I am implementing the following Florida Forestry WBMP exception(s) for State Imperiled Species of Nesting Birds:

- Documented cases where birds have acclimated to disturbances.
- Where consultation with a FWC biologist provided a functional alternative.

¹ Consult the Florida Forestry Wildlife Best Management Practices for State Imperiled Species, FDACS-01869, January 16, 2014, as incorporated by reference in Rule 5I-8.001, F.A.C., for descriptions, range maps, and WBMP practices applicable to the species listed above. Florida Forestry WBMPs pertain only to those ongoing forestry activities that are normal and customary for the area. Florida Forestry WBMPs do not apply to tree removal activities preceding a change in land use. For example, harvesting activities that would convert silviculture lands to mining or development would not be eligible for the program.

² Refer to the Florida Silviculture Best Management Practices Manual (Florida Department of Agriculture and Consumer Services, Florida Forest Service) which is incorporated in Rule 5I-6.002, F.A.C.
