Indicated below are the approximate boundaries of the Everglades Construction Project diversion basins for Lake Okeechobee discharges not included in the original regulated acreage of the EAA represented by the base period water quality and flow dataset described in Appendix 3. The Diversion Project drainage areas became regulated under this Chapter upon completion and operation of their associated diversion structures. Upon the effective date of this rule amendment, the original EAA base period water quality and flow data dataset will be adjusted using an acreage adjustment factor to account for these areas as described next. Note that the boundaries and diversion basin acreages described in this Appendix are approximate and may differ from those described in permits issued in accordance with Chapter 40E-63, F.A.C., for which more detailed and accurate drainage information is submitted by permit applicants and approved by the District at the time of permit issuance. Where there are differences, the District will make a determination as to accuracy of the permitted acreage.
