be able to:
- 20.01 Assist with insertion and maintenance of an umbilical arterial and/or venous catheter.
  - 20.02 Assist with bronchoscopy, chest tubes, cardiac catheterizations.
  - 20.03 Assist with Swan-Ganz catheterization and other invasive monitoring.
  - 20.04 Assist with thoracentesis and tracheostomy.
- 21.0 Demonstrate leadership and supervisory skills. – The student will be able to:
- 21.01 Perform evaluations of subordinate personnel, maintaining objectivity.
  - 21.02 Make assignments to appropriate personnel within the department.
  - 21.03 Observe employee behavior and counsel re attitudes, demeanor, appearance, protocol, interaction.
  - 21.04 Encourage/provide continuing education activities.
  - 21.05 Observe subordinate performing procedures, correct discrepancies.
  - 21.06 Instruct subordinates in new procedures/new equipment.
  - 21.07 Demonstrate knowledge of productivity and control of resources, using budgeting, inventory control, and ordering of supplies.
  - 21.08 Recognize state-required licensure and documentation (i.e., experiential and public display).

2011 - 2012

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Health Services Management  
**Career Cluster:** Health Science

	<b>AS</b>	<b>AAS</b>
CIP Number	1318070100	0318070100
Program Type	College Credit	College Credit
Standard Length	62 credit hours	62 credit hours
CTSO	HOSA	HOSA
SOC Codes (all applicable)	31-9099, 11-9111	31-9099, 11-9111
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>	
Perkins Technical Skill Attainment Inventory	<a href="http://www.fldoe.org/workforce/perkins/perkins_resources.asp">http://www.fldoe.org/workforce/perkins/perkins_resources.asp</a>	

### **Purpose**

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

The purpose of this program is to prepare students for employment as health services managers. SOC Code 11-9111 (Medical and Health Services Managers) or health service administrators or to provide supplemental training for persons previously or currently employed in these occupations. The Health Careers Core must be taken by all students (secondary, postsecondary adult and postsecondary vocational) planning to complete any Health Occupations program. Once successfully completed, the core does not need to be repeated at any instructional level.

The content includes but is not limited to communication skills, leadership skills, human relations and employability skills, principles of management, introduction to computer literacy, health care organization, medical ethics, legal aspects, and advanced technical skills in a chosen health-related profession, health and safety, and CPR.

### **Program Structure**

This program is a planned sequence of instruction consisting of 62 credit hours.

## **Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

## **Special Notes**

This program meets the Department of Health HIV/AIDS Domestic Violence and Prevention of Medical Errors education requirements. Upon completion of this program, the instructor will provide a certificate to the student verifying that these requirements have been met.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635 F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

Two options are offered:

OPTION I is a generic program to prepare health service managers.

OPTION II is a program designed for students who already have occupational background and/or credentials in the health field to become managers within their specified discipline.

The curriculum content must include: courses in management, accounting and bookkeeping, personnel relations and management, governmental standards and regulation of health care administration in diverse health care settings (including nursing administration and patient care).

The theory base is built upon supportive courses available to students in the community college setting. Such courses shall include, but not be limited to, business communication, social science, business, mathematics, and computer application.

OPTION I: Programs must be approved by the Florida Board of Examiners of Nursing Home Administrators for graduates to be eligible to take the state licensure examination to become a nursing home administrator.

Graduates may be eligible to apply to take the National Administrators Board examination and the State Board licensing examination for licensure as a nursing home administrator in the State of Florida if they hold an advanced 4-year degree or meet the requirements of a Baccalaureate degree at an institution of higher learning.

OPTION II: The program parameters contain a minimum of 15 credit hours of general education, a minimum of 15 credit hours of management or health-related managerial courses, and courses in health related areas.

Outcomes 01-11 are referred to as the Health Careers Core and do not have to be completed if the student has previously completed the Core in another health science program. The CORE should be taken first or concurrently with the first course in the program. Following the successful completion of the core, the student is eligible to take the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

## **Career and Technical Student Organization (CTSO)**

Health Occupations Students of America, Inc. (HOSA) is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

## **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

## **Articulation**

To be transferable statewide between institutions, this program must have been reviewed, and a "transfer value" assigned the curriculum content by the appropriate Statewide Course Numbering System discipline committee. This does not preclude institutions from developing specific articulation agreements with each other.

The following ATD programs articulate credit into this degree program. These statewide articulation agreements have been approved by the Articulation Coordinating Committee.

Health Care Services (0318.070102/0318.070103) – 32 credit hours

For details on existing articulation agreements, refer to [http://www.fldoe.org/workforce/dwdframe/artic\\_frame.asp](http://www.fldoe.org/workforce/dwdframe/artic_frame.asp).

## **Program Length**

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. The standard length of this program is 62 credit hours according to Rule 6A-14.030, F.A.C.

## **Certificate Programs**

A College Credit Certificate consists of a program of instruction of less than sixty (60) credits of college-level courses, which is part of an AS or AAS degree program and prepares students for

entry into employment (Rule 6A-14.030, F.A.C.). This AS/AAS degree program includes the following College Credit Certificates:

Health Care Services (0318.070101) – 32 credit hours

The following ATD programs articulate credit into this degree program. These statewide articulation agreements have been approved by the Articulation Coordinating Committee.

Health Care Services (0318.070102) – 32 credit hours

Standards for the above certificate programs are contained in separate curriculum frameworks.

## **Standards**

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.
- 12.0 Demonstrate leadership and administrative skills basic to management in any health care facility.
- 13.0 Interpret federal, state and local laws as they apply to health care facilities.
- 14.0 Demonstrate knowledge of operational and organizational structures of health care facilities.
- 15.0 Demonstrate knowledge of psychological problems among residents and find acceptable solutions.
- 16.0 Demonstrate knowledge of materials and supplies needed to care for residents and how to obtain them for staff.
- 17.0 Demonstrate knowledge of occupational safety and health for residents/patients and employees.
- 18.0 Demonstrate knowledge of appropriate work-loads for each employee and knowledge of the amount of care each resident requires.
- 19.0 Review, approve and monitor departmental capital and operational budgets.
- 20.0 Identify and apply legal reimbursement systems.
- 21.0 Comply with accreditation standards of governmental or governmental appointed agencies/organization.
- 22.0 Demonstrate an understanding of technical competencies from one or more specialized health care areas.

2011 - 2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Health Services Management  
**CIP Numbers:** 1318070100 AS, 0318070100AAS  
**Program Length:** 62 credit hours  
**SOC Code(s):** 31-9099, 11-9111

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. At the completion of this program, the student will be able to:

**Health Careers Core: The Health Careers Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Careers Core or any other health occupations program do not have to repeat intended outcomes 01-11.**

01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:

- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
- 01.02 Identify common methods of payment for healthcare services.
- 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
- 01.04 Describe the composition and functions of a healthcare team.
- 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
- 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
- 01.07 Identify characteristics of effective teams.
- 01.08 Recognize methods for building positive team relationships.
- 01.09 Analyze attributes and attitudes of an effective leader.
- 01.10 Recognize factors and situations that may lead to conflict.
- 01.11 Demonstrate effective techniques for managing team conflict.
- 01.12 Describe factors that influence the current delivery system of healthcare.
- 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.

02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:

- 02.01 Develop basic speaking and active listening skills.
- 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
- 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
- 02.04 Respond to verbal and non-verbal cues.

- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.
- 02.06 Use appropriate medical terminology and abbreviations.
- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
- 02.08 Recognize the importance of patient/client educations regarding healthcare.
- 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
- 02.10 Analyze elements of communication using a sender-receiver model.
- 02.11 Distinguish between and report subjective and objective information.
- 02.12 Report relevant information in order of occurrence.

03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:

- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
- 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
- 03.03 Demonstrate procedures for accurate documentation and record keeping.
- 03.04 Interpret healthcare facility policy and procedures.
- 03.05 Explain the “Patient’s Bill of Rights”.
- 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
- 03.07 Describe advance directives.
- 03.08 Describe informed consent.
- 03.09 Explain the laws governing harassment, labor and employment.
- 03.10 Differentiate between legal and ethical issues in healthcare.
- 03.11 Describe a code of ethics consistent with the healthcare occupation.
- 03.12 Identify and compare personal, professional, and organizational ethics.
- 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
- 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
- 03.15 Recognize and report abuse including domestic violence and neglect.
- 03.16 Distinguish among the five schedules of controlled substances.

04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:

- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
- 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
- 04.03 Identify psychological reactions to illness including defense mechanisms.
- 04.04 Identify complementary and alternative health practices.
- 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
- 04.06 Explain the basic concepts of positive self image, wellness and stress.
- 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
- 04.08 Explain the nutrition pyramid.

- 04.09 Recognize the steps in the grief process.
- 05.0 Recognize and practice safety and security procedures. – The student will be able to:
  - 05.01 Recognize safe and unsafe working conditions and report safety hazards.
  - 05.02 Demonstrate the safe use of medical equipment.
  - 05.03 Explain and apply the theory of root- cause analysis
  - 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
  - 05.05 Identify and practice security procedures for medical supplies and equipment.
  - 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions.
  - 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
  - 05.08 Demonstrate proper body mechanics and ergonomics.
  - 05.09 Demonstrate the procedure for properly identifying patients.
  - 05.10 Demonstrate procedures for the safe transport and transfer of patients.
  - 05.11 Describe fire, safety, disaster and evacuations procedures.
  - 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )
- 06.0 Recognize and respond to emergency situations. – The student will be able to:
  - 06.01 Monitor and record vital signs.
  - 06.02 Describe legal parameters relating to the administration of emergency care.
  - 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
  - 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.
- 07.0 Recognize and practice infection control procedures. – The student will be able to:
  - 07.01 Define principles of infection control including standard and transmission based precautions.
  - 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
  - 07.03 Demonstrate knowledge of surgical asepsis.
  - 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.
- 08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:
  - 08.01 Describe technology applications in healthcare.
  - 08.02 Define terms and demonstrate basic computer skills.
  - 08.03 Recognize technology applications in healthcare.
  - 08.04 Interpret information from electronic medical documents.
  - 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.

09.0 Demonstrate employability skills. – The student will be able to:

- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.
- 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
- 09.03 Identify documents that may be required when applying for a job.
- 09.04 Write an appropriate resume.
- 09.05 Conduct a job search.
- 09.06 Complete a job application form correctly.
- 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
- 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
- 09.09 Identify acceptable work habits.
- 09.10 Recognize appropriate affective/professional behavior.
- 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).

10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:

- 10.01 Recognize emerging diseases and disorders
- 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
- 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
- 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
- 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
- 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.

11.0 Apply basic math and science skills. – The student will be able to:

- 11.01 Draw, read, and report on graphs, charts and tables.
- 11.02 Measure time, temperature, distance, capacity, and mass/weight.
- 11.03 Make, use and convert using both traditional and metric units.
- 11.04 Make estimations and approximations and judge the reasonableness of the result.
- 11.05 Convert from regular to 24 hour time.
- 11.06 Demonstrate ability to evaluate and draw conclusions.
- 11.07 Organize and communicate the results obtained by observation and experimentation.
- 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
- 11.09 Calculate ratios

**OPTION 1 – Nursing Home Administration: Students completing this module have achieved the occupational completion point of Nursing Home Administrator and may be eligible to take the Florida examination for Nursing Home Administrator.**

- 12.0 Demonstrate leadership and administrative skills basic to management in any health care facility. – The student will be able to:
  - 12.01 Identify current trends and perspectives related to the management of health care organizations and the means by which the application of sound management principles and behavior can facilitate change.
  - 12.02 Interpret managerial principles, practices and processes to the delivery of health care.
  - 12.03 Identify the role, responsibilities and parameters for the various levels of management within the health care organizations.
  - 12.04 State the control processes and techniques used to ensure that the objectives, strategies and policies of health care delivery are achieved effectively and efficiently.
  - 12.05 Relate the various aspects of organizational dynamics (decision making, motivation, leadership, and communication) to the needs and problems of health care organizations.
  - 12.06 Relate personnel administration practices to the total scope of labor relations, including manpower acquisition, maintenance, and utilization.
  - 12.07 Be knowledgeable in workflow identification, charting, and workflow management techniques such as PERT and GANNT charting.
  
- 13.0 Interpret federal, state and local laws as they apply to health care facilities. – The student will be able to:
  - 13.01 Cite federal, state and local institutional requirements.
  - 13.02 List required standards and procedures for facility and staff.
  - 13.03 Identify mandatory requirements regarding environmental health and safety standards.
  - 13.04 Discuss the impact of legislative changes on health care facilities.
  - 13.05 Identify the Florida Statutes as applied to health care facilities.
  
- 14.0 Demonstrate knowledge of operational and organizational structures of health care facilities. – The student will be able to:
  - 14.01 Describe the functions and standards of departments in health care facilities.
  - 14.02 Contrast administrative roles and responsibilities in different types of health care agencies.
  - 14.03 Describe principles and philosophies of health care agencies delivering long-term, acute and other types of health care services and their individual role in the overall healthcare delivery system.
  - 14.04 Identify several basic principles of medical care.
  
- 15.0 Demonstrate knowledge of psychological problems among residents and find acceptable solution. – The student will be able to:
  - 15.01 Accommodate individual differences, characteristics, and behaviors.
  - 15.02 Adjust room assignments, personnel assignments, etc., to satisfy residents.

- 16.0 Demonstrate knowledge of materials and supplies needed to care for residents and how to obtain them for staff. – The student will be able to:
- 16.01 Evaluate current inventory.
  - 16.02 Prepare purchase orders, being mindful of current financial status of institution.
  - 16.03 Shop for quality, price, and quantity.
  - 16.04 Maintain computer-based inventory system.
- 17.0 Demonstrate knowledge of occupational safety and health for residents/patients and employees. – The student will be able to:
- 17.01 Prepare an evacuation plan.
  - 17.02 Plan and conduct fire drills making sure that every person on duty is aware of their individual responsibility.
  - 17.03 Inspect labels on hazardous substances including poison labels.
  - 17.04 Make certain that all substances have appropriate storage areas.
  - 17.05 Conduct in-service for employees.
  - 17.06 Respond to workers inquiries and post notices.
  - 17.07 Maintain current OSHA safety standards.
  - 17.08 Implement appropriate Joint Commission patient safety goals.
- 18.0 Demonstrate knowledge of appropriate work-loads for each employee and knowledge of the amount of care each resident requires. – The student will be able to:
- 18.01 Prepare job descriptions.
  - 18.02 Prepare care plans for each resident.
  - 18.03 Figure man-hours required for total care on one unit using available statistics.
  - 18.04 Identify factors which alter the amount of care needed and the number of man-hours required for different diagnoses.
  - 18.05 Know the legal minimum staff to patient ratio given care level and type of facility.
- 19.0 Review, approve and monitor departmental capital and operational budgets. – The student will be able to:
- 19.01 Develop a capital budget justification format.
  - 19.02 Delegate capital budget preparation to key managers.
  - 19.03 Analyze and approve appropriate capital budget items.
  - 19.04 Develop an operational budget format.
  - 19.05 Analyze and approve appropriate financial levels in each operational budget.
- 20.0 Identify and apply legal reimbursement systems. – The student will be able to:
- 20.01 Establish a patient classification system within a health care facility.
  - 20.02 Establish a mechanism for utilization review.
  - 20.03 Develop an accounts receivable system that monitors and optimizes reimbursement.
  - 20.04 Maintain case-mix analysis reports.
- 21.0 Comply with accreditation standards of governmental or governmental appointed agencies/organization. –The student will be able to:

- 21.01 List and implement procedures to meet required standards for health care facilities.
- 21.02 Identify the required standards for health care personnel.
- 21.03 Apply infection control techniques according to Centers for Disease Control (CDC) guidelines.
- 21.04 Develop policies and operational procedures to meet required standards.
- 21.05 Establish liaison mechanisms with appropriate accrediting organizations.
- 21.06 Develop policies and procedures.
- 21.07 Maintain state and federal licenses.
- 21.08 Execute and comply with regulatory bodies.
- 21.09 Oversee risk management activities.
- 21.10 Monitor CQI activities.

**OPTION 2 - Other Health Care Managers: Students enrolled in this minimum 15-credit module in health related managerial courses have a background and/or credentials in the health field and train to become managers within their specific discipline. The occupational completion point for this module is Health Services Manager.**

22.0 Demonstrate an understanding of technical competencies from one or more specialized health care areas. – The student will be able to:

- 22.01 Demonstrate an understanding of technical competencies as specified in the curriculum frameworks of any health occupations postsecondary adult or postsecondary vocational program.

2011 - 2012

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Health Care Services  
**Career Cluster:** Health Science

CCC	
CIP Number	0318070101
Program Type	College Credit Certificate (CCC)
Program Length	32 credit hours
CTSO	HOSA
SOC Codes (all applicable)	31-9099, 11-9111
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>

### **Purpose**

This certificate program is part of the Health Services Management AS/AAS degree program (1318.070100).

A College Credit Certificate consists of a program of instruction of less than sixty (60) credits of college-level courses, which is part of an AS or AAS degree program and prepares students for entry into employment (Rule 6A-14.030, F.A.C.).

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

The purpose of this program is to prepare students for employment as Health Care Services supervisors in medicine and health service management. SOC Code 11-9111 (Medical and Health Services Managers). This program is for individuals who are currently employed in the health field or seeking employment in mid-management positions in the health field. The Health Careers Core must be taken by all students (secondary, postsecondary adult and postsecondary vocational) planning to complete any Health Occupations program. Once successfully completed, the core does not need to be repeated at any instructional level.

The content includes but is not limited to leadership and supervisory skills, laws and regulations pertaining to health care facilities and agencies, organizational structure of health care facilities, budgeting and fiscal management, making employee assignments and scheduling, legal aspects of health care, health and safety including CPR and employability skills.

## **Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

## **Special Notes**

This program meets the Department of Health HIV/AIDS Domestic Violence and Prevention of Medical Errors education requirements. Upon completion of this program, the instructor will provide a certificate to the student verifying that these requirements have been met.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635 F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

The Health Care Services Program, with emphasis on middle management skills, is a complex program requiring current knowledge in both health care and legislation affecting the health care delivery system. Instruction disciplines can come from a variety of fields.

To augment the program areas, community leaders possessing expertise in specific health care areas may be utilized.

Outcomes 01-11 are referred to as the Health Careers Core and do not have to be completed if the student has previously completed the Core in another health science program. The CORE should be taken first or concurrently with the first course in the program. Following the successful completion of the core, the student is eligible to take the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

## **Career and Technical Student Organization (CTSO)**

Health Occupations Students of America, Inc. (HOSA) is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

## **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and

special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

## **Standards**

After successfully completing this course the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.
- 12.0 Demonstrate leadership and administrative skills basic to management in any health care facility.
- 13.0 Interpret federal, state and local laws as they apply to health care facilities and agencies.
- 14.0 Demonstrate knowledge of operational and organizational structures of health care facilities and agencies.
- 15.0 Demonstrate knowledge of psychological problems among those who need health care and find acceptable solutions.
- 16.0 Demonstrate knowledge of materials and supplies needed to care for clients and how to obtain them for staff.
- 17.0 Demonstrate knowledge of occupational safety and health for clients and employees.
- 18.0 Demonstrate knowledge of appropriate work-loads for each employee and knowledge of the amount of care each client requires.
- 19.0 Review, approve and monitor departmental capital and operational budgets.
- 20.0 Comply with accreditation standards.

2011 - 2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Health Care Services  
**CIP Number:** 0318070101  
**Program Length:** 32 credit hours  
**SOC Code(s):** 31-9099, 11-9111

This certificate program is part of the Health Services Management AS/AAS degree program (1318.070100). At the completion of this program, the student will be able to:

**Health Science Core: The Health Science Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Science Core in any other health occupations program do not have to repeat intended outcomes 01-11.**

01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:

- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
- 01.02 Identify common methods of payment for healthcare services.
- 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
- 01.04 Describe the composition and functions of a healthcare team.
- 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
- 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
- 01.07 Identify characteristics of effective teams.
- 01.08 Recognize methods for building positive team relationships.
- 01.09 Analyze attributes and attitudes of an effective leader.
- 01.10 Recognize factors and situations that may lead to conflict.
- 01.11 Demonstrate effective techniques for managing team conflict.
- 01.12 Describe factors that influence the current delivery system of healthcare.
- 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.

02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:

- 02.01 Develop basic speaking and active listening skills.
- 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
- 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
- 02.04 Respond to verbal and non-verbal cues.
- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.
- 02.06 Use appropriate medical terminology and abbreviations.

- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
  - 02.08 Recognize the importance of patient/client educations regarding healthcare.
  - 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
  - 02.10 Analyze elements of communication using a sender-receiver model.
  - 02.11 Distinguish between and report subjective and objective information.
  - 02.12 Report relevant information in order of occurrence.
- 03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:
- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
  - 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
  - 03.03 Demonstrate procedures for accurate documentation and record keeping.
  - 03.04 Interpret healthcare facility policy and procedures.
  - 03.05 Explain the “Patient’s Bill of Rights”.
  - 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
  - 03.07 Describe advance directives.
  - 03.08 Describe informed consent.
  - 03.09 Explain the laws governing harassment, labor and employment.
  - 03.10 Differentiate between legal and ethical issues in healthcare.
  - 03.11 Describe a code of ethics consistent with the healthcare occupation.
  - 03.12 Identify and compare personal, professional, and organizational ethics.
  - 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
  - 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
  - 03.15 Recognize and report abuse including domestic violence and neglect.
  - 03.16 Distinguish among the five schedules of controlled substances.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:
- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
  - 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
  - 04.03 Identify psychological reactions to illness including defense mechanisms.
  - 04.04 Identify complementary and alternative health practices.
  - 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
  - 04.06 Explain the basic concepts of positive self image, wellness and stress.
  - 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
  - 04.08 Explain the nutrition pyramid.
  - 04.09 Recognize the steps in the grief process.
- 05.0 Recognize and practice safety and security procedures. – The student will be able to:

- 05.01 Recognize safe and unsafe working conditions and report safety hazards.
  - 05.02 Demonstrate the safe use of medical equipment.
  - 05.03 Explain and apply the theory of root- cause analysis
  - 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
  - 05.05 Identify and practice security procedures for medical supplies and equipment.
  - 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions).
  - 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
  - 05.08 Demonstrate proper body mechanics and ergonomics.
  - 05.09 Demonstrate the procedure for properly identifying patients.
  - 05.10 Demonstrate procedures for the safe transport and transfer of patients.
  - 05.11 Describe fire, safety, disaster and evacuations procedures.
  - 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )
- 06.0 Recognize and respond to emergency situations. – The student will be able to:
- 06.01 Monitor and record vital signs.
  - 06.02 Describe legal parameters relating to the administration of emergency care.
  - 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
  - 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.
- 07.0 Recognize and practice infection control procedures. – The student will be able to:
- 07.01 Define principles of infection control including standard and transmission based precautions.
  - 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
  - 07.03 Demonstrate knowledge of surgical asepsis.
  - 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.
- 08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:
- 08.01 Describe technology applications in healthcare.
  - 08.02 Define terms and demonstrate basic computer skills.
  - 08.03 Recognize technology applications in healthcare.
  - 08.04 Interpret information from electronic medical documents.
  - 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.
- 09.0 Demonstrate employability skills. – The student will be able to:
- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.

- 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
  - 09.03 Identify documents that may be required when applying for a job.
  - 09.04 Write an appropriate resume.
  - 09.05 Conduct a job search.
  - 09.06 Complete a job application form correctly.
  - 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
  - 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
  - 09.09 Identify acceptable work habits.
  - 09.10 Recognize appropriate affective/professional behavior.
  - 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:
- 10.01 Recognize emerging diseases and disorders
  - 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
  - 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
  - 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
  - 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
  - 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.
- 11.0 Apply basic math and science skills. – The student will be able to:
- 11.01 Draw, read, and report on graphs, charts and tables.
  - 11.02 Measure time, temperature, distance, capacity, and mass/weight.
  - 11.03 Make, use and convert using both traditional and metric units.
  - 11.04 Make estimations and approximations and judge the reasonableness of the result.
  - 11.05 Convert from regular to 24 hour time.
  - 11.06 Demonstrate ability to evaluate and draw conclusions.
  - 11.07 Organize and communicate the results obtained by observation and experimentation.
  - 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
  - 11.09 Calculate ratios

## **Health Care Services OCP-B**

- 12.0 Demonstrate leadership and administrative skills basic to management in any health care facility. – The student will be able to:
- 12.01 Describe the American Health Care Delivery System, its scope and the organizational climate.
  - 12.02 Identify current trends and perspectives related to the management of health care organizations and the impact of change.
  - 12.03 Interpret managerial principles, practices and processes for the delivery of health care.
  - 12.04 Identify the role, responsibilities and parameters for the various levels of management within health care organizations.
  - 12.05 State the control processes and techniques used to ensure that the objectives, strategies and policies of health care delivery are achieved.
  - 12.06 Relate the various aspects of organizational dynamics (decision making, motivations, leadership, and communication) to the needs and problems of health care organizations.
  - 12.07 Relate human resource practices to the total scope of employee/labor relations, including workforce acquisition, maintenance, and utilization.
- 13.0 Interpret federal, state and local laws as they apply to health care facilities and agencies. – The student will be able to:
- 13.01 Cite federal, state and local institutional requirements governing the health care facility.
  - 13.02 List required standards and procedures for facility and staff.
  - 13.03 Identify mandatory requirements regarding environmental health and safety standards.
  - 13.04 Discuss the impact of legislative changes on health care facilities and staff.
  - 13.05 Identify the Florida Statutes as applied to health care facilities and health care workers.
- 14.0 Demonstrate knowledge of operational and organizational structures of health care facilities and agencies. – The student will be able to:
- 14.01 Describe the functions and standards of departments in health care facilities.
  - 14.02 Contrast administrative roles and responsibilities in different types of health care agencies.
  - 14.03 Describe principles and philosophies of agencies that deliver health care services.
  - 14.04 Identify several basic principles of medical care.
  - 14.05 State communication techniques within the health care system.
  - 14.06 Implement appropriate Joint Commission patient safety goals.
- 15.0 Demonstrate knowledge of psychological problems among those who need health care and find acceptable solutions. – The student will be able to:
- 15.01 Recognize the worth and dignity of each client.
  - 15.02 Accept individual differences, characteristics, and behaviors.

- 15.03 Recognize the need for a satisfying and safe environment.
- 16.0 Demonstrate knowledge of materials and supplies needed to care for clients and how to obtain them for staff. – The student will be able to:
  - 16.01 Evaluate current inventory.
  - 16.02 Prepare purchase orders.
  - 16.03 Utilize sound buying practices.
- 17.0 Demonstrate knowledge of occupational safety and health for clients and employees. – The student will be able to:
  - 17.01 Prepare an evacuation plan.
  - 17.02 Plan and conduct fire drills.
  - 17.03 Inspect labels on hazardous or toxic substances.
  - 17.04 Provide appropriate storage for all substances.
  - 17.05 Conduct inservice for employees.
  - 17.06 Post notices required by OSHA (Occupational Safety and Health Administration).
- 18.0 Demonstrate knowledge of appropriate work-loads for each employee and knowledge of the amount of care each client requires. – The student will be able to:
  - 18.01 Prepare job descriptions.
  - 18.02 Participate in preparation of care plans.
  - 18.03 Compute staff hours required for total care on one unit.
  - 18.04 Identify factors which alter the amount of care needed and the number of staff hours required for different diagnoses.
- 19.0 Review, approve and monitor departmental capital and operational budgets. – The student will be able to:
  - 19.01 Develop a capital budget justification format.
  - 19.02 Prepare capital budgets.
  - 19.03 Analyze and approve appropriate capital budget items.
  - 19.04 Develop an operational budget format.
  - 19.05 Analyze and approve appropriate items.
- 20.0 Comply with accreditation standards. – The student will be able to:
  - 20.01 Develop policies and operational procedures to meet required standards.
  - 20.02 Implement procedures to meet required standards for health care facilities.
  - 20.03 Identify the required standards for health care personnel.
  - 20.04 Apply infection control techniques according to Center for Disease Control (CDC) guidelines.
  - 20.05 Establish liaison with appropriate accrediting organizations.

2011 - 2012

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Health Care Services-ATD  
**Program Type:** ATD (Applied Technology Diploma)  
**Career Cluster:** Health Science

	<b>CC</b>	<b>PSAV</b>
Program Number	N/A	H180708
CIP Number	0318070102	0318070103
Grade Level	Applied Technology Diploma (ATD)	Applied Technology Diploma (ATD)
Standard Length	32 credit hours	960 hours
CTSO	HOSA	HOSA
SOC Codes (all applicable)	31-9099, 11-9111	31-9099, 11-9111
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>	
Basic Skills Level	Mathematics: 10 Language: 10 Reading: 10	

### **Purpose**

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

The purpose of this program is to prepare students for employment as Health Services supervisors or medicine and health service management SOC Code 11-9111 Medical & Health Services Managers. This program is for individuals who are currently employed in the health field or seeking employment in mid-management positions in the health field. The Health Careers Core must be taken by all students (secondary, postsecondary adult and postsecondary vocational) planning to complete any Health Occupations program. Once successfully completed, the core does not need to be repeated at any instructional level.

The content includes but is not limited to leadership and supervisory skills, laws and regulations pertaining to health care facilities and agencies, organizational structure of health care facilities, budgeting and fiscal management, making employee assignments and scheduling, legal aspects of health care, health and safety including CPR and employability skills.

## **Program Structure**

This program is an Applied Technology Diploma program that is part of a technical degree program, is less than 60 credit hours, and leads to employment in a specific occupation. An applied technology diploma program may consist of either technical credit or college credit. A public school district may offer an applied technology diploma program only as technical credit, with college credit awarded to a student upon articulation to a community college.

## **PSAV Program**

When offered at the district level, this program is a planned sequence of instruction consisting of two occupational completion points and the courses as shown below.

OCP	Course Number	Course Title	Length	SOC Code
A	HSC0003	Basic Healthcare Worker	90 hours	31-9099
	HSC0012	Health Services Supervisor 1	435 hours	11-9111
B	HSC0013	Health Services Supervisor 2	435 hours	11-9111

## **Community College**

When offered at the community college level, this ATD program is part of the Health Care Services Management AS/AAS program (1318070100) and has a program length of 32 credits.

## **Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

## **Special Notes**

This program meets the Department of Health HIV/AIDS Domestic Violence and Prevention of Medical Errors education requirements. Upon completion of this program, the instructor will provide a certificate to the student verifying that these requirements have been met.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635 F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

The program is designed for those individuals who already have credentialing in a health profession, i.e. appropriate licensure, certification or registration in their health care field.

This program focuses on broad, transferable skills and stresses understanding and demonstration of the following elements of the health care industry; planning, management,

finance, technical and production skills, underlying principles of technology, labor issues, community issues and health, safety, and environmental issues.

Faculty teaching this program must have a minimum of a bachelor's degree in the specialty area or an associate degree and demonstrated competencies in the specialty area or meet the "exceptional cases" criteria as established by the Southern Association of Colleges and Schools.

The Health Care Services Program, with emphasis on middle management skills, is a complex program requiring current knowledge in both health care and legislation affecting the health care delivery system. Their disciplines can come from a variety of fields, i.e.: social sciences, nursing, business administration or education.

To augment the program areas, community leaders possessing expertise in specific health care areas may be utilized.

Outcomes 01-11 are referred to as the Health Careers Core and do not have to be completed if the student has previously completed the Core in another health science program. The CORE should be taken first or concurrently with the first course in the program. Following the successful completion of the core, the student is eligible to take the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

### **Career and Technical Student Organization (CTSO)**

Health Occupations Students of America (HOSA), Inc. is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

### **Basic Skills**

In PSAV programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C. the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Mathematics 10, Language 10, and Reading 10. These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination. Students may be exempt from meeting the Basic Skills requirements by earning an eligible industry certification. See the Basic Skills Exemption List document for a list of eligible industry certifications (<http://www.fldoe.org/workforce/dwdframe/rtf/basic-skills.rtf>).

Adult students with disabilities, as defined in Section 1004.02(7), Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01(3)(a), F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91(3), F.S.

Students who possess a college degree at the Associate of Applied Science level or higher; who have completed or are exempt from the college entry-level examination pursuant to Section

1008.29, F.S.; or who have passed a state, national, or industry licensure exam are exempt from meeting the Basic Skills requirement (Rule 6A-10.040, F.A.C.)

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Some secondary students with disabilities (ESE) may need additional time (i.e., longer than the regular school year), to master the student performance standards associated with a regular occupational completion point (OCP) or a modified occupational completion point (MOCP). If needed, a student may enroll in the same career and technical course more than once. Documentation should be included in the IEP that clearly indicates that it is anticipated that the student may need an additional year to complete an OCP/MOCP. The student should work on different competencies and new applications of competencies each year toward completion of the OCP(s)/MOCP. After achieving the competencies identified for the year, the student earns credit for the course. It is important to ensure that credits earned by students are reported accurately. The district's information system must be designed to accept multiple credits for the same course number (for eligible students with disabilities). For further information, see Rule 6A-6.0312, F.A.C., Course Modifications for Exceptional Students, and the latest pertinent Technical Assistance Paper (<http://www.fldoe.org/ese/tap-home.asp>).

### **Articulation**

The information related to the guaranteed transfer of credit between an applied technology diploma program and AS/AAS degree must be documented and maintained by the Articulation Coordinating Committee (ACC). The transfer of the applied technology diploma to an AS/AAS degree is guaranteed for a period of three (3) years following the date of the award of the applied technology diploma.

### **Program Length**

In accordance with Rule 6A-10.024, F.A.C. an Applied Technology Diploma program consists of a course of study that is part of an AS/AAS degree program, is less than 60 credit hours, is approximately 50% of the technical component (non-general education), and leads to employment in a specific occupation. An applied technology diploma program may consist of either technical credit or college credit.

Students must have a high school diploma, a GED, or a certificate of completion to be admitted to an applied technology diploma program. Within six weeks of entry, students in ATD programs of 450 or more hours must be tested pursuant to Rule 6A-10.040, F.A.C. and if below minimum standards for completion from the program, must receive remedial instruction. The

minimum standards must be at least the equivalent of a score of ten (10) on all sections of basic skills test approved in Rule 6A-10.040, F.A.C. Students must successfully complete all remedial instruction before completing the Applied Technology Diploma.

Community Colleges may offer either college or career credit toward the applied technology diploma. A Career Center in a public school district may offer an applied technology diploma program only as technical credit, with college credit awarded to a student upon articulation to a community college (Section 1004.02, F.S.)

When offered at a community college the standard length of this program is 32 credits. When offered at a technical center the standard length of this program is 960 clock hours.

In accordance with Rule 6A-10.024, F.A.C. all faculty providing instruction must have at least a baccalaureate degree or an associate degree with demonstrated competencies in the specific instructional program as defined by the Southern Association of Colleges and Schools.

## **Standards**

After successfully completing this program the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.
- 12.0 Demonstrate leadership and administrative skills basic to management in any health care facility.
- 13.0 Interpret federal, state and local laws as they apply to health care facilities and agencies.
- 14.0 Demonstrate knowledge of operational and organizational structures of health care facilities and agencies.
- 15.0 Demonstrate knowledge of psychological problems among those who need health care and find acceptable solutions.
- 16.0 Demonstrate knowledge of materials and supplies needed to care for clients and how to obtain them for staff.
- 17.0 Demonstrate knowledge of occupational safety and health for clients and employees.
- 18.0 Demonstrate knowledge of appropriate work-loads for each employee and knowledge of the amount of care each client requires.
- 19.0 Review, approve and monitor departmental capital and operational budgets.
- 20.0 Comply with accreditation standards.

2011 - 2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Health Care Services- ATD  
**PSAV Number:** H180708

When this program is offered at the PSAV level, the following organization of courses, standards, and benchmarks apply.

**Health Science Core:** The Health Science Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Science Core in any other health occupations program do not have to repeat intended outcomes 01-11.

**PSAV Course Number:** HSC0003  
**Occupational Completion Point:** B  
**Basic Healthcare Worker – 90 Hours – SOC Code 31-9099**

01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:

- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
- 01.02 Identify common methods of payment for healthcare services.
- 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
- 01.04 Describe the composition and functions of a healthcare team.
- 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
- 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
- 01.07 Identify characteristics of effective teams.
- 01.08 Recognize methods for building positive team relationships.
- 01.09 Analyze attributes and attitudes of an effective leader.
- 01.10 Recognize factors and situations that may lead to conflict.
- 01.11 Demonstrate effective techniques for managing team conflict.
- 01.12 Describe factors that influence the current delivery system of healthcare.
- 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.

02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:

- 02.01 Develop basic speaking and active listening skills.
- 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
- 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
- 02.04 Respond to verbal and non-verbal cues.
- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.

- 02.06 Use appropriate medical terminology and abbreviations.
- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
- 02.08 Recognize the importance of patient/client educations regarding healthcare.
- 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
- 02.10 Analyze elements of communication using a sender-receiver model.
- 02.11 Distinguish between and report subjective and objective information.
- 02.12 Report relevant information in order of occurrence.

03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:

- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
- 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
- 03.03 Demonstrate procedures for accurate documentation and record keeping.
- 03.04 Interpret healthcare facility policy and procedures.
- 03.05 Explain the “Patient’s Bill of Rights”.
- 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
- 03.07 Describe advance directives.
- 03.08 Describe informed consent.
- 03.09 Explain the laws governing harassment, labor and employment.
- 03.10 Differentiate between legal and ethical issues in healthcare.
- 03.11 Describe a code of ethics consistent with the healthcare occupation.
- 03.12 Identify and compare personal, professional, and organizational ethics.
- 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
- 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
- 03.15 Recognize and report abuse including domestic violence and neglect.
- 03.16 Distinguish among the five schedules of controlled substances.

04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:

- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
- 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
- 04.03 Identify psychological reactions to illness including defense mechanisms.
- 04.04 Identify complementary and alternative health practices.
- 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
- 04.06 Explain the basic concepts of positive self image, wellness and stress.
- 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
- 04.08 Explain the nutrition pyramid.
- 04.09 Recognize the steps in the grief process.

05.0 Recognize and practice safety and security procedures. – The student will be able to:

- 05.01 Recognize safe and unsafe working conditions and report safety hazards.
- 05.02 Demonstrate the safe use of medical equipment.
- 05.03 Explain and apply the theory of root- cause analysis
- 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
- 05.05 Identify and practice security procedures for medical supplies and equipment.
- 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions).
- 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
- 05.08 Demonstrate proper body mechanics and ergonomics.
- 05.09 Demonstrate the procedure for properly identifying patients.
- 05.10 Demonstrate procedures for the safe transport and transfer of patients.
- 05.11 Describe fire, safety, disaster and evacuations procedures.
- 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )

06.0 Recognize and respond to emergency situations. – The student will be able to:

- 06.01 Monitor and record vital signs.
- 06.02 Describe legal parameters relating to the administration of emergency care.
- 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
- 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.

07.0 Recognize and practice infection control procedures. – The student will be able to:

- 07.01 Define principles of infection control including standard and transmission based precautions.
- 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
- 07.03 Demonstrate knowledge of surgical asepsis.
- 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.

08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:

- 08.01 Describe technology applications in healthcare.
- 08.02 Define terms and demonstrate basic computer skills.
- 08.03 Recognize technology applications in healthcare.
- 08.04 Interpret information from electronic medical documents.
- 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.

09.0 Demonstrate employability skills. – The student will be able to:

- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.
  - 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
  - 09.03 Identify documents that may be required when applying for a job.
  - 09.04 Write an appropriate resume.
  - 09.05 Conduct a job search.
  - 09.06 Complete a job application form correctly.
  - 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
  - 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
  - 09.09 Identify acceptable work habits.
  - 09.10 Recognize appropriate affective/professional behavior.
  - 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:
- 10.01 Recognize emerging diseases and disorders
  - 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
  - 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
  - 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
  - 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
  - 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.
- 11.0 Apply basic math and science skills. – The student will be able to:
- 11.01 Draw, read, and report on graphs, charts and tables.
  - 11.02 Measure time, temperature, distance, capacity, and mass/weight.
  - 11.03 Make, use and convert using both traditional and metric units.
  - 11.04 Make estimations and approximations and judge the reasonableness of the result.
  - 11.05 Convert from regular to 24 hour time.
  - 11.06 Demonstrate ability to evaluate and draw conclusions.
  - 11.07 Organize and communicate the results obtained by observation and experimentation.
  - 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
  - 11.09 Calculate ratios

**PSAV Course Number: HSC0012**  
**Occupational Completion Point: B**  
**Health Services Supervisor 1 – 435 Hours – SOC Code 11-9111**

- 12.0 Demonstrate leadership and administrative skills basic to management in any health care facility. – The student will be able to:
- 12.01 Describe the American Health Care Delivery System, its scope and the organizational climate.
  - 12.02 Identify current trends and perspectives related to the management of health care organizations and the impact of change.
  - 12.03 Interpret managerial principles, practices and processes for the delivery of health care.
  - 12.04 Identify the role, responsibilities and parameters for the various levels of management within health care organizations.
  - 12.05 State the control processes and techniques used to ensure that the objectives, strategies and policies of health care delivery are achieved.
  - 12.06 Relate the various aspects of organizational dynamics (decision making, motivations, leadership, and communication) to the needs and problems of health care organizations.
  - 12.07 Relate human resource practices to the total scope of employee/labor relations, including workforce acquisition, maintenance, and utilization.
- 13.0 Interpret federal, state and local laws as they apply to health care facilities and agencies. – The student will be able to:
- 13.01 Cite federal, state and local institutional requirements governing the health care facility.
  - 13.02 List required standards and procedures for facility and staff.
  - 13.03 Identify mandatory requirements regarding environmental health and safety standards.
  - 13.04 Discuss the impact of legislative changes on health care facilities and staff.
  - 13.05 Identify the Florida Statutes as applied to health care facilities and health care workers.
- 14.0 Demonstrate knowledge of operational and organizational structures of health care facilities and agencies. – The student will be able to:
- 14.01 Describe the functions and standards of departments in health care facilities.
  - 14.02 Contrast administrative roles and responsibilities in different types of health care agencies.
  - 14.03 Describe principles and philosophies of agencies that deliver health care services.
  - 14.04 Identify several basic principles of medical care.
  - 14.05 State communication techniques within the health care system.
- 15.0 Demonstrate knowledge of psychological problems among those who need health care and find acceptable solutions. – The student will be able to:
- 15.01 Recognize the worth and dignity of each client.
  - 15.02 Accept individual differences, characteristics, and behaviors.

15.03 Recognize the need for a satisfying and safe environment.

**PSAV Course Number: HSC0013**  
**Occupational Completion Point: B**  
**Health Services Supervisor 2 – 435 Hours – SOC Code 11-9111**

- 16.0 Demonstrate knowledge of materials and supplies needed to care for clients and how to obtain them for staff. – The student will be able to:
- 16.01 Evaluate current inventory.
  - 16.02 Prepare purchase orders.
  - 16.03 Utilize sound buying practices.
- 17.0 Demonstrate knowledge of occupational safety and health for clients and employees. – The student will be able to:
- 17.01 Prepare an evacuation plan.
  - 17.02 Plan and conduct fire drills.
  - 17.03 Inspect labels on hazardous or toxic substances.
  - 17.04 Provide appropriate storage for all substances.
  - 17.05 Conduct inservice for employees.
  - 17.06 Post notices required by OSHA (Occupational Safety and Health Administration).
  - 17.07 Implement appropriate Joint Commission patient safety goals.
- 18.0 Demonstrate knowledge of appropriate work-loads for each employee and knowledge of the amount of care each client requires. – The student will be able to:
- 18.01 Prepare job descriptions.
  - 18.02 Participate in preparation of care plans.
  - 18.03 Compute staff hours required for total care on one unit.
  - 18.04 Identify factors which alter the amount of care needed and the number of staff hours required for different diagnoses.
- 19.0 Review, approve and monitor departmental capital and operational budgets. – The student will be able to:
- 19.01 Develop a capital budget justification format.
  - 19.02 Prepare capital budgets.
  - 19.03 Analyze and approve appropriate capital budget items.
  - 19.04 Develop an operational budget format.
  - 19.05 Analyze and approve appropriate items.
- 20.0 Comply with accreditation standards. – The student will be able to:
- 20.01 Develop policies and operational procedures to meet required standards.
  - 20.02 Implement procedures to meet required standards for health care facilities.
  - 20.03 Identify the required standards for health care personnel.
  - 20.04 Apply infection control techniques according to Center for Disease Control (CDC) guidelines.
  - 20.05 Establish liaison with appropriate accrediting organizations.

2011 - 2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Health Care Services ATD  
**ATD CIP Number:** 0318070102  
**SOC Code(s):** 31-9099, 11-9111

When this program is offered by a community or state college, the following standards, and benchmarks apply.

**Health Science Core: The Health Science Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Science Core in any other health occupations program do not have to repeat intended outcomes 01-11.**

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:
- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
  - 01.02 Identify common methods of payment for healthcare services.
  - 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
  - 01.04 Describe the composition and functions of a healthcare team.
  - 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
  - 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
  - 01.07 Identify characteristics of effective teams.
  - 01.08 Recognize methods for building positive team relationships.
  - 01.09 Analyze attributes and attitudes of an effective leader.
  - 01.10 Recognize factors and situations that may lead to conflict.
  - 01.11 Demonstrate effective techniques for managing team conflict.
  - 01.12 Describe factors that influence the current delivery system of healthcare.
  - 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:
- 02.01 Develop basic speaking and active listening skills.
  - 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
  - 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
  - 02.04 Respond to verbal and non-verbal cues.
  - 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.
  - 02.06 Use appropriate medical terminology and abbreviations.

- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
  - 02.08 Recognize the importance of patient/client educations regarding healthcare.
  - 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
  - 02.10 Analyze elements of communication using a sender-receiver model.
  - 02.11 Distinguish between and report subjective and objective information.
  - 02.12 Report relevant information in order of occurrence.
- 03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:
- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
  - 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
  - 03.03 Demonstrate procedures for accurate documentation and record keeping.
  - 03.04 Interpret healthcare facility policy and procedures.
  - 03.05 Explain the “Patient’s Bill of Rights”.
  - 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
  - 03.07 Describe advance directives.
  - 03.08 Describe informed consent.
  - 03.09 Explain the laws governing harassment, labor and employment.
  - 03.10 Differentiate between legal and ethical issues in healthcare.
  - 03.11 Describe a code of ethics consistent with the healthcare occupation.
  - 03.12 Identify and compare personal, professional, and organizational ethics.
  - 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
  - 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
  - 03.15 Recognize and report abuse including domestic violence and neglect.
  - 03.16 Distinguish among the five schedules of controlled substances.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:
- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
  - 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
  - 04.03 Identify psychological reactions to illness including defense mechanisms.
  - 04.04 Identify complementary and alternative health practices.
  - 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
  - 04.06 Explain the basic concepts of positive self image, wellness and stress.
  - 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
  - 04.08 Explain the nutrition pyramid.
  - 04.09 Recognize the steps in the grief process.
- 05.0 Recognize and practice safety and security procedures. – The student will be able to:

- 05.01 Recognize safe and unsafe working conditions and report safety hazards.
  - 05.02 Demonstrate the safe use of medical equipment.
  - 05.03 Explain and apply the theory of root- cause analysis
  - 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
  - 05.05 Identify and practice security procedures for medical supplies and equipment.
  - 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions.
  - 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
  - 05.08 Demonstrate proper body mechanics and ergonomics.
  - 05.09 Demonstrate the procedure for properly identifying patients.
  - 05.10 Demonstrate procedures for the safe transport and transfer of patients.
  - 05.11 Describe fire, safety, disaster and evacuations procedures.
  - 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )
- 06.0 Recognize and respond to emergency situations. – The student will be able to:
- 06.01 Monitor and record vital signs.
  - 06.02 Describe legal parameters relating to the administration of emergency care.
  - 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
  - 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.
- 07.0 Recognize and practice infection control procedures. – The student will be able to:
- 07.01 Define principles of infection control including standard and transmission based precautions.
  - 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
  - 07.03 Demonstrate knowledge of surgical asepsis.
  - 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.
- 08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:
- 08.01 Describe technology applications in healthcare.
  - 08.02 Define terms and demonstrate basic computer skills.
  - 08.03 Recognize technology applications in healthcare.
  - 08.04 Interpret information from electronic medical documents.
  - 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.
- 09.0 Demonstrate employability skills. – The student will be able to:
- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.

- 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
  - 09.03 Identify documents that may be required when applying for a job.
  - 09.04 Write an appropriate resume.
  - 09.05 Conduct a job search.
  - 09.06 Complete a job application form correctly.
  - 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
  - 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
  - 09.09 Identify acceptable work habits.
  - 09.10 Recognize appropriate affective/professional behavior.
  - 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:
- 10.01 Recognize emerging diseases and disorders
  - 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
  - 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
  - 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
  - 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
  - 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.
- 11.0 Apply basic math and science skills. – The student will be able to:
- 11.01 Draw, read, and report on graphs, charts and tables.
  - 11.02 Measure time, temperature, distance, capacity, and mass/weight.
  - 11.03 Make, use and convert using both traditional and metric units.
  - 11.04 Make estimations and approximations and judge the reasonableness of the result.
  - 11.05 Convert from regular to 24 hour time.
  - 11.06 Demonstrate ability to evaluate and draw conclusions.
  - 11.07 Organize and communicate the results obtained by observation and experimentation.
  - 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
  - 11.09 Calculate ratios

**Health Care Services: The following intended outcomes lead to the occupational completion point of SOC 11-9111 Medical and Health Services Managers)**

- 12.0 Demonstrate leadership and administrative skills basic to management in any health care facility. – The student will be able to:
  - 12.01 Describe the American Health Care Delivery System, its scope and the organizational climate.
  - 12.02 Identify current trends and perspectives related to the management of health care organizations and the impact of change.
  - 12.03 Interpret managerial principles, practices and processes for the delivery of health care.
  - 12.04 Identify the role, responsibilities and parameters for the various levels of management within health care organizations.
  - 12.05 State the control processes and techniques used to ensure that the objectives, strategies and policies of health care delivery are achieved.
  - 12.06 Relate the various aspects of organizational dynamics (decision making, motivations, leadership, and communication) to the needs and problems of health care organizations.
  - 12.07 Relate human resource practices to the total scope of employee/labor relations, including workforce acquisition, maintenance, and utilization.
  
- 13.0 Interpret federal, state and local laws as they apply to health care facilities and agencies. – The student will be able to:
  - 13.01 Cite federal, state and local institutional requirements governing the health care facility.
  - 13.02 List required standards and procedures for facility and staff.
  - 13.03 Identify mandatory requirements regarding environmental health and safety standards.
  - 13.04 Discuss the impact of legislative changes on health care facilities and staff.
  - 13.05 Identify the Florida Statutes as applied to health care facilities and health care workers.
  
- 14.0 Demonstrate knowledge of operational and organizational structures of health care facilities and agencies. – The student will be able to:
  - 14.01 Describe the functions and standards of departments in health care facilities.
  - 14.02 Contrast administrative roles and responsibilities in different types of health care agencies.
  - 14.03 Describe principles and philosophies of agencies that deliver health care services.
  - 14.04 Identify several basic principles of medical care.
  - 14.05 State communication techniques within the health care system.
  
- 15.0 Demonstrate knowledge of psychological problems among those who need health care and find acceptable solutions. – The student will be able to:
  - 15.01 Recognize the worth and dignity of each client.

- 15.02 Accept individual differences, characteristics, and behaviors.
- 15.03 Recognize the need for a satisfying and safe environment.
- 16.0 Demonstrate knowledge of materials and supplies needed to care for clients and how to obtain them for staff. – The student will be able to:
  - 16.01 Evaluate current inventory.
  - 16.02 Prepare purchase orders.
  - 16.03 Utilize sound buying practices.
- 17.0 Demonstrate knowledge of occupational safety and health for clients and employees. – The student will be able to:
  - 17.01 Prepare an evacuation plan.
  - 17.02 Plan and conduct fire drills.
  - 17.03 Inspect labels on hazardous or toxic substances.
  - 17.04 Provide appropriate storage for all substances.
  - 17.05 Conduct inservice for employees.
  - 17.06 Post notices required by OSHA (Occupational Safety and Health Administration).
  - 17.07 Implement appropriate Joint Commission patient safety goals.
- 18.0 Demonstrate knowledge of appropriate work-loads for each employee and knowledge of the amount of care each client requires. – The student will be able to:
  - 18.01 Prepare job descriptions.
  - 18.02 Participate in preparation of care plans.
  - 18.03 Compute staff hours required for total care on one unit.
  - 18.04 Identify factors which alter the amount of care needed and the number of staff hours required for different diagnoses.
- 19.0 Review, approve and monitor departmental capital and operational budgets. – The student will be able to:
  - 19.01 Develop a capital budget justification format.
  - 19.02 Prepare capital budgets.
  - 19.03 Analyze and approve appropriate capital budget items.
  - 19.04 Develop an operational budget format.
  - 19.05 Analyze and approve appropriate items.
- 20.0 Comply with accreditation standards. – The student will be able to:
  - 20.01 Develop policies and operational procedures to meet required standards.
  - 20.02 Implement procedures to meet required standards for health care facilities.
  - 20.03 Identify the required standards for health care personnel.
  - 20.04 Apply infection control techniques according to Center for Disease Control (CDC) guidelines.
  - 20.05 Establish liaison with appropriate accrediting organizations.

2011 - 2012

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Sports and Fitness  
**Career Cluster:** Health Science

	AS	AAS
CIP Number	1318103000	0318103000
Program Type	College Credit	College Credit
Standard Length	66 credit hours	66 credit hours
CTSO	HOSA	HOSA
SOC Codes (all applicable)	31-9099, 29-9091	31-9099, 29-9091
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>	
Perkins Technical Skill Attainment Inventory	<a href="http://www.fldoe.org/workforce/perkins/perkins_resources.asp">http://www.fldoe.org/workforce/perkins/perkins_resources.asp</a>	

### **Purpose**

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

The purpose of this program is to prepare students for the sport marketplace and its various components, i.e.: Sports Science, Sports Medicine, Coaching Methods, and Sport Specific Management. SOC Code 29-9091 (Athletic Trainer).

The content includes but is not limited to the applied aspect of leadership, and students are required to become knowledgeable of the current literature, both applied and research based, as well as practicums and internships. This degree provides individuals with the appropriate foundation for matriculation into a bachelor's degree program.

### **Program Structure**

This program is a planned sequence of instruction consisting of 66 credit hours.

### **Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these

occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

### **Special Notes**

This program meets the Department of Health HIV/AIDS Domestic Violence and Prevention of Medical Errors education requirements. Upon completion of this program, the instructor will provide a certificate to the student verifying that these requirements have been met.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635 F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

Concepts of the sport marketplace are included in the program so that students may function effectively in the American enterprise economic system.

A partnership program includes such business entities as USA Triathlon National Training Center, Diamond Players Club, Special Olympics – Florida, CFT / Summer Sports and Walt Disney World's Wide World of Sports. These partners provide internship opportunities, mentorship's, practicums, guest lecturers, adjunct professors, and lab resources. These partnerships allow students to develop the relevant skills needed for an occupation in the sports and fitness industry.

Outcomes 01-11 are referred to as the Health Careers Core and do not have to be completed if the student has previously completed the Core in another health science program. The CORE should be taken first or concurrently with the first course in the program. Following the successful completion of the core, the student is eligible to take the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

### **Career and Technical Student Organization (CTSO)**

Health Occupations Students of America, (HOSA) Inc. is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

## **Articulation**

This program has no statewide articulation agreement approved by the Articulation Coordinating Committee. However, this does not preclude the awarding of credits by any college through local agreements.

For details on statewide articulation agreements which correlate to programs and industry certifications, refer to [http://www.fldoe.org/workforce/dwdframe/artic\\_frame.asp](http://www.fldoe.org/workforce/dwdframe/artic_frame.asp).

## **Program Length**

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. The standard length of this program is 66 credit hours according to Rule 6A-14.030, F.A.C.

## **Standards**

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.
- 12.0 Identify and classify sports and fitness management activities.
- 13.0 Identify and classify management and human resource strategies.
- 14.0 Demonstrate a working knowledge of current and legal issues in sports.
- 15.0 Identify and describe fiscal and facility development
- 16.0 Identify and describe basic human anatomy and physiology.
- 17.0 Define, identify and describe a basic understanding of fitness and wellness concepts.
- 18.0 Classify and demonstrate competence and skill in the care and prevention of athletic injuries.
- 19.0 Identify and demonstrate basic uses of Microsoft Office.

2011 - 2012

**Program Length:** 66 credit hours  
**SOC Code(s):** 31-9099, 29-9091

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. At the completion of this program, the student will be able to:

**Health Careers Core: The Health Careers Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Careers Core or any other health occupations program do not have to repeat intended outcomes 01-11.**

01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:

- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
- 01.02 Identify common methods of payment for healthcare services.
- 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
- 01.04 Describe the composition and functions of a healthcare team.
- 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
- 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
- 01.07 Identify characteristics of effective teams.
- 01.08 Recognize methods for building positive team relationships.
- 01.09 Analyze attributes and attitudes of an effective leader.
- 01.10 Recognize factors and situations that may lead to conflict.
- 01.11 Demonstrate effective techniques for managing team conflict.
- 01.12 Describe factors that influence the current delivery system of healthcare.
- 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.

02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:

- 02.01 Develop basic speaking and active listening skills.
- 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
- 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
- 02.04 Respond to verbal and non-verbal cues.

- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.
- 02.06 Use appropriate medical terminology and abbreviations.
- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
- 02.08 Recognize the importance of patient/client educations regarding healthcare.
- 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
- 02.10 Analyze elements of communication using a sender-receiver model.
- 02.11 Distinguish between and report subjective and objective information.
- 02.12 Report relevant information in order of occurrence.

03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:

- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
- 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
- 03.03 Demonstrate procedures for accurate documentation and record keeping.
- 03.04 Interpret healthcare facility policy and procedures.
- 03.05 Explain the “Patient’s Bill of Rights”.
- 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
- 03.07 Describe advance directives.
- 03.08 Describe informed consent.
- 03.09 Explain the laws governing harassment, labor and employment.
- 03.10 Differentiate between legal and ethical issues in healthcare.
- 03.11 Describe a code of ethics consistent with the healthcare occupation.
- 03.12 Identify and compare personal, professional, and organizational ethics.
- 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
- 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
- 03.15 Recognize and report abuse including domestic violence and neglect.
- 03.16 Distinguish among the five schedules of controlled substances.

04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:

- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
- 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
- 04.03 Identify psychological reactions to illness including defense mechanisms.
- 04.04 Identify complementary and alternative health practices.
- 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
- 04.06 Explain the basic concepts of positive self image, wellness and stress.
- 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
- 04.08 Explain the nutrition pyramid.

- 04.09 Recognize the steps in the grief process.
- 05.0 Recognize and practice safety and security procedures. – The student will be able to:
  - 05.01 Recognize safe and unsafe working conditions and report safety hazards.
  - 05.02 Demonstrate the safe use of medical equipment.
  - 05.03 Explain and apply the theory of root- cause analysis
  - 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
  - 05.05 Identify and practice security procedures for medical supplies and equipment.
  - 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions.
  - 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
  - 05.08 Demonstrate proper body mechanics and ergonomics.
  - 05.09 Demonstrate the procedure for properly identifying patients.
  - 05.10 Demonstrate procedures for the safe transport and transfer of patients.
  - 05.11 Describe fire, safety, disaster and evacuations procedures.
  - 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )
- 06.0 Recognize and respond to emergency situations. – The student will be able to:
  - 06.01 Monitor and record vital signs.
  - 06.02 Describe legal parameters relating to the administration of emergency care.
  - 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
  - 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.
- 07.0 Recognize and practice infection control procedures. – The student will be able to:
  - 07.01 Define principles of infection control including standard and transmission based precautions.
  - 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
  - 07.03 Demonstrate knowledge of surgical asepsis.
  - 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.
- 08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:
  - 08.01 Describe technology applications in healthcare.
  - 08.02 Define terms and demonstrate basic computer skills.
  - 08.03 Recognize technology applications in healthcare.
  - 08.04 Interpret information from electronic medical documents.
  - 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.

09.0 Demonstrate employability skills. – The student will be able to:

- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.
- 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
- 09.03 Identify documents that may be required when applying for a job.
- 09.04 Write an appropriate resume.
- 09.05 Conduct a job search.
- 09.06 Complete a job application form correctly.
- 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
- 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
- 09.09 Identify acceptable work habits.
- 09.10 Recognize appropriate affective/professional behavior.
- 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).

10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:

- 10.01 Recognize emerging diseases and disorders
- 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
- 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
- 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
- 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
- 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.

11.0 Apply basic math and science skills. – The student will be able to:

- 11.01 Draw, read, and report on graphs, charts and tables.
- 11.02 Measure time, temperature, distance, capacity, and mass/weight.
- 11.03 Make, use and convert using both traditional and metric units.
- 11.04 Make estimations and approximations and judge the reasonableness of the result.
- 11.05 Convert from regular to 24 hour time.
- 11.06 Demonstrate ability to evaluate and draw conclusions.
- 11.07 Organize and communicate the results obtained by observation and experimentation.
- 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
- 11.09 Calculate ratios

**(12-19) OCP B Athletic Trainer-SOC Code 29-2001**

- 12.0 Identify and classify sports and fitness management activities. – The student will be able to:
- 12.01 Identify the role of the coach.
  - 12.02 Identify the formal organization of sport in the United States.
  - 12.03 Identify the formal organization of sport in the world on a global basis.
  - 12.04 Classify sports and fitness regulatory agencies.
  - 12.05 Classify the role of professional associations and conferences.
- 13.0 Identify and classify management and human resource strategies. – The student will be able to:
- 13.01 Identify management leadership styles.
  - 13.02 Identify the major functions of management.
  - 13.03 Classify activities as part of the planning function of management.
  - 13.04 Classify activities as part of the organizing function of management.
  - 13.05 Classify activities as part of the staffing function of management.
  - 13.06 Classify activities as part of the directing /controlling function of management.
  - 13.07 Select the most effective communication system.
  - 13.08 Demonstrate a knowledge of the relationship between authority and responsibility to task accomplishment.
- 14.0 Demonstrate a working knowledge of current and legal issues in sports. – The student will be able to:
- 14.01 Demonstrate an understanding of negligence and basic legal terms.
  - 14.02 Demonstrate an understanding of contract law.
  - 14.03 Demonstrate an understanding of labor law.
  - 14.04 Demonstrate an understanding of anti-trust law.
  - 14.05 Demonstrate an understanding of workers compensation law.
  - 14.06 Demonstrate an understanding of tort law.
  - 14.07 Demonstrate an understanding of disability laws
  - 14.08 Demonstrate an understanding of the athletic administrator's/coaches legal duties.
  - 14.09 Demonstrate an understanding of gender equity.
  - 14.10 Demonstrate an understanding of drug testing.
  - 14.11 Prepare outline and deliver a short oral presentation.
- 15.0 Identify and describe fiscal and facility development. —The student will be able to:
- 15.01 Identify various types of budgets.
  - 15.02 Identify sources of funding for high school / college athletics
  - 15.03 Identify components of a budget.
  - 15.04 Identify requisitions and purchase orders and their use.
  - 15.05 Describe the process of inventory control.
  - 15.06 Describe the importance of a market analysis for the construction of an athletic facility.
  - 15.07 Identify the individuals in groups in the planning process of construction.

- 15.08 Discuss the sources of funding for the construction of a facility.
- 16.0 Identify and describe basic human anatomy and physiology. – The student will be able to:
- 16.01 Identify directional terms referring to areas of the body.
  - 16.02 Describe the human skeleton form, including names and function of the bones.
  - 16.03 Describe the structure and function of the three types of muscles.
  - 16.04 Describe the anatomy of the human nervous system and its functions.
  - 16.05 Describe the endocrine glands, including location and function.
  - 16.06 Discuss basic hematology, including composition of blood, Rh factor and clotting.
  - 16.07 Discuss how the immune system functions.
  - 16.08 Describe the anatomy of the lymphatic division and the vascular system.
  - 16.09 Describe the anatomy and physiology of the heart and its functions.
  - 16.10 Describe the human circulatory systems and its pathways.
  - 16.11 Describe the structure and function of the respiratory system.
  - 16.12 Describe and demonstrate cardio-pulmonary resuscitation and the Heimlich maneuver.
  - 16.13 Describe the anatomy of the human digestive system and absorption of foods
  - 16.14 Demonstrate an understanding of the anatomy of the urinary system and the physiology of the kidney.
  - 16.15 Describe the anatomy and physiology of the male and female reproductive systems.
- 17.0 Define, identify and describe basic fitness and wellness concepts. – The students will be able to:
- 17.01 Classify health fitness standards, including components of wellness.
  - 17.02 Identify lifestyle factors that improve health and increase longevity.
  - 17.03 Identify risk factors that may interfere with safe participation in exercise.
  - 17.04 Define basic nutrition and describe its relationship to health and wellness.
  - 17.05 Discuss the national Dietary Guidelines for Americans.
  - 17.06 Define body composition and its relationship to assessment of recommended body weight.
  - 17.07 Identify various techniques used to assess body composition.
  - 17.08 Describe the physiology of weight loss.
  - 17.09 Identify the Roll of a Lifetime exercise program as related to weight loss.
  - 17.10 Define cardio-respiratory endurance and the benefits of cardio-respiratory endurance training.
  - 17.11 Define aerobic and anaerobic exercise.
  - 17.12 Define and identify the principles that govern cardio-respiratory exercise prescription: intensity, mode, duration, and frequency.
  - 17.13 Define muscular strength and muscular endurance.
  - 17.14 Define and understand muscular flexibility.
  - 17.15 Define and understand the role of stress in maintaining health performance.
  - 17.16 Define and understand the major risk factors that lead to coronary heart disease.
  - 17.17 Discuss the health effects of tobacco use.
  - 17.18 Define and understand the benefits of a smoking=cessation program.
  - 17.19 Describe the relationship between fitness and aging.
  - 17.20 Define and understand actors on how to select appropriate exercise and health/fitness clubs.

18.0 Classify and demonstrate competence and skill in the care and prevention of athletic injuries. – The student will be able to:

- 18.01 Demonstrate skills necessary to recognize the causes and preventative measures associated with
- 18.02 Discuss selection and use of appropriate treatment modalities for athletic injuries.
- 18.03 Identify acceptable selection and usage of rehabilitation and reconditioning techniques.
- 18.04 Demonstrate knowledge and understanding of care and prevention of athletic injuries.
- 18.05 Demonstrate basic taping and strapping techniques.
- 18.06 Demonstrate application of standard first aid.
- 18.07 Classify appropriate use of protective equipment.
- 18.08 Identify and role and importance of a certified athletic trainer.

19.0 Identify and demonstrate basic uses of Microsoft Office. ---The students will be able to:

- 19.01 Describe essential computer hardware and software concepts.
- 19.02 Demonstrate the fundamentals of using Microsoft Office Software.
- 19.03 Demonstrate basic application of Microsoft Office 2000, including Word, Excel, Access and PowerPoint.
- 19.04 Identify and demonstrate a word document using Word 2000, including creating a research paper.
- 19.05 Identify and demonstrate a worksheet using Excel 2000.
- 19.06 Identify and demonstrate a database using Access 2000.
- 19.07 Identify and demonstrate a design template to create a presentation slide show using PowerPoint 2000.
- 19.08 Identify and demonstrate an informational schedule, including appointments, events and contacts using Outlook 2000.

2011 - 2012

**Florida Department of Education  
Curriculum Framework**

**Program Title:**        **Nursing (Associates Degree) R.N.**  
**Career Cluster:**      **Health Science**

	<b>AS</b>	<b>AAS</b>
CIP Number	1318110100	0318110100
Program Type	College Credit	College Credit
Standard Length	72 Credits Hours	72 Credit Hours
CTSO	HOSA	HOSA
SOC Codes (all applicable)	31-9099, 29-1111	31-9099, 29-1111
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>	
Perkins Technical Skill Attainment Inventory	<a href="http://www.fldoe.org/workforce/perkins/perkins_resources.asp">http://www.fldoe.org/workforce/perkins/perkins_resources.asp</a>	

### **Purpose**

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

The purpose of this program is to prepare students for employment as registered nurses SOC Code 29.1111 (Registered Nurses). The Health Careers Core must be taken by all students (secondary and postsecondary adult) planning to complete any Health Occupations program. Once successfully completed, the core does not need to be repeated at any instructional level.

The content includes, but is not limited to, theoretical instruction and clinical experience in medical, surgical, obstetric, pediatric, and geriatric nursing; theoretical instruction and clinical experience in acute, care, long term care and community settings; theoretical instruction and clinical application of vocational role and function; personal, family and community health concepts; nutrition; human growth and development over the life span; body structure and function; interpersonal relationship skills, mental health concepts; pharmacology and administration of medications; legal aspects of practice; and current issues in nursing. Clinical experience must make up or least 50% of the total program. Clinical Simulation may be used for no more than 25% of the total clinical experience.

Associate degree nurses (ADN) are prepared to provide nursing care to clients in a variety of settings. ADN graduates are eligible to take the National Council Licensing Examination (NCLEX-RN) which tests minimum competence to practice safe nursing care.

Reinforcement of basic skills in English, mathematics, and sciences appropriate for the job preparatory programs occurs through didactic instruction and applied laboratory procedures or practice.

The location of the ADN program within the community college setting provides an appropriate academic environment for instruction in the biological, physical, social, and behavioral sciences. The community college setting further provides instruction in the communication skills basic to the successful performance of the ADN graduate in the work setting. This body of knowledge supports concepts specific to the practice of nursing.

This program focuses on broad, transferable skills and stresses understanding and demonstration of the following elements of the health care industry; planning, management, and community issues and health, safety, and environmental issues.

### **Program Structure**

This program is a planned sequence of instruction consisting of 72 credit hours.

### **Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

Clinical instruction of nursing students will meet the **requirements of** Florida Statute 464.019.

### **Special Notes**

This program meets the Department of Health HIV/AIDS Domestic Violence and Prevention of Medical Errors education requirements. Upon completion of this program, the instructor will provide a certificate to the student verifying that these requirements have been met.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635 F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

Please refer to Florida Statute 464.019 (1) (b) for faculty credential requirements to teach this program.

The program must be approved by the Florida Board of Nursing. It is important that each associate degree nursing program effectively utilize the services of an active program advisory committee composed of individuals' representative of the community. Only when the educators and employers work together can the associate degree nursing graduate be provided the competencies that are most needed for successful employment as a new registered nurse.

The Human Patient Simulator (HPS) may be used for a limited number of clinical hours with prior approval from the Florida Board of Nursing.

Outcomes 01-11 are referred to as the Health Careers Core and do not have to be completed if the student has previously completed the Core in another health science program. The CORE should be taken first or concurrently with the first course in the program. Following the successful completion of the core, the student is eligible to take the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

### **Career and Technical Student Organization (CTSO)**

The Health Occupations Students of America, Inc. is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

### **Articulation**

To be transferable statewide between institutions, this program must have been reviewed, and a "transfer value" assigned the curriculum content by the appropriate Statewide Course Numbering System discipline committee. This does not preclude institutions from developing specific articulation agreements with each other.

The following PSAV programs articulate credit into this degree program. These statewide articulation agreements have been approved by the Articulation Coordinating Committee.

Practical Nursing – CIP# 0317.060500– 10 credits

For details on existing articulation agreements, refer to [http://www.fldoe.org/workforce/dwdframe/artic\\_frame.asp](http://www.fldoe.org/workforce/dwdframe/artic_frame.asp).

### **Program Length**

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. The standard length of this program is 72 credit hours according to Rule 6A-14.030, F.A.C.

### **Standards**

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.
- 12.0 Demonstrate competencies in the core components of professional nursing-professional behavior
- 13.0 Demonstrate competencies in the core components of professional nursing-communication
- 14.0 Demonstrate competencies in the core components of professional nursing-assessment
- 15.0 Demonstrate competencies in the core components of the professional nurse-clinical decision making
- 16.0 Demonstrate competencies in the core components of professional nursing-caring intervention
- 17.0 Demonstrate competencies in the core components of professional nursing- teaching and learning
- 18.0 Demonstrate competencies in the core components of professional nursing-collaboration
- 19.0 Demonstrate competencies in the core components of professional nursing-managing care

2011 - 2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Registered Nurse  
**CIP Numbers:** 0318110100 AS; 1318110100 AAS  
**Program Length:** 72 credit hours  
**SOC Code(s):** 31-9099; 29-1111

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS.

**Health Careers Core: The Health Careers Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Careers Core or any other health occupations program do not have to repeat intended outcomes 01-11.**

At the completion of this program, the student will be able to:

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:
- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
  - 01.02 Identify common methods of payment for healthcare services.
  - 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
  - 01.04 Describe the composition and functions of a healthcare team.
  - 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
  - 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
  - 01.07 Identify characteristics of effective teams.
  - 01.08 Recognize methods for building positive team relationships.
  - 01.09 Analyze attributes and attitudes of an effective leader.
  - 01.10 Recognize factors and situations that may lead to conflict.
  - 01.11 Demonstrate effective techniques for managing team conflict.
  - 01.12 Describe factors that influence the current delivery system of healthcare.
  - 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:
- 02.01 Develop basic speaking and active listening skills.
  - 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
  - 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.

- 02.04 Respond to verbal and non-verbal cues.
- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.
- 02.06 Use appropriate medical terminology and abbreviations.
- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
- 02.08 Recognize the importance of patient/client educations regarding healthcare.
- 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
- 02.10 Analyze elements of communication using a sender-receiver model.
- 02.11 Distinguish between and report subjective and objective information.
- 02.12 Report relevant information in order of occurrence.

03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:

- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
- 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
- 03.03 Demonstrate procedures for accurate documentation and record keeping.
- 03.04 Interpret healthcare facility policy and procedures.
- 03.05 Explain the “Patient’s Bill of Rights”.
- 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
- 03.07 Describe advance directives.
- 03.08 Describe informed consent.
- 03.09 Explain the laws governing harassment, labor and employment.
- 03.10 Differentiate between legal and ethical issues in healthcare.
- 03.11 Describe a code of ethics consistent with the healthcare occupation.
- 03.12 Identify and compare personal, professional, and organizational ethics.
- 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
- 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
- 03.15 Recognize and report abuse including domestic violence and neglect.
- 03.16 Distinguish among the five schedules of controlled substances.

04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:

- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
- 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
- 04.03 Identify psychological reactions to illness including defense mechanisms.
- 04.04 Identify complementary and alternative health practices.
- 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
- 04.06 Explain the basic concepts of positive self image, wellness and stress.
- 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.

- 04.08 Explain the nutrition pyramid.
- 04.09 Recognize the steps in the grief process.
- 05.0 Recognize and practice safety and security procedures. – The student will be able to:
  - 05.01 Recognize safe and unsafe working conditions and report safety hazards.
  - 05.02 Demonstrate the safe use of medical equipment.
  - 05.03 Explain and apply the theory of root- cause analysis
  - 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
  - 05.05 Identify and practice security procedures for medical supplies and equipment.
  - 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions.
  - 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
  - 05.08 Demonstrate proper body mechanics and ergonomics.
  - 05.09 Demonstrate the procedure for properly identifying patients.
  - 05.10 Demonstrate procedures for the safe transport and transfer of patients.
  - 05.11 Describe fire, safety, disaster and evacuations procedures.
  - 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )
- 06.0 Recognize and respond to emergency situations. – The student will be able to:
  - 06.01 Monitor and record vital signs.
  - 06.02 Describe legal parameters relating to the administration of emergency care.
  - 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
  - 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.
- 07.0 Recognize and practice infection control procedures. – The student will be able to:
  - 07.01 Define principles of infection control including standard and transmission based precautions.
  - 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
  - 07.03 Demonstrate knowledge of surgical asepsis.
  - 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.
- 08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:
  - 08.01 Describe technology applications in healthcare.
  - 08.02 Define terms and demonstrate basic computer skills.
  - 08.03 Recognize technology applications in healthcare.
  - 08.04 Interpret information from electronic medical documents.
  - 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.

09.0 Demonstrate employability skills. – The student will be able to:

- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.
- 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
- 09.03 Identify documents that may be required when applying for a job.
- 09.04 Write an appropriate resume.
- 09.05 Conduct a job search.
- 09.06 Complete a job application form correctly.
- 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
- 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
- 09.09 Identify acceptable work habits.
- 09.10 Recognize appropriate affective/professional behavior.
- 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).

10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:

- 10.01 Recognize emerging diseases and disorders
- 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
- 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
- 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
- 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
- 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.

11.0 Apply basic math and science skills. – The student will be able to:

- 11.01 Draw, read, and report on graphs, charts and tables.
- 11.02 Measure time, temperature, distance, capacity, and mass/weight.
- 11.03 Make, use and convert using both traditional and metric units.
- 11.04 Make estimations and approximations and judge the reasonableness of the result.
- 11.05 Convert from regular to 24 hour time.
- 11.06 Demonstrate ability to evaluate and draw conclusions.
- 11.07 Organize and communicate the results obtained by observation and experimentation.
- 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.

11.09 Calculate ratios.

**Associate Degree Nursing: Intended outcomes 12-18 complete the occupational exit of Associate Degree Nurse. Inherent within these intended outcomes is the utilization and application of the nursing process (assessment, diagnosis, planning, implementation, and evaluation) across the life span and in diverse settings within the health continuum.**

### Registered Nurse

12.0 Demonstrate competencies in the core components of professional nursing-professional behaviors.--The student will be able to:

- 12.01 Practice within the ethical, legal and regulatory frameworks of nursing and standards of professional nursing practice.
- 12.02 Report unsafe practices of healthcare providers using appropriate channels of communication.
- 12.03 Demonstrate accountability for nursing care given by self and or delegated to others.
- 12.04 Use standards of nursing practice to perform and evaluate client care.
- 12.05 Advocate for client rights.
- 12.06 Maintain organizational and client confidentiality.
- 12.07 Practice within the parameters of individual knowledge and experience.
- 12.08 Describe political processes as the processes affect agency specific health care.
- 12.09 Participate as a member of professional organizations.
- 12.10 Serve as a professional role model within healthcare settings and the community at large.
- 12.11 Recognize the impact of political, social, and demographic forces on the delivery of health care.
- 12.12 Participate in lifelong learning.
- 12.13 Develop and implement a plan to meet self learning needs.
- 12.14 Delineate and maintain appropriate professional boundaries in the nurse-client relationship.

13.0 Demonstrate competencies in the core components of professional nursing-communication.--The student will be able to:

- 13.01 Utilize therapeutic communication skills when interacting with clients and significant support person(s).
- 13.02 Communicate relevant, accurate and complete information in a concise and clear manner.
- 13.03 Report and document assessments, interventions and progress toward client outcomes.
- 13.04 Utilize information technology to support and communicate the planning and provision of client care.
- 13.05 Utilize appropriate channels of communication to achieve positive client outcomes.

14.0 Demonstrate competencies in the core components of the professional nurse-assessment.--The student will be able to:

- 14.01 Assess the interaction patterns of the individual client or significant support person(s).
  - 14.02 Assess the developmental, emotional, cultural, religious and spiritual influences on the client's health status.
  - 14.03 Assess the client's health status by completing a health history and performing a physical, cognitive, psychosocial and functional assessment.
  - 14.04 Assess client and significant support person(s) for learning strengths, capabilities, barriers and educational needs.
  - 14.05 Assess the client's response to actual and potential health problems.
  - 14.06 Assess the client's response to interventions.
  - 14.07 Assess the client for changes in health status and identified needs.
  - 14.08 Assess the client's ability to access available community resources.
  - 14.09 Assess the environment for factors that may impact the client's health status.
  - 14.10 Assess the strengths, resources and needs of clients within the context of the community.
- 15.0 Demonstrate competencies in the core components of the professional nurse-clinical decision making.--The student will be able to:
- 15.01 Make clinical judgements and management decisions to ensure accurate and safe care.
  - 15.02 Analyze and utilize assessment and reassessment data to plan care.
  - 15.03 Evaluate the effectiveness of care provided in meeting client outcomes.
  - 15.04 Modify client care as indicated by the evaluation of outcomes.
  - 15.05 Participate in problem identification and data collection for research, quality control or improvement processes to meet client outcomes.
  - 15.06 Use evidence-based information collected electronically or through other means to support clinical decision making.
- 16.0 Demonstrate competencies in the core components of the professional nurse-caring interventions.--The student will be able to:
- 16.01 Protect and promote the client's dignity.
  - 16.02 Identify and honor the emotional, cultural, religious and spiritual influences on the client's health.
  - 16.03 Demonstrate caring behavior towards the client, significant support person(s), peers and other members of the healthcare team.
  - 16.04 Provide accurate and safe nursing care in diverse settings.
  - 16.05 Implement the prescribed care regimen for management of clients with obstetric, pediatric, medical, surgical, or psychiatric problems within the legal and ethical and regulatory framework of nursing practice.
  - 16.06 Perform nursing skills competently to include, but not limited to: medical technology, information management, nutrition and diet therapy, elimination needs, rehabilitation, asepsis, emergency interventions, medication administration, obstetric care, pre and post-operative care, fluid and electrolyte management, , activities of daily living, mobility, cardio-respiratory management, psychiatric interventions.
  - 16.07 Provide a safe physical and psychosocial environment.
  - 16.08 Assist the client and significant support person(s) to cope with and adapt to stressful events and changes in health status, including healthcare and end of life decision-making.

- 16.09 Assist the client to achieve optimum comfort and functioning, including the pharmacological management of pain and the promotion of sleep.
  - 16.10 Prepare the client and significant support person(s) for intervention, treatment modalities and self-care.
  - 16.11 Support the client and significant support person(s) when making healthcare and end of life decisions.
  - 16.12 Adapt care in consideration of the client's values, customs, culture and/or habits.
  - 16.13 Implement appropriate Joint Commission patient safety goals.
- 17.0 Demonstrate competencies in the core components of the professional nurse-teaching and learning.--The student will be able to:
- 17.01 Develop an individualized teaching plan based on assessed needs.
  - 17.02 Provide the client and significant support person(s) with the information to make choices regarding health.
  - 17.03 Teach the client and significant support person(s) the information and skills needed to achieve the desired learning outcomes.
  - 17.04 Evaluate the progress of the client and significant support person(s) toward achievement of the identified learning outcomes.
  - 17.05 Modify the teaching plan based on evaluation of progress toward meeting the learning outcomes.
  - 17.06 Provide assistive personnel with relevant instruction to support achievement of client outcomes.
- 18.0 Demonstrate competencies in the core components of the professional nurse-collaboration.--The student will be able to:
- 18.01 Work cooperatively with others to achieve client and organizational outcomes.
  - 18.02 Collaborate with the client, significant support person(s), and other members of the health care team to evaluate progress toward achievement of outcomes.
  - 18.03 Interact creatively and openly with others to solve problems to achieve client goals and outcomes.
  - 18.04 Collaborate to bring about fair solutions that balance differing need, values and motivations for the purpose of achieving positive client outcomes.
- 19.0 Demonstrate competencies in the core components of the professional nurse-managing care.--The student will be able to:
- 19.01 Prioritize client care.
  - 19.02 Coordinate the implementation of an individualized plan of care for clients and significant support person(s).
  - 19.03 Facilitate the continuity of care within and across healthcare settings.
  - 19.04 Adapt provision of client care to changing healthcare settings and management systems.
  - 19.05 Assist the client and significant support person(s) to access available resources and services.
  - 19.06 Demonstrate competence with current technologies.
- 20.0 Demonstrate competencies in the core components of the professional nurse leadership and delegation.--The student will be able to:

- 20.01 Describe the components of leadership.
- 20.02 Contrast leadership and management.
- 20.03 Describe the qualities of an effective leader.
- 20.04 Recognize the importance of followership and relationship building as a key component in the development of leadership skills.
- 20.05 Describe skills necessary for effective leadership of an interdisciplinary team.
- 20.06 Delegate aspects of client care to qualified assistive personnel.
- 20.07 Supervise and evaluate the activities of assistive personnel.
- 20.08 Communicate effectively with all members of the health care team.
- 20.09 Use a coaching/collaborative approach in leading a team.
- 20.10 Coordinate the decision making process with the client, significant support person(s), and other members of the health care team.
- 20.11 Implement nursing strategies that support efficient and cost effective care.
- 20.12 Describe how a leader utilizes research for evidence-based practice effecting positive client outcomes.
- 20.13 Describe the leader's role in the accreditation process.
- 20.14 Employ effective conflict resolution strategies that promote a healthy work environment.

2011 - 2012

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Midwifery  
**Career Cluster:** Health Science

	AS	AAS
CIP Number	1318110300	0318110300
Program Type	College Credit	College Credit
Standard Length	90 credit hours	90 credit hours
CTSO	HOSA	HOSA
SOC Codes (all applicable)	31-9099, 29-1111	31-9099, 29-1111
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>	
Perkins Technical Skill Attainment Inventory	<a href="http://www.fldoe.org/workforce/perkins/perkins_resources.asp">http://www.fldoe.org/workforce/perkins/perkins_resources.asp</a>	

### Purpose

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

This program is designed to prepare students for employment as licensed midwives SOC Code-29-1111 (Registered Nurses) or to provide supplemental training for persons previously or currently employed in this occupation. The Health Careers Core must be taken by all students (secondary, postsecondary adult and postsecondary vocational) planning to complete any Health Occupations program. Once successfully completed, the core does not need to be repeated at any instructional level.

The content includes but is not limited to all aspects of prenatal, intrapartal, and post-partal care, including obstetrics; neonatal pediatrics; basic sciences; female reproductive anatomy and physiology; behavioral sciences; childbirth education; community care; epidemiology; genetics; embryology; neonatology; applied pharmacology; the medical and legal aspects of midwifery; gynecology and women's health; family planning; nutrition during pregnancy and lactation; breast feeding and basic nursing skills.

### Program Structure

This program is a planned sequence of instruction consisting of 90 credit hours.

## Laboratory Activities

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

## Special Notes

This program meets the Department of Health HIV/AIDS Domestic Violence and Prevention of Medical Errors education requirements. Upon completion of this program, the instructor will provide a certificate to the student verifying that these requirements have been met.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635 F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

Licensed midwives are prepared to provide care for mothers who are expected to have a normal pregnancy, labor, and delivery. Midwifery graduates from approved programs are eligible to take an examination testing proficiency in the core competencies required to practice midwifery as specified in FS 553 - 467.009 CH. 92-179.

### Training Requirements (FS 467.009 and Rule CH. 10 D 36)

An approved midwifery program shall include a course of study and clinical practice for a minimum of 3 years. If the applicant is a registered nurse or a licensed practical nurse or has previous nursing education or practical midwifery education experience, the required period of training may be reduced to the extent of the applicant's qualifications. In no case shall the training be reduced to a period of less than two (2) years.

This program focuses on broad, transferable skills and stresses understanding and demonstration of the following elements of the health care industry; planning, management, finance, technical and production skills, underlying principles of technology, labor issues, community issues and health, safety, and environmental issues.

The Health Careers Core must be taken by all students (secondary, postsecondary adult, and postsecondary vocational) planning to complete any Health Occupations program. Once successfully completed, the core does not need to be repeated at any instructional level.

Clinical Experience Rules: (467.009(4) F.S.)

- (1) A student midwife, during training, shall undertake (under the supervision of a preceptor) the care of 50 women in each of the prenatal, intrapartal, and postpartal periods [the same women need not be seen through all three periods].
- (2) The student midwife shall observe an additional 25 women in the intrapartal period before qualifying for a license.
- (3) The training shall be in hospitals, alternative birth settings or both with particular emphasis on learning to differentiate between low-risk pregnancies or high-risk pregnancies.

- (4) It shall be the responsibility of the program to obtain and maintain current contractual agreements with each agency utilized for student clinical training.

Students must take a licensing examination (FS 467.011). Minimal acceptable performance will be determined by The Department of Business and Professional Regulation. The program must be approved by the Agency for Health Care Administration.

Entering students who have completed the program 0317.060500, Practical Nursing or 0318.110100 Associate Degree Nursing or have obtained an RN through another program should be given appropriate advanced standing.

Outcomes 01-11 are referred to as the Health Careers Core and do not have to be completed if the student has previously completed the Core in another health science program. The CORE should be taken first or concurrently with the first course in the program. Following the successful completion of the core, the student is eligible to take the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

### **Career and Technical Student Organization (CTSO)**

Health Occupations Students of America, Inc. (HOSA) is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

### **Articulation**

This program has no statewide articulation agreement approved by the Articulation Coordinating Committee. However, this does not preclude the awarding of credits by any college through local agreements.

For details on statewide articulation agreements which correlate to programs and industry certifications, refer to [http://www.fldoe.org/workforce/dwdframe/artic\\_frame.asp](http://www.fldoe.org/workforce/dwdframe/artic_frame.asp).

## **Program Length**

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. The standard length of this program is 90 credit hours according to Rule 6A-14.030, F.A.C.

## **Standards**

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.
- 12.0 Recognize and utilize three aspects of midwifery management of care for pregnant women.
- 13.0 Assume responsibility for rendering antepartum care.
- 14.0 Assume responsibility for rendering intrapartum care.
- 15.0 Assume responsibility for rendering postpartum care.
- 16.0 Assume responsibility for rendering neonatal care.
- 17.0 Assumes responsibility for management of care of women seeking family planning and/or gynecologic service.
- 18.0 Demonstrate knowledge of the professional role and responsibilities of midwifery.
- 19.0 Demonstrate basic nursing/midwifery skills.

2011 - 2012

**Florida Department of Education  
Student Performance Standards**

**Program Title: Midwifery**  
**CIP Numbers: 1318110300 AS, 0318110300 AAS**  
**Program Length: 90 credit hours**  
**SOC Code(s): 31-9099, 29-1111**

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. At the completion of this program, the student will be able to:

**Health Careers Core: The Health Careers Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Careers Core or any other health occupations program do not have to repeat intended outcomes 01-11.**

01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:

- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
- 01.02 Identify common methods of payment for healthcare services.
- 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
- 01.04 Describe the composition and functions of a healthcare team.
- 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
- 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
- 01.07 Identify characteristics of effective teams.
- 01.08 Recognize methods for building positive team relationships.
- 01.09 Analyze attributes and attitudes of an effective leader.
- 01.10 Recognize factors and situations that may lead to conflict.
- 01.11 Demonstrate effective techniques for managing team conflict.
- 01.12 Describe factors that influence the current delivery system of healthcare.
- 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.

02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:

- 02.01 Develop basic speaking and active listening skills.
- 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
- 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
- 02.04 Respond to verbal and non-verbal cues.

- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.
- 02.06 Use appropriate medical terminology and abbreviations.
- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
- 02.08 Recognize the importance of patient/client educations regarding healthcare.
- 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
- 02.10 Analyze elements of communication using a sender-receiver model.
- 02.11 Distinguish between and report subjective and objective information.
- 02.12 Report relevant information in order of occurrence.

03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:

- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
- 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
- 03.03 Demonstrate procedures for accurate documentation and record keeping.
- 03.04 Interpret healthcare facility policy and procedures.
- 03.05 Explain the “Patient’s Bill of Rights”.
- 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
- 03.07 Describe advance directives.
- 03.08 Describe informed consent.
- 03.09 Explain the laws governing harassment, labor and employment.
- 03.10 Differentiate between legal and ethical issues in healthcare.
- 03.11 Describe a code of ethics consistent with the healthcare occupation.
- 03.12 Identify and compare personal, professional, and organizational ethics.
- 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
- 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
- 03.15 Recognize and report abuse including domestic violence and neglect.
- 03.16 Distinguish among the five schedules of controlled substances.

04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:

- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
- 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
- 04.03 Identify psychological reactions to illness including defense mechanisms.
- 04.04 Identify complementary and alternative health practices.
- 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
- 04.06 Explain the basic concepts of positive self image, wellness and stress.
- 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
- 04.08 Explain the nutrition pyramid.

- 04.09 Recognize the steps in the grief process.
- 05.0 Recognize and practice safety and security procedures. – The student will be able to:
  - 05.01 Recognize safe and unsafe working conditions and report safety hazards.
  - 05.02 Demonstrate the safe use of medical equipment.
  - 05.03 Explain and apply the theory of root- cause analysis
  - 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
  - 05.05 Identify and practice security procedures for medical supplies and equipment.
  - 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions.
  - 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
  - 05.08 Demonstrate proper body mechanics and ergonomics.
  - 05.09 Demonstrate the procedure for properly identifying patients.
  - 05.10 Demonstrate procedures for the safe transport and transfer of patients.
  - 05.11 Describe fire, safety, disaster and evacuations procedures.
  - 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )
- 06.0 Recognize and respond to emergency situations. – The student will be able to:
  - 06.01 Monitor and record vital signs.
  - 06.02 Describe legal parameters relating to the administration of emergency care.
  - 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
  - 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.
- 07.0 Recognize and practice infection control procedures. – The student will be able to:
  - 07.01 Define principles of infection control including standard and transmission based precautions.
  - 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
  - 07.03 Demonstrate knowledge of surgical asepsis.
  - 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.
- 08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:
  - 08.01 Describe technology applications in healthcare.
  - 08.02 Define terms and demonstrate basic computer skills.
  - 08.03 Recognize technology applications in healthcare.
  - 08.04 Interpret information from electronic medical documents.
  - 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.

09.0 Demonstrate employability skills. – The student will be able to:

- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.
- 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
- 09.03 Identify documents that may be required when applying for a job.
- 09.04 Write an appropriate resume.
- 09.05 Conduct a job search.
- 09.06 Complete a job application form correctly.
- 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
- 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
- 09.09 Identify acceptable work habits.
- 09.10 Recognize appropriate affective/professional behavior.
- 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).

10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:

- 10.01 Recognize emerging diseases and disorders
- 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
- 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
- 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
- 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
- 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.

11.0 Apply basic math and science skills. – The student will be able to:

- 11.01 Draw, read, and report on graphs, charts and tables.
- 11.02 Measure time, temperature, distance, capacity, and mass/weight.
- 11.03 Make, use and convert using both traditional and metric units.
- 11.04 Make estimations and approximations and judge the reasonableness of the result.
- 11.05 Convert from regular to 24 hour time.
- 11.06 Demonstrate ability to evaluate and draw conclusions.
- 11.07 Organize and communicate the results obtained by observation and experimentation.
- 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
- 11.09 Calculate ratios.

**Midwifery: Students completing this module achieve the occupational completion point of Midwife.**

- 12.0 Recognize & utilize three aspects of midwifery management of care for pregnant women. – The student will be able to:
- 12.01 Provide safe, effective basic health care monitoring, management, teaching and referral service for healthy women throughout the normal uncomplicated childbearing experience.
    - 12.01.01 Apply therapeutic communication techniques, including interviewing, counseling, and client teaching.
    - 12.01.02 Demonstrate basic physical assessment skills of observation, palpation, percussion, auscultation and measurement in collecting data describing current health status.
    - 12.01.03 Perform basic laboratory assessment, including hematocrit, hemoglobin, urine analysis, and vaginal/cervical smears.
  - 12.02 Interpret data to identify current and potential health problems and needs.
  - 12.03 Formulate a complete needs/problem list and establish health care goals in collaboration with the client and her family.
  - 12.04 Identify need for consultation or referral to appropriate members of the health care team in meeting health care goals.
  - 12.05 Provide information and support to enable clients to actively participate in their own health care management.
  - 12.06 Develop, implement and evaluate a comprehensive plan of care with the client based on supportive, scientific rationale.
  - 12.07 Identify those current or potential client problems requiring consultation, referral and/or co-management and obtain consultation promptly or plan and implement collaborative management with other providers.
  - 12.08 Utilize appropriate consultation, collaboration or referral for deviations from normal and potential complications.
  - 12.09 Establish a written protocol with a physician who maintains supervision for directing the specific course of medical treatment for the "at-risk" client.
  - 12.10 Refer and/or transfer care of the client when the need is identified for management outside the scope of the midwife's practice.
  - 12.11 Implement appropriate Joint Commission patient safety goals.
- 13.0 Assume responsibility for rendering antepartum care. – The student will be able to:
- 13.01 Utilize principles of basic sciences in rendering antepartum care.
  - 13.02 Provide basic health surveillance, anticipatory guidance and health teaching for healthy women experiencing normal, uncomplicated pregnancies.
  - 13.03 Determine pregnancy accurately by history, physical and laboratory findings.
  - 13.04 Assess the physical health status of the client, including preconceptual factors likely to influence this pregnancy.
  - 13.05 Assess the psychosocial status of the client and her support system.
  - 13.06 Identify social, cultural, environmental and occupational factors that influence the client's response to pregnancy and pregnancy related behaviors.
  - 13.07 Assess nutritional status and provide nutritional counseling.
  - 13.08 Differentiate between normal and pathologic adaptations to pregnancy, including hematologic changes and intervene appropriately.
  - 13.09 Identify risk factors requiring consultation and/or referral.

- 13.10 Demonstrate knowledge of pharmacokinetics in administration of medications commonly used in pregnancy.
  - 13.11 Identify current, potential and emergent problems and needs affecting pregnancy.
  - 13.12 Differentiate between normal physiologic pregnancy, common pregnancy-related discomforts, and pathologic disorders.
  - 13.13 Assist client in managing common minor pregnancy-related discomforts such as fatigue, nausea, heartburn, backache, leg cramps, vaginal discharge, and constipation.
  - 13.14 Provide anticipatory guidance regarding developmental tasks of childbearing, prepared childbirth, lactation/breastfeeding and parenthood.
  - 13.15 Assess fetal well-being, including intrauterine growth, fetal heart rate, and fetal movement through various methods such as fetal movement records, ultrasonography, NST, and OCT.
  - 13.16 Interpret assessment data accurately to determine client and fetal health status.
  - 13.17 Initiate consultation and/or referral as needed to safeguard health of the client and the fetus.
  - 13.18 Discuss options in childbearing sites and practitioners to facilitate client informed choice and consent.
  - 13.19 Refer client to appropriate community agencies, resources and educational referral services as needed.
- 14.0 Assume responsibility for rendering intrapartum care. – The student will be able to:
- 14.01 Utilize principles of the basic sciences in rendering intrapartum care.
  - 14.02 Describe the normal labor process, including mechanisms of labor and birth.
    - 14.02.01 Differentiate between Braxton Hicks contractions, preterm labor and prodromal labor.
    - 14.02.02 Assess frequency, duration, intensity of and interval between contractions.
    - 14.02.03 Identify the status of the membranes.
    - 14.02.04 Identify fetal presenting, position, and heart rate.
    - 14.02.05 Assess cervical effacement and dilation and station of the presenting part.
    - 14.02.06 Differentiate between bloody show and uterine/placental bleeding.
  - 14.03 Demonstrate knowledge of the fetal skull and its critical landmarks.
  - 14.04 Describe parameters and methods for assessing and managing the process of labor and delivery.
  - 14.05 Describe parameters and methods for assessing maternal and fetal status during the stages of labor.
  - 14.06 Demonstrate knowledge of the emotional changes during labor and delivery.
  - 14.07 Provide comfort and support during labor and delivery including non-pharmacologic pain management techniques.
  - 14.08 Describe and demonstrate techniques for spontaneous vaginal delivery and placental expulsion.
  - 14.09 Identify indicators of deviations from normal labor and delivery and utilize appropriate interventions.
  - 14.10 Assess and manage care of the perineum and surrounding tissues.
  - 14.11 Provide immediate care to the newborn, including assessment, maintaining a patent airway and managing thermal instability.

- 14.12 Demonstrate knowledge of pharmacokinetics and administration of medications commonly used during labor and birth.
  - 14.13 Explain the role and function of the midwife in relation to emergency management.
- 15.0 Assume responsibility for rendering postpartum care. – The student will be able to:
- 15.01 Demonstrate a knowledge of and utilize principles of the basic sciences in rendering postpartum care.
  - 15.02 Demonstrate a knowledge of anatomy and physiology of the puerperium.
  - 15.03 Describe involution, recognize indicators of deviation from normal, and utilize appropriate intervention.
  - 15.04 Teach methods of breast care and lactation to client utilizing anatomy and physiology of lactation.
  - 15.05 Identify the etiology, and manage discomforts of puerperium.
  - 15.06 Identify indicators of deviations from the normal puerperium and utilize appropriate intervention, including consultation and referral.
  - 15.07 Demonstrate knowledge of the pharmacokinetics and administration of medications commonly used during the puerperium.
  - 15.08 Describe the nutritional requirements of the postpartum period.
  - 15.09 Describe the purpose and process of completing and filing a birth certificate according to Florida law.
  - 15.10 Recognize and respond appropriately to the emotional and psychosocial changes during the puerperium.
  - 15.11 Provide anticipatory guidance regarding client self care, infant care, family planning and alterations in family roles and expectations.
  - 15.12 Describe and utilize appropriate screening/diagnostic tests during puerperium.
- 16.0 Assume responsibility for rendering neonatal care. – The student will be able to:
- 16.01 Demonstrate a knowledge and utilize principles of the basic sciences in rendering neonatal care.
  - 16.02 Manage the health care of the normal infant during the neonatal period and initiate consultation and referral as appropriate.
  - 16.03 Explain anatomical and physiological adaptation to extrauterine life and stabilization of the neonate.
  - 16.04 Facilitate adaptation to extra-uterine life including resuscitation and emergency care of the newborn.
  - 16.05 Assess neonatal status (physical, emotional and psychosocial).
  - 16.06 Recognize deviations from normal neonatal status and initiate appropriate intervention, management and/or referral.
  - 16.07 Describe the components of breast milk and formula, the nutritional needs of the neonate and relationship of feeding methods to physiological, immunological and psychological development.
  - 16.08 Demonstrate the pharmacokinetics and administration of medications and the treatments commonly used for the neonate.
  - 16.09 Describe the rationale and methodology for the common screening/diagnostic tests performed on the neonate and utilize those appropriate to scope of practice.
  - 16.10 Describe the factors influencing neonatal behavior and parental interaction and attachment.

- 16.11 Anticipate need for and provide appropriate guidance regarding infant care, breast feeding and family relationships, to include referral to community resources.
- 17.0 Assume responsibility for management of care of women seeking family planning and/or gynecologic service. – The student will be able to:
- 17.01 Demonstrate a knowledge of and utilize principles of the basic sciences in rendering family planning and/or gynecologic service.
  - 17.02 Explain anatomy and physiology of male and female reproductive systems throughout the life cycle.
  - 17.03 Explain anatomy, physiology and psychosocial components of human sexuality.
  - 17.04 Recognize and respond appropriately to indications of need for sexual counseling and/or referral.
  - 17.05 Provide counseling regarding general health promotion, as well as measures related to developmental changes throughout the life cycle.
  - 17.06 Describe rationale and methods for common gynecological and pregnancy screening and diagnostic tests, utilizing those appropriate to scope of practice.
  - 17.07 Describe factors relating to male and female barrier, steroidal, mechanical, chemical, physiologic and surgical conception control methods, including fertility awareness.
  - 17.08 Explain factors involved in decision making regarding unplanned or undesired pregnancies and resources for counseling and referral, including preconceptual counseling.
  - 17.09 Identify and describe deviations from normal status and provide appropriate preventive measures and/or interventions for selected pathology.
- 18.0 Demonstrate knowledge of the professional role and responsibilities of midwifery. – The student will be able to:
- 18.01 Describe the historical development and present status of midwifery in Florida, nationally, and internationally.
  - 18.02 Describe and practice within the laws, rules, regulations and public policies affecting midwifery practice including malpractice and litigation issues.
  - 18.03 Utilize codes and guidelines for ethical and professional behavior, including those set by state and national professional organizations.
  - 18.04 Describe the midwife's responsibility for ongoing self evaluation, participation in quality assurance and maintenance of currency in practice, including continuing education.
  - 18.05 Demonstrate understanding of various sites, styles and modes of practice within midwifery - the delivery of ethnic and culturally sensitive care.
  - 18.06 Promote health care as educator, client advocate, health care provider, social/political change agent and collaborator with other health team members.
  - 18.07 Explain the implications of HIV infection and seropositive tests in pregnancy, childbirth, lactation, child care and seroconversion among children of HIV positive parents.
- 19.0 Demonstrate basic nursing/midwifery skills. – The student will be able to:
- 19.01 Collect appropriate data base describing current health status, including complete history, physical and psychosocial assessment.

- 19.02 Obtain and interpret relevant laboratory data.
- 19.03 Promote and maintain a safe and therapeutic environment.
- 19.04 Implement and maintain medical and surgical asepsis.
- 19.05 Use proper body mechanics.
- 19.06 Recognize changes in a client's condition requiring intervention with basic safety measures, including emergency interventions as specified by statute/rule.
- 19.07 Administer and/or supervise complete hygienic care.
- 19.08 Perform comfort measures such as backrub, relaxation techniques, and diversional activities.
- 19.09 Assess nutritional status and utilize therapeutic principles of nutrition.
- 19.10 Assess client elimination needs and utilize therapeutic principles of elimination such as catheterization and enemas.
- 19.11 Prepare and administer medications as specified by statute/rule and assess client response.
- 19.12 Utilize appropriate medical terminology and abbreviations.
- 19.13 Chart and maintain client files.
- 19.14 Utilize problem solving skills and judgment in midwifery practice.

2011 - 2012

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Biotechnology Laboratory Technician  
**Career Cluster:** Health Science

	AS	AAS
CIP Number	1326061600	0326061600
Program Type	College Credit	College Credit
Standard Length	61 credit hours	61 credit hours
CTSO	HOSA	HOSA
SOC Codes (all applicable)	31-9099, 19-4021	31-9099, 19-4021
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>	
Perkins Technical Skill Attainment Inventory	<a href="http://www.fldoe.org/workforce/perkins/perkins_resources.asp">http://www.fldoe.org/workforce/perkins/perkins_resources.asp</a>	

### Purpose

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

This program is designed to prepare students for employment as Biotechnology Research Technicians, Biological Technicians (SOC Code 19-4021) or cell culture technicians or biotechnology manufacturing technician and/or to supply supplemental training for persons previously or currently employed in these occupation.

This program focuses on broad, transferable skills and stresses understanding and demonstration of the following elements of the health care industry; planning, management, finance, technical and production skills, underlying principles of technology, labor issues, community issues and health, safety, and environmental issues.

The content includes but is not limited to broad biology and chemistry concepts, algebraic and statistical analysis, basic microbiology concepts, biohazard and safety procedures, human anatomy and physiology or botany, core biotechnical laboratory techniques and industry workplace experience. It includes components designed to enhance critical thinking and technical communication skills.

## **Program Structure**

This program is a planned sequence of instruction consisting of 61 credit hours.

## **Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

## **Special Notes**

This program meets the Department of Health HIV/AIDS Domestic Violence and Prevention of Medical Errors education requirements. Upon completion of this program, the instructor will provide a certificate to the student verifying that these requirements have been met.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635 F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

Outcomes 01-11 are referred to as the Health Careers Core and do not have to be completed if the student has previously completed the Core in another health science program. The Core should be taken first or concurrently with the first course in the program. Following the successful completion of the core, the student is eligible to take the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

## **Career and Technical Student Organization (CTSO)**

Health Occupations Students of America, Inc. (HOSA) is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

## **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

## **Articulation**

This program has no statewide articulation agreement approved by the Articulation Coordinating Committee. However, this does not preclude the awarding of credits by any college through local agreements.

For details on statewide articulation agreements which correlate to programs and industry certifications, refer to [http://www.fldoe.org/workforce/dwdframe/artic\\_frame.asp](http://www.fldoe.org/workforce/dwdframe/artic_frame.asp).

## **Program Length**

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. The standard length of this program is 61 credit hours according to Rule 6A-14.030, F.A.C.

## **Standards**

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.
- 12.0 Demonstrate communication skills.
- 13.0 Demonstrate safety skills.
- 14.0 Demonstrate basic laboratory skills.
- 15.0 Demonstrate regulatory compliance.
- 16.0 Demonstrate appropriate decision making and problem solving techniques.
- 17.0 Demonstrate specific laboratory skills.
- 18.0 Demonstrate quality assurance/control.
- 19.0 Maintain facility & equipment
- 20.0 Demonstrate proper care/use of test animals/plants

2011 - 2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Biotechnology Laboratory Technician  
**CIP Numbers:** 1326061600 AS, 0326061600 AAS  
**Program Length:** 61 credit hours  
**SOC Code(s):** 31-9099, 19-4021

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. At the completion of this program, the student will be able to:

**Health Careers Core: The Health Careers Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Careers Core or any other health occupations program do not have to repeat intended outcomes 01-11.**

01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:

- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
- 01.02 Identify common methods of payment for healthcare services.
- 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
- 01.04 Describe the composition and functions of a healthcare team.
- 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
- 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
- 01.07 Identify characteristics of effective teams.
- 01.08 Recognize methods for building positive team relationships.
- 01.09 Analyze attributes and attitudes of an effective leader.
- 01.10 Recognize factors and situations that may lead to conflict.
- 01.11 Demonstrate effective techniques for managing team conflict.
- 01.12 Describe factors that influence the current delivery system of healthcare.
- 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.

02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:

- 02.01 Develop basic speaking and active listening skills.
- 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
- 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
- 02.04 Respond to verbal and non-verbal cues.

- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.
- 02.06 Use appropriate medical terminology and abbreviations.
- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
- 02.08 Recognize the importance of patient/client educations regarding healthcare.
- 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
- 02.10 Analyze elements of communication using a sender-receiver model.
- 02.11 Distinguish between and report subjective and objective information.
- 02.12 Report relevant information in order of occurrence.

03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:

- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
- 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
- 03.03 Demonstrate procedures for accurate documentation and record keeping.
- 03.04 Interpret healthcare facility policy and procedures.
- 03.05 Explain the “Patient’s Bill of Rights”.
- 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
- 03.07 Describe advance directives.
- 03.08 Describe informed consent.
- 03.09 Explain the laws governing harassment, labor and employment.
- 03.10 Differentiate between legal and ethical issues in healthcare.
- 03.11 Describe a code of ethics consistent with the healthcare occupation.
- 03.12 Identify and compare personal, professional, and organizational ethics.
- 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
- 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
- 03.15 Recognize and report abuse including domestic violence and neglect.
- 03.16 Distinguish among the five schedules of controlled substances.

04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:

- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
- 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
- 04.03 Identify psychological reactions to illness including defense mechanisms.
- 04.04 Identify complementary and alternative health practices.
- 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
- 04.06 Explain the basic concepts of positive self image, wellness and stress.
- 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
- 04.08 Explain the nutrition pyramid.

- 04.09 Recognize the steps in the grief process.
- 05.0 Recognize and practice safety and security procedures. – The student will be able to:
  - 05.01 Recognize safe and unsafe working conditions and report safety hazards.
  - 05.02 Demonstrate the safe use of medical equipment.
  - 05.03 Explain and apply the theory of root- cause analysis
  - 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
  - 05.05 Identify and practice security procedures for medical supplies and equipment.
  - 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions.
  - 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
  - 05.08 Demonstrate proper body mechanics and ergonomics.
  - 05.09 Demonstrate the procedure for properly identifying patients.
  - 05.10 Demonstrate procedures for the safe transport and transfer of patients.
  - 05.11 Describe fire, safety, disaster and evacuations procedures.
  - 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )
- 06.0 Recognize and respond to emergency situations. – The student will be able to:
  - 06.01 Monitor and record vital signs.
  - 06.02 Describe legal parameters relating to the administration of emergency care.
  - 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
  - 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.
- 07.0 Recognize and practice infection control procedures. – The student will be able to:
  - 07.01 Define principles of infection control including standard and transmission based precautions.
  - 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
  - 07.03 Demonstrate knowledge of surgical asepsis.
  - 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.
- 08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:
  - 08.01 Describe technology applications in healthcare.
  - 08.02 Define terms and demonstrate basic computer skills.
  - 08.03 Recognize technology applications in healthcare.
  - 08.04 Interpret information from electronic medical documents.
  - 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.

09.0 Demonstrate employability skills. – The student will be able to:

- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.
- 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
- 09.03 Identify documents that may be required when applying for a job.
- 09.04 Write an appropriate resume.
- 09.05 Conduct a job search.
- 09.06 Complete a job application form correctly.
- 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
- 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
- 09.09 Identify acceptable work habits.
- 09.10 Recognize appropriate affective/professional behavior.
- 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).

10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:

- 10.01 Recognize emerging diseases and disorders
- 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
- 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
- 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
- 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
- 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.

11.0 Apply basic math and science skills. – The student will be able to:

- 11.01 Draw, read, and report on graphs, charts and tables.
- 11.02 Measure time, temperature, distance, capacity, and mass/weight.
- 11.03 Make, use and convert using both traditional and metric units.
- 11.04 Make estimations and approximations and judge the reasonableness of the result.
- 11.05 Convert from regular to 24 hour time.
- 11.06 Demonstrate ability to evaluate and draw conclusions.
- 11.07 Organize and communicate the results obtained by observation and experimentation.
- 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
- 11.09 Calculate ratios

## **Biotechnology Laboratory Technology**

- 12.0 Demonstrate communication skills. – The student will be able to:
- 12.01 Make professional oral & written presentations.
  - 12.02 Comprehend and use correct technical vocabulary.
  - 12.03 Follow/analyze protocol.
  - 12.04 Keep accurate records.
  - 12.05 Take notes on procedures.
  - 12.06 Prepare identify & apply changes to control procedures.
  - 12.07 Write or update manuals, SOP's protocols, reports and technical summaries.
  - 12.08 Perform computerized research and web searches.
  - 12.09 Read technical literature.
  - 12.10 Identify basic reference resources in biotechnology.
  - 12.11 Perform basic applications in word processing, spread sheets, databases, presentations and project management.
  - 12.12 Navigate the internet.
- 13.0 Demonstrate safety skills. – The student will be able to:
- 13.01 Identify first aid supplies, co-worker contact, medical information, and emergency protection and evacuation plan.
  - 13.02 Follow correct safety procedures, guidelines and chemical hygiene plans.
  - 13.03 Maintain required safety training.
  - 13.04 Maintain a safe work area.
  - 13.05 Maintain and utilize safety equipment & personal protection equipment.
  - 13.06 Check expiration dates, lot numbers & labels for hazards.
  - 13.07 Monitor usage and exposure of radioisotopes, & biohazards.
  - 13.08 Handle, store and dispose of hazardous materials per MSDS, other safety guidelines & Worker Protection Standards (WPS).
  - 13.09 Follow universal precautions for biological pathogens.
  - 13.10 Store chemicals and biologicals according to storage guidelines.
  - 13.11 Implement appropriate Joint Commission patient safety goals.
- 14.0 Demonstrate basic laboratory skills. – The student will be able to:
- 14.01 Obtain and read protocol, test procedure, standard operating procedure (SOP) & proper forms.
  - 14.02 Prioritize & perform multiple tasks in a timely manner.
  - 14.03 Clean, organize and sterilize materials, when required.
  - 14.04 Check and maintain equipment, logs & perform preventative maintenance tasks according to schedule.
  - 14.05 Order inventory of supplies; date/label reagents.
  - 14.06 Practice aseptic technique.
  - 14.07 Use titration/pipetting techniques; measure volume/weights.
  - 14.08 Perform basic calculations and statistical analysis.
  - 14.09 Calculate and prepare dilutions series.
  - 14.10 Prepare solutions and reagents for laboratory use.
  - 14.11 Monitor physical properties of reagents, buffers, media & solutions & determine optimum conditions for use.
  - 14.12 Obtain and review appropriate procedures & test forms.

- 14.13 Collect and set up samples for analysis.
  - 14.14 Set up general laboratory tests, including, setup equipment & perform/document tests and results.
  - 14.15 Operate the following (but not limited to) equipment: Thermocycloer, microscopes, fluorimeter, hoods, centrifuge, polarimeter, pH meter, chart recorder, stirrers, balance, conductivity meter, mixers, autoclave, power supply, shakers, dry heat ovens, incubator, Bunsen burner, scintillation counter, high pressure liquid chromatography, gas chromatography/mass spectrometry.
- 15.0 Demonstrate regulatory compliance. – The student will be able to:
- 15.01 Follow the guidelines from the following agencies: FDA, OSHA, USDA, NIH, NR, DOT, EPA, CDC & NRC.
  - 15.02 Accept state, local and industry regulations.
  - 15.03 Perform manufacturing using current good manufacturing practices.
- 16.0 Demonstrate appropriate decision making and problem solving techniques. – The student will be able to:
- 16.01 Identify decision to be made and compare alternatives.
  - 16.02 Apply decision making skills in the workplace.
  - 16.03 Make decisions based on values and goals.
  - 16.04 Evaluate the decision made.
  - 16.05 Apply problem solving techniques in the workplace.
  - 16.06 Diagnose problem, its urgency and causes.
  - 16.07 Explore possible solutions to a problem & compare/contrast advantages.
  - 16.08 Determine appropriate action; implement it and evaluate results.
  - 16.09 Be sensitive to multicultural & nonsexist dimensions of problem solving.
- 17.0 Demonstrate specific laboratory skills. – The student will be able to:
- 17.01 Identify and quantify microorganisms and cells using manual & automated systems.
  - 17.02 Isolate, maintain & store pure cultures
  - 17.03 Prepare seed inoculum.
  - 17.04 Harvest cells & recover effluent products.
  - 17.05 Transform cells.
  - 17.06 Perform bioassays.
  - 17.07 Decontaminate and/or dispose of equipment, glassware, biologicals.
  - 17.08 Perform microbiology skills, including but not limited to, plating techniques, isolating and characterizing cell lines, propagating plant and animal cells, cryogenic techniques, and propagating and harvesting viruses.
  - 17.09 Apply cell biology techniques, including but not limited to, transfection techniques, monoclonal & polyclonal antibodies, & hemagglutination/hemadsorption techniques.
  - 17.10 Perform immunological techniques, including but not limited to, enzyme-linked immunoabsorbent assays, probe and analyze DNA library, , transformation techniques, polymerase chain reaction, translation assays, and construct recombinant vectors.
  - 17.11 Perform genetic engineering and molecular biology techniques, including isolate & analyze nucleic acid isolation, non-isotope techniques, disrupt cells, protein

gels, Western blotting, denature, renature proteins, precipitate soluble proteins, concentrate(filter & dialyze) proteins, quantitative proteins, and enzyme activity assays.

- 17.12 Perform additional specific skills, including but not limited to transcribing DNA, electrophoresis on RNA, DNA & proteins, nucleic acid hybridization, and autoradiography.
  - 17.13 Separate, isolate or characterize proteins, including but not limited to, monitoring protein stability, quantitative analysis and distillation techniques, titration techniques, employing dyes and indicators, lyophilization & organic chemistry techniques, and perform extractions.
  - 17.14 Perform chemical assays including measuring turbidity, viscosity, & density.
- 18.0 Demonstrate quality assurance/ control. – The student will be able to:
- 18.01 Perform quality tests and document results.
  - 18.02 Verify test standards and maintain QA records.
  - 18.03 Archive samples and documents.
  - 18.04 Inspect & verify integrity of product, procedure, and specimen.
  - 18.05 Release final product and perform trend analysis.
  - 18.06 Investigate complaints & take corrective action.
- 19.0 Maintain facility & equipment. – The student will be able to:
- 19.01 Monitor/record the environmental condition of the facility (growth chamber, laboratory, greenhouse, seed storage room, animal room or manufacturing site).
  - 19.02 Notify appropriate personnel if sampling indicates a problem.
  - 19.03 Clean work area according to SOPs.
  - 19.04 Label equipment.
  - 19.05 Check calibration & perform systems diagnostics
  - 19.06 Perform or schedule preventive maintenance.
  - 19.07 Maintain equipment logs.
- 20.0 Demonstrate proper care/use of test animals/plants. – The student will be able to:
- 20.01 Receive and transport animals.
  - 20.02 Maintain separate in-process, quarantine and release areas
  - 20.03 Feed, water and monitor animals.
  - 20.04 Prepare animal food and prescription diets.
  - 20.05 Clean housing and sterilize cages.
  - 20.06 Monitor animal health and keep health records.
  - 20.07 Follow USDA/IACUC guidelines for animal care.
  - 20.08 Properly restrain and handle animals.
  - 20.09 Collect and process specimens; collect data & document results.
  - 20.10 Maintain plants for optimal growth.
  - 20.11 Apply agrochemical safely.
  - 20.12 Maintain and monitor insect populations.
  - 20.13 Maintain plant growth media.
  - 20.14 Inoculate plant and/or soil with biological materials.
  - 20.15 Gather pollen and bundle pollinate.
  - 20.16 Apply plant pests safely.
  - 20.17 Collect data, perform bioassays, and document results of test plants.

2011 - 2012

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Radiation Protection Technology  
**Career Cluster:** Health Science

	AS	AAS
CIP Number	1341020300	0341020300
Program Type	College Credit	College Credit
Standard Length	65 credit hours	65 credit hours
CTSO	HOSA	HOSA
SOC Codes (all applicable)	31-9099, 19-4051	31-9099, 19-4051
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>	
Perkins Technical Skill Attainment Inventory	<a href="http://www.fl DOE.org/workforce/perkins/perkins_resources.asp">http://www.fl DOE.org/workforce/perkins/perkins_resources.asp</a>	

### Purpose

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

The purpose of this program is to prepare students for employment as engineering technicians, radiation monitors, scientific helpers, or radiation protection technicians SOC Code 19-4051 (Nuclear Technicians) or to provide supplemental training for persons previously or currently employed in these occupations.

This program focuses on broad, transferable skills and stresses understanding and demonstration of the following elements of the health care industry; planning, management, finance, technical and production skills, underlying principles of technology, labor issues, community issues and health, safety, and environmental issues.

The content includes but is not limited to nuclear and radiation physics; detection, control and measurement of radioactive materials; legal and ethical aspects; worker and public protection against radioactivity; health and safety including CPR; and employability skills. The Health Careers Core must be taken by all students (secondary, postsecondary adult and postsecondary vocational) planning to complete any Health Occupations program. Once successfully completed, the core does not need to be repeated at any instructional level.

## **Program Structure**

This program is a planned sequence of instruction consisting of 65 credit hours.

## **Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

## **Special Notes**

This program meets the Department of Health HIV/AIDS Domestic Violence and Prevention of Medical Errors education requirements. Upon completion of this program, the instructor will provide a certificate to the student verifying that these requirements have been met.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635 F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health.

After three years experience in the nuclear power industry, graduates are eligible to take the certification examination given by the National Registry for Radiation Protection Technicians provided security requirements have been met.

Cooperative training - OJT is appropriate for this program. Whenever cooperative training - OJT is offered, the following are required for each student: a training plan, signed by the student, teacher, and employer, which includes instructional objectives and a list of on-the-job and in-school learning experiences; a workstation which reflects equipment, skills and tasks that are relevant to the occupation which the student has chosen as a career goal. The student must receive compensation for work performed.

Outcomes 01-11 are referred to as the Health Careers Core and do not have to be completed if the student has previously completed the Core in another health science program. The CORE should be taken first or concurrently with the first course in the program. Following the successful completion of the core, the student is eligible to take the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

## **Career and Technical Student Organization (CTSO)**

Health Occupations Students of America (HOSA), Inc. is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

## **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary

students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

### **Articulation**

This program has no statewide articulation agreement approved by the Articulation Coordinating Committee. However, this does not preclude the awarding of credits by any college through local agreements.

For details on statewide articulation agreements which correlate to programs and industry certifications, refer to [http://www.fl DOE.org/workforce/dwdframe/artic\\_frame.asp](http://www.fl DOE.org/workforce/dwdframe/artic_frame.asp).

### **Program Length**

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. The standard length of this program is 65 credit hours according to Rule 6A-14.030, F.A.C.

### **Standards**

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.
- 12.0 Demonstrate knowledge of protection standards and professional aspects related to the use of fissionable and radioactive materials.
- 13.0 Demonstrate knowledge of basic and applied mathematics and science required for understanding and practice of radiological protection techniques.
- 14.0 Demonstrate knowledge of detection, sources, decay, interaction and measurement of radioactivity.
- 15.0 Demonstrate knowledge of worker and public protection against the biological effects and risks of exposure to ionizing radiation.

- 16.0 Demonstrate knowledge of the handling of radioactive materials and radioactive contamination control.
- 17.0 Demonstrate knowledge of radiation exposure control.
- 18.0 Demonstrate knowledge of calibration and use of instruments to measure and detect radiation.
- 19.0 Demonstrate knowledge of environmental radiation monitoring and control.
- 20.0 Demonstrate knowledge of nuclear power plant technology and radiation control procedures.

2011 - 2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Radiation Protection Technology  
**CIP Numbers:** 1341020300 AS, 0341020300 AAS  
**Program Length:** 65 credit hours  
**SOC Code(s):** 31-9099, 19-4051

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. At the completion of this program, the student will be able to:

**Health Careers Core: The Health Careers Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Careers Core or any other health occupations program do not have to repeat intended outcomes 01-11.**

01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:

- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
- 01.02 Identify common methods of payment for healthcare services.
- 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
- 01.04 Describe the composition and functions of a healthcare team.
- 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
- 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
- 01.07 Identify characteristics of effective teams.
- 01.08 Recognize methods for building positive team relationships.
- 01.09 Analyze attributes and attitudes of an effective leader.
- 01.10 Recognize factors and situations that may lead to conflict.
- 01.11 Demonstrate effective techniques for managing team conflict.
- 01.12 Describe factors that influence the current delivery system of healthcare.
- 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.

02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:

- 02.01 Develop basic speaking and active listening skills.
- 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
- 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
- 02.04 Respond to verbal and non-verbal cues.

- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.
- 02.06 Use appropriate medical terminology and abbreviations.
- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
- 02.08 Recognize the importance of patient/client educations regarding healthcare.
- 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
- 02.10 Analyze elements of communication using a sender-receiver model.
- 02.11 Distinguish between and report subjective and objective information.
- 02.12 Report relevant information in order of occurrence.

03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:

- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
- 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
- 03.03 Demonstrate procedures for accurate documentation and record keeping.
- 03.04 Interpret healthcare facility policy and procedures.
- 03.05 Explain the “Patient’s Bill of Rights”.
- 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
- 03.07 Describe advance directives.
- 03.08 Describe informed consent.
- 03.09 Explain the laws governing harassment, labor and employment.
- 03.10 Differentiate between legal and ethical issues in healthcare.
- 03.11 Describe a code of ethics consistent with the healthcare occupation.
- 03.12 Identify and compare personal, professional, and organizational ethics.
- 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
- 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
- 03.15 Recognize and report abuse including domestic violence and neglect.
- 03.16 Distinguish among the five schedules of controlled substances.

04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:

- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
- 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
- 04.03 Identify psychological reactions to illness including defense mechanisms.
- 04.04 Identify complementary and alternative health practices.
- 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
- 04.06 Explain the basic concepts of positive self image, wellness and stress.
- 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
- 04.08 Explain the nutrition pyramid.

- 04.09 Recognize the steps in the grief process.
- 05.0 Recognize and practice safety and security procedures. – The student will be able to:
  - 05.01 Recognize safe and unsafe working conditions and report safety hazards.
  - 05.02 Demonstrate the safe use of medical equipment.
  - 05.03 Explain and apply the theory of root- cause analysis
  - 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
  - 05.05 Identify and practice security procedures for medical supplies and equipment.
  - 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions.
  - 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
  - 05.08 Demonstrate proper body mechanics and ergonomics.
  - 05.09 Demonstrate the procedure for properly identifying patients.
  - 05.10 Demonstrate procedures for the safe transport and transfer of patients.
  - 05.11 Describe fire, safety, disaster and evacuations procedures.
  - 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )
- 06.0 Recognize and respond to emergency situations. – The student will be able to:
  - 06.01 Monitor and record vital signs.
  - 06.02 Describe legal parameters relating to the administration of emergency care.
  - 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
  - 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.
- 07.0 Recognize and practice infection control procedures. – The student will be able to:
  - 07.01 Define principles of infection control including standard and transmission based precautions.
  - 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
  - 07.03 Demonstrate knowledge of surgical asepsis.
  - 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.
- 08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:
  - 08.01 Describe technology applications in healthcare.
  - 08.02 Define terms and demonstrate basic computer skills.
  - 08.03 Recognize technology applications in healthcare.
  - 08.04 Interpret information from electronic medical documents.
  - 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.

09.0 Demonstrate employability skills. – The student will be able to:

- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.
- 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
- 09.03 Identify documents that may be required when applying for a job.
- 09.04 Write an appropriate resume.
- 09.05 Conduct a job search.
- 09.06 Complete a job application form correctly.
- 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
- 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
- 09.09 Identify acceptable work habits.
- 09.10 Recognize appropriate affective/professional behavior.
- 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).

10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:

- 10.01 Recognize emerging diseases and disorders
- 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
- 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
- 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
- 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
- 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.

11.0 Apply basic math and science skills. – The student will be able to:

- 11.01 Draw, read, and report on graphs, charts and tables.
- 11.02 Measure time, temperature, distance, capacity, and mass/weight.
- 11.03 Make, use and convert using both traditional and metric units.
- 11.04 Make estimations and approximations and judge the reasonableness of the result.
- 11.05 Convert from regular to 24 hour time.
- 11.06 Demonstrate ability to evaluate and draw conclusions.
- 11.07 Organize and communicate the results obtained by observation and experimentation.
- 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
- 11.09 Calculate ratios

**Radiation Protection Technicians: Students completing intended outcomes 12-20 have met the requirements for the occupational completion point of engineering technicians, radiation monitors, scientific helpers, or SOC Code 19-4051 (Nuclear Technicians)**

- 12.0 Demonstrate knowledge of protection standards and professional aspects related to the use of fissionable and radioactive materials. – The student will be able to:
- 12.01 Demonstrate knowledge of the professional responsibilities of persons using fissionable and radioactive materials.
  - 12.02 Demonstrate knowledge of radiation protection standards and guidelines and identify related regulatory and advisory organizations.
  - 12.03 Demonstrate knowledge of Nuclear Regulatory Commission (NRC) and Department of Transportation (DOT) standards and their implementation.
- 13.0 Demonstrate knowledge of basic and applied mathematics and science required for understanding and practice of radiological protection techniques. – The student will be able to:
- 13.01 Practice basic mathematics, metric conversion and graphing skills.
  - 13.02 Use exponents, radicals, scientific notation and manipulate algebraic expressions as required in radiological protection technology.
  - 13.03 Demonstrate knowledge of chemical structures, properties and the solution of simple chemical equations.
- 14.0 Demonstrate knowledge of detection, sources, decay, interaction and measurement of radioactivity. – The student will be able to:
- 14.01 Characterize alpha particles, beta particles, gamma rays and neutrons.
  - 14.02 Demonstrate knowledge of radioactivity and radioactive decay.
  - 14.03 Identify and quantify major sources of background radiation and those sources of radiation routinely found in nuclear power plants.
  - 14.04 Identify radiological quantities, differentiate between dose and dose rate and convert radiological units to respective subunits.
  - 14.05 Demonstrate knowledge of the principles of radiation detection and measurement.
  - 14.06 Apply exponential buildup and decay in solving radioactive decay and gamma ray shielding problems.
  - 14.07 Demonstrate knowledge of isotopes, mass-energy equivalence, nuclear forces, binding energy, and simple nuclear equations.
  - 14.08 Demonstrate knowledge of fission and fusion and related yields.
  - 14.09 Demonstrate knowledge of the statistical nature of radioactive decay, calculation of minimum detectable activity and the importance of the statistical accuracy of measurement.
- 15.0 Demonstrate knowledge of worker and public protection against the biological effects and risks of exposure to ionizing radiation. – The student will be able to:
- 15.01 Demonstrate knowledge of the biological effects and risks associated with exposure to ionizing radiation.

- 15.02 Describe the acute radiation syndrome.
  - 15.03 Describe the somatic and genetic effects of radiation exposure.
  - 15.04 Identify the long-term health risks associated with low-level radiation exposure as related to personal and public health concerns.
  - 15.05 Estimate dose to internal organs from swallowing and breathing radioactivity.
  - 15.06 Define derived air concentration in air (DACs).
  - 15.07 Discuss biological half-life and effective half-life.
- 16.0 Demonstrate knowledge of the handling of radioactive materials and radioactive contamination control. – The student will be able to:
- 16.01 Demonstrate knowledge of dangers engendered by and techniques for decontamination of spilled and mishandled radioactive materials.
  - 16.02 Identify the sources of radioactive contamination.
  - 16.03 Demonstrate proper survey techniques.
  - 16.04 Demonstrate proper techniques and procedures for limiting the spread of radioactive contamination.
  - 16.05 Post contamination areas properly with required signs.
  - 16.06 Identify, plan contamination monitoring systems, related operating principles and capabilities.
  - 16.07 Properly select, don and remove anticontamination clothing.
  - 16.08 Demonstrate knowledge of radioactive material storage and related procedures.
  - 16.09 Implement regulatory procedures for shipping and receiving radioactive materials.
  - 16.10 Describe solid waste compactor operations and related problems.
  - 16.11 Describe controls governing radiological waste systems and contaminated laundry.
  - 16.12 Discuss procedures for minimizing solid and liquid radioactive waste.
  - 16.13 Demonstrate knowledge of the hazards associated with waste solidification.
- 17.0 Demonstrate knowledge of radiation exposure control. – The student will be able to:
- 17.01 Demonstrate knowledge and use of selected respiratory equipment.
  - 17.02 Discuss entering confined spaces and working under subatmospheric conditions when applicable.
  - 17.03 Define personnel dosimetry requirements for gamma rays, beta particles and neutrons and identify related long term effects of this exposure.
  - 17.04 Explain the operating characteristics of dosimeters worn by personnel and relative advantages and disadvantages.
  - 17.05 Discuss personnel dosimetry administrative control and exposure records.
  - 17.06 Utilize the principles of time, distance, and shielding to reduce personnel exposure.
- 18.0 Demonstrate knowledge of calibration and use of instruments to measure and detect radiation. – The student will be able to:
- 18.01 Describe the operation and characteristics of radiation detectors, dosimeters and single and multi-channel analyzers.
  - 18.02 Describe the factors affecting instrument efficiency and calculation of efficiency.
  - 18.03 Differentiate between radiation field survey instruments and radioactive contamination survey instruments.

- 18.04 Perform gamma ray shielding calculations.
  - 18.05 Convert meter reading to radioactivity levels.
  - 18.06 Demonstrate the use of portable air sampling equipment.
  - 18.07 Describe the operation of CAM's, ARM's, hand and foot monitors and portal monitors.
  - 18.08 Operate and calibrate radiological survey and monitoring instruments.
- 19.0 Demonstrate knowledge of environmental radiation monitoring and control. – The student will be able to:
- 19.01 Identify ventilation and filtration systems in a nuclear power plant.
  - 19.02 Identify techniques for reducing airborne activity.
  - 19.03 Identify airborne radionuclides in a nuclear power plant.
  - 19.04 Demonstrate knowledge of environmental sampling and evaluation.
- 20.0 Demonstrate knowledge of nuclear power plant technology and radiation control procedures. – The student will be able to:
- 20.01 Demonstrate knowledge of plant safety and containment of radioactivity.
  - 20.02 Demonstrate knowledge of the purpose and major components of a nuclear power plant.
  - 20.03 Describe flow paths and interactions of plant systems.
  - 20.04 Demonstrate knowledge of nuclear power plant operations, maintenance and operating procedures.
  - 20.05 Identify radiological conditions which could result in accidents.
  - 20.06 Demonstrate knowledge of radiological emergency procedures.
  - 20.07 Demonstrate knowledge of incident evaluation and control.

2011 - 2012

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Surgical First Assisting  
**Career Cluster:** Health Science

	<b>AS</b>	<b>AAS</b>
CIP Number	1351090900	0351090900
Program Type	College Credit	College Credit
Standard Length	74 credit hours	74 credit hours
CTSO	HOSA	HOSA
SOC Codes (all applicable)	31-9099; 29-2055	31-9099; 29-2055
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>	
Perkins Technical Skill Attainment Inventory	<a href="http://www.fldoe.org/workforce/perkins/perkins_resources.asp">http://www.fldoe.org/workforce/perkins/perkins_resources.asp</a>	

### **Purpose**

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

The program is designed to prepare students for employment as a Surgical First Assistant Expanded Function (Surgical technologists is SOC 29-2055). The program should meet the requirements of the Commission on Accreditation of Allied Health Education Programs (CAAHEP)

The content includes, but is not limited to, communication and interpersonal skills, legal and ethical responsibilities, anatomy, physiology, pathophysiology, microbiology, aseptic techniques, patient care procedures, surgical procedures, patient safety, use and care of equipment and supplies, CPR, Heartsaver, employability skills, basic computer literacy and surgical first assistant skills such as preoperative duties, aid in exposure, hemostasis, closure, intraoperative technical functions, and postoperative duties under the direction and supervision of the surgeon. The Health Science Core must be taken by all students (secondary, postsecondary adult and postsecondary vocational) planning to complete any Health Occupations program. Once successfully completed, the core does not need to be repeated at any instructional level. This program focuses on broad, transferable skills and stresses understanding and demonstration of the following elements of the health care industry; planning, management,

finance, technical and production skills, underlying principles of technology, labor issues, community issues and health, safety, and environmental issues.

### **Program Structure**

This program is a planned sequence of instruction consisting of 74 hours.

### **Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

The Human Patient Simulator (HPS) or other accepted simulation scenarios may be used for a limited number of clinical hours. A low teacher-student ratio in the lab and clinical area is strongly recommended. The recommended maximum ratio is 1:8.

### **Special Notes**

This program meets the Department of Health HIV/AIDS Domestic Violence and Prevention of Medical Errors education requirements. Upon completion of this program, the instructor will provide a certificate to the student verifying that these requirements have been met.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635 F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health

The Surgical First Assistant Core Curriculum should be taught by qualified staff as outlined in the most recent approved CAAHEP accreditation standards and guidelines.

Entering students who have successfully complete the program 0317.021100, Surgical Technology or currently Nationally Certified as a CST (Certified Surgical Technologist), should be given appropriate advanced standing.

After successful completion of an approved surgical first assistant program, students are eligible to take the National Board of Surgical Technology and Surgical Assisting First Assistant exam as approved.

The standard length for the AS degree program is 74 college credits. This AS degree program includes the 59 credit hour Applied Technology Degree Program – Surgical First Assisting.

Outcomes 01-11 are referred to as the Health Careers Core and do not have to be completed if the student has previously completed the Core in another health science program. The CORE should be taken first or concurrently with the first course in the program. Following the successful completion of the core, the student is eligible to take the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

## **Career and Technical Student Organization (CTSO)**

Health Occupations Students of America, Inc is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

## **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

## **Articulation**

To be transferable statewide between institutions, this program must have been reviewed, and a "transfer value" assigned the curriculum content by the appropriate Statewide Course Numbering System discipline committee. This does not preclude institutions from developing specific articulation agreements with each other.

The following ATD programs articulate credit into this degree program. These statewide articulation agreements have been approved by the Articulation Coordinating Committee.

Surgical First Assisting-ATD (0351090901/0351090902) – Credits being determined by the Articulation Coordinating Committee (ACC)

For details on existing articulation agreements, refer to [http://www.fldoe.org/workforce/dwdframe/artic\\_frame.asp](http://www.fldoe.org/workforce/dwdframe/artic_frame.asp).

## **Program Length**

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. The standard length of this program is 74 credit hours according to Rule 6A-14.030, F.A.C.

## **Certificate Programs**

A College Credit Certificate consists of a program of instruction of less than sixty (60) credits of college-level courses, which is part of an AS or AAS degree program and prepares students for entry into employment (Rule 6A-14.030, F.A.C.). This AS/AAS degree program includes the following College Credit Certificates:

The following ATD programs articulate credit into this degree program. These statewide articulation agreements have been approved by the Articulation Coordinating Committee.

Surgical First Assisting-ATD (0351090901/0351090902) – Credits being determined by the Articulation Coordinating Committee (ACC)

Standards for the above certificate programs are contained in separate curriculum frameworks.

## **Standards**

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.
- 12.0 Demonstrate Central Supply Skills.
- 13.0 Demonstrate Competencies in the Core Components of the Surgical First Assistant - Communication And Interpersonal Skills.
- 14.0 Demonstrate an understanding of the basic sciences related to Surgical First Assisting.
- 15.0 Describe and practice safety measures in the surgical environment.
- 16.0 Perform patient care procedures related to the surgical environment and describe methods for meeting patients' needs.
- 17.0 Demonstrate knowledge of the basic surgical skills necessary to function safely and effectively.
- 18.0 Demonstrate Competencies in the Core Components of the Surgical First Assistant - Knowledge and Skills.
- 19.0 Demonstrate Competencies in the Core Components of the Surgical First Assistant - Legal and Ethical Responsibilities.
- 20.0 Demonstrate Skills for Educational Methodologies and Strategies.
- 21.0 Demonstrate Skills Necessary for Marketing, Sales, and Educational Programs for Surgical Products.
- 22.0 Demonstrate Knowledge of Surgical Practice Setup and Management procedures.

2011 - 2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Surgical First Assisting  
**CIP Numbers:** 0351090900/1351090900  
**Program Length:** 74 credit hours  
**SOC Code(s):** 31-9099; 29-2055

The AS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS, and it must be transferable according to Rule 6A-14.030 (2), F.A.C. The AAS degree requires the inclusion of a minimum of 15 credits of general education coursework according to SACS. At the completion of this program, the student will be able to:

**Basic Healthcare Worker-**

SOC code 31-9099 Healthcare Support Workers, all others

01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:

- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
- 01.02 Identify common methods of payment for healthcare services.
- 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
- 01.04 Describe the composition and functions of a healthcare team.
- 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
- 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
- 01.07 Identify characteristics of effective teams.
- 01.08 Recognize methods for building positive team relationships.
- 01.09 Analyze attributes and attitudes of an effective leader.
- 01.10 Recognize factors and situations that may lead to conflict.
- 01.11 Demonstrate effective techniques for managing team conflict.
- 01.12 Describe factors that influence the current delivery system of healthcare.
- 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.

02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:

- 02.01 Develop basic speaking and active listening skills.
- 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
- 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
- 02.04 Respond to verbal and non-verbal cues.
- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.
- 02.06 Use appropriate medical terminology and abbreviations.

- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
  - 02.08 Recognize the importance of patient/client educations regarding healthcare.
  - 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
  - 02.10 Analyze elements of communication using a sender-receiver model.
  - 02.11 Distinguish between and report subjective and objective information.
  - 02.12 Report relevant information in order of occurrence.
- 03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:
- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
  - 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
  - 03.03 Demonstrate procedures for accurate documentation and record keeping.
  - 03.04 Interpret healthcare facility policy and procedures.
  - 03.05 Explain the “Patient’s Bill of Rights”.
  - 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
  - 03.07 Describe advance directives.
  - 03.08 Describe informed consent.
  - 03.09 Explain the laws governing harassment, labor and employment.
  - 03.10 Differentiate between legal and ethical issues in healthcare.
  - 03.11 Describe a code of ethics consistent with the healthcare occupation.
  - 03.12 Identify and compare personal, professional, and organizational ethics.
  - 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
  - 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
  - 03.15 Recognize and report abuse including domestic violence and neglect.
  - 03.16 Distinguish among the five schedules of controlled substances.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:
- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
  - 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
  - 04.03 Identify psychological reactions to illness including defense mechanisms.
  - 04.04 Identify complementary and alternative health practices.
  - 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
  - 04.06 Explain the basic concepts of positive self image, wellness and stress.
  - 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
  - 04.08 Explain the nutrition pyramid.
  - 04.09 Recognize the steps in the grief process.
- 05.0 Recognize and practice safety and security procedures. – The student will be able to:

- 05.01 Recognize safe and unsafe working conditions and report safety hazards.
  - 05.02 Demonstrate the safe use of medical equipment.
  - 05.03 Explain and apply the theory of root- cause analysis
  - 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
  - 05.05 Identify and practice security procedures for medical supplies and equipment.
  - 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions).
  - 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
  - 05.08 Demonstrate proper body mechanics and ergonomics.
  - 05.09 Demonstrate the procedure for properly identifying patients.
  - 05.10 Demonstrate procedures for the safe transport and transfer of patients.
  - 05.11 Describe fire, safety, disaster and evacuations procedures.
  - 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )
- 06.0 Recognize and respond to emergency situations. – The student will be able to:
- 06.01 Monitor and record vital signs.
  - 06.02 Describe legal parameters relating to the administration of emergency care.
  - 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
  - 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.
- 07.0 Recognize and practice infection control procedures. – The student will be able to:
- 07.01 Define principles of infection control including standard and transmission based precautions.
  - 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
  - 07.03 Demonstrate knowledge of surgical asepsis.
  - 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.
- 08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:
- 08.01 Describe technology applications in healthcare.
  - 08.02 Define terms and demonstrate basic computer skills.
  - 08.03 Recognize technology applications in healthcare.
  - 08.04 Interpret information from electronic medical documents.
  - 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.
- 09.0 Demonstrate employability skills. – The student will be able to:
- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.

- 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
  - 09.03 Identify documents that may be required when applying for a job.
  - 09.04 Write an appropriate resume.
  - 09.05 Conduct a job search.
  - 09.06 Complete a job application form correctly.
  - 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
  - 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
  - 09.09 Identify acceptable work habits.
  - 09.10 Recognize appropriate affective/professional behavior.
  - 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:
- 10.01 Recognize emerging diseases and disorders
  - 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
  - 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
  - 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
  - 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
  - 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.
- 11.0 Apply basic math and science skills. – The student will be able to:
- 11.01 Draw, read, and report on graphs, charts and tables.
  - 11.02 Measure time, temperature, distance, capacity, and mass/weight.
  - 11.03 Make, use and convert using both traditional and metric units.
  - 11.04 Make estimations and approximations and judge the reasonableness of the result.
  - 11.05 Convert from regular to 24 hour time.
  - 11.06 Demonstrate ability to evaluate and draw conclusions.
  - 11.07 Organize and communicate the results obtained by observation and experimentation.
  - 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
  - 11.09 Calculate ratios

**Central Supply Assistant (SOC Code 31-9099) - Students completing intended outcomes 12 will meet the qualifications of the occupational completion point as Central Supply Technician.**

12.0 Demonstrate Central Supply Skills The student will be able to:

- 12.01 Apply the principles of medical/surgical asepsis
- 12.02 Apply infection control techniques following Center for Disease Control (CDC) guidelines.
- 12.03 Inspect equipment and supplies for condition quantity.
- 12.04 Identify principles and demonstrate techniques of disinfection and sterilization.
- 12.05 Identify/correct and/or report package integrity.
- 12.06 Decontaminate instruments equipment and environment.
- 12.07 Replenish supplies and equipment.
- 12.08 Identify instruments, equipment and supplies for any surgical procedure.
- 12.09 Demonstrate the ability to package goods and supplies as required.
- 12.10 Describe various supply distribution methods.
- 12.11 Demonstrate ability to label items correctly.
- 12.12 Discuss and use various inventory control systems.

Students completing intended outcomes 13-19 will meet the requirements of the Surgical First Assistant –ATD Program (SOC Code 29-2055). After successful completion of an approved program, students are eligible to take the Association of Surgical Technologists and Surgical Assistants National Certification Examination.

13.0 Demonstrate Competencies in the Core Components of the Surgical First Assistant - Communication And Interpersonal Skills -- The student will be able to:

- 13.01 Use various forms of communication in the role of Surgical First Assistant to communicate relevant, accurate and complete information in a concise and clear manner.
- 13.02 Collaborate with the patient, surgeon, and other members of the Healthcare team to assess, plan, implement, and evaluate the patient's surgical care to promote positive outcomes.
- 13.03 Demonstrate proper use of communication technology including but not limited to intercoms, computers, paging systems.
- 13.04 Demonstrate patient interviewing techniques.
- 13.05 Facilitate teamwork as a patient advocate and assistant to the surgeon.
- 13.06 Demonstrate competency regarding reporting and documentation responsibilities in the clinical setting.

14.0 Demonstrate An Understanding Of The Basic Sciences Related To Surgical First Assisting--The student will be able to:

- 14.01 Apply knowledge of the microbial environment to the surgical care of the patient.
- 14.02 Relate anatomy, physiology and pathophysiology, to surgical procedures.
- 14.03 Apply the principles of medical and surgical asepsis to surgery.
- 14.04 Discuss physics, electricity, computers, and robotics as they relate to surgery.

- 14.05 Apply knowledge of the pharmacologic agents used in the treatment of the surgical patient.
- 15.0 Describe And Practice Safety Measures In The Surgical Environment--The student will be able to:
  - 15.01 Inspect emergency equipment and supplies for condition and quantity.
  - 15.02 Implement appropriate Joint Commission patient safety goals.
  - 15.03 Apply knowledge of surgical hazards to safe patient care.
- 16.0 Perform Patient Care Procedures Related To The Surgical Environment And Describe Methods For Meeting Patient's Needs--The student will be able to:
  - 16.01 Perform safe patient transfer/transportation techniques used in the perioperative setting.
  - 16.02 Apply the principles of safe positioning and restraining patient for surgery.
  - 16.03 Apply the principles of safe usage of the electrosurgical unit, laser, endoscopes, and other equipment utilized during the perioperative period.
  - 16.04 Identify the roles of the members of the surgical team during each phase of surgery.
  - 16.05 Assist surgeon with the perioperative care of the surgical patient.
  - 16.06 Apply the perioperative principles of preoperative patient assessment and preparation, techniques and methods of anesthesia related to the type of surgical procedure and principles of postoperative anesthetic management
  - 16.07 Apply knowledge of wound management techniques, including suturing techniques in the operating room, perioperative care of special needs patients, and perioperative assessment of the skin.
- 17.0 Demonstrate Knowledge Of The Basic Surgical Skills Necessary To Function Safely And Effectively--The student will be able to:
  - 17.01 Demonstrate an understanding of the disease processes and the relationship of the processes to the specific types of pathologies according to body systems.
  - 17.02 Select instruments, equipment and supplies for surgical procedures using surgeon preference/procedure cards.
  - 17.03 Measure and pour sterile solutions.
  - 17.04 Perform surgical scrub.
  - 17.05 Put on sterile gown and gloves.
  - 17.06 Drape tables and solution stands.
  - 17.07 Set up sterile mayo stand and instrument table.
  - 17.08 Prepare sutures, ligatures, ties.
  - 17.09 Assist surgeon in gowning and gloving.
  - 17.10 Assist in draping patient, pass instruments, monitor field.
  - 17.11 Identify/correct and/or report breaks in aseptic technique.
  - 17.12 Monitor body fluids, e.g. blood loss, ascites.
  - 17.13 Assist in ensuring the prevention of foreign body retention including completing counts with R.N..
  - 17.14 Identify principles and demonstrate techniques of disinfection and sterilization.
  - 17.15 Assist in removing/applying cast.
  - 17.16 Decontaminate instruments equipment and environment.
  - 17.17 Prepare and/or update procedure cards.

17.18 Apply electrical knowledge to safe patient care practices in surgery.

### **Surgical First Assistant Advanced Skills**

18.0 Demonstrate Competencies In The Core Components of the Surgical First Assistant - Knowledge and Skills -- The student will be able to:

- 18.01 Prioritize care or actions to be taken in a given circumstance to expedite the operative procedure or emergency situation.
- 18.02 Describe preoperative diagnosis, common complications, operative pathophysiology and postoperative care related to the specific surgical procedures performed.
- 18.03 Analyze and relate common patient diagnostic and monitoring results to the surgeon as applicable to the surgical specialty.
- 18.04 Assist surgeon and/or healthcare team with preoperative preparation of the patient to facilitate proper patient care including but not limited to positioning, draping, and sterile setup preparation.
- 18.05 Demonstrate and describe types of incisions.
- 18.06 Identify types of tissue, organs, and gross anatomical structures correctly during surgical procedures.
- 18.07 Demonstrate appropriate tissue handling techniques including the care of the surgical specimens.
- 18.08 Provide appropriate exposure and visualization of the operative field for the surgeon.
- 18.09 Describe the appropriate sequence for common surgical procedures.
- 18.10 Utilize appropriate techniques to assist with hemostasis.
- 18.11 Demonstrate appropriate safe surgical techniques when the case involves either thermal, radiological, laparoscopic, environmental, or other known surgical hazard.
- 18.12 Participate in volume replacement or autotransfusion techniques as appropriate.
- 18.13 Select appropriate instruments and supplies for the type of tissue.
- 18.14 Demonstrate competence with technology, the use of instruments, equipment and supplies for the surgical procedure.
- 18.15 Uses surgical instruments skillfully in ways consistent with their design and purpose.
- 18.16 Utilize appropriate techniques to assist with the closure of body planes.
- 18.17 Select and apply appropriate wound dressings.
- 18.18 Assist surgeon in securing drainage systems to tissue.
- 18.19 Evaluate patient and report appropriately any abnormal condition found postop related to positioning.
- 18.20 Assist surgeon with postoperative care of the patient to facilitate proper patient care.
- 18.21 Demonstrate appropriate response to emergency situations including respiratory/cardiac arrest situations, sudden hypoxia, hemorrhage, shock, surgical misadventures, contamination, perforation of viscous or cavity, critical equipment failure, and exposure, retraction and compression injuries.
- 18.22 Facilitate the continuity of care within and across the healthcare settings to access available resources and services.

19.0 Demonstrate Competencies In The Core Components Of The Surgical First Assistant - Legal And Ethical Responsibilities --The student will be able to:

- 19.01 State methods, standards and aids that assist a surgical first assistant with interpreting and following legal responsibilities.
- 19.02 Describe the importance of maintaining credentials and following the appropriate credentialing policy in accordance with hospital policy and appropriate laws and regulations.
- 19.03 Explain the job requirements.
- 19.04 Demonstrate an understanding of the legal, ethical, moral, and professional responsibilities of working as a surgical assistant, and the professional skills necessary to fulfill the role.
- 19.05 Provide health care within the ethical/legal framework of the job description including role responsibilities and limitations.

**Students completing one of the Specialty Options competencies (20-22) identified below meet the requirements for the AS option for Surgical First Assistant.**

#### Specialty Option 1: Education

- 20.0 Demonstrate Skills for educational methodologies and Strategies: The Student will be able to:
  - 20.01 Develop and implement policies and operational procedures that meet the Association of Surgical Technologists and Surgical Assistants accreditation standards for Surgical First Assistant Programs.
  - 20.02 Identify and describe educational theory and methodology as they relate to Allied Surgical First Assistant Education.
  - 20.03 Establish liaison with appropriate accrediting organizations, community partners, and educational institutions.

#### Specialty Option 2: Product Marketing, Sales, and Educational Programs

- 21.0 Demonstrate Skills Necessary for Marketing, Sales, and Educational Programs for Surgical Products. The student will be able to:
  - 21.01 Establish educational programs relating value and effectiveness of surgical products.
  - 21.02 Apply economic principles for product marketing, distribution and sales.
  - 21.03 Demonstrate effective product evaluation and comparison
  - 21.04 Identify appropriate consumer populations.

#### Specialty Option 3: Surgical Practice Management

- 22.0 Demonstrate Knowledge of Surgical Practice Setup and Management procedures. The student will be able to:
  - 22.01 Establish policies and procedures for surgical first assistant procedures and billing.
  - 22.02 Identify the roles and responsibilities of all employees.
  - 22.03 Implement policies and procedures for establishing effective management of a surgical practice.

2011 - 2012

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Surgical First Assisting-ATD  
**Program Type:** ATD (Applied Technology Diploma)  
**Career Cluster:** Health Science

	<b>CC</b>	<b>PSAV</b>
Program Number	N/A	H170300
CIP Number	0351090902	0351090901
Grade Level	Applied Technology Diploma (ATD)	Applied Technology Diploma (ATD)
Standard Length	59 Credits	1480 Hours
CTSO	HOSA	HOSA
SOC Codes (all applicable)	31-9099, 29-2055	31-9099, 29-2055
Targeted Occupation List	<a href="http://www.labormarketinfo.com/wec/TargetOccupationList.htm">http://www.labormarketinfo.com/wec/TargetOccupationList.htm</a>	
Basic Skills Level	Mathematics: 10 Language: 11 Reading: 11	

### **Purpose**

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Health Science career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the Health Science career cluster.

The program is designed to prepare students for employment as a Surgical First Assistant Expanded Function (Surgical technologists is SOC 29-2055). The program should meet the requirements of the Commission on Accreditation of Allied Health Education Programs (CAAHEP)

The content includes, but is not limited to, communication and interpersonal skills, legal and ethical responsibilities, anatomy, physiology, pathophysiology, microbiology, aseptic techniques, patient care procedures, surgical procedures, patient safety, use and care of equipment and supplies, CPR, Heartsaver, employability skills, basic computer literacy and surgical first assistant skills such as preoperative duties, aid in exposure, hemostasis, closure, intraoperative technical functions, and postoperative duties under the direction and supervision of the surgeon. The Health Science Core must be taken by all students (secondary, postsecondary adult and postsecondary vocational) planning to complete any Health Occupations program. Once successfully completed, the core does not need to be repeated at any instructional level.

This program focuses on broad, transferable skills and stresses understanding and demonstration of the following elements of the health care industry; planning, management, finance, technical and production skills, underlying principles of technology, labor issues, community issues and health, safety, and environmental issues.

### **Program Structure**

This program is an Applied Technology Diploma program that is part of a technical degree program, is less than 60 credit hours, and leads to employment in a specific occupation. An applied technology diploma program may consist of either technical credit or college credit. A public school district may offer an applied technology diploma program only as technical credit, with college credit awarded to a student upon articulation to a community college.

### **PSAV Program**

When offered at the district level, this program is a planned sequence of instruction consisting of 3 occupational completion points and the courses as shown below.

OCP	Course Number	Course Title	Length	SOC Code
A	HSC0003	Basic Healthcare Worker	90 hours	31-9099
B	STS0015	Central Supply Technician	210 hours	31-9099
C	STS0016	Surgical First Assistant 1	345hours	29-2055
	STS0017	Surgical First Assistant 2	345 hours	29-2055
	STS0018	Surgical First Assistant 3	490 hours	29-2055

### **Community College**

When offered at the community college level, this ATD program is part of the Surgical First Assisting Associates program (1351090900/0351090900) and has a program length of 59 credits.

### **Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

In a simulated surgical environment, students practice preparing, setting up and maintaining a sterile field, sterilization and disinfection procedures, preparation of supplies and equipment for surgery, and patient preparation.

Clinical learning experiences in an operating room and related areas are an integral part of this program.

The Human Patient Simulator (HPS) or other accepted simulation scenarios may be used for a limited number of clinical hours. A low teacher-student ratio in the lab and clinical area is strongly recommended. The recommended maximum ratio is 1:8.

### **Special Notes**

This program meets the Department of Health HIV/AIDS Domestic Violence and Prevention of Medical Errors education requirements. Upon completion of this program, the instructor will provide a certificate to the student verifying that these requirements have been met.

If students in this program are seeking a licensure, certificate or registration through the Department of Health, please refer to 456.0635 F.S. for more information on disqualification for a license, certificate, or registration through the Department of Health

The Surgical First Assistant Core Curriculum should be taught by qualified staff as outlined in the most recent approved CAAHEP accreditation standards and guidelines.

Entering students who have successfully completed the program 0317.021100, Surgical Technology or are currently Nationally Certified as a CST (Certified Surgical Technologist) should be given appropriate advanced standing.

After successful completion of an approved surgical first assistant program, students are eligible to take the National Board of Surgical Technology and Surgical Assisting First Assistant exam as approved.

Outcomes 01-11 are referred to as the Health Careers Core and do not have to be completed if the student has previously completed the Core in another health science program. The CORE should be taken first or concurrently with the first course in the program. Following the successful completion of the core, the student is eligible to take the National Health Care Foundation Skill Standards Assessment with instructor approval and the completion of a portfolio.

### **Career and Technical Student Organization (CTSO)**

Health Occupations Students of America Inc is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

### **Basic Skills**

In PSAV programs offered for 450 hours or more, in accordance with Rule 6A-10.040, F.A.C. the minimum basic skills grade levels required for postsecondary adult career and technical students to complete this program are: Mathematics 10, Language 11, and Reading 11. These grade level numbers correspond to a grade equivalent score obtained on a state designated basic skills examination. Students may be exempt from meeting the Basic Skills requirements by earning an eligible industry certification. See the Basic Skills Exemption List document for a list of eligible industry certifications (<http://www.fldoe.org/workforce/dwdframe/rtf/basic-skills.rtf>).

Adult students with disabilities, as defined in Section 1004.02(7), Florida Statutes, may be exempted from meeting the Basic Skills requirements (Rule 6A-10.040). Students served in exceptional student education (except gifted) as defined in s. 1003.01(3)(a), F.S., may also be exempted from meeting the Basic Skills requirement. Each school district and Florida College must adopt a policy addressing procedures for exempting eligible students with disabilities from the Basic Skills requirement as permitted in Section 1004.91(3), F.S.

Students who possess a college degree at the Associate of Applied Science level or higher; who have completed or are exempt from the college entry-level examination pursuant to Section 1008.29, F.S.; or who have passed a state, national, or industry licensure exam are exempt from meeting the Basic Skills requirement (Rule 6A-10.040, F.A.C.)

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Some secondary students with disabilities (ESE) may need additional time (i.e., longer than the regular school year), to master the student performance standards associated with a regular occupational completion point (OCP) or a modified occupational completion point (MOCP). If needed, a student may enroll in the same career and technical course more than once. Documentation should be included in the IEP that clearly indicates that it is anticipated that the student may need an additional year to complete an OCP/MOCP. The student should work on different competencies and new applications of competencies each year toward completion of the OCP(s)/MOCP. After achieving the competencies identified for the year, the student earns credit for the course. It is important to ensure that credits earned by students are reported accurately. The district's information system must be designed to accept multiple credits for the same course number (for eligible students with disabilities). For further information, see Rule 6A-6.0312, F.A.C., Course Modifications for Exceptional Students, and the latest pertinent Technical Assistance Paper (<http://www.fldoe.org/ese/tap-home.asp>).

### **Articulation**

The information related to the guaranteed transfer of credit between an applied technology diploma program and AS/AAS degree must be documented and maintained by the Articulation Coordinating Committee (ACC). The transfer of the applied technology diploma to an AS/AAS degree is guaranteed for a period of three (3) years following the date of the award of the applied technology diploma.

### **Program Length**

In accordance with Rule 6A-10.024, F.A.C. an Applied Technology Diploma program consists of a course of study that is part of an AS/AAS degree program, is less than 60 credit hours, is approximately 50% of the technical component (non-general education), and leads to employment in a specific occupation. An applied technology diploma program may consist of either technical credit or college credit.

Students must have a high school diploma, a GED, or a certificate of completion to be admitted to an applied technology diploma program. Within six weeks of entry, students in ATD programs of 450 or more hours must be tested pursuant to Rule 6A-10.040, F.A.C. and if below minimum standards for completion from the program, must receive remedial instruction. The minimum standards must be at least the equivalent of a score of ten (10) on all sections of basic skills test approved in Rule 6A-10.040, F.A.C. Students must successfully complete all remedial instruction before completing the Applied Technology Diploma.

Community Colleges may offer either college or career credit toward the applied technology diploma. A Career Center in a public school district may offer an applied technology diploma program only as technical credit, with college credit awarded to a student upon articulation to a community college (Section 1004.02, F.S.)

When offered at a community college the standard length of this program is 59 credits. When offered at a technical center the standard length of this program is 1505 clock hours.

In accordance with Rule 6A-10.024, F.A.C. all faculty providing instruction must have at least a baccalaureate degree or an associate degree with demonstrated competencies in the specific instructional program as defined by the Southern Association of Colleges and Schools.

## **Standards**

After successfully completing this program the student will be able to perform the following:

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively.
- 03.0 Demonstrate legal and ethical responsibilities.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts.
- 05.0 Recognize and practice safety and security procedures.
- 06.0 Recognize and respond to emergency situations.
- 07.0 Recognize and practice infection control procedures.
- 08.0 Demonstrate an understanding of information technology applications in healthcare.
- 09.0 Demonstrate employability skills.
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS.
- 11.0 Apply basic math and science skills.
- 12.0 Demonstrate Central Supply Skills.
- 13.0 Demonstrate Competencies in the Core Components of the Surgical First Assistant - Communication And Interpersonal Skills.
- 14.0 Demonstrate an understanding of the basic sciences related to Surgical First Assisting.
- 15.0 Describe and practice safety measures in the surgical environment.
- 16.0 Perform patient care procedures related to the surgical environment and describe methods for meeting patients' needs.
- 17.0 Demonstrate knowledge of the basic surgical skills necessary to function safely and effectively.

- 18.0 Demonstrate Competencies in the Core Components of the Surgical First Assistant - Knowledge and Skills.
- 19.0 Demonstrate Competencies in the Core Components of the Surgical First Assistant - Legal and Ethical Responsibilities.

2011 - 2012

**Florida Department of Education  
Student Performance Standards**

**Program Title: Surgical First Assisting  
PSAV Number: H170300**

When this program is offered at the PSAV level, the following organization of courses, standards, and benchmarks apply.

**Health Science Core:** The Health Science Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Science Core in any other health occupations program do not have to repeat intended outcomes 01-11.

**PSAV Course Number: HSC0003  
Occupational Completion Point: A  
Healthcare Support Worker – 90 Hours – SOC Code 31-9099**

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:
- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
  - 01.02 Identify common methods of payment for healthcare services.
  - 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
  - 01.04 Describe the composition and functions of a healthcare team.
  - 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
  - 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
  - 01.07 Identify characteristics of effective teams.
  - 01.08 Recognize methods for building positive team relationships.
  - 01.09 Analyze attributes and attitudes of an effective leader.
  - 01.10 Recognize factors and situations that may lead to conflict.
  - 01.11 Demonstrate effective techniques for managing team conflict.
  - 01.12 Describe factors that influence the current delivery system of healthcare.
  - 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:
- 02.01 Develop basic speaking and active listening skills.
  - 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
  - 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
  - 02.04 Respond to verbal and non-verbal cues.

- 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.
- 02.06 Use appropriate medical terminology and abbreviations.
- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
- 02.08 Recognize the importance of patient/client educations regarding healthcare.
- 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
- 02.10 Analyze elements of communication using a sender-receiver model.
- 02.11 Distinguish between and report subjective and objective information.
- 02.12 Report relevant information in order of occurrence.

03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:

- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
- 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
- 03.03 Demonstrate procedures for accurate documentation and record keeping.
- 03.04 Interpret healthcare facility policy and procedures.
- 03.05 Explain the “Patient’s Bill of Rights”.
- 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
- 03.07 Describe advance directives.
- 03.08 Describe informed consent.
- 03.09 Explain the laws governing harassment, labor and employment.
- 03.10 Differentiate between legal and ethical issues in healthcare.
- 03.11 Describe a code of ethics consistent with the healthcare occupation.
- 03.12 Identify and compare personal, professional, and organizational ethics.
- 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
- 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
- 03.15 Recognize and report abuse including domestic violence and neglect.
- 03.16 Distinguish among the five schedules of controlled substances.

04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:

- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
- 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
- 04.03 Identify psychological reactions to illness including defense mechanisms.
- 04.04 Identify complementary and alternative health practices.
- 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
- 04.06 Explain the basic concepts of positive self image, wellness and stress.
- 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
- 04.08 Explain the nutrition pyramid.

- 04.09 Recognize the steps in the grief process.
- 05.0 Recognize and practice safety and security procedures. – The student will be able to:
  - 05.01 Recognize safe and unsafe working conditions and report safety hazards.
  - 05.02 Demonstrate the safe use of medical equipment.
  - 05.03 Explain and apply the theory of root- cause analysis
  - 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
  - 05.05 Identify and practice security procedures for medical supplies and equipment.
  - 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions.
  - 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
  - 05.08 Demonstrate proper body mechanics and ergonomics.
  - 05.09 Demonstrate the procedure for properly identifying patients.
  - 05.10 Demonstrate procedures for the safe transport and transfer of patients.
  - 05.11 Describe fire, safety, disaster and evacuations procedures.
  - 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )
- 06.0 Recognize and respond to emergency situations. – The student will be able to:
  - 06.01 Monitor and record vital signs.
  - 06.02 Describe legal parameters relating to the administration of emergency care.
  - 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
  - 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.
- 07.0 Recognize and practice infection control procedures. – The student will be able to:
  - 07.01 Define principles of infection control including standard and transmission based precautions.
  - 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
  - 07.03 Demonstrate knowledge of surgical asepsis.
  - 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.
- 08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:
  - 08.01 Describe technology applications in healthcare.
  - 08.02 Define terms and demonstrate basic computer skills.
  - 08.03 Recognize technology applications in healthcare.
  - 08.04 Interpret information from electronic medical documents.
  - 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.

09.0 Demonstrate employability skills. – The student will be able to:

- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.
- 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
- 09.03 Identify documents that may be required when applying for a job.
- 09.04 Write an appropriate resume.
- 09.05 Conduct a job search.
- 09.06 Complete a job application form correctly.
- 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
- 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
- 09.09 Identify acceptable work habits.
- 09.10 Recognize appropriate affective/professional behavior.
- 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).

10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:

- 10.01 Recognize emerging diseases and disorders
- 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
- 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
- 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
- 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
- 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.

11.0 Apply basic math and science skills. – The student will be able to:

- 11.01 Draw, read, and report on graphs, charts and tables.
- 11.02 Measure time, temperature, distance, capacity, and mass/weight.
- 11.03 Make, use and convert using both traditional and metric units.
- 11.04 Make estimations and approximations and judge the reasonableness of the result.
- 11.05 Convert from regular to 24 hour time.
- 11.06 Demonstrate ability to evaluate and draw conclusions.
- 11.07 Organize and communicate the results obtained by observation and experimentation.
- 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
- 11.09 Calculate ratios

**Course Number: STS0015**  
**Occupational Completion Point: B**  
**Central Supply Technician – 210 Hours – SOC Code 31-9099**

Students completing intended outcomes 16 will meet the qualifications of the occupational completion point as Central Supply Technician.

12.0 Demonstrate central supply skills. –The student will be able to:

- 12.01 Apply the principles of medical/surgical asepsis
- 12.02 Apply infection control techniques following Center for Disease Control (CDC) guidelines.
- 12.03 Inspect equipment and supplies for condition quantity.
- 12.04 Identify principles and demonstrate techniques of disinfection and sterilization.
- 12.05 Identify/correct and/or report package integrity.
- 12.06 Decontaminate instruments equipment and environment.
- 12.07 Replenish supplies and equipment.
- 12.08 Identify instruments, equipment and supplies for any surgical procedure.
- 12.09 Demonstrate the ability to package goods and supplies as required.
- 12.10 Describe various supply distribution methods.
- 12.11 Demonstrate ability to label items correctly.
- 12.12 Discuss and use various inventory control systems.

**Course Number: STS0016**  
**Occupational Completion Point: C**  
**Surgical First Assistant 1– 345 Hours – SOC Code 29-2055**

Students completing intended outcomes 13-19 will meet the requirements of the Surgical First Assistant –ATD Program (H170300). After successful completion of an approved program, students are eligible to take the Association of Surgical Technologists and Surgical Assistants National Certification Examination.

13.0 Demonstrate Competencies in the Core Components of the Surgical First Assistant - Communication And Interpersonal Skills -- The student will be able to:

- 13.01 Use various forms of communication in the role of Surgical First Assistant to communicate relevant, accurate and complete information in a concise and clear manner.
- 13.02 Collaborate with the patient, surgeon, and other members of the Healthcare team to assess, plan, implement, and evaluate the patient's surgical care to promote positive outcomes.
- 13.03 Demonstrate proper use of communication technology including but not limited to intercoms, computers, paging systems.
- 13.04 Demonstrate patient interviewing techniques.
- 13.05 Facilitate teamwork as a patient advocate and assistant to the surgeon.

- 13.06 Demonstrate competency regarding reporting and documentation responsibilities in the clinical setting.
- 14.0 Demonstrate An Understanding Of The Basic Sciences Related To Surgical First Assisting--The student will be able to:
- 14.01 Apply knowledge of the microbial environment to the surgical care of the patient.
  - 14.02 Relate anatomy, physiology and pathophysiology, to surgical procedures.
  - 14.03 Apply the principles of medical and surgical asepsis to surgery.
  - 14.04 Discuss physics, electricity, computers, and robotics as they relate to surgery.
  - 14.05 Apply knowledge of the pharmacologic agents used in the treatment of the surgical patient.
- 15.0 Describe And Practice Safety Measures In The Surgical Environment--The student will be able to:
- 15.01 Inspect emergency equipment and supplies for condition and quantity.
  - 15.02 Implement appropriate Joint Commission patient safety goals.
  - 15.03 Apply knowledge of surgical hazards to safe patient care.

**Course Number: STS0017 (2 of 3)**  
**Occupational Completion Point: C**  
**Surgical First Assistant 2– 345 Hours – SOC Code 29-2055**

- 16.0 Perform Patient Care Procedures Related To The Surgical Environment And Describe Methods For Meeting Patient's Needs--The student will be able to:
- 16.01 Perform safe patient transfer/transportation techniques used in the perioperative setting.
  - 16.02 Apply the principles of safe positioning and restraining patient for surgery.
  - 16.03 Apply the principles of safe usage of the electrosurgical unit, laser, endoscopes, and other equipment utilized during the perioperative period.
  - 16.04 Identify the roles of the members of the surgical team during each phase of surgery.
  - 16.05 Assist surgeon with the perioperative care of the surgical patient.
  - 16.06 Apply the perioperative principles of preoperative patient assessment and preparation, techniques and methods of anesthesia related to the type of surgical procedure and principles of postoperative anesthetic management
  - 16.07 Apply knowledge of wound management techniques, including suturing techniques in the operating room, perioperative care of special needs patients, and perioperative assessment of the skin.
- 17.0 Demonstrate Knowledge Of The Basic Surgical Skills Necessary To Function Safely And Effectively--The student will be able to:
- 17.01 Demonstrate an understanding of the disease processes and the relationship of the processes to the specific types of pathologies according to body systems.
  - 17.02 Select instruments, equipment and supplies for surgical procedures using surgeon preference/procedure cards.
  - 17.03 Measure and pour sterile solutions.

- 17.04 Perform surgical scrub.
- 17.05 Put on sterile gown and gloves.
- 17.06 Drape tables and solution stands.
- 17.07 Set up sterile mayo stand and instrument table.
- 17.08 Prepare sutures, ligatures, ties.
- 17.09 Assist surgeon in gowning and gloving.
- 17.10 Assist in draping patient, pass instruments, monitor field.
- 17.11 Identify/correct and/or report breaks in aseptic technique.
- 17.12 Monitor body fluids, e.g. blood loss, ascites.
- 17.13 Assist in ensuring the prevention of foreign body retention including completing counts with R.N..
- 17.14 Identify principles and demonstrate techniques of disinfection and sterilization.
- 17.15 Assist in removing/applying cast.
- 17.16 Decontaminate instruments equipment and environment.
- 17.17 Prepare and/or update procedure cards.
- 17.18 Apply electrical knowledge to safe patient care practices in surgery.

**Course Number: STS0018 (3 of 3)**  
**Occupational Completion Point: C**  
**Surgical First Assistant 3– 490 Hours – SOC Code 29-2055**

18.0 Demonstrate Competencies In The Core Components of the Surgical First Assistant - Knowledge and Skills -- The student will be able to:

- 18.01 Prioritize care or actions to be taken in a given circumstance to expedite the operative procedure or emergency situation.
- 18.02 Describe preoperative diagnosis, common complications, operative pathophysiology and postoperative care related to the specific surgical procedures performed.
- 18.03 Analyze and relate common patient diagnostic and monitoring results to the surgeon as applicable to the surgical specialty.
- 18.04 Assist surgeon and/or healthcare team with preoperative preparation of the patient to facilitate proper patient care including but not limited to positioning, draping, and sterile setup preparation.
- 18.05 Demonstrate and describe types of incisions.
- 18.06 Identify types of tissue, organs, and gross anatomical structures correctly during surgical procedures.
- 18.07 Demonstrate appropriate tissue handling techniques including the care of the surgical specimens.
- 18.08 Provide appropriate exposure and visualization of the operative field for the surgeon.
- 18.09 Describe the appropriate sequence for common surgical procedures.
- 18.10 Utilize appropriate techniques to assist with hemostasis.
- 18.11 Demonstrate appropriate safe surgical techniques when the case involves either thermal, radiological, laparoscopic, environmental, or other known surgical hazard.
- 18.12 Participate in volume replacement or autotransfusion techniques as appropriate.
- 18.13 Select appropriate instruments and supplies for the type of tissue.
- 18.14 Demonstrate competence with technology, the use of instruments, equipment and supplies for the surgical procedure.

- 18.15 Uses surgical instruments skillfully in ways consistent with their design and purpose.
  - 18.16 Utilize appropriate techniques to assist with the closure of body planes.
  - 18.17 Select and apply appropriate wound dressings.
  - 18.18 Assist surgeon in securing drainage systems to tissue.
  - 18.19 Evaluate patient and report appropriately any abnormal condition found postop related to positioning.
  - 18.20 Assist surgeon with postoperative care of the patient to facilitate proper patient care.
  - 18.21 Demonstrate appropriate response to emergency situations including respiratory/cardiac arrest situations, sudden hypoxia, hemorrhage, shock, surgical misadventures, contamination, perforation of viscous or cavity, critical equipment failure, and exposure, retraction and compression injuries.
  - 18.22 Facilitate the continuity of care within and across the healthcare settings to access available resources and services.
- 19.0 Demonstrate Competencies In The Core Components Of The Surgical First Assistant - Legal And Ethical Responsibilities --The student will be able to:
- 19.01 State methods, standards and aids that assist a surgical first assistant with interpreting and following legal responsibilities.
  - 19.02 Describe the importance of maintaining credentials and following the appropriate credentialing policy in accordance with hospital policy and appropriate laws and regulations.
  - 19.03 Explain the job requirements.
  - 19.04 Demonstrate an understanding of the legal, ethical, moral, and professional responsibilities of working as a surgical assistant, and the professional skills necessary to fulfill the role.
  - 19.05 Provide health care within the ethical/legal framework of the job description including role responsibilities and limitations.

2011 - 2012

**Florida Department of Education  
Student Performance Standards**

**Program Title:** Surgical First Assisting  
**ATD CIP Number:** 0351090901/0351090902  
**SOC Code(s):** 31-9099; 29-2055

When this program is offered by a community or state college, the following standards, and benchmarks apply.

**Health Science Core: The Health Science Core is a core of basic knowledge necessary for any health occupations career. Students who have previously completed the Health Science Core or any other health occupations program do not have to repeat intended outcomes 01-11.**

- 01.0 Demonstrate knowledge of the health care delivery system and health occupations. – The student will be able to:
- 01.01 Identify the basic components of the health care delivery system including public, private, government and non-profit.
  - 01.02 Identify common methods of payment for healthcare services.
  - 01.03 Describe the various types of healthcare providers and the range of services available including resources to victims of domestic violence.
  - 01.04 Describe the composition and functions of a healthcare team.
  - 01.05 Identify the general roles and responsibilities of the individual members of the healthcare team.
  - 01.06 Identify the roles and responsibilities of the consumer within the healthcare delivery system.
  - 01.07 Identify characteristics of effective teams.
  - 01.08 Recognize methods for building positive team relationships.
  - 01.09 Analyze attributes and attitudes of an effective leader.
  - 01.10 Recognize factors and situations that may lead to conflict.
  - 01.11 Demonstrate effective techniques for managing team conflict.
  - 01.12 Describe factors that influence the current delivery system of healthcare.
  - 01.13 Explain the impact of emerging issues including technology, epidemiology, bioethics and socioeconomics on healthcare delivery systems.
- 02.0 Demonstrate the ability to communicate and use interpersonal skills effectively. – The student will be able to:
- 02.01 Develop basic speaking and active listening skills.
  - 02.02 Develop basic observational skills and related documentation strategies in written and oral form.
  - 02.03 Identify characteristics of successful and unsuccessful communication including communication styles and barriers.
  - 02.04 Respond to verbal and non-verbal cues.
  - 02.05 Compose written communication using correct spelling, grammar, a formatting and confidentiality and specific formats of letter writing.
  - 02.06 Use appropriate medical terminology and abbreviations.

- 02.07 Recognize the importance of courtesy and respect for patients and other healthcare workers and maintain good interpersonal relationships.
  - 02.08 Recognize the importance of patient/client educations regarding healthcare.
  - 02.09 Adapt communication skills to varied levels of understanding and cultural orientation including diverse age, cultural, economic, ethnic and religious groups.
  - 02.10 Analyze elements of communication using a sender-receiver model.
  - 02.11 Distinguish between and report subjective and objective information.
  - 02.12 Report relevant information in order of occurrence.
- 03.0 Demonstrate legal and ethical responsibilities. – The student will be able to:
- 03.01 Discuss the legal framework of the healthcare occupations including scope of practice legislation.
  - 03.02 Explain practices that could result in malpractice, liability, negligence, abandonment, false imprisonment and fraud.
  - 03.03 Demonstrate procedures for accurate documentation and record keeping.
  - 03.04 Interpret healthcare facility policy and procedures.
  - 03.05 Explain the “Patient’s Bill of Rights”.
  - 03.06 Identify standards of the Health insurance Portability and Accountability Act (HIPAA).
  - 03.07 Describe advance directives.
  - 03.08 Describe informed consent.
  - 03.09 Explain the laws governing harassment, labor and employment.
  - 03.10 Differentiate between legal and ethical issues in healthcare.
  - 03.11 Describe a code of ethics consistent with the healthcare occupation.
  - 03.12 Identify and compare personal, professional, and organizational ethics.
  - 03.13 Recognize the limits of authority and responsibility of health care workers including legislated scope of practice
  - 03.14 Recognize and report illegal and/or unethical practices of healthcare workers.
  - 03.15 Recognize and report abuse including domestic violence and neglect.
  - 03.16 Distinguish among the five schedules of controlled substances.
- 04.0 Demonstrate an understanding of and apply wellness and disease concepts. – The student will be able to:
- 04.01 Describe strategies for prevention of diseases including health screenings and examinations.
  - 04.02 Identify personal health practices and environmental factors which affect optimal function of each of the major body systems.
  - 04.03 Identify psychological reactions to illness including defense mechanisms.
  - 04.04 Identify complementary and alternative health practices.
  - 04.05 Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body and apply safety practices related to these and other high risk behaviors.
  - 04.06 Explain the basic concepts of positive self image, wellness and stress.
  - 04.07 Develop a wellness and stress control plan that can be used in personal and professional life.
  - 04.08 Explain the nutrition pyramid.
  - 04.09 Recognize the steps in the grief process.
- 05.0 Recognize and practice safety and security procedures. – The student will be able to:

- 05.01 Recognize safe and unsafe working conditions and report safety hazards.
  - 05.02 Demonstrate the safe use of medical equipment.
  - 05.03 Explain and apply the theory of root- cause analysis
  - 05.04 Identify and describe methods in medical error reduction and prevention in the various healthcare settings.
  - 05.05 Identify and practice security procedures for medical supplies and equipment.
  - 05.06 Demonstrate personal safety procedures based on Occupations Safety and Health Administration (OSHA) and Centers for Disease Control (CDC) regulations (including standard precautions).
  - 05.07 Recognize Materials Data Safety Sheets (MSDS) and comply with safety signs, symbols and labels.
  - 05.08 Demonstrate proper body mechanics and ergonomics.
  - 05.09 Demonstrate the procedure for properly identifying patients.
  - 05.10 Demonstrate procedures for the safe transport and transfer of patients.
  - 05.11 Describe fire, safety, disaster and evacuations procedures.
  - 05.12 Discuss The Joint commission patient safety goals ([www.jointcommission.org](http://www.jointcommission.org) )
- 06.0 Recognize and respond to emergency situations. – The student will be able to:
- 06.01 Monitor and record vital signs.
  - 06.02 Describe legal parameters relating to the administration of emergency care.
  - 06.03 Obtain and maintain training or certification on cardiopulmonary resuscitation (CPR), automated external defibrillator (AED), foreign body airway obstruction (FBAO) and first aid.
  - 06.04 Recognize adverse drug related emergencies and take appropriate first aid action.
- 07.0 Recognize and practice infection control procedures. – The student will be able to:
- 07.01 Define principles of infection control including standard and transmission based precautions.
  - 07.02 Demonstrate knowledge of medical asepsis and practice procedures such as hand-washing and isolation.
  - 07.03 Demonstrate knowledge of surgical asepsis.
  - 07.04 Describe how to dispose correctly of biohazardous materials according to appropriate government guidelines such as OSHA.
- 08.0 Demonstrate an understanding of information technology applications in healthcare. – The student will be able to:
- 08.01 Describe technology applications in healthcare.
  - 08.02 Define terms and demonstrate basic computer skills.
  - 08.03 Recognize technology applications in healthcare.
  - 08.04 Interpret information from electronic medical documents.
  - 08.05 Identify methods of communication to access and distribute data such as fax, e-mail and internet.
- 09.0 Demonstrate employability skills. – The student will be able to:
- 09.01 Identify personal traits or attitudes desirable in a member of the healthcare team.

- 09.02 Exemplify basic professional standards of healthcare workers as they apply to hygiene, dress, language, confidentiality and behavior (i.e. telephone etiquette, courtesy and self-introductions).
  - 09.03 Identify documents that may be required when applying for a job.
  - 09.04 Write an appropriate resume.
  - 09.05 Conduct a job search.
  - 09.06 Complete a job application form correctly.
  - 09.07 Examine levels of education, credentialing requirements including licensure and certification, employment opportunities, workplace environments and career growth potential.
  - 09.08 Recognize levels of education, credentialing requirements, employment opportunities, workplace environments and career growth potential.
  - 09.09 Identify acceptable work habits.
  - 09.10 Recognize appropriate affective/professional behavior.
  - 09.11 Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services or biotechnology research and development).
- 10.0 Demonstrate knowledge of blood borne diseases, including HIV/AIDS. – The student will be able to:
- 10.01 Recognize emerging diseases and disorders
  - 10.02 Distinguish between fact and fallacy about the transmission and treatment of diseases caused by blood borne pathogens including Hepatitis B.
  - 10.03 Identify community resources and services available to the individuals with diseases caused by blood borne pathogens.
  - 10.04 Identify "at risk" behaviors which promote the spread of diseases caused by blood borne pathogens and the public education necessary to combat the spread of these diseases.
  - 10.05 Apply infection control techniques designed to prevent the spread of diseases caused by blood borne pathogens to the care of all patients following Centers for Disease Control (CDC) guidelines.
  - 10.06 Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing.
- 11.0 Apply basic math and science skills. – The student will be able to:
- 11.01 Draw, read, and report on graphs, charts and tables.
  - 11.02 Measure time, temperature, distance, capacity, and mass/weight.
  - 11.03 Make, use and convert using both traditional and metric units.
  - 11.04 Make estimations and approximations and judge the reasonableness of the result.
  - 11.05 Convert from regular to 24 hour time.
  - 11.06 Demonstrate ability to evaluate and draw conclusions.
  - 11.07 Organize and communicate the results obtained by observation and experimentation.
  - 11.08 Ask appropriate scientific questions and recognize what is involved in experimental approaches to the solution of such questions.
  - 11.09 Calculate ratios

**Central Supply Assistant (SOC Code 31-9099) - Students completing intended outcomes 12 will meet the qualifications of the occupational completion point as Central Supply Technician.**

12.0 Demonstrate Central Supply Skills The student will be able to:

- 12.01 Apply the principles of medical/surgical asepsis
- 12.02 Apply infection control techniques following Center for Disease Control (CDC) guidelines.
- 12.03 Inspect equipment and supplies for condition quantity.
- 12.04 Identify principles and demonstrate techniques of disinfection and sterilization.
- 12.05 Identify/correct and/or report package integrity.
- 12.06 Decontaminate instruments equipment and environment.
- 12.07 Replenish supplies and equipment.
- 12.08 Identify instruments, equipment and supplies for any surgical procedure.
- 12.09 Demonstrate the ability to package goods and supplies as required.
- 12.10 Describe various supply distribution methods.
- 12.11 Demonstrate ability to label items correctly.
- 12.12 Discuss and use various inventory control systems.

**Students completing intended outcomes 13-19 will meet the requirements of the Surgical First Assistant –ATD Program (SOC Code 29-2055). After successful completion of an approved program, students are eligible to take the Association of Surgical Technologists and Surgical Assistants National Certification Examination.**

13.0 Demonstrate Competencies in the Core Components of the Surgical First Assistant - Communication And Interpersonal Skills -- The student will be able to:

- 13.01 Use various forms of communication in the role of Surgical First Assistant to communicate relevant, accurate and complete information in a concise and clear manner.
- 13.02 Collaborate with the patient, surgeon, and other members of the Healthcare team to assess, plan, implement, and evaluate the patient's surgical care to promote positive outcomes.
- 13.03 Demonstrate proper use of communication technology including but not limited to intercoms, computers, paging systems.
- 13.04 Demonstrate patient interviewing techniques.
- 13.05 Facilitate teamwork as a patient advocate and assistant to the surgeon.
- 13.06 Demonstrate competency regarding reporting and documentation responsibilities in the clinical setting.

14.0 Demonstrate An Understanding Of The Basic Sciences Related To Surgical First Assisting--The student will be able to:

- 14.01 Apply knowledge of the microbial environment to the surgical care of the patient.
- 14.02 Relate anatomy, physiology and pathophysiology, to surgical procedures.
- 14.03 Apply the principles of medical and surgical asepsis to surgery.
- 14.04 Discuss physics, electricity, computers, and robotics as they relate to surgery.
- 14.05 Apply knowledge of the pharmacologic agents used in the treatment of the surgical patient.

- 15.0 Describe And Practice Safety Measures In The Surgical Environment--The student will be able to:
- 15.01 Inspect emergency equipment and supplies for condition and quantity.
  - 15.02 Implement appropriate Joint Commission patient safety goals.
  - 15.03 Apply knowledge of surgical hazards to safe patient care.
- 16.0 Perform Patient Care Procedures Related To The Surgical Environment And Describe Methods For Meeting Patient's Needs--The student will be able to:
- 16.01 Perform safe patient transfer/transportation techniques used in the perioperative setting.
  - 16.02 Apply the principles of safe positioning and restraining patient for surgery.
  - 16.03 Apply the principles of safe usage of the electrosurgical unit, laser, endoscopes, and other equipment utilized during the perioperative period.
  - 16.04 Identify the roles of the members of the surgical team during each phase of surgery.
  - 16.05 Assist surgeon with the perioperative care of the surgical patient.
  - 16.06 Apply the perioperative principles of preoperative patient assessment and preparation, techniques and methods of anesthesia related to the type of surgical procedure and principles of postoperative anesthetic management
  - 16.07 Apply knowledge of wound management techniques, including suturing techniques in the operating room, perioperative care of special needs patients, and perioperative assessment of the skin.
- 17.0 Demonstrate Knowledge Of The Basic Surgical Skills Necessary To Function Safely And Effectively--The student will be able to:
- 17.01 Demonstrate an understanding of the disease processes and the relationship of the processes to the specific types of pathologies according to body systems.
  - 17.02 Select instruments, equipment and supplies for surgical procedures using surgeon preference/procedure cards.
  - 17.03 Measure and pour sterile solutions.
  - 17.04 Perform surgical scrub.
  - 17.05 Put on sterile gown and gloves.
  - 17.06 Drape tables and solution stands.
  - 17.07 Set up sterile mayo stand and instrument table.
  - 17.08 Prepare sutures, ligatures, ties.
  - 17.09 Assist surgeon in gowning and gloving.
  - 17.10 Assist in draping patient, pass instruments, monitor field.
  - 17.11 Identify/correct and/or report breaks in aseptic technique.
  - 17.12 Monitor body fluids, e.g. blood loss, ascites.
  - 17.13 Assist in ensuring the prevention of foreign body retention including completing counts with R.N..
  - 17.14 Identify principles and demonstrate techniques of disinfection and sterilization.
  - 17.15 Assist in removing/applying cast.
  - 17.16 Decontaminate instruments equipment and environment.
  - 17.17 Prepare and/or update procedure cards.

17.18 Apply electrical knowledge to safe patient care practices in surgery.

### **Surgical First Assistant Advanced Skills**

18.0 Demonstrate Competencies In The Core Components of the Surgical First Assistant - Knowledge and Skills -- The student will be able to:

- 18.01 Prioritize care or actions to be taken in a given circumstance to expedite the operative procedure or emergency situation.
- 18.02 Describe preoperative diagnosis, common complications, operative pathophysiology and postoperative care related to the specific surgical procedures performed.
- 18.03 Analyze and relate common patient diagnostic and monitoring results to the surgeon as applicable to the surgical specialty.
- 18.04 Assist surgeon and/or healthcare team with preoperative preparation of the patient to facilitate proper patient care including but not limited to positioning, draping, and sterile setup preparation.
- 18.05 Demonstrate and describe types of incisions.
- 18.06 Identify types of tissue, organs, and gross anatomical structures correctly during surgical procedures.
- 18.07 Demonstrate appropriate tissue handling techniques including the care of the surgical specimens.
- 18.08 Provide appropriate exposure and visualization of the operative field for the surgeon.
- 18.09 Describe the appropriate sequence for common surgical procedures.
- 18.10 Utilize appropriate techniques to assist with hemostasis.
- 18.11 Demonstrate appropriate safe surgical techniques when the case involves either thermal, radiological, laparoscopic, environmental, or other known surgical hazard.
- 18.12 Participate in volume replacement or autotransfusion techniques as appropriate.
- 18.13 Select appropriate instruments and supplies for the type of tissue.
- 18.14 Demonstrate competence with technology, the use of instruments, equipment and supplies for the surgical procedure.
- 18.15 Uses surgical instruments skillfully in ways consistent with their design and purpose.
- 18.16 Utilize appropriate techniques to assist with the closure of body planes.
- 18.17 Select and apply appropriate wound dressings.
- 18.18 Assist surgeon in securing drainage systems to tissue.
- 18.19 Evaluate patient and report appropriately any abnormal condition found postop related to positioning.
- 18.20 Assist surgeon with postoperative care of the patient to facilitate proper patient care.
- 18.21 Demonstrate appropriate response to emergency situations including respiratory/cardiac arrest situations, sudden hypoxia, hemorrhage, shock, surgical misadventures, contamination, perforation of viscous or cavity, critical equipment failure, and exposure, retraction and compression injuries.
- 18.22 Facilitate the continuity of care within and across the healthcare settings to access available resources and services.

19.0 Demonstrate Competencies In The Core Components Of The Surgical First Assistant - Legal And Ethical Responsibilities --The student will be able to:

- 19.01 State methods, standards and aids that assist a surgical first assistant with interpreting and following legal responsibilities.
- 19.02 Describe the importance of maintaining credentials and following the appropriate credentialing policy in accordance with hospital policy and appropriate laws and regulations.
- 19.03 Explain the job requirements.
- 19.04 Demonstrate an understanding of the legal, ethical, moral, and professional responsibilities of working as a surgical assistant, and the professional skills necessary to fulfill the role.
- 19.05 Provide health care within the ethical/legal framework of the job description including role responsibilities and limitations.

2011 - 2012

**Florida Department of Education  
Curriculum Framework**

**Course Title:** Health Science Education Directed Study  
**Career Cluster:** Health Science Cluster

<b>Secondary – Career Preparatory</b>	
Course Number	8400100
CIP Number	0317999910
Grade Level	10-12, 30, 31
Standard Length	Multiple credits
Teacher Certification	ANY HEALTH OCCUP G
CTSO	HOSA

### **Purpose**

The purpose of this course is to provide students with learning opportunities in a prescribed program of study within the Health Science cluster that will enhance opportunities for employment in the career field chosen by the student.

### **Course Structure**

The content is prescribed by the instructor based upon the individual student's assessed needs for directed study.

This course may be taken only by a student who has completed or is currently completing a specific secondary job preparatory program or occupational completion point for additional study in this career cluster. A student may earn multiple credits in this course.

The selected standards and benchmarks, which the student must master to earn credit, must be outlined in an instructional plan developed by the instructor.

### **Laboratory Activities**

A learning laboratory is provided as required to support the educational activities of the student. This laboratory may be in the traditional classroom, in an industry setting, or a virtual learning environment.

### **Special Notes**

#### **Career and Technical Student Organization (CTSO)**

Health Occupations Students of America, Inc. (HOSA) is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as

an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

In addition to accommodations, some secondary students with disabilities (ESE) will need modifications to meet their special needs. Modifications change the outcomes or what the student is expected to learn, e.g., modifying the curriculum of a secondary career and technical education course. Note postsecondary curriculum cannot be modified.

Some secondary students with disabilities (ESE) may need additional time (i.e., longer than the regular school year), to master the student performance standards associated with a regular occupational completion point (OCP) or a modified occupational completion point (MOCP). If needed, a student may enroll in the same career and technical course more than once. Documentation should be included in the IEP that clearly indicates that it is anticipated that the student may need an additional year to complete an OCP/MOCP. The student should work on different competencies and new applications of competencies each year toward completion of the OCP(s)/MOCP. After achieving the competencies identified for the year, the student earns credit for the course. It is important to ensure that credits earned by students are reported accurately. The district's information system must be designed to accept multiple credits for the same course number (for eligible students with disabilities).

### **Standards**

After successfully completing this program, the student will be able to perform the following:

- 01.0 Demonstrate expertise in a specific occupation contained within the career cluster.
- 02.0 Conduct investigative research on a selected topic related to the career cluster using approved research methodology, interpret findings, and prepare presentation to defend results.
- 03.0 Apply enhanced leadership and professional career skills.
- 04.0 Demonstrate higher order critical thinking and reasoning skills appropriate for the selected program of study.

2011 - 2012

**Florida Department of Education  
Student Performance Standards**

**Course Title:** Health Science Education Directed Study  
**Course Number:** 8400100  
**Course Credit:** 1

01.0 Demonstrate expertise in a specific occupation within the career cluster.

01.01 The benchmarks will be selected from the appropriate curriculum frameworks and determined by the instructor based upon the individual students assessed needs.

02.0 Conduct investigative research on a selected topic related to the career cluster using approved research methodology, interpret findings, and prepare presentation to defend results--The student will be able to:

- 02.01 Select investigative study referencing prior research and knowledge.
- 02.02 Collect, organize and analyze data accurately and precisely.
- 02.03 Design procedures to test the research.
- 02.04 Report, display and defend the results of investigations to audiences that may include professionals and technical experts.

03.0 Apply enhanced leadership and professional career skills--The student will be able to:

- 03.01 Develop and present a professional presentation offering potential solutions to a current issue.
- 03.02 Enhance leadership and career skills through work-based learning including job placement, job shadowing, entrepreneurship, internship, or a virtual experience.
- 03.03 Participate in leadership development opportunities available through the appropriate student organization and/or other professional organizations.
- 03.04 Enhance written and oral communications through the development of presentations, public speaking, and live and/or virtual interviews.

04.0 Demonstrate higher order critical thinking and reasoning skills appropriate for the selected program of study--The student will be able to:

- 04.01 Use mathematical and/or scientific skills to solve problems encountered in the chosen occupation.
- 04.02 Read and interpret information relative to the chosen occupation.
- 04.03 Locate and evaluate key elements of oral and written information.
- 04.04 Analyze and apply data and/or measurements to solve problems and interpret documents.
- 04.05 Construct charts/tables/graphs using functions and data.

**Florida Department of Education  
Curriculum Framework**

**Course Title:** Orientation to Health Occupations  
**Course Type:** Orientation/Exploratory and Career Planning  
**Career Cluster:** Health Science

Middle School	
Course Number	8400110
CIP Number	03179999OR
Grade Level	6-8, 30, 31
Standard Length	.5 credit hours
Teacher Certification	HEALTH ED \$4 HEALTH \$6 ANY HEALTH OCCUP G
CTSO	HOSA
Facility Code	[252] <a href="http://www.fldoe.org/edfacil/sref.asp">http://www.fldoe.org/edfacil/sref.asp</a> (State Requirements for Educational Facilities)

### **Purpose**

The purpose of this course is to assist students in making informed decisions regarding their future academic and occupational goals and to provide information regarding careers in the Health Science career cluster. The content includes but is not limited to basic information about the kinds of jobs and workers involved the various career paths, financial rewards, occupational hazards, and educational requirements. Information concerning the practices for promoting good health is included.

Instruction and learning activities are provided in a laboratory setting using hands-on experiences with the equipment, materials and technology appropriate to the course content and in accordance with current practices.

### **Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

### **Special Notes**

Special projects that are related to occupational clusters are provided, including making dental molds, designing eye glasses, fingerprinting, role playing activities of daily living as a handicapped individual, developing an emergency evacuation plan for their own home, menu planning, and visualizing X-rays. Team teaching and integration of the curriculum with English, Math and Science is encouraged.

Guest speakers from industry make an important contribution to the effectiveness of this program/course.

### **Career Planning**

The career and education planning course required by Section 1003.4156, Florida Statutes, has been integrated into this course. This course must include career exploration using CHOICES or a comparable cost-effective program and educational planning using the online student advising system known as Florida Academic Counseling and Tracking for Students at the Internet website FACTS.org; and shall result in the completion of a personalized academic and career plan.

### **Career and Technical Student Organization (CTSO)**

Health Occupations Students of America, Inc. (HOSA) is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan to meet individual needs and ensure equal access. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

In addition to accommodations, some secondary students with disabilities (ESE) will need modifications to meet their special needs. Modifications change the outcomes or what the student is expected to learn, e.g., modifying the curriculum of a secondary career and technical education course.

### **Standards**

After successfully completing this course the student will be able to perform the following:

- 01.0 Recognize progress in health care service.
- 02.0 Show an awareness of health careers.
- 03.0 Identify life stages and the health care needs of each.
- 04.0 Demonstrate basic communication skills.
- 05.0 Perform basic mathematical calculations and demonstrate problem solving skills used by the health care worker.
- 06.0 Demonstrate an understanding of principles of wellness.
- 07.0 Demonstrate an understanding of the sciences in the health care field.
- 08.0 Demonstrate employability skills related to a health occupation.

Florida Department of Education  
Student Performance Standards

**Course Title:** Orientation to Health Occupations  
**Course Number:** 8400110  
**Course Credit:** .5 credit hour

**Course Description:**

- 01.0 Recognize progress in health care service. – The student will be able to:
- 01.01 **Compare medical progress from early times to the present. For example: surgical techniques, anesthesia, treatment and equipment.**
  - 01.02 **Discuss health care leaders who brought about change and progress from early times to the present.**
- 02.0 Show an awareness of health careers. – The student will be able to:
- 02.01 **Describe the relationship between self-awareness and satisfying career choices.**
  - 02.02 **Demonstrate an understanding of tasks related to health service careers.**
  - 02.03 Identify the personal traits required for employment in health care.
  - 02.04 List factors related to job satisfaction.
  - 02.05 **Complete a project, solve a problem, or complete an activity related to a career through team or group work.**
  - 02.06 **Identify at least three occupations out of each of the career clusters: therapeutic, diagnostic, infomatics, environmental services, and bio-medical (bio-chemist, geneticist, toxicologist, microbiologist etc.)**
  - 02.07 **Discuss at least three occupations out of each of the career clusters listed above.**
  - 02.08 **Recognize the differences between volunteer and governmental agencies in healthcare.**
  - 02.09 **Identify types of education and training levels as related to health careers.**
  - 02.10 Appreciate the importance of legal and ethical behaviors as related to health careers.
- 03.0 Identify life stages and the health care needs of each. – The student will be able to:
- 03.01 **Describe common health care needs from birth to death and identify occupations that address those needs.**
  - 03.02 **Identify occupations aimed at promoting optimum health.**
- 04.0 Demonstrate basic communication skills. – The student will be able to:
- 04.01 **Demonstrate the ability to follow written and oral directions.**
  - 04.02 **Demonstrate examples of verbal and non-verbal communication.**
  - 04.03 Recognize the role and use of terminology and abbreviations used in various health occupations.

05.0 Perform basic mathematical calculations and demonstrate problem solving skills used by the health care worker. – The student will be able to:

05.01 **Describe the importance of why accurate calculations and effective problem solving skills are required.**

05.02 Accurately identify and perform appropriate numeric procedures with problems found in numeric, symbolic, or word form as they relate to the occupations.

06.0 Demonstrate an understanding of principles of wellness. – The student will be able to:

06.01 Describe how cultural and individual differences relate to wellness and quality of life and how these differences impact health problems of society.

06.02 Demonstrate an understanding of the risk factors that contribute to illness.

06.03 **Identify consequences of substance abuse and high risk behaviors.**

06.04 **Identify ecological issues that affect wellness and identify environmental careers associated such as parks and recreation, health inspectors, sanitariums.**

07.0 Demonstrate an understanding of the sciences in the health care field. – The student will be able to:

07.01 **Recognize the role science has in the health field.**

07.02 Identify the various science educational courses required by various health occupations.

08.0 Demonstrate employability skills related to a health occupation. – The student will be able to:

08.01 **List skills needed for employment in a health occupation of choice.**

08.02 **At a minimum, demonstrate the skills used within a health occupation from the following list:**

**08.02.01 Allied Health Assisting: Basic First Aid**

**08.02.02 Use of a Wheelchair, Crutches and/or Walkers**

**08.02.03 Visualizing X-rays**

**08.02.04 Dental Aide: Making Dental Molds**

**08.02.05 First Responder: Basic First Aide/Rescue Breathing**

**08.02.06 Home Health Aide: Menu Planning**

**08.02.07 Patient Feeding Techniques**

**08.02.08 Vision Care Assisting: Designing Eye Glasses**

\*(Skills may be added to the above list as needed)

Bold items indicate essential competencies for time-shortened scheduling such as six and nine. Listed below are the standards that must be met to satisfy the requirements of Section 1003.4156, Florida Statutes.

### **Understanding the Workplace**

24.0 Describe how work relates to the needs and functions of the economy, society, and personal fulfillment.

- 25.0 Describe the influences that societal, economic, and technological changes have on employment trends and future training.
- 26.0 Describe the need for career planning, changing careers, and the concept of lifelong learning and how they relate to personal fulfillment.
- 27.0 Describe how legislation such as the Americans with Disabilities Act and Child Labor Laws regulates employee rights.

### **Self- Awareness**

- 28.0 Use results of an interest assessment to describe their top interest areas and relate to careers/career clusters.
- 29.0 Identify five values that they consider important in making a career choice.
- 30.0 Identify skills needed for career choices and match to personal abilities.
- 31.0 Demonstrate the ability to apply skills of self-advocacy and self-determination throughout the career planning process.
- 32.0 Identify strengths and areas in which assistance is needed at school.
- 33.0 Apply results of all assessments to personal abilities in order to make realistic career choices.

### **Exploring Careers**

- 34.0 Demonstrate the ability to locate, understand, and use career information.
- 35.0 Use the Internet to access career and education planning information.
- 36.0 Identify skills that are transferable from one occupation to another.
- 37.0 Demonstrate use of career resources to identify occupational clusters, career opportunities within each cluster, employment outlook, and education/ training requirements.
- 38.0 Explain the relationship between educational achievement and career success.

### **Goal Setting and Decision-Making**

- 39.0 Identify and demonstrate use of steps to make career decisions.
- 40.0 Identify and demonstrate processes for making short and long term goals.

### **Workplace Skills**

- 41.0 Demonstrate personal qualities (e.g. dependability, punctuality, responsibility, integrity, getting along with others) that are needed to be successful in the workplace.
- 42.0 Demonstrate skills to interact positively with others.
- 43.0 Demonstrate employability skills such as working on a team, problem-solving and organizational skills.

### **Career and Education Planning**

- 44.0 Identify secondary and postsecondary school courses and major area of interests that meet tentative career plans.
- 45.0 Identify advantages and disadvantages of entering various secondary and postsecondary programs for the attainment of career goals.
- 46.0 Demonstrate knowledge of varied types and sources of financial aid to obtain assistance

- for postsecondary education.
- 47.0 Identify inappropriate discriminatory behaviors that may limit opportunities in the workplace.
  - 48.0 Develop a career and education plan that includes short and long-term goals, high school program of study, and postsecondary/work goals.
  - 49.0 Describe how extracurricular programs can be incorporated in career and education planning.
  - 50.0 Demonstrate knowledge of high school exit options (e.g., standard diploma, certificate of completion, special diploma, GED, etc.) and impact on post-school opportunities.
  - 51.0 Describe high school credits and explain how GPAs are calculated.

### **Job Search**

- 52.0 Demonstrate skills to complete a job application.
- 53.0 Demonstrate skills essential for a job interview.

**Florida Department of Education  
Curriculum Framework**

**Program Title:** Exploration of Health Occupations and Career Planning  
**Program Type:** Orientation/Exploratory and Career Planning  
**Career Cluster:** Health Science

<b>Secondary – Middle School</b>	
Program Number	8400210
CIP Number	03179999CE
Grade Level	6-8, 30, 31
Standard Length	One Semester or the equivalent of one-half a school year
Teacher Certification	ANY HEALTH OCCUP G HOME EC @2 VOC HM EC @4 FAM CON SC 1 Health \$6 Health ED 6 @3 @4
CTSO	HOSA
Facility Code	[252] <a href="http://www.fldoe.org/edfacil/sref.asp">http://www.fldoe.org/edfacil/sref.asp</a> (State Requirements for Educational Facilities)

### **Purpose**

The purpose of this course is to assist students in making informed decisions regarding their future academic and occupational goals and to provide information regarding careers in the Health Science career cluster. The content includes but is not limited to exploratory activities relating to all health occupational clusters. An asterisk (\*) is used to indicate essential competencies for time-shortened scheduling such as six and nine week courses. The program also includes an introduction to medical ethics, consumerism, characteristics of health care workers, community health agencies and basic computer literacy.

The purpose of this course is to give students initial exposure to the skills and attitudes associated with a broad range of occupations relating to careers in health, including job requirements and tasks performed, to assist students in making informed decisions regarding their future academic and occupational goals.

### **Laboratory Activities**

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

Instruction and learning activities are provided in a laboratory setting using hands-on experiences with the equipment, materials and technology appropriate to the course content and in accordance with current practices.

## **Special Notes**

Special projects that are related to each occupational cluster are provided, including role playing activities related to specific careers, visualizing x-rays and crutch-walking, operating the microscope, making orthopedic casts, and specific lab procedures. Team teaching and integration of the curriculum with English, Math and Science is encouraged.

Guest speakers from industry and related field trips make important contributions to the effectiveness of this course.

**The career and exploration planning course required by Section 1003.4156, Florida Statutes, may be integrated into this course. This course must include career exploration using CHOICES or a comparable cost-effective program and educational planning using the online student advising system known as Florida Academic Counseling and Tracking for Students at the Internet website FACTS.org; and shall result in the completion of a personalized academic and career plan.**

**\*The information highlighted in blue is new to this course and allows districts to integrate the middle school Career Exploration and Decision Making course as required by Section 1003.4156, Florida Statutes.**

### **Career and Technical Student Organization (CTSO)**

Health Occupations Students of America, Inc. (HOSA) is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

### **Accommodations**

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan to meet individual needs and ensure equal access. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

In addition to accommodations, some secondary students with disabilities (ESE) will need modifications to meet their special needs. Modifications change the outcomes or what the student is expected to learn, e.g., modifying the curriculum of a secondary career and technical education course.

### **Standards**

After successfully completing this course, the student will be able to perform the following:

- 01.0 Identify and discuss progress in health care.
- 02.0 Demonstrate an understanding of health careers.

- 03.0 Demonstrate an understanding of the importance of legal and ethical behavior related to health care.
- 04.0 Perform basic communication skills.
- 05.0 Perform basic mathematical calculations and demonstrate problem solving skills used by the health care worker.
- 06.0 Apply science principles to the health care field.
- 07.0 Perform basic health care skills.
- 08.0 Demonstrate occupational safety.

Florida Department of Education  
Student Performance Standards

**Course Title:** Exploration of Health Occupations and Career Planning  
**Course Number:** 8400210  
**Course Credit:** One Semester or the equivalent of one-half a school year

**Course Description:**

- 01.0 Identify and discuss progress in health care. – The student will be able to:
- 01.01 **Demonstrate knowledge of how the scientific method and advances in science have impacted beliefs and practices from ancient times to the present.**
  - 01.02 Compare the broad scope of health care delivery systems in homes, institutions, and the community.
  - 01.03 **Demonstrate ability to make informed decisions regarding choice of health care providers and products.**
  - 01.04 Research contributions made in the field of medical science and their impact on the health care field.
- 02.0 Demonstrate an understanding of health careers. – The student will be able to:
- 02.01 **Identify the personal traits required for employment in health care and discuss factors related to job satisfaction.**
  - 02.02 **List at least three careers out of each of the career clusters: Therapeutic Services, Diagnostic Services, Health Informatics, Support Services, Biotechnology Research and Development.**
  - 02.03 **Demonstrate the knowledge of skills needed to research and describe a career from the above clusters.**
  - 02.04 List the advantages and disadvantages of one occupation in each cluster including the following factors; job opportunities, salary range, fringe benefits, working conditions, occupational hazards, and educational requirements.
- 03.0 Demonstrate an understanding of the importance of legal and ethical behavior related to health care. – The student will be able to:
- 03.01 **Identify responsibilities in maintaining ethical standards, confidentiality, and the patient's rights.**
  - 03.02 **Define terms related to the legal and ethical aspects of the health care industry. For example: malpractice, negligence, invasion of privacy, quackery, ethics and law, Patients Bill of Rights.**
  - 03.03 **Identify ethical and unethical conduct through simulated examples such as role playing, making posters, TV commercials, etc.**
- 04.0 Perform basic communication skills. – The student will be able to:
- 04.01 Demonstrate ability to follow written and oral directions.
  - 04.02 Demonstrate examples of verbal and non-verbal communication.
  - 04.03 **Identify employability skills necessary to obtain a job in health care.**

- 04.04 **Demonstrate an understanding of how computers and other technology are used in the health care field.**
- 04.05 **Use common medical terminology and abbreviations associated with health occupations.**
- 05.0 Perform basic mathematical calculations and demonstrate problem solving skills used by the health care worker. – The student will be able to:
  - 05.01 **Identify the importance of why accurate calculations and effective problem solving skills are required for health care workers.**
  - 05.02 **Calculate mathematical problems and measurements related to health care.**
  - 05.03 **Understand the role of scientific method in problem solving and medical research.**
  - 05.04 Convert common weights, measure, and volumes to metric as applied in the health care setting.
- 06.0 Apply science principles to the health care field. – The student will be able to:
  - 06.01 **Identify the general plan of the human body and how it functions.**
  - 06.02 **Demonstrate how the principles of physical science, biology, and microbiology apply within the health care industry.**
- 07.0 Perform basic health care skills. – The student will be able to:
  - 07.01 **Measure and record (graph) height, weight, and temperature, pulse and respiration (TPR), intake and output of body fluids.**
  - 07.02 **Demonstrate medical aseptic technique by handwashing, gloving, and application of mask and gown.**
  - 07.03 Perform proper body mechanics to prevent self and patient injuries.
  - 07.04 **Demonstrate basic first aid skills.**
  - 07.05 Recognize the need for personal comfort measures to include skin care, bed bath, bedmaking, mouth care.
  - 07.06 Show an awareness of safe patient transfer techniques.
  - 07.07 Recognize the importance of instructions to patients in safe use of assisting devices.
- 08.0 Demonstrate occupational safety. – The student will be able to:
  - 08.01 Discuss occupational safety issues that relate to the employer, employee, and the patient in the health care setting.
  - 08.02 Demonstrate health safety habits that will prevent injury to health care workers, co-workers, and patients.
  - 08.03 Show an awareness of the importance of identifying poisons and hazardous materials commonly found in the workplace.
  - 08.04 Describe the importance of fire safety including prevention and evacuation.

**Bold items** indicate essential competencies for time-shortened scheduling such as six and nine week courses.

**Listed below are the standards that must be met to satisfy the requirements of Section 1003.4156, Florida Statutes.**

## **Understanding the Workplace**

- 01.0 Describe how work relates to the needs and functions of the economy, society, and personal fulfillment.
- 02.0 Describe the influences that societal, economic, and technological changes have on employment trends and future training.
- 03.0 Describe the need for career planning, changing careers, and the concept of lifelong learning and how they relate to personal fulfillment.
