Statement of Estimated Regulatory Costs

Statement of Estimated Regulatory Costs under Section 120.541, Florida Statutes

(2) A statement of estimated regulatory costs shall include:

(a) An economic analysis showing whether the rule directly or indirectly:

1. Is likely to have an adverse impact on economic growth, private sector job creation or employment, or private sector investment in excess of \$1 million in the aggregate within 5 years after the implementation of the rule;

Because the amendment to the legal description solely involves changes to correct scrivener's errors in the current legal description, the amendment will not and cannot change the boundaries or the acreage within the boundaries of the District. Therefore, the amended rule will have no direct or indirect impact on these areas.

2. Is likely to have an adverse impact on business competitiveness, including the ability of persons doing business in the state to compete with persons doing business in other states or domestic markets, productivity, or innovation in excess of \$1 million in the aggregate within 5 years after the implementation of the rule; or

Because the amendment to the legal description solely involves changes to correct scrivener's errors in the current legal description, the amendment will not and cannot change the boundaries or the acreage within the boundaries of the District. Therefore, the amended rule will have no direct or indirect impact on these areas.

3. Is likely to increase regulatory costs, including any transactional costs, in excess of \$1 million in the aggregate within 5 years after the implementation of the rule.

Because the amendment to the legal description solely involves changes to correct scrivener's errors in the current legal description, the amendment will not and cannot change the boundaries or the acreage within the boundaries of the District. Therefore, the amended rule will not directly or indirectly result in increased costs of any nature.

(b) A good faith estimate of the number of individuals and entities likely to be required to comply with the rule, together with a general description of the types of individuals likely to be affected by the rule.

Because the amendment to the legal description solely involves changes to correct scrivener's errors in the current legal description, the amendment will not and cannot change the boundaries or the acreage within the boundaries of the District. Therefore, the amended rule will not directly or indirectly affect any individuals.

(c) A good faith estimate of the cost to the agency, and to any other state and local government entities, of implementing and enforcing the proposed rule, and any anticipated effect on state or local revenues.

Because the amendment to the legal description solely involves changes to correct scrivener's errors in the current legal description, the amendment will not and cannot change the boundaries or the acreage within the boundaries of the District. Therefore, the amended rule will not directly or indirectly result in any additional costs to the agency or any other state and local government entities and will have no anticipated effect on state or local revenues.

(d) A good faith estimate of the transactional costs likely to be incurred by individuals and entities, including local government entities, required to comply with the requirements of the rule. As used in this section, "transactional costs" are direct costs that are readily ascertainable based upon standard business practices, and include filing fees, the cost of obtaining a license, the cost of equipment required to be installed or used or procedures required to be employed in complying with the rule, additional operating costs incurred, the cost of monitoring and reporting, and any other costs necessary to comply with the rule.

Because the amendment to the legal description solely involves changes to correct scrivener's errors in the current legal description, the amendment will not and cannot change the boundaries or the acreage within the boundaries of the District. Therefore, the amended rule will not directly or indirectly result in increased transactional costs to any individual or entity.

(e) An analysis of the impact on small businesses as defined by s. 288.703, and an analysis of the impact on small counties and small cities as defined in s. 120.52. The impact analysis for small businesses must include the basis for the agency's decision not to implement alternatives that would reduce adverse impacts on small businesses.

Because the amendment to the legal description solely involves changes to correct scrivener's errors in the current legal description, the amendment will not and cannot change the boundaries or the acreage within the boundaries of the District. Therefore, the amended rule will have no adverse impact on small businesses, counties or cities and so no alternatives are necessary.

(f) Any additional information that the agency determines may be useful.

No additional information is necessary.

(g) In the statement or revised statement, whichever applies, a description of any regulatory alternatives submitted under paragraph (1)(a) and a statement adopting the alternative or a statement of the reasons for rejecting the alternative in favor of the proposed rule.
