PART VI – CERTIFICATION BY PROFESSIONAL ENGINEER

This is to certify that the design calculation for sizing the containment and recycle system to contain all process wastewater and the runoff from a 25-year, 24-hour storm event have been prepared or examined by me and found to be in conformity with sound engineering principles. All earthen dams storing process wastewater and runoff above grade are constructed and maintained in accordance with sound engineering practices. This further certifies that the BMP plan for this facility has also been prepared or examined by me and is determined to be in conformity with sound engineering principles. The BMP plan is adequate to prevent and control spills and promote containment for all pollutants used, stored, or transported at the facility.
